13.—Principal Imports into Canada for Consumption from United Kingdom.

No.	Item.	United Kingdom.			
		1929.	1930.	1931.	1932.
V. Iron and Its Products—continued.					
Farm Implements and Machinery—					
1	Cream separators..... No.	\$ 521	-	-	-
		\$ 11,882	-	-	-
2	Other dairy machinery..... \$	739	8,786	6,862	34,623
3	Harvesters..... No.	-	-	20	-
		\$ -	-	-	-
4	Other harvesting implements..... \$	13,736	7,813	8,601	6,533
Planting and Tillage—					
5	Drills and parts..... \$	267	1,010	81	-
6	Harrows and parts..... \$	2,791	2,771	277	136
7	Ploughs and parts..... \$	93	176	692	49
8	Other planting..... \$	1,224	1,514	1,119	1,480
Seed Separation—					
9	Threshing machine separators..... No.	-	-	-	-
		\$ -	-	-	-
10	Threshing machine separator parts..... \$	1,163	-	-	-
11	Combined harvester-threshers and parts No.	-	-	-	-
		\$ -	-	-	-
12	Traction engines, farm, \$1,400 or less..... No.	-	12	15	3
		\$ -	9,508	9,013	1,187
13	Other farm tractors, parts and repairs..... \$	372	65,614	24,242	8,419
	Totals, Farm Implements and Mach'y ¹ \$	141,766	168,502	121,091	208,605
Hardware and Cutlery—					
14	Cutlery..... \$	741,932	675,529	566,500	403,757
Hardware—					
15	Needles and pins..... \$	205,807	217,158	198,239	218,384
16	Nuts and bolts..... cwt.	4,752	3,989	4,042	2,084
		\$ 22,353	19,338	26,166	14,247
17	Screws..... \$	1,329	1,490	981	711
18	Locks..... \$	26,670	37,703	11,987	7,218
	Totals, Hardware and Cutlery ¹ \$	1,133,003	1,116,982	868,390	678,979
Machinery (except Agricultural)—					
19	Cleaners, vacuum..... No.	-	1	6	-
		\$ -	24	317	-
20	Sewing machines..... No.	11,980	5,335	5,960	1,000
		\$ 209,489	134,435	113,533	38,555
21	Sewing machine parts and attachments... \$	249,397	280,503	99,676	40,834
22	Washing machines, domestic..... No.	1	7	1	2
		\$ 384	8,628	35	1,075
23	Diamond drills and parts..... \$	12,449	29,657	7,435	-
24	Ore crushers, stamp mills, etc..... \$	193,015	338,597	258,227	210,011
25	Rock drills..... \$	12,703	88,612	73,560	98,690
26	Well-drilling machinery and equipment... \$	2,280	23,191	8,524	840
27	Other mining and metallurgical machinery \$	109,324	146,318	181,015	67,923
Office or Business—					
28	Adding machines..... No.	3	-	3	5
		\$ 104	-	405	518
29	Typewriters..... No.	19	195	541	184
		\$ 1,171	11,302	33,818	11,695
30	Other office or business..... \$	4,873	417	428	4,476
Printing and Bookbinding—					
31	Printing presses..... \$	139,945	218,783	188,631	122,843
32	Typesetting machines..... \$	15,294	1,107	1,517	898
33	Other printing and bookbinding..... \$	53,582	51,291	148,365	50,260
34	Air compressors..... \$	114,849	149,071	81,069	64,653
35	Coke and gas machinery..... \$	291,149	254,564	70,262	26,794
36	Cranes and derricks..... \$	37,733	56,949	64,940	481
37	Ice-making and refrigerating machinery... \$	266	2,050	2,250	-
38	Lathes, metal-working..... \$	68,526	76,429	55,440	23,975
39	Logging equipment..... \$	83,031	28,367	34,481	326
40	Metal-working machines, n.o.p..... \$	119,831	187,419	456,296	249,126
41	Paper- and pulp-mill machinery..... \$	343,642	39,892	14,863	4,803
42	Pumps, power, and parts..... \$	66,640	99,192	66,733	38,450
43	Road machinery (incl. rollers and scrapers) \$	-	-	27,238	12,205
44	Rolling-mill machines..... \$	905	5,108	6,252	10,211
45	Shovels, steam and electric..... \$	46,510	6,808	7,357	82
46	Textile machinery..... \$	753,498	911,294	595,684	783,325
	Totals, Machinery (except Agricultural) ¹ \$	3,997,457	4,558,199	3,775,148	2,600,519

¹ Totals include other items not specified.

¹ In this classification the expression "Canadian Farm Products" refers, in the case of exports, to commodities actually produced, in their original state, on Canadian farms. In the case of imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both imports and exports, materials or commodities such as Canada does not produce in their original forms, e.g., cane sugar, tea, rubber, cotton, silk, etc.

¹ Totals include other countries not specified.² Costa Rica, Guatemala, Honduras, Nicaragua and Salvador.Subsection 10.—Comparison of the Volume of Imports and Exports.¹

The statistics of the external trade of Canada have not, until lately, been analysed in detail to reveal the physical volume of external trade as well as the dollar value of that trade, and have therefore been somewhat misleading when used to show the physical growth of production and external trade. When, for example, Table 1 of this chapter is examined, it seems to show stagnation in our external trade between the early 70's and the middle 90's of last century and a very rapid growth thereafter. Yet we know that the apparent stagnation was partly due to the

¹ Further information as to the methods adopted in making the following analyses will be found on p. 806 of the Bureau's Annual Report on the Trade of Canada for the fiscal year ended Mar. 31, 1932.

fall in general prices between the '70's and the middle '90's, while the rapid growth of the later figures is exaggerated by the rise of prices after 1897, especially in the war period 1914 to 1921. Since 1929 another precipitate decline in prices has exaggerated the actual decrease of trade. Thus the figures as published give us no true measure of the *volume* of our external trade, yet, of the commodities that satisfy human needs, it is the volume rather than the value with which the masses of the population are more intimately concerned. Volume is, from many points of view, a more important consideration than value, and it is desirable to secure a record of the fluctuations in the volume of the country's trade as distinguished from the value thereof. This is what is attempted in Table 22.

The method adopted for ascertaining the fluctuations in volume has been to take a base year—1926—and to re-value the quantities of each commodity imported or exported in any given year at the average import or export value of that commodity in the standard or base year. Where quantities are not available, the values of items are assumed to have moved in the same direction and in the same proportions as closely related commodities. For this reason the results must not be regarded as of great precision but, since the value of goods not returned by quantity, and of those not comparable over a limited series of years, is small in comparison with the total trade, the amount of error introduced on their account is not considerable. By this method it is comparatively easy to compare the volume of the trade in a particular year with that in a recent year and the margin of error is fairly small. When, however, a comparison of the volume of trade in a particular year with that of another year ten or more years before is undertaken, the margin of error is very much greater. Certain new commodities have come into existence in the course of the decade, while the qualities of others have been materially changed; further, various new items have been added to the customs classifications, and it is not always possible to say just what customs items of 1932 correspond with those of 1914. For these reasons comparisons with the pre-war fiscal year ended 1914 have been discontinued since 1929. This comparison for 1929 and certain previous years appeared on pp. 581-583 of the 1930 Year Book.

In Table 22 the values and volumes of imports and exports respectively for the years 1927, 1928, 1929, 1930, 1931 and 1932 are compared with 1926, for the main groups, as follows: the imports and exports are first shown at the values at which the trade was recorded; the same imports and exports are then shown at the value they would have amounted to if the average price or unit value had been the same in each year as it was in 1926. In other words, the figures on the basis of 1926 average values enable a comparison to be made of the imports or exports for the given years on the basis of variations in quantity only, variations due to different prices having been eliminated. Index numbers of declared values, that is, the total declared values of the imports or exports in each year expressed as percentages of 1926, are then given. These are followed by the index numbers of average values, which show the prices at which goods were imported or exported in each year expressed as percentages of the prices in 1926. Finally, the index numbers of physical volume show the relative quantity of merchandise imported or exported in each year expressed as a percentage of the quantity of the same merchandise in 1926.

For an analysis in greater detail, dealing similarly with sub-groups and principal commodities imported and exported, the reader is referred to pp. 806-826 of the Annual Report on the Trade of Canada for 1932 published by the Dominion Bureau of Statistics.

Section 4.—The Tourist Trade of Canada.¹

Tourist Expenditures in Canada.—In recent years the tourist trade has become an important source of revenue in certain sections of the Dominion, materially affecting the balance of trade. It represents the economic disposition of national assets in which Canada is particularly rich, namely: its picturesque scenery; its invigorating climate; its opportunities for hunting, fishing and boating, as well as for winter sports—for the exploitation of which a considerable capital expenditure has been made on hotel accommodation, improved highways and other attractions. Those entering from the United States in automobiles are by far the most important class of tourists. The business accruing to the Dominion in this manner represents some return for expenditures on highways which have been very large in the period since the War (see pp. 682-684). In order to attract this traffic, highways have been built through regions of picturesque scenery, such as the Rocky mountains, northern Ontario and the Laurentians and Gaspé in Quebec. A further asset for Canada arises from the fact that these scenic regions with their invigorating climate are at their best in the summer holiday season when motorists are most ready to travel. The expenditure of travellers coming to Canada from other countries on business has the same effect, so far as its influence on the balance of trade is concerned, as the export of additional commodities would have. Indeed, in so far as commodities are sold to tourists travelling in the Dominion, our exportable surplus of such commodities is reduced.

It is impossible to obtain a direct record of expenditures of this kind. Moreover, even a rough estimate of the total is extremely difficult to make, visitors to Canada being of all classes, engaging in widely different activities or forms of recreation, remaining for varying periods, with expenditures undoubtedly ranging from very small to very large amounts.

The tourists who enter Canada may be divided into three classes: (a) those coming in *via* ocean ports; (b) those entering from the United States in automobiles; (c) those entering from the United States by rail or steamer. In 1932 these classes are estimated, according to recently revised figures, to have expended in Canada \$10,543,000, \$145,307,000 (equivalent to \$159,838,000 in Canadian funds at average rates of exchange for the period) and about \$38,243,000 (\$42,067,000 in Canadian funds) respectively, or a grand total of approximately \$194,093,000 (about \$212,448,000 in Canadian funds).

The Department of National Revenue records the number of tourists entering Canada in automobiles from the United States through each of the ports of entry along the border. An estimate of the expenditure of this class of tourist according to the provinces by which they entered, shows the following provincial distribution of their expenditure in 1932: Maritime Provinces, \$8,366,830; Quebec, \$35,903,644; Ontario, \$87,482,247; Manitoba, \$1,606,729; Saskatchewan, \$630,769; Alberta, \$613,850 and British Columbia, \$10,622,601.

Expenditures of Canadian Tourists Abroad.—Canadian tourists visiting other countries travel in the main to the British Isles and other European countries on visits home, or as sight-seers. Again, many of them, especially elderly or delicate persons, go to Florida, Bermuda or the West Indies. These tourists may be classi-

¹Abridged from "The Tourist Trade in Canada, 1920-26", and reports for each year from 1927 to 1932 inclusive, published by the Bureau of Statistics and obtainable on application. These reports contain a full explanation of the methods used in making the estimates.

fied in the same three classes as those entering Canada. The total expenditures of such Canadian tourists in other countries were \$57,403,000 in 1932—a decline of \$19,049,000 from the previous year.

Summary.—For the years 1920 to 1932 the total estimated expenditures of tourists from other countries in Canada, as compared with those of Canadian tourists in other countries, are given in Table 23.

23.—Tourist Expenditures in Canada and of Canadians Abroad, 1920-32.

¹Converted into Canadian funds this was the equivalent of \$212,448,003.

It will be noticed that until the depression made itself felt in 1930, while there was a steady increase in the amount spent by tourists from other countries in Canada, the amount spent by Canadians in other countries also tended to increase. Indeed, as compared with the generally depressed state of trade and industry during the past few years, Canada's tourist business has exhibited a surprising vitality. The "favourable" balance accruing from tourist trade grew rapidly in the post-war period to 1929 and has not declined in proportion to commodity trade for the latest two years. The statistics demonstrate how valuable an asset to Canada is her tourist trade, the expenditures of tourists in Canada in 1932 constituting an "invisible" export of greater value than any single commodity exported in the calendar year 1932. If the "invisible" import of expenditure of Canadian tourists in other countries is deducted, the balance still represents an item not exceeded by any other single export.

Section 5.—Balance of International Payments 1920-32.¹

"Balance of Trade" figures are frequently misinterpreted due to the persistence of the doctrine long ago exploded that a nation's trade is necessarily in a healthy state when exports exceed imports, necessitating an import of gold to make up the difference. Trade was then said to show a "favourable" balance. This theory only took account of the "visible" or commodity items of trade, whereas the true

¹Abridged from the annual report "Canada's Balance of International Payments", by Herbert Marshall, B.A., F.S.S., Chief of the Internal Trade Branch of the Dominion Bureau of Statistics. This report includes explanatory data on the methods followed in computing these statistics.

balance of a nation's trade can only be known when not only the commodity items are considered, but also the "invisible" items such as interest, freight, immigrant remittances, financial services, tourist traffic, etc. In short, all debit and credit transactions must be set down in order to find out the true balance. If all the visible and invisible items are thus tabulated the debit or credit difference will be a final invisible item—capital import or export—and this will bring the nation's trade account into a state of balance. Thus, the commodity trade balance of a country cannot be understood by itself but only as it is interpreted in the light of the invisible items of a country's international transactions. In the light of such data, it will be found that a so-called favourable or unfavourable balance will mean an entirely different thing at different times in a country's history. The balance of international payments, which takes account not only of commodity trade but of all transactions, reveals the meaning of the trade balance. It shows, for example, that in 1920, 1921 and 1922 our international accounts were balanced by large imports of capital, although our commodity trade balance was favourable in 1920 and 1922. During these years Britain repaid us war funds as follows: 1920, \$104,000,000; 1921, \$128,000,000; 1922, \$84,000,000. From 1923-28, however, the international accounts show a credit balance after allowing for interest payments and maturities, thus denoting capital exports. In these years Canada became temporarily a capital-exporting country. In these latter years, therefore, the explanation of our favourable commodity trade balance was quite different from that for the period, 1894 to 1903, when it was explained by payments of interest and maturities.

From the foregoing it will be seen that an estimated balance of international payments is indispensable to the understanding of trade accounts. It has, however, a great many other important uses, among which the following may be mentioned: (1) to give a comprehensive picture of our international debits and credits and how they are balanced; (2) to show the extent of our international borrowings and lendings; (3) to show the magnitude of individual invisible items, such as interest, freights, tourist traffic, etc., in our international transactions; (4) to explain exchange disturbances and the effect of international financial difficulties; and (5) to furnish data for guidance in the formulation of international fiscal, financial and commercial policy.

As already stated, in the years from 1923 to 1928 Canada became temporarily a capital exporting country. This was the result of abundant funds accumulating in the Dominion owing to three causes. In the first place, there had come into the country during the War about \$1,250,000,000 through the purchase of our commodities at high prices; this was seeking an investment outlet. In the second place, the large investment of United States capital in the Dominion from 1914 to 1920 was now increasing the nation's output. In the third place, successive large harvests at relatively high world prices were a foundation of prosperity. These factors combined, caused an unprecedented accumulation of savings, which was used by financial institutions and individuals not only to finance domestic capital needs, but also to avail themselves of opportunities for profitable investment abroad. The prolonged and extravagant "bull" market in the New York and other United States' stock exchanges culminating in the early summer of 1929 and the high interest rates prevailing in those markets attracted enormous sums to the United States from other countries, including Canada. Thus from 1923 to 1928 we had on balance an export of capital to our credit, though at the same time other countries, particularly the United States, continued to invest large sums in the Dominion.

In contrast to this there were unfavourable balances in 1929 and 1930, considering both visible and invisible items, of \$65,000,000 and \$159,000,000 respectively, while in 1931 the balance was favourable by about \$28,000,000. In the light of all available information, it appears that the balances in 1929 and 1930 represented a net movement of capital into Canada for investment, while that of 1931 represented a net movement outwards. In the latter year, however, the capital export appears to have been in the main not for investment but for the purpose of retiring maturing issues and for repurchases.

Unfortunately, the statistics of current capital movements leave much to be desired, but such as do exist point clearly to the conclusion that there was a movement, on balance, of short and long term funds into Canada in 1929. Short term funds employed by the chartered banks largely in New York, fell from \$188,000,000 at the beginning of 1929 to \$98,000,000 at the end of the year. There was also a considerable repatriation of private short term capital, though no definite information is available as to its amount. The conclusion is warranted that Canadian holdings abroad acted as a shock absorber in reducing the effects of the maladjustment in Canada's balance of payments in 1929, and that the remainder of the task was performed by an inward movement of foreign capital. In 1930 the inflow of foreign capital for investment appears to have played a larger part in the balance of payments, although there was again some repatriation of Canadian funds. The fluctuations of exchange resulting in a net inward movement of gold, the first since 1925, indicated a demand for Canadian funds. In view of the fact that the balance of payments, exclusive of the capital items, was severely against the Dominion, the only means by which this demand could be created was through a considerable influx of capital.

In 1931 the situation with regard to international transactions had undergone another considerable change. The unfavourable commodity balance was reduced to less than \$4,000,000. The invisible unfavourable balance (all items exclusive of commodities, gold and capital) was \$36,000,000, an adverse total of \$40,000,000. There was a net gold export of \$68,000,000. The gold movement, therefore, offset the deficit of \$40,000,000, and, supposing no errors or omissions in the statement, allowed for a capital export of approximately \$28,000,000. Available evidence indicates that this amount consisted in the main of repayment, retirement and repurchase of Canadian securities held abroad.

Declines in the amounts of various items of the statement since 1929 indicate the tremendous effect wrought by the depression upon Canada's international transactions in goods and services. Merchandise exports fell from \$1,200,000,000 in 1929 to \$608,000,000 in 1931. While a large proportion of the decline is explainable in terms of lower price levels, it does represent a huge falling-off in volume. An excellent illustration of the special difficulties presented to Canada by the slump in world prices, is seen in a table of index numbers of imports and exports (pp. 595-596) which shows that Canada, in common with most countries whose exports consist largely of primary products, suffered a greater reduction in the prices of her export commodities than was characteristic of the prices of imported goods. In other words, the purchasing power of Canada's exports declined drastically in 1930, export prices based on declared values in that year declining 17.8 p.c., while import prices declined only 1.4 p.c. From 1926 to 1932 export prices declined 56.2 p.c. compared to a decline in import prices of 37.6 p.c.

24.—Estimated Balance of International Payments, 1929 to 1932.

NOTE.—Figures for 1920-26 are given at pp. 601-692 of the 1929 Year Book, although these have since been somewhat revised in later estimates. Figures for 1927 and 1928 will be found at p. 531 of the 1932 Year Book.

¹ Included in Commodity Trade since 1928. ² Net capital movements and errors and omissions.

In 1932 the balance of payments statement showed credits exceeding debits by approximately \$72,000,000. Of this \$23,000,000 is net capital exports and \$49,000,000 is attributable to errors and omissions. The net capital export was again accounted for largely by the payment of maturities and other debt-reducing transactions abroad. Outstanding features of the statement are the greater relative reduction of commodity imports as compared with exports, gold exports of \$67,000,000 and tourist receipts of \$212,000,000 in Canadian currency. Tourist traffic, gold and the purchase of Canadian securities to the amount of \$150,000,000 were outstanding factors in bringing our international account into balance.

CHAPTER XVII.—INTERNAL TRADE.

This treatment of trade within the Dominion commences with a general statement on interprovincial trade. This is followed by sections dealing with the statistics of the grain trade and of the marketing of live stock and animal products. Statistics of cold storage facilities and of commodities in cold storage are next in order. In the latter part of the chapter will be found sections relating to various administrative services connected with trade, including: the payment of bounties; the granting of patents, copyrights and trade marks; and weights and measures, electricity and gas inspection. The concluding section of the chapter deals with the statistics of wholesale and retail merchandising.

Section 1.—Interprovincial Trade.¹

Canada may be divided into the following five economic regions, each deriving its specific character from the predominant occupations of its people:—

1. *The Eastern Fishing, Lumbering and Mining Region*, comprising the river valley and gulf of the St. Lawrence, together with the Atlantic coast; in other words, the greater part of the Maritime Provinces, the northern part of the province of Quebec (excluding the former district of Ungava), and a portion of northern Ontario.

2. *The Eastern Agricultural and Industrial Region*, comprising the cultivated portions of the Maritime Provinces and of the provinces of Quebec and Ontario. In the latter provinces the cultivated areas extend along the banks of the St. Lawrence and its tributaries.

3. *The Central Agricultural Region*, extending from the Red River valley to the Rocky mountains and from the Canadian-United States boundary to about 56° N. lat.

4. *The Western Fishing, Mining and Lumbering Region*, comprising the western portion of the province of Alberta, the whole of British Columbia and the southern portion of Yukon.

5. *The Northern Fishing and Hunting Region*, extending from the regions of permanent settlement northwards, and from the coast of Labrador to the Pacific and to the Alaskan boundary. This vast region is sparsely inhabited by indigenous nomadic tribes engaged in fishing and hunting for their own support or for exchange with the fur-trading companies, and with individual whalers and traders who visit the region.

¹Revised by G. S. Wrong, B.Sc., Chief of the Transportation Branch, Dominion Bureau of Statistics.

Great differences exist between the products of these various regions; even the fisheries and lumber products of the east are quite distinct from those of British Columbia. The needs of the people throughout the country are met to a great extent by the exchange of the products of one region for those of another.

Interprovincial trade in what is now Canada had its beginning, many years before Confederation, in the exchange of the furs and lumber products of Upper and Lower Canada for the fisheries and mineral products of the Maritimes. Indeed, it was thought at the time of Confederation that the coal fields of Nova Scotia would furnish sufficient fuel for the needs of all the eastern part of the Dominion. Later, manufacturers of Ontario and Quebec found markets from one end of the Dominion to the other in exchange for the farm, mineral and other products required by large urban communities and produced principally in western and northern regions. Thus, the principle of comparative advantage is seen operating in the increased trade between the economic regions of the Dominion, a trade which is principally carried on over the railways of the country, but also largely over its waterways. A comparatively new development is the inauguration of sea transport between Eastern Canada and British Columbia via the Panama Canal. (See pp. 702-703.)

A monthly traffic report of the railways of Canada is published by the Transportation Branch of the Dominion Bureau of Statistics showing, for each province and for the Dominion as a whole, the total *revenue* freight traffic of all railways (not the "on company service" freight), divided into 70 classes of commodities. The data also show the quantity of each class that originated and terminated in each province, and are of use in computing the imports and exports of each province for each of the 70 classes of commodities. These statistics show rail traffic only, a limitation which should be borne in mind in connection with the trade of provinces having water transportation. Summary figures for all commodities are given in Table 1.

The total revenue freight traffic movement on the steam railways of Canada fluctuates to a certain extent with the yield of the crops and with activity in the mining and construction industries involving heavy movements of low-grade freight. The general trend from 1921 to 1928 was upward, increasing from 83,814,436 tons of freight carried in 1921 to 119,227,758 tons in 1928. In 1929, however, a decrease to 114,600,778 tons and in 1930 a further decrease to 95,833,228 tons was reported and, with the continued industrial depression, there have been still greater decreases to 73,837,245 tons in 1931 and to 60,468,093 tons in 1932.

Statements similar to that in Table 1 may be compiled for any of the 70 commodities for which statistics are collected, showing the interprovincial trade by rail in these commodities. For details see "Summary of Monthly Traffic Reports of the Railways of Canada, 1932" obtainable from the Dominion Bureau of Statistics.

Section 2.—Grain Trade Statistics.¹

The Canada Year Book, 1922-23, contained on pp. 581-583, an historical summary of the more important points respecting the shipment, inspection and sale of Canadian grain under the Canada Grain Act, and an outline of the Canada Grain Act of 1925 appeared at p. 1017 of the 1925 Year Book. The 1929 amendments were dealt with at pp. 1047-1048 of the 1930 Year Book, and the Canada Grain Act, 1930, at p. 1101 of the 1931 Year Book.

Movement of Canadian Wheat, Crop Year 1931-32.—A résumé of the Canadian wheat movement naturally begins with a description of the crop of the Western Inspection Division. The wheat crop of 1931 marketed in the Western Division during the crop year from Aug. 1, 1931, to July 31, 1932, amounted to 302.7 million bushels. A carry-over of 114.3 million bushels from the previous crop year, together with some minor items, brought the stock of the Western Division to a total for the year of 417.0 million bushels (see the chart on p. 606 for particulars). As for distribution, 241.2 million bushels were commercially disposed of, the chief items of which were 83 million bushels exported to the United Kingdom and 95 million bushels shipped to the Eastern Division. The direct exports to the United States were 4 million bushels and to other countries 41 million bushels. The total shipments from the Western Division were thus 223.5 million bushels. The wheat used by the milling companies for the manufacture of flour amounted to about 17.6 million bushels, of which 12.4 million bushels were ground into flour for domestic consumption. The all-rail movement eastward from the Western Division, including shipments to the Ogilvie Flour Mills Co. at Fort William for grindings, was 120.2 thousand bushels. Lake shipments from Fort William and

¹Revised by Dr. T. W. Grindley, Chief, Agricultural Branch, Dominion Bureau of Statistics.

Port Arthur were 146.3 million bushels, 95.1 million bushels going to Canadian ports and 51.2 million to United States ports. The shipments to Canadian and American ports represented, respectively, an increase of 38.0 p.c. and a decrease of 32.1 p.c. from 1930-31. The principal Canadian lake ports were those of lake Huron and Georgian bay, with receipts of 22.2 million bushels, and Port Colborne with 24.9 million bushels. Among the United States' lake ports, Buffalo was of chief importance in the handling of Canadian wheat, with receipts by water from Port Arthur and Fort William of 50.1 million bushels. The export of wheat through Vancouver was 74.0 million bushels, as compared with 72.3 million in the previous crop year; 320,000 bushels were exported through Prince Rupert, 518,000 from Victoria, and 545,000 from Churchill. The seed requirements were estimated at 35.8 million bushels, feed for livestock and poultry at 16.9 million bushels, and the stocks at the end of the crop year were 109.0 million bushels.

The Eastern Division received during the crop year not only the eastern crop, estimated at 18.5 million bushels, but also shipments from the West aggregating 95.2 million bushels. The quantity on hand at the beginning of the crop year was 19.6 million bushels, making, with a comparatively small importation from the United States, a total stock entering the Eastern Division of 133.4 million bushels. The distribution included 22.8 million bushels carried over in store into the following year, 51.8 million bushels exported from the St. Lawrence ports, and 2.2 million bushels shipped through the winter ports of Saint John and Halifax. In addition, 33.4 million bushels were cleared for export to the United Kingdom and other countries *via* the United States Atlantic ports. The chief ports concerned with the movement of Canadian grain from both Divisions were New York, with shipments of 32.5 million bushels, Baltimore with 656,000 bushels, and Portland with 248,000.

Total exports from Canada to the United States for consumption amounted to 4.4 million bushels, to the United Kingdom 101.5 million bushels, to other countries 76.7 million bushels; 148.6 million bushels were shown to be shipped *via* Canadian ports and 71.8 million bushels *via* United States ports, after deducting 15.8 million bushels transhipped from Buffalo to Montreal and adding the same to the Canadian movement. Total exports of wheat from Canada during the crop year amounted to 182.8 million bushels.

Table 3 shows for the licence years 1932 and 1933 the number of railway stations at which elevators are placed, the number of elevators and their total storage capacity, the figures being given by provinces for each class of elevator, with a summary showing the total of all elevators for each province. The growth of Canadian elevators in number and capacity has accompanied the expansion of grain acreage in the present century. Canadian elevators in 1901 numbered 426 with a capacity of 18,329,352 bushels; in 1911 these had increased to 1,909 elevators and 105,462,700 bushels; and totals of 3,855 elevators and 231,213,620 bushels were reached in 1921. Further increases in the last few years have resulted in a total of 5,895 elevators with a capacity of 418,520,460 bushels in 1933.

Table 4 gives summary statistics of the inspections of grain for 1927-32, detailed statistics given in previous Year Books being omitted to save space. The latter may be found in the Reports on the Grain Trade of Canada.¹ Tables 5 and 6 show the shipments of grain by vessel and rail for 1931 and 1932.

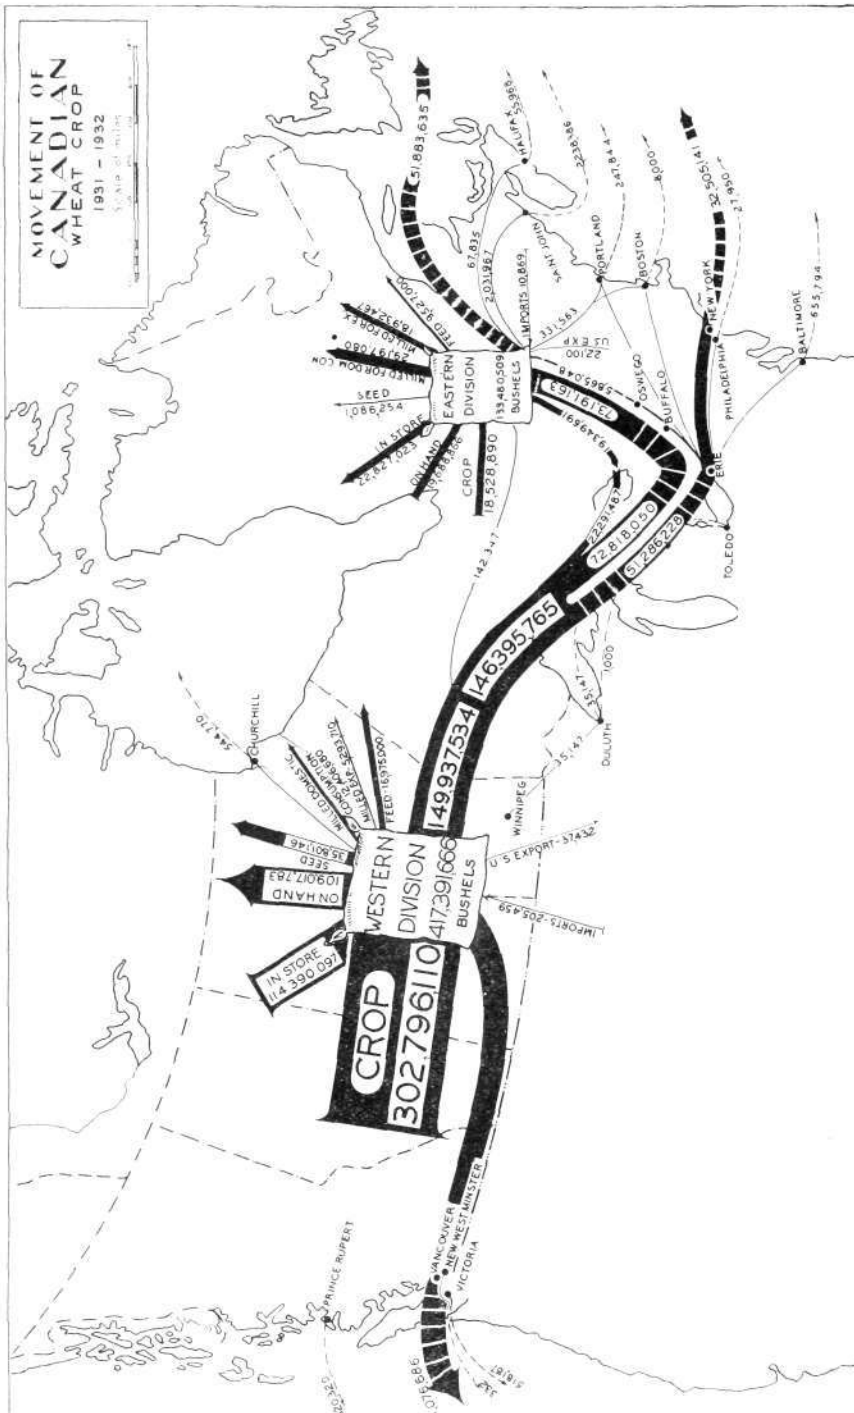

Tables 7 and 8 deal with the Canadian grain handled in recent years at Eastern elevators.

¹The latest report is for the crop year ended July 31, 1931, and may be obtained from the Dominion Statistician.

MOVEMENT OF CANADIAN WHEAT CROP

1931 - 1932

SCALE OF MILLING

2.—Summary of the Distribution of Grain in Canada, crop year ended July 31, 1932.

Item.	Wheat.	Oats.	Barley.	Flax.	Rye.
1. On Hand, Aug. 1, 1931					
In farmers' hands.....	bush. 19,459,400	bush. 52,503,500	bush. 17,618,400	bush. 35,800	bush. 1,403,600

¹ Buckwheat.

Flour-milling in 1931.—The flour and grist mills industry in Canada in 1931 numbered 1,265 operating establishments, with a capital investment of \$61,069,192 and a total daily capacity of 112,048 barrels of flour. The mills were distributed by provinces as shown in Table 9. Statistics of their employees, value of products, etc., for the latest year available will be found in Table 7 of the chapter on manufactures, p. 424 of this volume.

Section 3.—Marketing of Live Stock and Animal Products.¹

The estimated value of farm live stock and poultry in Canada in 1931 was \$511,438,000, or 120.3 p.c. of the value of field crops grown during the year. In gross value of product the slaughtering and meat-packing industry, which is dependent chiefly on animal husbandry for its materials, has during recent years been one of the most important single manufacturing industries in Canada.

The Canada Year Book, 1922-23, contained on pages 594-595 a brief historical description of the development and present position of the live-stock industry in the Dominion, with statistics of farm animals compiled from the decennial censuses, 1871 to 1931. A summary of this data is given in Table 10.

10.—Animals in Canada and Animals Killed or Sold by Farmers in Canada, by census years 1871-1931.

Year.	Animals in Canada.			Animals Killed or Sold and Wool Sold.

¹Figures for 1871-91 do not include work oxen.

²Census taken as of June 1, while previous censuses were taken in April, so that a greater number of young animals is included.

³Animals slaughtered on farms were not included. The following figures are comparable with data given for the previous years (the 1911 amounts being partly estimated).—

	Cattle.	Sheep.	Swine.
1911.....	1,915,059	1,097,016	4,282,624
1921.....	2,097,390	1,217,987	2,972,331

In Table 11 are given statistics showing the numbers of animals on farms for the years 1921 to 1932, expressed as percentages of the average numbers for the quinquennium 1921-25.

11.—Index Numbers of Animals on Farms in Canada, calendar years 1921-32.

Live-Stock Marketings, 1931.—The numbers of cattle and hogs sold at stockyards showed increases of 39,953 and 180,143 respectively in 1931 as compared with 1930. Cattle sold numbered 646,442 in 1931, 606,489 in 1930, 799,435 in 1929, 875,428 in 1928 and 958,872 in 1927. The total numbers of hogs sold were 1,084,582

¹Revised by Dr. T. W. Grindley, Chief, Agricultural Branch, Dominion Bureau of Statistics. For more detailed information on this subject see "Live Stock and Animal Products Statistics", published annually by the Dominion Bureau of Statistics, also "Live Stock Market and Meat Trade Review", published annually by the Live Stock Branch of the Dominion Department of Agriculture. See also the material in Chapter VIII under the heading "Farm Live Stock and Poultry"

in 1931, 904,439 in 1930, 1,060,542 in 1929, 1,090,316 in 1928, and 1,117,555 in 1927. Sales of calves decreased from 311,756 in 1930 to 307,082 in 1931, and sheep sales increased from 483,645 in 1930 to 527,102 in 1931.

Table 12 shows the receipts for sale at the various stockyards and a partial disposition of the live stock sold in 1930 and 1931.

The interprovincial and export movement of live stock in 1931 shows a falling-off in calves, but an increase in cattle, swine and sheep. Total shipments in 1931 with comparative figures for 1930 in parentheses were as follows: cattle 329,271 (258,365); calves 94,906 (105,966); swine 815,275 (696,258); and sheep 158,830 (144,018). Saskatchewan was the largest shipper in the aggregate and also the largest shipper of cattle, reporting 106,827 cattle, 18,821 calves, 261,258 swine and 38,619 sheep. Alberta led in swine and sheep shipments and Ontario in shipments of calves.

The marketings of live stock through stockyards, by direct shipment to packers, or by export according to provinces of origin for the calendar year 1931 are given in Table 13. In Table 14 are given the statistics of the grading of animals from five provinces marketed through the stockyards in 1931.

Slaughtering and Meat Packing.—This industry has become one of the most important branches of manufacturing in Canada. Its growth, shown by the statistics of Table 15, has been accompanied by a concentration of the major part of the production of the industry into a comparatively small number of large establishments, thereby facilitating the utilization of by-products and greater efficiency of operation. In 1931, the latest year recorded, the large increase in the number of establishments is due to the inclusion of wholesale butchers operating small plants engaged in slaughtering only. These small establishments did not add more than 4 p.c. to the total output of the industry in 1931. The numbers of live stock slaughtered at Canadian inspected establishments in 1931 and 1932 are shown in Table 16.

¹ Figures for this year cover establishments employing five hands and over only.

² The increase in 1931 is due to the inclusion of a large number of wholesale butchers engaged in slaughtering only. The combined output of their small establishments did not amount to more than 4 p.c. of the whole industry in 1931.

Consumption of Animal Products.—The consumption of meats in Canada in 1931 is estimated at 600,987,458 pounds of beef, 866,129,150 pounds of pork and 73,045,572 pounds of mutton and lamb. The per capita consumption of beef on this basis amounts to 57.93 pounds; pork, 83.49 pounds and mutton and lamb, 7.04 pounds, a total of 148.46 pounds of meats per capita per annum. The corresponding data for other animal products are as follows: butter, 320,521,885 pounds and 30.90 pounds; cheese, 36,364,669 pounds and 3.51 pounds; eggs, 311,396,473 dozen and 30.02 dozen, and poultry 112,688,797 pounds and 10.87 pounds. Details are given in Table 17.

Interprovincial and International Trade in Meats.—The shipments of meats and meat products out of each province are shown in Table 18. These shipments include both those to other provinces and exports, of which the interprovincial movement is much the greater in every item except cured pork. However, from the provinces of Prince Edward Island, Nova Scotia and British Columbia the shipments for export were the more important movement. Total shipments from Manitoba were larger than from any other province.

Information regarding this traffic may be found in greater detail at pp. 52-61 of the report on "Live Stock and Animal Products Statistics, 1931", obtainable on application to the Dominion Bureau of Statistics.

¹Includes miscellaneous products not specified.

Export and Import Trade in Live Stock and Live-Stock Products.—The exports of live stock and live-stock products from the Dominion to the United Kingdom, the United States and all countries, are shown for the four fiscal years ended Mar. 31, 1929-32, in Table 12 of the chapter on External Trade, at pp. 528-534, and imports in Table 13 at pp. 552-556. Exports and imports are also available by calendar years 1927-31, and may be found on pp. 83, 85 and 86 of the report on "Live Stock and Animal Products Statistics, 1931". At pp. 302-320 of the report on "Trade of Canada (Imports for Consumption and Exports), Calendar Year 1931" figures are given of exports of "Animals and Animal Products" for 1930 and 1931 and imports of this class for the same calendar years will be found at pp. 93-113 of the same report.

Section 4.—Cold Storage.

Cold Storage Warehouses.—Under the Cold Storage Act, 1907 (6-7 Edw. VII, c. 6), now consolidated as c. 25, R.S.C., 1927, subsidies have been granted by the Dominion Government towards the construction and equipment of cold storage warehouses open to the public, the Act and regulations made thereunder being administered by the Department of Agriculture. Table 19 shows for 1932 the number of cold storage warehouses in Canada, with the refrigerated space. The latter amounts to 51,724,910 cubic feet, of which 9,083,225 cubic feet apply to 52 warehouses subsidized under the Act, while 42,641,685 cubic feet apply to 495 non-subsidized warehouses.

19.—Cold Storage Warehouses in Canada, by Provinces, 1932.

NOTE.—The figures in this table are supplied through the courtesy of J. F. Singleton, Dairy and Cold Storage Commissioner, Dominion Department of Agriculture.

Cold Storage Stocks.—Statistics of the stocks of food in the cold storage warehouses of Canada are collected and published monthly by the Agricultural Branch of the Dominion Bureau of Statistics. A summary of the cold storage data is included in the report on "Live Stock and Animal Products Statistics", published annually. In Table 20 are included statistics, by months for 1931 and 1932, of the stocks of food in cold storage and in process of cure for various important commodities.

20.—Stocks of Food on Hand in Cold Storage and in Process of Cure, by Months and Commodities, 1931 and 1932.

NOTE.—Figures in this table are of stocks on hand on the first of each month as published by the Agricultural Branch, Dominion Bureau of Statistics.

Section 5.—Bounties, Patents, Copyrights and Trade Marks.¹

Bounties.—In cases where it is considered advisable for the Government to encourage the production of a particular commodity, bounties paid by the Government are recognized substitutes for protective duties. In the past they have been made use of by Canada to a considerable degree, but the only bounties which involved payments in 1931-32 were those on hemp and on copper bars and rods. The amounts of these bounties paid in recent periods have been as follows:—

Copper Bounties Paid in—

Year ended June 30, 1925.....	1,164,140 lb. at 1½c.....	\$ 14,551.75
Year ended June 30, 1926.....	10,808,627 lb. at 1½c.....	168,086.27
Year ended June 30, 1927.....	16,367,302 lb. at 1½c.....	122,904.39
Year ended June 30, 1928.....	12,514,446 lb. at 1½c.....	82,572.24
Year ended June 30, 1929.....	6,837,124 lb. at 1½c.....	34,185.63
Year ended June 30, 1930.....	10,857,149 lb. at 1½c.....	54,285.75
Year ended June 30, 1931.....	13,596,918 lb. at 1½c.....	67,984.87
Year ended June 30, 1932.....	27,563,296 lb. at 1½c.....	137,316.44
6 months ended Dec. 31, 1932.....	Nil.....	Nil
Totals.....	90,720,002 lb.	\$ 602,387.34

Hemp Bounties Paid in—

Calendar year 1926.....	19,048 lb. at 1½c.....	\$ 285.72
Calendar year 1927.....	203,087 lb. at 1½c.....	2,792.43
Calendar year 1928.....	826,821 lb. at 1½c.....	10,335.25
Calendar year 1929.....	666,113 lb. at 1½c.....	7,493.77
Calendar year 1930.....	348,345 lb. at 1½c.....	3,483.45
Calendar year 1931.....	250,280 lb. at 1½c.....	2,189.95
Calendar year 1932.....	35,499 lb. at 1½c.....	266.25
Totals.....	2,349,193 lb.	\$ 26,846.82

Bounties have been paid at various times in the past on iron and steel, on lead, on crude petroleum, on manila fibre, on zinc and on linen yarns, but the bounties on iron and steel ceased in 1911, on lead in 1918, on zinc in 1921, on linen yarns in 1923 and on crude petroleum in 1927. The total amounts paid in bounties on these commodities between 1896 and the date of expiration were: iron and steel and manufactures of (1896-1912), \$16,785,827 (Canada Year Book 1915, p. 460); lead (1899-1918), \$1,979,216 for 1,187,169,878 lb.; zinc, \$400,000; linen yarns, \$17,523; manila fibre (1903-1913), \$367,962; crude petroleum (1905-27), \$3,457,173 on 233,135,217 gallons. (For quantities of crude petroleum and bounties paid in each year, see table on p. 635 of the 1927-28 Year Book.) Total payments for expired bounties between 1896 and 1932 aggregated \$23,007,701, which, with the \$602,387 paid on copper bars and rods and the \$26,847 for hemp, make a total of \$23,636,935. The bounty on copper bars and rods was extended to June 30, 1931, at the rate of 1½c. per lb. by c. 15 of the Statutes of 1928. The Year Book of 1915, pp. 459-461, gave a description of the bounties that had been payable since 1883, as well as tables showing, for each commodity, the quantities on which bounties were annually paid and the amounts of such bounties for the years 1896 to 1915 inclusive. For details of the bounties on zinc, see p. 635 of the 1927-28 Year Book.

A bounty on Canadian coal used in the manufacture of iron or steel was authorized by c. 6 of the Statutes of 1930. By that Statute, manufacturers of iron and steel may be paid 49½c. per ton of bituminous coal mined in Canada, converted into coke in Canada and used by such manufacturers in smelting iron ore or manufacturing steel ingots or steel castings in Canada. This bounty was established on a recommendation of the Royal Commission on Maritime Claims relating to the manufacture of iron or steel by the use of Canadian coal. Payments thereunder have been as follows:—

Fiscal year ended Mar. 31, 1931..	273,148 tons at 49½c.....	\$ 135,209.23
Fiscal year ended Mar. 31, 1932..	126,356 tons at 49½c.....	62,545.68
Totals.....	399,504 tons	\$ 197,754.91

¹Information regarding bounties has been revised by H. B. Borbridge, Chief Accountant, Department of Trade and Commerce, and information regarding patents, copyrights and trade marks by T. L. Richard, Commissioner of Patents, Ottawa.

Patents.—Letters patent, which in England have been in the gift of the Crown from the time of the Statute of Monopolies and earlier, are a purely statutory grant in Canada and have always been so. The earliest Act was one of Lower Canada, passed in 1824, wherein provision was made for the granting of patent rights to inventors who were British subjects and inhabitants of the province. Upper Canada passed its Act in 1826, and Nova Scotia and New Brunswick passed theirs at later dates. In 1849, after the Union, a consolidating Act was passed applying to both Upper and Lower Canada, and the B.N.A. Act assigned the granting of patents exclusively to the Parliament of Canada. The Dominion Patent Act of 1869 repealed the provincial Acts and has formed the basis of all succeeding Acts.

The first Canadian patent was issued under the Lower Canada Act of 1824 to Noah Cushing of Quebec; 165 patents were granted under the Acts of Upper and Lower Canada, and, under the consolidating and later Acts of the provinces 3,160 patents were granted.

Letters patent are now issued subject to the provisions of Chapter 150, R.S.C., 1927, and application for protection relating to the same should be addressed to The Commissioner of Patents, Ottawa, Canada.

Invention means any new and useful art, process, machine, manufacture or composition of matter or any new and useful improvement in any art, process, machine, manufacture or composition of matter.

The growth of Canadian inventions is shown by the fact that an average of 1,422 patents was issued annually to Canadians during the decade 1920-29. The business of the Office has gradually continued to expand and the number of applications and total fees increased each year without a break from the beginning of the present century until the fiscal year ended Mar. 31, 1913, when 8,681 applications were received and the total fees amounted to \$218,125. In the fiscal year ended Mar. 31, 1932, there were 11,940 applications, with fees amounting to \$444,110, as compared with 13,229 and \$472,636 respectively in 1931. For the fiscal year ended Mar. 31, 1932, the number of patents granted was 11,124 as compared with 11,262 in 1931, a decrease of 138. Of the patents of 1932, 7,465 or 67 p.c. were issued to United States inventors, 1,084 to Canadians and 921 to residents of Great Britain and Ireland, while Germany with 719, France with 247 and Sweden with 101, came next in the number of inventors to whom patents were issued. Table 21 shows the distribution of the Canadian patentees for the years 1921 to 1932 by province of residence.

It will be seen from the table that the more populous provinces of Ontario and Quebec obtained the largest absolute number of patents, but a calculation of the number of patentees in relation to population shows that, for the fiscal year 1932, the greatest relative inventiveness was displayed in British Columbia, with one patent granted for every 6,020 persons, while Ontario had one for every 6,860 persons and Quebec one for every 10,680 persons.

As will be seen from Table 22 the increased activity in invention which was manifested during the fiscal year ended 1929 was still more marked in the fiscal year ended 1930; there has been a decline in each of the two years since then. Apparently the industrial depression has extended its baneful influence over this field also. In the latest year applications for patents were distributed pretty well over the whole field of invention without showing outstanding trends along any particular lines.

Copyrights and Trade Marks.—Registration of copyright is governed by c. 32, R.S.C., 1927, and an application for protection relating to same should be addressed to The Commissioner of Patents, Ottawa, Canada.

The Copyright Act of 1921 (amended in 1923 and consolidated in c. 32, R.S.C., 1927) sets out in section 4 the qualifications for a copyright and in section 5, its duration: "Copyrights shall subsist in Canada . . . in every original literary, dramatic, musical and artistic work, if the author was, at the date of the making of the work, a British subject, a citizen or subject of a foreign country which has adhered to the (Berne) Convention and the additional Protocol . . . or resident within His Majesty's Dominions. The term for which the copyright shall subsist shall, except as otherwise expressly provided by this Act, be the life of the author and a period of fifty years after his death"

Copyright protection is extended to records, perforated rolls, cinematographic films and other contrivances by means of which a work may be mechanically performed. The intention of the Act is to enable Canadian authors to obtain full copyright protection throughout all parts of His Majesty's Dominions, foreign countries of the Copyright Union, and the United States of America, as well as in Canada.

The Trade Marks Act (c. 201, R.S.C., 1927) was amended by c. 10 of the Statutes of 1928, bringing the Act into agreement with the terms of the Convention for the Protection of Industrial Property, as amended at The Hague in 1925 with regard to refusal to register certain trade marks. The renewal of expired trade-mark registration was also provided for, while it was also enacted that in certain cases interested parties might apply to the Exchequer Court of Canada for the cancellation of a trade mark at any time within three years from its registration.

Section 6.—Weights and Measures, Electricity and Gas Inspection.¹

Weights and Measures.—The object of weights and measures administration is to maintain uniformity and accuracy in the use of the legal standards of the country in industry and commerce, to protect the public from short weight and measure and the trading community from unfair competition arising from such practices.

Prior to Confederation, the administration of weights and measures was in the hands of each Provincial Government but passed to the Dominion Government in 1867, under section 91 of the British North America Act. Steps were then taken to simplify the standards in use and to establish uniformity throughout the Dominion.

What might be termed the principal Weights and Measures Act of Canada was passed in the session of 1872-73; its provisions closely followed English weights and measures law, but the system of weights and measures was greatly simplified. This Act established as the primary legal standards for Canada the imperial pound, gallon and yard, but in place of the system of stones, quarters, hundredweights (112 lb.) and the long ton (2,240 lb.) it provided a decimal series of weights, 1, 2, 3, 5, 10, 20, 30, 50, 100 lb., and the short ton of 2,000 lb. The only exceptions to this

¹The material on Weights and Measures has been revised by E. O. Way, Director of Weights and Measures, Department of Trade and Commerce and that on Electricity and Gas Inspection by J. L. Stiver, Director, Electrical and Gas Standards Laboratories, Department of Trade and Commerce.

were the continued use of the old French land measure, the arpent, in Quebec, and the use of the long ton (2,240 lb.) in the coal-mining industry, but not for the retail sale of coal. The troy ounce of 480 grains and its decimal submultiples are the legal weights for the weighing of gold and precious metals. The metric system is legal for all transactions.

Many changes, deletions and additions have been made to the Act of 1873 by later legislation, but its principles remain unchanged. The latest legislation is the Weights and Measures Act (c. 212, R.S.C., 1927).

The Weights and Measures Service was first administered by the Department of Inland Revenue, and offices were opened in all the principal centres of Canada and equipped with standards and inspection equipment. In 1918 the Service was transferred to the Department of Trade and Commerce. For purposes of administration, the Dominion is divided into 18 districts, each in charge of a district inspector. The chief rules of administration are as follows:—

(a) Every new type of weighing and measuring device must be submitted to the Department at Ottawa for approval before being placed on the market.

(b) Every new machine must be inspected and stamped by an inspector before being sold or taken into use.

(c) Imported machines are held by the customs until release is approved by the nearest inspector.

(d) All inspections take place on the traders' premises, except where devices are brought to the inspection offices.

(e) Fees are charged for inspection and stamping, the schedule being defined by Order in Council, and all moneys so collected are paid into the Consolidated Revenue Fund of Canada.

The following table is a summary of the articles and machines inspected in the fiscal year 1931-32.

25.—Inspections by the Weights and Measures Service, fiscal year ended Mar. 31, 1932.

Article.	Submitted.	Verified.	Rejected.	Percentage of Rejections.

Totals.....	544,747	511,119	33,628	

The total revenue collected by the Service during the year amounted to \$406,614 and the expenses, including salaries, totalled \$330,940.

Electricity and Gas Inspection.—The Electricity and Gas Inspection Branch of the Department of Trade and Commerce administers three Acts: the Electricity Inspection Act (c. 22, 1928), the Gas Inspection Act (c. 82, R.S.C., 1927), and the Electricity and Fluid Exportation Act (c. 54, R.S.C., 1927).

The latest report of the Branch shows 448,081 electricity and gas meters tested in the fiscal year ended Mar. 31, 1932, as compared with 495,819 in the preceding year. The total revenue derived from electricity and gas inspection was \$300,061, as compared with an expenditure of \$226,912. The Branch also collected \$183,537 as export duty and licence fees under the provisions of the Electricity and Fluid Exportation Act; the cost of collecting this revenue was only \$481.

Other related statistics collected in the administration of the last-named Act will be found on p. 389, in the Water Power chapter of the Year Book. Here, however, are given statistics, also collected by the Branch in the process of administration, showing a phenomenal increase in the number of consumers of electricity in the past 17 years, from 505,597 to 1,704,197 (Table 26); the lesser increase in the gas meters in use from 267,454 in 1916 to 668,767 in 1932 (Table 27); and the number of cubic feet of gas sold in Canada from 1920 to 1932, classified as carburetted water gas, coal gas, coke oven gas, natural gas, acetylene gas and butane (Table 28).

26.—Number of Electricity Meters in Use, fiscal years ended Mar. 31, 1915-32.

Section 7.—Census of Merchandising and Service Establishments.¹

A comprehensive survey of the business carried on by trading and service establishments was undertaken for the first time in connection with the seventh decennial census in 1931. A partial census of trading establishments only had been made in 1924, but the results of this initial survey, while indicative of the extent of domestic trade, suffered from the incompleteness of the canvass made at that time. The Census of Merchandising and Service Establishments, 1931, covered not only retail and wholesale merchandising establishments but also service establishments, including hotels. In addition, information was collected to show the manner in which goods manufactured in Canada are distributed. Statistics compiled from the census returns have been published in several series of mimeographed reports, but the figures given in those bulletins and used in the tables of this Section are preliminary and subject to revision.

In all these tables the number of employees includes those working both full time and part time and also proprietors and firm members receiving fixed salaries. Therefore, the amount of salaries and wages represents the entire wages bill. The figures do not provide any basis for computing average wages, average sales per employee, or rate of stock turnover. In later reports the data will be presented in greater detail and more accurate computations may then be made.

Subsection 1.—Wholesale and Other Bulk or Non-Retail Merchandising.

The wholesale field, as defined for the purposes of the census, embraces many types of establishments other than those generally classed as wholesale houses. Thus, under this heading of bulk merchandising, will be found not only the conventional types of wholesalers selling to retailers but also other establishments engaged in handling or arranging for the sale of commodities, or the transfer of rights, etc., on a non-retail basis, whether for domestic or foreign trade. In the tables presented below will be found the salient features of the operations of such classes as importers, exporters, commission merchants, brokers, etc., as well as the business of wholesale merchants. It should also be noted that the business of such establishments as bulk tank stations and manufacturers' sales branches is not included with that of the wholesale merchants, although a considerable part of the trade of these establishments is done with retailers.

There were 12,914 wholesale and other bulk or non-retail merchandising establishments in Canada in 1930. The total net sales for these establishments were \$3,133,733,700. This trade was concentrated, to a marked degree, in certain well-defined trading areas. Of the above total sales, 31·20 p.c. were made by establishments in Ontario, 27·13 p.c. by those in Quebec, and 19·42 p.c. by those in Mani-

¹ Prepared by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. For a list of publications of this Branch, see Chapter XXIX, Section 1, under "Internal Trade".

toba. In fact, approximately two-thirds of the entire trade was carried on by establishments located in the four cities of Montreal, Toronto, Winnipeg and Vancouver.

As already suggested, the bulk and non-retail merchandising field embraces many types of establishments, so that the amount of trade attributed to this field cannot be compared directly with the amount of retail business. A certain amount of business is transacted between bulk merchandising establishments, especially with respect to agents, brokers, and commission houses, and sales are made, by or through many wholesale establishments, to manufacturers or other industrial consumers. In addition, some of these establishments are engaged in trading with foreign countries. Thus allowances must be made for the duplication in bulk and non-retail merchandising, for the sales of raw materials, for direct sales to consumers and for export business. In order to give a rough indication of the amount of pre-retail business, bulk merchandising establishments have been divided into two classes, "wholesalers proper" and "other bulk or non-retail distributors". The first class consists of those establishments which are carrying on the more conventional form of wholesale trading. The sales made by 5,008 wholesalers proper in 1930 were \$1,092,933,700, of which \$900,582,900 were made by wholesale merchants. Other types of bulk or non-retail distributors, consisting of 7,906 establishments, made sales or arranged orders to the value of \$2,040,800,000. It will be noted from Table 29 that, while the province of Manitoba had 19.42 p.c. of the total sales of all bulk merchandising, the business of wholesalers proper in Manitoba was only 7.16 p.c. of the total for Canada. This marked difference is due to the influence of the grain trade, which is such an important factor in the commerce of that province. The trade in grain is carried on mainly by establishments classified under "other bulk distributors" and appears, therefore, only in the all-inclusive figures of Table 29.

Subsection 2.—Retail Merchandising and Services.

The line of demarcation between these two classes of retailing cannot be sharply drawn. In many service establishments, especially those of the repair group, the retail sale of commodities is also carried on. Conversely, a great many stores, chiefly engaged in retail merchandising, have service departments for making alterations and repairs, for hair dressing and other personal service, for cleaning, decorating, fur storage, etc. Establishments where both these functions are carried on have been classified according to the function which provided the largest receipts. For the sake of convenience, the fields are summarized by provinces and business groups in Table 31.

Retail Merchandising.—The total sales made by 121,942 retail merchandising establishments in Canada in 1930 were \$2,805,075,800. In addition to the sales made by these stores, the manufacturing bakeries and dairies reported retail sales of \$81,310,588, not included in the figures of Table 32, showing retail merchandising by provinces. The province of Ontario led in amount of business with 39.68 p.c. of the total sales, although only 33.08 p.c. of the population of the Dominion resided in this province in 1931. On a per capita basis, retail merchandise sales show wide differences between provinces. The average for Canada on the basis of the 1931 population was \$270.32, but the per capita sales in Prince Edward Island were \$153.98, and in British Columbia \$359.40. It should be noted, however, that in these figures no allowance is made for the mail order or other sales outside the province.

32.—Retail Merchandise Trade in Canada, by Provinces, 1930.

NOTE.—Figures are preliminary and subject to revision.

More than one-quarter of the total sales in 1930 were made by stores in the general merchandise group. The most important kinds of stores in this group were the department stores and the general stores with groceries. The sales of food stores, of which the most numerous and important are the grocery stores, formed 21.72 p.c. of the total, while those of the automotive group accounted for 13.61 p.c. While such proportions are indicative of the sales of commodities, they do not furnish an accurate guide to commodity sales. Few stores restrict their sales to one line of goods and some kinds of stores handle a wide variety of merchandise. Department and general stores, as is well known, deal in many commodities, but there are other stores which also carry many lines of goods. The figures that are given in Table 33 show the retail merchandise trade by group and kind of business.

Retail merchandising in Canada is analysed by type of operation in Table 34. This analysis is first applied to all retail stores and, following this, to some particular kinds of retail business which have been most subject to chain system organization. Single stores under independent ownership accounted for 71.52 p.c. of the total retail merchandise sales in 1930. Included in this percentage are the sales of single stores in voluntary chains or co-operative buying organizations, which amounted to 4.09 p.c. of the total. The sales of the units of sectional and national chains were 18.91 p.c. of the total and those of local chains 1.82 p.c. Two- and three-store multiples accounted for 7.75 p.c. of the total sales. For certain of the larger cities, the business of department stores belonging to national organizations has been taken with that of independent stores.

The retail merchandise trade in Canadian cities of over 10,000 population is shown in Table 35. The cities are arranged in descending order according to their 1931 census populations. A notable feature of these figures is the wide variation in different cities in the relationship between population and retail sales. In general per capita sales are high for cities which form distributing centres for large or populous areas, while such sales are lowest in residential or industrial satellite cities adjacent to larger centres, as in the case of St. Boniface, Man., Sandwich, Ont., and Verdun, Outremont, Westmount and Hull, Que.

Service Establishments.—The 41,094 service establishments from which reports were secured had receipts of \$236,115,200 in 1930. The professional services, such as medicine, dentistry or law, were not included in the census, nor were the building trades, such as carpentry, tinsmithing, etc. A special report is being prepared for hotels and the figures for these establishments are not included in the tables that follow. The provincial distribution of retail services in Canada during 1930 is shown in Table 36. Ontario again led in the amount of business with 42.45 p.c. of the total service receipts, while Quebec came second with 25.19 p.c.

Among service establishments, the amusements group was the most important, as 22.98 p.c. of the total receipts were reported by establishments of this class. Of the receipts of \$54,255,600 for amusement establishments, \$39,233,200 were secured by motion picture houses. The next group in importance was that of domestic service, which includes laundries and cleaning, pressing and dyeing shops. The barber shops were the most important section of the personal service group and did more than twice as much business as hairdressing and beauty parlours. The repair and service group had the largest number of establishments. Blacksmith shops were the most numerous, their receipts being only slightly less than the total for boot and shoe repair shops. Repair and service shops for motor vehicles formed an important section of this group.

The salient features of the business of service establishments are given in Table 37, which also shows the type of operation, *i.e.*, the extent to which these establishments operate independently or are organized in chain systems. Of the total of 41,094 establishments, there were 40,088 under independent operation, while the receipts of single independent establishments formed 77 p.c. of the total of all receipts for services. Except in the case of theatres, which are separately analysed in the table, chain systems were not an important factor in the service field.

36.—Retail Services in Canada, by Provinces, 1930.

CHAPTER XVIII.—TRANSPORTATION AND COMMUNICATIONS.

Canada is a country of continental dimensions, nearly 4,000 miles in length from east to west, with its relatively small population of 10,376,786 in the main thinly distributed along the southern borders of its vast area. Different parts of the country are shut off from each other by areas which are almost wildernesses, such as the region lying between New Brunswick and Quebec and the areas north of lakes Huron and Superior, the last dividing the industrial region of Ontario and Quebec from the agricultural areas of the prairies. To such a country with such a population, producing, like our western agriculturists, mainly for export, or, like our manufacturers, largely for consumption in distant portions of the country itself, cheap transportation is a necessity of life. Before 1850, when the water routes were the chief avenues of transportation and were closed by ice for several months each year, the business of the central portions of the country was reduced to a state of relative inactivity during the winter. The steam railway was therefore required for the adequate economic development of Canada, more particularly for linking up with the economic and industrial world the vast productive areas of the Canadian West, and thus promoting their development. The construction of the Canadian Pacific Railway gave to Canada, as an economic unit, length; the building of the newer transcontinental railways has given the country breadth.

Railway transportation, though essential, is nevertheless expensive, particularly in recent years, and for bulky and weighty commodities. Hence new enterprises have either been undertaken or are under consideration for improving water communication, such as the new and deeper Welland canal, the deepening of the St. Lawrence canals and of the channel between Montreal and Quebec, and the development of the Hudson Bay route.

Problems of transportation are, therefore, of vital importance in the economic life of Canada, occupying a large part of the time and thought of our Parliaments and public men. Scarcely less important, from the social and the economic points of view, is the development of methods of communication in a country so vast and so thinly peopled. The Post Office has been a great though little recognized factor in promoting solidarity among the people of different parts of the Dominion, while telegraphs and telephones have gone far to annihilate distance; the rural telephone, in particular, has been of great social and economic benefit in country districts. The use of the automobile has also been of great benefit in promoting social intercourse and in facilitating the transaction of business among the dwellers of both urban and rural districts. The press, again, assisted by cheap telegraph and cable rates, and reaching, through the mails, all parts of the country, has been of use in developing national sentiment. To sum up, it may be said that the progress of modern inventions, not least among which is the radio, has greatly improved living conditions in both rural and urban communities throughout the Dominion.

Part I of this chapter includes a statement of the tendencies toward monopoly which have made it necessary to establish a measure of government control over those transportation and communication agencies which are not govern-

mentally-owned and operated; to this is added an account of the origin and functions of the Board of Railway Commissioners. The subsequent parts deal in order with steam railways, electric railways, express companies, roads, motor vehicles, air navigation, canals, shipping, telegraphs, telephones, radio and the Post Office.

PART I.—GOVERNMENT CONTROL OVER AGENCIES OF TRANSPORTATION AND COMMUNICATION.

Private enterprises engaged in the transportation and communication business in Canada have, in the past 50 years, shown the same tendency toward consolidation and amalgamation which has been evident elsewhere throughout the civilized world. The basic reason for such consolidation and amalgamation has been the fact that the business of transportation and communication is, generally speaking, a "natural monopoly", *i.e.*, a type of enterprise in which service can be more efficiently and economically rendered to the public where one or a few concerns control a particular type of service throughout the country. The outstanding example of these consolidations in Canada in our time is the concentration of control of the railways of the country in the hands of the Canadian Pacific Railway Company and the Canadian National Railway Company.

However, since such control brings with it an element of monopoly and possible overcharge which is distasteful to the public, it has in Canada, as in other countries, been deemed advisable to set up authorities controlling the rates to be charged and the other conditions on which services to the public are to be rendered by common carriers. This control, so far as railways within the jurisdiction of the Dominion Government are concerned, has been placed in the hands of the Board of Railway Commissioners, whose authority has been extended to cover various other means of transportation and communication. A brief summary of the history and functions of this body follows on pp. 644-5.

Besides the Board of Railway Commissioners, dealing with the larger public utilities coming under the jurisdiction of the Dominion Government, there exist, in several of the provinces, bodies which undertake among their duties the supervision and control of local public utilities operating under the jurisdiction of the provinces, and the regulation of their rates for service. Among these is the Railway and Municipal Board of Ontario, established in 1906, which controls the construction, operation and maintenance of railways, and the approving of their rates and their rules and regulations affecting the public. Similarly, in Quebec, a Commission of Public Utilities was established in 1909 and was given superintendence over all Quebec corporations, other than municipalities, "that own, operate, manage or control any system, works, plant or equipment for the conveyance of telegraph or telephone messages or for the conveyance of travellers or goods over a railway, street railway or tramway, or for the production, transmission, delivery or furnishing of heat, light or power, either directly or indirectly to or for the public". In Nova Scotia there is a Board of Commissioners of Public Utilities and in Manitoba a Public Utilities Commission with similar functions, while in the three westernmost provinces these same duties are performed by provincial Departments of Railways.

Due to changing conditions and increasing complexities in the transportation field, the Dominion Government appointed in 1931 a Royal Commission to inquire into the whole problem of transportation in Canada, particularly in relation to railways and shipping and communication facilities, having regard to present conditions and the probable future development of the country. (See pp. 648-50.)

The Board of Railway Commissioners for Canada.¹

In the early days of railway building in Canada, the provinces were more concerned with rapid development than with rate regulation. Under the Railway Clauses Consolidation Act of 1851, rates were fixed by the directors of the railway, subject to the approval of the Governor in Council. Beyond this, competition was relied upon to bring rates to a reasonable level. As time went on, however, those who believed in the efficacy of competition as a regulator were disillusioned. For example, complaints were made that the Grand Trunk gave low through transit rates, say from Chicago to New York, through Canada, and recouped itself by high non-competitive rates in Upper Canada. In 1888, the supervision of rates was assigned to the Railway Committee of the Privy Council, sitting in Ottawa.

At the turn of the century, two reports were prepared for the Department of Railways and Canals by Professor S. J. McLean, the first setting down the experience of railway commissions in England and the United States, and the second discussing Canadian rate grievances, with a recommendation that regulation by commission be adopted in Canada. The second report found that non-competitive rates were exorbitant as compared with competitive rates and that the railways had exercised their right to vary rates without notice, to the great distress of shippers. Among the weaknesses of the Railway Committee as a rate-regulating body was its fixed station at Ottawa, which made the cost of appearing before it practically prohibitive. Besides, members of Parliament had no necessary aptitude for dealing with railway rates, and of their two functions—legislative and administrative—the legislative was to them the more important.

The Board of Railway Commissioners for Canada, as provided for by the amended Railway Act of 1903, was organized on Feb. 1, 1904. In the beginning, its membership consisted of a Chief Commissioner, a Deputy Chief and one Commissioner. In 1908 the membership was increased by the inclusion of an Assistant Chief Commissioner and two other Commissioners. According to the Act, the Board may be divided into two sections of three members but, since any two constitute a quorum, two Commissioners usually hear all but the more important cases, and, agreeing, give the decision of the Board.

The powers of the Commission, in brief, are in matters relating to the location, construction and operation of railways. The most important of these powers has to do with rate regulation. Passenger rates are divided into standard and special, freight rates into standard, special and competitive. Standard rates are maximum rates and the only ones which must be approved by the Board before they are applied. Special and competitive rates, being less than maximum rates, may be applied by railways without the Board's approval, provided that a change of rates has been advertised. But important rate adjustments usually come to the notice of the Commission, for the changed rate alters the extent of the territory in which a shipper can compete and on this account he is apt to appeal the case to the Commission. It is a knotty problem to mark the boundaries of competitive areas—to decide whether Nova Scotian manufacturers should be given rates which would allow them to compete west of Montreal, or again, whether high construction and operation costs in British Columbia should enforce a rate which prevents her goods from moving far into the prairies. By an amendment to the Railway Act, the regulation of telephone, telegraph and express rates was given to the Commission, but with narrower powers than were given to it in dealing with railways.

¹ Revised by A. D. Cartwright, Secretary, Board of Railway Commissioners for Canada.

The procedure of the Board is informal, as suits the nature of its work, for experience has shown that hearings in strict legal form give the parties to the argument uncompromising attitudes. If possible, matters are settled by recommendations to the railway company or the shipper; thus, during 1932, 98 p.c. of the applications to the Board were settled without formal hearing. The Railway Committee had kept its station at Ottawa, giving only formal hearings, so that the grievances of those who could not afford to appear in person or pay counsel went unredressed. The itineraries of the Railway Commission are arranged so that evidence may be taken at the least expense to those giving it.

The Chief or Assistant Chief Commissioner, depending upon which one is presiding, gives final judgment on points of law when, in the opinion of the Commissioners, the question is one of law. On questions of fact the findings of the Board are final and are not qualified by previous judgments of any other court. Questions of law and jurisdiction are differentiated. In the first case, the Board may, if it wishes, allow an appeal to the Supreme Court; in the second, the applicant needs no permission to present his appeal.

The Railway Committee of the Privy Council, being a Committee of the Cabinet, was responsible to Parliament. When the powers of the Committee were made over to the Railway Commission the responsibility was retained, but necessarily by a different means. There is now provision for an appeal from any decision to the Governor General in Council, who may also of his own motion rescind or vary the action of the Board, but the power to rescind or vary usually consists in referring to the Board for reconsideration. From its inception until Dec. 31, 1932, the Board gave formal hearing to 10,028 cases. Its decision was appealed in 107 cases, 65 of these being to the Supreme Court of Canada and 42 to the Governor General in Council. Of the appeals 12 of those carried to the Supreme Court were allowed and 3 of those to the Governor General in Council.

PART II.—STEAM RAILWAYS.¹

Section 1.—Historical Sketch.

Construction was begun on the first Canadian railway in 1835. This was a line only 16 miles long between St. Johns and Laprairie, Quebec, intended to expedite the journey between Montreal and New York. It was opened for traffic in 1836, being operated at first with horses, for which steam locomotives were substituted a year later. About the same time, a line 6 miles long was built in Nova Scotia from Stellarton to a loading point on Pictou harbour to haul coal from the mines to vessels. On this line also the motive power was at first provided by horses, but in the spring of 1839 the "Samson", a locomotive built in England, brought over in a sailing vessel, and still preserved in Halifax, was put in operation. A railway from Montreal to Lachine was opened in 1847 and another line to St. Hyacinthe in 1848. In 1850, however, there were only 66 miles of railway in Canada.

Commencement of the Railway Era—The Grand Trunk.—The railway era in Canada may be said to have begun in 1851, when an Act was passed providing for the construction of a main line of railway between the two Canadas. The

¹ Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This branch publishes an annual report on Steam Railways, as well as numerous other reports, for a full list of which the reader is referred to Chapter XXIX of this volume.

result was the completion of the Grand Trunk Railway between Montreal and Toronto in 1856, its extension westward to Sarnia in 1859, and eastward to Rivière du Loup in 1860. The Atlantic and St. Lawrence Railway, from Portland, Maine, to the Canadian boundary, was leased for 999 years and in 1859, on the completion of the Victoria bridge across the St. Lawrence at Montreal, the Grand Trunk had a through route 800 miles long from Portland to Sarnia. A line from Detroit to Port Huron was leased in 1859, the Champlain roads in 1863, the Buffalo and Lake Huron in 1867, while the Chicago and Grand Trunk was completed from Port Huron to Chicago in 1880. In 1881 the Georgian Bay and Lake Erie system (171 miles) was incorporated, and in the following year the Great Western (904 miles) and the Midland systems (473 miles) were also incorporated into the Grand Trunk. In 1888 the Northern Railway, which had been opened from Toronto to Barrie in 1853, and the Hamilton and Northwestern Railway were taken over by the Grand Trunk. In 1891 the completion of the St. Clair Tunnel gave direct communication with the railways of the United States. In the 1870's the gauge had been changed from the original 5' 6" to the standard gauge of 4' 8½"

Construction of the Intercolonial.—An intercolonial railway between the Maritime Provinces and Canada had been proposed as early as the 1830's. In 1844 the Imperial Government made a survey for a military road, and in 1851 agreed to recommend to Parliament either a guarantee of interest or an advance of the sum required to build a railroad. Differences of opinion as to the route resulted in the project being dropped, but in 1853 Nova Scotia undertook to construct by 1862 a trunk line from Halifax to the New Brunswick frontier, with branch lines to Pictou and Victoria Beach. In both Nova Scotia and New Brunswick, however, the scheme of an intercolonial railway broke down for lack of funds, and in 1867 there were only 374 miles of railway in the Maritimes—229 miles in New Brunswick, including lines from Saint John to Shediac and from St. Andrews to Richmond; 145 miles in Nova Scotia, including lines from Halifax to Truro and Windsor, and from Truro to Pictou. These, under the B.N.A. Act, passed to the Dominion Government. The latter undertook the completion of the railway, and in 1876 the line was opened. In 1879 the Rivière du Loup branch of the Grand Trunk was acquired, and in 1898 the Drummond Counties Railway from Chaudière Junction to Ste. Rosalie Junction was leased and running rights obtained from the latter point over the Grand Trunk tracks into Montreal, the Intercolonial thus becoming a competitor for the business of the commercial metropolis of Canada.

The First Transcontinental Railway—The C.P.R.—As early as 1849 a pamphlet published by Major Carmichael-Smyth advocated the construction of a Canadian Pacific railway nearly along the present route. In 1851 a Parliamentary Committee reported against undertaking the enterprise at that time. In 1871 the terms under which British Columbia entered Confederation bound the Dominion to commence the Pacific railway within two years and complete it within ten years. The building of the railway as a public work actually commenced in 1874, but was not very rapidly pushed forward. In 1880 the Government entered into a contract with the Canadian Pacific Railway syndicate, granting to the syndicate all portions of the line completed or under construction, a cash subsidy of \$25,000,000, a land grant of 25,000,000 acres, free admission of materials for construction, and protection for 20 years against competing lines. The company on its side agreed to complete the railway to a fixed standard by May 1, 1891, and thereafter to maintain it efficiently. As a matter of fact the last spike on the main line was driven on Nov. 7, 1885. Like the Grand Trunk, the Canadian Pacific Railway began to acquire

branch lines as feeders, among them being the North Shore, Quebec, Montreal, Ottawa and Occidental in 1881; the Winnipeg to Manitou line in 1882; the Ontario and Quebec, the Credit Valley and the Toronto, Grey and Bruce in 1883; the St. Lawrence and Ottawa, and the Manitoba Southwestern in 1884; the North Shore, Nova Scotia, in 1885; the Atlantic and Northwest in 1886; the West Ontario Pacific in 1887; the Sudbury and Sault Ste. Marie in 1888; the New Brunswick Railway and the Columbia and Kootenay in 1890; and the Montreal and Ottawa, and Montreal and Lake Maskinongé in 1892.

The Second Transcontinental—The Grand Trunk Pacific.—About the end of the century the Grand Trunk, which already had a line as far west as Chicago, submitted to the Canadian Government a proposal whereby it might participate in the settlement and development of the West. Lines were to be leased from Chicago *via* Minneapolis to Winnipeg and thence a new line, subsidized by the Government, would be built to the Pacific Coast. The Government raised objections to so much of the line lying in the United States and a second proposal was made for a connecting line with larger subsidies from North Bay to Winnipeg. The Government submitted, in 1903, a counter proposal that the line, instead of terminating at North Bay, should be continued east to Moncton, New Brunswick, the eastern section from Moncton to Winnipeg to be constructed by the Government and leased to the Grand Trunk Pacific for a 50-year period, the railway paying no rent for the first seven years and 3 p.c. on the cost of the railway for the remaining 43 years. The western half of the railway from Winnipeg to Prince Rupert was to be built by the Grand Trunk Pacific, the Government guaranteeing interest on bonds to 75 p.c. of the cost of construction, not exceeding \$13,000 per mile on the prairie section and \$30,000 per mile on the mountain section. The Grand Trunk reluctantly accepted this proposition and construction of the National Transcontinental and Grand Trunk Pacific commenced.

The Third Transcontinental—The Canadian Northern Railway.—The third transcontinental railway, the Canadian Northern, was begun in 1896 with the completion by Mackenzie and Mann of the 125-mile line of the Lake Manitoba Railway and Canal Co., chartered in 1889. The charters of the Winnipeg and Hudson Bay, the Manitoba and Southeastern, the Ontario and Rainy River, and the Port Arthur, Duluth and Western were next acquired. Assisted by the Manitoba Government, which desired to establish competition with the Canadian Pacific Railway, the Canadian Northern then secured the Manitoba lines of the Northern Pacific and in 1902 completed its line from Winnipeg to Port Arthur. During the following decade, the agricultural west was filling up very rapidly and, with the public of Canada under the influence of this boom, the Canadian Northern Railway was able to secure guarantees of bonds from the Dominion and Provincial Governments to enable it to extend its lines both westward to Vancouver and eastward to Montreal and so complete the great scheme of a transcontinental road.

Effect of the War on the Railways—The Drayton-Acworth Report.—With two new transcontinental main lines, besides branches, under construction Canadian railway mileage was doubled between 1900 and 1915, increasing from 17,657 miles in the former year to 34,882 miles in the latter. The builders of the new lines, as well as the Canadian Government and people, had expected that immigration of capital and labour from Europe would rapidly settle the areas tributary to the new railroads and give them abundant and lucrative traffic, as had been the case with the C.P.R. Instead, the War came, and European labour

and capital were conscripted for the struggle; immigration fell off, while cost of operation increased, owing to the scarcity of labour and material in Canada. The interest on the bonds had to be met, and in 1915 the Government felt it necessary to give assistance to the railways. In 1916, after having again made loans to the Grand Trunk Pacific Railway and the Canadian Northern Railway Co., a Royal Commission was appointed by Order in Council of July 13, 1916, to investigate: (1) the general problem of transportation, (2) the status of each of the three trans-continental systems, (3) the reorganization of any of the said systems, or their acquisition by the State, and (4) other matters considered by the Commission to be relevant to the general scope of the inquiry. Alfred Holland Smith of New York, Sir Henry Drayton of Ottawa and Sir George Paish of London, England, were originally appointed to the Commission. On the resignation of the last-named, William M. Acworth, a distinguished English authority on railways, was appointed to take his place. The majority report of the Commission, signed by Sir Henry Drayton and Mr. Acworth, has formed the basis of the subsequent railway policy of Canada. Their recommendation was that the public should take control of the Canadian Northern, of the Grand Trunk Pacific and the Grand Trunk proper, and that they should be administered on purely business principles by a board of trustees, such compensation as seemed proper to be decided by arbitration and given to the shareholders of the Canadian Northern and the Grand Trunk.

The process of the acquisition of these railways and the financial results of their operation down to the end of 1931 are described in Section 3, pp. 664 to 674.

The Royal Commission of 1931.—During 1930 and 1931 both freight and passenger traffic declined until new low records were being established each succeeding month. Freight and passenger revenues consequently decreased at alarming rates and with increasing capital expenditures and fixed charges, the financial condition of Canadian railways demanded readjustment. The dividend rate of the Canadian Pacific Railway was reduced from 10 p.c. to 5 p.c. for the second and fourth quarters of 1931 and early in 1931 it was evident that the Canadian National system would not earn the interest due on public holdings of its debentures exclusive of over \$32,000,000 interest on Government loans. To study the situation and, if possible, to remedy it, the Dominion Government appointed a Royal Commission by Order in Council P.C. 2910 dated Nov. 20, 1931. The Commission, under the chairmanship of the Rt. Hon. Lyman P. Duff, Judge of the Supreme Court of Canada, held hearings throughout the country and on Sept. 13, 1932, submitted its report.

The report condemned the unrestricted and extravagant competition of the Canadian National and Canadian Pacific Railways and the lack of co-operation in providing for the transportation needs of the country which resulted in the construction of branch lines, hotels, and other facilities far in excess of the present requirements. The Commission was of the opinion that aggressive competition should cease and its final conclusion was:

"We feel compelled, as a matter of public duty, to strike a serious note of warning to the people of Canada. Unless the country is prepared to adopt the plan we have proposed, or some other equally effective measures, to secure the efficient and economical working of both railway systems and thereby not only reduce the burden on the Federal Treasury but improve the financial position of the privately owned railway, then the only courses that would be left would be either to effect savings in national expenditures in other directions, or to add still further to the burdens under which the industries of the country are suffering by the imposition of yet further taxation. Failing the adoption of one or other of these courses, and there are obvious limits to their application, the very stability of the nation's finances and the financial credit of the Canadian Pacific Railway will be threatened, with serious consequences to the people of Canada and to those who have invested their savings in that railway".

To effect remedies it recommended:

(1) That the board of directors of the Canadian National Railways be reduced to three trustees (from 17), and that a majority of the trustees, which must include the Chairman, should govern its decisions.

(2) The annual budget of the railway should be under the control of the trustees and should be presented to Parliament for approval. Annual deficits should be voted by Parliament and not raised by the issue of railway securities.

(3) A continuous audit should be made by independent auditors appointed by Parliament.

(4) A statutory duty should be imposed upon the trustees of the Canadian National and upon the Board of Directors of the Canadian Pacific Railway to adopt as soon as practicable such co-operative measures, plans, and arrangements as may be best adapted to the removal of unwarranted duplication and unnecessary services and facilities and to co-operate and use jointly all facilities as far as feasible.

(5) To facilitate co-operation, an arbitral tribunal composed of the Chief Commissioner of the Board of Railway Commissioners as chairman and a representative from each of the railways should be appointed to settle disputes between the railways, especially as to co-operative measures or arrangements. The tribunal may be increased by an additional representative from each railway when deemed desirable by the railways. The tribunal should have jurisdiction in relation to the following matters:

- (a) Joint use of terminals.
- (b) Running rights and joint use of tracks where there are actual or functional duplications, or where such may be avoided.
- (c) Control and prohibition in respect of the construction of new lines and provision of facilities and additional services where no essential need of the public is involved.
- (d) The joint use of facilities where this would promote economy or permit the elimination of duplication or unremunerative services or facilities.
- (e) Abandonment of lines, services or facilities.
- (f) Pooling of any part or parts of freight traffic or of passenger traffic.
- (g) Things necessarily incidental to the above enumerated matters.

Whilst all members of this Commission concur in these recommendations which, if carried out in letter and spirit by all concerned (the Government, the public and the railways), should effect a considerable measure of relief to the taxpayers of Canada, some members would have preferred a plan which would have established a complete disassociation of the Government of Canada from the responsibilities of competitive railway management or of any direct interest therein.

The Commission also suggested a joint inquiry by the Dominion and Provincial Governments into regulation and taxation of motor vehicles using the highways. During the following session of the Dominion Parliament (1933), legislation known as The Canadian National-Canadian Pacific Act, 1933, was passed implementing the report of the Commission.

Under this Act the Board of Directors of the Canadian National Railways is replaced by a board of three trustees, the chairmanship of which is a full time position. The members are appointed for terms of five years and shall not be removed from office unless for assigned cause and on Address of the Senate and House of Commons. Decisions of the majority which must include the chairman will prevail. The trustees must submit each year estimates of requirements to Parliament through the Finance Minister and income deficits shall not be funded. The trustees shall also present annual reports to Parliament through the Minister of Railways and Canals. Continuous audit shall be made by independent auditors appointed annually by Parliament.

Under Part II of the Act the Canadian National and Canadian Pacific Railways are required to co-operate as recommended by the report of the Commission and, in addition, the railways shall divide the employment of such co-operative activities between the employees of the two railways, the division to be made by negotiations with the employees.

The co-operative measures may include:—

- (a) New companies controlled by stock ownership, equitably apportioned between the companies;
- (b) Leases, entrusting agreements, or licences, or agreements for pooling and division of earnings arising from the joint operation of any part or parts of freight or passenger traffic, or express, telegraph, or other operating activities or services;
- (c) Joint trackage, running rights, joint ownership, or joint operating agreements, depending upon the nature of the property or services included in any co-operative plan;
- (d) Joint or individual highway services, or highway and railway services combined, in any form.

In the formation of any new company, the employees in any services taken over by the new company shall be given preference.

Under Part III provision is made for the erection of a tribunal with jurisdiction as recommended by the Commission, except that clause (e) "abandonment of lines, services and facilities" is struck out.

The powers of the tribunal may be invoked by either company and decisions of the presiding officer and one member shall be final and binding on both railways, even if one railway fails to appoint a representative. The orders of the tribunal shall be binding and enforced in the same manner as orders of the Board of Railway Commissioners and shall not be subject to appeal except as to jurisdiction and only to the Supreme Court of Canada. Where an order of the tribunal conflicts with an order of the Board of Railway Commissioners the former shall prevail. Where a dispute is of substantial concern to the public, or affects any province, the presiding officer shall give due notice and the interested persons may be heard at the sitting.

The Act does not authorize the amalgamation or unified management of the two railways.

Section 2.—Statistics of Steam Railways.

The steam railways of the world may be said to have commenced their operations with the opening of the Stockton and Darlington Railway in England on Sept. 26, 1825. Between then and 1931, the mileage of the steam railways of the world had increased to an estimated total of 781,458 miles, of which figure 294,601 miles were State railways. Of the total, nearly one-third, or 253,286 miles is in the United States. Canada is second with 41,967 miles (exclusive of 341 miles of Canadian railways in the United States) and British India third with 38,736 miles. Germany has 36,344 miles, France 33,208 miles, Russia in Europe 36,701 miles, Russia in Asia 11,061 miles, Australia 28,883 miles, Great Britain and Ireland 24,360 miles, Argentina 23,430 miles, Brazil 19,560 miles and Mexico 16,406 miles.¹ Canada has an average of 247 persons per mile of her railway lines.

The mileage of steam railways in operation in Canada is given by years for each year from 1850 to 1931 in Table 1, showing the first great period of construction in the 1850's, when the mileage grew from 66 to 2,065, the lull in the

¹ From Slason Thompson's *Railway Statistics of the United States of America, 1931*, p. 32, with revisions for Canada and United States.

1860's, the second great period of construction in the 1870's and 1880's, the lull in the 1890's, the third great period of construction between 1900 and 1917 and the subsequent falling-off in the rate of increase.

Capital Liability.—The capital liability of the steam railways of Canada is shown in Table 3 for the years 1901 to 1931. The great increase after 1922 is due to the inclusion of all Government loans to railways and investment in road and equipment of Government railways as part of the capital liability of the railways. Statistics of individual lines are given in Table 4.

3.—Capital Liability of Steam Railways, June 30, 1901-19, and Dec. 31, 1919-31.

NOTE.—Corresponding figures for each year from 1876 to 1900 inclusive were given on p. 649 of the 1927-28 Year Book.

¹ Canadian lines only. ² Including capital of leased lines. ³ Constructed and operated by Ontario Government Railway Commission. ⁴ Included with Quebec Central. ⁵ Includes \$173,773,352 Canadian railway capital owned by Canadian railways.

Capital Investment.—The capital investment in road and equipment of Canadian steam railways is shown in Table 5 for the calendar years 1926-31. The table gives the investment in new lines and in additions and betterments during the year, together with the cumulative total of such investments as at the end of each year. During 1931, \$22,350,280 was invested in new lines and \$42,804,071 in additions and betterments, while up to Dec. 31, 1931, a total of \$3,464,388,610 had been invested in road and equipment of Canadian steam railways. When comparison is made with the figures of Table 3, it is seen that the capital liability of the steam railways was considerably greater than the actual investment in physical property by the railways at the same date. This discrepancy is largely accounted for by the fact that the total of capital liabilities as shown in Table 3 includes loans and advances from the Government to cover deficits of the Canadian National Railways and unpaid accrued interest on such loans which, up to Dec. 31, 1931, amounted to \$354,173,113 as shown in Table 22 and between 1919 and 1922 had amounted to about \$264,000,000. A further factor in the discrepancy is that some of the outstanding railway stocks represent little actual investment in physical property.

¹Includes a credit of \$14,944,515 on account of Hudson Bay Railway which was not operated but was returned to the Dominion Government for completion.

²Includes a credit of \$13,477,505 on account of Canadian National property transferred to Harbour Commissions of Halifax and Saint John.

³Includes difference between purchase price of Atlantic, Quebec and Western; Kent Northern; Quebec, Montreal and Southern; and Quebec Oriental Railways and investment reported in 1928—a credit of \$7,193,024; difference between valuation of Northern Alberta Railways and investment of Alberta and Great Waterways; Central Canada; Edmonton, Dunvegan and British Columbia; and Pembina Valley Railways as at June 30, 1929—a credit of \$5,939,429; a credit of \$1,869,859 for the Hereford Railway which ceased operation; and additions and betterments to separately operated properties and other undistributed items amounting to a debit of \$5,828,516.

⁴Credit of \$18,180,692 for Canadian Northern and Grand Trunk Pacific rails lifted during the War for use in France and other lines dismantled after consolidation of the Canadian National system.

⁵Includes a credit of \$6,928,410 due to balance sheet transfers, and a credit of \$1,359,261 for additions and betterments to separately operated properties of Canadian National Railways and miscellaneous credits amounting to \$309,876.

Summary of Traffic Statistics.—A summary of freight and passenger traffic statistics and of the ratio of operating expenses to gross earnings, continuing a series which has been compiled since 1875, will be found for the years 1911 to 1931 in Table 6. This table has, however, the defect that its figures of passengers and freight carried are not comparable throughout but have been reduced as a result of the consolidation of railways. Better tests of the real volume of passenger and freight traffic are supplied in Table 9 of this chapter under the headings "Passengers carried one mile" and "Freight carried one mile" These records, commencing in 1915, show that the maximum volume of passenger traffic was reached in the calendar year 1919 and the maximum volume of freight traffic in 1928. Both freight and passenger traffic, especially the latter, have in recent years been affected by the increase in the use of motor vehicles. This traffic decrease has been much aggravated since 1929 by the general decline in commercial activity.

The statistics of gross earnings and operating expenses illustrate the difficulties confronting our railways in recent years. Before the War it was generally held that, on account of the enormous initial investment required in roadbed and equipment, a railway's operating expenses should not exceed about two-thirds or 70 p.c. of its gross earnings, the remainder being required to meet interest on capital invested, whether represented by stocks or bonds, as well as to provide for necessary improve-

ments. The ratio of operating expenses to gross earnings is called the operating ratio, and in 1913 the Canadian operating ratio was 70.90 p.c. The new conditions of the war period, especially the higher cost of labour and of fuel, increased the operating ratio, in spite of advances in freight and passenger rates, until in 1920 it reached 97.18 p.c. For 1928 there was a decline to a ratio of 78.53 p.c. which rose to 83.86 in 1930 and 89.53 in 1931. Although operating expenses for 1931 were lower than in 1930 on account of the decreases in both freight and passenger traffic, the gross revenues showed a much greater decline, reducing the net operating revenues by \$35,984,445 and increasing the operating ratio.

In Table 7 will be found an analysis of the distribution of the operating expenses of steam railways for the latest four years. The earnings and operating expenses per mile of line and per train-mile are analysed in Table 8.

6.—Summary of Steam Railway Statistics of Freight and Passenger Traffic, and Ratio of Expenses to Earnings, years ended June 30, 1911-19, and calendar years 1919-31.

Note—These statistics were published for the years 1875-1910 on p. 434 of the 1916-17 Year Book, and for 1931-10 on p. 591 of the 1928 Year Book.

1931	8,502	7,612	890	3-837	3-435

A summary analysis of passenger and freight traffic statistics for recent years is given in Table 9, showing among other things a decline in average receipts per passenger per mile from 3.04 cents in 1921 to 2.72 cents in 1931, and a decline in the average number of passengers per train from 70 in 1919 and 64 in 1920 to 39 in 1931. Similarly, freight traffic statistics show a reduction in freight receipts per ton per mile from 1.200 cents in 1921 to 1.013 cents in 1931. The average haul for freight has been revised to show the average for all railways instead of for each railway, thereby eliminating the effects of consolidations of railways and of interchanging freight between Canadian railways. The passenger traffic has shown the effects of the competition of motor vehicles, both public and private, which in 1915, numbered only 89,944, while in 1931 they numbered 1,206,836. The average revenue per passenger increased in 1918 and 1919 with increases in rates, but the increases between 1924 and 1930 have been largely due to decreases in the short haul traffic. The increases in freight train loading and train revenues have been due to the use of larger and more powerful locomotives.

¹Duplications eliminated.

Railway Wages and Salaries.—The number of railway employees and the amount of their remuneration are naturally affected by the volume of traffic, which tends to rise in periods of active business conditions and fall in times of depression. The volume of traffic is also very directly affected by the size of the grain crops in the West. Thus it may be observed in Table 10 that the very favourable industrial and agricultural conditions of 1928 resulted in a considerable increase in the number of employees. The depression in 1929, 1930 and 1931 resulted in a reduction of \$54,873,817 in the pay roll chargeable to operating expenses during these three years, although, owing to heavy construction work in 1929, the total pay roll as shown in Table 10 was slightly higher than in 1928.

Largely because of inflated monetary conditions, the amount of salaries and wages reached a peak in 1920, but, as will be seen from Table 10, the wage bill increased from 1911 to 1920 to a much greater extent than the number of employees, viz., by 289 p.c., while employees increased by only 31 p.c. By a revision in 1926, the pay roll includes both operating and construction or capital accounts and consequently the data are not directly comparable with data for previous years.

10.—Numbers of Steam Railway Employees, Totals and Averages of Salaries and Wages, and Ratios of the Latter to Gross Earnings and Operating Expenses, for years ended June 30, 1911-19, and for calendar years 1919-31.

¹Owing to changes in classification, the figures for 1926, 1927, 1928, 1929, 1930 and 1931 include 8,792, 8,360, 11,657, 13,396, 13,102 and 11,960 employees respectively, with salaries and wages of \$9,075,602, \$8,391,797, \$13,218,742, \$15,096,189, \$14,663,500 and \$13,611,637 respectively, engaged in outside operations and in classes not included prior to 1926. ²Exclusive of classes specified in footnote 1 for 1926 and subsequent years. ³The ratio percentages are for pay roll chargeable to operating expenses only for 1926 and subsequent years.

Rolling Stock.—Statistics of the rolling stock of the steam railways of Canada are given for the last seven years in Table 11. The figures may be supplemented by the statement that between 1920 and 1931 the average capacity of box cars increased from 34.779 tons to 39.086 tons, of flat cars from 33.459 to 38.949 tons, and of all freight cars from 35.141 tons to 39.551 tons. The average tractive power of the locomotive in use in 1920 was 31,112 lb. and in 1931, 37,130 lb.

¹ Includes pullman cars.

Commodities Hauled.—In Table 12, the duplications from two or more railways handling the same freight have been eliminated. The peak year was 1928 when agricultural products were particularly heavy. The 1931 statistics show a decrease of 22,064,323 tons, or 23 p.c. from the 1930 total and of 38 p.c. from 1928. Decreases in 1931 were general, only 10 commodities showing increases over 1930. Six of these were animal products.

12.—Commodities Hauled as Freight on Steam Railways during the calendar years 1927-31.

NOTE.—In this table duplications are eliminated, i.e., the same freight handled by two or more railways is counted only once. In this respect these figures differ from those in the corresponding table in the 1926 and previous Year Books, and also from those of Table 6 in this chapter.

Government Aid to Private Railways.—In order that the private railways of Canada might be constructed in advance of settlement, as colonization roads or through thinly settled districts where little traffic was available, it was necessary for Dominion, Provincial and even municipal governments to extend some form of assistance. In our earlier history, when our governments had plenty of Crown land and little cash, the subsidies granted to railways frequently took the form of land grants, which had the advantage of giving the railway a direct interest in opening up the country, though they sometimes led to the railways holding large tracts of land idle for speculative purposes when intermixed Crown lands had been homesteaded, thus retarding the settlement of agricultural land. Table 13 shows the areas of the land granted as subsidies and for right of way, station grounds and townsite purposes to steam railway companies by the Dominion and Provincial Governments, with the names of the companies in the case of the Dominion Government. The total area granted up to Dec. 31, 1931, amounted to 47,400,714 acres.

As the country grew wealthier, the objections to the land grant method became more apparent, and aid was more frequently given in the form of a cash subsidy per mile of line, a loan, or a subscription to the shares of the railway. From 1851 up to Dec. 31, 1931, as shown analytically in Table 14, the total value of such aid granted to steam railways in Canada, exclusive of the capital of government railways, amounted to \$222,942,253. Of this sum, \$176,693,510 was aid granted by the Dominion Government, \$33,260,615 that granted by the Provincial Governments, and \$12,988,128 that granted by municipalities. Table 15 records the details of the most recent type of assistance given to private railways, *viz.*, by the guaranteeing of their bonds or of the interest thereupon. These guarantees enabled the railways receiving them to borrow money at rates of interest considerably lower than would otherwise have had to be paid. The total amount outstanding on Dec. 31, 1931, was \$847,616,637.

Railway Accidents.—The number of passengers, employees and others killed and injured in steam railway accidents is given in summary form from 1915 to 1931 in Table 16, and in detailed analysis for 1929 to 1931 in Table 17. Between 1915 and 1931 the number of persons killed in *train accidents* only, decreased by 120, or 32.8 p.c., and the number injured increased by 665, or 42.1 p.c., the increases at highway crossings, due largely to careless driving by motorists, being 18 killed and 209 injured. The number of persons injured in other accidents (trackmen, shopmen, etc.), increased from 1,583 in 1915 to 4,952 in 1931; the extent of the injuries cannot be compiled or compared, but it is probable that legislation in connection with workmen's compensation results in injuries to employees being much more completely reported in the later years.

16.—Number of Passengers, Employees and Others Killed and Injured on Steam Railways, years ended June 30, 1915-19, and calendar years 1919-31.

Note.—For the years 1888 to 1914, see Canada Year Book, 1922-23, page 635.

Section 3.—Origin and Growth of Government-Owned Railways.

Canadian Government Railways.—The Intercolonial Railway, built as a condition of Confederation and completed in 1876, and the Prince Edward Island Railway, opened in April, 1875, have since their construction been owned and operated by the Dominion Government. In 1903 the Dominion Government undertook the construction of the National Transcontinental Railway from Moncton, N.B., to Winnipeg, to be leased to the Grand Trunk Pacific Railway Company for a period of 50 years. However, as a result of the conditions arising from the Great War, the company was unable to take over the operation of the road when completed in 1915. The Government itself undertook its operation and was also obliged to lease the Lake Superior branch of the Grand Trunk Pacific Railway, which was isolated from the main line. A number of eastern branch lines have been acquired in recent years, including: the New Brunswick and Prince Edward Island Railway which forms the mainland connection of the Prince Edward

Island car ferry, the International Railway, the Moncton and Buctouche Railway, the Salisbury and Albert Railway, the St. Martin's Railway, the Elgin and Havelock Railway, the York and Carleton Railway, the Quebec and Saguenay Railway, the Caraquet and Gulf Shore Railway, the Lotbinière and Mégantic Railway and the Cape Breton Railway. The Saint John and Quebec, and Inverness Railways, which had been operated under lease, were purchased in 1929, together with the Kent Northern, the Atlantic, Quebec and Western, the Quebec Oriental and the Quebec, Montreal and Southern. The Hudson Bay Railway, which had 332.5 miles of steel rail at the end of 1920, was declared to be comprised in the Canadian Government Railways, and until 1926 was operated to a limited extent by the board of directors of the Canadian National Railways. In that year, as a result of the decision to complete the road, it was returned to the Department of Railways and Canals until completed. The eastern terminus was transferred from Nelson to Churchill, and the line rehabilitated and extended through to Churchill. Construction of wharves and a grain elevator was completed in time to allow two cargoes of wheat to be shipped in September, 1931, to Europe. To Mar. 31, 1932, the total cost of this railway was \$31,194,693 and of terminal work at Churchill \$11,606,121, exclusive of the expenditures of \$6,274,218 on the terminal at Nelson, some of which was salvaged.¹

Table 18, from the Annual Report of the Department of Railways and Canals, shows Dominion Government investments in the Canadian Government Railways to Mar. 31, 1932.

¹ These figures of total cost include deficits during operations and expenditures which formed part of cash loans to the Canadian National Railways and amounts chargeable to appropriations under collection of revenue in the case of the terminals, in addition to the expenditures by the Government on capital account as shown in Table 18.

The Consolidation and Organization of the Canadian National System.¹

—In pursuance of an Act of 1917 (7-8 Geo. V, c. 24), the Government acquired the capital stock of the Canadian Northern Railways with a mileage of 9,566.5. The insolvency of the Grand Trunk Pacific led to the appointment of the Minister of Railways as receiver on Mar. 9, 1919, and in October, 1920, the road was transferred to the Canadian National Railways. The Grand Trunk Railway was acquired under c. 13 of the second session of 1919, which provided for arbitration as to the considerations to be given to its shareholders. This arbitration finally disposed of, steps were taken to consolidate the various railways under government operation and control. In October, 1922, the Grand Trunk Board and the Canadian Northern Board gave place to a single Canadian National Board, to which the former Canadian Government Railways were turned over for management and operation. The unification of the Grand Trunk and Canadian National Railways was provided for by Order in Council of Jan. 30, 1923, which also brought into effect the Act to incorporate the Canadian National Railway Company and respecting Canadian National Railways (c. 13, 1919). This was followed, on Feb. 5, 1923, by an Order in Council establishing the head office of the Canadian National Railways at Montreal, Que.

Operation of the Canadian National Railways.—The Canadian National system's steam mileage at Dec. 31, 1931, including lines in the United States but exclusive of the Northern Alberta (which is controlled jointly by the Canadian

¹ For further details of the acquisition of the Canadian Northern, Grand Trunk Pacific and Grand Trunk Railways by the Dominion Government, see pp. 602-603 of the 1926 Year Book.

National and the Canadian Pacific Railways), was 20,538.24, which with the Eastern Lines' mileage of 3,342.37 made a total of 23,880.61. Including the Thousand Islands Railway, 4.51, and the Muskegon Railway and Navigation Co., 5.25, controlled but separately operated, the total steam mileage was 23,890.37. Including 122.8 miles of electric lines, the grand total was 24,013.17.

The Maritime Freight Rates Act (17 Geo. V, c. 44), effective July 1, 1927, ordered that the accounts of the Canadian National lines east of Lévis and Diamond Junction, Quebec, be kept separate from those of the remainder of the Canadian National system. These lines were designated the "Eastern Lines" of the Canadian National Railways. The Act ordered that specified freight rates on the Eastern Lines be reduced by 20 p.c. Other railways were allowed to make similar reductions in their freight rates in that territory and to bill on the Board of Railway Commissioners of Canada for the difference in freight receipts due to such reductions. The Government contributions to the deficits of the Eastern Lines due to these reductions are shown in Table 22. The total paid to privately owned railways under the Act was \$421,655, \$828,893, \$811,149, \$861,195 and \$669,673, respectively, for 1927-31.

For operation the Canadian National Railways system is divided into five divisions: the Atlantic division, including all lines east of Rivière du Loup and Monk, Quebec, 3,021 miles; the central division west from these stations to Port Arthur and Armstrong and south to Portland, Maine, 7,403 miles; the Western division, all lines west of Port Arthur and Armstrong including the line to Duluth, 11,419 miles; the Grand Trunk Western, all lines in Michigan, Indiana and Illinois, 1,023 miles; and the Central Vermont from Iberville, Quebec, to New London, Connecticut, 457 miles.

The Quebec Bridge across the St. Lawrence above Quebec city, with a main span of 1,800 ft., carrying a single track railway and accommodation for motor and pedestrian traffic, forms a connecting link in the Canadian National Railways system and is operated as a part of it.

Table 19 shows some of the more important train traffic statistics of Canadian National Railways operation for the years 1930 and 1931 (excluding the Eastern Lines).

¹Excludes Eastern Lines and electric lines.

²For detailed statistics of the operation and finances of the Canadian National Railways during 1931 see the annual report of the Department of Railways and Canals for the fiscal year ended Mar. 31, 1932, and Steam Railway Statistics, 1931, published by the Dominion Bureau of Statistics, also the annual report of the Canadian National Railways.

³Work service excluded.

Operating Finances of the Canadian National Railways.—In Table 20 "Canadian Lines" include those of the Canadian Northern system, the Grand Trunk Railway of Canada, the Grand Trunk Pacific and the Canadian Government Railways. The "United States Lines" include those lines known as the New England line, the Grand Trunk Western, the Duluth, Winnipeg and Pacific and the Central Vermont from Feb. 1, 1930. The Hudson Bay Railway was returned to the Government while under construction, and appropriations, etc., for this were not included with the 1926 and later data. The Maritime Freight Rates Act necessitated the segregation of the Eastern Lines which have been kept separate since July 1, 1927.

Gross revenues, operating expenses and net revenues shown in Table 20 include only those from steam railway and commercial telegraph operations, but the deficits are for the entire system, including the operating results of the Niagara, St. Catharines and Toronto Railway (electric) and other railways operated separately, hotels, commercial telegraphs, coastal steamships and all other outside operations.

Up to 1928 there was a marked improvement over the results of the first year after consolidation (1923), when the deficit, including profit and loss adjustments, was \$54,634,322, but the light traffic in 1932 so reduced gross revenues that, with increased interest charges, the deficit increased to \$101,335,074 in that year.

The figures of Table 20 are taken from the accounts of the railways as at Dec. 31, 1932. Adjustments have been made which result in minor changes in the items of interest and deficits for former years.

¹Includes Central Vermont Railway from Feb. 1, 1930.

²Revenues and expenses, 1923-27, adjusted to include commercial telegraph lines to be comparable with 1928-31.

³Interest at 4 p.c. on \$34,927,098 G.T.P. debenture stock reduced under agreement to 2 p.c.

⁴The deficits shown are as per the accounts and include Government interest accounting adjustments of \$11,505,416 and appropriation for insurance fund of \$9,388,982, the actual cash deficit for the period being \$221,325,718, as shown in Table 22.

The Debt and Interest Charges of the Canadian National Railways.—

Table 21, which follows, analyses the increase in the debt and interest charges of the system, including both Canadian and United States lines. The table shows to whom the liabilities which have accumulated up to the end of 1932 and the new funds available each year are payable. To define clearly what is included under debt due to the Dominion Government in Table 21, the appropriations for the Canadian Government Railways have been separated from the loans and advances to the remainder of the system. The Canadian Government Railways include the Intercolonial, National Transcontinental, Prince Edward Island and several other smaller railways in the Eastern Provinces, together with the Quebec Bridge. The Hudson Bay Railway was included in the Canadian Government Railways until 1926, when it was transferred back to the Department of Railways and Canals for completion, and appropriations on its account were deducted. These Canadian Government Railways appropriations do not include the operating deficits of the Canadian Government Railways for 1919 and 1920 nor the deficits of the Eastern Lines since July 1, 1927, but include investments for construction, purchase and working capital of the Canadian Government Railways and the operating deficits of these railways since their consolidation with the system in 1921, except as already mentioned. As the book value of these properties is included on the asset side of the balance sheet, the cost of these roads to the Dominion is included in the liabilities of the system as an offset. The construction or purchase of these roads was financed by the Dominion from the Consolidated Revenue Fund, and while for book-keeping purposes their cost is set up as a system liability, they are not a debt and carry no interest obligation.

In a rather different class are the loans and advances made by the Government to the Canadian National Railways or constituent companies on notes, bonds and receiver certificates with accrued simple interest ranging from $3\frac{1}{2}$ to 6 p.c. In computing the public debt of Canada the Finance Department considers these railway loans and advances as "non-active assets" similar to investments in canals, public works, etc., and as such does not subtract them from the gross debt in computing the net debt; similarly, no interest is charged by the Finance Department on the railway advances. The railways, however, debit their accounts with the accrued interest on these Government advances, although no such interest has been paid.

The debt due to the public includes debenture stock maturing and perpetual, and bonds and mortgages of the constituent railways, but does not include the capital stock of the Grand Trunk Railway held by the Government, nor the cost of acquiring the same. Likewise it does not include the capital stock of the Canadian Northern system. The stock of the Grand Trunk Pacific is all held by the Canadian National system and is therefore not included either.

21.—Long-Term Debt¹ of Canadian National Railways (Including Appropriations for Canadian Government Railways), Showing Principal Outstanding at end of calendar years 1922-32, and New Funds Raised, calendar years 1922-32.

¹See Table 22 for short-term loans. ²Deficits of Eastern Lines are met by separate appropriations by the Dominion Government and are not included herein. ³Total includes unpaid accrued interest on Government loans amounting to \$69,328,503 at the end of 1922 and increasing by some \$30,000,000 each year to the sum of \$388,930,381 at the end of 1932. ⁴Includes \$216,207,142 perpetual debenture stock guaranteed as to interest only. ⁵Dates at which constituent lines were taken over by Canadian National were: Canadian Northern, Sept. 30, 1917; Grand Trunk Pacific, March 9, 1919; Grand Trunk, May 21, 1920; Canadian Government, March 31, 1919 (actual date of transfer Nov. 20, 1918). ⁶Including Hudson Bay Railway \$14,531,706. ⁷Repayment of temporary loan of \$14,259,436. ⁸Central Vermont Railway bonds of \$9,902,866 were included in annual report but excluded here. ⁹Temporary loan of \$4,884,639 repaid and temporary loan of \$8,561,500 for redemption of Central Vermont Railway bonds repaid and included in guaranteed bond issue of \$50,000,000, June 15, 1930. ¹⁰This total will be reduced in 1933 by applying thereto the cash deficit in 1932 of \$53,422,662. ¹¹The appropriations for Canadian Government Railways include a credit of \$42,582,680 for properties transferred to other Government Departments, etc., not representing new funds available, viz.: Hudson Bay Railway, 1926, \$15,245,889—Halifax Harbour Commission, 1928, \$12,830,122—Saint John Harbour Commission, 1928, \$645,183—1921-22 deficits, 1930, \$12,499,126—Quebec Bridge adjustment \$933,534 and other adjustments \$428,746.

Table 22 analyses the capital raised and expended by the Canadian National Railways. In addition to the funds available under long-term debt, as shown in Table 21, the railways have frequently had short-term loans, and have received compensation for reductions of revenue under the Maritime Freight Rates Act. The second part of the table shows how the capital thus made available has been expended.

22.—Capital Raised and Expended by Canadian National Railways, calendar years 1923-32.

¹ Interest on Government loans not included. ² Increase in special deposits, \$25,415,179. ³ Decrease in special deposits, \$41,175,428. ⁴ Excludes transfer of \$31,583,630 investment in Central Vermont lines transferred from "Investments in Affiliated Companies" to "Investment in Road and Equipment" in 1930 accounts, also transfer of \$29,780,426 for Canadian Government Railways property transferred per footnote 11 of Table 21, \$17,230,683 for retirement of abandoned lines, principally duplicate lines of Grand Trunk Pacific and Canadian Northern, west of Edmonton, held in suspense until 1930, \$3,021,486 for Toronto Suburban Railway for which a receiver was appointed in 1931, and other miscellaneous additions and deductions. ⁵ See footnote 4 for transfer to "Investment in Road and Equipment".

The figures given in Table 22 differ somewhat from the figures given in the annual reports of the railways by reason of certain accounting adjustments (not representing new funds or expenditures) entered into the accounts during the period but excluded herefrom. It should be noted, however, that the total cash deficit of \$221,325,715 for the period 1923-32 does not include \$11,505,416 of accounting adjustments and \$9,388,962 appropriated for investment in the Insurance Fund. If these items are included, the total deficit for the ten-year period is \$242,220,094 as shown in Table 20.

Table 23 has been compiled to reconcile the investments in and loans to the Canadian National Railways (including Canadian Government Railways) as shown in the Public Accounts for the fiscal year ended Mar. 31, 1932, with the debt to the Dominion Government shown in the railway's balance sheet, Dec. 31, 1931. The last section of the table shows the adjustments to the statement in Public Accounts which make up the difference.

Table 24 shows the assets of the Canadian National Railways at Dec. 31, 1922, and at Dec. 31, 1932, with the increase or decrease for the ten-year period.

23.—Adjustments Accounting for Difference in Railway Obligations as shown by Public Accounts, Mar. 31, 1932, and by Canadian National Railways Balance Sheet, Dec. 31, 1931.

¹ See footnote 11 to Table 21.PART III.—ELECTRIC RAILWAYS.¹

The cheap and reasonably rapid conveyance of human beings is a necessity of modern urban life and one important means by which this necessity is supplied throughout Canada is the electric street railway, generally operated by the hydro-electric energy which is so important a feature of Canadian economic life.

Historical.—Replacing the horse car systems, used in Montreal and Toronto as early as 1861, electric street railways were first seen in operation in Canada in 1885, when a successful experimental railway was constructed and operated at the Toronto Exhibition grounds. Before many years their safety and convenience resulted in the discarding of the older system. An electric system 7 miles in length

¹ Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on Electric Railways in Canada.

was opened at St. Catharines in 1887, using the double overhead trolley. This was followed by the completion of the Ottawa Electric Railway in 1891, and the electrification of the Montreal and Toronto systems in 1892. The street railways of other eastern cities were generally electrified during the 1890's, while in the newer western cities electricity was used from the commencement. In the cities of Eastern Canada, electric street railways are generally operated by private companies under city franchises, while in a considerable number of cities in Ontario and the West the street railways are owned and operated by the municipalities, a fact indicated in Table 28. In 1921, on the expiry of the 30-year franchise of the Toronto Street Railway Co., the railway in this second largest city of Canada was taken over by the city and is now being operated by a transportation commission.

Many difficulties are met in operating the cars during the winter season, owing to snow. This, however, has been overcome by the use of sweepers, scrapers and ploughs. The single overhead trolley system has been found the most suitable and is in general use. During the past few years an increasing number of motor buses have been used; in 1924 only 48 were operated, but by 1931 the number had increased to 547.

In addition to the street railways there is quite a large mileage of electric suburban or interurban lines, especially in the Toronto, Niagara and Lake Erie district, where considerable freight traffic is carried, and on the Pacific coast, where the British Columbia Electric Railway operates several hundred freight cars.

Development of Electric Railway Traffic.—Figures for the year 1893 show that 30 companies, with a paid-up capital of about \$9,000,000, operated 256 miles of railway. By 1897, 35 companies made returns showing 583 miles of track, 1,156 cars, 26,431,017 miles run, 83,811,306 passengers carried and capital of \$18,727,355. In 1901, 44 companies showed 766 miles of track, 2,373 passenger cars, 42,066,124 car miles run, 181,689,998 passengers and capital of \$50,399,188. The statistics for 1931 show that during that year 52 companies with a capital of \$215,818,096, had 1,959 miles computed as single track, 4,044 passenger cars, 547 buses, 491 freight cars and 52 electric locomotives, 133,883,489 car miles run, and 720,468,361 fare passengers. The number of employees in the service of electric railways on Dec. 31, 1931, was 17,135, as compared with 18,340 in 1930. Total salaries and wages for the year 1931 were \$24,647,391, as against \$26,954,994 in 1930.

Statistics of Electric Railways.—Summary statistics of the operation of electric railways in Canada from 1901 to 1931 inclusive are given by years in Table 25. It may be noted in this table that the carriage of freight reached its maximum in 1928, with 3,888,672 tons, while the number of fare passengers carried in 1929 reached a new record of 833,496,866, decreasing in 1931 to 720,468,361. In Table 26 statistics of mileage and equipment are given for the latest four calendar years, and statistics of the capital liability of electric railways are furnished for the years 1908-31 in Table 27. Detailed figures of the mileage operated, the capital liability, the earnings, operating expenses, passengers carried, employees, and salaries and wages, are given for 1931 in Table 28, while Table 29 shows by years from 1919 to 1931 the number of passengers, employees and others killed and injured on electric railways in Canada.

25.—Summary of Statistics of Electric Railway Operation, years ended June 30, 1901-19, and calendar years 1919-31.

PART IV.—EXPRESS COMPANIES.¹

"Express service is an expedited freight service on passenger trains" But express companies do not own the means of performing their services; they use railway facilities by virtue of contracts with the railway companies. Express companies in Canada have had close relations with the railways practically from the beginning. A brief history of the various express companies will be found on pp. 611-12 of the 1926 Year Book.

Before 1915, an express company in Canada was not liable for delay or damage caused by anything quite beyond its control, thus maintaining itself as an entity separate from the railway company. Thenceforth an express company became liable for delay or injury of goods if either was caused by the railway company in whose cars the goods were being carried.

Goods are sent by express for quick transit, so that express rates do not compete with freight rates. Thus in its first tariff the Dominion Express Co., in pursuance of its contract with the Canadian Pacific Railway, gave a rate of 2½ times the maximum first-class railway freight rate for the same goods carried the same distance. The majority of the contracts between express and railway companies for carrying express freight are on the basis of a percentage of the gross express revenue. The rates are subject to the approval of the Board of Railway Commissioners.

Express Company Operations.—During 1931, the latest year for which the statistics of the Transportation Branch of the Dominion Bureau of Statistics are available, there were four Canadian and one American express organizations operating in Canada. The Canadian Pacific Express Co., formerly the Dominion Express Co., is a subsidiary of the Canadian Pacific Railway and handles the express business on the railways and the inland and ocean steamship lines of the parent company. The express business of the Canadian National system is handled by a department of the railway. The British America Express Co. operated over the Algoma Central until Feb. 28, 1931, when it ceased operations. The Central Canada Express Co. was formerly operated over the Central Canada, the Edmonton,

¹Revised and checked by G. S. Wong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch issues an annual report on Express Statistics.

Dunvegan and British Columbia, and the Alberta and Great Waterways Railways, but in 1927 its business was taken over by the Canadian National Express Department. With the amalgamation of these railways in 1929 and formation of the Northern Alberta Railways Company, the express business was handled by a department of the new company from Nov. 1, 1929. The Railway Express Agency, Inc., operates over the Canadian sections of United States railways and over the route from Skagway to points in Yukon. These companies are organized under powers conferred by Acts of the Dominion Parliament and their business consists in the forwarding of parcels, the transfer of baggage and the issue of money orders, travellers' cheques, letters of credit and other forms of financial paper. The total capital liabilities of the two Canadian companies and of the Canadian National Express Department stood at \$8,739,594 on Dec. 31, 1931.

Statistics of the receipts and expenses of express companies in Canada are given in summary form for all companies for the years 1919 to 1931 in Table 30, and for each company for the year 1931 in Table 31. In these tables the amounts paid by express companies to the carriers, i.e., railways, steamship lines, etc., for transporting the express matter, are shown under the heading "express privileges". Table 31 also shows the mileage operated by each company in 1931. Of the total of 62,726 miles, 42,336 were over steam railways, 313 over electric railways, 14,227 on ocean steamship services (mainly by the Canadian Pacific lines) and 5,676 miles on inland or coastal steamboat routes.

30.—Summary Statistics of Revenues and Expenses of Express Companies, calendar years 1919-31.

NOTE.—Similar figures for the years ended June 30, 1911-18, were published at p. 673 of the 1927-28 Year Book.

PART V.—ROADS AND HIGHWAYS.¹

Historical.—The early roads were auxiliary to water routes as avenues of transportation. They were used during the summer season, when portages were necessary to avoid obstacles to river and lake travel, and during the winters, when ice prevented navigation and snow covered the inequalities of the ground. Even the extensive system of waterways of Eastern Canada was an inadequate means of communication between points of settlement in a rapidly growing colony, and the need for overland routes manifested itself in the introduction of the system of common roads which prevailed under the old *régime*. Not only did the crude early roads serve the needs of the settlers, but also those of the British, French and American armies during the numerous campaigns. Soldiers were frequently employed, in times of peace, on road construction in different parts of Upper and Lower Canada.

The first important highway in Canada extended along the north shore of the St. Lawrence from Quebec to Montreal, being gradually completed with the growth of the French settlements. In Upper Canada, one of the earliest roads (Yonge St.) was that from Toronto to lake Simcoe, completed in 1794 under the direction of Governor Simcoe, the work being done by the Queen's Rangers. This road not only gave access to the area north of Toronto, but also provided a more convenient route than that of the Ottawa river from the trading posts on the Upper Lakes to the centres of population along the St. Lawrence. Montreal was joined to Kingston by road in 1816, and in the following year to Toronto. Thereafter, other highways to inland settlements, from points served by water routes, began to increase in number, as it became apparent that they were essential to the commercial life of the country for transporting supplies to the settlers and bringing their products to the central markets of the colony. The system of posts, which had been established about the beginning of the nineteenth century, necessitated passable routes between the various points, and by 1827 a through road was available between Halifax and Amherstburg, comprising for the most part the old Kempt road, the York road, Dundas street and the Baldoon road. From this trunk line of communication branch roads extended north and south to the more important centres of population in the two Canadas. The cost of construction of these roads was high, and travel by stage coach was tedious and costly. As late as 1850 some points in central Ontario were still inaccessible to any vehicle. Later years, however, have brought with them improved methods of construction and a resulting reduction in expenses, together with an improvement in the wearing qualities of the more important highways.

¹ Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which publishes an annual report entitled "Highways and Motor Vehicles in Canada."

Recent Highway Development.—The growth of motor traffic during and since the War has greatly stimulated the movement for increased and improved road construction. Good roads associations assisted by the automobile clubs are to be found in most of the provinces for the education of the public in the need for improved highways. With the rapid increase in the percentage of motor car owners to the population (see p. 685-6) the demand for improved roads became insistent after the War. Furthermore, the advantages to be gained by attracting touring motorists have been a powerful incentive to governing bodies to improve trunk roads and scenic highways within their jurisdictions. One sphere where the motor car has been of special economic advantage has been in rural areas, where its speed and economy are a great improvement over the old horse-drawn vehicle. As a result, in the 1931 census every second farm reported a farm-owned motor vehicle (1.96 farms per farm-owned motor vehicle). This widespread rural ownership of automobiles has resulted in the improvement of secondary rural roads.

A table of road mileage in Canada follows. When it is considered that throughout the Dominion there are about 26 persons to every mile of road and that on an average there is one mile of road for every 9 square miles of land, the magnitude of the problem faced in the construction of these traffic routes is realized. A small population scattered over a large area has made this, like other transportation problems, particularly difficult of solution.

33.—Classification of Canadian Highways, by Provinces, Dec. 31, 1931.

¹ Manitoba figures are as at April 30, 1931. ² B.C. figures are as at Mar. 31, 1931. ³ Includes some unimproved earth roads. ⁴ Includes 42.5 miles of other classes. ⁵ 23,056 reported for 1930.

The great improvement indicated above in the extent and character of Canadian highways has entailed the expenditure of large sums by governing bodies, chiefly provincial or municipal authorities, as roads are under their jurisdiction. Unfortunately, there are no comprehensive or comparable statistics available regarding these expenditures prior to 1928. Expenditures by the Dominion Government have taken the form of subsidies to the provinces for specific highways and have been made under the Canada Highways Act, 1919, largely in the few years immediately after the War, and under relief legislation during the present depression to aid in providing useful employment. These subsidies paid in 1931 are shown in Table 34.

The Canada Highways Act.—Partly in response to the general demand for improved highways and partly to increase civilian employment at the end of the War, the Dominion Parliament, by c. 54 of the Statutes of 1919, authorized the expenditure of \$20,000,000 for the purpose of constructing and improving the highways of Canada during the five years succeeding the passage of the Act. In its apportionment, grants of \$80,000 were made to each province during each of

the five years, the remainder being allotted in proportion to their respective populations. Details as to cost, time, methods of construction, etc., of all roads built under the scheme were to be arranged between the Minister of Railways and Canals and the various Provincial Government Departments. By c. 4 of 1923 and c. 4 of 1925 the operation of the Act was extended to April 1, 1928. A table on p. 669 of the Canada Year Book, 1929, shows the working of the Act and the allocation of expenditure as between the Dominion and the various provinces down to Mar. 31, 1928. By that time the grant had been expended. Road projects subsidized under the Act amounted to 8,753 miles with an estimated subsidizable cost of \$49,581,192.

Road Expenditures by Provinces and Municipalities.—Table 34 presents the available statistics of expenditures on highways in the four latest years. However, the limitations of the statistics in this table should be clearly realized. These expenditures cover only national and provincial highways, secondary highways and other important roads to which the Provincial Governments contribute, together with the bridges or ferries necessary to such highways. The figures do not include expenditures on roads or streets within urban municipalities, nor expenditures by rural municipalities on local roads to which no contribution is made by the Provincial Governments. Expenditures for both construction and maintenance of municipal roads receiving subsidies are often made over and above the amounts upon which subsidies are granted and these extra expenditures are not included. No data regarding municipal expenditures for either construction or maintenance are available in Saskatchewan. Altogether, the record of expenditures by municipalities is very incomplete. In the Maritime Provinces all road expenditures are made by the Provincial Governments.

34.—Capital and Maintenance Expenditures on Provincial Highways or Provincially Subsidized Highways in Canada, calendar years 1928-31.

Provincial Funded Debt Incurred for Highways.—Table 35 shows the funded debts of the provinces outstanding at Dec. 31, 1931, which were incurred for highway development. These amounts should not be confused with estimates of the total investment in highways. The cost of constructing a new road is considerably greater than that of putting a permanent surface on an old road; the latter has been the purpose of much of the provincial expenditure.

The maintenance expenditures by the Provincial Highway Departments during 1931 amounted to \$18,746,163, while the annual charges for highway debt were \$19,772,829, a total provincial charge of \$38,518,992. The provinces collected \$42,662,241 in licences, gasolene taxes, tolls, etc., in connection with highway traffic. While these left an apparent surplus of \$4,143,249, no provision was made for the cost of administering highway and motor vehicle departments, for traffic patrols, nor for any expenditures by municipalities for either road maintenance or interest and retiring charges on capital expenditures.

PART VI.—MOTOR VEHICLES.

The earliest motor vehicles were propelled by steam, the history of the gasolene motor car commencing with the successful construction of a gasolene engine by Daimler in 1884. Until 1900 France remained the headquarters of the industry, possessing in that year more than half of the 10,000 cars in operation in Europe, while in the United States the number of cars was only about 700. Shortly afterwards, the development of the Ford car resulted in a keen competition to bring motor cars within the reach of the average man, profits being secured from large production rather than high prices. Detroit became the centre of the automobile industry of the United States and the Canadian side of the Detroit river became the headquarters of the Canadian industry. As a consequence, the population of the border towns Windsor, Walkerville and Sandwich greatly increased between 1911 and 1921, while the town of Ford (now East Windsor), which had no existence in 1911, had 5,870 inhabitants in 1921 and 14,251 in 1931, when the aggregate for the "Border Cities" was 98,179. Problems of regional location have resulted, during more recent years, in a gradual shifting of the centre of the industry, and the Toronto and Oshawa districts now rival in importance the older established centre on the Detroit river.

Like many other inventions, the motor car commenced as a toy, then became a luxury of the rich, while now it ranks as a necessity of life to a large proportion of the population. In the past few years, the motor truck and the motor bus have assumed considerable economic importance, and are separately classified in Table 37.

Up to the present the motor vehicle has affected the passenger traffic of the steam and electric railways more than the freight. Eleven inter-urban and seven urban electric railways have ceased operation since 1926, and passenger traffic on the smaller electric railways and on the steam railways has declined during the last decade instead of increasing with increased population. This diversion of passenger traffic has been effected largely by the private automobile, although the motor bus is rapidly becoming more important and is now operating between all large centres. The motor truck is also carrying an increasing amount of freight, although no statistics showing the tonnage handled are as yet available.

The automobile manufacturing industry in Canada has made very rapid growth since its beginning about the year 1905, two of its chief tendencies during the period having been a consolidation of smaller firms into large units and the adoption of large-scale methods of production, similar in many ways to those of the United States industry. A brief statement of its history, with statistics of production, etc., is to be found on pp. 432-6 of the Canada Year Book, 1924, while more recent statistics of production will be found in Chapter XIV. (See also the Manufactures chapter of this volume.)

Section 1.—Statistics of Motor Vehicle Operation.¹

Registration.—The increase in the use of motor vehicles in Canada has been very rapid. In 1904 the number of motor vehicles registered in Ontario was only 535. In 1907, 2,130 motor vehicles were registered in six provinces and in 1908, 3,033 in eight provinces, the motor car being at that time prohibited in Prince Edward Island. From these small beginnings Table 36 shows an increase to 1,232,486 motor vehicles by 1930. For the last two years decreases have been recorded. In Table 37 the numbers of motor vehicles registered in 1931 and 1932 are given by provinces, classified as passenger cars, commercial cars or trucks, motor buses and motor cycles.

The average population per vehicle registered was 8.6 in 1931. Canada ranked fourth in this respect, the United States being first with 5.1. On the basis of the total registration of 1,114,503, only three countries had larger numbers in 1931, *viz.*, United States, 26,093,457; Great Britain and Northern Ireland, 1,949,471; and France, 1,984,681.

¹ Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. The subject is treated in greater detail in "Highways and Motor Vehicles in Canada", published annually by this Branch.

36.—Number of Motor Vehicles Registered in Canada, by Provinces, calendar years 1907-32.

Note.—The number of motor vehicles in Yukon is included in the totals for Canada, 1914-32.

¹ Includes taxicabs.

² Includes tractors, road machines, flushers, and municipal fire engines, etc., in Ontario and in Quebec.

³ Revised to exclude dealers' cars and include road tractors.

Government Revenue.—The taxation of motor vehicles, garages, chauffeurs, etc., is becoming a lucrative source of Provincial Government income. In every province the operation of automobiles and motor cycles is dependent on carrying licences duly issued by the various authorities, while similar licences permit the maintenance of garages and the driving of cars or trucks by hired chauffeurs. Perhaps the most recent form of levy on the use of motor vehicles is the gasoline tax, which has been assessed in all provinces since 1927. The following table shows the provincial revenue for the years 1931 and 1932, indicating, at the same time, the more important sources from which it is derived.

¹ Revenue figures for Ontario are for fiscal year ended Oct. 31. ² No gasoline tax.

Imports and Exports of Motor Vehicles.—Imports and exports of motor vehicles in the fiscal years ended 1908 to 1932 are shown, by numbers of cars and by values, in Table 39. In the earlier years the imports of cars far exceeded the exports, but as the Canadian automobile manufacturing industry became established, exports commenced to exceed imports and in the four fiscal years up to and including 1926 averaged between two or three times the value of the imports. During the fiscal year 1927, however, while the exports almost maintained the high figures of previous years, the imports increased so much as again to approach the value of the exports, and in the fiscal year 1928 the imports exceeded the exports by nearly \$9,000,000, owing to a continued increase in the importation of motor vehicles of all kinds and to the contraction in exports caused by the closing down of the factories of one of the largest makers of low-priced cars, pending the introduction of new

models. In the fiscal year 1929, with this firm again producing, the total number of cars exported was more than double the number imported, and the proportion was about the same in 1930. Both imports and exports were greatly reduced in 1931 and 1932 due to the world-wide depression. The importation of parts had increased with the growth of the industry and amounted in the fiscal years ended Mar. 31, 1928 and 1929, to \$33,237,181 and \$55,761,414 respectively, but decreased in 1930 to \$35,746,929, in 1931 to \$19,597,213 and in 1932 to \$13,451,825. In the same fiscal years exports (including re-exports) of automobile parts were \$3,304,937, \$3,804,743, \$3,555,523, \$1,933,048 and \$1,330,125 respectively.

39.—Imports and Exports of Motor Vehicles, fiscal years ended Mar. 31, 1905-32.

¹ Freight automobiles were classified with passenger automobiles in figures of imports until 1917.

² Freight automobiles were classified with passenger automobiles in figures of exports until 1919.

Section 2.—Motor Vehicle Acts and Regulations.¹

In all provinces a motor vehicle must be registered and each person who operates a car must be licensed as a chauffeur, an operator, or a beginner. The following is a brief synopsis of the regulations in force in each province.

Prince Edward Island.—Under the Highway Traffic Act, 1930, and Regulations, all cars must be registered in the office of the Provincial Secretary. In addition to a registration fee of \$2.50 for cars not previously registered in the province and a marker fee of \$1, an annual tax of 70 cents per 100 pounds weight is payable on Mar. 1, but is not required of non-residents if the province or State of origin grants exemptions to Prince Edward Island privately-owned passenger motor vehicles. Every car must have a lock or other device to prevent it from being

¹ The information in this Section has been revised by the officials in charge of the administration of Motor Vehicle Acts and Regulations in the different provinces.

operated when left unattended. The speed limits are: in cities, towns and villages 15 miles an hour; on approaches to steep descents, bridges, or highway crossings 10 miles an hour; on roads outside cities or incorporated towns on which the driver has not a clear view for at least one hundred yards free from turns and intersections 15 miles an hour; and in other places a speed reasonable and proper.

Nova Scotia.—The Motor Vehicle Act requires cars to be registered by the Motor Vehicle Branch, Department of Highways, which issues permits renewable annually on Jan. 1, but usually extended to Mar. 31. Cars belonging to persons residing outside of Nova Scotia need not be registered, if registered where the owners reside and operated for private use. This privilege is given for not more than three months in each year. If owners come into the province to reside permanently or to carry on business, they must register. Every person who operates a motor vehicle must be licensed as a chauffeur, an operator, or a beginner. Motor vehicles must be equipped as provided in the Uniform Vehicle Code. There is no set speed limit. The rate of speed must be reasonable and proper, and 20 miles per hour is *prima facie* reasonable and proper in a residential district, at intersections, passing schools, etc., and 40 miles per hour is *prima facie* reasonable and proper in open country. Commercial motor vehicles having a gross weight in excess of 4,000 lb., are limited to a maximum speed of 25 miles per hour.

New Brunswick.—Under the Motor Vehicle Law, 1926, the registering and licensing authority is the Motor Vehicle Branch, Department of Public Works. Cars must be registered when new and, besides the registration fee, an annual fee is payable on Jan. 1. Non-residents may not operate cars registered in another province during more than 90 days in any year without registering in New Brunswick. The speed limits are: in places which are closely built up, or in any city, town or village, 15 miles an hour; outside of any city, town or village where the road cannot be seen clearly for 200 yards, 20 miles an hour. Driving recklessly, or at a speed greater than 40 miles an hour on a highway, may result in a fine, imprisonment, or suspension of licence. All vehicles keep to the right.

Quebec.—The law regarding motor vehicles is contained in the Quebec Revised Statutes, 1925, c. 35. Cars must be registered in the office of the Provincial Treasurer and re-registered annually on Mar. 1. Certain government and municipal cars and farm tractors are given free registration, while exemptions are made in the case of pleasure cars registered in other provinces and certain commercial vehicles, but only in cases specified in Article 10 of the Act. Cars must have mufflers and, when left unattended, must be locked in such a way as to prevent operation. The speed limits are: in cities, towns and villages, 20 miles an hour; on highways where the land is closely built up, 20 miles an hour; and in open country, 30 miles an hour. Motor vehicles must be stopped before driving over a railway crossing. Motors must stop for street cars which are standing to take on or discharge passengers, and must reduce the speed to 16 miles an hour when meeting another vehicle. These rates have reference to pleasure cars only. In the case of a commercial vehicle having non-pneumatic tires, a speed of 8 miles an hour when loaded and 10 miles an hour when unloaded is allowed. When equipped with pneumatic tires the corresponding rates are 12 and 15 miles an hour. Motor buses are allowed a speed of 30 miles an hour in open country.

Ontario.—In this province the Highway Traffic Act, under the administration of the Motor Vehicles Branch of the Department of Highways, regulates the oper-

ation of motor vehicles on the highways. Motor vehicle permits and drivers' licences are issued for the calendar year. Vehicles owned by residents of other provinces who do not reside or carry on business in Ontario for more than three consecutive months in each year may be operated in Ontario without Ontario registration plates. Passenger cars registered in the United States may be operated in Ontario without Ontario plates for thirty days in any one year. The speed limit in cities, towns and villages is 20 miles an hour; in open country, 35 miles an hour. At intersections, level railway crossings and where the view of the driver is obscured the speed allowed is 10 miles within and 15 miles outside of cities, towns and villages. Vehicles must not pass street cars which are stationary for the purpose of taking on or discharging passengers. At intersections the motor vehicle on the right has the right of way and before entering or crossing a through highway a vehicle must be brought to a full stop. A motor vehicle must be equipped with non-glare headlights, muffler, windshield wiper and mirror. Under Part XIII of the Act a person convicted of certain serious offences in connection with the operation of motor vehicles or a person against whom an unsatisfied judgment is outstanding is required to file proof of his financial responsibility. All accidents resulting in personal injury, or property damage apparently exceeding \$50, must be reported to the nearest provincial or municipal police officer.

Manitoba.—Under the Highway Traffic Act, 1930, cars must be registered in the office of the Municipal-Commissioner, and registration is renewable annually on Jan. 1. All drivers must be licensed. No person, not a resident of the province, shall operate without a licence for a period exceeding 30 days of the date of entry, unless the province or State in which he resides gives reciprocity in this respect. Penalties for driving a car while intoxicated include imprisonment, suspension of driver's licence and impounding of the car. No person shall operate a motor vehicle upon any highway or street at a greater speed than is reasonable and proper, having regard to the condition of the highway and the traffic. The onus of proof is on the motorist. No ray of light from any headlight shall be thrown in a horizontal direction at a greater height from the ground than 42 inches in front of the motor vehicle when travelling on the highways. The use of searchlights and glare headlights is absolutely forbidden on the highway. Number plates must be carried on the front and rear of the vehicles so as to be plainly visible. In the event of an accident the driver involved must render every help possible, and give his name and address to the police officer or, if no officer is at hand, report to the nearest police station or officer. Failure to comply may involve a fine of \$50 or 30 days imprisonment.

Saskatchewan.—The licensing authority under the Vehicles Act is the Minister of Highways. Licences expire annually on Dec. 31, and for private vehicles are computed on the wheel base, the minimum fee being \$10, the maximum \$32.50. The licence fee in respect of cars registered on and after Aug. 1 is approximately one-third less than the annual fee. All motor vehicles except motor cycles must expose two number plates. The registration fee for a motor cycle is \$6. The fee for motor trucks is computed on the gross weight. The owner of every truck to be operated for gain before securing a licence must obtain a permit from the Public Utility Board. Besides two licence plates, he receives two weight plates, embossed with the gross weight for which the licence fee has been paid.

The fee for a chauffeur's licence is \$5. The fee for livery privileges is \$8 more than the fee paid for private licence for the vehicle to be registered. Permits

to operate for gain must be obtained from the Public Utility Board. Every driver of a motor vehicle not in possession of a chauffeur's licence, must secure an operator's licence.

A non-resident may use his motor vehicle for not more than three months in any year, but a non-resident operating a truck for gain must comply with the Public Utility Board requirements. Cities, towns and villages have authority to regulate speed limits within their boundaries. A loaded truck shall not be driven at more than 25 miles per hour, nor an unloaded truck at more than 35 miles per hour, while no motor vehicle may be driven at more than 35 miles per hour when passing any motor or other vehicle going in the opposite direction. Otherwise, speed is governed by the amount of traffic, the nature, condition and use of the highways. No motor vehicle and its load shall have a greater width than 96 inches, while no vehicle shall have a length of more than 33 feet, and no combination of vehicles coupled together shall have a length of more than 85 feet. The maximum height of a vehicle including its load is 14 feet and the maximum weight of any vehicle and its load must not exceed 20,000 lb. Motor vehicles must stop for street cars which are taking on or discharging passengers. Should a driver on leaving a stopping place in a city or town desire to turn, he may do so only at an intersection of the public highway.

Alberta.—The law relating to motor vehicles is contained in the Vehicles and Highway Traffic Act, 1924. The speed limits are: 20 miles an hour in cities, towns and villages; 10 miles an hour at street crossings and bridges; and 30 miles an hour outside cities, towns and villages. A motor car may not pass a street car which has stopped for passengers to get on or off. A resident of any other province of Canada, entering Alberta for pleasure touring for a period not greater than six months, is required to have complied with the motor-vehicle laws of his own province, and on entering Alberta to register with the Provincial Police. Residents of the United States entering Alberta for touring purposes may carry with them their customs certificates in lieu of registration. The Provincial Secretary may revoke or suspend the licence of any chauffeur convicted under the provisions of the Liquor Act of selling or having for sale intoxicating liquor. Provision is made for the impounding of cars where the owners or drivers are convicted of driving cars while intoxicated or convicted under other sections of the Act relating to speeding and juvenile driving. There is provision against the carrying of loaded weapons in an automobile—a preventive measure against accidents during hunting trips.

British Columbia.—Under the Motor Vehicle Act and amending Acts, all motor vehicles are to be registered with the Commissioner of Provincial Police. Trailers must also be licensed. Motor vehicles registered outside of the province may be used for touring purposes for a period up to six months providing that their owners obtain non-resident touring permits or carry the customs permits in the case of residents of the United States.

Motor vehicles are to be driven in a careful and prudent manner at all times. The onus is on the driver for driving to the common danger if driving at a greater speed than 20 miles per hour in any city, town or village, or 30 miles per hour outside cities, towns or villages, or greater than the maximum rate of speed stated on signs erected on certain portions of the highway. A motor vehicle may not pass a standing street car at more than 5 miles per hour, if such street car is not taking on or discharging passengers, and must stop at least 10 feet from the passenger

exit if such street car is taking on or discharging passengers (in cities where safety zones are provided, motor vehicles are allowed to pass between safety zone and curb at a rate as set by by-law). A motor vehicle must not exceed a speed of 15 miles per hour when passing schoolhouses between the hours of 8 a.m. and 5 p.m. of any day on which school is regularly held, or public playgrounds for children between dawn and dusk. Accidents in which death or personal injury has occurred, or in which loss or injury apparently exceeding \$25 is sustained, must be reported to the police.

No person shall ride as a passenger on a motor cycle in front of the person driving or operating the motor cycle. Provision is made for the surrender of drivers' licences upon conviction for an infraction of the Act or Regulations or of Section 285 of the Criminal Code; upon arrest or indictment for manslaughter a driver's licence is suspended. Drivers' and owners' licences of all persons convicted for certain serious offences in connection with the operation of motor vehicles, as well as all persons against whom an unsatisfied judgment for bodily injury or property damage in excess of \$100 is outstanding, are suspended until such time as proof of financial responsibility is furnished by them.

Yukon.—The Motor Vehicle Ordinance, No. 14, 1914, with amendments, requires all cars to be registered in the office of the Territorial Secretary, who issues certificates renewable annually on April 1. A non-resident may operate an unregistered motor for not more than 90 days. In cities, towns and villages the speed limit is 15 miles an hour, and 10 miles an hour at street intersections.

PART VII.—AIR NAVIGATION.¹

During 1932 civil aviation was well maintained. Aircraft are a ready means of obtaining accurate information of conditions in remote and unsettled parts, and provide easy access to them. Their use in developing and conserving natural resources has increased every year. Air-mail and air-transport lines are in operation in many parts of the Dominion.

Civil aviation in Canada is divided into two classes: (1) civil operations, carried out for other Government Departments under the Royal Canadian Air Force; (2) commercial aviation, under the regulation of the Controller of Civil Aviation. Both are under the Department of National Defence.

Civil Government Air Operations.—This branch carried out flying on forest fire patrols, fire suppression, oblique and vertical photography for surveys, transportation, etc., for different Government Departments in various parts of the country. The established bases were Winnipeg, Man., and Ottawa, Ont.

Provincial Operations.—The Ontario Provincial Air Service owns and operates 26 aircraft on forest fire protection, transportation, air photography and sketching in northern Ontario. Operations covered an area of about 800 miles from east to west, and 400 miles from north to south. A total of 9,968 hours was flown during 1932. The Manitoba Government Air Service was organized in 1932 and operated 5 aircraft on forest protection in the province for the Forestry Branch; a total of 882 hours was flown on this work. British Columbia and Quebec contracted with commercial aircraft operators for flying required.

¹ Revised under the direction of J. A. Wilson, Esq., Controller of Civil Aviation, by A. E. Heatley, Department of National Defence.

Commercial Aviation.—During 1932 there were 150 commercial aircraft operators in Canada. Their activities included forest fire patrols, timber cruising, air photography, transportation of passengers, express and mail, instruction, advertising, short passenger flights, etc., in various parts of the country.

Air Mail Services.—Regular air-mail services were established in December, 1927. During 1932 commercial firms operated the following air-mail routes under Post Office Department contracts: *Winter Services.*—Leamington-Pelee Island; Quebec-Seven Islands-Anticosti; Moncton-Magdalen Islands; Moncton-Charlottetown. *Summer Services.*—Rimouski - Montreal. *Yearly Services.*—Montreal-Albany; Sioux Lookout-Red Lake area; Amos-Siscoe-Pascallis; McMurray-Aklavik; Winnipeg-Pembina; Peace River-North Vermilion; Resolution-Great Bear lake; Prince Albert-lac La Ronge; Vancouver-Victoria. Mail to the extent of 412,409 lb. was carried under contract, without loss or damage, during 1932. (See p. 741).

Encouragement of Aviation.—To encourage a more widespread interest and knowledge of aviation, the Department of National Defence, since 1928, has assisted by issuing two light aeroplanes to each of the twenty-five flying clubs in the following localities: Halifax, Cape Breton, Saint John, Granby, Montreal, McGill University, Brant and Norfolk, Fort William, Hamilton, Kingston, London, Ottawa, St. Catharines, Toronto, Border Cities, Kitchener, Brandon, Winnipeg, Moose Jaw, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria. Granby and Victoria have since withdrawn from the scheme. The total membership at present is 2,703. A total of 10,451 hours was flown. 129 members obtained private pilots' licences, and 27 members obtained commercial pilots' licences during 1932. Many aerodromes have been established through this movement.

A large air terminal has been built at St. Hubert, 7 miles south of Montreal. A mooring tower for airships and an aerodrome have been constructed there, and immigration, customs and postal facilities are available. A terminal aerodrome has also been constructed at Rimouski for the despatch and reception of trans-Atlantic mails by air.

Manufacture of Aircraft.—An aircraft industry, to construct in Canada the aircraft and equipment required for aviation, is essential to the sound development of flying. Canadian Vickers, the pioneer firm in Canada, maintain their own designing department and have produced several original types especially suited to operation in Canada. The increased interest and the growing operations of the Dominion and Provincial Governments and commercial operators have led to the establishment of increased manufacturing facilities. Several aircraft constructors from England and the United States have formed branches in Canada for the assembly and service of their products. The De Havilland Aircraft of Canada, Ltd., established a plant in Toronto for the service and assembly of their aircraft, chiefly of the "Moth" light-aeroplane type; the Curtiss-Reid Aircraft Co., established a factory at Cartierville, Que.; the Fairchild Aircraft Ltd., at Longueuil, Que.; the Boeing Aircraft of Canada, Ltd., at Vancouver; and the Ottawa Car Manufacturing Co., one at Ottawa for A. V. Roe aircraft. Aero engine factories are established for construction or assembly and service of their products as follows: Armstrong-Siddeley Motors, Ltd., at Ottawa; Aero Engines of Canada, Ltd., at Montreal, for "Wright" and "Bristol" engines; Canadian Pratt and Whitney Aircraft Co., Ltd., at Longueuil, Que.

¹These figures show duplication, since in several instances the aircraft are used both as landplanes and seaplanes.

PART VIII.—CANALS.¹

Before the period of extensive railway construction which commenced for Canada in the 1850's, the water routes, more especially the St. Lawrence, the Great Lakes and the Ottawa, were the chief avenues of transportation. These routes were interrupted at certain points, necessitating portages, and to eliminate the toil of unloading, transporting and reloading at the portages the canals of Canada were constructed.

The earliest mention of canals in Canada is in connection with the Lachine canal, begun by early French settlers in 1700, but only after the conquest of Canada by the British were improvements of the main water routes made, and in the early part of the 19th century increased internal and foreign trade and the introduction of steam navigation resulted in more attention being given to this work. Although the canals were constructed primarily for military purposes they soon became essential to the commercial life of the country.

¹Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on "Canal Statistics".

Section 1.—Canal Systems.

There are in Canada seven canal systems under the control of the Dominion Government in connection with navigable lakes and rivers. They consist of the canals (1) between Port Arthur or Fort William and Montreal; (2) from Montreal to the International Boundary near lake Champlain; (3) from Montreal to Ottawa; (4) from Ottawa to Kingston and Perth; (5) from Trenton, lake Ontario, to lake Huron (not completed); (6) from the Atlantic ocean to Bras d'Or lakes, Cape Breton; and (7) from Winnipeg to lake Winnipeg. By means of these canals a total waterway of 1,846 miles has been opened to navigation, the actual mileage of canals being 509.40.

A detailed description of the individual canals was given on pp. 626-629 of the 1926 Year Book. Summary statistics of their length and lock dimensions are given in Table 41.

¹Navigable depths are occasionally less at times of extremely low water.

²Minimum depth in river 25 feet.

³With lake Ontario at elevation 244 feet above sea-level.

Government Expenditures on Canals.—Tables 42 and 43 deal with the expenditures of the Dominion Government on the construction and maintenance of canals. The principal source of revenue is rentals for water for power purposes. All canals, it may be added, have since 1904 been free of tolls to vessels applying for the privilege of locking facilities. The total capital cost of Canadian canals since their construction was begun is set at \$244,835,826. The heavy capital expenditures in recent years are due to the construction of the Welland Ship Canal,

on which \$125,980,223 had been spent up to Mar. 31, 1932. The lock gates were first opened on Apr. 21, 1930, and upper lake vessels with certain restrictions were allowed through. In 1932 the largest of the lake vessels (633 feet long) used the canal and draughts up to 22 feet were accommodated.

42.—Expenditures and Revenues of Canals for Periods Before Confederation, 1863-1910, and fiscal years ended Mar. 31, 1911-32

NOTE.—For the individual years 1868 to 1910, see Canada Year Book, 1916-17, p. 462.

²Including \$506,764 charged to Unemployment and Farm Relief Continuance Act.

Section 2.—Canal Traffic.

Tables 44 to 49 deal with the traffic passing through Canadian canals in recent years up to and including 1932. In this latest year the total traffic amounted to 17,960,650 tons, which was an increase of 1,771,576 tons from the total for 1931.

The increase in total traffic through Canadian canals was all through the Sault Ste. Marie, Welland, St. Lawrence and St. Andrews canals. Although the traffic through the canals at Sault Ste. Marie decreased by 24,122,156 tons, the percentage and also the total tonnage using the Canadian lock increased. By the summer of 1931, the new Welland Ship Canal was advanced sufficiently to allow vessels drawing up to 18 feet of water to pass through and, at the opening of navigation in 1932, the allowable draught was increased to 20 feet for the large upper-lake vessels. Later in the season vessels drawing 20½ feet and with cargoes up to 15,900 tons used the canal. Iron ore, which had previously been shipped by rail from Point Edward to Hamilton, was shipped through from Lake Superior to Hamilton by water, and increased quantities of coal and other commodities were shipped through the canal.

For details of traffic handled through each canal, see the annual report on Canal Statistics published by the Bureau of Statistics.

44.—Total Traffic through Canadian Canals, navigation seasons 1900-32, by Nationality of Vessels and Origin of Freight.¹

†Totals include duplications where vessels use two or more canals.

The Panama Canal.¹—The Panama canal, which was opened to commercial traffic on Aug. 15, 1914, is a waterway which is destined to be of the greatest importance to the British Columbian ports, from which vessels now leave direct for Great Britain and European ports throughout the year. As an alternative route to that of the transcontinental railway lines, such a passage by water is of vital importance in the solution of the larger transportation problems of the continent, and while its influence is perhaps more potential than actual, such a check on transcontinental rail rates is a valuable one. During the War the great expectations based upon the opening of the canal were not realized, owing to the scarcity of shipping, but, with the post-war decline in ocean freight rates, an increase in traffic between our Pacific ports and Europe is occurring, and, while the proportion carried in vessels of Canadian registry is comparatively small, the cargo tonnage has nevertheless assumed considerable proportions. During the year ended June 30, 1932, as will be seen from Table 50, a tonnage of 65,959 originating on our eastern coast and a total of 574,317 tons destined for our western coast were carried westward through the canal. The greater importance of the route as one from Pacific to Atlantic ports is illustrated by the 3,479,778 tons originating at western ports and 561,805 tons destined for eastern Canadian ports locked through in the same period. Strictly intercoastal Canadian cargo during the year aggregated 90,802 long tons. The canal is thus becoming an avenue of trade between Eastern and Western Canada.

The report of the Governor of the Panama Canal Zone for the year ended June 30, 1932, records a decrease from 1931 of from 5,529 to 4,506 in the number of transits, a decrease from 27,792,146 to 23,625,419 in canal net tonnage and decreases from \$24,645,457 to \$20,707,377 in tolls collected, and from 25,082,800 to 19,807,998 in tons of cargo carried (Table 51).

With respect to traffic by nationality of vessels and cargo carried, vessels of United States registration carried 8,835,055 tons, or 44.6 p.c. of the total cargo of 19,807,998 tons locked through in the year 1932. British vessels carried 4,638,068 tons, or 23.4 p.c., Japanese vessels 1,031,704 tons, or 5.2 p.c., German vessels 1,078,738 tons, or 5.4 p.c. and Norwegian vessels 1,427,284 tons, or 7.2 p.c.

¹Revised, and figures supplied, by courtesy of the Governor of the Panama Canal Zone.

PART IX.—SHIPPING AND NAVIGATION.

Canadian shipping may be divided into three classes: (1) ocean or sea-going shipping; (2) inland or rivers and lakes international shipping; and (3) coasting trade or coastwise shipping. Ocean shipping covers the sea-going vessels arriving or departing from Atlantic and Pacific Coast ports, including St. Lawrence River ports up to Montreal. Inland international shipping is the term used to cover shipping between Canadian and United States ports on the Great Lakes and international rivers and on lakes and rivers accessible to shipping from United States ports such as the Ottawa, Rideau, Trent, etc. (Ferriage is, however, excluded from this and other classes of shipping.) Coastwise shipping or the coasting trade covers shipping between one Canadian port and another on the Atlantic coast, on the Pacific coast and on the inland international lakes and rivers or lakes and rivers accessible to them. It does not, however, include shipping on isolated Canadian waterways such as the Mackenzie river, lake Winnipeg, lake St. John, etc.

Whereas, in the case of most countries of such extensive coast line, the ocean shipping is much the more important, in Canada, the shipping on inland waters, while finally dependent to a large extent on ocean traffic to foreign ports, shares, almost equally with that on the Atlantic and Pacific oceans, the attention devoted to water traffic. The Great Lakes are among the leading highways of the international trade of the world; consequently, the statistics of inland international shipping are included with those of sea-going shipping in Table 52, while those of sea-going shipping alone will be found in Table 53.

Tables 52-60, following, have been compiled or revised from the Shipping Report of the Department of National Revenue for the fiscal year ended Mar. 31, 1932.

52.—Sea-going and Inland Vessels (exclusive of Coasting Vessels and Ferriage) Arrived at and Departed from Canadian Ports, fiscal years ended June 30, 1901-06, and Mar. 31, 1907-32.

NOTE.—For the years 1898-1900, see Canada Year Book, 1911, p. 380.

Section 1.—Ocean Shipping.

Canadian ocean shipping dates back to the days of early European fishermen who frequented the shores of Newfoundland and the Maritime Provinces. Ocean-going vessels of that time were crude wooden sailing craft of but 20 or 30 tons burden, to be entrusted only to skilful and hardy mariners for navigation through little known seas. Later on exploration and settlement produced a larger volume of traffic, but it was not until the building of ships in Canada by the French assumed some dimensions that traffic became important. The first ocean-going vessels in Canada were probably built by Pont-Gravé, one of the first settlers in New France, and soon afterwards Talon and Hocquart, intendants of the colony, realizing the advantages offered to the industry by the timber resources available, gave it every encouragement. Shipyards were established at Quebec and other points along the St. Lawrence, and these, together with later establishments in the Maritime Provinces and on the western coast, have formed the principal bases of Canadian shipping on the Atlantic and the Pacific.

Canadian shipping attained some prominence in the days of fast wooden sailing vessels, and also at a later date when steam power first came into use. In 1833 the *Royal Willem*, a Canadian ship built to ply between Quebec and Halifax, crossed the Atlantic from Pictou to London, the first vessel to navigate the Atlantic under steam power. A few years later Samuel Cunard established the well-known steam-ship line of that name. His company pursued a conservative course; wooden

ships were used long after iron hulls were a proven success, and paddle wheels after the introduction of the screw propeller. By 1867 the company's business had shifted to New York and its terminal was moved thither from Halifax. The Allan line had a somewhat similar early history but remained a purely Canadian company. In addition to other lines of less importance, both the C.P.R. and the Dominion Government operate fleets on the Atlantic and the Pacific oceans.

In the following tables statistics are given of sea-going vessels entered and cleared at Canadian ports during the fiscal years from 1901 to 1932 (Table 53); of the nationalities, tonnages of freight carried, and numbers of crews of vessels entered and cleared at Canadian ports in the fiscal years ended 1931 and 1932 (Table 54); of entrances and clearances of sea-going and all ships at principal ports (Table 59); and of the countries whence arrived and to which departed (Table 55). The numbers and particularly the tonnages of vessels entered and cleared at Canadian ports, in both ocean and coasting trade, indicate clearly the predominance of British and Canadian shipping over that of all other nations. This is particularly the case on the Atlantic coast, where the bulk of our European and South American trade is handled. The figures in Table 53 show a significant and fairly steady expansion in the total of ocean shipping through Canadian ports since the beginning of the century, with a relatively slight decline in the latest year.

53.—Sea-going Vessels Entered and Cleared at Canadian Ports with Cargo and in Ballast, fiscal years ended June 30, 1901-06, and Mar. 31, 1907-32.

NOTE.—For corresponding figures for the years 1868-1900, see Canada Year Book, 1911, p. 379.

Section 2.—Inland Shipping.

Inland shipping is associated in its beginning with the birch-bark canoe of the American Indian. The advantages of this light and easily navigable boat were realized by explorers and fur traders, and for many years it was in general use, giving way to more substantial craft only with the demands of heavier traffic. The *bateau* and Durham boat came into common use after the migration of the U.E. Loyalists but soon gave place to larger vessels on the St. Lawrence and the other main highways of the time. Original plans of the Lachine canal, calling for a width of 12 feet and a depth of 18 inches, afford an illustration of the size of these primitive craft.

In the absence of any roads to make land travel possible, the St. Lawrence river and the Great Lakes formed the main highway to the interior. The route from Montreal to the Upper Lakes was broken at three places—from Montreal to Kingston transportation was by *bateau* or Durham boat, from Kingston to Queenston schooners were used, then there was the portage road from Queenston to Chippawa and, finally, schooner again to the destination. The charge for transporting a barrel of rum from Montreal to Kingston was from \$3 to \$3.50, and freight charges on other goods were proportions of this standard rate.

In 1809, the *Accommodation*, the first Canadian steamship, was built for the Hon. John Molson, to run between Montreal and Quebec. By 1818 Molson had formed a company, the St. Lawrence Steamship Co. or the Molson Line. On lake Ontario, the *Frontenac* was used from 1817 on a weekly service between York and Prescott and, following this beginning, came a period of great activity in lake and river shipping. In 1845, the *Gore* reached lake Huron by way of the Welland canal to carry on transport trade on the Upper Lakes, where previously there had not been enough traffic to support a large ship. Shipping on the Upper Lakes became brisker now, for there were settlers to be carried from Buffalo to the western United States and grain to be brought back. In this period Canadian shipping made its profit by carrying American goods, for there was little traffic originating in the Canadian near-West.

Upon the advent of steam railways, water-borne traffic did not decrease but, on the contrary, increased, and at present the greater part of the western grain is shipped *via* the Great Lakes route to eastern ports. The iron ore and coal traffic between lake Superior and lake Erie ranges between 60 and 80 million short tons per annum; the total traffic on these upper lakes alone is greater than that carried by all Canadian railways and about one-twelfth of that carried by all United States railways.

Inland International Shipping.—Statistics of the inland international shipping between Canadian and United States ports for the fiscal years ended Mar. 31, 1928-32, exclusive of ferriage, are given in Table 56. The total tonnages of inland international shipping entered and cleared in the fiscal years 1920-32, were as follows: 1920, 24,248,779; 1921, 29,731,901; 1922, 29,070,783; 1923, 38,124,846; 1924, 37,928,971; 1925, 36,958,025; 1926, 29,591,831; 1927, 31,181,890; 1928, 35,589,163; 1929, 39,326,700; 1930, 36,446,557; 1931, 36,311,727; 1932, 31,096,156.

56.—Canadian and United States Shipping on Rivers and Lakes between Canadian and United States Ports, exclusive of Ferriage, fiscal years ended Mar. 31, 1928-32.

Section 3.—Coasting Trade.

Statistics of the arrivals and departures of the vessels engaged in the coasting trade of Canada, whether on the sea or the Great Lakes and international rivers, are given for the latest five years in Table 57. This statement does not include vessels plying on inland waterways inaccessible to international shipping nor does it include ferry services between one Canadian port and another.

Section 4.—Grand Total Shipping Trade.

Statistics are given in Table 58 showing sea-going, inland international, coastwise and total vessels entered and cleared at Canadian ports, by provinces, during the fiscal year ended Mar. 31, 1932, and totals for the fiscal years 1923 to 1932. It is noteworthy in this table that the volume of coastwise shipping is the greatest, while sea-going is next in tonnage. In the period from 1923 to 1929,

both sea-going and coastwise shipping showed marked expansion, but in recent years there has been some decline. Inland international shipping, on the other hand, has varied considerably from year to year without showing any definite trend. It is, however, significant of the importance of water-borne traffic on the inland rivers and lakes that the total tonnage of shipping entered and cleared was greater for Ontario than for any other province in the fiscal year ended 1930 and in the latest year, 1932, was only slightly below that of the Pacific Coast province. This was due to the fact that the great bulk of the inland international shipping was through Ontario ports, while there was also a large tonnage of coasting trade through these ports. Quebec came third in total shipping in 1932, followed by Nova Scotia and New Brunswick.

58.—Total Number and Tonnage of All Vessels Entered and Cleared at Canadian Ports, by Provinces, during the fiscal year ended Mar. 31, 1932, with Totals for the fiscal years ended 1923-32.

The relative volume of shipping in the leading ports of the provinces of Canada is shown in Table 59. Details are given of the sea-going vessels and of the total of all shipping (exclusive of ferriage) arrived and departed at each port. In the fiscal year ended Mar. 31, 1932, the tonnage of sea-going vessels arriving and departing at Vancouver exceeded that at any other port in Canada; Victoria was next, followed by Halifax and Montreal. In total shipping, which included coastwise and inland international as well as sea-going shipping, Vancouver was considerably in the lead, followed by Victoria, Montreal and Halifax.

59.—Number and Tonnage of Sea-going and of All Vessels Entered and Cleared at the Principal Ports of Canada, fiscal year ended Mar. 31, 1932.

Note.—For details of coastwise and inland international shipping at these ports and at all other ports of Canada, see the Shipping Report of the Department of National Revenue for the fiscal year ended Mar. 31, 1932. Figures of total shipping are exclusive of ferriage.

Section 5.—Shipping Constructed and on the Registry.

The shipbuilding industry in Canada dates from the earliest settlement of the country, and up till the 1870's was one of the leading industries of Quebec and of the Maritime Provinces, 490 vessels with a total tonnage of 183,010 being constructed in the calendar year 1874. At that time, however, the advent of the steel ship rendered the wooden vessels, the material for which was so abundant in Canada, obsolete, with the result that the tonnage built has never again reached the above figure, though in the fiscal years 1919 and 1920 the construction of the Canadian Government Merchant Marine, built as an extraordinary measure arising out of the War, raised the totals constructed to 104,444 and 164,074 tons respectively. Statistics of ships built and registered in Canada or sold to other countries are given in Table 60. For further information on the shipbuilding industry, see Table 7 of the chapter on Manufactures, pp. 428-429.

Section 6.—The Department of Marine.¹

Administration of the general shipping interests of Canada is in the hands of the Dominion Department of Marine. It deals with: (1) administration of the Canada Shipping Act and other Acts of the Dominion Government relating to marine transportation; (2) pilotage; (3) the construction and maintenance of lighthouses, lightships, fog alarms, buoys and beacons; (4) ports, harbours, piers, wharves and breakwaters; (5) the Meteorological Service of Canada; (6) relief of distressed seamen; (7) hydrographic, tidal and current surveys; (8) inquiries into the causes of shipwrecks and casualties, and the collection of wreck statistics; (9) life-saving service; (10) the inspection of steamboats; (11) the construction and maintenance of the St. Lawrence River ship channel; (12) marine signal service; (13) ice breaking and (14) the administration of Government radiotelegraph stations and the supervision of private stations in Canada. The net revenue of the Department for the fiscal year ended Mar. 31, 1932, was \$371,529, and the expenditure for the same period was \$25,056,916.

A summary statement of the revenue and expenditure of the Department of Marine is given for each fiscal year since Confederation in Table 62, while details for the six years from 1927 to 1932 are presented in Tables 63 and 64.

¹Revised by F. McVeigh, Assistant Deputy Minister, Department of Marine.

62.—Total Revenues and Expenditures of the Department of Marine, fiscal years ended June 30, 1868-1906, and Mar. 31, 1907-32.

Steamboat Inspection.—The Steamboat Inspection Service of Canada, maintained under the authority of the Department of Marine, comprises the Board of Steamboat Inspection, together with staffs of inspectors at the principal ocean and inland ports. The Board decides on the standards required of all vessels coming under its jurisdiction. These must be attained by all ships given official warrant as to their seaworthiness and mechanical condition. Further, the Board grants certificates of competency to engineers of steamboats.

A table showing the number and tonnage of steamboats inspected during the fiscal year ended Mar. 31, 1932, follows:—

65.—Steamboat Inspection, fiscal year ended Mar. 31, 1932.

Wrecks and Casualties.—The statement in Table 67, supplied by the Department of Marine, applies to vessels of every nationality in respect of wrecks and casualties in Canadian waters, and to Canadian vessels in respect of wrecks and casualties in other waters. The returns in some years cover wrecks and casualties of previous years. Statistics of marine danger signals appear in Table 68.

Section 7.—Merchant Marine Services Operated by the Canadian Government.¹

The War had far-reaching effects upon the merchant shipping of the world. The losses from submarines, the demands for naval auxiliary and transport services, and the abnormally large quantities of material to be carried overseas for both war purposes and the support of the civilian populations of Europe, all combined to create pressing demands for merchant shipping. In the latter part of the War, when submarine operations were intensified, the supply of merchant tonnage became a source of serious anxiety to the Allies and every effort was made not only to economise the shipping then afloat but to increase the supply by new building. It was under these circumstances that the Dominion Government placed orders with Canadian shipbuilding firms for the construction of 63 steel cargo vessels of six different types. These vessels were intended primarily to co-operate with British shipping in supplying the necessities of war, but, though the War ended before the ships were all built, the construction program was continued to provide employment and, in view of the losses of the War, to assure sufficient shipping as a complement to the National Railways and as a means of carrying abroad the products of Canada's farms, forests, mines and factories.

Shipping construction at that time was very costly and this abnormally high first cost has been a serious handicap to the economical operation of the ships ever since. Prior to Dec. 31, 1919, 19 vessels had been delivered by the builders. Additions were subsequently made to the fleet until the total fleet, as at Dec. 31, 1924, numbered 57 vessels of a total deadweight tonnage of 353,450. Through sale and the loss of three vessels the fleet was reduced to 29 vessels with a deadweight tonnage of 234,595 at Dec. 31, 1931. Early operations proved profitable: a surplus of \$1,056,767 was shown for the year ended Dec. 31, 1919 and a surplus of \$1,293,525 for the year ended Dec. 31, 1920 (without provision for interest charges). Subsequent years, however, have shown the effects of the depression in the shipping industry, and annual deficits of \$8,047,635, \$9,649,479, \$9,368,670, \$8,836,609, \$7,667,513, \$6,687,221, \$7,086,940, \$7,545,525, \$5,928,758, \$5,844,757 and \$5,405,414 are shown for the years 1921 to 1931 respectively. These figures include interest and depreciation assessed on the original high cost of the vessels.

In conformity with the Canada-West Indies Trade Agreement Act of 1926 (16-17 Geo. V, c. 16), the Dominion Government has provided direct steamship services to the West Indies through the medium of Canadian National (West Indies) Steamships, Ltd. The service is provided by a fleet of twelve vessels of a total deadweight tonnage of 60,592. Five of these boats, known as the "Lady" ships, were specially constructed for passenger service on this route, while the remaining seven vessels previously formed part of the Canadian Government Merchant Marine fleet, and were taken over by the Canadian National (West Indies) Steamships, Ltd., for operating purposes, under entrusting agreements with the respective companies which owned the ships. The investment in vessels at Dec. 31, 1931, amounted to \$9,848,167, mainly made up of the construction cost of the "Lady" ships and the present day valuation of the other seven ships, together with the cost of conversion for use in the West Indies service of three of the latter. The financial results of the operations of the Canadian National (West Indies) Steamships, Ltd., have been as follows:—

¹ Revised under the direction of Geo. W. Yates, Assistant Deputy Minister, Department of Railways and Canals, by A. H. Allan, General Manager, Canadian National Steamships, Montreal.

PART X.—TELEGRAPHS.¹

The Toronto, Hamilton and Niagara Electro-Magnetic Telegraph Co., organized by a group of Toronto men, was the first to establish an electric telegraph service in the pre-Confederation province of Canada. It was formally organized on Oct. 22, 1846, and its Toronto-Hamilton line was opened on Dec. 19 of the same year. In January, 1847, the line was completed to Queenston, whence there was a connecting line to Buffalo. The Montreal Telegraph Co. commenced the construction of a line to Toronto in February, 1847, and began actual operation between the two cities on Aug. 3 of the same year. By the end of the year it had 540 miles of wire in use, 9 offices and 35 employees, and had sent out 33,000 messages. Both the Montreal and the Toronto companies were incorporated by special Acts at the 1847 session of the Legislature. In 1852 the Toronto, Hamilton and Niagara Co. sold out to the Montreal company.

The British North American Electrical Association was also formed in 1847, with the object of connecting Quebec with the Maritime Provinces, but for some years its line went no further than Rivière du Loup, though it was finally extended to Woodstock, N.B., where it connected with the American Telegraph Co., which already had lines in New Brunswick. The New Brunswick Telegraph Co. built a line connecting Saint John with the Maine Lines in 1848, and in the following year extended it to Amherst, N.S., where it connected with the Nova Scotia line, bringing Halifax for the first time into telegraphic communication with New York.

The movement for consolidation of services, so evident in the Canadian railways, was also active among the telegraph companies. Thus the Montreal company bought out the Toronto, Hamilton and Niagara Telegraph Co., the Montreal and Bytown Telegraph Co. and the Grand Trunk Telegraph Co., and maintained a strenuous competition with the Dominion Telegraph Co., organized in 1868. In 1881, however, the conflicting interests were consolidated under lease by the Great North Western Telegraph Co., this move effecting great economies in operation. A few years later, however, the Canadian Pacific Railway Co. established competing lines and by September, 1886, had opened 366 offices in Ontario, Quebec and Western Canada.

The Dominion Government Telegraph Service was commenced with the object of furnishing rapid communication in outlying districts where the amount of business was so small that commercial companies would not enter the field, but where the public interests required that there should be communication. Its services are especially useful in connection with the signal and other stations established by the Department of Marine along the north shore of the Gulf of St. Lawrence, and in the Maritime Provinces and British Columbia. On Mar. 31, 1932, the Government Telegraph Service comprised 9,077½ miles of pole line, 11,118½ miles of wire, 367½ knots of cable and 731 offices. Details will be found in the Annual Report of the Minister of Public Works.

¹ Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which issues an annual report dealing with telegraph statistics.

Telegraph Systems.—The Canadian telegraph systems are composed of lines owned by the Dominion Government and by chartered railway and telegraph companies. The lines previously owned by the Great North Western Telegraph Co., the Grand Trunk Pacific Telegraph Co., the Canadian Northern Railway Co. and the National Transcontinental Railway are now owned by the Government and are operated by the Canadian National Telegraph Co. (formerly Great North Western Telegraph Co.). The Dominion Government Telegraph Service operates the line to Yukon and other lines in outlying districts.

The Canadian system, in proportion to population, is one of the most extensive in the world, and is operated under considerable climatic and geographic disadvantages. In the operation of railways and in the receipt and dispatch of market and press reports, its services to the nation are invaluable.

Telegraph Statistics.—A brief summary table giving the more important figures of the operation of Canadian telegraphs from 1920 to 1931 follows. For details see the Bureau of Statistics' Annual Report on Telegraph Statistics.

69.—Summary Statistics of All Canadian Telegraphs for the calendar years 1920-31.

¹Cablegrams not included. The total in Table 69 includes messages handled by the Marconi Wireless Telegraph Co. ²Not including press messages. ³The total in Table 69 includes offices of wireless and cable companies. ⁴Statistics of the Grand Trunk Pacific Telegraph Company have been included with the Canadian National up to 1927; the two were amalgamated in 1928. ⁵Included with Canadian National.

Submarine Cables.—Six transoceanic cables have termini in Canada—five of them on the Atlantic coast and one on the Pacific. The year in which the cable was first demonstrated to be of commercial value was 1866, and up to the present its use has greatly increased. The Atlantic cables are controlled by English and United States' interests. The Pacific cable, from Canada to Australia and New Zealand, has been in operation since 1902, and was owned by a partnership of the Governments of Great Britain, New Zealand, Australia and Canada. As a result of the recommendation of the Imperial Wireless and Cable Conference of 1928, in view of increased wireless competition, it was decided to dispose of the Pacific and West Indian Islands cable systems to the Imperial and International Communication Co., a company formed to take over all Empire-owned cables and lease the Empire-owned beam wireless systems. The necessary legislation was passed by Great Britain in February, 1929, and by Canada in June, 1929.

PART XI.—TELEPHONES.¹

The telephone is in part a Canadian invention, though its inventor, Alexander Graham Bell, a Scotsman by birth, was at the time of its invention a resident of the United States, having immigrated with his father to Brantford, Ontario, in 1870, and subsequently proceeded to Boston. According to his account, the discovery of the telephone, both as to its main principle and as to the first transmission of the human voice, was made at his father's residence at Tutela Heights, Brantford, in 1876, and the first telephone talk over any distance was conducted between Brantford and Paris, a distance of 8 miles, on Aug. 10, 1876.

Telephone development in Canada dates from the year 1880, when the Bell Telephone Co. was incorporated by Act of Parliament. Although at this time all patents and lines were owned by the Canadian Telephone Co., this was dependent on the Bell Co., to which it sold out in 1882. By 1883 the first submarine telephone cable had been laid between Windsor and Detroit, and during the year the Bell Co. operated in Canada 4,400 rental-earning telephones, 44 exchanges and 40 agencies, with 600 miles of long-distance wire. It controlled development in all the provinces except British Columbia, where the greater part of the system has always been in the hands of the British Columbia Telephone Co., Ltd.

With the rapid growth of private companies in the Maritime Provinces, the lines of the Bell Co. were disposed of in 1888 to the Maritime Telegraph and Telephone Co. in Nova Scotia, and to the New Brunswick Telephone Co. in New Brunswick, an interest in these corporations being retained under the terms of sale. A development of a different kind is seen in the three Prairie Provinces, where well-organized systems were sold to the Governments of Manitoba and Alberta in 1908 and to Saskatchewan in 1909. The lines in Ontario and Quebec are still largely owned by the Bell Telephone Co.

Telephone Systems.—The 2,399 telephone systems existing in 1931 (Table 72) include the three large provincial systems in Manitoba, Saskatchewan and Alberta, and a smaller governmental system in Ontario, together with the system operated by the National Parks of Canada, Department of the Interior. There were also 138 municipal systems, the largest operated by the cities of Edmonton, Fort William and Port Arthur. Out of the 1,523 co-operative telephone companies, no fewer than 1,172 were in Saskatchewan alone and 204 in Nova Scotia. Besides the above, there were 506 stock companies, 99 partnerships and 126 private systems.

The steady growth of the use of telephones from 1911 is indicated in the summary statistics of Table 71, showing an increase from 302,759 in 1911 to 1,364,200 in 1931, or from 4.2 to 13.1 telephones per 100 of the population. By provinces, the numbers of telephones in 1931 were as follows: Ontario 621,528, Quebec 300,502, British Columbia 128,646, Saskatchewan 82,875, Alberta 70,427, Manitoba 73,399, Nova Scotia 46,932, New Brunswick 33,950, Prince Edward Island 5,806 and Yukon 135. The numbers of instruments per 100 estimated population were as follows: British Columbia 18.5, Ontario 18.1, Saskatchewan 9.0, Alberta 9.6, Manitoba 10.5, Quebec 10.5, New Brunswick 8.3, Nova Scotia 9.1 and Prince Edward Island 6.6. In the proportion of telephones to population, Canada as a whole, with 13.1 telephones per 100 population, ranks second to the United States which has 16.4 telephones per 100 population.

¹ Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which issues an annual report dealing with telephone statistics.

Estimates of the number of telephone conversations during 1931 were 2,532,-443,000 local and 33,198,000 long-distance calls. These estimates were based on estimates made by systems operating almost 90 p.c. of all telephones in Canada; their estimates were based on actual counts made on days of normal business activity, and, after adjusting for uncompleted calls, holidays, Sundays, etc., the average was multiplied by 365. The long-distance calls in practically all cases were the actual long-distance calls put through or completed. The average was 1,856 local and 24 long-distance calls per telephone and 244 telephone conversations per capita as compared with an average of 253.6 in 1930. The estimated per capita average for the United States in 1930 was 226 and for New Zealand, 208.3.

Statistics of the number of telephone companies reporting to the Dominion Bureau of Statistics are given in Tables 72 and 73.

PART XII.—RADIO.¹

Under the Radiotelegraph Act (c. 195, R.S.C., 1927), the administration of radio within the Dominion was vested in the Department of Marine, now under the jurisdiction of the Hon. Alfred Duranleau, Minister. The matter of Dominion jurisdiction has been questioned by certain of the provinces from time to time, but on Feb. 9, 1932, the Judicial Committee of the Imperial Privy Council ruled that the control and regulation of radio communication is within the jurisdiction of the Dominion Parliament. This decision was a very important one and has done much to further the nationalization of radio broadcasting in Canada. (See pp. 731-733).

Section 1.—Radiotelegraphy.

The Coast Station Radiotelegraph System.—The present coast station system of 65 stations consists of three chains—one extending from Vancouver to Prince Rupert on the Pacific, another from Port Arthur to the Atlantic ocean in the east, and the third from Port Churchill to Resolution island at the entrance to Hudson strait. The Great Lakes coast stations connect with those of the east coast, which, in turn, connect with the Hudson Bay route chain. There is no direct radio connection between the Great Lakes and the Pacific Coast chains.

Of the above stations, 17 on the east coast and Great Lakes are operated by the Canadian Marconi Co. under contract with the Department, and the remaining 48 on the east coast, west coast and Hudson bay and strait are operated directly by the Department. Twice daily, at advertised hours, a number of these stations broadcast messages to shipping containing such important information as weather forecasts, storm warnings, reports in connection with floating derelicts, ice and other dangers to navigation. In the interests of navigators, to whom accurate time is essential in computing observations on celestial bodies, three Canadian coast stations—two on the west coast and one on the east coast—transmit time signals at advertised hours daily.

Some years ago the discrimination of underwriters in the matter of insurance rates charged on ships plying to Canadian ports led the Department to feel that any reasonable expenditure which would tend to reduce these charges would be a sound investment. To this end 12 direction-finding stations have been established at specially selected sites with respect to navigational routes—7 on the east coast, 4 on the Hudson bay and strait, and 1 on the west coast. These stations are fitted with special apparatus which enables the direction of the incoming radio signal transmitted by a ship to be accurately determined. It is the expressed opinion of many master mariners that Canadian direction-finding stations set a standard for accuracy and efficiency.

A more recent extension of the shore direction finder is the development of the direction-finding instrument on board ship. To assist this development, the Department has established radio beacon transmitters at a number of lighthouses and lightships (see Table 77). These radio beacons transmit characteristic radio signals with an approximate range of 50 miles every hour at advertised times during clear weather and continuously when the atmosphere in the vicinity of the station is so obscure as to impede navigation.

To insure the safety of life at sea, all passenger steamers and freighters plying to and from Canadian ports must carry radio equipment manned by competent operators in possession of a certificate of proficiency in radio. The Department

¹ Sections 1 and 2 have been revised by Commander C. P. Edwards, O.B.E., Director, Radio Service, Department of Marine, Ottawa. A fuller treatment of the historical and descriptive background of radio communication was published at pp. 607-610 of the 1932 Year Book.

maintains a complete radio inspection service to enforce this regulation. Inspectors located at various ports throughout the Dominion are responsible for checking the efficiency of the radio equipment on ships of all nationalities, and seeing that only competent operators are carried. Examinations for certificates of proficiency in radio are conducted by the Radio Branch, and 3,532 certificates have been issued up to Mar. 31, 1932.

Table 77 shows the name and situation of the Government-owned radiotelegraph stations in Canada and Newfoundland.

Section 2.—Radiotelephony.

Transatlantic Radiotelephone Service.—A radiotelephone service between Canada and Great Britain was first made available to the Canadian public, through the medium of the Bell Telephone Co. *via* the transatlantic radio circuit operated by the American Telegraph and Telephone Co. from New York, in March, 1928.

In 1932 a direct circuit with Great Britain was opened through the medium of the beam station of the Canadian Marconi Company at Drummondville, P.Q.

Approximately \$250,000 is expended annually by the Radio Branch of the Department of Marine for the suppression of inductive interference in the interests of broadcast listeners. This service is entirely free. Upwards of 100 men and 24 fully equipped cars are engaged in this work. Radio broadcasting throughout the Dominion is at present carried on by private enterprise.

Radio Broadcasting.—Broadcasting of the human voice by radio first commenced in Canada with test programs carried out by the Canadian Marconi Company in Montreal during the winter evenings of 1919. Regular organized programs were commenced in December, 1920, by the same company, on a wavelength of 1,200 metres.

In April, 1922, the establishment of broadcasting stations on a general scale commenced, 52 private, commercial and amateur broadcasting licences being granted during the fiscal year 1922-23. During the fiscal year 1931-32, 66 broadcasting stations were in operation in the Dominion, and the number of licensed receiving sets was 598,358. The licence fee for a broadcasting station is \$50 per annum, and for a receiving set \$2 per annum.

The increasing popularity of radio receiving sets for 'listening in' on broadcasted musical programs and news, is indicated by the number of such sets licensed in Canada (private receiving stations in Table 79) which have grown from 9,956 in the fiscal year ended Mar. 31, 1923, to 598,358 in 1932. In the latest year the total was divided among the provinces as follows: Ontario, 285,048; Quebec, 127,804; Saskatchewan, 31,487; Manitoba, 35,262; British Columbia, 55,534; Alberta, 27,481; Nova Scotia, 21,109; New Brunswick, 13,256; Prince Edward Island, 1,189; Northwest Territories and Yukon, 188. In the calendar year 1930, the sales in Canada of radio sets numbered 223,228, valued at \$22,776,225. Complete sets manufactured numbered 170,082, valued at \$19,196,936.

The wireless and radio stations at present operating in Canada are summarized in Table 79.

79.—Wireless and Radio Stations in Operation in Canada, Mar. 31, 1928-32.

Section 3.—The Canadian Radio Broadcasting Commission.¹

The adoption of a policy of national radio broadcasting, in 1932, followed upon two extensive investigations into the radio broadcasting situation in Canada; one by a Royal Commission in 1929, and one by a special committee of the House of Commons in 1932. The Royal Commission, of which Sir John Aird was chairman, not only examined the Canadian situation but also surveyed the radio broadcasting systems obtaining in the United States, Great Britain, and certain European countries. Its report, which was presented to the Government in September, 1929, recommended the creation of a national radio broadcasting monopoly in Canada to be operated by a corporation owned by the Dominion Government. One of the principal considerations guiding the commission's report was the desirability of providing a broadcasting service in Canada adapted to the special requirements of the country and free from external influence.

¹ Supplied by courtesy of Hector Charlesworth, Chairman Radio Broadcasting Commission.

No action on the report of the Royal Commission was taken at the regular session of 1930, and it was not until the session of 1932 that the report received parliamentary consideration, following the decision of the Imperial Privy Council which held that radio broadcasting in Canada came within Dominion rather than provincial jurisdiction. Then the House of Commons, on the motion of the Prime Minister, the Right Honourable R. B. Bennett, appointed a committee to consider and advise upon the broadcasting question. This committee, of which the Honourable Raymond D. Morand was chairman, was instructed: (1) "To consider the report of the Aird Commission"; (2) "To advise and recommend a complete technical scheme for radio broadcasting for Canada so designed as to ensure from Canadian sources as complete and satisfactory a service as the present development of radio science will permit"; and (3) "To investigate and report upon the most satisfactory agency for carrying out such a scheme".

In the final report, presented to the House of Commons on May 9, 1932, the committee outlined its conception of the place of radio broadcasting in the national life in the following terms: "Your committee was seized, from the inception, of the national importance and international character of radio broadcasting, and the evidence submitted has served to further consolidate our opinion of the far-reaching scope and benefits of proper, well-regulated broadcasting service throughout Canada as a medium of education, thought-provoking development, and fostering of Canadian ideals and culture, entertainment, news service, and publicity of this country and its products, and as an auxiliary to religious and educational teaching, also as one of the most efficient mediums for developing a great National and Empire consciousness within the Dominion and the British Commonwealth of Nations".

After paying tribute to the existing commercial radio broadcasting stations for the services they had rendered, the committee stated its conviction that the existing system did not ensure the maximum benefits of radio broadcasting. The change that had taken place in the science of radio broadcasting and in the financial condition of the country subsequent to the presentation of the Aird Report was mentioned by the committee in connection with its inability to completely accept the recommendations contained in that report. The committee recommended the creation of a national broadcasting system, including a chain of high-power stations located at suitable intervals across the country with a number of supplementary stations of lower power. It recommended that the national broadcasting system be controlled and operated by a commission to be known as the Canadian Radio Broadcasting Commission and consisting of a chairman, a vice-chairman, and a third commissioner, holding office for ten, nine, and eight years respectively. The committee proposed that this commission should be vested with the necessary powers: to carry on the business of broadcasting in Canada, including power to regulate and control all broadcasting; to own, build and operate stations; to acquire by lease, purchase, expropriation, or otherwise, any or all existing broadcasting stations; to enter into operating agreements with privately-owned stations; to prohibit the establishment of privately-owned chains of stations; to take over, subject to the approval of Parliament, all broadcasting in Canada; and to perform other functions necessary to the creation and operation of a national broadcasting system.

Regarding the financing of the proposed national system the committee recommended that it be self-sustaining and that only the money accruing from transmitters' and receivers' licence fees and advertising income be available for it.

The report of the committee, which was unanimous, was adopted without opposition in the House of Commons and a bill based upon it was introduced by the Prime Minister at the same session of Parliament. The Canadian Radio Broadcasting Act, 1932, was passed without opposition, and provided for the appointment of a commission as proposed by the committee and vested certain powers in the commission, some of which powers were subject to the approval of the Governor in Council, and some to the approval of Parliament.

Under authority of this Act, a commission of three members was appointed in the autumn of 1932, the personnel being Hector Charlesworth, Chairman; Thomas Maher, Vice-Chairman, and Lieut.-Col. W. Arthur Steel, Commissioner. The chairman and the vice-chairman took office on Dec. 1, 1932, but, owing to absence in Europe at the International Radio Conference at Madrid, Colonel Steel did not assume office until the middle of January, 1933.

Although the commission was not formally established in office and had hardly commenced the creation of its organization, it took charge of Canada's part in the first intra-Empire broadcast arranged by the British Broadcasting Corporation for Christmas Day, 1932, in which all the principal parts of the Empire exchanged greetings and received a message from His Majesty to his subjects throughout the world. This ambitious enterprise was carried out with complete success.

Without the use of transcontinental transmission wires and broadcasting stations, the commission could not at the outset engage in national broadcasting on a substantial scale. Pending the conclusion of negotiations for the leasing of wires and arrangements for the broadcasting of commission programs by commercial stations, the commission endeavoured to augment the existing broadcasting service by providing occasional broadcasting programs of a national character through temporary arrangements with wire companies and commercial broadcasting stations. Commencing with two programs a week, by May 1, 1933, it was broadcasting national programs on a trans-Canada network seven days a week, each of these programs being one hour long. At that time negotiations for the use and control of transcontinental wires for a fixed period of several hours each day and for the regular broadcasting of commission programs by commercial stations were approaching conclusion. These arrangements were designed to enable the commission to broadcast nationally and regionally for some hours every day, its operations in this connection being restricted by the amount of money available for its purposes. In April, 1933, the commission had secured the nucleus of a national network of stations of its own by taking over and operating the three stations of the Canadian National Railways at Moncton, Ottawa, and Vancouver. Subject to its finances permitting, it planned to commence during the year the construction of one or two high-power stations in Western Canada. In the meantime the commission began to discharge other functions assigned to it by Parliament, including the application of the statutory provision for the restriction of the advertising content of all commercial programs. At the parliamentary session of 1933 the Act creating the commission was amended to remove certain restrictions on the commission in regard to the selection of the personnel of its organization and to provide that it might function in certain respects with the approval of the Governor in Council instead of the approval of Parliament.

PART XIII.—THE POST OFFICE.

Historical.—A postal service was established between Montreal and Quebec as early as 1721, official messengers and other travellers making a practice of carrying letters for private persons. When Canada came under British rule, the Post Office was placed on a solid footing by Benjamin Franklin, then Deputy Postmaster General for the American colonies, who visited Canada in 1763, opened post offices at Quebec, Montreal and Three Rivers, and also established courier communication between Montreal and New York. Since 1755 Halifax had had a post office and direct postal communication with Great Britain.

As a consequence of the American Revolution and the resulting isolation of Canada from Nova Scotia, the first exclusively Canadian postal service, a monthly courier route from Halifax to Quebec, was established in 1788, involving a seven weeks' trip and expenses of about £200 of which only one-third was met by postal charges. Up to 1804 the postal facilities of Upper Canada consisted of one regular trip by courier each winter with whatever mail might reach Montreal during the season of navigation. Charges were necessarily high, \$1.12 being paid on ordinary letters from London to Toronto *via* Halifax.

The first post office in Toronto was opened about 1800. By 1816 there were 19 offices in the two Canadas and by 1827 this number had increased to 114. At this time the system consisted primarily of a trunk line of communication between Halifax, Quebec, Montreal, Toronto and Amherstburg, over which couriers travelled at varying intervals. Branching off this line were routes to Sorel, Sherbrooke, St. Johns, Hull, Hawkesbury, Perth and Richmond, with most deliveries made once or twice a week.

Hitherto the Post Office had been under the control of the Imperial Department, but considerable agitation resulted in the service being transferred on April 6, 1851, to the several provinces. Only enough mutual control was maintained to insure the continuance of Imperial and intercolonial services. The provinces had complete jurisdiction over the establishment and maintenance of systems and rates.

At Confederation the provincial systems were transferred to the Dominion. The Post Office Act of 1867 established a service throughout Canada. The domestic rate on letters was reduced from 5 to 3 cents per half-ounce, and in 1870 the rates to the United States and the United Kingdom were reduced from 10 to 6 cents and from 12½ to 6 cents respectively per half-ounce. In 1875 a convention between Canada and the United States reduced postal rates between the countries to the domestic level. In 1878, on the admission of Canada to the Postal Union, letter postage to the countries of the Postal Union was reduced to 5 cents per half-ounce. After a conference in 1897 Imperial penny postage (2 cents per half-ounce) was established on Dec. 25, 1898, while the domestic rate was reduced from 3 to 2 cents per ounce. These rates were maintained until 1915, when a 1-cent war tax was imposed on all pay letters and post cards (except where this would be in violation of international agreements), and also on postal notes. Later the rate to Great Britain was increased to 4 cents on the first and 3 cents on succeeding ounces, while that to Postal Union countries was raised to 10 cents on the first and 5 cents on succeeding ounces. The Postal Union rate was reduced in October, 1925, to 8 cents for the first ounce and 4 cents for subsequent ounces. Penny postage again became effective for Canada, to the United States, Newfoundland and other countries of North America on July 1, 1926, and to the United Kingdom and

all other places within the British Empire on Dec. 25, 1928. On May 24, 1929, penny postage became effective to France and, on Dec. 25, 1929, was extended to all places in South America. On July 1, 1930, the rate to other Postal Union countries was made 5 cents for the first ounce and 3 cents for each succeeding ounce. On July 1, 1931, a special revenue tax imposed by the Government for the purpose of obtaining additional revenue, came into effect on letters addressed to places in Canada, throughout the Empire, to France and to North and South America generally, making the rate in these cases 3 cents for the first ounce and 2 cents for each succeeding ounce.

The Post Office Department is administered by the Postmaster General. Besides the several administrative branches at Ottawa, the Dominion is divided into 15 districts, each in charge of a Superintendent of Postal Service. The Canadian system embraces a territory more extensive than that served by any other system, excepting those of the United States and Russia, though the sparsity of population and the comparative lack of development make inevitable a peculiarly difficult and expensive service.

Rural Mail Delivery.—A system of rural mail delivery was inaugurated in Canada on Oct. 10, 1908, limited at that time to existing stage routes, persons residing on such routes being entitled to have mail boxes put up in which the mail carrier was to deposit mail matter and from which he was to collect mail matter and carry it to the post office. As a consequence of the public approval of this scheme, new Regulations, taking effect on April 1, 1912, made all persons residing in rural districts along and contiguous to well-defined main thoroughfares of one mile and upwards eligible to receive their mail in this manner, while couriers on rural mail routes were also required to sell postage stamps and take applications, and accept money, for money orders and postal notes. The result has been an increase in the number of rural routes from approximately 900 in 1912 to 4,315 in 1932, having 235,755 mail boxes as against approximately 25,000 in 1912. The establishment of these routes has been an important factor in the amelioration of the conditions of Canadian rural life.

Statistics.—Tables 80 to 82 show the number of post offices in operation in Canada in the latest six years, the gross revenue in all offices collecting \$10,000 and upwards in 1931 and 1932, and the net revenue and expenditure of the Department in various years since 1890.

¹Revised as to financial transactions by H. E. Atwater, Financial Superintendent, Post Office Department.

¹ "Net Revenue" is exclusive of salaries and allowances to postmasters and some other smaller items. The gross revenue in the fiscal year 1931 was \$37,468,352 and in 1932, \$39,276,248.

Auxiliary Services.—The auxiliary postal services—the issuing of money orders (including postal notes) and the facilities offered by the Post Office savings banks—have expanded enormously since Confederation. In 1868, there were 515 money order offices in operation, issuing orders to an amount of \$3,342,574. In 1932 the number of offices had increased to 6,414, while the value of orders issued was nearly 40 times as large as in the earlier year. In the following tables, illustrating the use of money orders and postal notes, it will also be noticed that the large number of 14,324,715 money orders, representing a value of \$132,625,260, was issued during 1932. The number of postal notes received and paid was 7,227,262, with a value of \$12,629,304. It may be added that postal notes are issued payable to bearer and are in general use for the transfer of small sums, while money orders are payable to order at a designated post office. Statistical tables showing deposits with the Government savings banks since Confederation and combined business of Post Office and Dominion Government savings banks, 1927-32, are included in the chapter on Currency and Banking.

83.—Operations of the Money Order System in Canada, fiscal years ended Mar. 31, 1911-32.

NOTE.—For 1898 to 1910, see Canada Year Book, 1911, p. 289. For 1901-10, see 1932 Year Book, p. 622.

Attention may be drawn to the excess of the value of money orders issued in Canada for payment in other countries over the value of money orders issued outside for payment in Canada. This difference (about \$2,137,000 in 1932 and about \$33,580,000 in 1914) represents to a large extent remittances made by immigrants and to travellers in foreign countries. It is an indication, at least, of the large amounts sent out from Canada, and is an essential figure in the computation of our balance of international payments.

Postage Stamps.—The value of the postage stamps, post cards, etc., sold during each of the latest five fiscal years, as shown in the statement of revenue in the Postmaster General's reports, was as follows: \$26,200,776 in 1928, \$26,475,541

in 1929, \$27,101,353 in 1930, \$25,769,781 in 1931 and \$27,242,715 in 1932. Receipts from postage paid in cash were as follows: \$6,068,722 in 1927, \$7,467,611 in 1928, \$8,410,255 in 1929, \$9,045,805 in 1930, \$8,887,322 in 1931 and \$9,078,136 in 1932.

Air Mail Services.—While certain curtailments have been made in the air-mail system in 1932 due to the need for economy, the total poundage of mail carried by air throughout Canada showed a reduction of only about 12.5 p.c. from the preceding year, while the mileage flown showed a decrease of approximately 30 p.c., indicating a substantial increase in the poundage per mile flown.

An interesting feature of the returns is the volume of mail carried by air into the several mining districts, and there would seem to be little doubt that aerial postal communication contributes materially to the development of Canada's natural resources.

Subsidies, etc.—The conveyance of mail by land, water and air entailed a total expenditure of \$14,953,113 during the fiscal year ended 1932. Land transportation (largely that by rural delivery) cost \$6,532,034, railway carriage cost \$7,161,434, conveyance by steamship cost \$256,990, while that by air cost \$1,002,605. These amounts were paid solely for services rendered as carriers. In addition, however, considerable mail is carried, on both the Atlantic and Pacific coasts, by steamships and steamship lines which are especially subsidized by the Government. Table 86, showing amounts so paid in 1930, 1931 and 1932, follows.

86.—Mail Subsidies and Steamship Subventions, fiscal years ended Mar. 31, 1930-32.

Norw.—The figures in the following table were supplied by F. E. Bawden, Esq., Director of Steamship Subsidies, Department of Trade and Commerce. They appear annually in the "Public Accounts", issued by the Finance Department and represent the amounts paid in connection with contracts made under statutory authority by the Department of Trade and Commerce for trade services, including the conveyance of mails.

CHAPTER XIX.—LABOUR AND WAGES.¹

PART 1.—LABOUR.

Section 1.—Occupations of the People.

The occupations of the people of a country are at any given time mainly determined by its natural resources and the stage which has been reached in their development. The outstanding characteristics of Canada are its enormous extent, its immense natural resources and the comparatively slight development of these, only the resources of the southern portions being as yet at all well-known. The developed areas fall into four economic units with quite distinct physical characteristics: first, the Maritime Provinces, where lands, forests, mines and fisheries are the chief natural resources; secondly, Ontario and Quebec, with lands, forests, mines and abundant water power for manufacturing purposes; thirdly, the Prairie Provinces, where the land is the chief natural resource, except in Alberta which contains immense coal deposits; lastly, British Columbia, with fisheries, forests and mines, where agriculture plays a comparatively minor part. When the country as a whole is considered, the immense fertile areas of arable land must be considered as its chief natural resource, but in different parts of its vast expanse other resources predominate and give the key to the chief occupations of the people.

In Canada, as in other new countries, the labouring population (using the term in its widest sense) bears a larger proportion to the total than is the case in older civilizations where there exists more realized wealth. In addition to our native-born workers, great numbers of young males and smaller numbers of females, who have nothing to sell but their personal services, have, in the past, immigrated from older countries to Canada to find here a better market for their labour. Thus both the sex distribution and the age distribution of the population of Canada is rendered somewhat abnormal, an unusually large percentage of that population being of working age and of the male sex—that is, of the sex which is most generally gainfully employed.²

The Labour Force of Canada in 1931.—In 1931, out of a total population in the nine provinces of 8,159,095, 10 years of age and over (including 3,668 of unstated ages), 3,924,533 or 48·1 p.c. were gainfully employed, as compared with 3,173,169 or 47·5 p.c. in 1921, 2,723,634 or 49·4 p.c. in 1911, 43·9 p.c. in 1901 and 44·5 p.c. in 1891.

Male Labour in 1931.—Of the male population in the nine provinces 10 years of age and over in 1931 of 4,252,537, 3,258,614 or 76·6 p.c. were gainfully employed, as compared with 2,683,019 or 77·5 p.c. in 1921, 2,358,813 or 79·5 p.c. in 1911, 74·2 p.c. in 1901 and 76·6 p.c. in 1891. Thus the latest census shows a decrease in the proportion of males gainfully employed, a decrease probably due partly to a later age at school leaving, partly to a change in the age distribution of the male population 10 years of age and over, a larger percentage of the total being at relatively

¹The sections and subsections of this chapter, with the exceptions of Sections 1, 3, 7 and Section 9, Subsection 3, all of Part I, have been revised by, or under the direction of, H. H. Ward, Deputy Minister, Department of Labour, Ottawa. The information in Section 3, Part I, has been obtained through the courtesy of the Provincial Departments of Labour or Bureaus of Labour, and that in Section 7, Part I, has been revised by the chairmen of the respective provincial Workmen's Compensation Boards.

²On the sex distribution of the population, see pp. 109-111; on the age distribution, see pp. 114-116.

advanced ages, and a smaller percentage in the younger groups. For example, 5.5 p.c. of the males of Canada were over 65 years of age in 1931 as compared with 4.7 p.c. in 1921.

Female Labour in 1931.—Of the female population of 10 years and over in the nine provinces, numbering altogether 3,906,522 in 1931, 665,919 or 17.0 p.c. were then gainfully employed, as compared with 490,150 or 15.2 p.c. in 1921, 364,821 or 14.3 p.c. in 1911, 12.0 p.c. in 1901 and 11.1 p.c. in 1891. Thus the tendency for women to go increasingly into gainful occupations, which has been noticeable since 1891, continues.

Section 2.—The Dominion Department of Labour.

The Department of Labour of the Dominion Government was established in 1900 under the authority of the Conciliation Act, 1900 (63-64 Vict., c. 24). Its chief duties originally comprised the administration of certain provisions of this Statute designed to aid in the prevention and settlement of labour disputes, the administration of the Government's fair wages policy for the protection of workmen employed on Dominion Government contracts and on works aided by grants of public funds, the collection and classification of statistical and other information relative to conditions of labour, and the publication of a monthly periodical known as the *Labour Gazette*. From 1900 to 1909 the Department was administered by the Postmaster General, who was also Minister of Labour. It was constituted a separate Department under the Labour Department Act, 1909 (R.S.C., 1927, c. 111).

The work of the Department was greatly increased in 1907 by the passage of the Industrial Disputes Investigation Act (R.S.C., 1927, c. 112). At present the Department is also charged with the administration of an Act passed in 1918 known as the Employment Offices Co-ordination Act (R.S.C., 1927, c. 57), the Government Annuities Act of 1908 (R.S.C., 1927, c. 7), the Technical Education Act enacted in 1919 (R.S.C., 1927, c. 193), the White Phosphorus Matches Act of 1914 (R.S.C., 1927, c. 128), the Combines Investigation Act of 1923 (R.S.C., 1927, c. 26), the Old Age Pensions Act of 1927 (R.S.C., 1927, c. 156), the Fair Wages and Eight Hour Day Act of 1930 (20-21 Geo. V, c. 20), the Vocational Education Act, 1931 (21-22 Geo. V., c. 59), the Unemployment and Farm Relief Act, 1931 (21-22 Geo. V, c. 58), the Unemployment and Farm Relief Continuance Act, 1932 (22-23 Geo. V, c. 13) and the Relief Act, 1932 (22-23 Geo. V, c. 36). The scope of the Department has increased in other directions, especially in investigating the cost of living, and in connection with the International Labour Organization of the League of Nations. For a report of the operation of the Old Age Pensions Act, see p. 780 and for the proceedings under the Combines Investigation Act, 1923, see p. 790. For the operation of the Government Annuities Act of 1908 and the Technical Education Act, see the chapters on Insurance and Education, respectively.

Industrial Disputes Investigation Act.—The *Industrial Disputes Investigation Act* (R.S.C., 1927, c. 112), has attracted considerable favourable attention from legislators and publicists throughout the world. As enacted in 1907, it forbids strikes and lockouts in industrial disputes affecting mines and public utilities until the matters in dispute have been dealt with by a board of conciliation and investigation consisting of three members, two appointed by the Minister of Labour on the recommendation of the respective parties to the dispute, the third on the recommendation of the first two, or, if they fail to agree, by the Minister himself. After their report has been made, either of the parties to the dispute may reject it and declare a strike or a lockout, a course adopted, however, only in a small percentage of cases. The machinery of the Act may be extended to other industries with the consent of the parties concerned. In January, 1925, a judgment was rendered by the Judicial Committee of the Privy Council declaring that the Act as it stood was not within the competence of the Dominion Parliament.¹ At the ensuing session of Parliament amendments were made to the Statute, with the object of limiting its operation to matters not within exclusive provincial jurisdiction. It was also provided by these amendments that the Statute should apply in the case of "any dispute which is within the exclusive legislative jurisdiction of any Province and which by the legislation of the Province is made subject to the provisions of this Act".

The Legislatures of all provinces except Prince Edward Island have taken advantage of this provision and enacted enabling legislation, by which the Dominion Industrial Disputes Investigation Act becomes operative in respect of disputes of the classes named in the Dominion law and otherwise within exclusive provincial jurisdiction.

A review of the proceedings under the Industrial Disputes Investigation Act from its enactment in March, 1907, to Mar. 31, 1932, shows that during the 25 years 772 applications were received for the establishment of boards of conciliation and investigation, as a result of which 515 boards were established. In all but 38 cases, strikes or lockouts were averted or ended.

¹See p. 241 of the *Labour Gazette* for February, 1925, for text of judgment of the Judicial Committee of the Privy Council in regard to the validity of this Statute.

Fair Wages Branch.—The Fair Wages Branch of the Department of Labour is charged with the preparation of fair wages conditions and schedules of minimum wage rates, which are inserted in Dominion Government contracts and must be adhered to by contractors in the execution of such works. The number of fair wages schedules prepared, from the adoption of the Fair Wages Resolutions in 1900 up to the end of the fiscal year 1931-32, was 5,870. The number of fair wages schedules and clauses furnished during the fiscal year 1931-32 was 272.

The fair wages policy of the Government of Canada was originally based on a resolution adopted by the House of Commons in 1900 and expressed in an Order in Council adopted on June 7, 1922, and amended on April 9, 1924. As drawn up by Order in Council it was applied to contracts for building and construction operations, also to contracts for the manufacture of certain classes of Government supplies. The policy required that the current wage rates and working hours of the district should be observed in the case of all workmen employed, or if there were no current rates or hours in existence, then fair and reasonable conditions in both respects. Contracts for railway construction to which the Dominion Government has granted financial aid, either by way of subsidy or guarantee, are likewise subject to fair wages conditions. The policy has, moreover, been extended within recent years to cover contracts for works carried out by the several Harbour Commissions and aided by grant of public funds.

An Order in Council passed on Dec. 3, 1929, provided for the payment of current wage rates to workmen employed in the construction, alteration, extension, maintenance and operation of works for the utilization of water powers under licence from the Dominion Government. The Fair Wages Clause was also inserted in an agreement made by the Dominion Government with a paper company for the cutting of pulpwood in Manitoba, under which the company agreed to pay to those employed in the industry wage rates not less than those generally accepted as current in each trade or occupation in similar industries, and to maintain conditions of labour not less favourable than those prevailing in similar industries in the district.

On May 30, 1930, an Act of Parliament was adopted, known as the Fair Wages and Eight Hour Day Act, 1930, which provides for the payment of current wage rates to all persons employed on contracts made with the Government of Canada for works of construction, remodelling, repair or demolition, provided that the wages in all cases shall be fair and reasonable. This Statute also directed that the working hours of persons while so employed shall not exceed eight hours a day. It was further declared that the foregoing conditions are to be applied to all workmen employed by the Government itself on the construction, remodelling, repair or demolition of any work.

On Mar. 27, 1930, an Order in Council was passed providing that, except in cases where the work of employees was intermittent in character, or the application of the rule was not deemed to be practicable, or in the public interest, the hours of work of any Dominion Government employees who had up to that time been required to work more than eight hours daily should be reduced to eight hours a day, with a half holiday on Saturday.

The Department of Labour is frequently consulted by other Departments of the Government regarding the wage rates to be observed in connection with work undertaken on the day labour plan.

Labour Gazette.—A monthly publication, known as the *Labour Gazette*, has been issued by the Dominion Department of Labour since its establishment in 1900. It contains a monthly review of the industrial situation in Canada and of the state of employment, including reports of the operations of the Employment Service of Canada in the various provinces, also information relative to: labour legislation, wage rates and hours of labour, wholesale and retail prices of staple commodities in Canada and other countries, labour disputes (including the proceedings under the Industrial Disputes Investigation Act), industrial accidents, legal decisions affecting labour, industrial training and technical education, proceedings under the Combines Investigation Act, and other matters of general or current industrial interest. The *Labour Gazette* is widely distributed throughout Canada, and the statistical and other information contained therein is constantly used in connection with wages and other issues between employers and workers. A subscription charge of 20c. per annum is made for this publication.

Labour Legislation.—Much attention is devoted to labour legislation. Information as to new laws enacted by the Dominion and the provinces is kept up to date, while notes or articles regarding their provisions are published in the *Labour Gazette*. Since 1917, the Department has published annual reports containing the text of Canadian labour laws enacted during each year, together with an introduction summarizing this legislation under subject headings. The first of these reports was based on Dominion and provincial labour legislation as existing at the end of 1915. Reports on the labour laws enacted in the four succeeding years were published in regular order. In 1920 a further consolidation was brought out and annual reports supplementary thereto were issued in 1921, 1922, 1923, 1924, 1925 and 1926. A third consolidated report on labour legislation, containing the texts of the Dominion and provincial labour laws up to the end of 1928, was issued in 1929. Annual supplements containing labour laws of subsequent years were issued in 1930, 1931 and 1932, respectively. The Department of Labour has also published articles dealing with various provincial labour laws, indicating the extent to which these have been standardized and the differences which exist.

Joint Industrial Councils.—One section of the report of the Royal Commission of 1919 on Industrial Relations dealt with shop committees and industrial councils, the commissioners urging the adoption in Canada of the principles underlying Whitley Councils and kindred systems. The subject was also discussed at the National Industrial Conference of 1919. The committee to which the matter was referred made a unanimous report, urging the necessity for greater co-operation between employer and employee and stating their belief that this end could be furthered by the establishment of joint industrial councils.

Under Order in Council P.C. 2232 of Dec. 22, 1928, there was established an Advisory Committee on the Civil Service Superannuation Act to advise the Treasury Board in respect to matters incidental to the administration of the Act. This Committee is composed of five representatives named by organizations of civil servants and five named by the Government, of whom three are named by the Department of Finance, one by the Department of Insurance and one by the Department of Justice. The Committee began its sessions in January, 1929, and is still functioning in connection with matters affecting the superannuation of public employees.

Section 3.—Provincial Labour Departments and Bureaus.

The rapid industrial development at the end of the nineteenth century in Quebec and Ontario, the leading manufacturing provinces, brought with it the recognition of the need of special provincial offices to safeguard the interests of labour, with the result that the Ontario Bureau of Labour was established in 1900 and the Quebec Department of Public Works and Labour in 1905. In 1904 an Act was passed in New Brunswick providing for a Bureau of Labour, but this never became operative. Some years later, to cope with conditions created by the growth of industry in the West, Acts were passed providing for the creation of Provincial Bureaus of Labour in Manitoba (1915), in British Columbia (1917), in Saskatchewan (1920), and in Alberta (1922). A Department of Labour was established in Nova Scotia by c. 3 of the Statutes of 1932.

The Nova Scotia Department of Labour.—The Act establishing the Nova Scotia Department of Labour provides that "the Department of Labour shall take cognizance of all matters relating to labour and shall administer such affairs, matters, Acts and regulations as the Governor in Council from time to time assigns to that Department, whether or not the same have been assigned or have belonged by or under any Act of the Legislature of Nova Scotia or otherwise to some other Department or to some member of the Executive Council".

The Department is in charge of a Minister of Labour, who has under him a Secretary of Labour. The latter is empowered to collect and publish information and statistics affecting labour, and to administer such Acts as may be assigned to the Department by Order in Council. At present, labour bureaus in the province and the administration of the Factories Act have been assigned by Order in Council to the Department of Labour.

The Quebec Department of Labour.—This Department was formerly known as the Department of Public Works and Labour, each division having a separate Deputy Minister, but at the session of 1931 the Legislature created each division a distinct department.

Its duties include the institution and control of inquiries into important industrial questions and those relating to manufactures, and it may collect useful facts and statistics relating thereto, to be transmitted to the Quebec Bureau of Statistics. The Department is charged with the administration of provincial Acts respecting trade disputes, factory inspection, maintenance of fair wage clauses in Provincial Government contracts, superintendence of licensed registry offices for domestic workers, inspection of boilers and foundries, prevention of fires, establishment and maintenance of provincial employment offices, the issue of educational certificates to wage-earners under 16 years of age, together with the inspection of heating installations, steam, hot-water and hot-air furnaces. The Department's functions also include the qualification of electricians and contractors in that line of business, the qualification of stationary engineers and firemen, and the inspection of boilers registered under the Interprovincial Code, together with the registering of the blue prints in connection with the construction of boilers. The Department publishes annual reports outlining the work performed.

The Department of Labour of Ontario.—The Department of Labour of Ontario was established in 1919 and placed under the direction of a Minister and a Deputy Minister of Labour. This Department had its origin in the Bureau of Industries formed in 1882 under the Department of Agriculture, to collect and

publish statistics relating to the industries of the province and (later) to administer the first Factory Act of 1886. In 1900 a Bureau of Labour, attached to the Department of Public Works, was authorized to collect and publish information relating to employment, wages and hours, strikes, labour organizations and general conditions of labour. Several investigations were made regarding such matters and the first free employment offices were opened by the Bureau of Labour. In 1916 this Bureau was in turn superseded by the Trades and Labour Branch, also under the Ministry of Public Works but administered by a Superintendent. The establishment of the Branch had been recommended by the Ontario Commission on Unemployment and the expansion of the work undertaken by the Branch, and the increase in the demands made upon its resources led to the creation of a special Department of the Government by the Department of Labour Act, 1919.

The Department of Labour administers the following Acts: The Department of Labour Act; The Factory, Shop and Office Building Act; The Steam Boiler Act; The Operating Engineers Act; The Building Trades Protection Act; The Employment Agencies Act; The Apprenticeship Act; The Regulations respecting the Protection of Persons working in Compressed Air; The Regulations respecting the Protection of Persons working in Tunnels and Open Caissons; The Minimum Wage Act. The Department is required to maintain employment offices, to collect information respecting employment, sanitary and other conditions in work places, wages and hours of work, and to study labour legislation in other parts of the British Empire and in foreign countries, as well as any suggested changes in the labour laws of Ontario. The representatives of the Department of Labour have right of access to offices, factories and other work places at any reasonable hour, and may be authorized to hold inquiries under the Public Inquiries Act. The Department publishes annual reports which cover the work of the officers employed in the administration of the various Acts assigned to it. The Minimum Wage Act is administered by the Minimum Wage Board.

Manitoba Bureau of Labour.—The Act of 1915, establishing the Manitoba Bureau of Labour, provided that it be attached to the Department of Public Works; an amendment of 1922, however, provided for its attachment to any other Department, as the Lieutenant-Governor in Council may determine.

The Bureau is established to co-operate with employers, trade unions and others. It is charged with the enforcement of the following Acts: The Manitoba Factories Act; The Bake Shops Act; The Building Trades Protection Act; The Fair Wage Act; The Electricians' Licence Act; The Elevator and Hoist Act; The Shops Regulation Act; The Public Buildings Act; The Minimum Wage Act; The Steam Boiler Act; the licensing of cinematograph projectionists under The Public Amusements Act; The Fires Prevention Act; The One Day Rest in Seven Act.

Saskatchewan Department of Railways, Labour and Industries.—This was created as a separate Department by an Act of 1928. It is administered by the Minister of Railways, Labour and Industries, assisted by a permanent Deputy Minister. The functions of the Department include the administration of the following Acts: The Factories Act and Elevator Regulations; The Steam Boilers Act; The Building Trades Protection Act; The Act protecting the payment of wages to certain employees; The Mines Safety and Welfare Act; The Minimum Wage Act; and the Order in Council respecting fair wages in government contracts, also of all matters connected with railways over which the Government of Saskatchewan by any Act may have control. It is also charged with the operation of public free

employment offices; the collection and publication of statistics relating to employment; wages and hours of labour throughout the province; strikes and other difficulties; trade unions and labour organizations; the relations between capital and labour, and other subjects connected with industrial problems; the commercial, industrial and sanitary conditions of employment; raw products of Saskatchewan and their industrial possibilities; other matters related to industrial development.

Alberta Bureau of Labour.—The Act of 1922, creating the Alberta Bureau of Labour, provided that the Bureau be in charge of a Minister having under him a Commissioner of Labour. The latter is empowered to collect and publish information and statistics affecting labour, and to administer such Acts as may be assigned to the Bureau by Order in Council. Important among these Acts are: The Alberta Government Employment Bureau Act; The Minimum Wage Act; The Boilers Act; The Factories Act; The Theatres Act; The Trade Schools Act. The Bureau issues annual reports.

The British Columbia Department of Labour.—This Department was instituted by an Act of 1917, under a Minister and Deputy Minister of Labour. It administers the laws of British Columbia affecting labour, and is empowered to collect information respecting industries, wages, employment, prices, labour organizations and other data pertaining to labour problems. Prominent among the Acts under the jurisdiction of the Department are: The Minimum Wage Act for Female Employees; The Male Minimum Wage Act (passed in 1929); The Hours of Work Act; The Semi-Monthly Payment of Wages Act; The Factories Act. The Department also operates the employment bureaus within the province. The Deputy Minister of Labour is *ex officio* Chairman of the Board of Adjustment under the Hours of Work Act of 1923, which, with exceptions, provides for the eight-hour working day in industry; he is also Chairman of the Male Minimum Wage Board and Chairman of the Minimum Wage Board for Women. Annual reports are published by the Department, containing much information respecting labour matters.

Section 4.—Canada and the International Labour Organization.¹

The International Labour Organization of the League of Nations was set up in 1919 in accordance with Part XIII of the Treaties of Peace, to promote the improvement of industrial conditions by legislative action and international agreement.

The Organization comprises the Permanent International Labour Office in Geneva, Switzerland, and the International Labour Conference, which meets annually and is composed of four representatives of each Member State, two of whom are government delegates, while two represent the employers and the employed respectively. Fifty-eight countries are members of the International Labour Organization, including all of the important industrial countries of the world except the United States.

The International Labour Office functions as a secretariat of the annual conference, and also collects and publishes information on subjects relating to industrial life and labour. The Office is under the control of a Governing Body consisting of

¹On this subject see also the 1921 Year Book, pp. 607-609; 1922-23 Year Book, pp. 704-707; 1924 Year Book, pp. 666-670; 1925 Year Book, pp. 676-678; 1926 Year Book, pp. 679-681; 1927-28 Year Book, pp. 735-737; 1929 Year Book, pp. 725-727; 1930 Year Book, pp. 710-712; 1931 Year Book, pp. 753-755 and 1932 Year Book, pp. 633-634.

24 persons, appointed by the International Labour Conference, of whom 12 represent Governments, 6 represent employers and 6 represent workers. In addition to its control of the Labour Office, the Governing Body is charged with the preparation of the agenda of the annual conference.

Under the terms of the Peace Treaties, eight of the government seats on the Governing Body are held by the countries of "chief industrial importance". Canada was designated by the Council of the League of Nations as one of these eight States of "chief industrial importance". The Minister of Labour is the Government representative on this body. Mr. Tom Moore, President of the Trades and Labour Congress of Canada, is one of the six workers' representatives on the Governing Body.

The conclusions of the International Labour Conference are cast in the form of draft conventions or recommendations, addressed to the national Governments which comprise the membership of the International Labour Organization. A two-thirds majority of the Conference is required for the adoption of either a draft convention or recommendation. Under the Treaties of Peace, the Member States are bound to bring the draft conventions or recommendations before the authority or authorities within whose competence the subject matter lies, for the enactment of legislation or other action. Thus the findings of the Conference only become binding in the various countries concerned if and when action regarding them is taken by the latter.

Most of the proposals dealt with in the successive meetings of the Labour Conference since its establishment in 1919 have been adjudged by the law officers of the Crown to fall within provincial jurisdiction. The draft conventions and recommendations of the Conference have in all cases been brought to the attention of the Dominion Parliament, while those which dealt with subjects within provincial control were also referred to the Provincial Governments.

The Dominion Department of Labour is entrusted with the duties arising out of the relations of Canada with the International Labour Organization. These have entailed much correspondence, not only with the International Labour Organization but also with the different Departments of the Dominion Government, with the provinces, and with employers' and workers' organizations. Replies have also been prepared in the Department of Labour to various questionnaires issued by the International Labour Office. Performance of these duties has necessitated a close study of the different technical questions which have figured on the agenda of the various conferences and at the meetings of the Governing Body. A bulletin entitled "Canada and the International Labour Conference" has been issued by the Department of Labour, furnishing information respecting the International Labour Organization. Comprehensive articles dealing with the proceedings of the annual sessions of the International Conference have been published from year to year in the *Labour Gazette*. These articles contain the text of the various draft conventions and recommendations of the Conference.

Sixteen sessions of the International Labour Conference have been held. Thirty-three draft conventions and 41 recommendations have been adopted at these annual gatherings. The draft conventions and recommendations of the Conference have, among other subjects, related to the following: hours of labour, measures for the avoidance of unemployment, employment conditions of women and children, employment conditions of seamen, employment in agriculture, weekly rest, statistics of immigration and emigration, principles of factory inspection, inspection of emigrants on board ship, workmen's compensation for accidents and occupational

diseases, sickness insurance, minimum wages, prevention of accidents to dockers, forced labour, and regulation of hours of work of salaried employees and of workers in coal mines.

Up to Dec. 31, 1932, 489 ratifications of these conventions had been registered with the League of Nations, of which 8 were conditional or with delayed application; 51 had been approved by the competent national authority and 115 had been recommended to the competent national authority for approval.

Canadian Action on Draft Conventions and Recommendations.—The action taken by the Dominion and the Provincial Governments on the draft conventions and recommendations of the International Labour Conference has been summarized in the articles on this subject published in previous Year Books and referred to in the footnote on p. 750.

Section 5.—Organized Labour in Canada.

The Dominion Department of Labour publishes an annual report on labour organization; this sets out the various branches of unionism in existence, the principles on which they are founded, their chief activities, and statistics of the different groups comprised in the trade unions of the Dominion. Reference is also made in this annual report to the principal international labour organizations with which the organized workers of Canada are affiliated.

Trade unionism in Canada occupies a unique position, by reason of the fact that most organized workers in the Dominion are members of organizations whose headquarters are located in a foreign country, *viz.*, the United States. In years gone by Canadian workmen who sought a livelihood in the United States greatly outnumbered those who came from that country to Canada. As industry was further developed in the United States there arose a number of unions of various crafts, and with these the Canadian workers soon became affiliated. With the development of industry in the Dominion, many of these Canadians returned to their native land, bringing with them the gospel of trade unionism and collective bargaining as a means of protecting their rights. In many instances these trade unionists become the nuclei of strong bodies of organized workers formed in Canadian cities.

The usual résumé of the origin and growth of the trades union movement in Canada has been omitted in this edition, owing to considerations of space. The interested reader is referred to pp. 712-714 of the 1930 edition of the Year Book and to "Labour Organization in Canada, 1931", published by the Dominion Department of Labour. This latter publication presents the history and present organization of trades unionism in the Dominion in a very comprehensive manner. The following paragraphs give a short sketch of the present organization of the five main groups into which Canadian labour organizations now fall.

Trades and Labour Congress of Canada.—Through the initiative of the Toronto Trades Assembly (now the Toronto District Trades and Labour Council), the first national labour organization, the Canadian Labour Union, was formed in Toronto in September, 1873. This organization held its second and third annual meetings in 1874 and 1875, but disappeared as a result of the serious depression of the later '70's. In 1883 the Trades and Labour Council of Toronto, feeling the necessity of the wage-earners of Canada having a medium through which to express

their opinions, assumed the responsibility of calling another trades and labour congress, which met in Toronto on Dec. 26, with 47 delegates. On the summons of the Toronto Council, a second meeting, with 109 delegates, assembled on Sept. 14, 1886, the first occasion on which any labour body outside of the province of Ontario was represented. A permanent organization was effected at this meeting under the name of "Trades and Labour Congress of the Dominion of Canada". This was the title of the organization until 1895, when the title "Trades and Labour Congress of Canada" was adopted in preference to "Canadian Federation of Labour". Since 1886 conventions have been held annually, the 1932 meeting in Hamilton being counted as the 48th. The Trades and Labour Congress is representative of international trade unionism in the Dominion, the bulk of its membership being drawn from the international organizations which have local branches in Canada. According to reports for 1931, the Congress received payment of per capita tax on the Canadian membership of 60 international bodies and also from two national organizations which had their entire membership in the Dominion; the combined membership was 141,137, comprised in 1,635 local branches.

All-Canadian Congress of Labour.—The All-Canadian Congress of Labour was organized Mar. 16, 1927, by labour bodies not eligible for membership in the old established Trades and Labour Congress of Canada. One of the promoters of the new body was the Canadian Federation of Labour, which was formed as a result of the expulsion from the Trades and Labour Congress of Canada of Knights of Labour assemblies and all other unions which were composed of members of crafts over which existing international organizations claimed jurisdiction. With the formation of the All-Canadian Congress of Labour the Canadian Federation passed out of existence. At the close of 1931, the All-Canadian Congress of Labour had eleven central bodies in affiliation, with a combined membership of 25,221, as well as 31 directly chartered local unions with a membership of 3,101, making a total combined reported membership of 28,322.

Membership of International Organizations in Canada.—At the close of 1931 there were 82 international craft organizations having one or more local branch unions in Canada, two less than the number recorded in 1930. These bodies among them had 1,884 local branches in the Dominion with 188,219 members. The membership of the two industrial unions with branches in the Dominion was 27,726 comprised in 51 branches. Thus the total international trade union membership in Canada at the close of 1931 was 215,945. The international craft organizations represent approximately 61 p.c. of the total of all classes of workers in the Dominion organized under trade union auspices (Table 3).

Canadian Central Labour Bodies.—There are in Canada 25 Canadian central labour bodies, 18 of which are in direct opposition to the international organizations. In some instances these Canadian central labour bodies have been formed by secessionists from international unions. The combined membership of the Canadian central labour organizations on Dec. 31, 1931, was 48,509, comprised in 606 local branches (Table 4).

Membership of Independent Units.—There are 37 independent local labour bodies in the Dominion, 36 of which had a membership of 12,099 at the end of 1931.

Federation of Catholic Workers of Canada.—During the period when the Knights of Labour operated in Quebec, there existed also four independent unions,

one of labourers and three of leather and shoe workers. Up to 1902 these several bodies were represented at the annual conventions of the Trades and Labour Congress of Canada. In that year, in an effort to eliminate a duplication of unions and bring the independent bodies under the banner of the international organizations, the Trades Congress denied them further representation. The Knights of Labour assemblies gradually disappeared, but the independent unions continued to exist. Up to the time of the expulsion by the Trades Congress of those bodies which were outside the ranks of the international organizations, there was only one Catholic union, that composed of shoe workers in the city of Quebec, which had accepted the social doctrine of the Roman Catholic Church and admitted a chaplain (a member of the clergy), this course being adopted in 1901 following the adjustment of a dispute in the shoe industry in that city by the archbishop of the diocese. Some years later, a number of other national unions were formed in the province of Quebec, all of which accepted for their guidance the declarations of Pope Leo XIII, who on May 15, 1891, issued an encyclical on "The Condition of the Working Classes", the provisions of which were subsequently proclaimed by Pope Pius X as fundamental rules for workmen's associations. In 1918, a conference of national unions was held in Quebec city, followed by other meetings in Three Rivers in 1919 and Chicoutimi in 1920; the delegates at the latter conference, numbering 225 from 120 unions, decided to establish a permanent central body to co-ordinate the work of the scattered units. Accordingly, at the 1921 conference held in Hull, at which approximately 200 delegates representing 89 unions were present, a constitution to govern the new body was approved. The name selected was "Federation of Catholic Workers of Canada" and permanent officers were elected, the constitution and by-laws becoming effective on Jan. 1, 1922. From information at hand, there are 121 National Catholic unions with a combined membership of 25,151.

One Big Union.—Delegates from Western Canada to the Quebec convention of 1918, dissatisfied with the alleged reactionary policy of the Trades and Labour Congress of Canada, held a caucus at which it was decided to concentrate their energies towards having the Trades Congress legislate in accordance with their views. Some months later a meeting of delegates was called by the British Columbia Federation of Labour to assemble immediately following the annual convention of that body, which, for the first time in its history, met outside of the province under its jurisdiction, in Calgary. The conference assembled on Mar. 13, 1919, with 239 delegates present; the outcome of the meeting was the formation of an industrial organization, the "One Big Union". On June 11, 1919, a conference of the new body was held in Calgary to further the plans of the organization, which had a membership of 41,150 at the close of 1919. From the outset the O.B.U. met with much opposition from the old-established labour unions, represented by the Trades and Labour Congress of Canada, which was opposed to the substitution of industrial unionism for the existing system of craft unions. According to information supplied by the general secretary, the O.B.U., at the close of 1931, had 46 units under charter, one of which was located in the United States, as well as two central labour councils (bodies similar to trades and labour councils), the combined reported membership being 24,260.

Total Reported Membership of Organized Labour in Canada.—The numerical strength of organized labour in Canada at the close of 1931 was given by the Department of Labour as follows: international organizations, 1,935 local branches with an aggregate membership of 215,945; Canadian central labour bodies, 606 branches and 48,509 members; independent units, 37 with 12,099 members; National Catholic unions, 121 with 25,151 members; grand total, 2,772 local branches and 310,544 members. As compared with 1930, this represents a decrease of 37 branches and of 11,905 members. Table 2 shows by years the membership of trade unions in Canada since 1911.

2.—Membership of Trade Unions in Canada, 1911-31.

International Trade Unions Operating in Canada.—Table 3 gives the names of the 82 international craft labour organizations and the two industrial unions which now carry on operations in Canada, and shows: (1) the number of branches which were in existence in the Dominion at the close of 1931, and (2) the reported membership. The reported figures in Tables 3 and 4 are given in italics where the information has been obtained from sources other than the headquarters of the indicated organization.

Section 6.—Fatal Industrial Accidents.

Statistics of fatal industrial accidents have been compiled by the Dominion Department of Labour since 1903, the data being obtained from provincial Workmen's Compensation Boards, the Board of Railway Commissioners for Canada and various other governmental authorities, from departmental correspondents and from press clippings. Table 5 shows the number of fatal industrial accidents reported to the Department during each year from 1928 to 1932 inclusive. The number of fatalities in each of the different industries is also shown as a percentage of the total number. Preliminary figures show 961 fatal industrial accidents in 1932.

² Previously reported under Transportation and Public Utilities.

Causes of Fatal Accidents.—The classification of fatal accidents in 1932 by causes shows that the largest number, 260, came under the category "by moving trains, vehicles, etc.". This includes all accidents due to cars or engines, including mine and quarry cars, and to automobiles and other power vehicles and horse-drawn vehicles, as well as accidents caused by moving implements, by moving watercraft and by aircraft. Next in order as a cause came "falls of persons", 160 in number, including those who fell from some elevation and those who fell into pits, shafts, holds of vessels, harbours, rivers, etc. "Dangerous substances" including electric current, explosives, hot and inflammable substances, gas fumes, boiler explosions, etc., caused 155 fatalities. Fatalities numbering 142 were caused by falling objects. Animals caused 44 fatalities, including 27 caused by horses. Thirty-one fatalities were caused by working machines, 25 by prime movers, 27 by striking against or being struck by objects, 16 by handling of heavy or sharp objects, 13 by hoisting apparatus, 4 by tools, 12 by infection, 24 due to industrial diseases, 11 by shooting and violence, 10 by cave-ins and 16 by lightning, frost, storms and sunstroke.

Numbers of industrial accidents, fatal and non-fatal, dealt with by the various provincial Workmen's Compensation Boards are included in the following section on Workmen's Compensation in Canada.

Section 7.—Workmen's Compensation in Canada.

An account of the development of workmen's compensation legislation in Canada from employers' liability legislation was given at pp. 744-746 of the 1927-28 Year Book, while a summary of the 1932 legislation with regard to workmen's compensation appears in the general sketch of labour legislation in Canada at pp. 787-789 of the current edition. Details regarding the operation of the various Workmen's Compensation Boards of the provinces are given below.

Operations of the Workmen's Compensation Boards.—*Nova Scotia.*—The Workmen's Compensation Act was passed in 1915 but only became effective on Jan. 1, 1917. During the fifteen years between that date and Dec. 31, 1931, 109,005 accidents were reported to the Board, of which 94,977 were compensated as per Table 6. Prior to Jan. 1, 1920, medical aid was only furnished in special cases.

New Brunswick.—The Workmen's Compensation Act of New Brunswick was passed in 1918. It extends to a wide range of industries, and is administered by a Board of three persons, levying assessments and paying benefits. For the sums paid out annually from 1920 as compensation and for medical aid see Table 7.

Quebec.—The Quebec Workmen's Compensation Commission was established in 1928 by authority of c. 80 of the Statutes of that year. The Act was brought into force by proclamation on June 9, 1928, operations of the Commission commencing as of Sept. 1, 1928. Under this Act, the Quebec Commission did not insure employers against their liability. On April 4, 1931, a new Act was enacted by the Quebec Legislature (21 Geo. V, c. 100), effective Sept. 1, 1931, providing for state insurance, practically along the same lines as the Workmen's Compensation Act of Ontario. Table 8 shows the operations of the Quebec Commission from Sept. 1, 1928 to Dec. 31, 1932.

Ontario.—Under the system operated by the Ontario Workmen's Compensation Board in Schedule 1, where the liability is collective, 24 classes of industries pay various percentages of their pay rolls annually to the Board and escape individual civil liability for accidents and certain specified industrial diseases. The percentage of pay roll collected by the Board is graded according to the degree of hazard in the

occupation and ranged in 1931 from 15 cents per \$100 of pay roll in blue-printing to \$10 per \$100 in wrecking of buildings, erection of high metal chimneys, etc., and aerial testing. The average for all classes was \$1.18 per \$100 of pay rolls which amounted to \$389,740,000. Certain other industries under schedule 2, including municipal undertakings, railways, car shops, telegraphs, telephones, etc., are made individually liable to pay the rates of compensation fixed under the Act. Employees of the Dominion or of the province, killed or injured in the discharge of their duty, are by special legislation placed on the same footing as those of private employers of the second class.

Statistics of the benefits awarded and the accidents to workers reported during the first 18 years of the operation of the Act appear in Table 9; 43,904 accidents were paid for during the year 1932 including: 283 cases of death, 33 of permanent total disability, 2,417 of permanent partial disability, 22,998 of temporary disability and 18,173 in which medical aid only was provided. These latter are all under Schedule 1, as medical aid in Schedule 2 cases and Crown cases is furnished directly by the employer.

¹ No provision for medical aid.

² Half year only.

Manitoba.—Under the Workmen's Compensation Act, effective Mar. 1, 1917, Part 1 of the Act, dealing with workmen in hazardous occupations, is administered by The Workmen's Compensation Board, which charges insurance rates according to the hazard of the industry, the sums received by the workman being in lieu of the rights of action previously existing. The province, the city of Winnipeg, and certain corporations operating public utilities are permitted by the law to practise self-insurance.

From the date of the coming into force of the Act to Dec. 31, 1931, the Board dealt with 81,593 compensable accidents and paid out \$10,447,463 for compensation and medical aid. Of the accidents in 1931, 3,132 involved medical aid costs only, 3,310 involved temporary and 196 permanent disability, while 33 resulted in death (Table 10).

Saskatchewan.—The Workmen's Compensation (Accident Fund) Act became fully effective July 1, 1930, and covers practically all employees in the province except railway employees engaged in the running trades, casual workers, farm and ranch labourers, domestic and menial servants, janitors, retail store employees, and persons who cannot be classed as workmen.

The Act is administered by a board of three and imposes compulsory collective liability on the employers covered. The schedule of benefits is similar to that provided by other Compensation Acts. Table 11 shows the number of accidents and benefits paid to the end of 1932.

¹ Six months.

Alberta.—The Workmen's Compensation Act of 1918 became effective Aug. 1, 1918, as regards mining, and Jan. 1, 1919, in respect of almost all industries except agriculture, railroading and the operation of retail stores and offices. Railroading (except for the running trades) was brought within the scope of the Act in 1919, and a further amendment in 1928 left only conductors and trainmen exempt from the operations of the Act.

Table 12 shows the operations of the Board for the calendar years 1921 to 1932. Of the 10,049 accidents reported in 1931, 33 were fatal and 123 resulted in some permanent injury. Similar details for the 1932 figures are not available. The amounts shown below do not include sums transferred to the pension fund, which had assets amounting to \$2,575,025 on Dec. 31, 1931, nor do they include administration expenses nor sums set aside to cover estimated liabilities.

British Columbia.—The Workmen's Compensation Act, effective Jan. 1, 1917, provides compulsory accident insurance in almost every industrial occupation carried on in the province, protecting in 1931 approximately 150,000 employees with a pay roll of almost \$150,000,000. Insurance rates levied against employees are graded according to the hazard of the industry. All employers under the Act are required in addition to deduct one cent per day or part thereof from the wages of employees and to remit this money to the Board to the credit of the medical aid fund, which provides all necessary medical and surgical and hospital expenses for injured employees. For figures see Table 13.

Section 8.—Strikes and Lockouts.

Statistics of strikes and lockouts in Canada have been collected by the Dominion Department of Labour since its establishment in 1900. Table 14 shows the number of disputes, the number of employees involved in disputes, and the time loss in working days for each year from 1901 to 1932 and the totals for the period. The items in the columns headed "time loss in working days" in the tables following are calculated by multiplying the number of persons directly involved in strikes and lockouts by the number of working days they are so affected during the time the disputes are in existence. Tables 15 and 16 give detailed analyses, by provinces and by industries, for 1931 and 1932.

Summary tables of the figures with details as to strikes and lockouts during 1932 may be found in the *Labour Gazette* for February, 1933, pp. 132-151.

Industrial Disputes in Recent Years.—In each of the years since 1925, until 1932, the time loss in "man working days" from strikes and lockouts was less than in any year since 1916 and less than in most of the years back to 1901, when the record was begun. This was chiefly because there were no coal mining disputes involving large numbers of workers for relatively long periods of time. In 1932 there was a considerable number of disputes in coal mining, some involving large numbers of employees for relatively long periods. The number of strikes and lockouts in existence in 1932 was 116, as compared with 88 in 1931, but the number of employees involved was 23,390 in 1932; this was greater than in any year since 1926. Table 14 includes figures as to coal mining and industries other than coal mining.

¹Figures for disputes extending over the end of a year are here counted more than once.

Table 15 is a record of industrial disputes, by provinces, for the years 1931 and 1932. In 1931, the chief time loss was in British Columbia where strikes of some magnitude occurred involving sawmill workers employed by firms operating on the Pacific coast and where masters, mates and marine engineers were involved in a prolonged dispute. A large time loss, however, was recorded in Ontario also, due chiefly to strikes of clothing factory workers in Toronto. In 1932 the chief time loss was in Alberta, due to strikes of coal miners; in British Columbia, chiefly in sawmills; and in Ontario owing to a number of strikes of loggers in the northern part and of fur workers in Toronto.

Totals	88	16,738	204,238	100.0	116	23,390	255,000	100.0

¹Including strikes of unemployed men on relief work, receiving wages, not maintenance—in 1931: Nova Scotia, 1 dispute involving 12 workers, 12 days' time loss; Alberta, 1 dispute, 30 workers, 30 days' time loss; British Columbia, 5 disputes, 795 workers, 4,520 days' time loss; in 1932: Quebec, 2 disputes involving 950 workers, 3,125 days' time loss.

Table 16 shows strikes and lockouts by industries during 1931 and 1932, the most important during 1931 occurring in clothing, manufacturing, sawmilling, printing and publishing, water transportation, mining and fishing; in 1932 most of the important disputes occurred in coal mining, fishing, manufacturing (clothing and furs), and in logging and sawmilling.

¹Includes non-ferrous metal smelting.

²Covers the erection of all large bridges.

³Does not include undertakings mainly public utilities.

⁴Includes water services.

Causes and Results of Industrial Disputes.—During 1931 and 1932, as in previous years, most of the disputes were in regard to wages, or wages and working conditions, but a large proportion of disputes (and these included some of the most important) were in regard to trade unionism, usually concerned with union wages and working conditions, including recognition of unions, closed shop, etc. As in previous years many of the disputes during 1931 and 1932 were settled by negotiation; in 1932, out of a total of 113 disputes terminated during the year 53 settlements resulted from negotiation. An appreciable number of disputes terminated in the return of strikers or by their replacement, 44 being thus terminated in 1932.

Section 9.—Employment and Unemployment.

Subsection 1.—Operations of the Employment Service of Canada.

Employment Service of Canada.—Under sec. 3 of The Employment Offices Co-ordination Act (c. 57, R.S.C., 1927), an Act passed by the Dominion Parliament in May, 1918, the Minister of Labour is empowered:—

"(a) to aid and encourage the organization and co-ordination of employment offices and to promote uniformity of methods among them;

"(b) to establish one or more clearing houses for the interchange of information between employment offices concerning the transfer of labour and other matters;

"(c) to compile and distribute information received from employment offices and from other sources regarding prevailing conditions of employment"

The Act further provides that certain sums of money are to be appropriated annually and paid to the provinces on a basis proportionate to the amount that each expends on the maintenance of employment offices.

The desired uniformity and co-ordination of employment office activities throughout the various provinces are obtained by having the Dominion's payments contingent upon an agreement ensuring that the provinces, in the conduct of their employment offices, shall endeavour to fill situations in all trades and occupations for both men and women, and that no charge shall be made to employers or employees for this service. Each province agrees to maintain a provincial clearance system in co-operation with the interprovincial clearance system established by the Dominion Government, in order to secure the necessary mobility of labour as between localities in the same province or in different provinces. For the fiscal year 1932-33, agreements were concluded with all of the provinces except Prince Edward Island. Thus is formed the Employment Service of Canada—a chain of employment offices reaching from Halifax to Vancouver. At the time the Act came into force only 12 provincial employment offices were operated in Canada. This number was steadily increased until, at the close of 1919, due to the impetus given by the Employment Offices Co-ordination Act together with the requirements of the demobilization period, offices were functioning at 84 different centres. Subsequent contractions have reduced the Service to offices permanently located at 66 centres (on Dec. 31, 1932), distributed by provinces as follows: Nova Scotia, 3; New Brunswick, 3; Quebec, 7; Ontario, 27; Manitoba, 4; Saskatchewan, 9; Alberta, 5; and British Columbia, 8.

Employment Service Council of Canada.—An Order in Council, issued in 1918 in pursuance of the Act, provided for the formation of a body to be advisory to the Minister of Labour in the administration thereof. This body, known as the Employment Service Council of Canada, is composed of representatives of the Dominion Departments of Labour and Pensions and National Health, the Provincial Governments, the Canadian Manufacturers' Association, the Canadian Construction Association, the Trades and Labour Congress of Canada, the Railway Association of Canada, the Railway Brotherhoods, the Canadian Lumbermen's Association, the Canadian Council of Agriculture and the returned soldiers. At the eleven meetings of the Council, the most recent of which was held on Aug. 21-22, 1930, various recommendations and suggestions relative to employment office administration were brought forward and presented to the Minister.

Operations of Employment Offices.—Statistics covering the work of the local offices are collected and tabulated by the Employment Service Branch of the Department of Labour. Table 17 shows the positions available, applications for work and placements effected by the Service in each year since 1920 for the Dominion, and for the years 1931 and 1932 by provinces. During 1932 there were 652,428 applications for employment, 366,028 vacancies and 352,214 placements recorded, as compared with 826,153 applications, 486,384 vacancies and 471,508 placements in 1931. In 1932, 25 p.c. fewer placements were effected than in 1931. Slightly more than one-half the total placements were of a casual nature, many of these being the result of work given on a rotation basis by municipalities and provincial governments on various relief schemes throughout the year to persons who, otherwise, would have been unemployed. All provinces, except Nova Scotia, New Brunswick, Quebec and Saskatchewan, showed declines in placements, the largest decline being in Ontario and the greatest gain in Saskatchewan. Construction and maintenance showed the greatest loss of any industrial division and farming the largest gain, this increase being due to the placement of men on farms under the Farm Relief Act.

Reduced Railway Fares.—In order to facilitate the movement of labour in cases where there were not enough workers in any one locality to fill the available vacancies, the Employment Service, by special arrangement with nearly all the members of the Canadian Passenger Association, has been granted the privilege of issuing certificates which entitle the bearers to purchase railway tickets at the reduced rate of 2.7 cents per mile. This rate is for a second class ticket and is applicable only to fares of not less than \$4. During 1931, 5,541 certificates were issued, 4,949 to persons proceeding to points within the same province as the despatching office and 592 to workers going to points in other provinces. During 1932, 3,669 certificates for special rates were granted, 2,945 to persons travelling to employment within the same province as the despatching office and 724 to persons for whom employment had been secured in other provinces.

¹Figures by provinces and years for 1920-25 will be found at p. 703 of the 1926 Year Book, for 1926-28 at p. 731 of the 1930 Year Book, and for 1929-30 at p. 773 of the 1931 Year Book.

Subsection 2.—Unemployment as Reported by Trade Unions.

Monthly statistics on unemployment are compiled and published by the Employment Service Branch of the Dominion Department of Labour, based on returns received from 1,800 local trade unions having an aggregate membership of nearly 175,000 workers. "Unemployment" as here used means involuntary idleness, due to economic causes. Persons engaged in work other than their own trades, or idle because of illness, are not considered as unemployed, while unions involved in industrial disputes are excluded from the tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentages of unemployment are based, it should be understood that the figures for each month have reference only to the reporting organizations. Table 18 is a record of unemployment in trade unions, for the past 18 years, by provinces. The maximum of unemployment in 1932 was in December, when the percentage stood at 25.5; in 1931 the December figure of 21.1 p.c. constituted the maximum. In 1931 the minimum, reached in April, was 14.9 p.c., while the 1932 low was 20.4 p.c. recorded in both March and September. Employment among organized workers, as indicated by these statistics, was less active on the average in 1932 than 1931, the average of the monthly figures of unemployment for 1932 being 22.0 p.c., while for 1931 the corresponding figure was 16.8 p.c.

**18.—Percentages of Unemployment in Trade Unions, by Provinces,
half-yearly, 1915-31, and by months, 1932.**

NOTE.—For the percentages of unemployment for 12 months in 1921 and 1922, see p. 732 of the 1922-23 Year Book; for 12 months in 1923, p. 688 of the 1924 Year Book; for 12 months in 1924, p. 700 of the 1925 Year Book; for 12 months in 1925, p. 704 of the 1926 Year Book; for 12 months in 1926, p. 757 of the 1927-28 Year Book; for 12 months in 1927, p. 745 of the 1929 Year Book; for 12 months in 1928 and 1929, p. 733 of the 1930 Year Book; for 12 months in 1930, p. 774 of the 1931 Year Book, and for 12 months in 1931, p. 651 of the 1932 Year Book.

Subsection 3.—Employment as Reported by Employers.

The Dominion Bureau of Statistics tabulates monthly reports of the numbers employed by firms having 15 or more persons on their staffs; the returns are representative of practically every industry except agriculture and the more specialized business and professional callings. During 1932 about 7,900 of these employers reported an average working force of 801,356 persons, varying from 835,960 on Jan. 1 to 765,441 at the beginning of December. In Canada, as in other parts of the world, industrial employment continued slack during 1932, activity generally being at a lower level than in any other year since 1922. An important factor in this connection was the substitution of a policy of direct relief for the unemployed for the former one of large public works, the extent to which this has effected the index number being indicated by the fact that the number of man-days worked on state-aided projects was 11,135,334 in 1931 and 7,630,109 in 1932. These figures apply to those projects where the work was carried out on a wage basis; in addition, there were a large number of man-days worked where the work was on a subsistence basis.

The trend was generally downward from the opening of 1932 to the close of the year, the slight gains recorded on June 1 and Oct. 1 being immediately followed by sharp recessions. The following chart illustrates the trend of employment generally over the latest seven years.

Employment by Economic Areas.—The five economic areas reported curtailment in employment during 1932. The index, based upon the 1926 average as 100, was maintained at a higher level in the Maritime and Prairie Provinces than elsewhere, but even in those areas the falling-off from 1931 and earlier years of the record was considerable. Firms in Ontario, on the other hand, reported a

smaller proportional reduction as compared with the preceding year than was the case in any other of the economic areas. Table 19 is a record of employment in the five economic areas, by months, in 1931 and 1932, with averages for preceding years since 1921.

19.—Index Numbers of Employment as Reported by Employers in Economic Areas, as at the First of each Month, January, 1931, to December, 1932, with Yearly Averages since 1921.

Note.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated economic area to the total reported by all employers making returns in Canada on Dec. 1, 1932.

Relative weight of employment in economic areas as at Dec. 1, 1932 ²	7.6	29.3	41.2	14.1	7.8	100.0

¹Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here given for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100. ²Percentages of Dominion total.

Employment in Cities.—Separate tabulations are made for the eight leading industrial centres: Montreal, Quebec, Toronto, Ottawa, Hamilton, Windsor and the adjoining "Border Cities", Winnipeg and Vancouver. These cities recorded on the whole a lower level of activity than in 1931. The reports show that employment was generally brisker in Ottawa and Quebec than in the other centres enumerated, while the lowest indexes were reported in Hamilton and Windsor and the adjoining Border Cities. Table 20 gives monthly indexes in the cities in 1931 and 1932, with yearly averages since 1922.

20.—Index Numbers of Employment as Reported by Employers in Leading Cities, as at the First of each Month, January, 1931, to December, 1932, with Yearly Averages since 1922.

NOTE.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated city to the total reported by all employers making returns in Canada on Dec. 1, 1932.

¹Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here shown for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100. ²Includes adjacent "Border Cities". ³Percentages of Dominion total.

Employment by Industries.—Employment in all industries was in smaller volume than in 1931. Within the manufacturing industries, only the tobacco, leather, hosiery and knitting, woollen and silk groups showed improvement in this comparison. The declines in the animal food, lumber, pulp and paper, rubber, textile, iron and steel, non-ferrous metal and mineral product industries, however, were on a smaller scale than those reported in 1931, as compared with 1930. Table 21 gives index numbers of employment by main industrial groups.

21.—Index Numbers of Employment as Reported by Employers, by Industrial Groups, as at the First of each Month, January, 1931, to December, 1932, with Yearly Averages since 1921.

Note.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated industry to the total reported by all employers making returns in Canada on Dec. 1, 1932.

Subsection 4.—Unemployment Relief.

The Unemployment Relief Act of 1930, effective in September of that year, covered expenditures for carrying on public works and giving direct relief to relieve unemployment until August, 1931. Under the provisions of this Act, the Dominion Government contributed \$14,396,957 to public works, and \$3,556,811 to direct relief. The total cost of administration was \$43,062 and the total expenditure by the Dominion Government \$17,996,830. This expenditure resulted in public works, etc., being carried on to the value of approximately \$69,000,000, including contributions of provinces and municipalities. The direct relief expenditures by the Dominion, provinces and municipalities, totalled about \$11,000,000. The carrying on of the work under the provisions of the 1930 Act afforded work to 337,633 individuals for varying periods, the amount of work thus afforded being 7,481,449 man-days.

In August, 1931, the Unemployment and Farm Relief Act, 1931, became effective and contributions were made for the relief of unemployment under this Act until Mar. 1, 1932, and under the Continuance Act of 1932, operations under the 1931 Act were continued until May 1, 1932. Under the 1931 Act, the Dominion Government agreed to contribute the sum of \$33,990,172 towards the carrying on of works by the provinces, municipalities, and the Dominion departments, for the relief of unemployment, the total cost of such works being approximately \$81,000,000. Some of this work was not finished at the expiration of the agreements on May 1, 1932, but extensions of time were arranged to different dates extending to the end of 1932, the gross cost of the works thus extended being approximately \$14,778,000. For direct relief the expenditures of the Dominion Government, under the 1931 Act, amounted to \$11,643,306 at Dec. 31, 1932. This included \$5,288,085 apportioned to the Saskatchewan Relief Commission. Expenditures for public works gave employment to 582,641 individuals to the end of November, 1932, the total wages paid being \$39,311,188 and a total of 13,251,601 man-days work being afforded.

After a survey of employment conditions in the shops of the Canadian National Railways, it was decided to maintain operations so as to permit of intermittent employment being given to a large number of employees. In September, 1931, the Canadian Pacific Railway Company was compelled to shut down its shops and upon application being made to the Government for assistance, it was arranged with the Company that its shops should be opened on Nov. 17, 1931, and kept open until Dec. 31 of the same year, the Government paying the wages of workers employed in the said shops. The Railway Company, however, was to reimburse the Government for expenditures so made, without interest, when the earnings of the Company enabled it to resume payment of dividends at more than the rate of 5 p.c. per annum. The total number of railway shop employees thus given employment was 8,455, the wages involved totalling \$1,447,222. The cost of administration under 1931 legislation was \$84,488.

The Relief Act of 1932.—The Relief Act, 1932, received assent on May 13, 1932. Under this Act agreements have been completed with all the provinces, except Prince Edward Island, providing for a Dominion non-recoverable expenditure of one-third of an amount not to exceed \$600 per family for the purpose of

providing a measure of self-sustaining relief to families who would otherwise be in receipt of direct relief, by placing such families on the land. It is provided that the remaining two-thirds of the expenditure will be contributed by the province and the municipality concerned.

The settlement this year represents only the beginning of the movement, as the agreements with the provinces cover a period of two years and do not expire until Mar. 31, 1934, but a recent report of progress received from the provinces indicates that 1,650 families have been approved, these families having approximately 6,859 dependants.

The Dominion Government has continued to contribute on the same basis as under the 1931 Act to direct relief accounts received from the provinces, or from the municipalities through the provinces, and has also agreed to contribute 50 p.c. to the cost of operating board camps wherein the unemployed may be cared for and given useful work to do in return for subsistence and a small cash allowance. Under the 1932 Act, accounts have been received and paid for direct relief amounting to \$3,953,052.

Agreements have been entered into with the four western provinces whereby the Dominion pays 100 p.c. of the cost of providing food, fuel, clothing and shelter to single homeless unemployed persons at a cost not exceeding 40 cents per diem. The agreements also provide for the placement of single homeless persons on farms at \$5 per month payable by the Dominion. The agreements are effective from Nov. 1 and 15, 1932, but to date no statement of expenditures has been received. At Nov. 30 the Commissions administering relief to single homeless persons reported the following numbers being taken care of under the arrangements: Manitoba, 5,398; Saskatchewan, 2,901; Alberta, 5,993; British Columbia, 12,854.

The total advances made to the Saskatchewan Relief Commission as at Dec. 31, 1932, for relief purposes, and not including advances made for the purchase of seed grain or for seeding operations, amounted to \$10,250,000 (\$5,250,000 under the 1931 Act, and \$5,000,000 under the 1932 Act). Up to the same date the Relief Commission had furnished the Department of Labour with certificates approved by the provincial authorities covering expenditures chargeable to the Dominion to the extent of \$8,188,188. Up to Nov. 30, 1932, 60,000 families with 270,000 dependants had been given relief by the Relief Commission. In addition, aid was given to 827 individual cases, the total number given relief being 330,827. The cost of administration under the 1932 legislation to Dec. 31, 1932, was \$49,750.

Subsection 5.—Employment and Unemployment Statistics of the Census.

The group of "wage earners" is one of three into which the "gainfully occupied" population is divided at the census. The other two are described as "employers" and as workers "on own account", respectively, the workers "on own account" including such classes as farmers, country blacksmiths, small storekeepers, doctors, lawyers and others who give their own time and labour to their occupation, and do not

employ others therein. The "wage earners" are much the largest of the three groups, and, as defined by the census, include each and every person "who works for salary or wages, whether he be the general manager of a bank, railway or manufacturing establishment or a day labourer"

At the census of June 1, 1931, a comprehensive investigation was made of the problem of "unemployment" among the wage earners of Canada. In the first place, every wage earner in the country was asked whether or not he was at work on the date of the census, Monday, June 1, 1931, and those who answered in the negative were further asked the reason for not being at work on the above date, the reasons to be stated under such headings as "no job", "temporary lay-off", "strike or lock-out", "illness", "accident", etc. This investigation was made in order to get a clear and sharply defined conspectus of the employment situation at a particular point of time.

In the second place, every wage earner in the country was asked to state how many weeks he had been out of work during the twelve months preceding the date of the census—that is, how many weeks he had been out of work between June 1, 1930 and June 1, 1931, together with the number of weeks out of work for each of the specified causes, "no job", "temporary lay-off", "illness", "accident", "strike or lockout", "other causes". A comprehensive analysis of the information secured under this second heading, classified by occupation, birthplace, citizenship, etc., is in progress.

Wage Earners at Work and not at Work on June 1, 1931.—The grand total number of persons in the Dominion coming within the census definition of "wage earners" was 2,564,879 at the date of the census. Of this total, 2,093,211 or 81.39 p.c. were actually at work on that date, while 471,668 or 18.61 p.c. were not then at work. In other words, out of every 10,000 wage earners in the Dominion 8,139 were at work and 1,861 were not at work on June 1, 1931. Of those not at work, 392,809 stated the reason as "no job". In the consideration of this figure it has to be remembered that even in times of great industrial activity there are always many thousands of workers "between jobs", while many thousands more are casual labourers, who may have "no jobs" to-day but may be employed to-morrow. This figure of 392,809, being 15.32 p.c. of all the wage earners of the Dominion, or 1,532 out of every 10,000, may be regarded as giving the number of "the unemployed", in the ordinary meaning of the term, as at the date of the census. Approximately five out of every six who were not at work on June 1, 1931, gave the reason as "no job".

The other reasons advanced by wage earners for not having been at work on June 1, 1931, were of less importance. The considerable total of 42,443 reported that they were not at work owing to "temporary lay-off". This number, however, was only 1.66 p.c. of the wage earners of the Dominion or one out of every sixty. Further, these wage earners had a job to go back to, so that their position was quite different from that of those reporting "no job". "Strike or lockout" was

given as the reason for not being at work on June 1 in only 379 cases, so that only about one out of every 7,000 wage earners in the country was not at work as the result of an industrial dispute—an excellent record in the circumstances.

Personal reasons were assigned by those not at work on June 1, 1931, in 30,177 cases, including 25,718 cases of illness and 4,459 cases of accident. The 25,718 constitute about one per cent of the grand total number of wage earners in the country, and this might be taken to indicate that the average toll taken by illness among our wage-earning population is about one per cent of normal full time or about three days in the working year. "Accident" cases were responsible for about one-sixth of one per cent of the wage earners not being at work on the date of the census—one person out of every six hundred. Thus "accident" would appear to be a minor cause of loss of time, averaging half a day per wage earner per annum.

When the distinction of sex is made, it is at once observed that the females "not at work" on June 1, 1931, are a much smaller percentage of the total female wage earners than the males "not at work" are of the total male wage earners. Out of 2,017,606 male wage earners in Canada on the date of the census, 1,594,612 or 79.03 p.c. of the total were at work and 422,994 or 20.97 p.c. were not at work. On the other hand, out of a total of 547,273 female wage earners in Canada at the date of the census, 498,599 or 91.11 p.c. were at work and only 48,674 or 8.89 p.c. were not at work. Thus the percentage "not at work" among male wage earners was considerably more than twice as large as among female wage earners.

If the wage earners with "no job"—the really "unemployed"—at the date of the census are compared the same conclusion is reached. Out of 2,017,606 male wage earners resident in Canada at the date of the census, 356,549 or 17.68 p.c., or rather more than one-sixth, had "no job" i.e., were unemployed at the date of the census. Out of 547,273 female wage earners, however, only 36,260 or 6.63 p.c. of the total had "no job". In other words, one out of every six male wage earners and one out of every fifteen female wage earners was unemployed at the date of the census.

Reasons other than "no job" were given for not being at work on June 1, 1931, by 3.29 p.c. of all male wage earners and by 2.26 p.c. of all female wage earners. Among these reasons "temporary lay-off" accounted for 1.83 p.c. of all male wage earners and 1.00 p.c. of all female wage earners not being at work on the date of the census. Again, "strike or lockout" accounted for the absence from work of 353 males and of only 26 females.

Among the personal reasons for not being at work, "illness" bulked equally large among male and among female wage earners, 1.00 p.c. of each sex being not at work on June 1, 1931, for this reason. On the other hand, the greater hazards to which males are subjected in the course of their employment and outside of it are shown by the fact that 0.21 p.c. of all male wage earners and only 0.04 p.c. of all female wage earners were not at work on June 1, 1931, as a result of accidents.

22.—Wage Earners of Canada at Work and Not at Work on Monday, June 1, 1931, by Sex and Province, with Reasons Given by those Not at Work. (Preliminary figures.)

Employment and Unemployment in the Twelve Months Preceding the Census.—The total number of wage earners in Canada, at the date of the census, was 2,566,001, of whom 2,018,334 or 78·66 p.c. were males and 547,667 or 21·34 p.c. were females. The number losing some time during the period June 1, 1930 to June 1, 1931, was 1,027,749 or 40·05 p.c. of all wage earners. Among male wage earners 889,731 or 44·08 p.c. of the total lost some time, while 138,018 or 25·20 p.c. of the female wage earners showed some unemployment. The aggregate time loss was 24,508,710 weeks, of which 21,601,757 weeks or 88·14 p.c. represented unemployment among males, and 2,906,953 weeks or 11·86 p.c. unemployment among females.

23.—Wage Earners 16 Years of Age and Over, by Sex, Showing Number Unemployed and Weeks Lost, by Sex, Province and Reason Given, census year ended June 1, 1931—continued on p. 780. (Preliminary figures).

Section 10.—Old Age Pensions.

The Old Age Pensions Act, 1927.—Legislation respecting Old Age Pensions (R.S.C., 1927, c. 156) was adopted by the Dominion Parliament in 1927. Under the provisions of this statute the Dominion Government reimbursed each province participating in the Dominion scheme to the extent of one-half of the provincial expenditure for old age pensions. An amendment passed at the 1931 session of Parliament (c. 42, Statutes of 1931) provided that the Dominion contribution to the provinces be increased from 50 p.c. to 75 p.c. of the provincial disbursements for old age pensions pursuant to a provincial statute authorizing and providing for the payment of such pensions to the persons and under the conditions specified in the Act and the Regulations made thereunder. Following the enactment of the amendment to the Dominion Act, the Dominion Old Age Pensions Regulations were revised and agreements negotiated with the provinces whereby the Dominion contribution of 75 p.c. of provincial disbursements was made effective from Nov. 1, 1931; the provinces have since been reimbursed on this basis.

Sec. 5 of the Act provides that before any such agreement is made with the province, the scheme for the administration of pensions proposed to be adopted by the province shall be approved by the Governor in Council, and that no change in such scheme shall be made without the consent of the Governor in Council.

Sec. 8 reads as follows:—

(1) Provision shall be made for the payment of a pension to every person who, at the date of the proposed commencement of the pension:—

- (a) is a British subject, or, being a widow, was such before her marriage;
 - (b) has attained the age of seventy years;
 - (c) has resided in Canada for the twenty years immediately preceding the date aforesaid;
 - (d) has resided in the province in which the application for pension is made for the five years immediately preceding the said date;
 - (e) is not an Indian as defined by the Indian Act;
 - (f) is not in receipt of an income of as much as three hundred and sixty-five dollars (\$365) a year, and
 - (g) has not made any voluntary assignment or transfer of property for the purpose of qualifying for a pension.
- (2) The receipt of a pension shall not by itself constitute a disqualification from voting at any provincial or municipal election.

Sec. 9 provides that the maximum pension payable shall be \$240 yearly, subject to reduction by the amount of the income of the pensioner in excess of \$125 a year. The pension authority may accept a transfer of the pensioner's interest in a dwelling house in which he resides, in which case the value of the dwelling will not be computed in calculating the amount of pension payable. The pension authority is entitled to recover out of the estate of any deceased pensioner the amount of pension payments with interest at 5 p.c., subject to the limitation that no claim shall be made for such recovery out of any part of the estate which passes by will or intestacy to any other pensioner or to any other person who has contributed, since the grant of the pension or for the last three years during which the pension has been paid, to the pensioner's support.

Secs. 10, 12, 13 and 14 provide for the distribution of the pension burden among the provinces where the pensioner has resided during the 20 years immediately preceding the grant of the pension. Sec. 11 provides for a reduction of pension where a pensioner has resided for a portion of the 20 years in a province with which no agreement is in force. Sec. 15 provides for a suspension of the pension where a pensioner has transferred his residence to some place out of Canada. It is provided by Sec. 16 that a pension shall not be subject to alienation or transfer by the pensioner or to seizure in satisfaction of any claim against him.

The Governor in Council was empowered by Sec. 19 of the Act to make Regulations pursuant to this section. Existing Regulations were revised and approved by an Order in Council dated Feb. 1, 1932.

During 1932 no additional provinces availed themselves of the provisions of the Dominion Act, and old age pensions continued to be paid in the provinces of Alberta, British Columbia, Manitoba, Ontario and Saskatchewan, and in the Northwest Territories. The New Brunswick Legislature, at its 1930 session, passed an Old Age Pensions Act, while similar legislation was enacted in 1931 by the provinces of Nova Scotia and Prince Edward Island, each Act to come into force on a day to be fixed by proclamation. The Gold Commissioner of Yukon was given authority, by a Yukon Territorial Council Ordinance passed in 1927, to enter into an agreement with the Dominion Government for the purpose of obtaining the benefit of the Old Age Pensions Act for residents in the territory. No proposed scheme of administration for adoption in Yukon has been submitted for the approval of the Governor in Council. An Act was assented to by the Quebec Legislature in 1930 providing for the creation of a commission to study a system

of social insurance for the province. On Oct. 30, 1930, a commission of seven members was appointed to study, among other matters, the subject of old age insurance. The fifth report of the commission, published in November, 1932, contained its findings on the subject of old age insurance. The majority report of the commission declared in favour of "a contributory and obligatory system of old age insurance", but that, pending the establishment of such a system, recommendation is made that "the Province of Quebec should at the earliest possible opportunity accept, as a temporary and transitory measure, the establishment here of the system of old age pensions now sanctioned by the Dominion law". At present Quebec is the only province which has not enacted old age pensions legislation and, under the terms of the Dominion Act, is therefore ineligible to enter into agreement with the Dominion Government to obtain the benefit of the provisions of the Dominion Act.

The percentage of old age pensioners born in Canada to all such pensioners was 62 and that of pensioners born in the British Isles 24, so that 86 p.c. of those receiving old age pensions in Canada were born either in Canada or in the British Isles. Pensioners born in the United States represented 3 p.c. of the total number of pensioners. Statistics showing the countries of origin, conjugal condition and previous residence in provinces other than that in which the pension was being drawn, were given at pp. 662-663 of the 1932 edition of the Year Book for the calendar year 1931. Table 24 is a financial summary of old age pensions in Canada as at the end of the calendar year 1932.

Section 11.—The Co-operative Movement in Canada.

A general article on "The Co-operative Movement in Canada" appeared at pp. 704-720 of the 1925 edition of the Year Book under the three sub-headings of "Consumers' Co-operation", "Co-operative Credit", and "Producers' Co-operation".¹ Because of the pressure upon space, this article is not reprinted here, but a digest of the latest available material on each of these three sub-divisions of co-operation follows.

Subsection 1.—Consumers' Co-operation.

The co-operative store was first introduced into Canada by miners who had had experience of co-operation in Great Britain. The first co-operative store was opened at Stellarton, N.S., in 1861, and continued to do business until 1916. Many similar ventures were afterwards commenced, but a considerable number failed through their neglect to build up adequate reserve funds. In 1909 the Co-operative Union of Canada was formed, with six affiliated societies and 1,595 members; since October, 1909, it has published a monthly, *The Canadian Co-operator*, from which the following statistics (Table 25) showing the growth of consumers' co-operation in the societies affiliated with the Co-operative Union have been taken.²

25.—Statistics of Co-operative Societies Affiliated with the Co-operative Union of Canada, 1909-31.

NOTE.—No data for the year 1916.

¹ The decrease in membership is accounted for by the withdrawal of the United Farmers of Canada, Saskatchewan Section, Ltd., and the United Grain Growers, Ltd., the non-inclusion of the latter society being also mainly responsible for the decreases in the figures shown in the remaining columns.

The progress shown by the returns from the societies affiliated with the Co-operative Union does not represent the whole growth of the consumers' co-operative movement in Canada. Although the societies affiliated with the Co-operative Union are among the oldest and best established, there is a larger number of con-

¹ The article referred to above was prepared for the Year Book by Miss Margaret Mackintosh, M.A., of the Department of Labour, Ottawa.

² For details regarding the Co-operative Union of Canada and its activities, see the 1925 Year Book, pp. 708-709.

sumers' co-operative societies outside the Union than within it, the great majority of these being in the western provinces. In 1926, the Manitoba Co-operative League was organized to link up the co-operative societies in that province, and a similar organization was formed in Alberta in 1923. In Saskatchewan a conference of representatives of co-operative societies has been held annually since 1923.

The following table shows the number of co-operative societies in the Dominion, provincially arranged by groups, together with their respective memberships:—

Subsection 2.—Co-operative Credit in Quebec.

A form of co-operation which has achieved great success is that which provides short-term credit for small farmers and industrial workers in the province of Quebec. In 1900, what are known as "Les Caisses Populaires", or People's Banks, were begun with the establishment, by the late Alphonse Desjardins, of La Caisse Populaire at Lévis. M. Desjardins adopted the principles of lending money only for approved purposes to carefully selected members in a restricted area, of limited liability, of withdrawable shares of small amount payable by instalments, and of distribution of profits. These banks are for the most part established in agricultural districts. Loans are made to purchase agricultural implements at cash prices, to increase farm

live stock, to improve farm buildings, to tide over a period of depression, to pay off a merchant and for various similar purposes. The loans, though comprised within the term "short credit", are for longer periods than are usual in ordinary commercial transactions because agricultural operations necessarily extend over longer periods than those of trade. They may be for 12, 15, or even 24 months, because they must give time for the farmer to realize on his products.

At present these banks are organized under the Quebec Syndicates Act, 1906. The value of the shares is generally \$5, which may be paid in instalments. The liability of the shareholders is limited to the value of their shares, which generally does not exceed \$2,000 per shareholder. Shareholders and borrowers must reside within the area of the bank's field of operations, except that under the by-laws shareholders who remove from the locality may continue their holdings in the bank but without participation in the management by holding office. Larger loans are made upon mortgage and the smaller ones upon notes, but interest and a portion of the loan capital must be repaid at fixed periods in such a way as to extinguish the debt within a determinate time. Each bank is administered by a board of from five to nine members. A credit committee of at least three members passes on the loans requested by shareholders, and a board of supervision of three members checks loans and value of securities, and audits the accounts. The members of these boards give their services gratuitously.

The following table (Table 27) exhibits the progress of the banks during the seventeen years 1915 to 1931. The table is compiled from statistics included in successive volumes of the Quebec Year Book.

27.—Progress of Co-operative People's Banks in Quebec, 1915-31.

Subsection 3.—Producers' Co-operation.¹

The chief co-operative organizations of producers in Canada, as was clearly shown in the article on co-operation published in the 1925 edition of the Year Book, are still engaged in agricultural operations, including the grain growers of the prairies, the dairy farmers of Ontario and Quebec, and the fruit and vegetable growers of Nova Scotia, Ontario and British Columbia. The largest co-operative organizations in Canada are found among the grain growers of the Prairie Provinces.

¹ See also pp. 712-720 of the 1925 Year Book, and pp. 711-713 of the 1926 Year Book, pp. 786-737 of the 1931 Year Book, and pp. 666-667 of the 1932 Year Book.

Agricultural Co-operation in Canada.¹—Co-operative organization forms an integral part of the economic fabric of Canadian agriculture and is practised extensively in every province in the Dominion. In size, the co-operatives range from local associations with a limited sphere of operation to large organizations of national importance. The smaller co-operatives generally function in connection with community affairs or in the purchasing of supplies, while the larger co-operatives are generally interested in the distributive trades, processing or purchasing or combining these functions.

The largest co-operatives are found in Western Canada and function in the distribution of farm products. In the Prairie Provinces are large co-operative elevator companies with a total membership of about 150,000, handling a large share of the western wheat crop. These organizations, Manitoba Pool Elevators Ltd., Saskatchewan Pool Elevators Ltd., and Alberta Pool Elevators Ltd., were formerly part of the wheat pool organization but during the past two years have operated independently as co-operative grain handling concerns. These organizations operate on the patronage dividend basis. In addition, the United Grain Growers Ltd., is a joint stock company, operating in the Prairie Provinces and largely owned by farmers.

In the live-stock industry the largest farmer-owned organization is the Canadian Live Stock Co-operative Ltd., with a membership of about 10,000. This company is in affiliation with interests in Eastern Canada and comprises about 324 local associations. The United Farmers' Co-operative Co. Ltd., of Ontario and the Quebec Federated Co-operative are also affiliated for the purpose of marketing live stock.

In the wool trade, co-operative effort is represented by the Canadian Co-operative Wool Growers, with affiliated organizations in eight provinces. This co-operative engages in the storing, grading and marketing of wool and allied products.

There are 113 co-operatives engaged in processing, manufacturing and marketing dairy products in Canada. The largest of these co-operatives is the Saskatchewan Co-operative Creameries with a membership of 39,000. Manitoba Co-operative Dairies and the Alberta Milk Pool are large organizations in this field each with a membership of over 6,000.

The Canadian Poultry Pool operates largely in Western Canada but has affiliated organizations in Eastern Canada. The Pool has a combined membership of about 26,000.

In addition to the foregoing co-operative organizations many other co-operative organizations are engaged in handling farm products or in co-operative purchasing. Among these may be mentioned the Ontario Farmers' Co-operative Co. Ltd., which operates creameries, handles live stock, field crops and engages in purchasing for its members. In addition there are co-operative organizations throughout Canada engaged in the marketing of fruit, potatoes, honey and other farm products. Space will not permit a thorough canvass of co-operative effort throughout Canada, but this brief outline will serve to show the important place which co-operation occupies in the agricultural industry of Canada.

¹ Prepared under the direction of Dr. T. W. Grindley, Chief of the Agricultural Branch, Dominion Bureau of Statistics.

Section 12.—Labour Legislation in Canada.

A summary of Dominion and provincial labour laws in force at the end of 1928 was given in the Canada Year Book for 1929 at pp. 755-762, together with a note on the division of legislative jurisdiction as between the Dominion and the provinces. Summaries of legislation enacted in 1929, 1930 and 1931, were published in the Year Book for those years.

Labour laws enacted during 1932 by the Parliament of Canada and the Legislatures of the several provinces are contained in the Report on Labour Legislation in Canada, 1932, issued by the Department of Labour. The principal enactments of that year are summarized below.

Dominion Labour Legislation.—The Relief Act, 1932, authorizes the Governor in Council to enter into agreements with the provinces respecting relief measures and to pay out of the Consolidated Revenue Fund the sums necessary to meet obligations created by such agreements; to provide for special relief and works in the National Parks and in the drought-stricken areas of Saskatchewan; to assist in defraying the cost of the sale and distribution of natural products; to make loans to, and guarantee repayment of, money loaned to provinces or public corporations and undertakings; and generally to assist the provinces in the relief of distress.

The Unfair Competition Act, repealing those sections of the Trade Mark and Design Act which relate to trade marks, enacts provisions for the protection of trade marks, including trade union labels, in accordance with the Hague Convention of 1925.

Provincial Labour Legislation.—In Ontario and Quebec legislation was adopted making the Dominion Industrial Disputes Investigation Act applicable to disputes which are within the legislative jurisdiction of those provinces.

In Saskatchewan a number of amendments were made to the Mines Act, including a change of title to "The Coal Mines Safety and Welfare Act". A workman may not be employed above or below ground for more than eight hours per day except by mutual consent of employer and employee. Exception is made of employees in an office, boarding house or bunk house, in cases of emergency, at the weekly change of shift, and where continuous or technical work must be performed. The Minister may suspend the operation of those provisions in certain cases. Wages must be paid twice a month. An employee may authorize deductions for hospital dues, medical service or sickness fund by written order.

Certain sections of the Ontario Factory Shop and Office Building Act were made applicable to bake-shops and restaurants, including those regulating hours of labour, forbidding the employment of children under 14 years of age and of children under 16 years except on a school certificate, prescribing safety measures in connection with elevators and hoists, and forbidding the keeping of premises so as to endanger health or safety. Other changes in the Act were designed to bring such places as bowling alleys and shoe-shine parlours within its scope and to give better control of child labour in lumber yards, etc. The inspector may grant a permit for the operation of a factory by a double shift. In such cases hours of labour may not exceed eight for each shift nor sixteen for both shifts and the double shift must fall between the hours of 6 a.m. and 11 p.m. Women and young persons must be allowed at least one hour in each shift for a meal. The section permitting women and young persons to be employed in shops up to 10 p.m. on Saturday, the day

before a statutory holiday, and from Dec. 14 to 24, was amended to limit their hours of work to 10 per day and 60 per week. The section providing for inspection of houses where articles of clothing, etc., are being made under contract was extended to make similar provision for the manufacture of any household article. The Lieutenant-Governor in Council is authorized to make Regulations for the protection of workers in contact with benzol or other industrial poison.

In Prince Edward Island, the Electrical Inspection Act provides for the inspection and regulation of electrical installations.

By an amendment to the Shops Regulation Act of British Columbia, the working hours of children under 16 in shops were limited to 8 per day and 48 per week.

Sections added to the Highway Traffic Act of Manitoba empowered the Municipal and Public Utility Board to regulate the hours and rates of wages of employees of persons operating public service vehicles.

The Ontario Public Commercial Vehicle Act was amended to authorize the Lieutenant-Governor in Council to regulate hours of labour for drivers of such vehicles.

The scope of the Quebec Minimum Wage for Women Act was extended to include commercial establishments. Two members of the Minimum Wage Commission are to represent the female employees. The Commission was authorized to fix a special scale of wages for seasonal workers.

The Ontario Minimum Wage Act was amended to require employers to keep records of the names, addresses, rates of wages, hours of labour, actual earnings and actual time spent in work of all female employees, together with the ages of those under 18 years of age.

An amendment to the Alberta Child Welfare Act widened the term "neglected child" to include any girl, any boy under 12, or any boy between the ages of 12 and 14 who engages in any street trade unless he has the consent of his parent or guardian.

The Ontario Apprenticeship Act was amended to provide for an Apprenticeship Board of three members, in place of the tripartite committee established by the principal Act, and for the appointment of inspectors in addition to the Chief Inspector. The Board was authorized to make inquiries as to the opinions of employers and employees in the designated trades with regard to suggested changes in the Act and Regulations, and no changes may be made without written notice to the employers and employees concerned.

The New Brunswick Workmen's Compensation Act was revised and amended following the report of a commission appointed in 1931 to inquire into its operation. Clerical workers were brought within the scope of the Act. A clause was added which provides that where the accident arises out of employment, unless the contrary is shown, it shall be presumed to have occurred in the course of employment and *vice versa*. When a workman is engaged on work that is performed both within and without the province, the employer must include the workman on his pay roll submitted to the Board and notify the Board that he will be so engaged. Should the employer fail to do so, he is individually liable for compensation unless it can be claimed under the laws of the place where the accident happened. Application for compensation must now be made within six months, instead of one year, after the accident or within six months of death. "Medical aid" was extended to include artificial members and apparatus. The Board was authorized to expend up to \$15,000 per annum in order to rehabilitate injured workmen.

The Workmen's Compensation Acts of Alberta and Ontario were also amended following the reports of special bodies appointed to inquire into their operation. In Alberta the Workmen's Compensation Board was authorized to enter into agreements with the boards of other provinces to provide for compensation to workmen employed partly in Alberta and partly in another province. In the case of dependants or a workman suffering from permanent partial disability who wishes to reside outside Canada, the Board may, in lieu of commuting at the capitalized value of the payments, award such lesser sum as will in its opinion permit the same degree of comfort as full compensation in Alberta. Restaurants and retail shops were added to the establishments covered by the Act.

Changes in the Ontario Workmen's Compensation Act included the stipulation that in case of injuries to a minor unlawfully employed, the unlawful employment shall not affect the right of the claimant, and the employer may be made individually liable for the payment of compensation. Dental treatment was included in "medical aid". The following were added to the schedule of industrial diseases: infected blisters, bursitis, dermatitis and cancer arising from the manufacture of pitch and tar.

In all provinces except Prince Edward Island, legislation was enacted enabling those provinces to take advantage of the Unemployment and Farm Relief Act passed by the Parliament of Canada during the 1931 session. The Quebec Legislature enacted a law providing that the wages of workmen employed on unemployment relief works carried on under certain Dominion and Provincial Statutes should not be seizable for debt.

A Nova Scotia Act provided for the settlement of unemployed coal miners on farms. In Quebec an Act was also passed to promote land settlement.

The Employment Bureau Act of Quebec was amended to provide for the abolition of private fee-charging employment bureaus.

In Nova Scotia an Act was passed to provide for a Department of Labour.

A section added to the Ontario Department of Labour Act empowers an inspector employed by the Department to order immediate cessation of any work to which any Act administered by the Department applies and which he considers dangerous to life or property.

In Ontario and Manitoba the laws providing for old age pensions were amended to enable those provinces to take advantage of the 1931 amendment to the Dominion Act, which increased the amount of the Dominion contribution from 50 to 75 p.c. of provincial disbursements.

Section 13.—Legislation Respecting Combinations in Restraint of Trade.

A general article on Canadian legislation concerning trade combinations and monopolies against the public interest will be found at pp. 765-770 of the 1927-28 Year Book under the heading "Legislation respecting Combinations in Restraint of Trade". The article outlines the provisions of the Combines Investigation Act and reviews the principal cases dealt with under the Act up to Mar. 31, 1927. A brief statement of the provisions against combines as contained in the Criminal Code,¹ the Customs Tariff,² the Excise Act³ and the Patent Act⁴ is included. A

¹ R.S.C., 1927, c. 146, ss. 496-498.

² R.S.C., 1927, c. 44, s. 15.

³ R.S.C., 1927, c. 60, s. 27.

⁴ R.S.C., 1927, c. 150, s. 40.

further section of the article summarizes former Canadian legislation for the investigation of combines, including the Combines Investigation Act of 1910 and the Combines and Fair Prices Act of 1919.

The Combines Investigation Act.—The Combines Investigation Act (R.S.C., 1927, c. 26) is designed, as its full title indicates, “to provide for the investigation of combines, monopolies, trusts and mergers”, and declares to be unlawful only such combines as “have operated or are likely to operate to the detriment or against the interest of the public, whether consumers, producers or others”. The Statute provides that an inquiry shall be made by the Registrar on receipt of an application signed by any six British subjects resident in Canada; or if the Registrar has reason to believe that a combine exists, or if the Minister of Labour so directs. If after preliminary inquiry sufficient evidence is disclosed to justify further investigation, this may be conducted by the Registrar or by a special Commissioner appointed by the Governor in Council. Full authority is given the Registrar and the Commissioner to examine witnesses on oath and compel the production of records and documents.

The remedies provided by the Act are those of publicity and penalty. The proceedings are conducted in private, unless otherwise ordered by the Minister, but the report of any Commissioner is required to be published within fifteen days of its receipt by the Minister. Whenever in the opinion of the Minister an offence has been committed, he may remit the report and the evidence to the Attorney-General of the province concerned. The penalty section of the Statute provides that any person who is a party or privy to, or knowingly assists in, the formation or operation of a combine is guilty of an indictable offence and liable to a penalty not exceeding \$10,000 or to two years' imprisonment, or, if a corporation, to a fine not exceeding \$25,000. Provision is also made in the Act for the reduction or removal of the customs duty on any article of commerce, among the manufacturers or dealers in which there exists a combine, the operation of which is facilitated by the tariff. Similarly, the Exchequer Court may revoke a patent if there is evidence to show that the holder of such patent has made use of his exclusive rights to limit production or competition unduly, to enhance prices unreasonably, or to restrain or injure trade.

The constitutional validity of the Combines Investigation Act was given final confirmation by the Judicial Committee of the Privy Council in a decision delivered in January, 1931. This judgment confirmed the unanimous decision of the Supreme Court of Canada, given in April, 1929, after a reference for determination of this question had been made to the Courts by the Dominion Government. Both courts upheld also the constitutional validity of Section 498 of the Criminal Code, relating to combinations in restraint of trade.

Combine Cases in 1932.—An investigation under the Combines Investigation Act into an alleged combine of manufacturers of fruit baskets and other containers for fresh fruits and vegetables was completed by the Registrar early in 1932,

following charges of price agreements among Ontario basket manufacturers. The report of the investigation was not published and was referred to the Attorney-General for Ontario, who issued instructions for prosecution, but the case had not reached the courts at the end of 1932. An alleged combine of manufacturers of radio tubes was investigated by the Registrar. The application alleged the fixing of common selling prices at unreasonably high levels and a detrimental lessening of competition. The report was not published and was remitted to the Attorney-General for Ontario. No court proceedings were taken. An inquiry into an alleged combine in the importation and distribution of Welsh and Scotch anthracite coal was instituted in November, 1932, and hearings were held in Montreal and Quebec in December and January. An investigation into an alleged combine of buyers of Ontario-grown tobacco was also in progress at the end of 1932. No Commissioners were appointed under the Act during the year.

Prosecution of fifteen companies and three individuals engaged in the motion picture industry in Canada, on charges laid under the Combines Investigation Act and Section 498 of the Criminal Code, resulted in the acquittal of all of the accused. The trial followed an investigation in 1931 by Mr. Peter White, K.C., as a Commissioner under the Combines Investigation Act. The prosecution was conducted under the Attorney-General for Ontario. The judgment of the Court, delivered by Mr. Justice Garrow in March, 1932, held that the prosecution had failed to prove the existence of agreement among the accused to lessen competition in, or substantially control the supply of, motion picture films in Ontario. An appeal by the members of the Electrical Estimators' Association, a combine of electrical contractors in the city of Toronto, against their conviction by Mr. Justice Raney in January, 1932, following an investigation under the Combines Investigation Act, was dismissed in the Appellate Division of the Supreme Court of Ontario in October, 1932. Members of fifteen firms paid fines totalling \$26,200.

The annual report of the Registrar of the Combines Investigation Act, dealing at greater length with the above subjects and referring also to other inquiries, is published as a section of the Annual Report of the Department of Labour.

PART II.—WAGES AND COST OF LIVING.

Section 1.—Wage Rates.¹

Statistics of rates of wages and hours of labour have been collected for recent years by the Dominion Department of Labour, and are published in a series of bulletins supplementary to the *Labour Gazette*. Report No. 1 of this series was issued in March, 1921. The records upon which the statistics are based begin in most cases with the year 1901. Index numbers have been calculated to show the general movement of wage rates; the series covers 21 classes of labour back to 1901, 4 classes of coal miners back to 1900, and common factory labour, miscellaneous factory trades and lumbering back to 1911. The index numbers are based upon wage rates in 1913 as 100.

¹See pp. 773-783 of the 1927-28 Year Book for an article on the "Wages Statistics of the Census of 1921".

The accompanying table of index numbers (Table 1) shows the relative changes from year to year. A downward movement appeared in most of the groups in 1921 and 1922, after the peak had been reached in 1920. The index numbers for 1923 and 1924 showed on the whole a slightly upward trend, but while there were slight increases during 1925 in some groups, a substantial decline in coal miners' wages reduced the average. In 1926 slight increases took place in the wages paid by the building, metal and printing trades, electric railways and steam railways. In 1927 general increases took place in all the six groups included in the average, as well as in the other three groups; wage increases in the building trades and on the steam railways were the outstanding features of the year. In 1928, except steam railways which was stationary and common factory labour which declined fractionally, all groups showed an upward movement, a substantial increase appearing in building trades. In 1929 all groups except coal mining were higher, the building trades showing the greatest increase. In 1930 building trades showed a substantial increase, lumbering a decrease and other groups fractional increases. In 1931 all groups were down except printing which showed a slight advance and coal mining which was unchanged. In 1932 all groups were down, the decreases being greatest in lumbering, building trades and steam railways.

Rates of wages and hours of labour in 1932 in various trades in the largest cities of the five economic areas of Canada, will be found in Table 2. The attention of those specially interested in the subject of wages and hours is directed to the valuable detailed study, "Wages and Hours of Labour in Canada, 1930, 1931 and 1932", published by the Department of Labour as a supplement to the *Labour Gazette*, January, 1933.

1.—Index Numbers of Rates of Wages for Various Classes of Labour in Canada, 1913-32.

(Rates of Wages in 1913=100. Index numbers for 1901-12 were given at p. 674 of the 1932 Year Book.)

¹ For statistics of the wages and hours of employees of steam railways and wages of employees in and about coal mines in Canada, see pp. 751-752 of the 1930 Year Book where the rates, etc., for the past seven or eight years, to 1929, are given. Except for a ten p.c. reduction in Nova Scotia in coal mines in 1932, these rates were unchanged down to December, 1932. In previous editions of the Year Book a table showing the wages and hours of common labour in factories for certain cities has also been given in this section. This has been omitted this year to conserve space, but the information can be found at p. 35 of "Wages and Hours of Labour in Canada", published as a supplement to the *Labour Gazette* for January, 1933. For the five cities of Table 2 it is included under sub-heading 4 of the stub.

² Final maximum rate after annual increase. ³ One day off if possible.

Section 2.—Wages and Hours of Labour Under Minimum Wage Boards in Canada.

Seven provinces have in effect legislation providing for minimum rates of wages for female employees in certain industries, and also have certain restrictions of hours. In British Columbia similar legislation applies to males, both as to wages and hours. In Alberta the legislation applies to males in certain respects. Such legislation was first enacted in these provinces as follows: British Columbia and Manitoba in 1918; Saskatchewan and Quebec in 1919; Alberta, Nova Scotia and Ontario in 1920. The British Columbia legislation as to wages for adult males was enacted in 1925 but that as to hours in 1923. In each province these statutes became effective through orders issued and administered by Boards. A Board was established in Quebec in 1926. In Nova Scotia a Board was appointed in 1930. In New Brunswick an Act was passed in 1930 to come into force on proclamation but it has not yet been proclaimed.

*Cities and towns only.

†Applicable to certain cities and towns only.

‡Ten per cent lower, June 15 to Nov. 15, 1932.

**Rates for most classes reduced by 10 p.c. for experienced adults and 5 p.c. for those with one year's experience, June, 1932 to April 1, 1933.

(a) In Manitoba, in brickyards and in seasonal and casual employment in industries not otherwise covered, a minimum wage of \$12 per week or 30 cents per hour is established.

(b) For Ontario the ranges of rates shown for experienced adults cover the various rates set for localities according to population. In 1932 a minimum wage rate of \$12.50 per week, 50 hours maximum, was set for Toronto.

(c) Seasonal canneries included under separate order: 18 to 60 years of age, 18 to 25 cents per hour, other ages, 15 to 20 cents.

(d) The Factory Act provides for maximum hours for female employees, 10 per day and 60 per week.

(e) Textile and knitting factories: \$10.00-\$12.00 for experienced adults, \$8.00-\$10.00 for minors and learners; boot and shoe and leather trades: \$8.00-\$12.50 for experienced adults, \$5.00-\$11.00 for minors and learners; various classes of clothing and tobacco factories: \$9.00-\$12.50 for experienced adults, \$6.00-\$11.00 for minors and learners; these rates to be paid for 44-55 hours per week in clothing factories and for 50-55 hours in tobacco factories, *pro rata* for additional hours.

(f) The Factory Act provides for maximum hours, for female employees, 10 per day and 55 per week.

(g) Probationary period without minimum rate.

(h) Winnipeg and vicinity only, and Brandon for fur-sewing and theatres, etc.

(j) In mail order houses and in retail stores in certain cities and towns.

(k) In the fishing industry a minimum rate of \$15.50 per week (48 hours) or 32½ cts. per hour is set for experienced workers (12 months); \$12.75 to \$14.75 under one year.

Subsection 1.—Minimum Wages for Females.

The above table gives summary figures of minimum rates of wages in force under these Boards at the end of 1932. Orders and amendments issued from time to time have appeared in summary form in the *Labour Gazette*, as issued. In some provinces these orders include Regulations as to employment

Employees under Orders of Minimum Wage Boards in Canada, 1932.

- (l) Rate applies to work between 44 and 50 hours per week, hours in excess of 50 to be paid at not less than a rate based on 50 hours per week; hours under 44 at a rate based on normal hours in establishment.
- (m) Longer working time permitted on Saturdays, etc., and sometimes in certain months.
- (n) Full minimum rate for 36 hours or longer up to 50 hours; for time under 36 hours and over 50 hours, 20 to 25 cents per hour, according to population; order applies only to localities of 4,000 and up.
- (o) Kitchen help \$11 per week of six days or \$12 per week of seven days; 35 cents per hour.
- (p) Including garages, gasoline service stations, shooting galleries, elevator service, etc.; in British Columbia, drivers of vehicles, ushers, cloak-room attendants, etc., special provision for broken and part time
- (q) Full minimum rate for 40 hours or more worked; 25 to 30 cents per hour for work less than 40 hours.
- (r) Custom millinery in localities of 4,000 population and up.
- (s) Cities of 30,000 and up.
- (t) Telephone only in localities of 4,000 and up and those having 200 or more telephone subscribers.
- (u) Probationary period in departmental stores with minimum of \$6 thereafter.
- (v) In establishments classified as factories, covered by factory orders.
- (w) Applies also to wholesale houses and warehouses.
- (y) Telephone only.
- (z) For telephone work and applies to private telephone exchanges in localities of 600 and over, and public exchanges having over 250 subscribers.

conditions, terms of employment, sanitary conditions, etc., and all provide for variations under licence from the Boards to permit lower rates of pay for handicapped employees, etc., and to meet special conditions.

In this table the figures for adult learners and for minors and apprentices are shown in a range covering both classes. There is considerable variation in the rates for such classes in the various industries and the time allowed for such periods varies considerably, from a few weeks to two years and upwards. The number of learners and apprentices is usually restricted to 25 p.c. of the employees.

The hours of labour shown in Table 3 are those for which the minimum rates are payable, or the maximum hours of work established by the Minimum Wage Boards or provided for under other legislation, particulars in some instances being given in the footnotes.

The information here given is intended to afford a statistical summary of the minimum wages and restricted hours of labour in the provinces and industries affected and, while some of the more significant details have been given in footnotes, it has been found impossible to include the information in such form as to indicate any more than the general conditions under these provisions.

In Alberta and British Columbia certain rates were reduced temporarily in 1932 as shown in footnotes to the table. In Alberta the rates in hotels and restaurants were reduced.

Subsection 2.—Minimum Wages for Male Employees.

In Alberta, a revision of the Factories Act in 1926 provided that in establishments governed by the Act, which include shops, hotels, restaurants, and office buildings, no male may be employed at a lower wage than the minimum rate for female employees in the same class of work except apprentices under indenture approved by the Commissioner of Labour, who is the Secretary of the Minimum Wage Board.

In British Columbia the orders issued under the Male Minimum Wage Act, 1925, having been declared invalid in October, 1928, by the Supreme Court of Canada (*Labour Gazette*, November, 1928, p. 1310), a new Act was enacted in the session of 1929, applying like the original to all occupations other than those of farm labourers, fruit pickers, fruit packers, fruit and vegetable canners and domestic servants. On Jan. 22, 1930, an order effective from that date was issued providing for a minimum rate of 50 cents per hour for "stationary steam engineers" and 40 cents per hour for "special engineers" as defined under the "Boiler Inspection Act"

In Manitoba an amendment, in 1931, to the Minimum Wage Act, made all orders applicable to boys under 18 years of age. The order regarding employment in retail stores was then amended to permit boys to work 50 hours per week instead of 48 hours, the maximum for female employees. In 1932 a special Regulation regarding employment of boys under 18 years of age was made, providing for a minimum of \$8 per week for the first six months, \$9 for the next six months, and \$10 thereafter, with a maximum of nine hours work per day and 48 per week in manufacturing establishments, and garages and filling stations in Winnipeg and vicinity.

Section 3.—Cost of Living of Wage Earners.

An index number of the cost of living in working-men's families has been computed by the Department of Labour since 1913, and is published monthly in the *Labour Gazette*. This index is specifically designed for the purpose of measuring

the trends of the cost of living for certain wage-earning classes with a somewhat lower standard of living than that which is measured by the Bureau of Statistics index number of retail prices, shown on pp. 810 of the present volume. The former wage-earner's index is used extensively in negotiations as to wage rates and in the settlement of industrial disputes. An abridgment of this index is presented in Table 4.

4.—Changes in the Cost of Living in Canada from 1914 to 1932.¹

Dec. 1932.....	96	145	141	114	161	125

¹The figures for "all items" were calculated by giving the following weights to each group: Food 35 p.c.; Fuel 8 p.c.; Rent 18½ p.c.; Clothing 18½ p.c. and Sundries 20 p.c.

Section 4.—Earnings in the Census Year, 1931.

The total number of wage earners in Canada reporting earnings for the census year ended June 1, 1931, was 2,477,038 or 96.53 p.c. of all wage earners and the total amount of their earnings was \$2,102,877,400. Of this number 1,948,500 were males and their earnings amounted to \$1,806,633,400 or 85.91 p.c. of the total earnings. Females reporting earnings numbered 528,538 and the total amount of their earnings was \$296,244,000 or 14.09 p.c. of total earnings. The total weeks worked by wage earners reporting earnings was 104,947,274. The number of weeks worked by the males was 80,322,382 or 76.54 p.c. of the total for both sexes, and the total for the females was 24,624,892 weeks or 23.46 p.c. of the grand total.

CHAPTER XX. PRICES.¹

Commodity prices naturally fall into two main divisions—wholesale prices and retail prices. Because the number of wholesale traders is smaller than that of retail traders, buying and selling by carefully defined grades more prevalent, and prices ranges at any particular time and place much narrower, it would appear that wholesale prices and their fluctuations are more easily and accurately ascertainable than retail prices. But this advantage is largely offset by certain difficulties inherent in the nature of index numbers of wholesale prices. The making of an index number of wholesale prices for general purposes requires the inclusion of a much wider range of commodities than is necessary for a retail or cost of living index. Moreover, wholesale commodities are in all stages from raw material to finished product, while retail prices are concerned only with the latter. At each stage in the evolution of a commodity we are frequently confronted with several grades, and this situation is complicated by the fact that grades undergo changes in the course of time. Hence, to secure quotations which give accurate continuity from month to month and year to year is a task in which eternal vigilance is the price of success. The maker of wholesale index numbers must be assiduous in acquiring and keeping up to date a knowledge of grades and qualities and, in dealing with a very large list of commodities, this is a difficult task. With retail prices, the question of grades is not quite so involved and in some cases it is sufficient to obtain quotations on the basis of "the kind principally sold"

Wholesale transactions are generally between expert buyers and sellers, dealing on purely business principles. Accordingly, wholesale prices conform approximately to the operation of the principle of supply and demand, and are thus more valuable as an index to the current state of business. Retail prices, on the other hand, are governed to some extent by custom and do not respond easily to fluctuations in wholesale prices. Indeed, small fluctuations in wholesale prices are not fairly reflected in retail prices because of the limitations of the currency in representing small quantities of commodities. Retail prices vary considerably for the same commodity in different parts of the same city, owing to differences in the service rendered, in location of stores and in classes of customers.

Further, since wholesale prices are determined by the business situation of the moment while retail prices change more slowly, there exists what is technically called a "lag" between the two, retail prices not showing changes in fundamental business conditions until some time after wholesale prices. Thus, while wholesale prices in Canada reached a peak in May, 1920, and commenced to decline, in June, retail prices reached their corresponding peak in July, 1920, and began to decline in August. A similar "lag" has been noted in recent years, as is shown on the chart (p. 801) showing the course of wholesale and retail prices in Canada from 1914 to 1931.

Retail prices find one of their chief uses in the measurement of changes in the cost of living. This measurement is complicated by such changing factors as consumption, habits and standards of living, and qualitative changes in commodities included in the budget, particularly clothing. The difficulty of maintaining comparability between one period and another necessitates very thorough research and an elaborate collection of retail price data.

¹Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. This Branch compiles and publishes statistics on: Prices (wholesale, retail, securities, services, exchange, interest rates, cost of living), Retail and Wholesale Trade, Foreign Capital Investments in Canada and Canadian Investments Abroad, Balance of International Payments, and other related subjects. For a complete list of the publications of this Branch, the reader is referred to Chapter XXIX, Section I, under "Internal Trade"

Section 1.—Wholesale Prices of Commodities.

Subsection 1.—Historical Review of Canadian Prices.

Until recently the index number of wholesale prices in Canada did not go back beyond 1890. However, it has now been extended backward to 1867 on the 1913 base, the added quarter of a century including a very interesting period to students of price statistics. The average index numbers for every year since Confederation are given in Table 1. In that table will be noted the high prices of 1867, immediately following the close of the American Civil War and the Austro-Prussian War of 1866, and the tendency to declining prices in the years immediately following. Prices went up again after the Franco-German War of 1871 and reached a high point in 1872 and 1873, but the crisis of the latter year resulted in a decline. A downward trend persisted fairly steadily throughout the 25 years from 1872 to 1897 and was featured by an inadequate increase in the supply of gold. The gold supply of the world did not increase as rapidly as the supply of commodities, consequently more commodities could be secured for a given amount of gold. This gold shortage was accentuated by the demonetization of silver which ceased to be legal tender with gold and was reduced to the level of token money by the chief nations. Relief came through the discoveries of gold in the Rand mines and the application of the cyanide process to low-grade ores. The result was a rapidly increasing world production of gold from about 1890 down to the outbreak of the Great War, with consequent rising general prices as soon as the volume of the new gold became a large part of the total stock. Thus prices increased from the low point of 75.6 in 1897 to 100 in 1913 and 102.3 in 1914. Afterwards, the Great War, both through the scarcity of commodities which it occasioned and the inflation of the currency which it produced, drove prices rapidly upward to a maximum of 243.5 in 1920, followed by a rapid collapse to 152.0 in 1922. This was succeeded by a slight increase to 160.3 in 1925. The tendency from 1925-29 was downward, although the period was one of increasing prosperity—a condition normally associated with rising prices.

1.—Annual Index Numbers of Wholesale Prices in Canada, 1867-1932.

(1913=100.)

1867	133.0	1883	106.0	1899	81.4	1916	131.6
1868	128.7	1884	100.6	1900	85.8	1917	178.5
1869	126.5	1885	92.7	1901	84.5	1918	199.0
1870	123.5	1886	90.7	1902	86.2	1919	209.2
1871	124.5	1887	91.9	1903	86.9	1920	243.5
1872	135.7	1888	93.5	1904	87.0	1921	171.8
1873	133.8	1889	92.6	1905	87.8	1922	152.0
1874	129.0	1890	93.0	1906	82.6	1923	153.0
1875	120.7	1891	91.4	1907	95.2	1924	155.2
1876	116.6	1892	86.2	1908	93.9	1925	160.3
1877	115.1	1893	85.2	1909	91.4	1926	156.2
1878	104.3	1894	80.6	1910	94.3	1927	152.6
1879	101.0	1895	79.5	1911	95.0	1928	150.6
1880	112.9	1896	76.0	1912	99.5	1929	149.3
1881	109.9	1897	75.6	1913	100.0	1930	135.3
1882	113.1	1898	77.8	1914	102.3	1931	112.6
				1915	100.0	1932	104.2

Commencing in the fall of 1929, a severe economic depression set in which was accompanied by a drastic decline in wholesale prices. From 153.7 for August of that year the index continued to recede with few interruptions until December, 1932, when it stood at 100.0.

Subsection 2.—The Index Number on a Post-War Base (1926).

The official Canadian index number of wholesale prices and other price indexes computed by the Dominion Bureau of Statistics were revised, when prices appeared to have arrived at a condition of post-war normalcy, and calculated with the year 1926 as base.

Details of the method of constructing the new index number—the price series included, the weighting and the classification of commodities—were given at pp. 803-805 of the 1931 Year Book. The Dominion Bureau of Statistics annual index number of wholesale prices (1926=100) averaged 66.7 in 1932 against 72.1 in 1931. Monthly numbers declined in 1932, with a minor mid-summer interruption, from 69.5 in January to 64.0 in December, when the index was on an exact par with the 1913 average. Vegetable products, animal products, wood and wood products, and non-ferrous metals were chiefly responsible for the further recession in prices, although minor decreases occurred for textiles, iron products, non-metallics and chemicals. January and December group indexes, listed respectively, were as follows: vegetable products 56.0 and 50.1; animals and their products 65.0 and 57.4; fibres, textiles, and textile products 71.0 and 68.5; wood, wood products and paper 73.6 and 63.8; iron and its products 86.8 and 86.2; non-ferrous metals and their products 66.6 and 57.5; non-metallic minerals and their products 87.3 and 86.1; and chemicals and allied products 85.6 and 83.6.

Declines in both raw and partly manufactured, and fully and chiefly manufactured goods were less marked than in 1931. The first group fell from 61.9 to 55.0, and the second from 74.8 to 69.8 between 1931 and 1932. Animal and marine products in both sections were decidedly weak. There was little change apparent in the gap between raw and finished product prices, which became so marked during 1930-31, when raw field products dropped so precipitously.

A further fall of 14.0 p.c. occurred in the Canadian farm products index, as compared with a 31.6 p.c. decrease in 1931. The 1931 and 1932 annual average indexes were 56.3 and 48.4 respectively. Animal products declined from 77.6 to 60.7 and field products from 43.6 to 41.1.

2.—Weighted General Wholesale Price Index Numbers, by Months, 1924-32.

Section 2.—Retail Prices of Commodities.

Collection of data and calculation of index numbers of retail prices and the cost of living are carried out in co-operation by the Dominion Bureau of Statistics (Department of Trade and Commerce) and the Department of Labour. Resultant series of index numbers are computed from different points of view. The computations of the Labour Department are designed to show changes in the cost of living for workmen in cities. They are constructed from family budgets, principally a weekly family budget of staple foods, fuel and rent published monthly in the *Labour Gazette* since 1915 and annually since 1911; in addition, figures are included for clothing and sundry items and further data for fuel, light and rent. The Labour Department aims by this method to have a basis for computation that can be readily applied to the data for any given locality or district at any time, or for any class of labour, for instance, coal miners, who usually do not live in cities. Index numbers of retail prices and costs of living issued by the Bureau are constructed from a more general point of view, having for their object the measurement of the general movement of such prices and costs in the Dominion as a whole, and being

so calculated as to make comparisons possible with other general index numbers constructed on similar principles, for example, the index of wholesale prices. Calculated as they are on the aggregative principle, *i.e.*, the total consumption of each commodity, the Bureau's index numbers afford an excellent measurement of changes in the average cost of living in the Dominion as distinguished from that of any particular class or section.

In the Bureau's index, 1926 is taken as the base year and is represented by 100 to bring it into conformity with other series of index numbers shown in this chapter. A description of the system of weighting of individual items, sub-groups and groups, and of the method of construction of this index number was given at pp. 812-818 of the 1931 Year Book. The Labour Department uses 1913 as 100 for both cost of living and wages index numbers. As will be seen from Table 7, the general cost of living again declined sharply during 1932, the annual index for that year being 82.0 as compared with 89.6 for 1931. The fall in the food index from 69.6 to 64.0 between January and December (inclusive), 1932, and the drop in the clothing index from 76.4 to 69.2, continued to be the factors chiefly responsible for the decline. Rentals reacted further from 99.3 to 90.0 during the year. Changes in the fuel and sundries indexes were of lesser proportions.

7.—Index Numbers of Canadian Retail Prices, on the New Base, 1914-32.

The Family Budget.—A family budget constructed by the Department of Labour appears regularly in the *Labour Gazette*. This budget material has been used by the Bureau to obtain the tables which follow.

Table 9 shows the average prices of items included in the family budget in 1920 and in each of the years from 1923-32. These numbers are weighted by the quantities used by the Department of Labour in computing their monthly family budget. Table 10 gives the group indexes by provinces. An examination of the tables reveals the course of the budget, consisting of food, fuel and lighting, and rent, over the period shown.

9.—Prices of a Family Budget of Staple Foods, Fuel and Lighting, and Rent, for Sixty Cities in Canada, 1920, 1923-32.

Section 3.—Index Numbers of Security Prices.

Many important advances have recently been made in the direction of improving the technique of making index numbers of security prices. The chief of these are: first, the computation of index numbers to serve different purposes; secondly, weighting of the index numbers so that they will accurately represent the market—an accurate index of market trends cannot be made on the basis of a simple average of market quotations or on any system which does not consider weighting; thirdly,

using weighted average prices of individual securities rather than the average of high and low quotations or closing quotations. This last point is of considerable importance, because the average price at which a stock sells on a day's market frequently differs widely from the average of its high and low quotations or its closing price.

In the revised index numbers of security prices which have recently been issued by the Bureau full use of the improvements mentioned has been made, and these index numbers are now in line with the most advanced technique pertaining to the making of such indexes. In the revision, the base of the calculations was also changed. The basic period is now the year 1926, that is, prices prevailing in that year are taken as 100 and subsequent price movements are expressed as a percentage. The year 1926 was chosen as the base in conformity with the tendency which now prevails to substitute a post-war for a pre-war year. This year was also chosen in order to enable comparisons to be made with important indexes in the United States.

Two series of index numbers are now published by the Bureau on a weekly basis, *viz.*, investors' and traders' indexes. (See Tables 11 and 12.) As will be apparent, these measure movements of an entirely different character. The traders' index is based upon the prices of the twenty-five best-selling industrial and public utility common stocks sold on the Montreal and Toronto Exchanges each week. This traders' index measures the trend of gains or losses for an "average" trader on the Montreal and Toronto Stock Exchanges, who buys and sells the leading common stocks in the same proportion as they are traded in the market as a whole, and who turns over his holdings every week. The investors' index, on the other hand, measures the trend of values for the investor who buys a list of stocks and holds them over a long period of time.

Investors' and Traders' Index Numbers of Common Stocks.—Monthly figures for the investors' index number of common stocks, computed by the Dominion Bureau of Statistics on the basis 1926 = 100, have been carried back to 1913. The index falls into two parts, *viz.*, the period subsequent to 1926 and the earlier period. For the period 1913 to 1926 those stocks were used which were included in the index number previously issued on the 1913 base, *viz.*, 31 industrials, 10 public utilities and 9 banks, or 50 stocks in all. In the subsequent period the list of stocks included in the monthly index numbers was enlarged and now contains 96 industrial, 18 domestic utilities, 8 companies located abroad and 8 bank stocks. Despite the difference in the number of stocks included, the trend of stock prices is adequately shown throughout the whole period. The larger number of stocks included in the revised index number, though adding little to the accuracy of the general index, gives more complete information regarding various groups of stocks traded on Canadian exchanges.

Banks are included in the monthly index numbers but not in the weekly, the trading in such securities not being, as a rule, sufficiently important to warrant their inclusion in a weekly index. In any case, their inclusion does not affect the general index by more than a point or two.

11.—Investors' Index Numbers of Common Stocks, by Months, 1932.

NOTE.—For earlier figures, see p. 695 of the 1932 Year Book, p. 823 of the 1931 Year Book, p. 782 of the 1930 Year Book, p. 784 of the 1929 Year Book, and pp. 796-800 of the 1927-28 Year Book.

12.—Traders' Index Numbers of Prices and Volume of Sales, Monthly Averages, January, 1929-May, 1933.

(1926=100.)

Note.—The Traders' Index measures the trend of gains or losses for an "average" trader, on the Montreal and Toronto Stock Exchanges, who buys and sells in the same proportion as stocks are traded in the market as a whole and turns over his holdings every week.

Column 1.—Weighted index numbers of the prices of Industrial and Public Utility common stocks on the Montreal and Toronto Exchanges.

Column 2.—Index numbers of the total money values of the 25 best selling stocks traded on the Montreal and Toronto Exchanges.

December.....	786.7	96.7	593.5	31.1	390.7	5.3	359.5	4.8	—	—

The value indexes shown above have replaced a former series which was calculated by the use of chain relatives, because the contraction in both sales and prices during the past two years had developed a tendency to exaggerated movements which is inherent in this type of index. It was therefore dropped and the fixed base aggregative index given was adopted in its stead. This series measures accurately changes in the total value of the shares traded in the twenty-five best-selling issues on the Montreal and Toronto Stock Exchanges. These variations have been found to correspond closely with the movements in total values of shares traded on the two exchanges mentioned.

Weighted Index Numbers of Mining Stocks.—A weighted index number of mining stocks is computed by the Dominion Bureau of Statistics on the basis 1926=100. Mines of a semi-industrial nature, such as International Nickel and Consolidated Mining and Smelting Company, do not appear here but are included in the Bureau's Investors' index of common industrial and public utility stocks.

Index numbers are calculated for the total stocks and for three groups, *viz.*, gold stocks, gold-copper stocks, and silver and miscellaneous stocks. The gold stocks are Premier, Coniaurum, Dome, Hollinger, McIntyre, Vipond Consolidated, Kirkland Lake Mines, Lake Shore, Sylvanite, Teck-Hughes and Wright-Hargreaves. Gold-copper stocks include Amulet, Hudson Bay, Sherritt-Gordon, and Noranda. Silver and miscellaneous stocks are Nipissing, Coniagas, Keeley, Castle-Trethewey, and Mining Corporation. The term "silver and miscellaneous" is used because all five stocks have important interests other than silver and two of the five are not now producing silver.

The course of mining stocks during the first half of 1932 was generally downward and the index fell from 59.7 in January to 48.3 in June. From 55.6 in July, the index advanced almost steadily to close the year at 63.1. Of the three sub-

groups gold and gold-copper followed practically the same path as the general index. The gold series fell from 60.1 to 49.9 in June, but moved up to 62.7 in December. The gold-copper index receded from 62.5 in January to 47.8 in June and closed the year at 70.9. The silver and miscellaneous group opened the year at 26.5, moved down to 16.8 in June, but again reacted and closed at 21.9 in December.

Section 4.—Prices of Services.

A study of the prices of services sheds considerable light on the cost of living as such services are a considerable item in the average family budget. Information with regard to the trend of street car fares, of rates for manufactured and natural fuel gas, of domestic electric light rates and of telephone charges was published on pp. 801-804 of the 1927-28 Year Book. Later information shows that the prices of manufactured fuel gas have shown a downward tendency, the Dominion index number for 1932 being 95.0, as compared with 100.0 in 1926. The index number of the price of natural fuel gas also declined from 100.0 in 1926 to 92.1 in 1930 but rose again to 94.8 in 1932.

On the other hand, telephone rates have shown a distinct increase, the Dominion index number of domestic telephone rates having risen from 100.0 in 1926 to 107.2 in 1931. Again, the business telephone rate has risen from 100.0 in 1926 to 118.2 in 1931. Additional information and details by provinces will be found on pp. 192-201 of the Bureau of Statistics' Annual Report on Prices and Price Indexes, 1913-30.

Hospital Charges.—In view of discussions of the increased cost entailed by illness and hospital treatment, special investigations on hospital charges are now made annually and the results are given as Dominion averages in the following table. In general, this shows that hospital charges have increased over 90 p.c. since 1913, except for operating room charges, which have increased only about 60 p.c. At the same time, the cost of maintaining patients in hospitals has increased by about 111 p.c. Since the general cost of living in Canada had increased only from 50 to 60 p.c. prior to recent declines, it may be inferred that patients in hospitals have an improved standard of living and of comfort as compared with the conditions before the War.

The detailed results of this investigation, including the statistics by provinces, are to be found on pp. 203-206 of the Bureau of Statistics' Annual Report on Prices and Price Indexes, 1913-29.

Section 5.—Index Numbers of Interest Rates.

Few economic statistics are of more significance than the net rates of interest paid on absolutely the safest securities, such as government bonds maturing on a fixed and definite date. Other interest rates naturally grade upward from the rates which the safest of possible borrowers has to pay, and from the fluctuations of that price an idea may be obtained as to the relation between the supply of, and the demand for, funds for investment.

Prior to the War the funded debt of the Dominion was entirely held outside the country, there being no home market for Canadian Government bonds. Since about the beginning of the century, however, the province of Ontario, the wealthiest and most populous of the provinces of the Dominion, has done its financing largely in Canada itself, and the fluctuation in the rate of yield of Province of Ontario bonds is thus the best long-term indicator of net interest rates in the Dominion. These yields, compiled originally by Wood, Gundy and Co., of Toronto, and furnished by that firm to the Bureau of Statistics, have been recalculated as index numbers on a 1926 base and are shown in Table 15, a particularly interesting feature being the decline in the interest rates index from the high point of 129.4 in October 1920 to 87.7 in February of 1928. Since the latter date, the scarcity of funds for this type of investment forced the index number up to 104.4 in May and September 1929, from which point it gradually declined to 92.9 in September 1930. In January and February 1931 it had risen to 95.0 but in March and April it declined to 92.9 and in May to 91.9. In the fall months considerable demand upon the available supply of long term funds again sent the index up sharply to a peak of 119.8 in January, 1932, which was the highest point reached since October 1921. From that time until May, 1933, when the index was 98.1 the general movement of yields has been downward.

Section 6.—Index Numbers of Import and Export Valuations.

Index numbers of imports and export valuations have been computed by the Dominion Bureau of Statistics since 1920 and are shown in Table 16 for the years 1923-32. Fifty export and 60 import commodities are included in the calculations. The year 1913 has been taken as the base. Index numbers were calculated on the aggregative principle and both an individual and a group system of weighting has been used on the basis of quantities imported or exported.¹

¹ For list of commodities included, see Appendix A of "Prices and Price Indexes, 1913-26".

CHAPTER XXI.—PUBLIC FINANCE.

The following treatment of public finance includes an outline of Dominion, provincial and municipal finance in Canada, supported by the necessary detailed statistics, and closes with a brief discussion of the national wealth and national income of the Dominion as the basis of all public finance.

The great increase in Dominion expenditure since 1913 has, of course, been mainly due to the Great War and the burden of interest, pension charges, soldiers' civil re-establishment, etc., resulting from the War. Similar increases have also taken place during the same period in provincial and municipal expenditures. Thus in their fiscal years ended 1931, the total ordinary expenditure of the nine Provincial Governments was \$190,754,202, as compared with \$53,826,219 in 1916, only 15 years before—an increase of almost 254 p.c. (The aggregate interest payments of Provincial Governments rose from \$7,817,844 in 1916 to \$36,748,366¹ in 1931.) Again, between 1913 and 1931, the aggregate taxes imposed by the municipalities of Ontario increased from \$34,231,214 to \$123,657,684—an increase of 275.8 p.c. In Quebec the ordinary receipts of municipalities increased from \$20,771,300 in 1914 to \$63,637,511 in 1930—an increase of 206.4 p.c. In Manitoba the increase in municipal taxation has been from \$9,922,537 in 1912 to \$19,322,697 in 1930—an increase of 94.7 p.c. In Saskatchewan the grand total of municipal tax levies was \$13,358,627 in 1914 and \$29,609,893 in 1930. In Alberta the municipal taxes levied amounted to \$10,022,246 in 1914 and to \$14,887,676 in 1930. In British Columbia the taxes collected by the municipalities totalled \$8,698,820 in 1914 and \$18,260,430 in 1931. Finally, in the extreme east the aggregate tax receipts of the municipalities of Nova Scotia were \$6,605,580 in 1931, as compared with \$3,443,681 as recently as 1919—an increase of 92 p.c. in the last twelve years. The seven provinces covered by these statistics contained in 1931 approximately 95 p.c. of the population of the Dominion.

Section 1.—Dominion Public Finance.²

Historical Sketch.—Both under the French *régime* and in the earlier part of the British, the territorial or casual revenues of Canada, consisting of certain seigniorial dues and the proceeds of the sale of government timber and land, were reserved to the Crown, while the right of levying taxes and of regulating the trade and commerce of the colony was, after 1763, deemed to be vested in the British Parliament.

By the Quebec Act of 1774, certain duties on spirits and molasses were imposed, to be expended by the Crown in order to provide a revenue "towards defraying the expenses of the administration of justice and the support of the civil government of the province". A little later, in 1778, the British Government, by the Declaratory Act (18 Geo. III, c. 12), renounced forever the right of taxing the colonies to provide Imperial revenue, but maintained its claim to impose duties considered necessary for the regulation of trade, the proceeds to go towards defraying the expenditures of the colonial administration. After the Constitutional Act of 1791, the customs duties remained under the control of the Imperial Government, their revenue, as

¹ Nova Scotia and Ontario interest charges on loans issued for Power and Hydro Commissions, etc., met from earnings, amounted to \$12,293,926.39 additional.

² The statistics in this section have been made up from the Public Accounts, with the exception of those parts dealing with recent modifications in taxation, war tax revenue, and incomes assessed for income tax in Canada, which were revised by the Department of National Revenue.

well as the territorial revenue above mentioned, coming in to the executive administration independently of the Legislative Assembly and thus making the executive power largely independent of the Legislature. In case these revenues proved insufficient, recourse could generally be had to the grant made by the Imperial Government for the support of the army. As time went on, however, the Crown revenues became more and more inadequate to meet the increasing expenditure, while the wave of economy in Great Britain after 1815 made it impossible any longer to supplement these revenues from military sources. On the other hand, the purely provincial revenues collected under the authorization of the Provincial Legislature showed an increasing surplus. The power of the purse thus began to pass into the hands of the Legislatures; further, in 1831 the British Parliament passed an Act placing the customs duties at the disposal of the Legislatures.

Under the Act of Union, a consolidated revenue fund was established. All appropriation bills were required to originate in the Legislative Assembly, which was forbidden to pass any vote, resolution or bill involving the expenditure of public money unless the same had first been recommended by a written message of the Governor General. The British Government surrendered all control of the hereditary or casual revenues, which were thenceforth paid into the treasury of the province to be disposed of as its Legislature should direct.

At the interprovincial conferences which took place prior to Confederation, it was decided that the new Dominion Government, which was to take over permanently, as its chief source of revenue, the customs and excise duties that had yielded the greater part of the revenues of the separate provinces (direct taxation being as unpopular in British North America as in other new countries), was also to assume the provincial debts and to provide out of Dominion revenues definite cash subsidies for the support of the Provincial Governments. (See Tables 16 and 17.) Until the Great War, which made other taxes necessary, the customs and excise revenue constituted the chief resource of the Dominion Government for general purposes—the Post Office revenue and the Government railway receipts, which are not taxes at all, being mainly or entirely absorbed by the expenses of administering these services. Indeed, for many years preceding the War, customs and excise duties, together with the revenue from the head tax on Chinese immigrants, were the only items of receipts which were classified as taxes by the Department of Finance. In the last pre-war fiscal year these two items aggregated \$126,143,275 out of total receipts on consolidated fund account amounting to \$163,174,395, the Post Office and Government railways furnishing between them \$26,348,847 of the remainder, offset, however, by expenditures on these two services amounting to \$27,757,196. Miscellaneous revenue, largely fees, amounted in that year to \$10,682,273—a comparatively small fraction of the total. As both customs and excise taxes were indirect, the average Canadian felt but little the pressure of taxation for Dominion purposes.

The War enormously increased the expenditure, and this increase had in the main to be met by loans. It is, however, a cardinal maxim of public finance that, where loans are contracted, sufficient new taxation should be imposed to meet the interest charge upon the loans and to provide a sinking fund for their ultimate extinction. This war taxation was begun in Canada within the first weeks of the War, when in the short war session of August, 1914, increases were made in the customs and excise duties on various commodities, including coffee, sugar, spirituous liquors and tobacco. In 1915 special additional duties of 5 p.c. *ad valorem* were imposed on commodities imported under the British preferential tariff and 7½ p.c.

ad valorem on commodities imported under the intermediate and general tariffs, certain commodities being excepted. New internal taxes were also imposed on bank circulation, on the income of trust and loan companies, on insurance in other than life and marine companies, on telegrams and cablegrams, railway tickets, sleeping-car berths, etc., also on cheques, postal notes, money orders, letters and post cards. In the following year, the business profits war tax (dropped in 1921)¹ was introduced, and in 1917 an income tax was imposed. In 1918 both of these taxes were increased and their application widened, and in 1919 the income tax was again increased, and still further augmented in 1920 by a surtax of 5 p.c. of the tax on incomes of \$5,000 and over; the sales tax was also introduced in that year. The cumulative result of these war taxes was that, in the fiscal year ended Mar. 31, 1921, customs duties were for the first time displaced from their position as the chief factor in Canadian revenue, the war taxes yielding \$168,385,327, as against the customs yield of \$163,266,804. In 1922 war taxes yielded \$177,484,161, while the yield of the customs fell to \$105,686,645. Again, in 1923 the war taxes yielded \$181,634,875 and customs duties \$118,056,469, in 1924 \$182,036,261 and \$121,500,798, in 1925 \$147,164,158 and \$108,146,871, in 1926 \$157,296,321 and \$127,355,144, in 1927 \$156,167,434 and \$141,968,678. In 1928, however, the customs duties yielded \$156,985,818 as against \$150,319,087 collected by the war taxes, in 1929 \$187,206,332 as against \$145,029,742, in 1930 \$179,429,920 as against \$134,086,005, in 1931 \$131,208,955 as against \$107,320,633, and in 1932 \$104,132,677 as against \$122,266,064 collected by war taxes.

A more detailed sketch of the changes made in taxation from 1914 to 1926 will be found at pp. 755-759 of the 1926 Year Book, while similar information re tax changes in 1927 was given at p. 808 of the 1927-28 Year Book.

Recent Modifications in the System of Taxation.²—In 1928 the general rate of the sales tax was reduced from 4 to 3 p.c. The rate of the graduated income war tax on individuals was reduced by a further 10 p.c. of the 1926 tax, so that an individual paid only 80 p.c. of what he would have paid on the same income two years before. Similarly, the rate of taxation on the income of corporations and joint stock companies, which had been 10 p.c. two years before and 9 p.c. in 1927, was reduced to 8 p.c. on incomes in excess of \$2,000. The \$500 exemption for children was further extended to include this exemption for sons and daughters over 21 dependent upon the taxpayer for support on account of mental or physical infirmity. The customs tariff was also amended in the direction of reducing the duties upon machinery and other commodities used in production in the mining and fishing industries, on onion plants for propagation, also on disinfecting and spraying preparations in the fruit and horticultural industries, and on press blankets used in the printing and publishing industry. In the textile industries reductions were very generally made on cotton, woollen and other yarns used by manufacturers as the material for further production, also on many finished cotton, woollen, linen, flax, jute, silk and artificial silk products. Also the duty on many types of machinery used in the textile industry was generally reduced or even taken off entirely under the British preferential tariff. For details of these very numerous changes, see c. 17 of the 1928 Statutes.

In 1929 the general rate of sales tax was reduced from 3 p.c. to 2 p.c. The taxes on certain insurance premiums, on cables and telegrams, and on railway and other tickets were also repealed. The tax on sales or transfers of stocks was so modified as to be levied on the actual value rather than the par value of shares

¹ Belated revenue from this tax has been collected in subsequent fiscal years down to 1932 (see Table 8, p. 835).

² For modifications in taxation in the years 1922 to 1927 inclusive, see the 1927-28 Year Book, pp. 807-809.

transferred; further, instead of a tax of 3 cents being levied for every \$100 par value of shares transferred, the tax was made to vary from one-tenth of a cent per share, where shares are sold at 50 cents each or less, to four cents, where they are sold at over \$100 each. A number of changes were made in the Customs Tariff by c. 39 of the 1929 Statutes.

In 1930, the general rate of the sales tax was reduced from 2 to 1 p.c. *Bona fide* co-operative organizations, government or like annuities (to the extent of \$5,000), and donations to churches, schools and hospitals (to a maximum of 10 p.c. of the net income of the taxpayer) were exempted from income tax, and the \$500 exemption for children was extended to cover certain dependent relatives suffering from mental or physical infirmity. In the customs tariff, the iron and steel schedules were completely revised, seasonal tariffs were adopted in respect of fruits and vegetables, duties were reduced on tea, porcelain and chinaware and meats and increased on beans and butter, and so-called countervailing duties were imposed in respect of 16 commodities. The year was unusual in that it saw a second tariff revision, namely, that of the special session of September, when the anti-dumping clauses of the tariff were re-written and very many changes were made in rates of duty in the schedules. Increases were made *inter alia* on most agricultural products, on printed matter and manufactures of paper, on numerous commodities in the iron and steel group, on a wide range of textile items and on boots and shoes. Power was granted to the Governor in Council to prohibit the importation into Canada of goods exported to the Dominion from any country not a contracting party to the Treaty of Versailles.

In 1931, the general rate of the sales tax was increased from 1 to 4 p.c. Tax-free limit for cheques, receipts for money paid by banks, money orders, travellers' cheques and Post Office money orders was reduced from \$10 to \$5 and postage stamps could be used on such documents in lieu of excise tax stamps. A special excise tax of 1 p.c. was imposed on importations. As regards the customs tariff, the 1931 session saw several further amendments of the administrative clauses of the tariff, the powers of the Governor in Council in the matter of the making of tariffs being widened to include the granting and withdrawing of rates more favourable than those of the British preferential tariff. Provision was made for penalty in the case of any person guilty of using the tariff to increase prices to consumers. Rates were altered on many items, the countervailing duties having been rescinded in entirety at the special session in September, 1930. Increases were made on fresh and canned meats, tea, field and garden seeds, prepared foods, containers, wall-boards, spray mixtures, building stone and granite, steel plate, motor vehicles, wood veneers, various textiles, coal and coke, leather and leather goods, and numerous other commodities. The importation of second-hand motor vehicles, except under specified exceptional circumstances, was prohibited.

In April, 1932, the income tax was raised to 11 p.c. on corporations and joint stock companies. In the case of personal incomes, the deduction of 20 p.c. formerly allowed from the tax payable under the established schedule of rates was repealed; a surcharge of 5 p.c. was made on net incomes of over \$5,000 and the exemptions were reduced from \$3,000 to \$2,400 for married persons, and from \$1,500 to \$1,200 for single persons. These changes applied to 1931 incomes. The sales tax was increased by 2 p.c. to 6 p.c., and the special excise tax on goods imported into Canada was raised from 1 p.c. to 3 p.c. The stamp tax on cheques, promissory notes, money orders, etc., was increased from 2 cents for each instrument over \$5, to 3 cents on amounts between \$5 and \$100, and 6 cents over \$100. Sleeping car tickets were

taxed 10 p.c. (minimum 25 cents) and parlour car tickets 10 cents flat; there were also changes in the tax rates of cable and telegraphic messages and in the stock and bond transfer tax. No important tariff changes were made in view of arrangements for the Imperial Economic Conference in July, 1932. The tariff changes resulting from the Imperial Conference and enacted at the Fourth Session of the 17th Parliament, which opened on Oct. 6, 1932, are briefly dealt with on pp. 485-486.

Subsection 1.—The Current Balance Sheet of the Dominion.

A summary review of the current financial situation of the Dominion as at Mar. 31, 1932, is given in the balance sheet shown as Table 1. This shows the gross debt on the above date to have been \$2,831,743,563, partly offset by active assets aggregating \$455,897,391, leaving a net debt of \$2,375,846,172.¹ Non-active assets, including such public works as canals and railways, also loans to railways, amounted in the aggregate to \$1,708,720,179, leaving a debit balance on Consolidated Fund Account on Mar. 31, 1932, of \$667,125,993. The details of the various assets and liabilities are contained in the schedules accompanying the balance sheet and printed in the Public Accounts.

¹ The net debt on Mar. 31, 1925 was \$2,417,437,686; on Mar. 31, 1926, \$2,389,731,099; on Mar. 31, 1927, \$2,347,834,370; on Mar. 31, 1928, \$2,296,850,233; on Mar. 31, 1929, \$2,225,504,705; on Mar. 31, 1930, \$2,177,763,959 and on Mar. 31, 1931, \$2,261,611,936. See Table 18 p. 845.

Interest due and outstanding.....	1,868,191
	\$ 2,831,743,563

NOTE.—The Dominion of Canada is also responsible for principal and interest on loans negotiated by railways, under various Acts of Parliament, amounting to \$753,050,146. (See pp. 850-851 for details).

Subsection 2.—Receipts and Disbursements.

The receipts of the Dominion Government on Consolidated Fund Account for the fiscal year ended Mar. 31, 1932, were \$329,709,056, a decrease of \$19,878,243 as compared with the preceding year; besides these, special receipts amounted to \$7,012,249—a total of \$336,721,305 (Table 2). The regular expenditure on Consolidated Fund Account was \$375,403,344, while special expenditure amounted to \$55,460,134. There were also a net expenditure on capital account of \$16,979,788 and other expenditures of \$3,132,275, including Government Merchant Marine \$1,199,286, and advances to Quebec Harbour Commissioners (non-active) \$1,379,000. Thus the total disbursements, inclusive of these and other advances, amounted to \$450,955,541. There was an increase of \$114,234,235 in the net debt (gross debt less active assets) during the year. (See Table 22.)

Detailed statistics of receipts and disbursements are contained in Tables 2 and 3. Tables 4 and 5 are historical tables giving the figures of the main items of Dominion receipts and expenditure since Confederation, while Table 6 shows the per capita receipts and expenditure for these years, calculated on census and estimated populations.

3.—Details of Expenditures, fiscal years ended Mar. 31, 1928-32.

NOTE.—"Adulteration of food", \$147,770, "Marine hospitals", \$208,846, and "Quarantine", \$208,656, for 1932, have been classified in the Public Accounts of 1928-32 under the heading "Health", but are here deducted and shown separately so as not to break the comparability of the figures with those of earlier years. The Public Accounts item "Health" is therefore \$368,323 for 1932, compared with the \$303,050 shown here.

¹ For detailed statement see Table 8, p. 835. ² Includes various smaller items of revenue receipts.
³ Nine months. ⁴ Inclusive of special receipts of \$1,905,648 in 1921, \$319,184 in 1922, \$8,479,310 in 1923, \$9,745,158 in 1924, \$4,680,913 in 1925, \$2,147,503 in 1926, \$1,756,704 in 1927, \$6,924,594 in 1928, \$4,687,507 in 1929, \$4,506,136 in 1930, \$6,573,577 in 1931 and \$7,012,249 in 1932. See Table 2, pp. 826-827.

6.—Per Capita Figures of Taxation, Total Revenue Receipts, Expenditure on Consolidated Fund Account and Total Expenditure, 1868-1932.

NOTE.—The years marked with an asterisk (*) are those of the censuses, April 2, 1871; April 4, 1881; April 6, 1891; April 1, 1901; June 1, 1911, 1921 and 1931. For the intercensal years the populations are estimated as at June 1 (see p. 145 for estimates of population). The fiscal period of 1907 is nine months ended Mar. 31. See the tables on pp. 829-832 for the figures of revenue and expenditure on which this table is based.

Fiscal Year.	Per Capita Revenue from Taxation.	Per Capita Total Revenue Receipts.	Per Capita Expenditure on Consolidated Fund Acct.	Per Capita Total Disbursements.	Fiscal Year.	Per Capita Revenue from Taxation.	Per Capita Total Revenue Receipts.	Per Capita Expenditure on Consolidated Fund Acct.	Per Capita Total Disbursements.

Subsection 3.—War Tax Revenue.

An account of the various war taxes imposed in 1915 and subsequently has already been given on pp. 822-825 in the introduction to this section. For convenience of reference the amounts received from these taxes since the beginning are

segregated and the totals paid in to the Receiver-General are given in Table 8. The taxes imposed on banks, trust and loan companies and insurance companies are collected by the Department of Finance. The excise war taxes, the business profits war tax and the income war tax are collected by the Department of National Revenue, formerly the Customs and Excise Department. The amounts of excise war taxes collected from different sources in the last six fiscal years are given in Table 9, while Table 10 contains the details by provinces for the latest year. The amounts collected in income war tax and business profits war tax are given by provinces for the two latest fiscal years in Table 11. (See also Tables 34 to 38 of this chapter.)

8.—War Tax Revenue Received by the Receiver-General, fiscal years ended Mar. 31, 1915-32.

¹Amounts paid in to Receiver-General.

²There were refunds in excess of revenue of \$626 for 1930.

³Although this tax was not charged upon profits accruing after Dec. 31, 1920 (see 14-15 Geo. V, c. 10), belated revenue therefrom continued to be received up till 1932.

Subsection 4.—Inland Revenue.

Under the Inland Revenue Act (R.S.C., 1906, c. 5), the Department of Inland Revenue had the control and management of standard weights and measures and of the collection of excise duties, of stamp duties, internal taxes, bridge and ferry tolls and rents until 1918. It administered the Statutes which dealt with the adulteration of food and other articles, electricity and gas inspection, patent medicines, petroleum, naphtha and the analysis of fertilizers and feeding stuffs. This Department also established the food standards, which were put into force by Orders in Council under the authority of section 26 of the Adulteration Act. By Order in Council dated May 18, 1918, the Department of Customs and the Department of Inland Revenue were amalgamated and combined under the name of the Department of Customs and Inland Revenue, under one Minister of the Crown. By Order in Council dated June 3, 1918, the administration of the Gas, Electric Light, and Weights and Measures Inspection Acts, the Adulteration of Food, Commercial Feeding Stuff, Fertilizers, Proprietary and Patent Medicine, and Inspection of Water Meters Acts was transferred to the Department of Trade and Commerce, as from Sept. 1, 1918. On June 4, 1921, the Department of Customs and Inland Revenue was consolidated as the Department of Customs and Excise (11-12 George V, c. 26). As from April 1, 1927, the name of this Department, which collects the great bulk of the revenue of the Dominion, was changed to Department of National Revenue by authority of 17 Geo. V, c. 34. This Act provides for three chief departmental officers—the Commissioner of Customs, the Commissioner of Excise and the Commissioner of Income Tax, while an Assistant Commissioner of Customs may also be appointed.

In the fiscal year ended Mar. 31, 1932, the gross amount of customs duties collected by the Department was \$113,997,851, as compared with \$149,250,992 in 1931, \$199,011,628 in 1930, \$200,479,505 in 1929, \$171,872,768 in 1928 and \$158,966,367 in 1927. The total of excise duties and excise war taxes collected in the fiscal year ended Mar. 31, 1932, was \$109,586,366, as compared with \$93,986,975 in 1931, \$129,822,444 in 1930 and \$148,376,494 in 1929. The total of income tax collected in the fiscal year ended Mar. 31, 1931, was \$71,048,022, and of business profits war tax \$34,430, and in the fiscal year ended Mar. 31, 1932, the total of income tax

collected was \$61,254,400 and of business profits war tax \$3,000. While the income tax and the business profits war tax (see Table 11) are collected by the Commissioner of Income Tax, the other main branches of inland revenue—the excise duties and excise war taxes—are collected by the Commissioner of Excise.

Canadian Excise Tariff.—The following is a statement of the Canadian excise tariff, as existing at July 1, 1932:—

Spirits—		Tobacco, per lb.....	\$ 0-20
When made from raw grain, per proof gal. \$	9-00 ¹	Cigarettes, weighing not more than 3 lb. per thousand, per thousand.....	6-00 ¹
When made from malted barley.....	9-02 ¹	Cigarettes, weighing more than 3 lb. per thousand, per thousand.....	11-00
When made from imported molasses or other sweetened matter free of customs duty, per proof gal.....	9-63 ¹	Foreign raw leaf tobacco, unstemmed, per standard lb.....	0-40
Malt, screened, per lb.....	0-03	Foreign raw leaf tobacco, stemmed, per standard lb.....	0-60
Malt, imported, crushed or ground, per lb.....	0-05	Canada Twist tobacco, per lb.....	0-20
Malt liquor, when made in whole or part from any other substance than malt, per gal.....	0-15	Snuff, per lb.....	0-20
		Cigars, per thousand.....	3-00

¹Following the Imperial Economic Conference, 1932, amendments to the Excise Act, assented to on Nov. 25, 1932, were made as follows:—

(1) The duty on domestic spirits entered for consumption was reduced from \$9, \$9.02, and \$9.03 per proof gallon to \$7 per proof gallon.

(2) The duty on manufactured cigarettes entered for consumption was reduced from \$6 per thousand to \$4 per thousand.

When, however, any person is licensed by the Minister of National Revenue to manufacture patent and proprietary medicines, extracts, essences and pharmaceutical preparations by the use of spirits in bond, subject to the Excise Act and Regulations thereunder, the following duties of excise are collected: when made from raw grain, \$2.40 per proof gallon; when made from malted barley, \$2.42 per proof gallon; when made from imported molasses or other sweetened matter free of customs duty, \$2.43 per proof gallon. Druggists, licensed by the Minister of National Revenue to prepare prescriptions for medicines and pharmaceutical preparations, are also allowed to use limited quantities of spirits, testing not less than 50 p.c. over proof, on payment of the above lower manufacturers' rates of duty. A drawback of 99 p.c. of the duty may be granted when domestic spirits, testing not less than 50 p.c. over proof, are delivered in limited quantities to universities, scientific or research laboratories, or to hospitals for medicinal purposes only.

Revenue from Excise Duties.—The inland revenue collected from excise duties, other than war taxes, is shown by items for the last six fiscal years in Table 12. Tobacco, including cigarettes, is shown by the figures to be supplying about 71 p.c. of the revenue from excise duties.

12.—Details of Excise Duties Collected, fiscal years ended Mar. 31, 1927-32.

(Accrued revenues as shown in the Report of the Commissioner of Excise.)

Alcohol and Tobacco Taken out of Bond.—In Table 15 are shown the quantities of spirits, malt liquor, malt, cigars, cigarettes and tobacco taken out of bond for consumption in the fiscal years ended 1901 to 1932.

Between 1920 and 1932 the number of cigars taken out of bond fell from 270,089,761 to 152,159,301 and the quantity of tobacco, which was 23,049,012 lb. in 1920, had fallen to 20,870,651 lb. by 1925, since when there has been a steady

increase to 22,801,035 lb. in 1932. The consumption of cigarettes increased from 2,440,982,912 in 1920 to 5,082,314,590 in 1931 but declined to 4,401,628,765 in 1932.

Between 1923 and 1929 spirits taken out of bond (exclusive of imported spirits) rose from 729,678 gal. to 2,016,802 gal., but there has been a decided and steady drop since 1929 to 781,612 gal. for 1932. Malt liquor shows an increase from 36,789,195 gal. in 1923 to 65,719,129 gal. in 1929 and a corresponding decrease to 52,001,768 gal. in 1932.

15.—Quantities of Spirits, Malt Liquor, Malt and Tobacco Taken Out of Bond for Consumption, fiscal years ended June 30, 1931-6, and Mar. 31, 1937-32.

(For earlier years see 1916-17 Year Book, p. 528.)

² Nine months.

³ Including snuff.

Subsection 5.—Provincial Subsidies.

Tables 16 and 17 show the subsidies and other payments made by the Dominion to each of the Provincial Governments for the individual fiscal years ended from 1927 to 1932 (Table 16), and the totals paid from Confederation to 1932 (Table 17). The provincial subsidies payable by the Dominion Government were originally settled by the British North America Act, 1867 (30 and 31 Vict., c. 3, s. 118), but were revised by the British North America Act, 1907 (7 Edw. VII, c. 11). Under the revised settlement each Provincial Government receives: (a) a fixed grant according to population and (b) a grant at the rate of 80 cents per head of the population up to 2,500,000, and at the rate of 60 cents per head of so much of the population as exceeds that number. The province of British Columbia received

an additional grant of \$100,000 per annum for a period of 10 years from 1907.¹ An additional grant of \$100,000 per annum is payable to Prince Edward Island under an Act of 1912 (2 Geo. V, c. 42), and the payments to Manitoba were revised by the Extension of Boundaries (Manitoba) Act, 1912 (2 Geo. V, c. 32); in 1931 an amount of \$4,822,843 was paid as a readjustment in lieu of public lands from 1870 to 1908 as provided for in the Manitoba Natural Resources Act, 1930. Other payments to the Provincial Governments by the Dominion Government consist of special grants, such as compensation for lands, allowances for buildings, allowances in lieu of debt, etc.

16.—Subsidies of Dominion to Provincial Governments, fiscal years ended 1927-32.

¹For the years 1928, 1929, 1930, 1931 and 1932, special grants, pending reconsideration of provincial subsidies, were granted to Nova Scotia, New Brunswick and Prince Edward Island as follows: Nova Scotia \$875,000, New Brunswick \$600,000, Prince Edward Island \$125,000.

²\$4,822,843 of this amount was on account of readjustment of subsidy in lieu of Public Lands from 1870 to 1908, as provided for in the Manitoba Natural Resources Act, 1930.

¹Compensation for lands and allowances for buildings. ²Allowances in lieu of debt.

Subsection 6.—National Debt.

The gross national debt of Canada on Mar. 31, 1914, was \$544,391,369, as against assets of \$208,394,519, leaving a net debt of \$335,996,850. Comparatively small as was this debt, it was a debt incurred almost altogether either for public works of general utility which, like the Intercolonial and transcontinental railways

¹See Canada Year Book, 1907, pp. xxxiii-iv.

and the canal system, remained assets, though perhaps not realizable assets of the nation, or was expended as subsidies to enterprises, which, like the Canadian Pacific Railway, though not government-owned, assisted greatly in extending the area of settlement as well as the productive and, therefore, the taxable capacity of the country. Broadly speaking, it was a debt incurred for productive purposes. Also, it was mainly held outside the country, the principal of the Dominion funded debt payable in London being \$302,842,485 on Mar. 31, 1914, as against only \$717,453 payable in Canada.

The great changes brought about in our national debt during the 18 years from 1914 to 1932 have been: (1) the enormous increase in net debt from \$335,996,850 to \$2,375,846,172; (2) the gross debt, having been largely incurred for war purposes, is not represented by corresponding assets; (3) the debt is now mainly held in Canada, \$2,012,210,212 being payable in Canada at Mar. 31, 1932; (4) the average rate of interest paid on interest-bearing debt has been considerably increased.

A summary account of the loans effected between 1914 and Dec. 31, 1932, follows.

War and Renewal Loans.—The first Dominion domestic war loan was raised in November, 1915, under authority of c. 23 of the Statutes of that year (5 Geo. V, c. 23). It originally consisted of \$50,000,000 5 p.c. tax-exempt 10-year gold bonds, issued at 97½ and maturing Dec. 1, 1925. As the issue was heavily over-subscribed (public subscriptions by 24,862 subscribers \$78,729,500, bank subscriptions \$25,000,000) and the extra money was needed, the Government increased the amount of the loan to \$100,000,000. In July, 1915, \$25,000,000 of 1-year and \$20,000,000 of 2-year 5 p.c. notes had been floated in the United States, with the object of stabilizing exchange and relieving the pressure on London.

In September, 1916, the second Canadian domestic war loan of \$100,000,000 5 p.c. tax-exempt 15-year gold bonds was issued and again over-subscribed (public subscriptions by 34,526 subscribers \$151,444,800, bank subscriptions \$50,000,000). In March of that year, a loan of \$75,000,000 in 5-, 10-, and 15-year 5 p.c. bonds had been floated in New York.

The third Canadian domestic war loan, composed of \$150,000,000 5 p.c. tax-exempt 20-year gold bonds, was issued at 96 in March, 1917, and was again over-subscribed, 40,800 public subscribers applying for \$200,768,000, while the banks subscribed \$60,000,000. In August, 1917, \$100,000,000 of 5 p.c. 2-year notes were issued in New York at 98.

The fourth domestic war loan (First Victory Loan) was issued in November 1917. For the first time subscriptions as low as \$50 were received towards an issue of \$150,000,000 5½ p.c. 5-, 10-, and 20-year gold bonds, the Minister of Finance reserving the right to allot the whole or any part of the amount subscribed in excess of \$150,000,000. The subscribers numbered 820,035 and the subscriptions totalled \$398,000,000, or about \$50 per head of the then population of Canada.

The fifth domestic war loan (Second Victory Loan) of \$300,000,000 5½ p.c. 5- and 15-year tax-exempt gold bonds, was issued at 100 and interest as of date Nov. 1, 1918; the end of the War, then clearly in sight, stimulated subscriptions. The applications numbered 1,067,879 and subscriptions totalled \$660,000,000.

The sixth domestic war loan (Third Victory Loan) was raised at 100 and interest in November, 1919. It consisted of \$300,000,000 taxable 5-year and 15-year 5½ p.c. gold bonds. The subscriptions amounted to \$678,000,000.

A 5½ p.c. renewal loan, aggregating \$114,464,150 and due in 1927 and 1932, was floated in Canada in the autumn of 1922 to pay off the maturing 5-year Victory Loan bonds of 1917. Largely for the same purpose, a \$100,000,000 5 p.c. loan was issued in New York.

In the autumn of 1923, a refunding loan of \$20,000,000 at 5 p.c. was issued in Canada to pay off the maturing 5-year Victory Loan bonds of 1918.

Refunding operations in 1924, to retire \$107,955,650 5-year Victory bonds, issued in 1919, and to redeem treasury bills held by banks, took the form of a domestic issue of \$50,000,000 4½ p.c. 20-year bonds and \$35,000,000 4 p.c. 2-year notes, and a short term issue in the New York market of \$90,000,000 4 p.c. 1-year treasury notes. An issue of \$24,000,000 in 4 p.c. 1-, 2- and 3-year notes (\$8,000,000 of each) was also made in November, 1924.

A refunding loan of \$75,000,000 at 4½ p.c. due 1940 was issued in Canada in September, 1925, also 4 p.c. 1-year notes amounting to \$70,000,000 in New York. Securities redeemed included £5,000,000 4½ p.c. bonds due in London, \$90,000,000 4 p.c. notes due in New York, also \$8,000,000 4 p.c. notes and \$42,014,500 5 p.c. bonds of the 1915 war loan due in Canada.

In 1926, refunding issues dated Feb. 1, were made as follows: In Canada, \$20,000,000 4½ p.c. 4-year bonds and \$45,000,000 4½ p.c. 20-year bonds; in New York, \$40,000,000 4½ p.c. 10-year bonds. Maturing securities included \$25,000,000 5 p.c. bonds due in New York April 1, and \$70,000,000 4 p.c. notes called for redemption April 1.

In 1927, \$45,000,000 of 4 p.c. treasury notes due Dec. 1, 1930, were issued in order to retire maturing 5½ p.c. obligations.

In 1930, \$45,000,000 3-year 4 p.c. treasury notes, issued on Dec. 1, 1927, matured, and were replaced by the issue of 2-year treasury notes for \$40,000,000 at 4 p.c. maturing Dec. 1, 1932, the balance of \$5,000,000 being paid from cash. These were sold at par to Canadian chartered banks. On Oct. 1, 1930, a 4 p.c. loan of \$100,000,000 maturing Oct. 1, 1960, was issued in New York. It was sold at a price of 93.646, or at a cost of 4.38 p.c. per annum. Principal and interest are payable in New York funds.

In 1931, extensive conversion and other operations in connection with the national debt were carried out as follows:

On April 1, 1931, the 5 p.c. Public Service Loan of \$25,000,000 fell due in New York and was redeemed out of the proceeds of the loan negotiated in New York in the previous October, effecting a net annual saving in interest of \$155,000.

In May, a conversion offer was made in connection with the \$1,084,823,350 of funded debt maturing between then and Nov. 1, 1934. The opening offer was to convert \$250,000,000, the Minister of Finance reserving the right to increase the amount at any time before May 23. The basis was an exchange of a bond of any of the following four maturities for new twenty-five-year 4½ p.c. bonds, dating from

the maturity of the old bonds; the 5 p.c. bonds maturing Oct. 1, 1931, or the 5½ p.c. bonds maturing Nov. 1, 1932, 1933 and 1934, respectively. One of the terms of the new bonds was that at any time after fifteen years the Dominion, on giving sixty days' notice, had the right to call any series for redemption. There was attached to each of the new bonds one or more talons representing the difference in interest to maturity of the former series. Tax exemption privileges limited to the maturity date of the old bonds were continued to holders of tax-exempt bonds offered for conversion. The amount was oversubscribed more than two and a half times, the conversions being: 5 p.c. War Loan maturing Oct. 1, 1931, \$38,625,700; 5½ p.c. Renewal Loan maturing Nov. 1, 1932, \$37,523,200; 5½ p.c. Victory Loan maturing Nov. 1, 1933, \$276,688,100; 5½ p.c. Victory Loan maturing Nov. 1, 1934, \$285,772,300; total, \$638,609,300. The saving in interest in the fiscal year under review was \$193,128. When the full benefit of the conversion is secured, after Nov. 1, 1934, the annual saving will be \$6,192,964.

The non-converted part of the Oct. 1 maturity amounted to \$14,303,900, of which \$1,211,300 was held in sinking fund account, leaving approximately \$13,100,000 to re-finance. The necessary funds were provided through accepted tenders, at par, for \$4,500,000 from insurance companies and an arrangement with the Bank of Montreal, whereby that institution took, at par, the residue of the issue, the Government undertaking to redeem out of the proceeds of the public offering when made.

In November, a public offering of \$150,000,000 5 p.c. bonds was made. The loan was named "Dominion of Canada National Service Loan, 1931". The bonds were offered for public subscription in two maturities; one for five years, the price being 99·25; one for ten years at 99, or on a yield basis of 5·17 p.c. and 5·13 p.c. respectively. The loan was over-subscribed, the books being closed twelve days before the advertised closing date. Subscriptions totalled \$221,198,200, the division being \$79,535,200 maturing in 1936; \$141,663,000 maturing in 1941.

In 1932-33, one-year 4 p.c. treasury notes to the amount of \$60,000,000 dated Oct. 1 were sold in New York at 99·28. In Canada, \$85,000,000 of 4½ p.c. one-year treasury notes dated Aug. 1, 1932, and \$35,000,000 of 4 p.c. 2-year treasury notes dated Nov. 1, 1932, were sold at par to the chartered banks. Further, \$25,000,000 of 3-year 4 p.c. bonds and \$56,191,000 of 20-year 4 p.c. bonds dated Oct. 15, were sold to the public, the 3-year bonds being sold at 99·20 to yield 4·28 p.c. and the 20-year bonds at 93·45 to yield 4½ p.c.

Summary statistics of the national debt of Canada as at Confederation and at the end of each fiscal year thereafter down to 1932 are given in Table 18, while details of the active assets and of the gross liabilities as at the end of the last twelve fiscal years are given in Tables 19 and 20 respectively. Further, details of the funded debt, showing the various issues of bonds, the annual interest charge and the place at which principal and interest is payable, are given as at Mar. 31, 1932, in Table 21. From this it appears that the net total payable in London at that date was \$249,677,848 with interest charge of \$11,144,780, in New York \$240,971,700 with interest charge of \$10,843,700, and in Canada \$2,012,210,212 with interest charge of \$105,614,947. Thus more than 80 p.c. of the funded debt of the Dominion was due within the Dominion itself, and as a consequence the interest payable outside of Canada was a comparatively small item.

¹ The minus sign (-) denotes a decrease.

² This amount includes \$10,199,520, for which land was taken from the Canadian Pacific Ry. Co.

³ This amount includes \$3,365,450, caused by the settlement of accounts with Ontario and Quebec.

⁴ This amount takes into account \$3,397,503, allowed to Ontario and Quebec under 47 Vict., c. 6.

⁵ Active assets only.

⁶ Nine months.

⁷ The per capita figures are worked out on the basis of the estimates of population given on p. 145.

The Interest-Bearing Debt of Canada.—The main burden imposed upon the Canadian people by their debt is the payment of the annual interest thereupon, and this burden is increased or decreased by changes in the rate of interest paid as well as by the paying off of old debt and the contracting of new debt.

Before the Great War, interest rates were comparatively moderate, but the unprecedented expenditure of the world's capital in that gigantic struggle led, in all the participating countries, to the raising of enormous loans at comparatively high rates of interest, which in many cases still have to be paid until refunding becomes possible under the terms of the contracts made between the nations and their creditors. Thus, in Canada, the average rate of interest paid upon all the direct interest-bearing obligations of the nation, which was only 3.368 p.c. at Mar. 31, 1913, rose to 5.164 p.c. at Mar. 31, 1922, and fell gradually to 4.923 p.c. at Mar. 31, 1932. The effect of the refundings of 1931 in reducing the general rate will not be fully felt until 1935. Details of the interest-bearing debt of Canada, and the interest charges thereon, as at March 31 of the years from 1913 to 1932, are given in Table 22.

22.—The Interest-Bearing Debt, the Annual Interest Charge thereon and the Average Rate of Interest, as at Mar. 31, 1913-32.

Fiscal Yr.	Bonds, Debentures and Treasury Bills.	Annual Interest Charges on Bonds, Debentures and Treasury Bills.	Average Interest Rate on Bonds, Debentures and Treasury Bills.	Savings Bank Deposits, Trust and other Funds	Annual Interest on Savings Bank Deposits and other Funds.	Total Interest-bearing Debt. ¹	Annual Interest Charge.	Average Rate of Interest.

¹ The total of interest-bearing debt, as here given, includes bonds purchased and held by the Treasury for sinking funds.

Guaranteed Debt of the Dominion.—Besides the direct debt of the Dominion, already dealt with, there are also large indirect obligations, arising mainly out of the taking over by the Dominion of the railway lines which now form the Canadian National Railways, and the subsequent extensions thereof. Together with these are other smaller indirect obligations, originating in the Government's guarantees of the bonds of the Canadian National Steamship services and of the bonds of its Harbour Commissions, issued in the main for harbour improvements. Statistics showing the growth of these indirect obligations in recent years are given in Table 23, while Table 24 shows the obligations as they existed on Mar. 31, 1932.

23.—Guaranteed Securities of the Dominion Government (Amount Held by the Public), as at Mar. 31, 1923-32.

¹ Railway securities guaranteed as to principal and interest to the value of \$58,157,952 were held by the Minister of Finance as at Mar. 31, 1932, but these are not outstanding in the same sense as those in the hands of the public.

Section 2.—Provincial Public Finance.¹

Provincial Governments in Canada are in the position, under Section 118 of the British North America Act, 1867 (30 and 31 Vict., c. 3), and the British North America Act, 1907 (7 Edw. VII, c. 11), of having a considerable assured income in subsidies from the Dominion Treasury. Details of these payments are given for recent years in Tables 16 and 17 of this chapter. In addition, through their

¹ Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues detailed statements on Provincial Finance which may be obtained from the Dominion Statistician. For a list of these publications see Chapter XXIX.

retention of ownership of their lands, minerals and other natural resources, the provinces which, by the voluntary action of their previously existing Governments entered Confederation, raise considerable revenues through land sales, sales of timber, mining royalties, leases of water powers, etc., while the Prairie Provinces formerly received from the Dominion special grants in lieu of land revenues. However, under legislation of 1930 whereby the Prairie Provinces were given control of their natural resources, all the provinces were placed on an equal footing in the administration of natural resources within their boundaries and as regards revenues accruing therefrom. Further, under Section 92 of the British North America Act, Provincial Legislatures are given authority to impose direct taxation within the province for provincial purposes and to borrow money on the sole credit of the province.

While the *laissez faire* school of political thought was predominant throughout the country, provincial receipts and expenditures were generally very moderate, as may be seen, both for individual provinces and for the provinces collectively, from Tables 26 and 27. From the commencement of the twentieth century, however, the Canadian public, more especially in Ontario and the West, began to demand increased services from their Governments, particularly in respect of education, sanitation, and public ownership and operation of public utilities. The performance of these functions necessitated increased revenues, which had in the main to be raised by taxation. Among the chief methods of taxation to be employed has been the taxation of corporations and estates, succession duties showing a considerably increased yield even within the comparatively short period of fifteen years from 1916 to 1931 covered by the statements compiled by the Finance Branch of the Bureau of Statistics.¹ The fact that provincial government is cheaper per head in the eastern provinces is evident from Table 27, which gives the per capita ordinary revenue and expenditure for various fiscal years from 1881 to 1931. This, however, is not to be taken as evidence that the larger services rendered to the public in the provinces west of the Ottawa river, are not worth what is being paid for them.

For the half-century subsequent to Confederation, the provincial accounts, published by each Government according to its own system of accounting, were quite incomparable as among the provinces, a fact much regretted by students of provincial public finance. Upon the creation of the Dominion Bureau of Statistics in 1918, its Finance Branch undertook the work of placing the various provincial public accounts on a comparable basis, correlating, for example, the revenue derived from succession duties, taxation of corporations, sales of public lands, royalties on forest, mineral and fisheries products, as well as the expenditures on such services as agriculture, civil government, education and public works. As the result of the Bureau's exhaustive analysis of the provincial public accounts, a summary statement of the ordinary receipts and expenditures of the Provincial Governments appeared for the first time in the 1919 Year Book. The various items of receipts and expenditures were classified under appropriate headings and a uniform terminology was adopted. From these statements it is possible to ascertain the amounts received and expended in each year under the respective headings for each province, as well as for the provinces collectively. The figures for the years 1916 to 1920 will be found on pp. 680-685 of the 1921 Year Book, those for 1921 on pp. 786-791 of the 1922-23 Year Book and those for 1922 to 1926 on pp. 836-841 of the 1927-28 Year Book.

¹ The succession duties collected by the provinces in 1931 amounted in the aggregate to \$18,650,659, as compared with \$1,020,972 as recently as 1904, or an increase of more than 18 fold in 27 years. The aggregate revenue raised by taxation of corporations, land, income and miscellaneous (exclusive of gasoline), increased from \$7,217,548 in 1916 to \$26,113,237 in 1931, an increase of 262 p.c. in 15 years.

The Bureau is at the present time engaged in making a more exhaustive analysis of the finances of the provinces, including extraordinary and capital as well as ordinary revenue and expenditure in the survey beginning with 1927.

Subsection 1.—Provincial Revenues and Expenditures.

Ordinary Revenues and Expenditures.—The total ordinary revenues of the nine provinces for their latest fiscal years for which final data are available ended 1931 were \$179,143,480 as compared with \$188,154,910 in 1930, \$183,598,024 in 1929, \$132,398,729 in 1925, \$92,653,023 in 1920 and \$50,015,795 in 1916. The total ordinary expenditures in 1931 were \$190,754,202 as compared with \$184,804,203 in 1930, \$177,542,192 in 1929, \$136,648,242 in 1925, \$88,250,675 in 1920 and \$53,826,219 in 1916. Thus the total ordinary revenues of the provinces show an increase of 258 p.c. in the short space of 15 years, while the total ordinary expenditures show an increase of 254 p.c. in the same period.

Considering individual provinces, the largest revenue for 1931 is that of Ontario, \$54,390,092, Quebec being next with \$41,630,620, and British Columbia third with \$23,988,199. As regards total expenditures for the same year, that of Ontario was highest, \$54,846,994, Quebec second with \$40,854,245, and British Columbia third with \$27,931,866. In 1931 British Columbia raised the largest revenue per head of population, *viz.*, \$34.55, while Prince Edward Island had the lowest, \$13.06. (For statistics of revenue and expenditure in 1930 and 1931, see Tables 24 and 25, and for figures showing the absolute and per capita growth of ordinary revenue and expenditure see Tables 26 and 27.)

The Growth of Provincial Taxation.—Whereas in earlier years the Dominion subsidies, together with the revenues arising out of the natural resources of the provinces and from fees for specific services rendered to the citizens, nearly sufficed to cover the whole expenses of government and rendered a resort to taxation for provincial purposes practically unnecessary in most of the provinces, the great increase in the functions of government since the commencement of the present century has put an end to this state of affairs. The aggregate amount of taxation for provincial purposes in the fiscal years prior to 1916 is unfortunately not available. Since that time provincial taxation has increased, according to the analyses made in the Dominion Bureau of Statistics, from \$15,025,281 in 1916 to \$92,550,438 in 1931, exclusive of liquor traffic profits, licences, etc., an increase of over six fold in 15 years.

The increase in the use of automobiles, both for commercial purposes and pleasure, is clearly demonstrated by the growing revenues from licences and permits issued by the Provincial Governments. In 1921 the total revenue of all provinces from automobile licensing amounted to \$7,857,751. It increased to \$9,290,900 in 1922; to \$13,020,607 in 1925; to \$15,822,339 in 1927; to \$21,735,827 in 1929; decreasing to \$20,321,307 in 1930 and to \$19,952,575 in 1931.

The growth of revenue from the gasoline tax still further demonstrates the increasing use of motor vehicles. In 1923 Manitoba and Alberta were the only provinces showing a gasoline-tax revenue, the total being \$280,404. In 1924 the five provinces of Prince Edward Island, Quebec, Manitoba, Alberta and British Columbia collected gasoline-tax revenue to the amount of \$559,543, while in 1925 the same provinces with Ontario added, collected \$3,521,388. In 1926 all pro-

vinces, except Saskatchewan, collected gasolene taxes which amounted to \$6,104,716, in 1927 to \$7,615,907 and in 1928 to \$9,151,735; thereafter, gasolene taxes were collected in all provinces and amounted to \$17,237,017 in 1929, \$20,956,590 in 1930 and \$23,859,067 in 1931.

The provincial revenues from the liquor traffic have increased considerably of late years. The adoption of government control of the sale of liquor in one province after another, until now it exists in all but Prince Edward Island, where prohibition is still in force, has resulted in trading profits, licensing revenues, and permit fees, all of which have swelled the provincial revenues. Prior to the adoption of government control such revenues were not available to the provinces. In 1925 the total revenue collected by all provinces from the liquor traffic was \$8,964,824; in 1926 it was \$11,609,392, increasing to \$16,793,656 in 1927. In 1928, it amounted to \$22,755,212, in 1929 to \$27,599,687, in 1930 to \$33,248,056 and in 1931 to \$32,128,693. The method of control varies somewhat as among the provinces. In the majority of cases there are independent commissions or boards to administer the provincial Liquor Traffic Acts, but the accounting and trading profits are shown somewhat differently in the various provincial public accounts reports.¹

Fiscal Years of the Provinces.—The fiscal years of the provinces end as follows: P.E.I., Dec. 31; N.S., Sept. 30; N.B., Oct. 31; Que., June 30; Ont., Oct. 31; Man. and Sask., April 30; Alta. and B.C., Mar. 31.

¹ See the Bureau of Statistics' report "The Control and Sale of Liquor in Canada".

Subsection 2.—Provincial Debts and Assets.

Total Liabilities of the Provinces.—The total direct liabilities of the provinces in 1931 amounted to \$1,276,629,288, showing a steady and rapid increase since 1896, when they were but \$51,315,130. In addition to the direct liabilities, there are also certain indirect liabilities which amounted in 1931 to \$210,668,231, so that the total liabilities of the provinces reached \$1,487,297,519 in that year. Figures are given by provinces for the fiscal years 1896, 1911 and 1916-32 in Table 28.

Bonded Indebtedness of the Provinces.—Of the total liabilities of the provinces the major part is represented by bonded debt owing to the public in Canada and abroad. The total bonded debt amounted to \$1,148,451,597 in 1932. In addition to this bonded debt there were treasury bills outstanding on provincial accounts amounting to \$103,707,602 for 1931. Figures of bonded debt for this and previous years to 1916 are given in Table 29. The rapid rise in the bonded debt of the provinces in the period under review is accounted for largely by the development of public ownership of utilities (such as the "Hydro" in Ontario), the extension of the highways and good roads systems in all provinces (highway debentures outstanding in 1931 accounting for almost \$375,000,000 of the provincial debt), the cultural training advances and requirements for the promotion of industrial activities and public and social welfare. These demanded heavy expenditures which could not easily be met out of current revenue, and the borrowings, while increasing the public debt, are in the main considered justifiable, as the public utilities are meeting from their revenues the interest on indebtedness incurred in their construction, and the provincial assets generally are sound enough to take care of capital investment for other services which are necessary to develop the country.

Interest Payments of the Provinces.—The interest payments of the Provincial Governments have naturally increased in proportion to their growing indebtedness described above. In 1916, the first year for which aggregate figures are available on a comparable basis, the total interest payments of the provinces were \$7,817,844, in 1921 they had risen to \$19,818,266, in 1926 they were \$37,366,925, in 1929 \$41,207,090, but in 1931 they were reduced to \$36,748,366 exclusive of interest paid by the N.S. Power Commission and the Ontario Hydro-Electric Power and other Commissions. The 1931 interest payments of the Provincial Governments were as follows: P.E.I., \$170,385; N.S. \$2,083,937;¹ N.B., \$2,310,825; Que., \$3,280,626; Ont., \$11,153,338;² Man., \$4,442,508; Sask., \$3,202,882; Alta., \$5,039,366; B.C., \$5,064,499.

¹The Nova Scotia Power Commission paid \$649,179 interest on funded debt.

²In addition the Hydro-Electric Power and other Commissions paid interest charges on their debt which, together with interest received on bond issues, amounted to \$11,644,748.

28.—Direct Liabilities of the Provincial Governments, by Provinces, for their respective fiscal years, 1896, 1911, 1916-32.

¹ Liabilities statement is for April 30; this amount includes \$500,000 due May 1. ² Subject to revision.

Assets of the Provincial Governments.—The liabilities of the Provincial Governments are to a considerable extent offset by corresponding assets, some of which are earning assets as in the case of the Nova Scotia Power Commission, the Ontario Hydro-Electric Power Commission and the Temiskaming and Northern Ontario Railway and the telephone systems of the Prairie Provinces. Further, a total of something like \$375,000,000 has been invested by the various Provincial Governments in highway systems, and while these systems cannot be considered as realizable assets, the interest charge on them may be considered as being met out of the large revenues derived from the gasoline tax and other taxation on motor vehicles. Back of all this is the value of the natural resources which, although not realizable in times like the present, may through their development assist in wiping off the obligations which mature in the years to come. A summary of provincial assets is presented in Table 30.

30.—Assets of the Provincial Governments at the close of

plant, livestock, equipment, unemployment relief works, etc. ²Nearly 84 p.c. of the "resources" assets shown for Ontario are in the form of pulpwood and timber resources. ³This item is for unsold school lands only, other resources not being shown.

Section 3.—Municipal Public Finance.¹

The existence of local self-governing units has always been characteristic of democratic societies, and nowhere more so than in Canada. The struggle for responsible government was naturally accompanied by an agitation for local self-government in the cities and towns of Canada and, after responsible government had been conceded, a complete system of municipalities was established throughout the old Province of Canada by the Municipal Act of 1849.² Under the division of powers made by the British North America Act between the Dominion and the Provincial Governments, legislation regarding municipal government, being a local matter, was naturally assigned to the provinces, which differ considerably with regard to their types of municipal organization. Thus in Prince Edward Island the only incorporated municipalities are the city of Charlottetown and seven incorporated towns. In British Columbia seven of the 33 cities have fewer than 1,000 people, while there are no towns at all and only sixteen villages; again, in the same province the rural districts are mainly administered from the provincial capital, there being only 28 rural municipalities. Finally, in Saskatchewan and Alberta there exist local improvement districts, areas which have not as yet been organized into rural municipalities, and where the taxes are levied, collected and expended by the Provincial Governments. Such districts, however, may be regarded as on the way to become self-governing rural municipalities and their statistics are therefore included in Table 31, which gives statistics of the numbers and types of municipalities in 1931.

¹ Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues statements on "Financial Statistics of Urban Municipalities of 10,000 Population and Over", on "Bonded Indebtedness of Municipalities" and on "Assessment Valuations of Municipalities". For a list of publications see Chapter XXIX, Section 1, under "Finance".

² For a brief outline of the rise of the municipal system of Ontario, see 1922-23 Year Book, p. 108.

¹ There are 44 counties in all, geographically, but a number are united for municipal purposes.

² Officially known as townships.

³ Nova Scotia has eighteen counties, some of which are "municipalities", while others are divided into "municipalities".

Municipal Assessments.—Throughout the Dominion, the chief basis of municipal tax revenue is the real estate within the limits of the municipalities; though in certain provinces personal property, income, and business carried on are also taxed. General taxes are normally assessed at the rate of so many mills on the dollar of the assessed valuations. In the Prairie Provinces, the values of improvements made to real property are often rated at a very low figure, e.g., in Saskatchewan, where the taxable valuations of buildings are about 12 p.c. of the taxable valuations of lands, and in Alberta, where they are about 27 p.c. of the taxable valuations of lands, as shown in Table 32.

There are various reasons for fluctuations in assessment valuations, due to differences in laws and varying practices with regard to assessment as among provinces, as among classes of municipalities and as among municipalities of the same class from year to year. Such matters are more fully dealt with in the special report of the Bureau on "Assessment Valuations by Provinces", obtainable on request.

Land valuations in the West, which in earlier years were somewhat inflated, have of late been assessed on a sounder basis, and in some provinces the Equalization Boards have placed a more equitable valuation on lands as among the various rural municipalities.

¹ Less land and buildings for the Maritime Provinces, Quebec and Manitoba. ² In N.S. personal property and income assessments for cities are for Sydney only. ³ Includes exemptions for municipality of Cumberland, Nova Scotia. ⁴ Local Improvement Districts not included in 1929 or 1931 in Alta. ⁵ In addition, assessments for schools only in Ontario were: townships \$2,730,538, towns and villages \$23,719,597 and cities \$92,401,140 in 1929; townships \$3,125,660, towns and villages \$22,347,193 and cities \$86,780,452 in 1930; and townships \$4,486,690, towns and villages \$2,049,195 and cities \$93,816,472 in 1931. ⁶ \$256,400 is by special franchise. ⁷ \$484,736 is by special franchise. ⁸ \$441,660 is by special franchise.

Bonded Indebtedness.—Like other Canadian governing bodies, the municipalities of the greater part of Canada borrowed rather freely during the boom period of 1900-12, and again during the nineteen-twenties. The bonded indebtedness of Ontario municipalities rose from \$153,568,409 in 1913 to \$499,002,074 in 1931, while that of Quebec municipalities increased from \$132,078,584 in 1914 to \$362,132,334 in 1931, and a proportionate increase took place in other provinces. The recent growth in the bonded indebtedness of all classes of municipalities is shown by provinces in Table 33. The figures show that there was an increase in 1931 over 1930 in each of the provinces. In Saskatchewan, net debenture debt is shown for all municipalities in 1925 and 1926, while from 1927 to 1931 the statistics represent gross debenture debt. In Alberta, the statistics given represent principally net debenture debt in 1925 to 1928, while in 1929, 1930 and 1931 gross debenture debt is given. All other provinces give total debenture debt throughout.

Section 4.—National Wealth and Income.

Subsection 1.—National Wealth.

There are several methods of computing national wealth, *i.e.*, the aggregate value of the public and private property within the nation apart from undeveloped natural resources. Perhaps the most familiar of these methods is that of working back to capital values through income tax returns, but this can be applied only in countries where all incomes are thoroughly appraised. A second method is that of estimation from probate returns, the value of the estates of deceased persons being regarded as representative. A third is that of a complete census, based upon a canvass of the individual. In the accompanying tables a fourth method, namely, the so-called "inventory" method, is employed; it consists in totalling the amounts known from various sources to be invested in agriculture, manufactures, dwellings, etc.

Whatever method is used, difficulty arises when we try to reduce all the things which go to make up wealth (things which once created are not themselves subject to violent change) to a common denominator. Estimates of national wealth must always be expressed in terms of the national currency and thus normally in terms of gold dollars. Yet the purchasing power of the currency unit is always fluctuating and since 1929 has increased by more than 50 p.c. in terms of wholesale prices. Even in 1930, the average index number of wholesale prices was down by nearly 10 p.c. from 1929, while in December of that year the average index number of wholesale prices was 19 p.c. lower than in the same month of 1929.

The effect of such drastic reductions in values is first felt by the commodities which are being currently produced and, through these commodities, the dollar value of production is diminished and consequently the national income of a country where most people are producers. Ultimately a persistent decline of this character affects the capital values of real estate, buildings, machinery, etc., and its influence is then felt in a reduction in the national wealth as stated in dollars. The 1929 estimate, which is considered to represent values in that year with approximate accuracy, is the latest which has been compiled by the Bureau of Statistics and the table below shows the national wealth on that basis.

The survey for 1929 placed the estimated aggregate of the tangible wealth of the Dominion, exclusive of undeveloped natural resources, at \$30,840,000,000 as compared with \$29,630,000,000 in 1928,¹ \$27,668,000,000 in 1927, \$26,691,482,000 in 1926, \$25,673,174,000 in 1925 and \$22,195,302,000 in 1921. These figures, however, are not exactly comparable, in view of certain improvements and additions that have been made in the method of estimation and in the items included. An increase of \$1,210,000,000 was shown in the national wealth in the year 1929, and of over \$8,600,000,000 in the eight years 1921 to 1929.

Aggregate and Per Capita Wealth of the Provinces, 1929.—As regards the provincial distribution of wealth, Ontario ranked first with estimated aggregate wealth of \$10,628,000,000 or 34.46 p.c. of the total and Quebec second with estimated wealth of \$8,265,000,000 or 26.8 p.c. of the whole. Saskatchewan was third, with estimated wealth of \$3,047,000,000 or 9.88 p.c. of the total for the Dominion.

¹Revised figures.

While Ontario led in absolute wealth, the western provinces came first in per capita wealth; British Columbia held first rank with a per capita wealth of \$4,012; Alberta second with \$3,518; Saskatchewan third with \$3,451 and Manitoba sixth with \$2,910. These figures may be compared with \$3,188 and \$2,982, the per capita wealth of Ontario and Quebec respectively, and \$3,076, the per capita wealth for the whole Dominion. Further details are furnished in Table 35.

As the statistics of population and wealth for Yukon are uncertain, the per capita estimate of wealth is open to question and has not been shown.

35.—Provincial Distribution of the National Wealth of Canada, with Percentage and Per Capita Analyses, 1928 and 1929.

NOTE.—Figures for 1921 and 1925 are given on pp. 849-850 of the 1927-28 Year Book, for 1926 on p. 827 of the 1930 Year Book and for 1927 on p. 870 of the 1931 Year Book.

¹Includes 7,000 population in the Northwest Territories or 0-07 p.c.

²As the statistics of population and wealth for Yukon are uncertain, the per capita estimate of wealth is open to question and has not been shown. ³Revised figures. ⁴Per capita figures are worked out on the basis of revised populations, see p. 145.

Wealth of Canada, by Items, 1929.—In the items included in Table 36, all duplications have been excluded. In any consideration of the individual items it should be remembered that each item covers only the portion of wealth which is mentioned in the description of the item. For example, the item of fisheries includes only capital invested in primary operations, while capital invested in fish-canning and -curing establishments is included under manufactures, though it might also be considered as part of the wealth connected with fisheries. In the same way, the items for manufactures do not include lands and buildings in urban centres, which are shown under the heading of urban real property.

The total agricultural wealth in 1929 was \$7,939,477,000, being 25.74 p.c. of the whole. This amount included the value of agricultural production in 1929, or \$1,631,124,000, to cover the average stocks of agricultural goods in the possession of farmers and traders and the amount invested in preparation for the new crop.

The largest element in the national wealth was urban real property, which in 1929 attained first place although it was previously second to agriculture. This item included the assessed valuations of taxed and exempted property, to which was added one-third to provide for undervaluation by assessors and for roads, bridges and sewers. The estimated value, as based on returns for 1929 received in the Bureau, was \$8,251,011,000 or 26.75 p.c. of the total wealth of the Dominion.

The wealth invested in steam railways, computed from the cost of road and equipment, and distributed by provinces on the basis of mileage, constituted the third largest item, amounting to \$3,153,351,000 or 10.22 p.c. of the total.

Another important item is the tangible value of the forests, amounting to \$1,877,000,000 or 6.09 p.c., and including the estimated value of accessible raw materials, pulpwood, and capital invested in woods operations. In 1929, as in previous years from 1926, this item included an estimate of the value of young growth, accounting for an increase in the estimates for these years compared with 1925.

The value of machinery and tools in manufacturing establishments and of lands and buildings of manufacturing concerns in rural districts was estimated at \$1,418,040,000 in 1929 or 4.60 p.c. In addition the estimated value of materials on hand and stocks in process in manufacturing establishments was set at \$837,805,000 in 1929 or 2.72 p.c. In 1925 this item included an estimate for stocks of manufactured goods in the hands of dealers, but in the present statement this is included in the item for trading establishments, which shows the estimated value of furniture and fixtures, delivery equipment, and materials and stocks on hand in 1929 as \$1,136,291,000 or 3.68 p.c. of the total. Three additional classes of wealth have been included in the estimate for 1929 which were not taken account of in earlier estimates. To this extent, and on account of the later revision of earlier figures, the totals of this and other years are not comparable. The three classes so included are harbours, highways and aircraft. The \$367,488,000 credited to harbours represents the approximate capital expenditures for harbour works such as wharves, piers, breakwaters, dredging or other harbour and river improvements. The investment in certain piers and wharves connected with the fishing industry is, however, included under the item "Fisheries" The amount credited to highways is estimated on a conservative basis, and is not intended to be all-inclusive, but is considered the best estimate that can be made from existing data. The value of aircraft is taken as the original cost of the aircraft registered in the different provinces less an allowance for depreciation worked out with the co-operation of the Air Service Branch of the Department of National Defence. The resulting estimate of \$2,398,000 is included with "shipping"

On the basis of the estimated population of 1929 of 10,027,000, the per capita investment in urban real estate was \$823, in agriculture \$792, in steam railways \$314, in the forests \$187 and in household furnishings and personal property \$137. The per capita wealth of all kinds was \$3,076. Further details of the items are presented in Table 36.

35.—Estimate of the National Wealth of Canada, with Percentage and Per Capita Distribution of Component Items, 1929.

Classification of Wealth.	Aggregate Amount.	Percentage of Total.	Average Amount per head of Population. ¹

Telephones (cost of property and equipment).....	291,589,000	0.95	29.08
Urban Real Property (assessed valuations and exempted property and estimate for undervaluation by assessors and for roads, sewers, etc.).....	8,251,011,000	26.75	822.88
Canals (amount expended on construction to Mar. 31, 1930).....	241,946,000	0.79	24.13
Harbours (approximate amount expended to Mar. 31, 1930) ¹	367,488,000	1.19	36.65
Shipping (including aircraft) ²	149,306,000	0.48	14.89
Imported Merchandise in store (estimated at one-half imports during 1929).....	649,477,000	2.11	64.77
Automobiles (estimate of the value of automobiles registered).....	758,424,000	2.46	75.64
Highways, etc. ¹	364,896,000	1.18	36.39
Household Furnishings, Clothing, etc. (value estimated from production and trade statistics).....	1,370,000,000	4.44	136.63
Specie, Coin and other Currency held by the Government, chartered banks and the general public.....	201,030,000	0.65	20.06
Grand Totals.....	30,840,210,000	100.00	3,075.72

¹This class of wealth was not included in estimates published for previous years in earlier editions of the Year Book.

²The total for "shipping" includes, for the first time, an estimate for aircraft amounting to \$2,398,000 for 1929.

³See Table 35 for the revised estimate of population upon which these per capita figures are based.

Analyses by Provinces and Classes of Wealth.—In Table 37 will be found detailed statistics of the wealth of each province by leading items. Again the suggestive character rather than the strict accuracy of such data must be emphasized. The specie holdings, for instance, are distributed among the provinces according to their populations, since they are an asset of Canada as a whole rather than of the particular locality in which they happen to be deposited.

37.—Estimate of National Wealth of Canada, 1929, by Provinces and Classes.

NOTE.—For a fuller description of the various items, see the table immediately preceding.

Subsection 2.—National Income and Income Tax Statistics.

The national income of Canada is necessarily less than its national production, a total for which is suggested in the general survey of production on pp. 203-214 of this volume. If, as there pointed out, there is no reason to suppose that those whose activities are not connected with the production of "form utilities" are less "productive" in the broad sense of the term than others, the total value of the production of 1930 must have been about \$5,150,000,000.

In order to arrive at the figure of national income, however, certain heavy deductions from the above amount must be made—deductions especially connected with the maintenance of the industrial equipment of the country—providing not only for depreciation but for obsolescence and replacement by new and improved apparatus of production. Altogether, the charges under this head may have been about \$400,000,000. This would leave the 1930 income of the Canadian people at somewhere in the neighbourhood of \$4,750,000,000.

Incomes Assessed for Income Tax in Canada.¹—In those countries of the world where an income tax has been established for a considerable time the figures of the assessed income have been generally accepted as furnishing a guide both to the amount and to the distribution of the total national income by classes. Estimates of the national income, based upon income tax statistics, have been published, for example, in Great Britain and in the United States.

¹This material has been revised by the Income Tax Branch of the Department of National Revenue.

The war income tax was introduced into Canada in 1917. Under the Income War Tax Act, the returns of the incomes of individuals and corporations are filed in the year following the earning of the incomes. Further, since the fiscal year ends on Mar. 31, the bulk of the receipts from the income tax usually comes in during the first two or three months of the next following fiscal year. Thus the income tax received in the fiscal year ended Mar. 31, 1932, represents, in the main, income tax collected on 1930 income and the income tax collected in the fiscal year ended 1931 represents in the main 1929 income. It is important that these facts should be kept in mind when considering income assessed in different years. Further, the particular provisions of the income tax existing at any particular time and the amendments extending or contracting the scope of the income tax by raising or lowering the limit of taxable income or increasing or lowering the allowances for children, etc., should also be borne in mind in the consideration of the following tables. Among these, Table 38 gives the grand total income of individuals and corporations assessed for the purpose of income war tax for the last twelve years, while Table 39 gives this income by provinces for the last five years and Table 40 shows the amount of income tax collected by provinces in the last five years. Tables 41 and 42 analyse the payments of income tax in the last four years by size of income class and by occupation of the taxpayer, respectively.

Subsection 3.—Outside Capital Invested in Canada and Canadian Capital Invested Elsewhere.¹

An estimate of the outside capital invested in Canada and the Canadian capital invested outside of the Dominion is now prepared annually by the Internal Trade Branch of the Dominion Bureau of Statistics. Any estimate of this character is liable to a margin of error, but the utmost care has been taken in the computation and it is believed that the figures approximate fairly to actual conditions. More complete information is being obtained from year to year, enabling corrections to be made in previous estimates such as were published at p. 836 of the 1929 Year Book. Details of the investment of outside capital in Canada according to the latest revision (February, 1932) are given for the last five available years in Table 43.

It is estimated that the total investment of British and foreign capital in Canada on Jan. 1, 1931, was \$6,477,879,000. Of this sum, \$2,204,857,000 was British capital, \$4,107,803,000 was from the United States and \$165,217,000 from other countries. Though these totals are large, it should be remembered that the national wealth of the Dominion in 1929 is estimated at \$30,840,210,000 exclusive of the value of those undeveloped natural resources in which some of the outside capital is invested, and that it is inevitable that at the present stage Canada should seek the assistance of outside capital to develop the unexploited natural resources of the Dominion.

It must also be borne in mind that Canadians have invested large amounts of capital abroad. The Bureau estimates that Canadian investments in other countries amounted to \$1,831,310,000 at the beginning of 1931, or nearly 30 p.c. of the amount of outside investments in Canada. Of this \$1,047,285,000 was placed in the United States, \$84,826,000 in Great Britain and \$699,198,000 in other countries. (Table 44.)

It is estimated that the amount of business capital employed in Canada is \$17,500,000,000. This sum includes the bonded indebtedness of Dominion, Provincial and municipal governments, investments in railways, all manufacturing concerns, mines and metal industries, public utilities, trading establishments, finance, insurance, land and mortgages. It does not include private capital in domestic enterprises such as farms, homes, etc. Of this sum it is estimated that 65 p.c. or \$11,500,000,000 is owned in Canada; 21 p.c. or \$3,725,000,000 in United States; 13 p.c. or \$2,228,000,000 in Great Britain; 1 p.c. or \$171,000,000 in other countries.

If the basis of comparison is total national wealth, British and foreign investments decrease in significance. Canada's national wealth in 1930 was probably \$30,000,000,000; net British and foreign investments in Canada were about \$4,647,000,000 or 15½ p.c. of the total.

¹Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. For a list of the publications of this Branch see Chapter XXIX, under "Internal Trade".

CHAPTER XXII—CURRENCY AND BANKING; LOAN AND TRUST COMPANIES.

Section 1.—Canada's Monetary System.

Historical.—Early trade in Canada was carried on by barter, which at times resulted (e.g., in transactions between Indians and fur traders) in the adoption of beads, blankets, etc., as recognized media of exchange. Later, during the French period in Canada, while barter still formed perhaps the most important means of exchange between individuals and merchants, a more or less satisfactory currency system developed. Beaver and other furs, tobacco and wheat were at times used as substitutes for currency, the last named being at one time a legal tender. A makeshift currency system was also developed during the French *régime* when playing cards, stamped with a value and redeemable yearly on the receipt of bills of exchange on Paris, came into circulation. Other paper money was also issued, and the total amount outstanding at the time of the cession was estimated at 80,000,000 livres, which was nearly all lost to its holders.

The British Government next sought to establish a uniform standard of colonial currency, but since at this time French coinage again began to come into circulation and the Spanish dollar also rivalled the English shilling as the most common medium of exchange, this was not universally possible. English sovereigns were overrated in terms of dollars in an endeavour to encourage their circulation. A rate of 5s. to the dollar was set in Halifax and was in use in government accounting systems, while in Montreal, York currency (the rates prevalent in New York), giving the dollar an exchange value of 7s. 6d. or 8s., was in common use.

Canadians again became more or less familiar with the characteristics of paper money as a result of the experiences of the various neighbouring Northern States during the first half of the nineteenth century. During the war of 1812 this familiarity was increased by the establishment of an army bill office, issuing bills of various denominations, redeemable on presentation. The growing volume of trade between Canada and the United States also resulted in a tendency toward a decimal coinage, and in 1853 a measure was passed providing for the adoption of a decimal currency, with a dollar equivalent to the United States dollar; the British sovereign was made legal tender at \$4.86 $\frac{2}{3}$. An Act of 1857 requiring all government accounts to be kept in dollars and cents came into force on Jan. 1, 1858; the formal adoption of decimal currency in the Province of Canada dates from that time.

By the Uniform Currency Act of 1871 (34 Vict., c. 4), the decimal currency was extended throughout the Dominion, the British sovereign was made legal tender for \$4.86 $\frac{2}{3}$ and the United States eagle, legal tender for \$10, while authority was given to coin a Canadian \$5 gold piece. No Canadian gold coinage was issued, however, prior to the establishment of the Canadian branch of the Royal Mint in 1908, the first coins then struck being sovereigns similar to those of Great Britain, but with a small "C" identifying them as having been coined in Canada. In May, 1912, the first Canadian \$10 and \$5 gold pieces were struck, but the Canadian gold coinage has so far been limited in amount, since Canadians have generally preferred Dominion notes to gold for use within the country and, when gold is needed for export, bullion or British and United States gold coin serve the purpose equally well.

The Royal Canadian Mint.—The Ottawa Mint, established as a branch of the Royal Mint under the (Imperial) Coinage Act, 1870, and opened on Jan. 2, 1908, was by 21-22 Geo. V, c. 48, constituted a branch of the Department of Finance, and by the Proclamation of Nov. 14, 1931, issued under Section 3 of that Act, it has since Dec. 1, 1931, operated as the Royal Canadian Mint. At first the British North American provinces, and later the Dominion of Canada, obtained their coins from the Royal Mint in London or from The Mint, Birmingham, Ltd., and in its earlier years the operations of the Mint in Canada were confined to the production of gold, silver and bronze coins for domestic circulation, of British sovereigns, and of small coinages struck under contract for Newfoundland and Jamaica. Previous to 1914 small quantities of gold bullion were refined, but during the War the Mint came to the assistance of the British Government by establishing a refinery in which nearly twenty million ounces of South African gold were treated on account of the Bank of England, and the subsequent great development of the gold-mining industry in Canada has resulted in gold-refining becoming one of the principal activities of the Mint. Gold coins have never been a popular medium of exchange in Canada and have not been struck since 1919, most of the fine gold produced from the rough shipments from the mines being delivered to the Department of Finance in the form of bars worth approximately \$8,300 each, the rest being sold in a convenient form to manufacturers. The fine silver extracted from the rough gold, when not required for coinage, is sold on the New York market or disposed of to local manufacturing firms.

The domestic currency of Canada, as at present authorized by the Currency Act, consists of: \$20, \$10, \$5 and \$2½ gold pieces, 900 millesimal fineness (only \$10 and \$5 pieces have been issued); of \$1, 50-cent, 25-cent and 10-cent silver pieces, 800 millesimal fineness; of 5-cent pieces of pure nickel (from metal produced in Canada); and of 1-cent pieces in bronze. The silver 5-cent piece is still legal tender but its coinage was discontinued in 1921; the silver dollar has never been coined.

Gold.—Gold is used only to an insignificant extent as a circulating medium in Canada, its monetary use being practically confined to reserves, but \$5 and \$10 gold pieces weighing respectively 129 and 258 grains, 9-10ths pure gold by weight, have been coined, the Canadian gold dollar thus containing 23·22 grains of pure gold. These coins were first issued in 1912, authority to issue them having been conferred in 1910. By the Currency Act, 1910 (9-10 Edw. VII, c. 14), British sovereigns, which are legal tender for \$4.86½, and other gold coins, and the \$5, \$10 and \$20 gold coins of the United States, which contain exactly the same weight of gold as Canadian gold coins of these denominations, are also legal tender. These, however, are almost entirely divided between the Dominion Government and the banks as reserves, and the chief circulating medium of the country is provided by paper and token currency.

Table 1, compiled by the Master of the Royal Canadian Mint, shows the value of the gold bullion received for treatment at the Ottawa Mint since its foundation, together with the gold coin and bullion issued. A statement of the gold, silver, nickel and bronze coinages issued to the separate provinces and to the Dominion of Canada since 1858 is published as Table 2. Table 3, compiled by the Dominion Comptroller of Currency, gives the form in which the gold has been held by the Government in recent years.

Token Currency.—Canadian silver dollars weighing 360 grains, 37-40ths fine, are provided for by the Currency Act of 1910, but no silver dollars have ever been struck by the Mint. Fifty-, 25-, 10-, and 5-cent pieces of weight proportionate to their respective fractions of the dollar, and of the same fineness, are in circulation, but, by c. 9 of the Statutes of 1920, the standard of fineness was reduced to 8-10ths. In 1921 the coinage of a nickel 5-cent piece weighing 70 grains was authorized. Silver coins are legal tender only up to ten dollars, nickel coins to five dollars, and bronze coins to twenty-five cents. Table 4 shows the net issue of silver and bronze coins (that is, the value issued less the value withdrawn), by years from 1901.

¹The figures for net amounts of coin issued show the values issued less the values withdrawn and to this extent do not correspond with the figures shown in Table 2.

²The decreases shown in recent years are due to the withdrawal of worn and mutilated silver coins from circulation.

Dominion Notes.—At the present time Dominion notes may be issued under any one of three statutory authorities: (1) the Dominion Notes Act (R.S.C. 1927, c. 41), which requires a gold reserve of 25 p.c. to be held against the first \$50,000,000 of notes issued and full gold coverage against any issue in excess of \$50,000,000; (2) the Finance Act (R.S.C. 1927, c. 70), Part II of which authorizes the Minister of Finance to advance to any chartered bank or to the savings banks of Quebec, Dominion notes to any amount on the pledge of approved securities deposited with the Minister. These advances bear interest and no gold coverage is required to be held on Dominion notes so advanced; (3) Chap. 4 of the Statutes of 1915, authorizing the Government to issue Dominion notes to the amount of \$26,000,000 without gold coverage, but partly covered by the deposit of \$16,000,000 of railway securities guaranteed by the Dominion Government.¹

Dominion notes are of two types, those in general circulation and those used only in inter-bank transactions, the latter being described as "special" notes. Notes in general circulation are of the denominations 25 cents, \$1, \$2, \$4, \$5, \$50,

¹The following is an outline of Canadian legislation respecting the issue of notes. After Confederation, by an Act of 1858 (31 Vict., c. 46), authority was given for the issue of notes to the extent of eight million dollars. The reserve was fixed at 20 p.c. up to a circulation of five millions; beyond that, 25 p.c. to be held as reserve. The law of 1870 (33 Vict., c. 10) authorized a limit of nine million dollars. The reserve was fixed at 20 p.c., but the nine millions were only to be issued when the specie amounted to two millions. Dollar for dollar was to be held beyond nine millions. In 1872 (35 Vict., c. 7) the reserve for the excess over nine millions was fixed at 35 p.c. in specie. This was amended in 1875 (38 Vict., c. 5) by requiring dollar for dollar beyond twelve millions; for the reserve between nine and twelve millions 50 p.c. in specie was to be held. In 1876 the law respecting Dominion notes was extended to the provinces of Prince Edward Island, British Columbia and Manitoba. In 1880 (43 Vict., c. 13) the basis of the present standard was established. A reserve of 25 p.c. in gold and guaranteed debentures was required, of which 15 p.c. at least was to be in gold. The limit was raised to twenty million dollars. In 1894 (57-58 Vict., c. 21) the limit was raised to twenty-five millions, but this was found unworkable and was repealed in 1895 (58-59 Vict., c. 16), and authority was given to issue notes to any amount over twenty millions, on holding dollar for dollar beyond that sum. In 1903 (3 Edw. VII, c. 43) the Minister of Finance was required to hold gold and guaranteed debentures of not less than 25 p.c. on Dominion notes issued and outstanding up to thirty million dollars; beyond thirty millions he was required to hold gold equal to the excess. The Dominion Notes Act of 1914 (5 Geo. V, c. 4), passed in the short war session of August, 1914, provided that a gold reserve of not less than 25 p.c. should be held against issues of Dominion notes up to \$50,000,000 and dollar for dollar against the excess. In the same session, the Government was given power, by 5 Geo. V, c. 3, "in case of war, invasion, riot or insurrection, real or apprehended, and in case of any real or apprehended financial crisis", by proclamation to authorize the issue of Dominion notes to the chartered banks upon their pledge of approved securities deposited with the Minister of Finance. This was made a regular and permanent feature of the system by c. 48 of the Statutes of 1923, consolidated as c. 70, R.S.C. 1927, as stated above.

\$500, \$1,000, but for a considerable time no notes of \$4, \$50 or \$100 denomination have been issued. "Special" notes are mainly of \$5,000 or \$50,000 denominations, \$1,000 "specials" being no longer issued. The amounts of each denomination of both types of notes in circulation are given, as at Mar. 31 of each recent year, in Table 7, while Tables 5 and 6 are concerned with gold reserves.

¹Includes Dominion notes in the Central Gold Reserves as security for bank note circulation.

²Includes provincial notes amounting to \$32,857 in 1890 and reduced to \$27,594 on June 30, 1932.

³Includes issue of \$50,000 notes, 1919-32.

⁴Per capita circulation in 1900 is taken as 100.

⁵The circulation uncovered by specie reserve was to a considerable extent covered, between 1890 and 1910, by the holdings of guaranteed debentures amounting to \$1,946,666. Since 1914 a part of the issue of Dominion notes outstanding has been covered by the holding of securities approved under the Finance Act,

Bank Notes.—Bank notes form the chief circulating medium used in Canada. Under the Bank Act, the banks are authorized to issue notes of the denominations of \$5 and multiples thereof to the amount of their paid-up capital. These notes are not in normal times legal tender.

In addition, during the period of the movement of the crops (Sept. 1 to Feb. 28-29), the banks may issue "excess" circulation to the amount of 15 p.c. of their combined capital and "rest" or reserve funds. In the event of war or panic the Government may permit the "excess" to run all the year. The banks pay interest on this excess at 5 p.c. If a bank desires to extend its circulation, it may also do so by depositing dollar for dollar in gold or Dominion notes in the Central Gold Reserves.

In case of insolvency the notes of a bank are a first lien upon its assets. Notes are further secured, in case of insolvency, by the Bank Note Circulation Redemption Fund, to which all banks contribute 5 p.c. of their average circulation not covered by gold or Dominion notes deposited in the Central Gold Reserves established in 1913. The sum thus secured is available for the redemption of the notes of failed banks.

The figures of bank note circulation are given in Table 8. Table 9 brings together the statistics of the amount of circulating media in the hands of the general public, yearly averages being used where possible. "In the hands of the general public" here includes coin and small Dominion notes in the tills of the banks used for making change as well as that outstanding among the general public, but does not include Dominion notes of denominations larger than five dollars which are used almost entirely for inter-bank transactions and reserves. In both Tables 8 and 9 "bank notes in circulation" include notes of other banks held by the banks, averaging about \$11,000,000 in 1932. As for the silver, nickel and bronze coinage in Table 9, the figures are the total amounts issued by the Mint since 1858 less amounts withdrawn from circulation and therefore include amounts held by the banks as well as coins lost by the public, which over such a period would probably amount to a considerable sum.

3.—Statistics of Bank Note Circulation, calendar years, 1906-32.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year. Figures for 1892-99 will be found at p. 851 of the 1927-28 Year Book.

Section 2.—Banking in Canada.

Historical.—In the early days of banking, one of the chief functions of banks was to issue promissory notes payable to the bearer on demand; where the bank's credit was good these notes passed freely from hand to hand, and were the chief circulating medium in the Canadas. In some cases in the Maritime Provinces bank notes were preferred to those issued by the Provincial Governments.

The need of a uniform circulating medium in Canada was felt by the merchants of Montreal toward the end of the eighteenth century, and the prospectus of a proposed bank of issue to be known as the Canada Banking Company was issued in 1792. This scheme, however, depended chiefly on the co-operation of British capital and was frustrated by the outbreak of war with France. A second project in 1808 for the incorporation of a Bank of Canada failed to secure the assent of the Legislature of Lower Canada.

At the close of the war of 1812 the army bill currency was withdrawn, and public attention once more turned to the expediency of securing a currency through the establishment of banks. The Bank of Montreal began business toward the end of 1817 as a private institution, under articles of association based on the first charter of the Bank of the United States. In the following year, under similar articles of association, the Quebec Bank was established, as well as the Bank of Canada at Montreal and the Bank of Upper Canada at Kingston. The three Lower Canadian institutions obtained their provincial charters in 1822, while the Bank of Upper Canada was superseded by a second Bank of Upper Canada established at York (Toronto) as a chartered bank in 1821. Meanwhile the Bank of New Brunswick had been incorporated in 1820, while in Nova Scotia the Halifax Banking Co. (private) commenced business in 1825, and the Bank of Nova Scotia received a regular charter in 1832. With all of these earlier banks note issue was an important part of their business.

The Bank of British North America, previously incorporated in Great Britain, commenced business in Canada in 1836, while Molson's Bank was established in 1853, the Bank of Toronto in 1855, the Banque Nationale in 1860 and the Banque Jacques-Cartier (later the Banque Provinciale du Canada) in 1862. The Union Bank was established in 1866, the Canadian Bank of Commerce in 1867. There were no fewer than 28 banks in existence at Confederation. These were as follows:—

Ontario and Quebec.

Bank of Montreal.
 Quebec Bank.
 Commercial Bank of Canada.
 City Bank.
 Gore Bank.
 Bank of British North America.
 Banque du Peuple.
 Niagara District Bank.
 Molson's Bank.
 Bank of Toronto.
 Ontario Bank.
 Eastern Townships Bank.
 Banque Nationale.
 Banque Jacques-Cartier.
 Merchants' Bank of Canada.
 Royal Canadian Bank.

Union Bank of Lower Canada.
 Mechanics' Bank.
 Canadian Bank of Commerce.

Nova Scotia.

Bank of Yarmouth.
 Merchants' Bank of Halifax.
 People's Bank of Halifax.
 Union Bank of Halifax.
 Bank of Nova Scotia.

New Brunswick.

Bank of New Brunswick.
 Commercial Bank of New Brunswick.
 St. Stephen's Bank.
 People's Bank of New Brunswick.

Subsection 1.—The Canadian Banking System in General.¹

A brief résumé of the Canadian banking system must emphasize: (1) its growth, from the beginning closely related to the Montreal produce and export trade and to the commerce of Halifax and Saint John; (2) its development of the branch bank system in order to meet the demands of a rapidly moving frontier of settlement; (3) its adaptation to the requirements of the grain and cattle trade of the west; and (4) the consolidation during later years of the features which tended towards its early success. The development of a stable system has been accompanied by failures,² particularly marked about the middle of the 19th century, but progress has nevertheless been steady, based on sound principles, and adapted as closely as could be to the particular needs of the country.

The branch bank is perhaps the most distinctive feature of the Canadian system as it exists to-day, and for a country such as Canada, vast in area and with a small population, the plan has proved a good one. A result of the growth of

¹For details regarding Canadian bank note issue, see pp. 887 and 888. ²See Table 23, pp. 908 and 909.

branch banks has been the partially centralized system that now obtains—centralized as to banks, of which there are now 10, rather than as to districts as in the partially centralized system of the United States.

A second peculiarity of the system is the existence and operation of the Canadian Bankers' Association. Through this body, which was incorporated in 1900 and acts under the authority of the Dominion Treasury Board, co-operation of individual banks is facilitated and encouraged. The association supervises clearing-house transactions, appoints curators to supervise the affairs of banks which have suspended business, and oversees the printing and issue of notes to its members. Adherence to similar principles and a linking together of the credit of the system result from the co-operation secured through the association.

The elimination of weaker banks or their amalgamation with more stable institutions has been a progressive move towards greater efficiency. Co-operation between the banks and the Dominion Government has been made permanent through the medium of periodic returns and the regulation of note issues and reserves.

Apart from the many detailed services rendered to its clients, the Canadian banking system may be said to perform three main functions as follows:—

1. To put into circulation the paper currency which forms the circulating medium for small exchanges.
2. To provide a mechanism of exchange by the issue of bills of exchange, etc.
3. To form a means by which the credit of the banks and their unused deposits may be put to immediate productive use.

Banking Legislation.¹—The history of Canadian banking legislation began over a century ago with the granting, between 1817 and 1822, of the Royal Assent to charters incorporating the Bank of New Brunswick, the Bank of Upper Canada, the Bank of Montreal, the Quebec Bank and the Bank of Canada. The right to issue bank notes existed and was exercised by private banks without legislative sanction for a considerable period after the early charters were granted, and before banks became the subject of general legislation. In Lower Canada the practical monopoly of issue was conferred upon the chartered banks by an Act of 1830, whereby the total amount of notes of less than £1 (\$4)² in circulation might not at any time exceed one-fifth of the paid-up capital, and no notes under 5 shillings (\$1) might be issued, it being further provided that all issues of less than £1 might be limited or suppressed by the Legislature.

In 1841, in the first session of the Canadian Legislature after the Union, a tax of 1 p.c. was imposed upon bank note circulation, which was limited to the amount of paid-up capital, notes of less than £1 not to exceed one-fifth of such capital. Various charters granted or renewed after the Union included provisions prohibiting banks from holding shares of their own stock or granting advances there-against. They were also prohibited from lending on the security of lands, houses, ships or pledge of merchandise (though such could be taken as additional security for debts previously contracted) or holding lands or houses except for the transaction of their business, neither could they own ships or be engaged in trade except as dealers in bullion or bills of exchange, the object being to confine transactions to legitimate banking business. Statements of assets and liabilities were to be submitted periodically—half-yearly or yearly—and such further information as the Government might call for was to be supplied confidentially. A further and

¹ Revised from information furnished by the Office of the Inspector-General of Banks, Department of Finance.

² In the "Old Currency" £1 was equivalent to \$4 and 1 shilling to 20c.

important enactment was the imposition of the double liability upon shareholders, which had not previously existed with respect to the banks of Lower Canada, although it had been for several years a requirement of the younger banks of Upper Canada and first appeared in British North America in the Act incorporating the Bank of Nova Scotia, enacted in 1832. Suspension of specie payments on demand for a period of 60 days, either consecutively or at intervals during one year, was to cause forfeiture of charter. Total liabilities were not to exceed thrice "the aggregate amount of capital stock paid in, and the deposit made in the bank in specie and Government securities for money", but this provision proved of doubtful utility.

In 1850 what was known as the "Free Banking Act" prohibited any but the chartered banks or other corporations or persons authorized under the new Act from issuing notes. A period of one year was allowed for banks or companies, whose right of issue was thus withdrawn, to retire their notes outstanding. It was provided that individuals or partners might establish banks, or joint stock companies with a minimum capital of £25,000 (\$100,000) might be formed to carry on the business, but in such cases operations were to be confined to an office in only one place and total liabilities were not to exceed thrice the amount of paid-up capital. In order to issue notes the banks thus formed were obliged to deposit with the Receiver-General provincial or provincially guaranteed securities for not less than £25,000 (\$100,000) par value, receiving therefor registered notes. The chartered banks already existing could surrender their right of circulation against assets and secure from the Receiver-General registered notes in return for the deposit of securities, which special issue was not subject to the 1 p.c. tax imposed by the Act of 1841. The legislation included provisions giving effect for the first time to the principle of making bank notes a preferred claim, it being stipulated with respect to any one-office banks established under the Act that, if securities against outstanding notes did not realize sufficient, the general assets of a bank, if wound up, were first to be applied towards the payment of its notes.

Legislation of 1851 increased the period allowed for the retirement of note issues not in conformity with previous legislation from one to five years, provided at least one-fourth of the average circulation during the year 1850—and not secured by the pledge of bonds—was retired annually. Provision was made for partial remission and entire exemption within a specified period from the tax on bank-note circulation, subject to certain restriction of such circulation. At the same time permission was granted to issue in excess of the restricted formula against gold or silver coin or bullion, or debentures of any kind issued by the Receiver-General, without requiring the banks actually to deposit such debentures and secure registered notes. The debentures, however, were to be applicable exclusively to the redemption of notes in case of failure. Monthly rather than half-yearly returns now became necessary. In 1853, to encourage the issue of "secured" notes, the issue was permitted in excess of paid-up capital to the extent of specie holdings or debentures receivable, although actual deposit of securities with the Receiver-General was not required. The tax of 1 p.c. was to be calculated only on the average circulation outstanding in excess of such specie and security holdings. Until 1858 banks charging or receiving interest at a rate higher than 6 p.c. were liable to onerous penalties. In that year it was enacted generally that any rate of interest might be exacted, but banks were prohibited from taking or stipulating for a higher rate than 7 p.c. In 1859, at the urgent request of the banks, a measure was passed authorizing them to make advances on the security of bills of lading and warehouse receipts covering certain commodities.

By 1861-2 free banking had practically run its course. In all, six banks had taken advantage of the legislation, one of which—the Bank of British North America—doubtless found it valuable. The others did not thrive. The Act was finally repealed by the Provincial Notes Act of 1866, which aimed at a gradual reduction in the volume of bank note circulation.

By Section 91 of the British North America Act, the right to legislate respecting banking, the incorporation of banks and the issue of paper money was assigned exclusively to the Dominion Parliament. A temporary measure was passed in 1867, largely by way of re-enactment until 1870 of previous legislation, but extending the powers of banks formerly incorporated by any of the provinces to the territory of the whole Dominion, and subjecting banks in New Brunswick and Nova Scotia to a tax of 1 p.c. upon the excess of their average notes in circulation above their average holdings of coin and bullion. (In these provinces there had been no general banking Act, special provisions being embodied in the respective charters which differed in only a few essential respects from those granted in Upper and Lower Canada.) It was re-enacted that banks were entitled to hold and dispose of mortgages on realty as additional security for debts already contracted and to acquire title to mortgaged property if necessary.

The Bank Act of 1870 provided that new banks must have a minimum paid-up capital of \$200,000 and that at least 20 p.c. of the subscribed capital must be paid up in each year after the commencement of business. A proposal to limit the liabilities of banks in relation to capital and specie and Government debenture holdings was not translated into legislation. Bank notes in circulation were not to exceed the amount of paid-up capital. The right to issue notes under \$4 was withdrawn, largely in consideration of the abolition of the tax of 1 p.c. on note circulation. If possible up to 50 p.c., but in no case less than one-third of a bank's cash reserves were to be held in Dominion notes. Dividends were limited to 8 p.c. until or unless the bank's reserve fund was the equivalent of 20 p.c. of its paid-up capital. In case of the failure of a bank, double liability of shareholders became enforceable without waiting for the realization of the bank's general assets. Banks were required to transmit certified lists of shareholders annually, to be laid before Parliament. Any existing bank was permitted, on the authority of the shareholders, to apply for an extension of its charter, and the Governor in Council, upon the recommendation of the Minister of Justice and the Treasury Board, was empowered to extend such charter to 1881. Any suspension by a bank of payment of its liabilities for a period of 90 days would constitute insolvency, and operate as a forfeiture of its charter.

In 1871 the first comprehensive Banking Act of the Dominion was passed. A large part of the Statute was devoted to the re-enactment and consolidation of legislation already in force, although the measure of 1870 contained the main features of the Government's policy. The procedure relative to extension of charters laid down in the preceding year was superseded by this Act, which became the charter of the banks until July 1, 1881, that date being set in contemplation of regular decennial revisions. No new bank was permitted to commence business with less than \$500,000 capital *bona fide* subscribed and \$100,000 similarly paid up, with the further proviso that at least \$200,000 must be paid up within two years after commencement of business. The sections respecting loans against warehouse receipts, etc., were thoroughly revised and difficulties of procedure removed. Banks

were permitted to take security on commodities in store pending marketing, and also while undergoing conversion from the raw to the finished state. Advances were allowed upon security of shares of other banks. It was provided that a bank might charge any rate of interest or discount not exceeding 7 p.c., but that no higher rate should be recoverable. Monthly returns of assets and liabilities were required. Certain technical amendments were made to the Bank Act in 1872, 1873 and 1875. In 1879 the power to lend upon the security of shares of other banks was repealed.

At the first general revision of the Bank Act in 1880 (effective 1881), a note holder was definitely recognized as a preferred creditor, claims of the Dominion and Provincial Governments, respectively, ranking next in order of preference. Banks were prohibited from issuing notes under \$5, higher denominations to be multiples of this sum. Dominion notes were now to constitute not less than 40 p.c. of the bank's cash reserves. Monthly returns of a more detailed character were to be made. The Act was amended in 1883 so as more effectively to enforce the prohibitions, restrictions and duties already imposed upon the banks. The use of certain titles by private bankers not operating under the provisions of the Act was prohibited.

At the revision of 1890 (effective 1891), it was stipulated that not less than \$250,000 capital must be paid up before a certificate permitting a bank to commence business could be issued by the Treasury Board. A period of one year from the date of the charter was allowed for the payment of the capital and the carrying out of other preliminaries. Dividends were not to exceed 8 p.c. until or unless the reserve fund was the equivalent of 30 p.c. of the paid-up capital. A fund known as the "Bank Note Circulation Redemption Fund" was established, consisting of deposits made by the banks with the Minister of Finance of amounts equal to 5 p.c. of their average note circulation, such deposits to be subject to adjustment annually, and to constitute a guarantee of the payment of all notes of a suspended bank with interest at 6 p.c. from the date of suspension until the date when their redemption was undertaken by the liquidator. Failing action by the liquidator within two months, the Minister of Finance was authorized to redeem the notes out of the fund, and such outlay, if not made good out of the assets of the failed bank, was to be reimbursed by the contributing banks *pro rata* to their contributions. Another major change gave the banks, in certain classes of loans, the same legal power to take security over the borrowers' goods as had previously been granted by warehouse receipts. This enactment served to make general and more clear principles already recognized by previous legislation and practice. Directors' qualifications were set out more clearly and it was now provided that a majority only of directors, instead of all, need be British subjects. Penalties for the excessive issue of circulation were made more severe.

The revision of 1900 (effective 1901) recognized the Canadian Bankers' Association as an agency in the supervision and control of certain activities of the banks. It was charged, under the Treasury Board, with the responsibility of supervising the printing and distribution of notes to the banks and their issue and destruction; also with control over clearing houses and the appointment of curators to supervise the affairs of suspended banks. The amended Act also included provisions permitting one bank to sell its assets to another. More detailed monthly returns were required and the interest on notes of failed banks was reduced from 6 p.c. to 5 p.c. In 1908, after the financial crisis of 1907, provision was made for emergency cir-

circulation during the crop moving season from October to January, when banks were allowed to issue excess circulation up to 15 p.c. of their combined paid-up capital and rest or reserve funds, this emergency circulation to be taxed at a rate not exceeding 5 p.c. per annum. In 1912, the period was extended to the six months from September to February inclusive.

At the fourth revision of the Bank Act in 1913 provision was made for an audit of each bank's affairs by auditors appointed by the shareholders. There was also provision for the establishment of Central Gold Reserves in which banks might deposit gold or Dominion notes for the purpose of issuing additional notes of their own there-against. Annual reports to the Minister of the fair market value of real and immovable property held by the banks for their own use were required. Banks were empowered to lend to farmers upon security of their threshed grain. As a war measure the provision for emergency circulation was extended in 1914 to cover the whole year and banks were further authorized to make payments in their own notes instead of in gold or Dominion notes.

The fifth revision of 1923 (13-14 Geo. V, c. 32) resulted in numerous important changes. The qualifications of provisional directors were re-defined, while provision was made for keeping records of attendance at directors' meetings and bringing them to the notice of shareholders. Annual and monthly statements were given further attention and more complete returns required, including statements of controlled companies in the names of which any part of a bank's operations were carried on. Other or special returns were to be made if called for by the Minister. Two auditors were now to be appointed by the shareholders instead of one, and the qualifications, duties and responsibilities of auditors were more clearly defined. The personal liability of directors in case of distribution of profits in excess of legal limits was also more definitely expressed. Regulations regarding loans were amended and advances to any officer or clerk of a bank could not, in any circumstances, be granted in excess of \$10,000. Registration of security for loans under Sec. 88 was provided for. It became necessary for guarantee and pension funds to be invested in trustee securities. The punishment of directors and other bank officials for making false statements of a bank's position was provided for in Sec. 153. In 1924, as a result of the failure of the Home Bank of Canada, provision was made for periodical examination of the chartered banks by an Inspector-General of Banks, who was to be an officer of the Department of Finance.

Banking Statistics.—In Table 10 is given an historical summary of Canadian banking business since Confederation. In order to afford a clear view of the nature of banking transactions in Canada, bank liabilities have been classified in two main groups, liabilities to shareholders and liabilities to the public, only the latter group being ordinarily considered when determining the financial position of any such institution. Assets are divided into four groups, other assets being included in the total. As of interest to students of banking practice, the relative rates of increase of capital and reserve funds may be noted on the accompanying graphs, also the great increase in the proportion of liabilities to the public to total liabilities, and the gradually increasing percentage of liabilities to the public to total assets. The declining proportion of notes in circulation to total liabilities to the public is also characteristic of the evolution of banking in recent times. Holdings of Dominion and Provincial Government and municipal securities were relatively insignificant prior to the Great War.

10.—Historical Summary Showing Development of the Canadian Banking Business, calendar years, 1867-1932.

Note.—The statistics in this table are yearly averages computed from the twelve monthly returns.

Deposits, Loans and Discounts.—As an index of the course of banking business, of the nature of many transactions undertaken and of the general security of bank assets, loans and discounts are of great value. They illustrate clearly the channels into which a large proportion of the potential earning power of the banks is directed, and, by providing a comparison between investments made in lending operations inside and outside of Canada, afford essential information regarding the conduct by a bank of one of its most important activities.

Bank deposits (the demand deposits being to a large extent the product of lending operations, by which credit is advanced on security followed by the deposit of the proceeds of a loan) are also of considerable importance, and, on account of their derivation, are one of the most valuable records of the volume of business done at any time. Actual deposits of cash (mainly deposits payable after notice or on a fixed day) are, of course, included with the amounts deposited after the granting of loans.

Tables 13 and 14, following, give the deposits and loans of Canadian chartered banks for the years 1928 to 1932.

13.—Deposits in Chartered Banks in Canada and elsewhere, for the calendar years 1928-32.

Note.—The statistics in this table are averages computed from the twelve monthly returns in each year.

Includes loans to cities, towns, municipalities and school districts.

Bank Reserves.—The Bank Act contains no specific provisions as to the amount of gold to be held against either note circulation or general liabilities of a bank. It requires, however, that 40 p.c. of whatever cash reserves a bank finds it expedient to carry shall be in Dominion notes. A second provision instructs the Minister of Finance to arrange for the delivery of Dominion notes to any bank in exchange for specie. Thus the gold reserve against Dominion notes, to the extent that the notes are held by the banks, is reserve against banking operations, the Dominion Government being the custodian of the gold for the banks. The other cash element in bank reserves is specie in hand. In addition to this cash on hand, Canadian banks carry three other kinds of assets which are regarded as reserves, being funds more or less immediately available for the liquidation of liabilities. These are: (1) cash balances in banks outside of Canada; (2) call and short loans in New York (the favorite call loan market); and (3) readily marketable securities. These are shown, together with net liabilities, in Table 15. In Table 16, the ratio to net liabilities of each element of the reserves is shown.

15.—Bank Reserves in Detail and Total

NOTE.—The statistics in this table are averages computed from the twelve monthly

¹Net liabilities are obtained by deducting from total liabilities to the public, as shown in Table 10, the items "Notes of other banks", "Cheques on other banks", and "Loans to other banks in Canada, secured, including bills rediscounted", which represent indebtedness within the system and are counterbalanced by credits within the system.

16.—Ratio of Bank Reserves to Net Liabilities,¹ calendar years 1901-32.

NOTE.—The statistics in this table are based upon the averages of the twelve monthly returns in each year given in the preceding table. Figures for 1892-1900 will be found at p. 874 of the 1927-28 Year Book.

Subsection 2.—The Individual Chartered Banks of Canada.¹

During the period from 1881 to 1901, the number of chartered banks doing business in Canada under the Bank Act remained almost the same, 36 in 1881 and 1891, and 34 in 1901, but during the present century there has been in banking, as in industry, an era of amalgamations, the number of banks having dropped to 25 in 1913 and to 10 in December, 1932. That this has been far from involving a curtailment of banking facilities is seen in Table 10, which shows the development of the banking business since 1867, and in Table 17, which compares the number of branch banks existing in Canada at different periods, showing a growth from 123 at Confederation to 4,083 inclusive of sub-agencies at Dec. 31, 1930. Since then, owing to the shrinkage in commercial activities as a result of the depression, some unprofitable branches have been closed and the total has declined to 3,772, exclusive of 163 branches and agencies in other countries at Dec. 31, 1932.

Table 18 gives the number of branches of the various banks, by provinces, as at Dec. 31, 1932, while Table 19 contains the statistics of branches of Canadian

¹Revised by Henry T. Ross, Secretary, Canadian Bankers' Association.

banks doing business outside of Canada, an extension of Canadian banking (more especially to Newfoundland and the West Indies) which proceeded very rapidly in the War and early post-war period, rising to a total of 206 in 1921. Since then this number has gradually declined to 163 branches and sub-agencies in 1932.

Earnings of Canadian Banks.—The chartered banks of Canada are for the most part Dominion-wide institutions, doing business in all parts of the country. Their earnings, therefore, reflect with very considerable faithfulness the fluctuations of general business. So far as individual banks are concerned, indeed, the changes resulting from this era of amalgamations are apt to render the figures incomparable over a period of years. During the six years covered by Table 20, however, the Bank of Montreal, the Royal Bank, the Bank of Nova Scotia, the Bank of Toronto, the Banque Provinciale du Canada, and the Dominion Bank have not been affected by the tendency toward absorptions, and the maintenance of the net profits of these banks is excellent evidence of their sound management and of the resistance of the country to depression.

Bank Amalgamations and Insolvencies.—Two tables follow which may be of interest to students of Canadian banking history. The first, showing bank insolvencies since 1867, gives the capital paid up, reserves, assets and liabilities of insolvent banks, and shows also the payments to noteholders and depositors. In the majority of cases, both these classes of creditors have received payment in full. The table of bank absorptions gives the dates of absorption of the 36 banks which were incorporated with other institutions from 1867 to 1932.

¹ This bank was only in existence for 3 months and 26 days. Some of its notes were redeemed on its re-opening for a few days. The Dominion Government received 25 cents on the dollar on several thousand dollars worth of the notes which it held. ² Liquidation incomplete. ³ This bank never suspended payment. The bank which took over its branches assumed all liabilities to depositors. Some years later, for technical purposes, the original bank was put into insolvency.

¹ The purchasing banks named in the latter part of the table are no longer in business.

² Dates given since 1900 are those of the Orders in Council authorizing the absorptions.

³ The Banque d'Hochelega after absorbing the Bank Nationale adopted the name Banque Canadienne Nationale.

Subsection 3.—The Volume of Business Transacted through the Banks.

In advanced industrial societies money is only "the small change of commerce". The great bulk of monetary transfers, particularly in the case of the larger transactions, is made through the banks. Thus it has been estimated that in the United States in 1917 about 6 p.c. of the business transactions of the country were financed by the use of money and the remaining 94 p.c. by the use of cheques. Accordingly, if we knew the aggregate amount of the cheques paid through the banks and charged to accounts, we should have an almost complete record of the volume of business transacted, and thus of the business activity of the country.

Statistics of this character were at first secured through the operation of the clearing houses—places where the representatives of all the banks met daily in the leading cities and presented for payment the notes of other banks and the cheques drawn upon other banks that had been paid into their institutions in the regular course of business. In Canada, the first clearing houses to be established were those of Halifax (1887), Montreal (1889), Toronto (1891), Hamilton (1891) and Winnipeg (1893), and the number has subsequently increased to 32. In recent years, owing to the reduction in the number of the banks through amalgamations, the proportion of the inter-bank transactions recorded by the clearing houses to the grand total of banking transactions has declined, and the place of total bank clearings as a measure of business has been taken by total bank debits—*i.e.*, the totals of cheques charged to accounts at all banks. The total bank debits at all branch banks situated in the clearing-house cities of Canada have been compiled for 1924 and subsequent years by the Canadian Bankers' Association for the Dominion Bureau of Statistics, which has published the figures monthly and annually with interpretative analyses. Further, in order that an estimate might be made of the proportion of banking transactions outside the clearing-house cities to the total, the Canadian Bankers' Association secured for the month of January, 1929, the grand total of all cheques charged to accounts at all branch banks throughout the Dominion. The results were published in the Bureau's Monthly Review of Bank Debits for February, 1929, and showed that the aggregate of transactions outside the clearing-house cities was in January, 1929, 14½ p.c. of the grand total in the clearing-house cities. The corresponding figures in the five economic areas were as follows: Maritime Provinces 90.6 p.c., Quebec 6.1 p.c., Ontario 17.2 p.c., Prairie Provinces 18.6 p.c., British Columbia 14.3 p.c. Only in the Maritime Provinces does the total of bank debits in clearing-house cities appear to inadequately represent the grand total of business transactions throughout the whole area.

Clearing-House Transactions.¹—The following table shows for the years 1928-32 the total volume of clearings in the clearing houses of Canada. These figures, it may be added, represent not only actual city clearings but exchanges between numerous rural branches of the banks in each district.

¹ The following is a description of the operation of the Central Clearing Fund: Since the beginning of January, 1927, balances due to, or by each member of, the Montreal, Toronto, Winnipeg and Vancouver clearing houses, after they have been settled and declared by the clearing-house manager, are communicated daily (in the case of the three latter clearing houses by telegraph) to a trustee—The Royal Trust Company—in Montreal. Each bank maintains an account with the trustee to the credit of which Dominion notes are deposited. The trustee, on receipt of the daily advice, makes the appropriate credit or debit entry in each account. In the usual course the trustee has made the entries and balanced the accounts for the day by 12 o'clock noon. Each clearing bank is immediately notified of the state of its account; should the debits of the day on balance exceed the amount of Dominion notes in the possession of the trustee, the bank concerned must deliver, within an hour of notification, an amount of Dominion notes sufficient to give it a credit balance. Inasmuch as the four cities mentioned are the settlement points for the clearing-houses in their respective zones, practically the whole of the banking transactions of the country are adjusted daily in Montreal in the accounts kept by the trustee.

Bank clearings, though generally regarded as a leading barometer of business conditions, are defective in that they record only inter-bank transactions—transactions through which one bank becomes either the debtor or the creditor of another. They do not record the numerous transactions in which the transfer of value is made within a single bank, as, for example, where the purchaser and the seller of values that are paid for by cheque carry their accounts in the same bank. As the number of separate banks has in recent years been steadily diminishing through amalgamations, there being only 10 in December, 1932, as compared with 18 in 1923, inter-bank transactions are bearing a steadily decreasing proportion to the total of business transacted, a fact which goes far to explain the relative smallness of the increase in bank clearings from 1926 to 1929 and makes the extent of the subsequent decrease, as shown in Table 25, open to question.

Bank Debits.—Since bank clearings have ceased to be a satisfactory measure of general business, the Bureau of Statistics in 1923 took up with the Canadian Bankers' Association the question of securing a record of bank debits, *i.e.*, of all cheques charged against accounts at all banks. The Bankers' Association agreed to secure from January, 1924, the monthly aggregate figures of the amount of cheques charged to accounts at all banking offices situated in the clearing-house cities of Canada, and the figures of cheques charged to accounts (bank debits) are given for the years 1928-32 in Table 26. The Weyburn Security Bank, which operated in southern Saskatchewan, voluntarily added a total of all cheques charged to accounts at all of its branches.

It will be noted, as establishing the need of the newer record, that bank debits for 1932 decreased 40.6 p.c. as compared with those of 1928, while bank clearings

in the later year show a decrease of 47.4 p.c. The bank debits are a comparable record for the five years; the bank clearings, owing to the reduction in the number of banks, are not a comparable record.

¹ Three months only, the Weyburn Security Bank having been absorbed by the Imperial Bank of Canada as of May 1, 1931.

Subsection 4.—Government and other Savings Banks.

In a comparatively new country where capital is relatively scarce, it is a natural thing that the banks which finance the business institutions should also absorb the bulk of the people's savings for use in promoting the business of the country. Thus in Canada the great bulk of the current savings of the people is found in the savings or notice deposits of the Canadian chartered banks, the annual average figures of which are given for recent years in Table 10 of this chapter, the 1932 average being

\$1,376,325,128. Further, the current savings of the Canadian people are going very largely into the purchase of life insurance, the total premiums paid in the single year 1931 aggregating \$220,523,727. In comparison with the enormous figures of notice deposits in chartered banks and with total insurance in force, the deposits in the special savings banks are comparatively small, but are none the less significant.

There are three distinct types of savings banks in Canada at the present time, in addition to the savings departments of the chartered banks and of trust and loan companies. First, there is the Post Office Savings Bank, the deposits in which are a direct obligation of the Dominion Government. Secondly, there are Provincial Government savings banking institutions in Ontario and in Alberta, where the depositor becomes a direct creditor of the province. Thirdly, there are in the province of Quebec two important savings banks, the Montreal City and District Savings Bank and the Caisse d'Economie de Notre-Dame de Québec, established under Dominion legislation and making monthly reports to the Department of Finance.

Dominion Government Savings Banks.—Prior to 1929 there were two classes of Dominion Government savings banks in Canada, the Post Office Savings Bank, under the Post Office Department, and the Dominion Government Savings Bank, attached to the Department of Finance. The former was established under the Post Office Act of 1867 (31 Vict., c. 10) in order "to enlarge the facilities now available for the deposit of small savings, to make the Post Office available for that purpose, and to give the direct security of the Dominion to every depositor for repayment of all money deposited by him together with the interest due thereon". Branches of the Government Savings Bank proper, under the authority of the Finance Department, were established in the leading cities of Canada under the management of the Assistant Receivers-General and in other places, in the provinces of Nova Scotia and New Brunswick, under managers appointed by the Governor in Council. The Government Savings Bank was amalgamated with the Post Office Savings Bank in 1929. Historical statistics for both systems will be found in Table 27 and more detailed figures covering the last six years in Table 28.

27.—Deposits with Dominion Government Savings Banks,¹ June 30, 1868-1906, and Mar. 31, 1907-32.

NOTE.—Figures for all intermediate years will be found on p. 833 of the 1926 Year Book.

Provincial Government Savings Banks.—Institutions for the deposit of savings are operated by the Provincial Governments of Ontario and Alberta, while a similar institution was in operation in Manitoba from 1924 to 1932 when the depositors' accounts were taken over by the chartered banks.

Ontario.—In the session of 1921, the Legislature of Ontario authorized the establishment of the Province of Ontario Savings Office, and in March, 1922, the first branches were opened. The funds received from this source are used almost exclusively to finance farm loans under the Agricultural Development Act. Interest at the rate of 3 p.c. per annum compounded half yearly is paid on all accounts. The deposits are all repayable on demand. Total deposits on Oct. 31, 1932, were \$23,709,820 and the number of depositors at that date was over 90,000. Seventeen branches are in operation throughout the province.

Alberta.—In Alberta the Provincial Treasury receives savings deposits and issues demand savings certificates bearing interest at 4 p.c., or term certificates for one, two or three years, in denominations of \$25 and upwards, bearing interest at 5 p.c. The total amount in savings certificates on Sept. 30, 1932, was \$8,579,917, made up of \$8,029,651 in demand certificates and \$550,266 in term certificates.

Other Savings Banks.—The Montreal City and District Savings Bank, founded in 1846 and now operating under a charter of 1871, had on Dec. 31, 1932, a paid-up capital of \$2,000,000, savings deposits of \$54,311,409, and total liabilities of \$56,307,239. Total assets amounted to \$60,907,618 including over \$44,000,000 of Dominion, provincial and municipal securities. The Caisse d'Economie de Notre-Dame de Québec, founded in 1848 under the auspices of the St. Vincent de Paul Society, incorporated by Act of the Canadian Legislature in 1855 and given a Dominion charter by 34 Victoria, c. 7, had on Dec. 31, 1932, savings deposits of \$12,399,452, a paid-up capital of \$1,000,000 and total assets of \$16,207,494.

The co-operative people's banks of Quebec (174 reported to the Provincial Government in 1931) are also an important element in promoting thrift and assisting business in that province. Thus on Dec. 31, 1931, savings deposits in these banks amounted to \$7,436,861, while the amount on loan was \$9,762,339. Loans granted in 1931 numbered 16,203 amounting to \$2,998,046. Profits realized amounted to \$594,235.

29.—Deposits in the Montreal City and District Bank and the Caisse d'Économie de Notre-Dame de Québec, as at June 30, 1868-1906, and Mar. 31, 1907-32.

Note.—Figures for all intermediate years will be found on p. 833 of the 1926 Year Book.

Section 3.—Loan and Trust Companies.

Business such as that now transacted by loan and trust companies was first carried on by an incorporated Canadian company in 1844, when the Lambton Loan and Investment Co. was established, while the Montreal Building Society was incorporated by c. 94 of the Statutes of 1845. In order to legalize and encourage such operations in Upper Canada, an Act was passed by the Canadian Legislature in 1846, followed in 1847 and 1849 by Acts in New Brunswick and Nova Scotia respectively. These early companies were termed building societies; their activities comprised mainly the lending of money on the security of real estate and also the lending of money to members without their being liable to the contingency of losses or profits in the business of the society. In addition to these operations, such companies were authorized by an Act of 1859 to "borrow money to a limited extent". Later, by the Building Societies Act of 1874, authority was given to receive money on deposit and to issue debentures, subject to certain restrictions as to amounts of deposits.

The number of loan and savings societies in operation and making returns to the Government at Confederation was 19, with an aggregate paid-up capital of \$2,110,403 and deposits of \$577,299. Rapid increases in the number of companies and total volume of business resulted from subsequent legislation until in 1899 102 companies (including trust companies) made returns, showing capital stock paid up of \$47,337,544, reserve funds of \$9,923,728 and deposits of \$19,466,676; total liabilities had increased from \$3,233,985 to \$148,143,496 between 1867 and 1899. By 1913 the number of companies had declined, through amalgamations and absorptions, to 74 (including 16 trust companies) with a combined paid-up capital of \$68,091,042, reserves of \$35,959,342, deposits of \$32,681,806 and total liabilities of \$478,658,228.

The laws relating to trust and loan companies were revised by the Loan and Trust Companies Acts of 1914 (4-5 Geo. V, cc. 40 and 55), with the results that the statistics of provincially incorporated loan and trust companies ceased to be collected. The statistics of Tables 31 and 32 refer only to those companies operating under Dominion charter, except that beginning in 1926 the statistics of loan companies and trust companies incorporated by the province of Nova Scotia, and brought by the laws of that province under the examination of the Dominion Department of Insurance, have been included. Also, since 1922 provincially incorporated loan and trust companies make voluntary returns of their principal sta-

tistics to the Dominion Department of Insurance, so that all-Canadian totals are again available for recent years. As indicating the progress of the aggregate of loan company business in Canada, it may be stated that the book value of the assets of all loan companies rose from \$188,637,298 in 1922 to \$213,649,794 in 1931. The total assets in the hands of the trust companies increased from \$805,689,070 in 1922 to \$2,410,991,525 in 1931. The latter figure included \$2,177,646,644 of 'estates, trusts and agency funds' (Table 30.)

Functions of Loan Companies.—The principal function of loan companies is the lending of funds on first mortgage security, the money thus made available for development purposes being secured mainly by the sale of debentures to the investing public and by savings department deposits. Of the loan companies operating under provincial charters, the majority conduct loan, savings and mortgage business, generally in the more prosperous farming communities.

Functions of Trust Companies.—Trust companies act as executors, trustees and administrators under wills or by appointment, as trustees under marriage or other settlements, as agents or attorneys in the management of the estates of the living, as guardians of minor or incapable persons, as financial agents for municipalities and companies, and, where so appointed, as authorized trustees in bankruptcy. Some companies receive deposits, but the lending of actual trust funds is restricted by law. The figures of Table 30 are of particular interest in the case of trust companies, which, on account of the nature of their functions, are mainly provincial institutions, since their chief duties are intimately connected with the matter of probate, which lies within the sole jurisdiction of the provinces.

¹Includes money in trust for investment amounting to \$2,562,455 in 1914, \$3,113,170 in 1915, \$3,799,149 in 1916, \$3,443,682 in 1917 and \$5,170,463 in 1918; corresponding amounts are included under the heading "Estate, trust and agency funds" for the years 1920 to 1931. The figures for 1919 are not available. ²Includes statistics of trust companies chartered by the Government of Nova Scotia but inspected by the Dominion Department of Insurance.

Section 4.—Sales of Canadian Bonds.

Interesting aspects of public financing and of the investment of capital in Canadian development during the twentieth century are illustrated by the sales of Canadian bonds since 1904 shown in Table 33. (The figures are reproduced from *The Monetary Times Annual*, 1933.) In the first part of this table, the bonds sold in each year are divided according to whether the financing was for Dominion or Provincial Governments, or for municipalities, railways or other corporations, while in the second part of the table the sales in each year are distributed according to sales in Canada, the United States and Great Britain.

The total sales of Canadian bonds naturally reached a very high mark toward the close of the War owing to the Dominion Government financing required to cover the war expenditures. However, with the exception of the years 1918 and 1919, the total sales were greater in 1931 than in any other year, owing largely to the Dominion Government's conversion loans.

Dominion Government financing through bond sales since 1907 may be divided into three periods: the first from 1908 to 1914, when the money was required largely for internal development of the country, public works and Government railways; the second from 1915 to 1919, when war expenditures required very large borrowings; and the third since the War, when the issues have been largely required for refunding former loans at lower interest rates and for expenditures in connection with public works and railways.

Provincial bond issues have been on a much larger scale since the War than formerly, probably due to the development of provincially-owned public utilities and of improved highways. Sales of the bonds of Canadian municipalities, on the other hand, were greater in 1913, toward the end of the "land boom", than they have been in any other year, although sales in 1930 almost reached the record. However, allowing for the increased population in cities and towns, there has not been the same marked increase in the average annual sales of municipal bonds in the period since the War, compared with the period before the War, that is noticeable in the case of provincial bonds.

Sales of corporation bonds, which from 1926 to 1930 had averaged over \$257,000,000 per year, dropped to \$10,550,000 in 1932, this being largely due to the uncertainty of the industrial outlook. Railway bonds showed a somewhat similar decline to \$12,500,000 in 1932.

A very striking change has taken place during the present century in the market in which Canadian bond issues are principally sold. Prior to the War, a great part of the capital required for Canadian development was drawn from Great Britain, and the major portion of Canadian bond issues were sold there. The coming of the War temporarily eliminated that market, and Canadians turned largely to the United States for outside capital. However, the great increase in wealth during and since the War has enabled a much greater proportion of public and industrial financing to be done at home, and beginning with the Victory Loan campaigns, Canadians not only learned how to invest their money in bonds, but had the necessary funds to invest on a large scale in bond issues. These facts are reflected by the figures in Table 33 showing that since 1915 a greatly increased proportion of the total issues of Canadian bonds has been sold within Canada. Thus, in 1932, 80 p.c. of all bonds issued were sold in Canada, 17 p.c. in the United States and 3 p.c. in Great Britain.

33.—Sales of Canadian Bonds, by Class of Bond and Country of Sale, calendar years 1904-32.

(From *The Monetary Times Annual*.)

Section 5.—Foreign Exchange.

The Canadian dollar, adopted as our currency in 1857, was equivalent to 15/73 of the pound sterling; in other words, the pound was equal to \$4.866 in Canadian currency at par, and remained so, with minor variations between the import and export gold points representing the cost of shipping gold in either direction, until the outbreak of the Great War. Further, during the first eleven years after Confederation, the Canadian dollar was at a premium in the United States, as the United States dollar was not, after the Civil War, redeemable in gold until 1878. From the latter date, the dollar in the two countries was equivalent at par, and the variation was only between the import and export gold points or under \$2 per \$1,000.

At the outbreak of the Great War, both the pound sterling and the Canadian dollar were made inconvertible into gold and fell to a discount in New York, though this discount was "pegged" or kept at a moderate percentage by sales of United States securities previously held in Great Britain, borrowing in the United States, and, after the United States entered the War, by arrangements with the United States Government. After the War, the exchanges were "unpegged" about November, 1920, and the British pound went as low as \$3.18 and the Canadian dollar as low as 82 cents in New York. In the course of the next year or two, exchange was brought practically back to par, and Great Britain resumed gold payment in 1925 and Canada on July 1, 1926. From then until 1928, the exchanges were within the gold points, but in 1929 the Canadian dollar again fell to a moderate discount in New York.

Recent Movements in Canadian Exchange.—Because Canada has no foreign exchange mechanism of her own, Canadian transactions in exchange and monetary gold have been governed by New York and London. Great Britain buys much more from Canada than Canada buys from her, but the reverse is the case as regards the trade between Canada and the United States. The result is that there is a supply of bills on London in excess of the amount needed to meet current obligations in Great Britain. By offering these for sale for United States funds in London or New York, a triangular balance is approximated by book transactions and without the cross transfers of the larger quantities of gold which would otherwise be necessary. The volume of sterling exchange on Canadian account thus passed to the New York market does not greatly influence New York rates of sterling exchange under normal conditions; on the contrary, the volume of the New York-London transactions is sufficient to carry the Canadian rates along with them. Canadian exchange transactions with other countries are handled through London or New York and are unimportant of themselves, depending on the relationships with Canadian-New York and Canadian-London transactions.

In September, 1931, the equilibrium of international exchange was seriously disturbed. This unfortunate turn of events followed a period of over six years during which the nations of the world had worked steadily towards the stabilization of their currency systems upon a gold basis. Within two months of the time when Great Britain found it necessary to suspend free gold shipments, however, only a very small number of countries, including the United States and France, were left with currencies unshaken by preceding abnormal gold movements. The decision of Great Britain to go off the gold standard (Sept. 21, 1931) resulted in a sharp depreciation of sterling in New York, and partly owing to the triangular nature

¹Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics.

of the situation, but in some measure due to the immediate withdrawals of funds from Canadian banks by United States interests, short selling of Canadian exchange and other influences, Canadian rates depreciated also and have since fluctuated broadly with sterling.

The weakness in Canadian dollar exchange during the last quarter of 1931 was checked with the turning of the year, and a steady recovery began which continued without interruption for three months. The extent of this improvement may be gauged by reference to the average premium quoted on U.S. funds in Montreal, which was reduced from 21 p.c. in December, 1931, to 11.4 p.c. in March, 1932. Canadian exchange in March reflected in part a rise in sterling which accompanied the repayment by the United Kingdom of large currency defence loans made in the preceding August. A minor reaction occurred in April and May, but steady strength was again apparent from June to October inclusive. Financing of the fall grain movement and bond flotations in New York contributed largely to the position attained by the Canadian dollar at this time. An appreciable set-back was experienced in the two closing months, but net gains for the year were nevertheless substantial.

34.—Monthly Averages of Exchange Quotations at Montreal, 1931 and 1932.

Notes.—The nominal closing quotations in Canadian funds upon which these averages are based, have been supplied by the Bank of Montreal.

¹ Par rates given are those recognized in pre-war years, no post-war financial readjustment having been effected.

CHAPTER XXIII.—INSURANCE.¹

Insurance business is transacted in Canada by companies of the following classes, *viz.*, (1) companies incorporated under the laws of the Dominion of Canada or of the late "Province of Canada", (2) companies incorporated under the laws of the provinces of Canada, and (3) companies incorporated or formed under the laws of British and foreign countries. The word "companies" as here used, includes fraternal benefit societies, associations and exchanges which transact the business of insurance. The Dominion Insurance Acts provide that companies of classes (1) and (3) above may not transact business anywhere in Canada unless registered² by the Dominion, but these Acts also provide that fire insurance on property in Canada may be effected in companies of class (3) even though not registered, if the insurance is effected without solicitation, advertising or the use of the mails, and if an office is not maintained in Canada, though property to be insured may be inspected and losses may be adjusted. Insurance so effected is generally known as "unlicensed insurance". Companies of class (2) above may transact business in the province of incorporation, subject to compliance with the laws thereof, or in any other province subject to compliance with the laws thereof, or, on compliance with the Dominion laws, may be granted Dominion registration. Most of these companies limit their business to the province of incorporation or to one or more other provinces; a few only have been granted Dominion registration.

What has been said above implies that jurisdiction concerning insurance companies and insurance business is divided between the Dominion and the provinces. There have been many references to the courts and appeals to the Privy Council with a view to determining the respective legislative domains, both in respect of insurance legislation specifically and in respect of legislation affecting companies generally, including insurance companies. The last Privy Council decision was handed down in 1931. It may now be taken as established that the Parliament of Canada may require companies formed or incorporated outside of Canada to obtain Dominion registration and continue to be so registered as a condition of transacting business in Canada, and these companies may be required to make returns from time to time of their business and doings in Canada and to furnish evidence of their solvency. The powers of the Dominion go much further in reference to companies incorporated by the Parliament of Canada, but include all of the powers which may be exercised over companies formed or incorporated outside of Canada and registered by the Dominion. The Acts passed in 1932³ implement the powers of the Dominion as determined by the Privy Council decisions.

The Dominion Acts under which companies are registered are administered by the Department of Insurance under the Minister of Finance. The chief officer of the Department of Insurance is the Superintendent of Insurance. The first Superintendent was appointed in 1875 as head of a newly created Insurance Branch of the Department of Finance. In 1910 the Insurance Branch was constituted into a separate Department, the Department of Insurance, under the Minister of Finance.

¹The statistics of Fire, Life and Miscellaneous Insurance have been revised by G. D. Finlayson, Superintendent of Insurances, and those pertaining to Government Annuities by H. H. Ward, Deputy Minister of Labour.

²Prior to 1932, the Dominion Insurance Acts provided for the "licensing" of companies; the Acts passed in 1932 provide for "registration". The change in terminology does not mean any change in substance.

³The Canadian and British Insurance Companies Act, 1932 (22-3 Geo. V, c. 46). The Foreign Insurance Companies Act, 1932 (22-3 Geo. V, c. 47).

Precedent to obtaining first registration, in addition to filing certain documents, including a full and complete financial statement, a company must satisfy the Minister that it is sound and solvent and must make the required initial deposit of securities, varying from \$10,000 to \$100,000, depending on the class of business to be undertaken. Annual returns are required of all registered companies and the Acts require an examination to be made by the Superintendent or on his behalf, of the books and records of companies with a view to substantiating the accuracy of the statements filed and the soundness of the companies. Should any company show an unsatisfactory financial condition, the Acts require immediate remedial measures to be taken. British and foreign companies are required to maintain in Canada assets sufficient to cover all of their liabilities in Canada, while Canadian companies are required to maintain in Canada all of their assets except such as it may be necessary to deposit outside of Canada as security for "outside of Canada" business.

The statistics herein given in respect of companies registered by the Dominion are divided into three classes relating to: (1) insurance against fire, (2) life insurance, and (3) miscellaneous insurance, *viz.*, accident, automobile, aviation, burglary, credit, earthquake, explosion, forgery, guarantee, hail, leakage, live-stock, sickness, steam boiler, title, tornado and weather insurance. These statistics are compiled from the reports of the Department of Insurance; throughout they apply to calendar years.

Since 1915, the Department of Insurance has collected statistics, included herein, of business transacted by provincial companies licensed by the provinces, classified as to: (1) business transacted within the province of incorporation, and (2) business transacted in other provinces.

Further, returns in respect of "unlicensed insurance", above referred to, were required under Section 16 of the Special War Revenue Act for taxation purposes, and statistics compiled from these returns have been published in preceding editions of the Canada Year Book, following Table 7. This section of the Act having been held unconstitutional by Privy Council decision, Oct. 22, 1931, on an appeal from the Court of the King's Bench of the province of Quebec, the returns for 1930 are incomplete; consequently the table is omitted from the present edition. By an amendment to the Act at the last session of Parliament, a section analogous to Section 16 was enacted, applicable to unlicensed insurance. Further, provision is also made for returns of unlicensed insurance under the Foreign Insurance Companies Act, 1932, and under the Canadian and British Insurance Companies Act, 1932, so that statistics for 1932 and following years will be available.

Statistics of Dominion Government annuities are given at the end of this chapter. The Department of Labour administers the Acts under which these annuities are sold.

Section 1.—Fire Insurance.

Fire insurance in Canada began with the establishment by British fire insurance companies of agencies, usually situated in the sea ports and operated by local merchants. The oldest existing agency of a British company is that of the Phoenix Fire Office of London, now the Phoenix Assurance Co., Ltd., which commenced business in Montreal in 1804. On account of the growth of the insurance business of these early British companies, branch offices were established and local managers were appointed, charged with directing the companies' affairs in Canada.

The Halifax Fire Insurance Co. is the first purely Canadian company of which any record is available. Founded in 1809 as the Nova Scotia Fire Association, it was chartered in 1819 and operated in the province of Nova Scotia until 1919, when it was granted a Dominion licence. Among the other pioneer fire insurance companies still in operation, mention may be made of the following: the Quebec Fire Assurance Co., which commenced business in 1818 and was largely confined in ownership and operations to Quebec province; the British America Assurance Co., incorporated in 1833, the oldest company in Ontario; the Western Assurance Co., organized in 1851, and, after a rapid and steady growth, one of the largest companies of its kind on the continent; two United States companies, the *Ætna* Insurance Co., Hartford, Conn., and the Hartford Fire Insurance Co., which commenced business in Canada in 1821 and 1836 respectively.

The report of the Superintendent of Insurance for the year ended Dec. 31, 1931, shows that at that date there were 243 fire insurance companies doing business in Canada under Dominion licences; of these 52 were Canadian, 66 were British and 125 were foreign companies, whereas in 1875, the first year for which authentic records were collected by the Department of Insurance, 27 companies operated in Canada—11 Canadian, 13 British and 3 American. The proportionate increase in the number of British and foreign companies from 59 p.c. to 79 p.c. of the total number is a very marked point of difference between the fire and life insurance businesses in Canada, the latter being carried on very largely by Canadian companies.

Although in its early days the Dominion did not prove a very lucrative field for fire insurance companies, the great advance in building construction and the wide use of improved fire appliances and safety devices have materially reduced the danger of serious conflagrations and have placed the risks assumed by companies in Canada on an equality with those of other countries.

A feature of the fire insurance business, besides the increase in premiums received, is the continued increase in the number of companies which are operating on the mutual or reciprocal plan. These companies, in which all profits or losses are directly received or paid by the policyholders, are making themselves felt as competitive factors in the fire insurance business.

Statistics of Fire Insurance.—Statistical tables of fire insurance in Canada follow, illustrative of the progress of total business since 1869 and of the operations of individual companies for the year 1931. The net amount of fire insurance in force on Dec. 31, 1931, with companies holding Dominion licences, was \$9,544,641,293, while the net amount in force with provincial companies on the same date was \$1,341,184,333. In addition, policies amounting to \$1,005,857,392 were in force during the year 1929 (the latest year for which information is available, see p. 937) by companies, associations or underwriters not licensed to transact business in Canada. Thus the grand total fire insurance in force on Dec. 31, 1931, probably approximated \$12,000,000,000. According to preliminary figures, fire insurance in force in companies registered by the Dominion decreased by \$290,263,005 in 1932.

Table 1 shows figures of the growth since 1869 of companies registered by the Dominion, the relationship between losses paid and net premiums written, and the variation in the cost per \$100 of insurance. It will be observed that the cost of insurance reached a maximum in 1904 and 1905; there has since been a steady decrease with the exception of the years 1921, 1922 and 1924, when temporary reversals of the downward swing were in evidence. It is noteworthy that the cost

of fire insurance has decreased by 50 p.c. since 1905. Table 2 shows the business done in Canada by individual companies during the year 1931, while in Tables 3, 4 and 5 are given figures of the assets, liabilities, income and expenditure during the years 1927 to 1931, classified by nationality of companies. A further summary of business is given by provinces in Table 6 for the years 1930 and 1931, showing premiums and losses classified by provinces and by nationality of companies. Further, a general summary of the business transacted by both Dominion and provincial licensees is given in Table 7.

Summary of Fire Insurance in Canada, 1931.—Of the total amount of fire insurance effected in Canada during each year, a part is sold by companies holding provincial licences and permits. Such companies generally confine their operations to the province of incorporation, but may be allowed to sell insurance in other provinces. The bulk of fire insurance business, however, is transacted by companies registered by the Dominion. Operations in 1931 are summarized in Table 7.

Section 2.—Life Insurance.

Subsection I.—The Development of Life Insurance in Canada.¹

NOTE.—The tables of mortality referred to in this article are designated by the symbols ordinarily used for that purpose. The significance of these symbols may be briefly stated as follows: Hm, Healthy Males Table of the Institute of Actuaries; Om, British Offices Males Table; Om (5), a table based on substantially the same data as the Om table, excluding the first five insurance years following medical examination of the life insured. Wherever a rate of interest is affixed to one of these symbols to designate basis of valuation, for example, Hm 4 p.c., the assumptions underlying the valuation are that the future mortality of the policyholders of the company will be the same as shown by the table of mortality, and that the rate of interest at which the reserve funds of the company will accumulate in the future will be the suffixed rate.

Life insurance business, introduced into Canada by companies from Great Britain and from the United States as a fairly well developed institution, and taken up almost as early along the same general lines by a native company, can hardly be said to have a distinctive Canadian history. The technique and practice show the effects of British and United States influences.

Among the first companies to transact life insurance business in Canada may be mentioned: Scottish Amicable (1846), Standard (1847), Canada (1847), Ætna (1850), Liverpool and London and Globe (1851) and Royal (1851). The late '60's and early '70's were stirring years in life insurance activities the world over. In England, the frenzied flotation of companies in this period gave rise to abuses which pointed to the necessity for some control over the formation and operation of companies. Statutes were passed in 1870, '71 and '72 embodying principles—"freedom and publicity"—which have, without fundamental change, since governed in life insurance legislation in Britain; in the year 1909 these same principles were extended and adapted to four kinds of insurance.

In Canada no fewer than fourteen companies began business in the early '70's, including four native companies, namely: Sun (incorporated 1865, began business 1871), Mutual of Canada (Ontario Mutual, 1870), Confederation (1871) and London (1874). By 1875 there were at least 26 companies and possibly several more, competing for the available business in Canada, as against 48 companies licensed by the Dominion, and a few provincial companies, in 1931. A comparison of the first and last lines in Table 9 is of interest in this connection.

Outline of Life Insurance Legislation.—The first Dominion Insurance Act was passed in 1868. It prohibited the transaction of insurance business by any company (except provincially incorporated companies transacting business within the province of incorporation) not licensed by the Minister of Finance. A deposit of \$50,000 was required. Many of the provisions of this Act are traceable in the insurance legislation of the present day. Acts were passed in 1871, '74, '75 (consolidation, fire and inland marine and provision for appointment of Superintendent of Insurance under Minister of Finance); 1875 (extending powers of Superintendent to life and other companies); 1877 (consolidating the laws in respect of insurance, bases prescribed for computing claims of policyholders in an insolvent company, Superintendent to make quinquennial valuations on these bases); 1885 (dealing with

¹Contributed by A. D. Watson, Actuary, Department of Insurance, Ottawa.

commercial insurance companies transacting business on the so-called co-operative or mutual plan, being more commonly known as "assessment companies", fraternal societies being exempted from the Act); 1886 (consolidation); 1894 (life insurance in combination with any other insurance business forbidden, issue of annuities and endowment assurance by assessment companies prohibited, and new assessment companies required to procure at least 500 applications for membership before licence); 1895 (exempting certain fraternal organizations granting life, accident, sickness or disability insurance to members in hazardous occupations from application of Insurance Act); 1895 (certain amendments *re* foreign companies); 1899 (bases for quinquennial valuations by superintendent changed to Hm $3\frac{1}{2}$ p.c., applicable to business subsequent to Jan. 1, 1900, all earlier business to be brought up to Hm 4 p.c. basis by 1910, and Hm $3\frac{1}{2}$ p.c. by 1915); 1906 (consolidation); 1910 (quinquennial valuation basis changed to Om (5) $3\frac{1}{2}$ p.c. and many new provisions and restrictions enacted—some of the new provisions being standard provisions for life insurance policies—anti-rebating and anti-discrimination provisions, prescriptions concerning distribution of profits, separation of participating and non-participating accounts); 1917 (largely a new alignment believed to make the legislation *intra vires* within the terms of the Privy Council decision, 1915, in reference to sections 4 and 70 of the 1910 Act); 1919 (amendment affecting fraternal benefit societies); 1922 (in addition to some minor amendments defined several new classes of insurance, permitted life insurance companies to transact other classes of insurance business under specified conditions referred to in more detail below, authorized the issue of life policies including indemnity benefits in event of accident or sickness—payment not to exceed a weekly sum of $\frac{1}{2}$ p.c. of the amount assured—and an additional accidental death benefit not exceeding the sum assured, provided for the valuation of securities redeemable at a fixed date—if the market values should be "unduly depressed"—at values in excess of the market values but not higher than the values shown in the next preceding annual statement of the company, it also required approval by the Superintendent of agents soliciting applications for insurance but approval was to be deemed to have been given unless and until the company was advised to the contrary, all of which provisions except the so-called "licensing of agents" provision are to be found in the Acts of 1932 in substance); 1923 (policy conditions for automobile insurance); 1924 (provided that the market value of securities for annual statement purposes may be taken at a date to be fixed by the Superintendent of Insurance not more than 60 days before the date of statement, that life policies must contain a provision for payments thereunder to be made in Canadian money in Canada, that the expenses of the Department of Insurance incurred in the administration of the Insurance Act should be assessed on the premium income of insurance companies, all of which provisions—except that concerning payments under policies in Canadian currency—are included in the Acts of 1932 in principle); 1927 (fundamental changes in the policy valuation provisions, more particularly noted below); 1927 (consolidation); 1929 (enlarging the powers of fraternal benefit societies to include the issuance of endowment assurance contracts and the granting of non-forfeiture equities in policies).

The legislation briefly noted above shows traces of the influence of British and of United States legislation. In many respects it may be said to be midway between the "freedom and publicity" legislation of England and the inquisitorial and restrictive legislation of the United States. Following the disclosures of the "Armstrong" investigation in New York, a Royal Commission was appointed in 1906 to inquire into the conduct of life insurance business in Canada; the recom-

recommendations of the Commission were in the main the same as of the "Armstrong Committee" Many of the recommendations, however, were not embodied in the legislation passed subsequent to the investigation. At the same time, there is a closer analogy between the Acts of 1910 and 1917 and certain United States Statutes passed in recent years than obtained between the insurance legislation of the two countries at any earlier period. Many of the new features introduced in the legislation of 1910 and subsequent years were repealed in 1932. It should not be supposed, however, that the legislation of 1932 was a reversion to the pre-1910 legislation; many provisions adopted in the Acts of 1910 and 1917, and the subsequent amendments, are incorporated in the Acts of 1932. Some of these are examined below in greater detail than was found convenient in the above summary.

By the Act of 1910, companies were authorized to include in life insurance policies provisions for waiver of premiums during total disability and, in event of total and permanent disability, to pay in full settlement of the policy an amount not exceeding the sum assured. In practice, on the occurrence of total and permanent disability, the sum assured was usually paid in equal instalments over 20 years rather than in one sum, the balance of the sum assured being payable in event of death within the 20 years. The 1917 Act permitted the payment of a total and permanent disability benefit equal to the amount of life insurance in the policy but without any reduction in the life insurance. Under this authority, the usual total and permanent disability benefit included in policies was a monthly annuity of 1 p. c. of the sum assured, payable until death or until maturity of the contract or until earlier recovery from disability. The value of this annuity on a life totally and permanently disabled is less than the sum assured and consequently the annuity benefit is within the total and permanent disability benefit authorized by the Amendment of 1917. In substance, the Acts of 1932 empower companies to include in life insurance policies the disability benefits authorized by the 1917 Amendment.

The inclusion of disability benefits in life insurance policies proved popular with the insuring public. A few years back, the great majority of policies issued included these benefits, which shows that this type of insurance protection was greatly appreciated. Unfortunately, the disability claims experience of companies became progressively worse from year to year and, during the last few years of the decade ended with 1930, threatened to get out of hand. As a consequence, companies have considerably reduced the disability benefits relative to the sum assured and have increased the scale of premiums, while at the same time they have increased the stringency of the claim conditions.

The 1919 Amendment to the Insurance Act 1917, affecting fraternal benefit societies, was an amendment of great significance. It is more convenient to deal with it in a later paragraph concerning the history of fraternalism.

One of the provisions of the 1922 Amendment, namely, the provision empowering life companies, incorporated by the Parliament of Canada, to transact other classes of business, is perhaps entitled to more lengthy notice than given on p. 938. In 1894 an Act was passed forbidding the transaction of life insurance business in combination with any other insurance business. This principle was reversed by the 1922 Amendment and confirmed by the Act of 1932, authorizing a life company, on passing a by-law confirmed by the members of the company and sanctioned by the Treasury Board, to engage in any and all other classes of insurance business, provided separate funds and accounts are maintained in respect of the life insurance business and in respect of the other classes of insurance business transacted. Before commencing any new classes of business, an initial fund is to be set up, the amount

to be fixed by the Treasury Board, and to depend on the number and nature of the additional classes of business to be undertaken but not to be less than \$50,000. For the purpose of setting up this initial fund, a life company may transfer thereto any amount to the credit of the shareholders' account in excess of paid-up capital and 25 p.c. but not exceeding \$100,000 of the surplus in the life insurance fund, (allowance being made for contingent allotments and accrued dividends to policyholders). If any profit should be made on the additional classes of business, the life fund is to participate therein in the proportion of the amount so transferred from the life fund to the total amount transferred. Any fund so established may be liquidated under the Winding-up Act as though the company transacted no other class of business, and the capital stock of the company subscribed (paid and unpaid) before the date of the separation of funds is liable only in respect of the business transacted before the separation of funds.

In 1927 an important amendment was made to the Act of 1917 by which entirely new policy valuation provisions were enacted. In 1877 bases were prescribed for computing the claims of policyholders against an insolvent company, and the Superintendent of Insurance was required to make valuations quinquennially on these bases, presumably with a view to ensuring that companies should always maintain their assets at least equal to the amount of claims which might be made in a winding-up. In the course of the subsequent fifty years, the business of life insurance companies had become transformed almost out of recognition, and although there had been many amendments to the valuation bases and accretions, sometimes heterogeneous, to the valuation prescriptions, the valuation provisions in the Acts had not kept pace with business developments and practices. Likewise, in the course of years, the principles and the rationale of the legislation had become overlaid, confused, misunderstood or lost. In the circumstances, a fundamental reconstruction was long over-due; the reconstruction of 1927 was incorporated in the Acts of 1932 practically without change. For present purposes a brief summary of the main principles on which the new legislation was founded, without contrast in detail against the background of the earlier legislation, will suffice.

The object of the new valuation prescriptions is the computation of policy liabilities for annual statement purposes of companies. The prescriptions extend not only to the life insurance benefits but also to benefits dependent on disability, sickness, accident or on any other contingency which may, under the Acts, be included in a life insurance policy, and also to assurances dependent on a term certain. Maximum rates of interest are prescribed, being $3\frac{1}{2}$ p.c. for assurances and 4 p.c. for annuities. All of the tables of mortality commonly in use by companies for computing premiums and reserves are authorized to be used in valuations but, if a company should find none of these tables appropriate for the valuation of any particular class of policies, the Act requires the company to make application to the Superintendent of Insurance for approval of a table deemed to be appropriate. Valuation methods are prescribed, but any other method a company deems appropriate may be used, subject to compliance with the methods prescribed. For deferred annuity contracts, the prescribed method is the net level premium method; for assurance contracts, a preliminary term method. If the net level premium for the life insurance benefits does not exceed the net level premium for a whole life policy, the method is the full preliminary term method. If the net level premium is in excess of the whole life premium, the valuation premium must be so computed as to make the same expense provision as of date of issue of the policy as

is made in respect of whole life policies under the full preliminary term method. Whatever method of valuation may be used by any company, the Acts require that the reserve made in respect of the life insurance benefits, apart from any guaranteed values in the policy, shall not be less at any duration than the reserve made in accordance with the prescribed method and in addition "that the method used shall make adequate provision for the guaranteed values at the subsequent durations of the policy according to the rate of interest and the table of mortality used in the valuation". In respect of policy obligations dependent on contingencies other than life contingencies, "the bases and methods of valuation employed by the company shall be such as to place an adequate value on the liabilities thereunder", negative reserves excluded. The actuary of the company responsible for the valuation must certify that the reserves are not less than the reserves required by the provisions of the Act, and in addition "that in his opinion the reserves make a good and sufficient provision for all unmatured obligations of the company under the terms of its policies". Thus, compliance with the more or less technical provisions of the Act is not in itself sufficient to enable an actuary to give the required certificate; the valuation must, in his opinion, in the nature of things make a good and sufficient reserve for all unmatured policy obligations. If, in the opinion of the Superintendent of Insurance, the facts and circumstances do not justify the certificate given by the actuary, he may make a special valuation and if necessary change the reserve in the liabilities of the company. Once in every five years, or oftener at his discretion, the Superintendent is required to make a valuation on the bases and methods the company purports to use; but if he should be of the opinion that the valuation of the company does not comply with the Act, his valuation must, of course, remedy the defect. In lieu of making a valuation, he may examine the valuation made by the company. The above probably sufficiently states the main principles of the valuation provisions of the Acts for present purposes.

The legislation of 1932 was occasioned by the Privy Council decision of 1931, which held in effect that the Insurance Act was not properly framed, having regard to the competence of Parliament in that behalf. The Act was consequently repealed and three Acts were passed, namely, The Department of Insurance Act, The Canadian and British Insurance Companies Act, and The Foreign Insurance Companies Act, being respectively cc. 45, 46 and 47, 22-23 Geo. V. Presumably it was found more convenient, legislatively and otherwise, to have three Acts in place of one. From an examination of these Acts in comparison with the Consolidated Insurance Act, 1927, it would appear that every provision of that Act has been retained in the 1932 Acts which could be retained consistently with the views taken concerning the effect of Privy Council decisions up to the date of enactment. The legislative form and verbiage has, however, been greatly changed. Several important provisions, enacted in 1910 and subsequently conserved in the Acts of 1932, have already been briefly reviewed. In a broad and general way it may be said that the core of the 1932 legislation is that companies formed or incorporated outside of Canada may not transact business in Canada unless registered by the Minister of Finance, and, precedent to first registration, a company, whether Canadian, British, or foreign, must satisfy the Minister of its soundness, solvency and *bona fides*. Thereafter, a company must make full and complete annual returns of its business and affairs, submit to examination by the Superintendent of Insurance, and otherwise continue to satisfy the Minister of its soundness and solvency, and to comply with the Acts.

Group Insurance.—The above gives in brief outline the legislative framework under which the business of life insurance in Canada has developed. This development, as in other English-speaking countries at least, has been marked by an increased service to policyholders. Companies more and more seek to bring the benefits of insurance within the reach of an ever-widening *clientèle*. The introduction of "group insurance" nearly twenty years ago has brought the advantages of life insurance protection in a substantial way to large numbers who are generally not adequately protected. This is a plan of insurance under which each individual of a group of persons is insured under one policy, usually on the term plan. Very generally the lives insured in one group are employees of one employer, the employer paying the premiums or a substantial proportion thereof. Each employee has the right to obtain an individual policy at normal rates, without medical examination, on termination of employment. Under group insurance, the expenses are less than if individual policies were issued on each life in the usual way and consequently the premiums are lower. Although the plan as generally operated does not adequately take the place of regular insurance, it has proved of benefit to employees and other groups.

Industrial Insurance.—Another plan of insurance by which companies endeavour to fit the terms and conditions of policies to the circumstances of policyholders is "industrial life insurance", that is to say, the issue of policies of small amounts at weekly or monthly premiums paid to collectors or agents of the company who call at the home of the insured. This business is transacted in Canada along the same general lines as in other English-speaking countries. The unit premium is 5 cents per week, the sum assured, not the premium, varying with the age when the policy is issued. Children and the aged are alike insured. In some companies the business is written without any medical examination or inspection, other than inspection by the agent who procures the application or in some cases by a salaried official. In some other companies a simple medical examination is required for amounts of over, say, \$300, but for smaller amounts applications are accepted from the agent as above, or the applicant may be required to appear before the medical examiner, but is not examined, as ordinarily understood. The amount of the individual policy is small and the total amount on any one life under several policies is usually not large. It, in fact, provides burial insurance for the poorer industrial classes, but there has been some extension of business on this plan to other classes. By reason of the frequent calls of the collectors and the small amount of each policy, a large proportion of the premiums is absorbed in expenses. The companies concerned have been devoting their energies to devising ways and means of reducing the expense ratio, and with success, thus making possible better returns to policyholders. For many years business has been transacted by four companies—one Canadian, two United States, and one Australian. The machinery and technique necessary for the transaction of this business differ materially from the machinery and technique of ordinary life insurance business.

Two other phases in the development of life insurance in Canada call for mention, namely, "assessmentism", as practised for a period by a few companies, and "fraternalism", as practised by friendly societies.

Assessmentism.—Assessmentism was an attempt to obtain life insurance protection at the lowest possible cost. In its cruder forms, the age of the individual insured was ignored, except that entrance was restricted to fairly early life; a uniform and usually low assessment was charged. There was provision in the contract for

making additional assessments in certain contingencies—excessive deaths or reduction in funds of the company. It was held that as the means were thus at hand for meeting the exigencies of the business at any time, the companies were sound; and they seemed to be sound, even prosperous to those unable to see beneath the surface of things, so long as a large proportion of the lives assured were at the early ages, say under 40 or 45, where the rates of mortality are low and increase but slowly with the age. But, after a considerable proportion of lives insured had passed to middle and old age, the weaknesses of the system soon began to be disclosed. The “new blood” theory was then developed, which, stated in simple terms, meant that enough young lives were to be induced to insure to keep the average mortality of the company as a whole at a low rate, thus obviating the necessity for excessive assessments. These young lives, however, in turn grew old and thus the aged became too numerous to be off-set by “new blood”; assessments became frequent and consequently burdensome; healthy persons, especially the young, found they could get insurance much cheaper in ordinary companies and declined to pay the assessments. With their withdrawal, mortality, with no adequate reserves built up to draw upon, soon became unmanageable, and the final *débâcle* was in sight. It is impossible here to follow assessmentism through all its modifications in practice—merely attempts, perhaps generally honest enough in intention, to bolster up an unsound system. The first of these companies appeared in Canada in 1885 and the last disappeared about 1907. Legislation in respect of these companies required that they should represent the nature of their business correctly to the public. A deposit of \$50,000 was obligatory; death benefits were to be a first charge on all assessments; each policy had to state that “the association is not required by law to maintain the reserve which is required of ordinary life insurance companies”, and the words “assessment system” were required to be printed on every policy, application, circular, etc.

Fraternal Insurance.—Fraternal societies made their appearance in Canada at a very early date. So far as life insurance is concerned, the development is of more recent years, as in the case of old line life companies. They were at first exempt from the provisions of the Dominion Acts applicable to assessment companies. Notwithstanding the exemption, fundamentally the business and the methods of the two types of institution were fairly analogous as regards life insurance, though the machinery differed. Eventually, the provisions of the Statutes originally designed for assessment companies were applied to fraternal societies and continued to apply until the passing of the 1919 Amendment to the Insurance Act. The essential provisions of this amendment are embodied in the Acts of 1932. Thus the fate of fraternal benefit societies has been more fortunate than that of assessment companies. Although many of them have had to go through several readjustments of rates and benefits, which meant loss of membership and a temporary set-back, they have for many years been doing business with due regard for sound principles. Since 1919, these societies have been required to have an annual valuation made of each benefit fund by an actuary. Should a deficiency be disclosed as a result of the valuation, it must be made good within a reasonable period by an adjustment of rates or benefits. Thus societies are in no way in the dark as to their actual condition, and if any weakness should be disclosed the necessary remedy can be applied before anything in the nature of a serious situation arises. No bases or methods of valuation are prescribed; the actuary is expected to make his valuation having regard for all essential circumstances. It may be noted that an actuary performing valuations for a friendly society must be a fellow, by examination, of one or more of

the following societies, namely, the Institute of Actuaries of Great Britain, the Faculty of Actuaries in Scotland, the Actuarial Society of America, or the American Institute of Actuaries.

Provincial Life Insurance Companies.—Any review of the development of the business of life insurance in Canada would not be complete without reference to the part played by the provinces. Insurance business transacted by provincial companies, more particularly life insurance business, has been relatively unimportant, but the legislation of the provinces with respect to contracts, insurable interest, beneficiaries, settlement of claims, agents, and other matters within the legislative domain of the provinces, has been of great importance both for insurers and the insuring public. Recognizing the great advantages of uniform laws throughout Canada, more than ten years ago the provinces appointed Commissioners to study the subject and to make recommendations. In respect of insurance the Conference of Commissioners recommended a "Uniform Bill" for enactment by the provinces. During the latter part of 1923 and the early part of 1924 the recommendations of the Conference of Commissioners were implemented by legislation in seven provinces—all except Nova Scotia and Quebec. In 1932 similar legislation was enacted by Nova Scotia. Thus throughout the greater part of Canada, the insurance law has been uniform for nearly ten years. This is of great benefit both to insurers and to the insuring public and should contribute materially to the satisfactory and economical development of insurance business in the future.

Subsection 2.—Life Insurance Statistics.

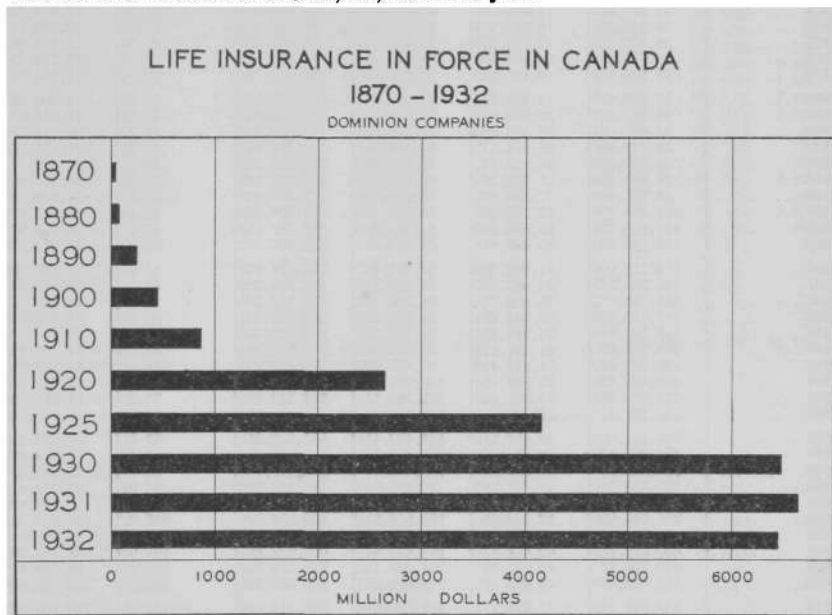

Life insurance business was transacted in Canada in 1931 by 43 companies licensed by the Dominion, including 28 Canadian, 6 British and 9 foreign companies. In addition there were 6 British and 5 foreign companies licensed to write insurance but which had ceased to write new insurance, while 4 other British and 4 other foreign companies were authorized under the Act to transact business in connection with policies written prior to Mar. 31, 1878. One other foreign company was licensed to transact business in 1926, but has written no life insurance business in Canada except one group policy, written in 1928 but which lapsed before the close of the year. A foreign company, the Pan-American Life Insurance Company, was licensed during 1931 but transacted no Canadian business during that year.

As shown by the historical statistics of Table 9, life insurance business in Canada has expanded from very small beginnings, the total net life insurance in force in all companies licensed by the Dominion in 1869 being only \$35,680,082 while in 1932 it was \$6,471,588,455¹, the amount per head of the estimated population of Canada having nearly doubled since 1920—an evidence of the general recognition of the value of life insurance for the adequate protection of dependants against misfortune. Notable also from these historical statistics is the fact that in this field the British companies, which were the leaders in 1869, have fallen far behind the

¹Preliminary figures. This total does not include \$175,845,857 of fraternal insurance.

Canadian and the foreign companies. The total net amount of new insurance effected during the year 1931 was \$782,716,064, as compared with \$884,749,748 in 1930, \$978,141,485 in 1929, \$918,742,064 in 1928, \$838,475,057 in 1927 and \$797,940,009 in 1926, while the premiums paid were \$225,100,571, as compared with \$220,523,727 in 1930, \$210,728,479 in 1929, \$192,945,783 in 1928, \$173,732,359 in 1927 and \$159,872,965 in 1926.¹

The following diagram shows the rapid increase of life insurance in force in companies licensed by the Dominion between 1870 and 1931. Preliminary figures for 1932 show a decrease of \$150,679,338 in the year.

In Table 10 detailed statistics are given of the business of Canadian, British and foreign companies, respectively, by companies, in 1931, while Table 11 is a summary showing the business of Canadian, British and foreign companies for the past 5 years. Table 12 shows the ordinary and industrial policies in force and effected during the year ended Dec. 31, 1931. Table 13 gives the insurance death-rate by classes of companies, and Tables 14, 15 and 16 show, respectively, the assets, liabilities, cash income and expenditure of Canadian and other life insurance companies for the years 1927-31. Statistics of Dominion fraternal insurance are given in Table 17 and of Dominion and provincial insurance combined in Table 18, which shows that on Dec. 31, 1931, the total life insurance in force in Canada was \$7,008,008,333.

¹In 1932 the new insurance effected was \$654,425,266 and the total of net insurance premiums paid was \$216,133,010, according to preliminary figures.

¹Figures do not include insurances in force and effected by Fraternal Societies operating under Dominion charters. The amount of insurance in force in such societies amounted to \$176,845,857 in 1932 according to preliminary figures. Corresponding figures for the years 1927-31 are given in Table 17, pp. 953-954.

²Preliminary figures.

³For estimates of populations upon which these figures are based see p. 145.

14.—Assets of Canadian Life Companies and Assets in Canada of Life Companies other than Canadian Companies, 1927-31.

NOTE.—Certain British companies transacting fire insurance in Canada transact also life insurance in Canada, and inasmuch as a separation of assets has not been made between these two classes, their assets in Canada are not included here, but are included in the assets of British companies shown in Table 3 on p. 933.

¹Includes income or expenditure on business outside of Canada. ²Income or expenditure in Canada.

Life Insurance Effected through Fraternal Benefit Societies.—In addition to life insurance, some fraternal benefit societies grant other insurance benefits to members, notably sickness benefits, but these are relatively unimportant. Table 17 gives statistics of life insurance effected through fraternal benefit societies on Canadian members, together with statistics of assets, liabilities, income and expenditure relating to the whole business of Canadian societies and to the business in Canada of foreign societies. The rates charged by these societies are computed to be sufficient to provide the benefit granted, having regard for actuarial principles. Each benefit fund of every society must be valued annually by a qualified actuary (Fellow by examination of the Institute of Actuaries, London; of the Faculty of Actuaries in Scotland; of the Actuarial Society of America; or of the American Institute of Actuaries), and unless the actuary certifies to the solvency of each fund a readjustment of rates or benefits must be made. The statistics in the first part of this table relate to the Canadian societies reporting to the Insurance Department of the Dominion Government, which numbered 8 in 1931, *viz.*, Alliance Nationale, Ancient Order of Foresters, Artisans Canadiens-Français, Canadian Woodmen of the World, Catholic Mutual Benefit Association, Commercial Travellers' Association of Canada, Independent Order of Foresters and Grand Orange Lodge of British America.

Under an amendment to the Insurance Act, effective Jan. 1, 1920, all foreign fraternal benefit societies were requested to obtain Dominion authority precedent to transacting business in Canada, but any such societies which at that date were transacting business under provincial licences, while forbidden to accept new members, were permitted to continue all necessary transactions in respect of the insurance

of their then members. Most of these societies have since obtained Dominion authority to transact business, also some foreign societies which had not previously been licensed by the provinces. Of both classes of societies, 24 transacted business in Canada in 1931, viz., Aid Association for Lutherans, Association Canado-Américaine, Brotherhood of American Yeomen, Catholic Order of Foresters, Expressmen's Mutual Benefit Association, First Catholic Slovak Union, Jewish National Workers' Alliance, Knights of Columbus, Ladies' Catholic Benevolent Association, Lutheran Brotherhood, Lutheran Mutual Aid Society, Maccabees, Modern Woodmen of America, National Fraternal Society of the Deaf, National Slovak Society of U.S.A., Royal Arcanum, Royal Clan (Order of Scottish Clans), Slovene National Benefit Society, Sons of Norway, United Commercial Travelers of America (accident business only), Verhovay Aid Association, Women's Benefit Association, Women's Catholic Order of Foresters, Workmen's Circle.

Summary of Life Insurance in Canada, 1931.—In addition to the business transacted by life insurance companies registered by the Dominion, a considerable volume of business is also transacted by companies licensed by the provinces. Statistics of these provincial companies have been collected since 1915 by the Department of Insurance. Table 18, showing policies effected and in force, premiums received and losses paid, in Canada in 1931, summarizes the volume of business done by both life companies and fraternal societies, whether registered by the Dominion or licensed by the provinces.

Section 3.—Miscellaneous Insurance.

Since 1875 the growth of insurance business other than fire and life has been steady. The report of the Superintendent of Insurance for the calendar year 1880 shows that the number of companies licensed for the transaction of accident, guarantee, plate glass and steam boiler insurance—the only four classes of miscellaneous insurance then transacted—was 5, 3, 1 and 1 respectively. The report for the year 1931 shows that miscellaneous insurance in Canada now includes: accident, automobile, aviation, burglary, credit, earthquake, explosion, forgery, guarantee, hail, leakage, live-stock sickness, steam boiler, title, tornado, weather insurance, etc. In 1880 10 companies transacted business of the miscellaneous kind, but in 1931 such insurance was sold by 251 companies, of which 53 were Canadian, 59 British and 139 foreign; 180 of these 251 companies also transacted fire insurance. In addition, 18 fraternal orders or societies carried on sickness insurance as well as life insurance business.

Accident Insurance.—The first licence of this kind was issued to the Travelers' Co., of Hartford, Conn., in 1868. The first licence to a Canadian company was issued to the Accident Insurance Co. of Canada, which was organized in 1872 and commenced business in 1874. Much accident insurance has also been sold by companies doing primarily a life insurance business. Seventy-two companies transacted accident insurance in 1931.

Automobile Insurance.—This is now one of the most important branches of the miscellaneous class of insurance. Premiums increased from \$80,446 in 1910 to \$573,604 in 1915 and to \$18,260,176 in 1930; for 1931 they were \$16,825,020, showing a decrease of 8 p.c. for the year. There has been an increase in the number of companies from 7 to 162 during the 21-year period.

Plate Glass Insurance.—Policies were first sold in Canada by the Metropolitan Plate Glass Insurance Co., a United States' concern, which withdrew from Canada during 1882 to avoid business restrictions. The 73 companies operating in Canada in 1931 received premiums of \$585,437 and incurred claims of \$249,715, compared with premiums of \$553,842 and claims of \$268,924 for 1930.

Burglary Insurance.—In 1893 only one company issued burglary policies. A second followed in 1905, and in 1910 5 companies were operating, while 68 companies sold this type of insurance during 1931. The premium income of these companies amounted in 1931 to \$1,344,134 and the losses incurred amounted to \$462,633.

Hail Insurance.—Insurance against hailstorms is a class of business of comparatively recent development in Canada. During the year 1931, 42 companies undertook this class of risk, the premiums written amounting to \$573,997 and the losses incurred to \$480,377. The total premiums for the 22 years during which this business has been carried on in Canada amounted to \$65,022,607 and the total losses paid to \$45,126,625.

⁴ Excluding \$934,694 losses of Fraternal Benefit Societies for Accident, Sickness and Funeral business.

Section 4.—Government Annuities.

In the early years of the 20th century, there arose throughout the civilized world a distinct movement in favour of ameliorating the living conditions of the less well-off members of society. One form which this movement took in the United Kingdom was that of old age pensions, granted by the State as a gift to its poorer citizens, whose earnings were very generally insufficient to permit of a margin of saving. In Canada, where wages were higher and a margin of saving was possible, the movement at first took the form of providing, by establishing Government annuities, an absolutely safe investment for such savings, which had only too often been lost through the inexperience of their owners, leaving the latter a burden upon the charity of relatives or of the public.¹ The cost of administering those annuities is borne by the Dominion Government.

Under the Government Annuities Act (Chapter 7, R.S.C., 1927, amended by c. 33, R.S.C., 1931), His Majesty the King, represented by the Minister (at present the Minister of Labour), may sell to persons over the age of 5 years, domiciled or resident in Canada, immediate or deferred annuities of not less than \$10 nor more than \$1,200 (1) for the life of the annuitant, (2) for a term of years certain, not exceeding 20 years, or for the life of the annuitant, whichever period shall be the longer, or (3) to any two persons domiciled in Canada during their joint lives, and with or without continuation to the survivor. The property and interest of any annuitant in any contract for an annuity is neither transferable nor attachable. The purchaser may contract that, in the event of the death of the annuitant before the date fixed for the annuity to begin, all money paid shall be refunded to the purchaser or his legal representatives with interest at the rate of 4 p.c. compounded yearly.

From Sept. 1, 1908, the date of the inception of the Annuities Branch, up to and inclusive of Mar. 31, 1932, the total number of annuity contracts issued was 15,019. Of these contracts, 1,746 have been cancelled, leaving in force on Mar. 31, 1932, 13,273 contracts. The total amount of purchase money received during the same period was \$32,666,706. Table 23 gives the details of annuities contracted for and purchase money received from 1909 to 1932, by years.

¹A Dominion-Provincial non-contributory scheme of old age pensions, providing for the payment, to persons 70 years and over, of pensions not exceeding \$20 per month, contributed by the Dominion and the provinces which became parties to the scheme, was enacted by chapter 35 of the Dominion Statutes of 1927. The system is now in effect in British Columbia, Manitoba, Saskatchewan, Alberta, Ontario and the Northwest Territories. For further particulars, see pp. 780-782.

¹Seven months.

Statistics of the Annuities Fund and value of all contracts issued are given in Tables 24 and 25. From Sept. 1, 1908 to Mar. 31, 1932, 15,019 annuities had been issued. On Mar. 31, 1932, 5,254 immediate annuities and 8,019 deferred annuities were in force. The total value of these annuities on that date was \$26,871,979 and the amount of annuities purchased was \$5,477,596.

It will be seen from the statements above that Government Annuities have grown steadily in favour, especially since 1921. The actual purchase money received was highest in 1929, while the number of contracts reached a maximum in 1931. In the year 1932, however, the figures for both the number of contracts and the amount of purchase money received were well up toward these maximum levels. The fund, which on March 31, 1932, had been in existence for nearly twenty-three years, shows a particularly healthy growth and from 1928 to 1932 has increased from \$14,719,000 to \$26,583,000.

CHAPTER XXIV.—COMMERCIAL FAILURES.

According to Section 91 of the British North America Act, "the exclusive legislative authority of the Parliament of Canada" extends to bankruptcy and insolvency legislation, and an Insolvency Act (32-33 Vict., c. 16) was actually passed by the Dominion Parliament in 1869, applying to the four original provinces. This Act was in force for four years and was renewed by c. 46 of the Statutes of 1874, while in 1875 a new Insolvency Act (38 Vict., c. 16) applicable to the whole Dominion was passed, but was repealed in 1880. After this there was no Dominion legislation on the subject of bankruptcy until 1919. During the interval of nearly 40 years commercial failures were handled under provincial legislation, and the statistics relating to such failures during this period were compiled and published by Dun's and Bradstreet's commercial agencies. In 1919 a general Dominion Bankruptcy Act was passed (9-10 Geo. V, c. 36). Statistics of commercial failures dealt with under this Act since it came into force in 1920 have been compiled and published by the Dominion Bureau of Statistics. (See pp. 964-965.)

The history of commercial failures in Canada is traced by years from 1900 in Table 1. Both Bradstreet's and Dun's records are included for comparative purposes. The two sets of records are shown in the table to have the same general tendency so far as numbers of failures are concerned. Dun's record, however, ordinarily shows a rather larger number of failures, and considerably larger assets and liabilities than Bradstreet's.

Failures by Branches of Business.—In every year the great majority of the commercial failures of the country are found among the trading establishments which are so much more numerous than the manufacturing. Thus, according to Dun's records, out of a total of 2,938 commercial failures in Canada and Newfoundland in 1932, 2,038 were among the trading establishments, including 416 in groceries and meats, 378 in clothing and furnishings and 219 general stores.

Out of the 703 manufacturers who failed, 126 were in clothing and millinery, 79 in the lumber or carpentering business and 78 among millers and bakers. The larger scale on which manufacturers operate is evident from the fact that the defaulted liabilities of the 703 manufacturers were nearly as great as those of the 2,038 traders. The figures of commercial failures include both Canada and Newfoundland and are analyzed in detail for the years 1930 to 1932 in Table 2, while the totals by broad groups are given for 1915 and subsequent years in Table 3.

Assignments under the Bankruptcy and Winding Up Acts.—Under the Bankruptcy and Winding Up Acts (R.S.C., 1927, cc. 11 and 213) certain documents relating to assignments have, since 1920, been forwarded to the Dominion Statistician for statistical analysis. Table 5 gives the resulting figures of failures, by provinces, in 1922 and subsequent years, while Table 6 classifies them by branches of business. Table 7 gives the assets and liabilities of the assignors. A detailed analysis of the 1932 failures, by provinces and branches of business, is made in Table 8.

CHAPTER XXV.—EDUCATION.

Section 1.—Schools, Colleges and Universities.¹

Throughout the Dominion of Canada public education, except for instruction of the native Indian population, is a matter of provincial concern. Before Confederation, the maritime colonies were separated from Ontario by French-speaking Quebec, and in each colony an educational system specially adapted to the local conditions had come into existence. When Confederation was under consideration, the protection of existing vested rights was the predominant consideration. As a result, Section 93 of the British North America Act, which embodies the Canadian constitution in so far as that constitution is a written one, provides that in and for each province the Legislature may exclusively make laws in respect of education, except that "nothing in any such law shall prejudicially affect any right or privilege with respect to denominational schools which any class of persons have by law in the province at the union"

Inasmuch as the administration of public education is one of the chief functions of Provincial Governments, in each of the provinces except Quebec there is a Department of Education administered either by a member of the Provincial Executive Council or Cabinet or by the Executive Council or Cabinet as a whole. In practice, however, the routine administration is in the hands of the permanent officials of the Department of Education, who are members of the permanent civil service. In Quebec the Superintendent of Education, appointed by the Government, is *ex officio* President of the Council of Public Instruction. The link between the Department of Public Instruction and the Government is the Provincial Secretary; there are also two deputy heads, called the French and English Secretaries of the Department.

Since the Departments of Education are permanent authorities, controlled as to details of administration by permanent officials, educational policy is relatively permanent; further, the control of the Governments over education throughout the provinces is relatively stronger than in the United States. A capable Deputy Minister or Superintendent of Education impresses his personality and his views upon the whole system of his province, especially as in practice he controls the payment of government grants, which constitute, on the average, about 14 p.c. of the total expenditure applied to educational purposes.

The Department of Education in each province naturally has its headquarters at the capital of the province. Its local representatives are the school inspectors, who are appointed and paid by the Provincial Governments, except for the "public" and "separate" schools in Ontario, where they are appointed by the county or city municipality from a list approved by the province (in all but unorganized districts), and where the cities receive a grant from the province for inspection purposes in place of having inspectors' salaries paid direct.

¹Revised by M. C. MacLean, M.A., F.S.S., Chief, Education Statistics Branch, Dominion Bureau of Statistics. This Branch is concerned with compiling and publishing comparable data relating to educational institutions throughout Canada, and to this end co-operates with the Provincial Departments of Education. A list of the publications of this Branch will be found in Chapter XXIX, Section 1, under "Education".

Education in Quebec.—In Quebec there are two distinct systems of education—the Protestant and the Roman Catholic systems—in each of which the teaching of religion takes a prominent position. In the former, which is under the control of the Protestant Committee of the Council of Public Instruction, with an English Secretary, the curriculum and the general system of education is similar to those in the other provinces, except that the highest grade is Grade XI, from which students are matriculated to McGill University and Bishop's University, the two Protestant English-speaking universities of the province.

In the Roman Catholic schools, which are mainly French-speaking, as the Protestant schools are English-speaking, the administration is in the hands of the Catholic Committee of the Council of Public Instruction, with a French Secretary. General elementary and continuation or "complementary" training is given by means of a curriculum, extending over one preparatory "year", six "years" of an elementary course, and two "years" of a complementary course. Some of these "years" require more than a year to complete, the completion of the "sixth year" corresponding in a general way to the end of the elementary grades, or high school entrance, in other provinces. Beginning in the school year 1929-30, a new superior course of three "years" beyond the complementary course was provided for. These are called the ninth, tenth, and eleventh "years". They enrolled over 4,400 students in the second year of their introduction.

Summary Statistics of Education.—The recorded enrolment at Canadian educational institutions in 1931 was 2,542,747, and the total cost of the support of schools, colleges and universities was \$178,701,507. This represented an increase over the previous year of 2.1 p.c. in attendance, and 8.1 p.c. in costs—the latter percentage increase being higher on account of a great part of the enrolment increase being in the more advanced and more costly institutions. A concise numerical summary of pupils, teachers, institutions, and costs for the year may be given as follows:—

Type of Institution.	Institu- tions.	Pupils.	Teachers.	Expendi- ture.
	No.	No.	No.	\$
(1) Provincially-controlled Schools—				
Ordinary day.....	30,500	2,137,810	65,248	} 144,748,823

¹Includes also 598 in the Departmental summer schools for teachers in N.S., 4,626 in Ont., and 162 in B.C., not held at universities or colleges.²Includes also 1 (b) in Quebec and Alberta, and 2 (a) in Ontario and British Columbia.³Estimated on same basis as in previous reports.⁴These students are entered according to provinces of residence. There are schools in five provinces.

Subsection 1.—The Provincially-Controlled Schools.

It is considered that the best general test of the efficiency of public general education in Canada is furnished by the statistics of Table 2, showing the 1931 age-grade distribution of 1,416,667 pupils in the provincially-controlled schools of seven provinces. Many other tables of this form, analysing age-grade distribution by provinces, by sex, and by rural and urban areas and graded or ungraded schools, may be consulted in the Dominion Bureau of Statistics' "Annual Survey of Education in Canada, 1931", pp. 22-43.

¹ Kindergarten and Kindergarten-primary.

General elementary and secondary education throughout the Dominion, in so far as it is provincially-controlled, is carried on, except in Quebec, in free schools supported by general taxation. These schools may be divided into 12 grades, 8 of which are normally considered to be elementary and 4 secondary. The twelfth grade is in most provinces a postgraduate year, corresponding to the first year of a university course. The average pupil takes one school year to complete each grade, so that entering school at 6 years of age, he would matriculate to the university at 17 or 18.

An historical summary of the enrolment and average attendance in provincially-controlled schools from 1901 to 1931 is given by provinces in Table 3. The totals of pupils enrolled in all provinces in the year 1901 is an approximation, based upon provincial statistics for the nearest available years. The enrolment and average attendance, in cities of 10,000 population and over, are given in Table 4.

3.—Historical Summary of Enrolment and Average Attendance in Schools in Canada, by Provinces, 1901-31.

TOTAL NUMBER ENROLLED, 1901-31.

NOTE.—Figures of enrolment and average attendance in various years prior to 1901 are given on pp. 839 and 840 of the 1932 Year Book.

4.—Total Pupils Enrolled and in Average Attendance, and Total in High School Grades, in Cities of 10,000 or over, by Sex, 1931, or Latest Year Reported.

NOTE.—The high school enrolment in Quebec cities is not given because it would not be complete without including the high school pupils of the classical colleges and independent classical schools and of the normal schools. The figures of secondary grades for Ontario cities represent high schools, vocational schools, and collegiate institutes only; they do not include pupils in fifth classes.

Secondary Education.—In the past quarter of a century the number of pupils of both sexes doing work of secondary grade has shown a very great absolute increase as well as a large increase relative to the number in elementary grades. The available statistics are given by years in Table 5, and show that in each of the provinces and in every year the number of girls in the secondary grades has exceeded the number of boys. The drop in the Ontario figures between 1915 and 1917 is due in part to the change in the statistical year from the calendar year to the natural school year—September to June.

¹1924—P.E.I., inc. P.W.C., 719-1,113; 1925—P.E.I., inc. P.W.C., 669-1,087; 1926—P.E.I., inc. P.W.C. 704-1,070; 1927—P.E.I., inc. P.W.C., 669-1,132; 1928—P.E.I., inc. P.W.C., 620-1,216; 1929—P.E.I., inc. P.W.C., 716-1,217; 1930—P.E.I., inc. P.W.C., 696-1,152; 1931—P.E.I., inc. P.W.C., 982-1,582. ²Includes the pupils of continuation schools, high schools and collegiate institutes only. In the school year 1931, in all secondary grades reported, there were approximately 50,011 boys and 53,309 girls. These included full-time day vocational, public and separate schools. The figures in the tables are, for comparative purposes, confined to continuation and high schools and collegiate institutes. ³The figures given for New Brunswick are approximate.

Subjects of Instruction in Secondary Grades.—The subjects taken in the elementary grades of the provincially-controlled schools are settled by the curricula, but in the secondary grades there are usually options appealing to different types of pupils, wishing to follow different callings. Statistics of the subjects taken by pupils in secondary grades in 1930, available for six provinces, were presented in the Canada Year Book, 1932, p. 843, showing among other things the small number of pupils taking Greek and German and the high proportion studying French and Latin. The "Annual Survey of Education in Canada, 1931", shows in detail the changes in the subjects chosen in recent years by secondary grade pupils in the different provinces.

Vocational and Technical Education.—The introduction of technical and vocational courses in the high school curricula has received strong stimuli in recent years from the Technical Education Acts of 1919, 1929 and 1931, under the terms of which the Dominion Government undertook to provide subsidies to the provinces to encourage the growth of technical instruction. From the outset evening classes during the winter months have been an important part of the work of the technical schools. The number of students in institutions for technical education coming within the scope of the Technical Education Act of 1919 (9-10 Geo. V, c. 73) in the academic years ended June 30, was as follows: 1921, 56,774; 1922, 61,961; 1923, 70,300; 1924, 79,829; 1925, 83,024; 1926, 88,961; 1927, 96,682; 1928, 109,008; 1929, 121,252. In the years since 1929 not all provinces have been receiving grants, but Table 6 provides a record of pupils receiving instruction of a technical character in the publicly-controlled schools of the Dominion in 1931.

6.—Enrolment in Publicly-Controlled Vocational Schools in Canada, by Provinces, School Year ended June 30, 1931.

¹This table does not include students in commercial courses in Quebec who, it will be noted, constitute the most numerous group in other provinces. In Quebec statistics they are included with the high schools, classical colleges, etc. Moreover, this table comes far short of demonstrating the full importance of technical or vocational training in Quebec for another reason. All of the work in the Catholic schools in advance of the elementary years (i.e. the five complementary and superior years, including about 25,000 pupils) has a strong vocational character. Apart from certain compulsory general subjects in these years optional subjects are grouped in four vocational sections, in one of which each pupil studies. ²Enrolment in Ontario schools is not for the full year but for a certain day—the last school day in May.

Teaching Staffs.—As shown in Table 1, the teaching staffs of Canadian schools consisted in 1931 of 71,246 teachers, 14,743 males and 56,503 females. The "Annual Survey of Education in Canada, 1931" deals in detail with the classification of these teachers, the rates of salary paid and the teaching experience. Table 7 summarizes statistics regarding rates of salary, as far as these are available.

¹The data for 1907 are incomparable and have been omitted. In recent years several universities have added teacher-training departments, in most cases for university graduates who are trained for teaching positions in the secondary schools. These are included in the figures for 1930 and 1931.

Receipts and Expenditures.—The total receipts and expenditures of the provincially-controlled schools of the different provinces are published for recent years in Table 9. Figures for the receipts in British Columbia and for expenditures in Prince Edward Island, Nova Scotia, New Brunswick and Quebec are not available.

9.—Canadian Provincially-Controlled Schools: Receipts and Expenditures, by Provinces, 1927-31.

NOTE.—For other years back to 1901, see the 1921 Year Book, pp. 148-153 and the 1932 Year Book, pp. 845-848.

¹The latest figures for Quebec, Ontario, Saskatchewan and Alberta are for 1930.

²Figures of expenditures are not available for Prince Edward Island, Nova Scotia, New Brunswick and Quebec.

³These totals do not include promissory notes.

⁴Figures for British Columbia do not include receipts.

⁵Including grants to provincial university as follows: 1927, \$531,875; 1928, \$545,917; 1929, \$564,425; 1930, \$606,825; 1931, \$547,450.

Subsection 2.—Higher Education.

The tables of this subsection are intended to include all institutions in the Dominion offering instruction in courses that are the equivalent of at least two years in advance of matriculation. The affiliated colleges of each university are shown along with it, except where they are situated in another province. In the tables following, the name of each institution is given in the language (French or English) used therein as the main language of instruction. Table 10 gives a summary of the degrees and diplomas granted by the different universities and colleges of Canada, and Table 11 shows the students attending the faculties and courses of instruction offered in each institution.

Students of University Grade.—The aggregate number of students in attendance was reported as 77,618. Of these, 41,168 were of university grade (*i.e.*, following courses for which matriculation was prerequisite) and 34,033 were in attendance at the regular sessions. They were enrolled in 153 different colleges or universities. Of those attending the full sessions 32,783 were undergraduates, while 1,250 were graduate students, *i.e.*, working toward a higher degree in a subject in which they already held a bachelor's degree. Many of the larger numbers classed as undergraduates actually held degrees, but not in the subject or faculty in which they were studying during the session under consideration.

More than half of all students, or 18,134, are in arts and pure science or what are commonly termed "academic" courses as distinguished from "professional" courses. One or two years of arts is prerequisite to many of the professional courses, in French-language Quebec the full four years. Next to arts and science come engineering and applied science with 3,554 students; medicine, 2,949; theology, 2,192; agriculture, 1,277; commerce and accounting, 1,103; law, 842; household science, 995; education, 667; public health and nursing, 650; pharmacy, 475; dentistry, 404; music, 220; forestry, 136; veterinary science, 122; architecture, 137; etc.

As shown in Table 10, there were 3,614 bachelor degrees granted to men and 1,224 to women, 525 diplomas to men and 773 to women. Some of the latter represent completion of courses similar to those for bachelor degrees. The graduate degrees granted included 447 master degrees or licences to men and 95 to women, the term "licentiate" being used by the universities of Laval, Montreal and Ottawa in place of the term "master". Those completing the doctorate were 35 men and 7 women, while honorary doctor degrees were conferred on 76 men.

¹ All degrees except those in theology granted by Dalhousie.

² All degrees except those in theology entered opposite Toronto.

³ Medical, dental and veterinary doctors included in "bachelor" column.

⁴ The licence in the French-speaking universities is the next degree in advance of bachelor, as the master degree is in the English-speaking.

⁵ Seventy-six of the doctor degrees were honorary.

Students not of University Grade.—The 41,168 students of post-matriculation standard represent little more than half of the total enrolment in universities and colleges. Many of the arts colleges, especially the classical colleges of Quebec offer preparatory courses in which instruction is given in the high school grades, or even elementary grades. These accounted for 19,845 students, practically all of whom were in regular attendance at the full session.

The remaining 16,615 of the enrolment, 7,873 men and 8,742 women, were not following high school courses, but could not be classed as university-grade students as they had not necessarily matriculated. A minority of them attended the full session, generally studying music, household science or agriculture. The remainder were the students of summer courses in teaching methods, series of evening extension lectures, correspondence and other extra-mural courses, agricultural and other short courses.

Apart from the reported enrolment many thousands of people were reached by extension lectures that were not grouped in series and reported as courses, and still larger numbers reached by university radio broadcasts, travelling libraries, agricultural assistance and various other forms of extension service. These activities were reviewed in the "Annual Survey of Education in Canada, 1929".

Teaching Staff.—At pp. 858 to 861 of the 1932 Year Book there was published an analysis of the teaching staffs of universities and colleges as in 1929-30, by sex and by full time or part time. A corresponding table for 1930-31 will be found at p. 113 of the "Annual Survey of Education in Canada, 1931"

¹Includes the arts students of Victoria, Trinity, St. Michael's, and students of the College of Pharmacy.

²Includes students of Manitoba Law School, and 304 students in arts also registered in affiliated arts colleges.

³Included in Arts.

Financial Statistics.—The total capital investment in the universities and colleges of Canada in 1930-31 is given in Table 12 as \$168,190,000, of which \$45,015,000 was the value of endowments and investments, \$120,392,000 was the value of lands, buildings and equipment and \$2,783,000 the value of other property.

The aggregate income of the universities and colleges in the same year was \$19,195,000, while the current expenditure reached \$20,079,000 and the capital expenditure \$3,932,000, being a total of \$24,011,000. Among the largest capital expenditures of the year were \$974,000 at the University of Toronto, \$617,000 at Victoria University, \$600,000 at Queen's University, \$550,000 at the University of Manitoba, and \$239,000 at McGill University. Further, expenditure on new buildings at the University of Montreal had totalled \$2,202,000 up to June of 1931.

The income of the universities and colleges from investments was \$2,581,000, from government grants \$5,896,000, from tuition fees \$3,656,000, from other sources \$7,062,000, including gifts and fees for board and lodging where they were given. Government grants fell from \$7,413,000 in 1930 to \$5,895,794, and have been still further reduced in 1932. Revenue from investments was down slightly as compared

with 1930, while revenue from fees had increased as a result of the raising of fees to fill the gap.

From the standpoint of financial support, there are at least three classes of institution. First, there are those that rely on grants from provincial treasuries for their upkeep; six of the provinces have such universities and the remaining three have colleges in this class. Secondly, there are the institutions such as Dalhousie, McGill and McMaster Universities, to cite a few, that rely for their support on endowments, and do not receive provincial grants. Thirdly, there are colleges either operated or controlled by religious denominations which do not receive provincial assistance, and which may not have a financial endowment sufficient to carry them. These may have another type of endowment—in men, so to speak, like the University of Ottawa and other Roman Catholic colleges conducted by religious orders. Since salaries are commonly only nominal in these schools, expenses are comparatively low per pupil accommodated. The other section of the third group—mainly Protestant theological and arts colleges—commonly rely on Church contributions where their financial endowments are inadequate.

⁴Does not include expenditure made on new buildings. For the University of Montreal this had amounted to \$2,202,152 at June 1931.

⁶Other than board and lodging.

⁷Including board and lodging.

Section 2.—Scientific and Industrial Research in Canada.

This section has, in past years, dealt with the history of scientific and industrial research in Canada and has included subsections outlining the organization and work of the National Research Council and of those provincial councils and private institutions which are primarily interested in research work. During the past year, the operations of these organizations continued to be conducted along the lines described in previous issues of the Year Book, and to conserve space the section is not reprinted in this edition. The reader is referred in this connection to pages 866 to 872 of the 1932 Year Book.

An important event in the history of scientific research in Canada was the opening of the new building of the National Research Council on Aug. 10, 1932.

Section 3.—The Libraries of Canada.¹

It is more than three and a quarter centuries since the first known library came to what is now the Dominion of Canada—the library brought by Marc Lescarbot to Port Royal in 1606. A library was connected with Laval College at its establishment in 1663, although it was many years later before this institution became important. During the next century record is found of several libraries in Quebec city; one of these, a Jesuit library mentioned by Peter Kalm, the Swedish traveller (its existence is recorded again in 1789) was afterwards sold to the *Quebec Gazette* and again sold in 1851 to the Library of Parliament. The volumes, which have survived the ravages of time and two fires, may still be found on Parliament Hill at Ottawa. Two other libraries founded in Quebec in the 18th century were a subscription library established in 1779 and the Quebec Legislative Library established in 1792. Four years later a public library was opened in Montreal. The Legislative Library of Upper Canada was established in 1791. The Legislative Library of Prince Edward Island is somewhat older, as it was founded in 1773. The King's College Library, located until recently at Windsor, Nova Scotia, and now at Halifax, dates from 1800, the year of the founding of the oldest existing public library in the Dominion, the library at Niagara. During the first quarter of the 19th century there were several libraries founded in Nova Scotia, several in Montreal, and at least one in Western Canada.

The first quarter of the 20th century was most active in the establishment of libraries for public use. Of the 1,110 existing Canadian libraries for which statistics have been secured, 256 are known to have been established during that period, without regard to the fact that the dates of founding have not been secured for all libraries and the certainty that for one reason or another some libraries did not survive.

Public Libraries.—The public libraries included in the "Survey of Libraries in Canada" numbered 622 in 1931, more than three-quarters of the total being in Ontario which has a library system under the control of the Provincial Department of Education. The public libraries of Canada in 1931 contained 4,499,712 volumes, having a circulation of 20,904,924 volumes in addition to those lent to reading-room borrowers. In the same year \$509,302 was spent for books and periodicals. The following table gives summary statistics of these libraries.

¹ The Bureau of Statistics has recently issued a Survey of Libraries in Canada, which may be obtained on application to the Dominion Statistician.

12.—Summary Statistics of Public Libraries, 1931.

University, College and Professional School Libraries.—In 1931 this group included 230 libraries in advanced educational institutions having a full-time enrolment of 63,309 students and a teaching staff of about 6,700. The total contents of these libraries were 3,615,402 volumes and the total expenditure for books and periodicals was \$246,617. The largest of these libraries were those of McGill University with 450,000 volumes and the University of Toronto with 275,000 volumes.

Business, Technical Society and Government Libraries.—These included about 2,300,000 volumes, of which over 1,800,000 were in 52 governmental libraries, Dominion and Provincial. The largest of these libraries were the Parliamentary Library in Ottawa with 400,000 volumes, the Legislative Library of Ontario with 250,000 volumes and the Provincial Library of British Columbia with 205,000 volumes.

School Libraries.—Nearly 300 public high schools and about 375 private or independent high schools reported the existence of libraries in their schools. These included the bulk of the secondary schools of the Dominion. Elementary schools also in many cases possess libraries. In Ontario, 5,927 out of 5,986 rural schools were in possession of a public library, the libraries of 5,612 of these schools averaged 251 books each, making a total of over 1,400,000 volumes. Rural school libraries are on the increase throughout the Dominion.

Library Schools.—Schools for the training of librarians exist at McGill University and at the University of Toronto. The former gives a short six weeks course of training as well as a degree course giving the degree of Bachelor of Library Science after a one-year course to those who have already a bachelor degree. The latter offers a one-year course in library training, the minimum requirement for admission to the course being honour matriculation. Acadia University gives two elective courses in library science which may be taken for its degree of Bachelor of Arts.

Section 4.—Art in Canada.

An article entitled "The Development of the Fine Arts in Canada", contributed by Newton MacTavish, M.A., D. Litt., appeared at pp. 995-1009 of the 1931 Year Book and a shorter article, dealing more particularly with the National Art Gallery, at pp. 886-888 of the 1924 Year Book.

CHAPTER XXVI.—PUBLIC HEALTH AND BENEVOLENCE.

The rapid increase in the numbers committed to our various institutions, such as mental hospitals for the insane, feeble-minded and epileptic; the alleged increase in juvenile crime and the extension of social work in this field; the increasing number of institutions for the care of the aged and incurable, as well as for the care of dependent, neglected and handicapped children, have been a marked feature of the twentieth century. In this new and important field statistical data are collected and results analyzed and published in leading countries. Although the difficulties encountered in building up statistics on a uniform basis in Canada have been many, these statistics are now being collected on a Dominion-wide basis either at the decennial census or on an annual basis.

In any comprehensive study of the situation it is essential that, besides health and hospitalization records, social statistics should also receive attention. Statistics regarding the number of children placed in foster homes, free family homes, number of children adopted, number of children cared for in day nurseries, the institutional care of juvenile delinquents, the numbers of dependent, neglected and handicapped children receiving institutional care, fuller and more accurate data concerning inmates in our mental institutions, institutions for the feeble-minded, county asylums, county almshouses, poorhouses, etc., are becoming absolutely necessary to the proper drafting of social legislation and in order to deal with the problems of civilization, growing more complex day by day.

As public and private charity work together for the amelioration of conditions among the dependent and neglected, the proper treatment of defectives and the reclamation of the delinquent, the problem is made more difficult of statistical measurement, although the tendency to-day in most parts of Canada is to remove the responsibility of social work from the shoulders of individuals and private agencies and to regard it as more in the nature of a public responsibility. The growth in recent years of the most cordial relationships between governmental bodies and social welfare workers in the fields of school care and child welfare movements is manifested in the number of Child Welfare Acts in force in the various provinces of Canada.

Section 1.—Administration.

In Canada, speaking generally, the administration of public health activities and the establishment and maintenance of institutions is in the hands of the various Provincial Governments, under the powers given them in Sec. 92 of the British North America Act, 1867. Under their control municipalities, societies and individuals generally initiate charitable and humane efforts, depending on the Government to some extent for financial aid and for competent uniform inspection of methods and standards. Apart, however, from the actual organization of Provincial Health Departments and of the administrative bodies charged with the management of hospitals and other such institutions, particular attention is given to the same branches of public health work in all the provinces. Important, and reflecting most clearly the benefits accruing from such work, are the provisions for medical inspection of school children. These are carried out in some cases by the district or

sub-district medical health officers, and in others by public health nurses whose activities are confined to this work alone. In addition to the continual supervision exercised over the health of the children, expert advice and assistance are supplied freely to children, teachers and parents. In many cases dental inspection is provided for. While this work has been carried on upon a considerable scale for only a few years, great benefits have already resulted from it, notably general improvement in health and sanitary conditions and in the control and prevention of epidemics.

Exercising particular jurisdiction over some phases of the general health of the people of the Dominion is the Department of Health of the Dominion Government, while the Dominion Council of Health acts as a clearing house on many important questions related to the health of the people. This Council consists of the Deputy Minister of the Dominion Department of Pensions and National Health as chairman, the chief executive officer of the provincial department or board of health of each province, together with such other persons, not exceeding five, as may be appointed by the Governor in Council to hold office for three years. Of these appointed members, four have in the past represented agriculture, labour, rural women's work and social service, and child welfare, while the fifth member is a scientific adviser on public health matters. (A fuller description of this Council will be found at pp. 908-909 of the 1926 Year Book.)

The public health activities of the Dominion Government were described at pp. 876-879 of the 1932 Year Book, and those of the various Provincial Governments at pp. 879-883 of the same volume. For a brief description of the organization and activities of the Red Cross Society and of the Victorian Order of Nurses, readers may refer to p. 923 of the Year Book for 1922-23. Finally, a statement regarding Mothers' Allowances showing the scales of payments and the methods of administration was published at pp. 935-936 of the 1925 Year Book.

Section 2.—Institutional Statistics.¹

The most familiar of all the public institutions established to administer and foster the general health of the community is the general hospital common to all cities and towns of any considerable population, and found also in the more prosperous rural districts. Such hospitals are generally erected and supported by the municipality, their actual administration being in the hands of a board of trustees; their revenue, in addition to that provided by the municipality, is derived in the main from grants from the Provincial Governments, from donations of individuals and societies, and from patients' fees. Admission and treatment are free to all deserving persons who apply for them and whose resources are so limited as to

¹This section has been revised by J. C. Brady, in Charge of Census of Institutions, Dominion Bureau of Statistics.

prevent their otherwise receiving proper medical attention, while it is more or less generally expected of others that payments for services shall be made in proportion to costs and the ability of patients to defray them. Second in importance are the houses of refuge and orphanages—homes where destitute adults and homeless children are taken in, fed and clothed until they can support themselves or until homes are found for them elsewhere. Orphans' homes are found in practically every urban and rural community of any size, while refuges or homes for the aged are supported by the larger centres and by county municipalities. Asylums for the insane, also found in all the provinces, differ from the foregoing types in that they are in general owned, supported and administered entirely by the provinces. In Nova Scotia, however, the insane of each county, together with the inmates of the refuges and orphanages, are in most instances cared for in one institution. Other institutions supported by the public include: isolation hospitals, maternity hospitals, homes for the deaf, dumb and blind, homes for incurables, infirmaries, homes for epileptics and lazarettos for lepers, and tuberculosis sanatoria.

Throughout the Dominion many other more or less similar institutions exist whose nature is more independent than that of the types mentioned above. These institutions do not receive Provincial Government grants and are not in all cases subject to inspection.

By authority granted by the Dominion Government in 1930, the Dominion Bureau of Statistics, through its newly created branch of Census of Institutions, now collects annual statistics for all hospitals in Canada, including Mental Institutions and Homes for Incurables.

Subsection 1.—Hospitals, other than Mental.

The great majority of hospitals are public hospitals which are either under municipal control or under private boards of management. These hospitals are assisted in their care of indigent patients by municipal and provincial grants. In addition there are: private hospitals which do not receive public grants; hospitals conducted by various religious orders; convalescent hospitals; hospitals for incurables; tuberculosis sanatoria; Red Cross hospitals and out-posts; special hospitals; lazarettos for the segregation and treatment of persons afflicted with leprosy; and hospitals for the treatment of mental and nervous diseases which are, generally speaking, maintained by the provinces. The care of persons suffering from communicable diseases is the responsibility of the various municipalities.

There are also a limited number of hospitals under Dominion Government administration, *e. g.*, those in connection with ex-service men, military forces, marine, quarantine and immigration.

The modern hospital is at once a battlefield between life and death, an institution for the practice of medicine and surgery and, viewed broadly, a financial

enterprise which exceeds in magnitude many nation-wide industries. There has been a remarkable growth of public interest in the work of our hospitals in recent years and hospital statistics have become a necessity to the study of certain branches of present-day social economics.

The total number of hospitals, other than mental hospitals and homes for incurables, in operation in Canada during 1931 was 801, of which 454 were general public, 157 general private, 43 Red Cross, 36 Dominion, 31 tuberculosis, 14 Salvation Army, 19 isolation and 47 other (special).¹

Summary statistics of the hospitals of the Dominion other than mental hospitals and homes for incurables, are presented for 1931 in Table 1, while the bed capacity of the hospitals in each province is given in Table 2, and detailed statistics of staff and patients, receipts and expenditures are shown by provinces in Table 3.

1.—Summary Statistics of Hospitals in Canada, not including Mental Hospitals and Hospitals and Homes for Incurables, 1931.

Item.	General Public.	All Other.	Total.
	No.	No.	No.
Numbers of hospitals.....	454	347	801
Bed capacities.....	35,651	16,378	52,029
Patients admitted.....	505,655	86,747	592,402
Collective stays of patients in days, (exclusive of infants born in hospitals).....	7,527,251	3,882,053	11,409,304
Deaths in hospitals.....	23,941	3,624	27,565

The total hospital receipts for 1931, of the hospitals included in the above table were \$41,164,135, of which \$33,616,574 was classified as maintenance receipts, including Government and municipal grants amounting to \$14,204,810, patients' fees amounting to \$16,096,583 and receipts from other sources, \$3,315,181.

Expenditures for these hospitals, including those for maintenance and improvement, amounted to \$44,691,305 in 1931, of which \$34,198,010 was classified as expenditures for maintenance. These figures included salaries and wages \$13,995,432, provisions \$7,655,764, fuel, power, light and water \$3,023,994, and other expenditures for maintenance \$9,522,820.

¹A complete list of all hospitals in Canada giving name, location, type, bed accommodation, etc. will be found in the new Hospital Directory for Canada, 1932, issued by the Dominion Bureau of Statistics.

Out-Patient Departments.—Out-patient departments as here reported include those institutions where medical or surgical treatment may be obtained either gratuitously or for a nominal fee, but which do not receive resident patients

Out-patient departments, or clinics, are operated independently or in connection with a hospital, medical college, university or other institution. The dispensary or clinic in connection with a hospital is generally the out-patient department of the hospital, and treats patients who do not occupy beds in the hospital. Sometimes, however, the out-patient department is kept distinct from the hospital and is a separate institution with its own staff, etc. The extension of out-patient services to patients of modest means has far-reaching and beneficial effects. It may replace admission to a hospital, or may serve to secure necessary and beneficial hospitalization. As a general rule, out-patient departments are subsidized from the funds of the general hospital and separate records are not kept. Until a uniform system of accounting is adopted, it is not possible to give the average cost per patient.

4. Out-Patient Departments in connection with Hospitals, together with Patients Treated, calendar year 1931.

³Including 2,218 patients not classified.

⁴Two out-patient departments in Nova Scotia, 7 in Quebec, 5 in Ontario, 2 in Manitoba, 6 in Saskatchewan, 4 in Alberta and 5 in British Columbia kept no records of patients.

⁵See footnotes 1, 2 and 3.

Subsection 2.—Mental Hospitals.

Census statistics regarding number of insane and feeble-minded in Canada were first made in connection with the decennial census of 1871, and general data were collected under the heading: "people of unsound mind" The census of 1911 gave the number of insane and "idiotic" persons in Canada as 13,355, and a yearly report for that year showed 9,671 patients in mental institutions. In 1921 figures concerning the number of patients in mental hospitals gave the number of insane as 21,516. Very little reliance can be placed on the figures before 1921, as the information was collected for patients in provincial mental hospitals only, and did not include a large number of insane and feeble-minded in other institutions.

The Census of Mental Institutions of Canada was made a special feature of the decennial census of 1931, seven special schedules being used in the survey. Special features of the census were: separate classification of first admissions from re-admissions; classification of resident patients with particular reference to mental diagnosis; collection of data *re* ex-service men; urban and rural data; paroles; administrative personnel; values and acreages of hospital plants, etc.

The total number of institutions caring for the insane in 1932 was 59, including 34 public hospitals for the insane, 4 private hospitals for the insane, 5 public hospitals for the feeble-minded, 10 county asylums, 3 private institutions for children of retarded mental development and 3 psychiatric hospitals for the insane.

Of the above 59 institutions, 56 reported as to staff and patients, and 53 regarding their finances. Statistics of capacity, staff and finances are presented by provinces in Table 5, and statistics of the movement of patient population in Table 6.

Subsection 3.—Child-Caring Institutions, Refuges for Adults, Homes for Incurables, etc.¹

Although homes for incurables supply maintenance, nursing, medical and surgical aid to persons suffering from chronic and incurable diseases, the nature of the services given is such as to call for a special tabulation. Many hospitals for incurables care not only for those suffering from incurable diseases but also for the aged and indigent, and some even take care of orphans of both sexes.

¹For census material on child-caring institutions, day nurseries and refuges for adults, see 1932 Year Book, pp. 893-895.

In the case of general hospitals the service given both on economic and humanitarian grounds is to restore the patient to working efficiency in the community, as soon as possible. The hospital or home for incurables looks after the patient whose affliction is of a more or less permanent nature incapacitating him from any possibility of earning a living. The movement of population is necessarily slow, discharges being generally due to death. The class of care given differs from that given in general hospitals, owing to the fact that the inmates tend to become institutionalized and need the care of a physician less frequently.

Summarized statistics of the 19 homes and hospitals for incurables reporting for 1931 will be found in Table 7.

7.—Summary Statistics of Homes and Hospitals for Incurables, 1931.

NOTE.—Besides these hospitals and homes which are strictly for incurables there are thirteen institutions in the province of Quebec which, although not hospitals for incurables, undertake the care of them.

¹St. Peter's Infirmary, Hamilton, was incorporated as a home for incurables in November, 1931. It is not included in this report.

CHAPTER XXVII.—JUDICIAL AND PENITENTIARY STATISTICS.¹

Canadian Criminal Law and Procedure.—The system under which justice is administered in a State is never rigid. This is neither expedient nor indeed possible. The judicial system must grow and adapt itself to the requirements of the people, and the exact limits of the powers of the Dominion and provincial legislative bodies have required and will still require added definition by the courts.

The exclusive legislative authority of the Parliament of Canada extends to criminal law throughout the Dominion. This law is based on the common law of England, built up through the ages and consisting first of customs and usages and later of principles enunciated by generations of judges and introduced into Canada, as regards criminal law, by Royal Proclamation, 1763.

The judicial systems of the provinces as they exist to-day are based upon the British North America Act of 1867. Section 91 provides that "the exclusive legislative authority of the Parliament of Canada extends to...the criminal law, except the constitution of courts of criminal jurisdiction, but including the procedure in criminal matters". In each province (sec. 92, ss. 14), the Legislature may exclusively make laws in relation to "the administration of justice in the province, including the constitution, maintenance and organization of provincial courts, both of civil and of criminal jurisdiction and including procedure in civil matters in those courts" The Parliament of Canada, may however, (Sec. 101) establish any additional courts for the better administration of the laws of Canada.

It is frequently difficult to distinguish between "Law" and "Procedure". Procedure may be interpreted to relate simply to the organic working of the courts, but in a wider sense it may also affect the rights or alter the legal relations arising out of any given set of facts.

The mass of Statutes resulting from the fact that, prior to Confederation, each province had its own criminal jurisprudence, caused great and increasing inconvenience. This led to the adoption of various consolidation Acts, the chief of which are the Criminal Law and Amendment Acts of 1869 and the Criminal Procedure Act of 1886. These Acts dealt exhaustively with procedure in respect of indictable and non-indictable offences, jurisdiction of justices of the peace, juvenile offenders, speedy trials, criminal law, schedules and forms, etc.

In the meantime various efforts had been made in England for the reduction of the criminal law of that country into the form of a code, culminating in a draft code, submitted to the Imperial House of Commons in 1880. The question then arose as to the desirability of codifying the Canadian law. Objections were raised that codification would arrest the development of the law and its gradual adaptation to the habits and wants of the community, and would substitute a fixed, inelastic system for one which possessed the power of adjustment to circumstances. But the advantages of a codification of the law of crimes were finally so manifest that a Bill founded on the English draft code of 1880, Stephen's Digest of Criminal Law,

¹ Revised by H. M. Boyd, Acting Chief Statistician on Criminal Statistics, Dominion Bureau of Statistics. The fifty-fifth Annual Report of Statistics of Criminal and Other Offences, for the year ended Sept. 30, 1931, is obtainable on application, from the Dominion Bureau of Statistics.

Burbidge's Digest of the Canadian Criminal Law, and on the Canadian statutory law, and introduced by the then Minister of Justice, Sir John Thompson, passed both Houses and became law July 1, 1893.

Crimes were formerly divided into two main classes: felonies, and misdemeanours. A felony was a crime involving forfeiture of property and of civil rights. The code has abolished this distinction and has classified offences as indictable and non-indictable. The term "indictable" means an offence which is triable on an indictment, that is to say the legal process by which a bill of indictment is preferred to, and presented by, a grand jury. An indictment differs from an information which rests only on presentation by the prosecuting authority, and properly from a presentment, which is an accusation originating with the grand jury. The word is sometimes loosely used, however, to include an information or presentment or both. Many cases of indictable offences are proceeded with, without a formal indictment. Furthermore certain cases triable on indictment may also be disposed of summarily by a magistrate, according to the severity or circumstances of the cases.

Non-indictable offences include cases usually dealt with summarily by police magistrates under the Summary Convictions Act, and comprise breaches of municipal regulations and other minor offences.

According to the provisions of the code, indictable offences are triable by jury but, in cases other than those listed below, the accused is accorded the right of election whether he be tried by jury, or before a judge without the intervention of a jury under the Speedy Trials Act, or before a magistrate under the Summary Trials Act. The jurisdiction of the magistrate is absolute, however, in certain cases and does not depend on the consent of the accused. Cases triable by jury without the consent of the accused are: treason, treasonable offences, assaults on the King, mutiny, unlawfully obtaining and communicating official information, taking of oath to commit certain crimes, seditious offences, libels on foreign sovereigns, piracy, corruption of officers employed in prosecuting offenders, frauds on the Government, breach of trust of public officers, municipal corruption, selling of appointments to any office, murder, attempt to murder, conspiracy to murder, accessory after the fact to murder, manslaughter, rape, attempt to commit rape, defamatory libel, combination in restraint of trade, for conspiring or attempting to commit, or being accessory after the fact to any of the above offences, also for bribery or undue influence, personation or other corrupt practice under the Dominion Elections Act. Also, where an offence is punishable with imprisonment for a period exceeding five years the Attorney General may require the charge to be tried by a jury.

In the province of Quebec a district magistrate has powers extending beyond those of a magistrate in any other province. He has the same jurisdiction as a county court judge in Ontario, and disposes of cases under the Speedy Trials Act, whereas the jurisdiction of the magistrates of other provinces extends only to the Summary Convictions Act and the Summary Trials Act.

Capital cases for the first twelve or fifteen years after Confederation included, besides murders, death sentences for attempts at murder, piracy, burglary, violation of females and levying war. The list of capital offences is now: levying war, murder, piracy in cases of violence, rape, and treason. This is a drastic modification in

the code from that which obtained a century and a half ago. In 1764, according to Blackstone, there were in England 160 capital offences on the Statute Book. It is stated that there was a strong feeling against the accompanying wholesale hangings and that judges and juries resorted to all sorts of subterfuges to evade the letter of the law. The work of practical reform and modification was slow, however, owing to the opposition of the House of Lords, but the days of the indiscriminating infliction of capital punishment ended with the passage of the Reform Bill in 1832, at which time forty kinds of forgery and many less serious offences were still capital crimes.

The statistics presented in the tables that follow, which are summarized from the Annual Report of Statistics of Criminal and Other Offences, are collected directly from the criminal courts in the different judicial districts throughout the Dominion. There are 159 judicial districts, including 4 sub-districts, divided as to provinces as follows: Prince Edward Island 3, Nova Scotia 18, New Brunswick 15, Quebec 25, Ontario 47, Manitoba 6, Saskatchewan 22, Alberta 14, British Columbia 8 and Yukon 1. The figures for the Northwest Territories are obtained from the reports of the Royal Canadian Mounted Police.

Section 1.—General Tables.

The statistics relate to years ended Sept. 30, the latest report being for 1931. Beginning with the report for 1922, an enlargement of the classification of offences has been adopted, by which offences of juvenile offenders are compiled separately from those of adults. The term "indictable" applies to offences of adults only, similar offences committed by juveniles being termed "major" offences; similarly, "non-indictable" offences of adults are termed "minor" offences when attributed to juveniles. All current tables have been worked out for 1922 and subsequent years in accordance with the new classification, but a comparative historical table, giving the totals for different classes of criminal offences and minor offences including those of juvenile delinquents, is here published (Table 1), together with a more detailed table for recent years (Table 2). In the consideration of the former it should be remembered that, while the criminal code undergoes little change over periods of time, the figures of summary convictions depend very much upon the changes in the customs of the people, and are apt to increase with the increasing urbanization of the population. The most significant column of Table 1 is the figure of criminal offences per 100,000 of population. Attention may be drawn to the increase in the proportion of both criminal offences and minor offences to population in the past year, convictions for criminal offences having risen from 284 per 100,000 population in 1921 to 425 per 100,000 population in 1931 and convictions for minor offences from 1,732 per 100,000 in 1921 to 3,113 per 100,000 in 1931.

It should be understood that the classification of offences in these general tables is irrespective of the mode of procedure. That is to say, the "criminal" cases include many indictable offences disposed of summarily under the Summary Trials Act. Hence any addition of indictable and major and minor offences, as shown in other tables, will not agree with the figures given in Tables 1 and 2. The object here is to show a broad historical record of criminal and minor offences respectively.

1.—Convictions for Criminal Offences, by Classes, and Total Convictions for Minor Offences, years ended Sept. 30, 1933-31, with Proportions to Population.

The recent trend of total convictions, including those of juveniles, and of sentences imposed, is shown by provinces for the years 1925 to 1931 in Table 3. Death sentences, which numbered 28 in 1919 and 26 in 1920, fell to 15 in 1923, rose to 22 in 1924, dropped steadily to 12 by 1927, rose again to 19 in 1928, to 26 in 1929, then dropped to 17 in 1930 and rose to 25 in 1931.

Section 2.—Indictable Offences of Adults.

The progress of a community, from the moral point of view, is often judged by the number of convictions for indictable offences, as these are less affected than non-indictable offences by extraneous circumstances and the varying methods of law enforcement in different areas and in different years. However, in the study of such statistics it is important to have comparable figures over a period

of years, and these are set out by provinces for each year since 1900 in Table 4. Again, in Table 5 are shown the numbers of charges and convictions and the percentages of acquittals for the 3 years ended Sept. 30, 1929-31, the figures indicating the percentage of acquittals in the latest years.

It will be noticed that during the thirty-two-year period covered by Table 4 crimes increased from 4,853 to 31,542, or 550 p.c. The increase in the population during the same period was but 95.7 p.c., revealing that the increase in the crime rate was between five and six times that of the population.

4.—Convictions of Persons 16 years of age and upwards for Indictable Offences, by Provinces, years ended Sept. 30, 1900-31.

Year.	P.E.I.	N.S.	N.R.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	Yukon.	N.W.T. ¹	Total.

Classes of Indictable Offences.—Indictable offences are divided under the Canadian system into six main classes, as follows: offences against the person, offences against property with violence, offences against property without violence, malicious offences against property, forgery and other offences against the currency, and other indictable offences. Convictions in all classes except Class V show an increase between 1929 and 1931. Details by offences are given in Table 6 and the details of the disposition of the charges in Table 7, which shows, among other information, that convictions of females numbered 2,607 in 1931 as against 2,660 in 1930, — the first decrease in four years; as recently as 1924 the figure was only 1,826. Details as to occupation, conjugal condition, educational status, age, use of liquors, birthplace, religion and residence of those convicted of indictable offences are given in Table 8.

6.—Indictable Offences, by Classes, years ended Sept. 30, 1929-31.

NOTE.—The figures of this table do not include charges or convictions of juvenile delinquents.

¹Notwithstanding the fact that the United Church of Canada was completely organized in 1926, these persons still reported themselves as Methodists.

Section 3.—Summary Convictions of Adults.

The following statistics relate to "non-indictable" offences committed by adults (persons 16 years of age or over) and disposed of by police magistrates or other justices of the peace, under authority of the Summary Convictions Act. Such convictions numbered 327,778 during the year ended Sept. 30, 1931, as compared with 308,759 in 1930, 290,043 in 1929, 245,763 in 1928, and 193,240 in 1927. This marked increase in the last five or six years has been due almost entirely to

breaches of Traffic Regulations, which have risen from 78,027 in 1926 to 212,361 in 1931, or from 46 p.c. to nearly 65 p.c. of the total convictions. By sexes the summary convictions appear as follows: in 1926, males 159,528, females 10,385; in 1927, males 182,392, females 10,848; in 1928, males 232,554, females 13,209; in 1929, males 274,977, females 15,066; in 1930, males 292,557, females 16,202; in 1931, males 312,111, females 15,667.

Summary convictions are given by provinces from 1900 to 1931 in Table 9, and details of these offences are given for the four latest years in Table 10.

9.—Summary Convictions, by Provinces, years ended Sept. 30, 1900-31.

¹Not including 302 convictions in 1928 and 220 in 1929, for selling and possessing drugs; these appear in the indictable offences.

Convictions for Drunkenness.—The number of summary convictions for drunkenness in Canada in 1931 was 29,148 as compared with 35,789 in 1930, 38,826 in 1929, 33,224 in 1928 and 31,171 in 1927, a decrease of 6,641 in 1931 from the figures of 1930. Maximum figures were attained in the years 1913 and 1914; during the War there was an appreciable reduction and since the War, while figures have fluctuated, they have not approximated former high levels. The decline in the last two years would appear to be at least partly due to the depression. Table 11 shows the number of convictions by provinces and years from 1900 to 1931.

11.—Convictions for Drunkenness, by Provinces, years ended Sept. 30, 1900-31.

¹The decline after 1906 is due to the formation of the provinces of Saskatchewan and Alberta out of parts of the Northwest Territories.

Offences against the Liquor Acts.—Until the Great War, alcoholic liquors were generally sold under specified conditions by licensed hotels or licensed shops. Offences against the Liquor Acts usually represented a breach of the conditions of sale. During the War, prohibition was generally established but in more recent years the tendency has been for the Provincial Governments to take over the sale of liquor, to manage this sale through commissions and derive a revenue therefrom. Eight of the nine provinces now have their liquor commissions, Prince Edward Island being the only province in which prohibition prevails. In these circumstances, the convictions for offences against the Liquor Acts in 1929 reached the highest figure on record, *viz.*, 19,327, but fell off by more than three thousand convictions, to 16,185, in 1931. The number of such convictions in each year since 1900 is given by provinces in Table 12.

12.—Convictions for Offences against the Liquor Acts, by Provinces, years ended Sept. 30, 1900-31.

¹The decline after 1906 is due to the formation of the provinces of Saskatchewan and Alberta out of parts of the Northwest Territories.

Breaches of Traffic Regulations.—Convictions for breaches of Traffic Regulations, which at the beginning of the century numbered only 185 in all Canada (Table 13), have, as a result of the advent of the motor vehicle, become the largest element in the non-indictable offences, numbering 212,361 out of a total of 327,778 in 1931, or nearly 65 p.c. of the total.

13.—Convictions for Breaches of Traffic Regulations, by Provinces, years ended Sept. 30, 1900-31.

¹ The decline after 1906 is due to the formation of the provinces of Saskatchewan and Alberta out of parts of the Northwest Territories.

The greatest percentage increases were recorded between 1908 and 1913. In this 5-year period total convictions increased from 1,270 to 16,000. For three years thereafter there was an abrupt decline, but beginning with 1917 another 5-year series of increases brought the total up to 51,788 in 1921; by 1924 the 60,000 mark had been reached, and recent years have witnessed a rapid increase to the 1931 figures. The provincial distribution of the totals indicates that for the last five years Quebec shows the largest percentage of increase. Only Quebec and New Brunswick show increases for 1931 as compared with 1930 but the single increase in the case of Quebec is more than sufficient to offset the decreases of the other seven provinces, substantial though these are in some cases, such as Ontario, Manitoba and British Columbia. For the year 1931, Ontario, which had 47 p.c. of the registrations of motor vehicles in Canada (see p. 686), had nearly 53 p.c. of the total convictions; Quebec in the same year had 15 p.c. of the motor vehicles and 30 p.c. of the convictions. In interpreting the figures in this way, however, it should be pointed out that Traffic Regulations are by no means uniform throughout Canada and no account is taken of the differences in the degrees of urbanization in the two provinces.

Section 4.—Juvenile Delinquency.

Juveniles under 16 years of age to the number of 7,768 were found guilty of various offences in the year ended Sept. 30, 1931, as compared with 8,425 in 1930, 7,826 in 1929, 7,699 in 1928, 8,185 in 1927 and 7,831 in 1926, a decrease of 657 in the latest year. Of the 1931 total, 5,311 were convicted of "major" offences and 2,457

of "minor" offences, terms which correspond very nearly to "indictable" and "non-indictable" offences, as applied to adults. Convictions for "major" offences numbered 5,653 in 1930 and convictions for "minor" offences 2,772. The offences proven against juveniles in 1930 and 1931 are shown by provinces in Table 14 and by chief major offences committed for the years 1925-31 in Table 15.

Major Offences.—In Table 15 are shown the various major offences for which juvenile delinquents were convicted in 1925 to 1931. It will be observed that theft, house- and shop-breaking with theft, and other wilful damage to property account for the great bulk of the offences; in 1931, 91 p.c. of the major offences were of this character.

Minor Offences.—Of the 2,457 juvenile delinquents found guilty of minor offences in 1931, 598 were convicted of breaches of municipal by-laws, 430 of disorderly conduct and disturbing the peace, 288 of disobedience and incorrigibility, 297 of trespass, 329 of truancy, 264 of vagrancy and indecent conduct and 251 of other minor offences.

Section 5.—Police Statistics.

In 1931, 150 cities and towns, with populations of 4,000 or over, supplied police statistics to the Dominion Bureau of Statistics. These cities and towns, with an aggregate population of 4,343,457, had 5,321 policemen, who made 285,281 arrests and summonses. The total number of offences committed during the year and made known to the police was 378,226, and the number of prosecutions was 286,896 or 75.8 p.c. of the known offences. Convictions secured in respect of these offences numbered 235,526, being 62.3 p.c. of the known offences and 82.1 p.c. of the prosecutions.

The number of automobiles reported stolen was 11,207, of which 10,757 were recovered. Of 10,468 bicycles stolen, 6,245 were recovered. The value of other lost articles reported to the police was \$2,466,415, of which 52.7 p.c. was recovered.

Section 6.—Penitentiary Statistics.

The Penitentiaries Branch of the Department of Justice is charged with the administration of the various penitentiaries of Canada. Seven institutions are included in the system, the two largest of which are at Portsmouth, Ont., and St. Vincent de Paul, Que., while the other five are at Dorchester, N.B.; Prince Albert, Sask.; Stony Mountain, Man.; New Westminster, B.C. and Collins Bay, Ont. During the fiscal year ended Mar. 31, 1932, the average daily population of these institutions was 3,931 and the total net expenditure for the year was \$2,554,556, compared with 3,434 average daily population and \$3,034,438 total net expenditure for the year 1931.

Female convicts numbered 27 on Mar. 31, 1925, but had increased to 40 on Mar. 31, 1928 and were 32 on Mar. 31, 1929, 38 on Mar. 31, 1930, 44 on Mar. 31, 1931, and 48 on Mar. 31, 1932. They are all kept in the penitentiary at Portsmouth, a suburb of Kingston, where a special wing and staff are maintained for their detention and supervision. A new building to be used for this purpose is under construction.

Tables 18 to 20 give the more important penitentiary statistics as reported by the Superintendent. An increase of 450 is shown in the number of those in

custody on Mar. 31, 1932, as compared with the same date in the previous year. The number of paroles, as shown in Table 18 for 1932, is a decrease of 34 compared with the previous year. It has fluctuated considerably between the 566 mark in 1924 and the figure of 379 set for 1932. Table 19, showing the ages of convicts by groups, indicates that since 1925, when the total number in custody reached 2,345, there has been a decrease in the average age of those in custody. In the last five years, the convicts under 30 increased from 1,317 to 2,435 or by 1,118, while the total number in custody increased by 1,684; so that convicts under 30 showed both an actual and a proportional increase. Detailed statistics of nationality, religion, conjugal state and racial origin of convicts are presented in Table 20.

Movement of Population of Penal Institutions.—Penal institutions may be classified under four heads: penitentiaries, with slow turnover, since prisoners have long sentences; reformatories for boys and reformatories for girls, also with rather slow turnovers, but more rapid in the case of boys than in that of girls; and lastly common gaols, where the turnover is extremely rapid. If the average population for the year be the average of the inmates at the beginning and end of the year, and the number discharged be the turnover, the turnover in 1931 was: in penitentiaries, 43 p.c.; in reformatories for boys, 314 p.c.; in reformatories for girls, 99 p.c.; in gaols, no less than 1,379 p.c. Thus the average time spent in gaol was about four weeks. In dealing with these figures it must be borne in mind that common gaol population changes from day to day and is partly made up of accused persons awaiting trial who may be liberated to-day or sent to a penitentiary or reformatory to-morrow.

17.—Population of Penal Institutions, 1929-31.

NOTE.—Penitentiary statistics until 1919 were supplied directly by each penitentiary and were for the calendar year. For 1920 and subsequent years they have been supplied by the Superintendent of Penitentiaries and are for the fiscal year ended Mar. 31. For other institutions, the figures are as at Sept. 30.

CHAPTER XXVIII.—MISCELLANEOUS ADMINISTRATION.

Section 1.—Public Lands.

Table 1, pp. 1032-1033 summarizes the character and disposition of the land area of Canada. Since there are still large areas which have been little explored and a much larger area not surveyed, and therefore not classified with regard to its possibilities, many of the figures given are estimates, although every care has been taken to consult the most competent authorities, Dominion and provincial, in a position to make such estimates. The continued extension of exploration and surveys will enable the governmental authorities to classify more exactly the lands within their jurisdiction.

In this table the areas of occupied and abandoned farms and of farm woodlots are taken from the 1931 census. The totals of the land area of the provinces and territories are the areas as revised by the Topographical Survey, Dominion Department of the Interior, and agree with those appearing in the table on p. 7 of this volume, while the areas of Indian reserves are those reported by the Department of Indian Affairs. For other items, figures supplied by the provinces have been used wherever available; otherwise estimates from Dominion Government sources, chiefly the Forest Service, have been substituted. Between the totals of existing and potential agricultural lands (item 10) and the totals of forest lands (item 18) there is, of course, duplication to the extent of the agricultural lands under forest (item 7). In view of the various sources from which the information is drawn there is satisfactory agreement in the relationship of the items.

Subsection 1.—Dominion Public Lands.

As stated on p. 1019 of the 1931 Year Book, the lands and natural resources lying within the boundaries of the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, which had formerly been administered by the Dominion Government, were transferred to the administration of the provinces concerned at various dates in 1930.

Actual Dominion lands, therefore, now comprise the Northwest Territories, including the Arctic islands and the islands in Hudson bay; Yukon; the National Park areas, Indian reserves, and historic sites in the different provinces throughout Canada; certain small and widely scattered parcels of Ordnance and Admiralty lands which have been held by the Dominion Government since Confederation and are rented, disposed of, or otherwise administered with a view to bringing as many properties as possible to a state of revenue production; and, finally, public lands, at one time alienated, but which have been re-vested in the Crown in the right of the Dominion for various reasons, and upon which public monies have been spent.

The great bulk of the land areas under Dominion administration are those of Yukon and the Northwest Territories, amounting to about 936,680,000 acres or 42 p.c. of the land surface of Canada. The southern border of both Yukon and the Northwest Territories is 60° N. latitude. In Europe, Oslo, Stockholm and Leningrad are near this line, while about three-fourths of Norway, two-thirds of Sweden, all of Finland and a large proportion of Russia are north of it. In Table 1 a distinction

has been made between those Dominion lands which are still freely disposable by the Dominion Government, and those which have been set aside as National Parks, under the National Parks Acts, or as Indian reserves, by Treaty. Only those which are freely disposable at the present time are classified as Dominion Crown lands, but the total Dominion lands can be easily obtained by adding the other items thereto.

Interest in this northern part of the national domain has increased in the past decade and the administration of these lands was placed under a separate branch of the Dominion Government, the North West Territories and Yukon Branch of the Department of the Interior, until 1931, when, on the transfer of the natural resources of Manitoba, Saskatchewan, Alberta and of the Railway Belt and Peace River Block of British Columbia to the respective provincial administrations, it was transferred to the Dominion Lands Administration. The Royal Canadian Mounted Police maintain law and order throughout the Northwest Territories and Yukon. More detailed particulars of the administration of each territory follow:—

The Northwest Territories.—The government of the Northwest Territories is vested in a Commissioner, a Deputy Commissioner, and a Council of five members with Ottawa as the seat of Government. The administration is carried on by the Department of the Interior through the Dominion Lands Administration. The Territories are subdivided for administrative purposes into the provisional districts of Mackenzie, Keewatin and Franklin. The district of Mackenzie is, as yet, the most widely known and developed, trading posts and settlements being located all along the great stretch of inland waterways known as the Mackenzie system. Fort Smith, the headquarters of the Mackenzie district, is located on the Slave river north of the rapids. From this point there is uninterrupted navigation to the Arctic ocean, a distance of approximately 1,369 miles.

The Administration has provided for a government hospital and medical service, grants to the Anglican and Roman Catholic churches for education, an excellent mail service in which river steamboats and aeroplanes co-operate, motor roads and a system of radio stations linking up Fort Smith, Resolution, Simpson and Aklavik with Edmonton, Alberta, and with Dawson and Mayo, Yukon.

The Department of the Interior has set aside certain areas, totalling over 338,916,000 acres, as preserves wherein only the Indian and the Eskimo may hunt. Officers in the field have made investigations into the conditions affecting musk-ox, caribou, and other forms of wild life. The Wood-Buffalo Park in the vicinity of Fort Smith covers an area of 17,300 sq. miles; it has been specially preserved for the protection of the buffalo. The Thelon Game Sanctuary to the east of Great Slave lake is, in its turn, the home of musk-oxen and caribou.

Included in the Northwest Territories are the Arctic prairies, which are capable of supplying pasturage to large numbers of reindeer and caribou. Following investigations, steps have been taken to establish a Government herd of reindeer in a suitable location on the lower Mackenzie. Indications are that this experiment will result in a plentiful meat supply in the future.

Another feature of administration has been the installation of a chain of wireless stations. This has been a great boon to the isolated posts of the Mackenzie district, as the traders and trappers are now able to keep in constant touch with outside markets, a condition enabling them to dispose of their catch to the greatest advantage. In addition to supplying market news, the radio keeps the inhabitants of the North in contact with some of the amenities of civilization.

Exploratory work has been pushed forward throughout the Territories and local surveys made in the Mackenzie and Franklin districts. Mining prospectors

are following in the tracks of the explorers and the aeroplane has been used as the means of transportation to the field of operations. Drilling operations near Norman on the Mackenzie river resulted a few years ago in striking a considerable flow of oil. Exploitation of this resource awaits only the further general development of the area. The Laurentian Shield, which has proved so rich in valuable minerals in Eastern Canada, is continued into the eastern half of the Territories—that portion lying between Great Slave and Great Bear lakes and Hudson bay—and, although little exploration has been carried out to date, valuable mineral finds have been made. The rich native silver and high-grade pitchblende ores which have been lately discovered and are now under active development in the mineral region of Great Bear lake exemplify the possibilities of this vast area. The agricultural land of the Territories lies almost entirely in the extension of the central plain defined by the Mackenzie valley.

It is known that there are many possible water-power sites throughout the Territories; these will no doubt be developed as a consequence of mining enterprises. Much of the upper Mackenzie valley carries a forest cover, which furnishes timber and fuel for local needs. Fishing, agriculture, mining and lumbering are engaged in to some extent, but the principal industry of the Territories is still the taking and export of furs. Many trading posts operate throughout the regions tributary to the Arctic coast, Hudson bay, and the great inland systems of waterways.

Yukon.—Yukon Territory is administered by the Dominion Lands Administration of the Department of the Interior as in the case of the Northwest Territories. The Gold Commissioner, resident at Dawson, is the executive head of a local elective government of three members termed the Yukon Council, with jurisdiction over local matters. The Gold Commissioner acts on instructions from the Governor in Council or the Minister of the Interior. Hospitals, schools, motor roads, and other amenities of modern life have been provided and, in addition to the overland telegraph line, wireless stations at Dawson and Mayo link up with the outside world through the Northwest Territories and Edmonton.

The route ordinarily taken to enter Yukon is from Skagway, Alaska, on the south, thence by the White Pass and Yukon Railway to Whitehorse, and by river boat to Dawson.

Confederation had been consummated for thirty years before Yukon came into meteoric prominence as one of the great mineral areas of the world. This prominence was due to the discovery of the Klondike placer gold fields, the development of which reached its peak in the decade 1897-1906.

Yukon has produced over \$200,000,000 worth of gold since the Klondike rush, but the old placer claims, operated with cradle, pick and shovel, have given place to consolidated holdings worked with hydraulic dredges and other modern machinery. Silver, lead, copper, tungsten and coal are known to exist in paying quantities, and of late years the development of the silver-lead ores of the Mayo district has been one of the major factors in the growth of lode-mining enterprises. There is a hydro-electric installation of 13,200 h.p. in Yukon, but this is only a small proportion of the possible installation which will be developed as required.

Although fishing, agriculture (including fur-farming), and some lumbering are carried on as auxiliary industries, the future of Yukon is inevitably bound up with mining development.

¹These figures are preliminary from the 1931 census and should be taken as subject to correction. ²Figures from the Forest Service, Department of the Interior. ³Figures from the Topographical Survey, Department of the Interior. For the Northwest Territories and Yukon, they are approximate only. ⁴From Annual Report of Department of Indian Affairs, 1932. ⁵Woodlots or forested areas of occupied farms as reported in 1931 census. ⁶Estimated as 3 p.c. of occupied and abandoned farms, except for the Prairie Provinces which are from the 1930 Year Book, p. 961. ⁷Assumed to be the sum of occupied and abandoned farms and road allowances, except for the Prairie Provinces. ⁸Figures are obtained from provincial sources. ⁹From the 1930 Year Book, p. 961. This total is not the sum of the items, because of alienated lands in the form of grants to railway companies, grants to the Hudson's Bay Co., school land endowment, etc. ¹⁰These are Dominion lands but are not classed with Crown lands; see footnote 11. ¹¹This classification of Dominion Crown lands includes only Ordinance lands and Military lands in the provinces and does not take into consideration Dominion National Parks and Indian reserves which, while Dominion lands, are set aside by Statute or Treaty and are not now freely disposable by the Dominion Government. In the Yukon and N.W.T. column, however, areas aggregating 338,916,000 acres, which have been set apart by Order in Council as game preserves and sanctuaries in which only native Indians and Eskimos may hunt, but which have not been permanently dedicated to this purpose by Parliament, are still regarded as Crown lands. Such preserves include: the Arctic Islands Preserve, 281,027,000 acres; Yellowknife Preserve, 44,800,000 acres; Slave River Preserve, 1,377,000 acres; Peel River Preserve, 2,112,000 acres; and Thelon Game Sanctuary, 9,600,000 acres. ¹²These are waste lands as regards surface resources only and include rock, open muskeg, burnt-over lands which are not re-stocking, and those above timber line. All such lands are by no means economically barren since in many cases they are sources of valuable mineral wealth. ¹³This total is not the addition of the preceding items because the figure obtained from pro-

vincial sources of 216,385,000 acres for Provincial Crown lands including leased lands is based on a total land area for the province of B.C. of 238,483,200 acres as against 223,980,800 acres estimated by the Topographical Survey. ¹⁰About 14,713 acres of this is controlled by the Department of National Defence. ¹¹No estimate available. ¹²This item is an approximation got by subtracting the sum of items 4, 6 and 8 from item 10. ¹³This item is the total productive and unproductive forest area, by provinces, as estimated by the Forest Service of the Department of the Interior and given, in square miles, on p. 42 of this volume. It should be the addition of items 13, 15, 16 and 17 but is greater than these in certain provinces because item 15 does not include the forested areas of Dominion National Parks for which estimates are not available. Forested areas of Indian reserves are not included in item 15, but are shown separately as item 16. Apart from these exceptions, items 15 and 17 include all Dominion and Provincial lands under forest (Crown lands, National parks, Ordnance lands, Military lands, reserves, etc.). ¹⁴This item includes lands in process of alienation where such are not reported under item 21. ¹⁵For the provinces indicated only. ¹⁶There is practically no waste land in New Brunswick.

Subsection 2.—Provincial Public Lands.

In the Maritime Provinces, in Quebec, Ontario and British Columbia (except the Railway Belt and the Peace River Block) the public lands have been administered by the Provincial Governments since Confederation. Owing to the transfer of the natural resources to the Prairie Provinces and British Columbia, as outlined in Chapter XXVII, p. 1019 of the 1931 Year Book, public lands in all provinces are now under provincial administration. In Prince Edward Island, as all the land is alienated, there are no provincial public lands.

Information regarding the amounts of disposable public land and the terms on which it may be secured is regularly given from year to year for each of the provinces in the Canada Year Book. However, since the revisions for the 1933 Year Book have been of a minor character and as there is a heavy pressure upon space, it has been decided to refer those interested in securing provincial public lands to pp. 921 to 927 of the 1932 Year Book, and to the following officials of the respective provinces: Minister of Lands and Forests, Halifax, N.S.; Deputy Minister of Lands and Mines, Fredericton, N.B.; Deputy Minister of Lands and Forests, Quebec, Que.; Minister of Lands and Forests, Parliament Bldgs., Toronto, Ont.; Director of Lands, Department of Mines and Natural Resources, Winnipeg, Man.; Director of Lands, Department of Natural Resources, Regina, Sask.; Publicity Commissioner, Edmonton, Alta.; Deputy Commissioner of Lands, Victoria, B.C.

Section 2.—National Defence.¹

Before the outbreak of the Great War, the Canadian Militia consisted of a Permanent Force, which on Mar. 31, 1914, numbered 3,000 officers, non-commissioned officers and men, and an Active Militia, which at the same date numbered 5,615 officers and 68,991 non-commissioned officers and men. After the outbreak of war on Aug. 4, 1914, successive contingents of troops of all arms were recruited, equipped, trained and dispatched by the Dominion Government to Great Britain for active service. When hostilities ceased on Nov. 11, 1918, there had been sent overseas, for active service in the Canadian Expeditionary Force, about 418,000 officers, non-commissioned officers and men.² In addition to these several thousand Canadians served with the Royal Air Force.

Organization.—Prior to 1922, three departments of the Canadian Government were concerned with the defence of Canada, *viz.*: the Department of Militia and Defence; the Department of the Naval Service; and the Air Board.

During the Session of 1922, the National Defence Act was passed, consolidating the Department of Militia and Defence, the Department of the Naval Service and the Air Board into the Department of National Defence. This Act became effective by proclamation on Jan. 1, 1923. Under it, there is a Minister of National Defence and a Deputy Minister of National Defence. To advise the Minister, a Defence Council has been constituted by Order in Council, consisting of a President (the Minister), a Vice-President (the Deputy Minister), and the following members: the Chief of the General Staff and the Chief of the Naval Staff. The Adjutant-General, the Quartermaster-General and the Senior Air Officer, Royal Canadian Air Force, are associate members. There is also a Secretary of the Council.

¹ Revised by H. W. Brown, Asst. Deputy Minister, Department of National Defence.

² For the detailed expenditures of the Dominion Government on account of war appropriations in the fiscal years 1915-21, see the Canada Year Book, 1921, p. 798.

Subsection 1.—The Naval Service.

The Naval Service of Canada was established by the Naval Service Act, 1910 (9-10 Edw. VII, c. 43), the main provisions of which were described in the 1910 Year Book, pp. xxvi-xxix.

The Department of Naval Service was amalgamated with the Department of Militia and Defence and the Canadian Air Board, to form the Department of National Defence, in 1922.

The Royal Canadian Navy and its Reserve Forces are under the direction of the Chief of the Naval Staff, who is a member of the Defence Council. The Service consists of:—

1. Royal Canadian Navy (permanent).
2. Royal Canadian Naval Reserve (non-permanent).
3. Royal Canadian Naval Volunteer Reserve (non-permanent).

Administrative and operational staff for all three Forces is provided from the Royal Canadian Navy.

The Royal Canadian Navy.—The Royal Canadian Navy has an authorized complement of 104 officers and 792 ratings. A large majority of the men of the R.C.N. are serving under 7-year engagements. A small proportion consists of specialist gunnery, torpedo, and engine-room ratings, lent from the Royal Navy (in 1933 this proportion amounted to 9 p.c.).

A proportion of the officers of the Royal Canadian Navy serves periodically in ships of the Royal Navy, to acquire experience in capital ships, cruisers, etc., and training courses are arranged for selected officers at the instructional schools of the Royal Navy to qualify in war staff, gunnery, torpedo, wireless and other duties. Courses for selected men in the gunnery, torpedo, wireless telegraphy and mechanical training schools of the Royal Navy are similarly arranged.

The ships of the Royal Canadian Navy are:—

- H.M.C.S. *Saguenay* (destroyer—in commission).
- H.M.C.S. *Skeena* (destroyer—in commission).
- H.M.C.S. *Champlain* (destroyer—in commission).
- H.M.C.S. *Vancouver* (destroyer—in commission).
- H.M.C.S. *Armentières* (minesweeper—in commission).
- H.M.C.S. *Festubert* (minesweeper—in commission).
- H.M.C.S. *Ypres* (minesweeper—in reserve).

Naval training establishments, comprising: naval barracks; gunnery drill sheds, with all modern appliances for teaching gun-laying, sight-setting, etc.; torpedo and electrical schools; parade grounds; and other equipment, are maintained at Halifax and Esquimalt. Naval dockyards, with work shops, etc., for refitting and supplying necessary stores to H.M.C. ships, are also maintained at Halifax and Esquimalt.

Royal Canadian Naval Reserve.—The establishment of the Royal Canadian Naval Reserve is 70 officers and 430 men recruited from among sea-faring personnel. Officers have been appointed to act as registrars at Halifax, Charlottetown, Quebec, Montreal, Vancouver.

Officers and men of the Royal Canadian Naval Reserve attend naval training at Halifax and Esquimalt for 42 days for the first year of enrolment and for 14 days

annually or biennially thereafter. They are permitted to volunteer for service afloat up to a maximum of six months during each period of enrolment. The period of enrolment in the Royal Canadian Naval Reserve is five years.

Royal Canadian Naval Volunteer Reserve.—The establishment of the Royal Canadian Naval Volunteer Reserve is 70 officers and 930 men, distributed as follows: Halifax (half company); Saint John (half company); Charlottetown (half company); Quebec (half company); Montreal (company); Ottawa (half company); Toronto (company); Hamilton (half company); Winnipeg (company); Saskatoon (half company); Regina (half company); Edmonton (half company); Calgary (half company); Vancouver (half company); Prince Rupert (half company).

Each company or half company is under the immediate command of an officer of the R.C.N.V.R., appointed as company commanding officer. The company commanding officer is assisted by other commissioned officers of the Force.

A petty officer instructor (a highly qualified ex-petty officer of the Royal Navy or of the Royal Canadian Navy) is employed at each company headquarters to give instruction to men of the company in gunnery, torpedo practice, seamanship and other naval subjects.

Each officer and man of the R.C.N.V.R. performs annually a minimum of 30 drills of not less than one hour's duration at company headquarters. In actual practice 40 to 50 drills have been performed annually by each member of the company. Officers and men also attend from two to three weeks naval training annually at the naval bases at Halifax or Esquimalt, or at sea in H.M.C. or H.M. ships.

Officers and men who can obtain the necessary leave of absence are permitted to perform a maximum of four months voluntary service during each period of enrolment, and a large number have availed themselves of this opportunity of gaining extended naval experience under sea-going conditions. The period of enrolment and of re-enrolment in the R.C.N.V.R. is three years.

Subsection 2.—Military Forces.

The Militia of Canada is constituted by the Militia Act. The Active Militia is divided into the Permanent and the Non-Permanent Militia.

Permanent Militia.—The Permanent Force consists of the following units:—

- Cavalry.—The Royal Canadian Dragoons; Lord Strathcona's Horse (Royal Canadians).
- Artillery.—The Royal Canadian Horse Artillery Brigade ("A", "B" and "C" Batteries); Royal Canadian Artillery (Nos. 1, 2 and 5 Heavy Batteries and No. 3 Medium Battery).
- Engineers.—Royal Canadian Engineers (13 detachments and 1 field company).
- Signals.—The Royal Canadian Corps of Signals.
- Infantry.—The Royal Canadian Regiment; Princess Patricia's Canadian Light Infantry; The Royal 22nd Regiment (a French-Canadian regiment).
- Army Service Corps.—The Royal Canadian Army Service Corps (12 detachments).
- Medical Corps.—The Royal Canadian Army Medical Corps (12 detachments).
- Veterinary Corps.—The Royal Canadian Army Veterinary Corps (8 detachments).
- Ordnance Corps.—The Royal Canadian Ordnance Corps (12 detachments).
- Pay Corps.—The Royal Canadian Army Pay Corps (12 detachments).
- Military Clerks.—The Corps of Military Staff Clerks (12 detachments).

The strength of the Permanent Active Militia is limited by the Amending Act of 1919 to 10,000, but at present the limited establishment is less than 3,800.

Schools of Instruction.—The Canadian Small Arms School is the only school which is an independent unit of the Permanent Force, but at all stations of the Permanent Force in Canada Royal Schools of Instruction are conducted.

Non-Permanent Militia.—The Non-Permanent Militia consists of:—

- 35 Regiments of Cavalry and Mounted Rifles.
- 69 Field Batteries, Canadian Artillery.
- 14 Medium Batteries, Canadian Artillery.
- 11 Heavy Batteries, Canadian Artillery.
- 3 Anti-Aircraft Sections, Canadian Artillery.
- 15 Field Companies of Engineers.
- 2 Fortress Companies of Engineers.
- 7 Field Troops of Engineers.
- 10 Divisional Signals.
- 2 Fortress Signal Companies.
- 7 Signal Troops.
- 22 Contingents, Canadian Officers' Training Corps.
- 123 Battalions of Infantry.
- 15 Machine Gun Units.
- 12 Divisional Canadian Army Service Corps.
- 51 Units of the Canadian Army Medical Corps.
- 11 Detachments of the Canadian Dental Corps.
- 11 Detachments of the Canadian Army Veterinary Corps.
- 11 Detachments of the Canadian Ordnance Corps.
- 12 Detachments and 1 Base Post Office of the Canadian Postal Corps.

The total establishment of the Non-Permanent Militia is 9,029 officers and 125,722 other ranks, a total of 134,751, distributed as shown in the following table:—

2.—Permanent and Non-Permanent Active Militia in Canada, 1932.

Arm of Service.	Permanent Active Militia.		Non-Permanent Active Militia.	
	Personnel.	Horses.	Personnel.	Horses.
Staff and General List	49	—	—	—
Cavalry and Mounted Rifles	415	317	16,637	9,809
Field Artillery	467	112	9,071	4,596
Medium Artillery	53	—	2,012	848
Heavy Artillery and Anti-Aircraft Sections	242	2	1,532	45
Engineers	273	16	3,421	812
Signals	276	—	4,567	2,220
Railway Corps	—	—	363	—
Infantry	906	31	79,866	87
Officers' Training Corps	—	—	4,303	—
Machine Gun Corps	—	—	6,516	744
Army Service Corps	274	46	1,286	—
Non-Combatants	876	—	5,177	688
Totals	3,771	524	134,751	19,839

Reserve Militia.—In addition to the Active Militia, there is also the Reserve Militia, a framework designed to serve as a basis for contingent military organization. Drill and training are voluntary and entail no expense to the public.

The reserve formations of the Active Militia, as distinguished from the Reserve Militia mentioned above, comprise:—

- The Reserve of Officers (general list).
- Reserve unit for each active unit.
- Reserve Regimental Depots (Cavalry and Infantry).

The reserve units of the Active Militia are intended for the purpose of providing for the organization of the officers and men who have completed their service in the Active Militia or who have otherwise received a military training. On completion of service in the Active Militia men are not posted automatically to reserve units. These units are recruited by specific enlistment.

Military Districts.—For the command, training and administration of the Canadian Militia, Canada is divided into 11 military districts, each under a commander assisted by a district staff.

Militia Appropriations.—The Militia appropriations for the six fiscal years ended Mar. 31, 1928-33, are shown in Table 3.

3.—Money Voted by Parliament for the Militia, fiscal years ended Mar. 31, 1928-33.

¹Department of National Defence.

Subsection 3—Air Service.

Under the Act creating the Department of National Defence, the powers, duties and functions vested in the Air Board by the Air Board Act of 1919 are now administered under the direction of the Minister of National Defence.

The Royal Canadian Air Force is composed of the Permanent Active Air Force, the Non-Permanent Active Air Force, and a Reserve of Officers. The Royal Canadian Air Force administers and controls all military air operations and air operations for civil government departments. The duties of the Royal Canadian Air Force are as follows:—

- (a) To organize, train and maintain an air force for the defence of Canada.
- (b) To assist in the development of civil aviation by—
 - (i) Providing advanced flying training to civilian pilots, instructors and commercial pilots.
 - (ii) Initial development of air routes.
 - (iii) Technical supervision of airworthiness and inspection of aircraft belonging to private and commercial operators, and aircraft constructed or overhauled by aircraft manufacturing firms, and acting as consultant in matters pertaining to civil aviation generally.
- (c) The conduct of flying required to assist the several departments of the Dominion Government in the development and conservation of the country's natural resources, and other related services.

Permanent Active Air Force stations and units are located as follows:—

Location.	Duty.
R.C.A.F. Headquarters, Ottawa, Ont.	
R.C.A.F. Station, Camp Borden, Ont.	Training.
R.C.A.F. Station, Trenton, Ont.	Training.
R.C.A.F. Station, Ottawa, Ont.	Test and experimental work and civil government air operations.
R.C.A.F. Station, Winnipeg, Man.	Civil government air operations.
R.C.A.F. Station, Vancouver, B.C.	Coast reconnaissance and civil government air operations.
R.C.A.F. Station, Dartmouth, N.S.	Care and maintenance basis.
R.C.A.F. Station, High River, Alta.	Care and maintenance basis.
No. 1 R.C.A.F. Depot, Ottawa, Ont.	Stores and repair depot.
R.C.A.F. Photographic Section, Ottawa, Ont.	

The following Non-Permanent Active Air Force units are now in process of organization: No. 10 Army Co-operation Squadron, Toronto, Ont.; No. 11 Army Co-operation Squadron, Vancouver, B.C.; No. 12 Army Co-operation Squadron, Winnipeg, Man.

The total strength of the Royal Canadian Air Force on Dec. 31, 1932, was 98 officers and 592 airmen.

Subsection 4.—Civil Aviation.¹

The Civil Aviation Branch is under the Controller of Civil Aviation, who is directly responsible to the Deputy Minister. Its duties include the inspection of licences and registration of aircraft, air harbours, commercial and private air pilots, air engineers and air navigators. In addition to these duties, the location and construction of air routes and any matters connected with airship services are administered in this branch.

Civil aviation in the Dominion has had its chief development in connection with the exploration and conservation of the natural resources of the provinces, including forestry protection, air photography, and transport of men and supplies to remote points and mining districts. At the beginning of 1932, 19 regular air mail routes were in operation. Three air mail routes were suspended in the early part of the year so that on Dec. 31, 1932, there were sixteen air mail routes in operation.

On Dec. 31, 1932, there were certificates and licences in force as follows: private air pilots, 356; commercial air pilots, 419; air engineers, 341; registration of aircraft, 348; air-harbour licences, 91.

Subsection 5.—The Royal Military College.

The Royal Military College of Canada was founded in 1876 by the Honourable Alexander Mackenzie, Prime Minister of Canada. Since its foundation, 2,308 gentlemen cadets have been enrolled, and of this number 196 are now in attendance.

The maximum number of cadets who may be in residence at any one time is restricted by Order in Council to two hundred.

The Royal Military College has a very distinguished record in connection with the War. Of the 914 graduates and ex-cadets who served, 353 were granted commissions direct from the College, and 43 enlisted with a view to obtaining commissions; 156 ex-cadets were reported as killed in action, died of wounds, or missing. Ex-cadets of the College won the following honours and decorations: 1 Victoria Cross and 3 recommendations for the Victoria Cross, 106 Distinguished Service Orders, 109 Military Crosses, 2 Distinguished Flying Crosses, 62 other British decorations, 42 foreign decorations. Three Canadian and one Australian divisions were commanded by graduates of the College.

¹See also pp. 692-694.

Ex-cadets who have served in the Army, either in the Regular Forces or during the Great War, include 1 general, 5 lieutenant-generals, 17 major-generals, and 29 brigadier-generals or brigadiers. Eleven knighthoods have been conferred on ex-cadets for distinguished service.

The establishment of the College, as stated in the Act of 1874 (37 Vict., c. 36) was "for the purpose of imparting a complete education in all branches of military tactics, fortifications, engineering and general scientific knowledge in the subjects connected with and necessary to a thorough knowledge of the military profession, and for qualifying officers for command and staff appointments". In addition to the foregoing, the course of instruction is such as to afford a thorough practical and scientific training in civil engineering, surveying, physics and chemistry, English and French. Strict discipline, combined with physical training, riding, drill and outdoor games, forms part of the curriculum.

The College is situated on a beautiful peninsula, one mile from Kingston, with the Cataraqui river emptying into the St. Lawrence river at its junction with lake Ontario on the one side, and Navy bay on the other. The grounds cover about 500 acres. The buildings of the College proper are situated on the above-mentioned peninsula, comprising 60 acres. The remainder of the grounds, on which stands the historic Fort Henry, is at the disposal of the College for use as a training area. On the point of the College peninsula is situated Fort Frederick, built in 1837 when Kingston became the capital of Canada, the fort comprising a portion of the defences of Kingston. The College is under the supervision of the Department of National Defence, and is inspected annually by an advisory board composed of leading Canadian citizens, both civil and military, which makes its reports and recommendations to the Minister of National Defence. The staff is composed of a commandant, a staff-adjutant, and a competent staff of civil and military professors and instructors.

A four-year course leads to a "diploma with honours", a "diploma" or a "certificate of military qualification". A number of commissions in the Canadian Permanent Force and the Royal Canadian Air Force, as well as commissions in the British Regular Forces, the Indian Army, and the Royal Air Force, are offered annually to graduates; and for cadets who desire to obtain commissions in the Royal Canadian Navy a limited number of naval cadetships are available each year to cadets who successfully complete the first two years of study and who were under 18 years of age at the time of entry into the College. To those graduates joining the British Army, the privilege of one year's seniority is granted in the British or Indian Armies. This has been arranged in order to equalize the seniority of graduates of the Royal Military College of Canada with those of the Royal Military Academy, Woolwich or the Royal Military College, Sandhurst, since the courses at the latter institutions are shorter than the Canadian.

The principal Canadian universities admit recommended graduates to the fourth year of their civil engineering courses and to the third year of other engineering courses; and some of the universities admit graduates to the third years of arts and science courses.

The R.M.C. diploma is accepted by the Law Societies and Bar Associations of Ontario, Nova Scotia, Quebec, Manitoba, Saskatchewan, British Columbia and Alberta, as the equivalent of a B.A. degree for admission to the study of law. The Dominion Association of Chartered Accountants likewise accepts R.M.C. graduates as registered students under the same conditions as university graduates.

Entrance to the College is on a competitive basis. Candidates are required to pass a rigid medical examination, and to have obtained junior matriculation or an acceptable equivalent. Applications for admission to the College should reach The Secretary, Department of National Defence, Ottawa, before May 31 of each year.

Section 3.—Department of Public Works.¹

Since Confederation and before, the constructing department has been known as the Department of Public Works. In 1879 the railways and canals were placed under the control of a new department, the building and maintenance of penitentiaries were transferred to the Department of Justice, the maintenance and construction of lighthouses to the Marine and Fisheries Department, and the smaller drill halls and armouries to the Department of National Defence. The work of the Department of Public Works is now divided into three principal branches, *viz.*, the Engineering Branch, the Architect's Branch and the Telegraph Branch.

Engineering.—The Engineering Branch conducts the construction and repair of wharves, piers, breakwaters, dams, weirs, bank and beach protection works; the improvement of harbours and rivers by dredging; the construction, maintenance and operation of Government dredging plant; the construction and maintenance of graving docks; the construction and maintenance of interprovincial bridges and approaches thereto, also of bridges on highways of national importance in the Northwest Territories; the maintenance of military roads, also hydrographic and ordinary surveys and examinations, inclusive of some precise levelling and geodetic measurements which are required for the preparation of plans, reports and estimates; river gaugings and metering; the testing of cements and materials of construction; the licensing of international and interprovincial ferries; and the control of works constructed in or over navigable waters by authority of the Navigable Waters Protection Act (R.S.C., 1927, c. 140).

Architecture.—The Architect's Branch constructs and maintains Government buildings, post offices, customs houses, examining warehouses, and constructs quarantine, immigration and experimental farm buildings, armouries, military hospitals and drill halls, and telegraph offices.

Telegraphs.—The Telegraph Branch has control of the construction, repair and maintenance of all Government-owned telegraph lines and cables. These lines are located in the provinces of Nova Scotia, New Brunswick, Quebec, Ontario, Saskatchewan, Alberta, British Columbia and Yukon. (See also pp. 721-723.)

Graving Docks.—There are 5 graving or dry docks built and owned by the Canadian Government. The dimensions of these docks are shown in Table 4. The dock at Kingston, Ontario, is under lease to the Kingston Shipbuilding Company. The dock at Lauzon, Quebec, east of the old dock, is 1,150 feet long (divided into two parts 650 and 500 feet respectively) and 120 feet wide, with depth of 40 feet at high water. It cost about \$3,850,000. Under the Dry Dock Subsidies Act, 1910 (9-10 Edw. VII, c. 17), several docks have been subsidized by payments of 3 or 3½ p.c. per annum on the original cost for a given number of years, as shown in Table 5.

¹Revised by J. M. Somerville, Assistant Secretary, Department of Public Works.

Expenditure and Revenue.—Table 6 shows the expenditures and revenues of the Public Works Department of the Dominion Government, for the fiscal years 1927-32. For the fiscal year 1932 the expenditure was \$21,601,009, as compared with \$33,371,613 in 1931—a decrease of \$11,770,604, largely accounted for by reduced expenditures for harbours and rivers, dredging and public buildings.

Section 4.—The Indians and Eskimos of Canada.

Subsection 1.—The Indians of Canada.¹

The Indians of Canada who are wards of the Department of Indian Affairs number about 108,012, their numbers varying slightly from year to year. A small yearly increase is evident, and the popular notion that the race is disappearing is not in accordance with facts. Before they were subjected to the degenerating effects of European civilization and the devastating results of the many colonial wars, the numbers of the Indians were undoubtedly larger, but any reliable information as to the aboriginal population during either the French or the early British régime is non-existent, and there is no adequate basis for a comparison between the past and present aboriginal populations. An interesting sketch of the progress of the Indians of Canada since Confederation will be found in the Report of the Department of Indian Affairs, 1927.

Administration.²—Reserves have been set aside for the various bands of Indians throughout the Dominion, and the Indians located thereon are under the supervision of the local agents of the Department. The activities of the Department, as guardian of the Indians, include the control of Indian education, health, etc., the development of agriculture and other pursuits among them, the administration of their funds and legal transactions, and the general supervision of their welfare.

The local administration of the Indian bands on the reserves scattered throughout the Dominion is conducted through the Department's agencies, of which there are in all 116. The number of bands included in an agency varies from one to more than 30. The staff of an agency usually includes various officers in addition to the agent, such as medical officer, clerk, farm instructor, field matron, constable, stockman, etc., according to the special requirements of the agency in question. The work of the agencies is supervised by the Department's inspectors, each inspector having charge of a certain number of agencies. Expenditures upon destitute Indians are made by the Dominion Government, either from public funds or from the tribal funds of the Indians themselves.

The Indian Act provides for the enfranchisement of Indians. When an Indian is enfranchised he ceases to be an Indian under the law and acquires the full status of citizenship. In the older provinces, where the Indians have been longer in contact with civilization, many are becoming enfranchised. Great discretion, however, is exercised by the Government in dealing with this problem, as Indians who become enfranchised lose the special protection attached to their wardship, so that it is necessary to guard against premature enfranchisement.

Treaties.—In the older eastern provinces, the history of the Indians has been one of slow development with that of the community. In western Ontario and the Prairie Provinces the situation has been different. There, the rapid spread of civilization made it necessary to take prompt and effective measures to protect

¹Revised by A. F. MacKenzie, Secretary, Department of Indian Affairs.

²For an outline of the early administration, see p. 937 of the 1932 Year Book.

the moral claims of the Indians, which are recognized by the Government. Accordingly, treaties were entered into with the Indians, whereby the latter ceded to the Crown their aboriginal title and interest in the country. In consideration of such cession the Crown agreed to set aside adequate reserves, make cash grants, provide per capita annuities, give assistance in agriculture, stock raising, hunting, trapping, etc., as particular circumstances might require, provide education for the Indian children, and otherwise safeguard the Indians' interests. These treaties have been made from time to time as occasion arose and as new territories were opened up. No treaty has been made with the Indians of British Columbia, but their welfare has received no less attention from the Government on that account.

Government Expenditure.—On Mar. 31, 1932, the capital of the Indian Trust Fund, which a year earlier had amounted to \$13,764,581, had decreased to \$13,644,079. The amounts expended from the Consolidated Revenue Fund were as follows: voted by Parliament for the purposes of the Department, \$4,656,030; annuities by statute, \$224,292.

Statistics.—Statistical tables of population, school attendance, income and agricultural activities of the Indians in Canada follow. In Table 7 the populations for 1871-1931 are compiled from reports of the various censuses since Confederation, while the statistics and other information in the remaining tables are taken from the latest Annual Report of the Department of Indian Affairs. The Department of Indian Affairs takes a quinquennial census of Indians under its control, i.e., those who are wards of the Department, whereas census figures include all persons of Indian origin. For 1929 the Department reported that such Indians increased in number from 104,894 in 1924 to 108,012, or by nearly 3 p.c. in the quinquennium. The figures of the decennial census include some thousands of persons of Indian race who are living off the reserves as ordinary citizens of Canada.

¹Census figures in the organized provinces and estimates for the rest of Canada.

²Racial origin not taken in 1891; the figures have been taken from the report of the Department of Indian Affairs of that year.

³Includes 34,481 "half breeds".

The smaller Indian population of the Northwest Territories in 1931 is to be ascribed to the extension of the boundaries of Quebec, Ontario and Manitoba in 1912. This also accounts for the increase in the 1921 Indian population of these provinces.

Indian Education.—The educational work of the Department is now very extensive. In the fiscal year ended Mar. 31, 1932, a total of 350 Indian schools were in operation, including 80 residential schools for Indians with an enrolment of 8,213, and 261 day schools for Indians with an enrolment of 8,775 Indian pupils, also 9 combined public and Indian schools, with 175 Indian pupils enrolled. The total enrolment in the Indian schools has increased from 12,799 in 1915-16 to 17,163 in 1931-32 and the average attendance from 8,080 to 13,107 or from 63.1 p.c. to 76.4 p.c. of the enrolment. Continuation and high school work is now being taught in several of the day and residential schools. The amount spent on Indian education in the fiscal year ended Mar. 31, 1932, was \$2,004,957.

Recent Economic Progress of the Indians.—The Indians of Canada have made remarkable progress in economic status during the past decade. When the fact is kept in mind that the Indians, unlike the whites, are not increasing rapidly in numbers, the significance of the figures which follow will be better appreciated. The area of the land under cultivation by Indians was 236,761 acres in 1932, as compared with 173,198 acres in 1916. Their live stock in 1931 included 37,255 horses and 50,198 cattle, as compared with 35,315 horses and 37,188 cattle in 1916. The total income of the Indians was \$6,500,257 in 1931, as compared with \$6,241,497 in 1916. Information showing the acreage and value of Indian lands in 1932, the crops raised in 1931, the live stock owned by Indians in 1931, the sources and values of the income of Indians in 1931, is given by provinces in Tables 9 to 12.

¹Includes income received from timber and annuities earned as interest on Indian trust funds.

Subsection 2.—The Eskimos of Canada.¹

The Eskimos are a littoral race, dwelling on the northern and northeastern mainland coasts and on islands in the Arctic archipelago and in Hudson bay. Though nomads, they never go far from the sea except to hunt caribou, the skin of which animal is required for winter clothing. They subsist largely on marine animals and fish. They inhabit chiefly the Northwest Territories and Yukon and the Ungava district of Quebec. According to the census of 1931 the total Eskimo population of Canada was 5,979, made up as follows: Northwest Territories 4,670, Yukon 85, Alberta 3, Manitoba 62, Quebec 1,159. The administrative care of those Eskimos outside of the organized provinces devolves upon the Department of the Interior, which has done much for them by providing medical attention, by setting aside wild-life preserves for the protection and conservation of game resources, by importation of reindeer, distribution of buffalo hides and caribou skins for bedding and clothing, and the establishment of permanent stations in the eastern, central, and western Arctic, from which regular patrols are made.

Section 5.—Pensions and other Provision for War Veterans.²

Pensions Division.—This Division is responsible for the administration of returned soldiers' affairs under the Pensions and National Health Act and the War Veterans' Allowance Act. It is also responsible, by the direction of the Board of Pension Commissioners for Canada, for all payments under the Pension Act.

The Annual Report for the fiscal year ended Mar. 31, 1932, shows a decrease in the number of ex-members of the Forces who received in-patient hospital treatment, the number being 14,267, as against 15,519 in 1930-31 and 12,939 in 1929-30. The Department maintains eight hospitals, situated in the following centres: Halifax, Saint John, Ste. Anne de Bellevue, Toronto, London, Winnipeg, Calgary and Vancouver. The sheltered employment workshops are still operated at Hamilton, Montreal and Halifax and one shop by the Red Cross Society at Victoria.

¹ Revised by H. E. Hume, Chairman, Dominion Lands Board, Dominion Lands Administration, Department of the Interior, Ottawa.

² Revised by E. H. Scammell, Secretary, Pensions Division, Department of Pensions and National Health. See also 1930 Year Book, pp. 982-983.

The number of veterans' care cases showed an increase of 27, the total at the end of the fiscal year being 198. The issue of orthopædic and surgical appliances has been maintained with a slight increase. The number of pensioners who have been granted relief was 12,303 in 1931-32, as compared with 8,811 in 1930-31, 5,548 in 1929-30 and 4,647 in 1928-29. The expenditure in 1931-32 was \$2,082,052, as compared with \$907,010 in 1930-31, \$517,947 in 1929-30 and \$367,231 in 1928-29. During the year, 36 cases were taken on for vocational training and 6 for probational training.

The provision under which the Department assumes responsibility in respect of accidents sustained by pensioners of 25 p.c. and upwards while engaged in industry has been continued. During the fiscal year under review, the number of claims was 200, being 8 more than during the previous year. The expenditure was \$49,878, as against \$45,142 in 1930-31. This expenditure is largely governed by the number of fatal and serious accidents.

The following is a summary statement of the manner in which the funds appropriated by Parliament have been dealt with and also sets forth the costs of administration and the adjudication of pensions in amount and percentage.

The Board of Pension Commissioners for Canada.—The Board of Pension Commissioners is responsible for the adjudication and award of pensions in respect of disabilities connected with military service and the award of pensions to the dependants of those who have died. It consists of three members and operates under the authority of the Pension Act. The following statements illustrate the growth of the activities of the Board of Pension Commissioners:—

The number of disability awards in force at Mar. 31, 1932, shows an increase of 9,209 as compared with those in force a year previous and of 18,882 as compared with the figures for 1930, being due, in the main, to the reinstatement, as provided

by the 1930 Amendments to the Statute, of awards in cases in which final payments had been accepted. A decrease of 368 took place in the number of dependent pensions in force.

The number of medical examinations for pension purposes carried out during the fiscal year was 32,737, representing an increase of 1,529, which to a large extent was due to reinstatement of awards in final payment cases.

The total liability in respect of pensions under the Pension Act for the fiscal year ended Mar. 31, 1932, was \$41,858,377, which is an increase of \$1,646,651 over the liability for the preceding fiscal year.

13.—Pensions in Force as at Mar. 31, 1918-32.

Rates of pensions for all ranks were published in tables on pp. 960-962 of the 1925 Year Book, to which the reader is referred.

Pension Tribunal.—The Pension Tribunal, appointed in accordance with the Amendments to the Pension Act, passed in 1930, came into operation on Oct. 1, 1930, by the appointment of a chairman and eight members. During 1931, three temporary members were added.

During the year ended Mar. 31, 1932, the tribunal dealt with applications as follows:—

Old applications remaining to be completed from former fiscal year.....	149
New applications listed at hearings.....	4,619
Total.....	4,768
Decisions given favourable to the applicant.....	1,866
Decisions given unfavourable to the applicant.....	2,293
Applications withdrawn.....	108
Applications under consideration at 31-3-32.....	41
Applications standing adjourned.....	252
Applications standing postponed.....	204
Disagreements as to decision.....	4
Total.....	4,768

Preliminary hearings were also conducted in 188 applications.

Pension Appeal Court.—This Court was not fully constituted until the middle of January, 1931, so that sittings were not commenced until the first week in February. The following statement sets forth the activities of the Court between that date and Mar. 31, 1932.

Appeals heard to Mar. 31, 1932.....	1,672

Veterans' Bureau.—Pursuant to legislation passed in 1930, a Veterans' Bureau was organized as a branch of the Department and came into active operation on Oct. 1, 1930. The duties of the Bureau were set forth on p. 945 of the Canada Year Book, 1932. Briefly stated, the Bureau was created and is operated to assist

applicants for pension in the preparation and presentation of their cases. There is a Chief Pensions Advocate with his staff at Ottawa, and Pensions Advocates have their offices in all the principal cities of Canada.

War Veterans' Allowances.—A synopsis of the War Veterans' Allowance Act, which came into force on Sept. 1, 1930, appeared on p. 946 of the Canada Year Book, 1932. The following statistics show the activities of the War Veterans' Allowance Committee for the fiscal year ended Mar. 31, 1932.

NUMBER OF CASES HANDLED DURING YEAR.

Number of new applications dealt with	4,442
Number of cases receiving allowance reviewed	1,105
Total number of cases dealt with during year	5,547

NUMBER OF RECIPIENTS.

	Number of Cases.	Annual Liability.
Veterans' allowance payments in force Mar. 31, 1931	2,219	\$ 738,485
Awards during fiscal year ending Mar. 31, 1932	2,034	662,101
Total	4,253	1,400,586
Cancellations, account of death, etc.	428	143,262
Payments in force Mar. 31, 1932	3,825	\$ 1,257,324

ANALYSIS OF AWARDS MADE FROM SEPTEMBER, 1930, TO MAR. 31, 1932.

Approved over sixty years of age	2,360	
Cancelled by death, etc.	185	
		2,175
Approved under sixty years of age	1,930	
Cancelled by death, etc.	280	
		1,650
Total in receipt of allowance on Mar. 31, 1932		3,825

Returned Soldiers' Insurance.—The Returned Soldiers' Insurance Act of 1920 was placed under the jurisdiction of the Board of Pension Commissioners for Canada. The Board confines itself, however, to the issue of policies and to the supervision and adjudication of claims. All collections and payments are made through the Department. No applications under the Statute could be received after Sept. 1, 1923, but its operation has been extended from time to time and applications may now be received until Aug. 31, 1933.

During the fiscal year ended Mar. 31, 1932, 1,463 applications for policies were received, of which 1,351 were accepted and 92 refused. The number of policies issued, including some in which applications had been accepted prior to the commencement of the period under review, was 1,373.

The total number of policies in force on Mar. 31, 1932, was 28,426 representing an insurance of \$62,680,341. During the fiscal year the premium income was \$1,643,457, interest was \$379,797, making a total of \$2,023,254. Expenditure during the year, in respect of death claims, cancelled insurance and surrendered policies, amounted to \$919,514. The total number of death claims to Mar. 31, 1932, was 2,759, amounting to \$7,278,184. The balance on hand as at Mar. 31, 1932, was \$10,352,976.

Section 6.—Soldier and General Land Settlement.¹

Soldier settlers and other settlers under the jurisdiction of the Soldier Settlement of Canada have, in common with Canadian farmers generally, been confronted with adverse agricultural conditions during the year under review. In view of this situation the Department has continued its general policy of reasonable leniency to all settlers who are making an honest effort to handle their farms efficiently and to live within their means. The fact that no settler has been dispossessed of his farm during the past two years, by action of the Department, because of inability to meet his payments, is the best evidence of adherence to this general policy.

At the present time the Soldier Settlement of Canada is administering 22,986 farm properties, made up as follows: soldier settlers, 11,535; civilian settlers, 5,475; British families, 2,274; reverted farms, 3,702; total, 22,986.

The total number of soldier settlers established with loans was 24,715. Gross charges, including interest, to soldier settlers' and British Family settlers' accounts amounted to \$148,438,358.68 at the close of 1932. Reduction of this amount to the present net investment of \$63,862,224.68 is accounted for as follows:

Repayments by settlers (principal and interest).....	\$ 50,863,695.17
Remedial legislative reductions.....	21,703,845.77
Losses on security sold.....	12,003,593.08
Total.....	\$ 84,576,134.00

In addition to the \$21,703,845.77 actually written off soldier settlers' accounts these settlers have benefited to the extent of \$10,269,108.87 in interest not charged to their accounts, in accordance with legislation passed in 1922.

During the past three years the annual administration costs of soldier and general land settlement have been reduced by \$557,121.86. The administrative expenditure for the fiscal year 1929-30 was \$1,362,121.86, while the administration cost for the fiscal year ended Mar. 31, 1933, is estimated at \$805,000. This reduction in annual administration cost is due to complete re-organization of the Department, including Head Office, district offices and field staff, resulting in the elimination of three district offices; termination of the services of 158 former members of the staff, including 16 senior executive officers; elimination of 43 motor cars and curtailment in travelling and other expenses. The annual cost of soldier land settlement is now \$567,000, which is less than 1 p.c. of the net loan investment.

Of the settlers who have retired from the scheme 4,952 have repaid their loans in full (2,385 by cash repayment, 2,567 by sale of properties).

In 1932 the Department leased 2,065 properties to local farmers and effected the sale of 456 properties.

Under the British Family Scheme 3,346 families were accepted for settlement. Of these 175 withdrew from the scheme before receiving advances, and 1,165 withdrew after contracting loans, making a total of 1,340 withdrawals. There are now 1,981 families operating farms under the Three Thousand Family Scheme. Thirteen families have repaid their loans; twelve families have not yet received loans.

Under the New Brunswick British Family Scheme 359 families were accepted for settlement. Of these 293 are still on the land; 62 have withdrawn, 57 after contracting loans, five before contracting loans; four have not yet received loans.

¹Revised by C. W. Cavers, Soldier Settlement of Canada. Figures are as at Dec. 31, 1932.

As a result of the Back-to-the-Land Movement inaugurated by the Minister in 1930, the Soldier Settlement of Canada has, since October of that year, placed 9,514 single men in farm work and settled 1,279 families on vacant soldier settlement farms, exclusive of those placed by the railways, bringing the total by railways and Department in co-operation up to 22,803 single men and 10,486 families. Under the Relief Land Settlement Plan instituted by the Dominion Government in 1932, 1,706 families have been settled on the land under Dominion-Provincial agreements. On the basis of five to a family a total of 84,763 individuals has been absorbed into agriculture.

The Soldier Settlement of Canada is equipped to deal with certain phases of the work of several other departments and is rendering assistance to the War Veterans' Allowance Committee and the Board of Pension Commissioners, and to the Department of the Interior. The work involved in this connection is with respect to applications for relief by unemployed pensioners, with respect to special pension cases, pension and war veterans' allowance applications arising in rural districts, together with reports on applications for patent. From Sept. 1, 1930, to Dec. 31, 1932, 12,605 investigations of the type referred to have been carried out.

Section 7.—Department of the Secretary of State.¹

The Department of the Secretary of State was constituted in its present form in 1873, through the merging of the previously-existing offices of the Secretaries of State for Canada and for the provinces. The Secretary of State is the official mouthpiece of the Government as well as the medium of communication between the Dominion and Provincial Governments, all correspondence between the Governments being conducted by him with the Lieutenant-Governors. He is also the custodian of the Great Seal of Canada and the Privy Seal as well as the channel by which the general public may approach the Crown.

The Secretary of State is also the Registrar-General, registering all proclamations, commissions, licences, warrants, writs, and other instruments issued under the Great Seal and the Privy Seal. He is further charged with the administration of the Boards of Trade Act, the Companies Act, the Canada Temperance Act, the Copyright Act, the Naturalization Act, the Patent Act, the Trade Unions Act, the Ticket of Leave Act, the Unfair Competition Act. The following information on these subjects has been secured in the course of administration.

Charters of Incorporation.—The number of companies incorporated under the Companies Act and amending Acts during the fiscal year 1931-32 was 760 with a total capitalization of \$294,770,312. Supplementary letters patent were granted during the year to 197 companies, 43 of which increased their capital stock by the aggregate amount of \$27,981,750; 44 decreased their capital stock by \$52,773,617; the remaining 110 were granted supplementary letters patent for various purposes, such as changing names, extending powers, etc. The total capitalization of new companies plus the increase of capital of existing companies amounted to \$322,751,062.

In Table 14 will be found the number and capitalization of companies incorporated during the years 1900-32.

¹ Revised by Thomas Mulvey, B.A., K.C., Under-Secretary of State, Department of the Secretary of State.

Naturalizations.—The naturalizations effected under the Naturalization Act (R.S.C., 1906, c. 77) for the calendar years 1908-17 inclusive, were given on p. 594 of the Year Book for 1919. Since Jan. 1, 1918, the only method of obtaining naturalization has been under what is known as the "Imperial" Naturalization Act, which came into force on Jan. 1, 1915. This Act was known under the title of the Naturalization Act, 1914, until July 7, 1919, when it was repealed and the Naturalization Act, 1919, came into force. On July 1, 1920, the Naturalization Act, 1919, was repealed, and the Naturalization Act, 1914, was revived and amended under the title of the Naturalization Acts, 1914 and 1920. By an amendment passed by Parliament in 1923, the restriction by which persons of alien enemy birth were ineligible to receive certificates of naturalization for a period of 10 years after the termination of the War was removed, and at the present time any alien may apply for naturalization, regardless of his nationality. All these Acts have been consolidated in R.S.C., 1927, c. 138. Since Jan. 15, 1932, women British subjects on marrying aliens may by declaration retain their British nationality, if they have not by marriage acquired their husband's nationality, and the wives of aliens no longer become British subjects through their husbands' naturalization. They must apply to the Secretary of State.

Table 15 shows the number of naturalization certificates issued to single persons or heads of families under these Acts during the calendar years from 1923 to 1931. The total number of persons naturalized during the fiscal year ended Mar. 31, 1932, was 32,519, including (except as stated above) the wives and minor children of those to whom naturalization certificates were issued.

¹Under Section 6 of the Naturalization Act the Secretary of State is authorized, in his discretion, to grant a special certificate of naturalization to any person with regard to whose nationality as a British subject a doubt exists. ²Citizens of the Lebanese Republic.

Canada Temperance Act.—Under Parts I and II of this Act, provision is made for the prohibition of the sale of intoxicating liquors in counties and cities. The last vote taken under these parts was in the County of Compton, Quebec, on April 28, 1930, in response to a petition for the repeal of the Act in that county. The vote resulted in favour of the repeal, which became effective on June 14, 1930. Part III of the Act relates to penalties and prosecutions, Part IV to the prohibition of the importation and exportation of intoxicating liquors into and from the provinces, while Part V enacts provisions in aid of provincial legislation for the control of the liquor traffic.

Section 8.—The Royal Canadian Mounted Police.

The R.C.M. Police is a constabulary maintained by the Dominion Government. When organized in 1873 it was known as the North West Mounted Police; in 1904, its name was changed to the Royal North West Mounted Police and in 1920, to the Royal Canadian Mounted Police.

The Force is controlled and administered by a Minister of the Crown (at present, the Minister of Justice) and may be employed anywhere in Canada.

It is primarily responsible for the maintenance of law and order in Yukon, the Arctic regions, the unorganized Northwest Territories and, for a variety of services, for the Dominion Government in all provinces of the Dominion. A large number of the Dominion Departments utilize its service in investigations and in administrative work.

Amongst the many services rendered for the Dominion Government, the repression of the traffic in noxious drugs, the protection of Government buildings and dockyards, the enforcement of Dominion laws and the duties of the Preventive Service for the Department of National Revenue may be mentioned.

Under the R.C.M. Police Act, any province may enter into an agreement with the Dominion Government for the services of the R.C.M. Police to enforce provincial laws upon payment for its services.

In addition to the Dominion duties referred to, the Force at the present time has agreements with the Provinces of Prince Edward Island, Nova Scotia, New Brunswick, Manitoba, Saskatchewan and Alberta, whereby the R.C.M. Police is responsible for the enforcement of the Criminal Code and Provincial Statutes in those provinces.

The Force is divided into 14 divisions of varying strength distributed over the entire country. The term of engagement is 5 years for recruits with re-enlistment for 1 year or 3 years. The officers are commissioned by the Crown.

Recruits are trained at Regina, Saskatchewan. The course of training covers six months and consists of drill, both mounted and foot, and general instructions in police duties. The Force is distributed from Halifax to Vancouver and from Bache Peninsula, on Ellesmere island, in the far north, to the International Boundary between Canada and the United States.

The Force, which is commanded by a Commissioner whose Headquarters are at Ottawa, Ontario, had a strength of 2,348 on Sept. 30, 1932, including masters and seamen employed with the Preventive Service for the prevention of smuggling at sea, distributed as follows:—

Section 9.—The Civil Service of Canada.

Organization.¹—Prior to 1882, appointments to the Civil Service were made directly by the Government. In that year, a Board of Civil Service Examiners was appointed to examine candidates and issue certificates of qualification to those successful at examinations. Appointments, however, were still made by the Government of the day.

The Royal Commission of 1907, appointed to inquire into the Civil Service Act and its operation, reported in favour of the creation of a Civil Service Commission. In 1908 this body was appointed; it consisted of two members appointed by the Governor in Council and holding office during good behaviour, but removable by the Governor General on address of the Senate and House of Commons. The Civil Service was classified into three divisions under the Deputy Heads of Departments, each division consisting of two subdivisions, each of these having its scale of salaries. The Commission was charged with the organization of and appointments to the Inside Service (at Ottawa), certain appointments to be made after open competition and others after qualifying tests, also with holding qualifying examinations for the Outside Service (the Service apart from Ottawa) to obtain lists from which selections could be made by the various Departments. All British subjects between 18 and 35 years of age who had resided in Canada for three years were eligible to try these examinations.

¹Revised by Wm. Foran, Secretary, Civil Service Commission, Ottawa.

In 1918 a third member of the Civil Service Commission was appointed, and by the Civil Service Act of that year the principle of appointment after open competition was applied to the Outside as well as the Inside Service. The Act also provided for the organization by the Commission of the various Government Departments, for a classification of all positions in the Service on a duties basis, for the establishing of new rates of compensation, and for the principle of promotion by merit whenever consistent with the best interests of the Service. Provision was also made for preference, in the matter of appointment to the Service, to be given to qualified applicants who had served in the Great War.

Civil Service Statistics.¹—From April, 1924, a monthly return of personnel and salaries has been made by each Department to the Dominion Bureau of Statistics, according to a plan that ensures comparability between Departments and continuity in point of time. The institution of this system was preceded by an investigation back to 1912, the summary results of which are presented in Table 17.

During the war years, as will be seen from Table 17, the number of employees increased very rapidly, as a result of the enlargement of the functions of government and the imposition of new taxes, necessitating additional officials as collectors. Such new services as the Department of Pensions and National Health and the Soldier Settlement Board were also created. The maximum was reached in January, 1920, when 47,133 persons were employed; this number has since decreased to 43,778 in January, 1932. It may be added that, out of 44,002 in March, 1932, 1,200 in the Income Tax Branch and 2,750 in the Department of Pensions and National Health, or 3,950 in all, were engaged in services of outstanding importance which had no existence before the War. Further, an additional 11,676 persons were, in March, 1932, employed in the Post Office Department, performing services of an industrial rather than of a governmental type, and receiving their salaries out of the payments of the public for services immediately rendered, rather than out of taxation. This postal service alone accounted for \$2,801,137 of the \$7,520,833 paid in salaries in March, 1932, or 37.25 p.c. of the total.

The statistics of numbers of employees and of salaries, now being secured monthly, are more comprehensive than those previously published, as a result of the inclusion of various classes of employees, largely "part-time", "seasonal" and "fees of office" employees, who were not included in the report published in 1925. These employees are largely in the Departments of Marine, Fisheries and Public Works. There remain, however, many persons in the "non-enumerated classes" whose numbers cannot be supplied monthly by the departmental officials but whose compensation is included in the monthly figures of expenditure on personnel, as shown in Table 18.

¹Revised by Col. J. R. Munro, Chief of the Finance Branch of the Bureau of Statistics, Ottawa.

17.—Summary of Civil Service Employees (Permanent and Temporary) of the Government of Canada, together with Total Salaries, in the month of January of the years 1912-32, inclusive.

1932 ¹	43,778	5,652,132	-	5,652,132

¹Figures for January, 1925-32 are not comparable with those for preceding Januaries, because monthly records now being published include various classes of employees not included in the historical record for the 13 years 1912-24. In Table 21 will be found comparable figures of employees in the various Departments in March, 1931, and March, 1932.

Table 18, which gives statistics by Departments, with a further classification by principal branches where such are recorded, is included to give comparable figures for the latest months. In the month of March, 1932, the total number of employees in the enumerated classes was 44,002, and the total expenditure in wages and salaries for all classes of employees was \$7,520,834, as compared with 45,581 employees and \$7,895,591 respectively in March, 1931.

¹Including Commissioners and their salaries. ²Refund of \$397 has been deducted. ³Including living allowance. ⁴Refund of \$1,440 has been deducted. ⁵Salaries of A.D.C.'s are included, but not their number. ⁶The actual number of employees was 402. The salaries of 130 seasonal temporary employees engaged for varying periods throughout the year were charged to this month.

Section 10.—Harbour Commissions.

The administration of the Harbour Commissions continues to be as outlined at p. 1013 of the Year Book for 1930. The recommendations in the report of Sir Alexander Gibb and Partners, referred to in last year's Year Book, which, if put into effect, will call for a very considerable change in the present method of administering the harbours that are placed under the Commission form of administration, are still under study by the Government but no definite action has as yet been announced as a result of this study.

Section 11.—Race Track Betting.

By an amendment to Section 235 of the Criminal Code, passed in 1920, the supervision of race track betting, under the pari-mutuel system, was placed in the hands of the Minister of Agriculture. The actual supervision is carried out by officers of the Royal Canadian Mounted Police and operated for the first time during the racing season of 1921. Statistics are available from the year 1924 and are shown in Table 19 for the Dominion as a whole, while Table 20 shows the operations by provinces for the fiscal year ended Mar. 31, 1931.

Section 12.—The Advisory Board on Tariff and Taxation.

As indicated at p. 958 of the Year Book for 1932, provision was made by the present Government (c. 55 of the Statutes for 1931) for the appointment of a new Tariff Board. Part I of the Act defined the constitution, duties and powers of the Board, while Part II provided for the exercise, by the Tariff Board, of the duties of the Board of Customs and the substitution of the former for the latter body.

The functions of the Board were somewhat widened following the Imperial Economic Conference held in Ottawa in July, 1932, and it was announced that the Board would be responsible for seeing that the spirit and the letter of the undertakings then made with the United Kingdom are carried out. British manufacturers have the right to appear before the Board.

On Feb. 6, 1933, the following members were appointed to the Board: The Hon. George Herbert Sedgewick, a Justice of the High Court of Ontario, Toronto, Chairman; Milton Neil Campbell, Esq., M.P., Pelly, Sask., Vice-Chairman; and Charles Herbert, Esq., B.A., Montreal. The first hearing of the Board was scheduled to take place on July 13, 1933.

Section 13.—Other Miscellaneous Administration.

In previous editions of the Canada Year Book this chapter has been brought to a close with outlines of Dominion Government administration as follows:—

- The International Joint Commission.
- The Geodetic Survey of Canada.
- The Topographical Survey.
- The Dominion Observatories.

No material change has taken place in the functions of these organizations and the reader is referred to pp. 1014-1017 of the 1930 Year Book for this information.

CHAPTER XXIX.—SOURCES OF OFFICIAL STATISTICAL AND OTHER INFORMATION RELATIVE TO CANADA.

The chief source of information on the current state of the country is the Dominion Bureau of Statistics, organized as the central statistical bureau for Canada, and described in the first part of this chapter; a list of its publications, which cover almost the whole field of the national statistics, is given in Section 1.

The second section of the chapter contains a list of the Acts of Parliament administered by the several departments of the Dominion Government, and the third section a bibliography of the publications of these departments. This is followed, in Section 4, by a bibliography of the publications of Provincial Governments.

Section 1.—The Dominion Bureau of Statistics.¹

The Dominion Bureau of Statistics was set up by Statute in 1918 as a central statistical department for Canada (8-9 Geo. V, c. 43). The Act was a consolidation of all previous statistical legislation and was based on the report of a Commission on Statistics, appointed in 1912, which recommended (a) a series of specific reforms and enlargements in Canadian statistics, and (b) a policy of statistical co-ordination for the Dominion, under central direction. In 1915, following the recommendations in this report, the office of Dominion Statistician was created.

The Bureau has been constituted by the transfer or absorption, by Orders in Council, of the following work and branches: (1) the Census and Statistics Office (covering the census, and also agriculture, general manufactures and criminal statistics), (2) Fisheries Statistics, (3) Mining Statistics, (4) Forestry Statistics, (5) Dairying and Fruit Statistics, (6) Water- and Electric-Power Statistics, (7) the Railways and Canals Statistical Branch of the Department of Railways and Canals, (8) the Trade Statistical Branch (exports and imports), (9) Grain Trade Statistics, (10) Live-Stock Statistics, (11) Prices Statistics, and (12) Employment Statistics. In addition four new branches were created, dealing respectively with Public Finance, Internal Trade, Vital Statistics, and Education. Subsequently the statistical activities of the Fuel Controller and the Board of Commerce were absorbed. Modifications of the Bankruptcy, Public Health and Railway Acts, and of the regulation *re* franking privileges were also made, with a view to facilitating the collection of statistics.

The Bureau has completed the plans for a unified, nation-wide statistical system, covering every important phase of social and economic activity, and has carried them out to a considerable degree.

The main achievement of the Bureau has been in the organization of the several subjects in correlation with each other in accordance with this general plan, and the consequent establishment of a comprehensive viewpoint of the country as a "going concern". In addition, there has been created what is frequently called a central "thinking office" in statistics, continuously in touch with general conditions and the line of probable developments.

¹A more complete account of the formation and activities of the Bureau of Statistics will be found on pp. 961-964 of the 1922-23 Year Book.

The final concept in the organization of the Bureau of Statistics is that of a national laboratory for social and economic research. Statistics are not merely a record of what has been, but are for use in planning what shall be; it is the duty of a statistical bureau to assist directly in the day-to-day problems of administration, as well as to provide their theoretic background. One of the most significant of recent developments in administration is the extent to which statistical organization has been increased as a guide to national policy. Though its usefulness has only begun, the Dominion Bureau of Statistics has laid the foundations for a service comparable with the increasingly important position taken by Canada in the economic and political world.

Publications of the Bureau.—The first annual report of the Dominion Statistician contained a full description of the organization of the Bureau and of its subject matter.¹ The main Branches of the Bureau are as follows: I. Administration; II. Population—Census and Vital Statistics; III. Agricultural Statistics; IV. Fisheries, Furs and Dairy Products; V. Mining, Metallurgical and Chemical; VI. Forestry and Allied Industries; VII. General Manufactures; VIII. External Trade (Imports and Exports); IX. Internal Trade; X. Transportation; XI. Financial Statistics; XII. Statistics of Administration of Justice; XIII. Education Statistics; XIV. General Statistics. The publications of the several Branches are as follows:—

ADMINISTRATION—

Annual Report of the Dominion Statistician.

POPULATION—

Census—

I. Census of Population and Agriculture, 1931.

Bulletins of the Seventh Census of Canada, 1931, as follows:—

- (1) Population:—*Preliminary Bulletins.*—(1) to (3) Cities, Towns and Villages. (4) Ontario Villages. (5) Montreal Island. (6) Cities, Towns and Villages. (7) Villages of Manitoba, Saskatchewan and Alberta. (8) Villages of Quebec. (9) Cities, Towns and Villages. (10) Maritime Provinces by Federal Electoral Districts. (11) Ontario by Federal Electoral Districts. (12) Prairie Provinces by Federal Electoral Districts. (13) Quebec by Federal Electoral Districts. (14) British Columbia by Federal Electoral Districts; Yukon and Northwest Territories. (15) Canada by Provinces. (16) Cities replacing Census Bulletins 1, 2, 3, 5 and 6. (17) Towns replacing Bulletins 1, 2, 3, 5, 6 and 9. *Final Bulletins.*—(I) New Brunswick. (II) Nova Scotia. (III) Manitoba. (IV) Canada by Provinces. (IVa) Canada by Provinces, replacing IV. (V) Saskatchewan. (VI) Alberta. (VII) Quebec. (VIII) Ontario. (IX) British Columbia. (X) Prince Edward Island. (XI) Rural and Urban Population. (XII) Yukon and Northwest Territories. (XIII) Cities, Towns and Villages in Canada by Provinces. (XIV) Religions by Provinces. (XV) Birthplaces by Provinces. (XVI) Ages by Provinces. (XVII) Conjugal Condition by Provinces. (XVIII) School Attendance and Literacy by Provinces. (XIX) Radio Sets in Canada, 1931. (XX) Population of Canada, 1931, by Provinces, Electoral Districts and Subdistricts. (XXI) Population of Canada, 1931, by Religious Denominations. (XXII) Population of Canada, 1931, by Racial Origins. (XXIII) Immigrants by Years of Arrival in Canada. (XXV) Number and Percentage Single, Married, Widowed or Divorced of the Total Population, by Sex and Provinces, 1911, 1921 and 1931. (XXVI) Age Distribution by Single Years of Age for Canada, by Provinces, 1931. (XXVII) Immigrant Population Classified by Sex, Country of Birth, Province of Residence, Years of Arrival in Canada and Citizenship of the Foreign Born, 1931. (XXVIII) Gainfully Employed Ten Years of Age and Over Classified According to Occupation and Sex for Cities of 30,000 and Over, 1931. (XXIX) Birthplace of the Population Classified According to Nativity of Parents for Canada and Provinces, 1931. Unemployment and Wage Earner Bulletins: (I) Saint John, N.B.; (II) Winnipeg, Man.; (III) Kitchener, Ont.; (IV) Ottawa, Ont.; (V) Vancouver, B.C.; (VI) Hamilton, Ont.; (VII) Calgary, Alta.

¹This report for the year ended Mar. 31, 1919, is now out of print.

POPULATION—concluded.

Census—

- (2) Census of Institutions:—*Preliminary Bulletin*.—(1) Mental Institutions.
- (3) Agriculture:—*Preliminary Bulletins*.—(1) Number of Occupied Farms by Counties or Census Divisions 1931 and 1921; and the Number of Vacant or Abandoned Farms 1931. *Preliminary Acreage*: (1) Prince Edward Island. (2) New Brunswick. (3) Saskatchewan. (4) Manitoba. (5) British Columbia. (6) Ontario. (7) Nova Scotia. (8) Quebec. (9) Alberta. (10) Canada. *Live Stock by Counties*: (11) Prince Edward Island. (12) Nova Scotia. (13) New Brunswick. (14) Ontario *Preliminary Acreage by Counties*. (15) Manitoba *Live Stock by Census Divisions*. (16) New Brunswick *Preliminary Acreage by Counties*. (17) Alberta *Live Stock by Census Divisions*. (18) Saskatchewan *Live Stock by Census Divisions*. (19) British Columbia *Live Stock by Federal Electoral Districts*. (20) Quebec *Live Stock by Counties*. (21) Ontario *Live Stock by Counties*. *Farm Holdings by Size for Provinces, Counties or Census Divisions*. *Farm Facilities by Provinces*. *Total Number of Farms, Farm Tenure, Farm Acreage, Farm Values, Mortgage Debt and Farm Expenses by Provinces*. *Farms Reporting Live Stock by Kinds and Total Number of Animals Reported for Each Kind*. *Final Bulletins*.—*Area and Yield of Field Crops 1930 and 1920*: (22) Prince Edward Island; (23) Nova Scotia; (24) New Brunswick; (25) Ontario; (26) Quebec. *Live Stock on Farms by Provinces*. *Tenure of Farm Lands by Provinces, Counties or Census Divisions*. *Number of Farm Workers, Weeks and Cost of Hired Labour, 1930*. *Fruit Trees on Farms, by Provinces, 1931 and 1921*. *Vegetables*.—*Area in 1931 and Area, Production and Value in 1930, by Provinces*. *Animal Products on Farms, by Counties*: (I) Prince Edward Island; (II) Nova Scotia; (III) New Brunswick; (IV) Manitoba; (V) Saskatchewan; (VI) Alberta; (VII) Ontario; (VIII) Quebec; (IX) British Columbia. *Live Stock on Farms, by Counties*: (X) Prince Edward Island; (XI) Nova Scotia; (XII) New Brunswick; (XIII) Manitoba; (XIV) Saskatchewan; (XV) Alberta; (XVI) British Columbia; (XVII) Ontario.

II. Census of Population and Agriculture, 1921.

Bulletins of the Sixth Census of Canada, 1921, as follows:—

- (1) Population: (a) Population of Canada, 1921, by Provinces, Electoral Districts, Cities, Towns, etc. (b) Religions of the People, 1921. (c) Origins of the People, 1921. (d) Dwellings and Families, 1921. (e) Birthplaces of the People, 1921. (f) Citizenship of the Foreign-born, 1921. (g) Year of Immigration, 1921. (h) Ages of the People, 1921. (i) Conjugal Condition of the People, 1921. (j) Language Spoken and Mother Tongue, 1921. (k) Literacy, 1921. (l) School Attendance, 1921. (m) Occupations, 1921. (n) Children in Gainful Occupations, 1921. Also bulletins on population by provinces as follows: (a) Population of Nova Scotia—Electoral Districts, etc. (b) Population of Prince Edward Island—Electoral Districts, etc. (c) Population of New Brunswick—Electoral Districts, etc. (d) Population of Quebec—Electoral Districts, etc. (e) Population of Ontario—Electoral Districts, etc. (f) Population of Manitoba—Electoral Districts, etc. (g) Population of Saskatchewan—Electoral Districts, etc. (h) Population of Alberta—Electoral Districts, etc. (i) Population of British Columbia—Electoral Districts, etc.
- (2) Agriculture: (a) Field Crops of Prairie Provinces, 1921. (b) Agriculture of Canada—General Summary. (c) Pure-bred Domestic Animals, 1921. (d) Agriculture of Nova Scotia, 1921. (e) Agriculture of Prince Edward Island, 1921. (f) Agriculture of New Brunswick, 1921. (g) Agriculture of Quebec, 1921. (h) Agriculture of Ontario, 1921. (i) Agriculture of Manitoba, 1921. (j) Agriculture of Saskatchewan, 1921. (k) Agriculture of Alberta, 1921. (l) Agriculture of British Columbia, 1921.

Reports of the Sixth Census of Canada, 1921, as follows:—

- Vol. I. Introduction—Number, Sex and Distribution—Racial Origins—Religions.
- Vol. II. Ages—Conjugal Condition—Birthplace—Birthplace of Parents—Year of Immigration and Naturalization—Language Spoken and Mother Tongue—Literacy—School Attendance—Blindness and Deaf-Mutism. (Out of print.)
- Vol. III. Families—Dwellings—Ownership of Homes—Rentals—Earnings. (Out of print.)
- Vol. IV. Occupations and Employment.
- Vol. V. Agriculture. Farm Holdings by size, tenure, value, etc.—Farm Products—Field Crops—Vegetables—Fruits—Forest Products—Live Stock—Animal Products—Statistics of Operators.

POPULATION—concluded.**Census—**

Census Monographs, 1921.

Illiteracy and School Attendance in Canada.

Origin, Birthplace, Nationality and Language of the Canadian People.

III. Census of Population and Agriculture of the Prairie Provinces, 1926.

Report of the Census of Population and Agriculture of the Prairie Provinces, 1926.

Census of Manitoba—Population and Agriculture.

Census of Saskatchewan—Population and Agriculture.

Census of Alberta—Population and Agriculture.

Preliminary Bulletins as follows: (a) Population of Manitoba—Electoral Districts, etc. (b) Population of Saskatchewan—Electoral Districts, etc. (c) Population of Alberta—Electoral Districts, etc. (d) Animals on Farms in the Prairie Provinces, 1926. (e) Farm Lands and Crops in the Prairie Provinces, 1926.

IV. Intercensal Estimates of Population.**Births, Deaths and Marriages—****V. Vital Statistics.**

Annual Report on Vital Statistics of Canada by Provinces and Municipalities.

Preliminary Annual Report on Vital Statistics of Canada.

Preliminary Quarterly Report on Vital Statistics of Canada.

Monthly Report of Births, Deaths and Marriages registered in Cities.

Report of Conference on Vital Statistics, held June 19-20, 1918, pp. 1-48.

Special Report on Contributory Causes of Death, 1926.

Order of Birth in the Registration Area of Canada, 1925.

Physicians' Pocket Reference to the International List of Causes of Death.

PRODUCTION—**I. General Summary of Production.**

Including and differentiating (gross and net) (1) Primary Production (Agriculture, Fishing, Furs, Forestry and Mining) and (2) Secondary Production, or General Manufactures.

II. Agriculture.**(1) Agricultural Production.**

Monthly Bulletin of Agricultural Statistics. The official record of current statistical data relating to agriculture. (Contains reports on agricultural conditions, prices, weather, etc.—estimates of areas, yields, quality and value of field crops—value of farm lands—wages of farm help—number and values of farm live stock and poultry—statistics of fruit and floriculture—dairying—tobacco—hives and honey—maple syrup and sugar—clover and grass seed—miscellaneous crops—stocks of grain—annual summary of value of agricultural production—index numbers of agricultural prices, yields and values—international agricultural statistics.)

Advance Summaries of Agricultural Statistics.

Telegraphic Crop Reports (between the first of June and the first of September, weekly for the Prairie Provinces and every two weeks for the rest of Canada).

Agricultural Statistics by Counties and Crop Districts, 1922-24 and 1925-29.

Annual Statistics of Fruit and Floriculture, latest issue, 1932.

Handbook of Instructions to Crop Correspondents, and Summary of Annual Agricultural Statistics, 1931.

[See also Censuses of Agriculture above.]

(2) Grain and Grain Products.

(a) Annual Report on the Grain Trade of Canada; (b) Monthly Review of the Wheat Situation; (c) Canadian Grain Statistics—weekly report on grain supplies and movements; (d) Canadian Milling Statistics—monthly; (e) List of Mills with Capacity; (f) The Grain Situation in the Argentine—monthly; (g) The Production and Distribution of Coarse Grains; (i) Barley.

(3) Live Stock and Animal Products.

(a) Annual Report on Live Stock and Animal Products Statistics; (b) Monthly Reports on Stocks in Cold Storage; Advance, Preliminary and Final; (c) Annual Estimates of the Consumption of Meats, Butter, Cheese, Eggs and Poultry in Canada.

(4) Other.

Monthly Report on Raw and Refined Sugar (visible supply, meltings, shipments, exports and imports).

PRODUCTION—continued.**III. Furs.**

Advance Summary of Fur Farm Statistics.

Annual Report on Fur Farms.

Advance Summary of Statistics of the Production of Raw Furs.

Annual Report on the Production of Raw Furs, comprising the pelts taken by trappers and those sold from fur farms.

IV. Fisheries.

Annual Report on Fisheries Statistics.

Advance Summaries on Fish Caught and Marketed, by Provinces.

V. Forestry.

Annual Summary of the Value, etc., of Forest Production. (Covers operations in the woods for saw-mills, shingle mills, pulp and paper mills, etc., production of mining timber, production of poles and cross ties, and farm production (decennial) of fire-wood, posts, etc.)

[See also Reports on Manufactures of Forestry Products listed under "Manufactures" Section VII, subsection (5).]

VI. Mineral Production: (Mining and Metallurgy.)**(1) General.**

(a) Annual Report on the Mineral Production of Canada; (b) Preliminary Reports (semi-annual) on the Mineral Production of Canada; (c) Monthly Reports on Leading Minerals.

(2) Coal.

(a) Annual Report on Coal Statistics for Canada; (b) Monthly Summary Report on Coal and Coke Statistics for Canada; (c) Quarterly Report on Coal and Coke Statistics for Canada.

(3) Annual Bulletins on Mining as follows:—

1. *Metals*—(a) Arsenic; (b) Cobalt; (c) Copper; (d) Gold; (e) Lead; (f) Nickel; (g) Metals of the Platinum Group; (h) Silver; (i) Zinc; (j) Miscellaneous Metals, including Aluminium, Antimony, Chromite, Iron Ore, Manganese, Mercury, Molybdenum, Tin, Tungsten.

2. *Non-Metallic Minerals*—(a) The Abrasive Industry; (b) The Asbestos Mining Industry; (c) The Feldspar and Quartz Mining Industry; (d) The Gypsum Mining Industry; (e) The Iron Oxides (Ochres) Mining Industry; (f) The Mica Mining Industry; (g) The Salt Industry; (h) The Talc and Soapstone Mining Industry; (i) The Crude Petroleum Industry; (j) The Natural Gas Industry; (k) Miscellaneous Non-Metallic Minerals—Actinolite, Barytes, Bituminous Sands, Fluorspar, Graphite, Magnesite, Bog Manganese, Mineral Waters, Peat, Phosphate, Silica Brick, Sodium Carbonate, Sodium Sulphate, Sulphur.

3. *Structural Materials*—(a) Cement; (b) Clay and Clay Products; (c) Lime; (d) Stone.

(4) Annual Bulletins on Mining Industries as follows:—

1. *Metal Mining*—(a) Gold Mining Industry (including Alluvial Gold Mining, Auriferous Quartz Mining, and Copper-Gold-Silver Mining); (b) Silver-Cobalt and Silver-Lead-Zinc Mining Industries. (c) Nickel-Copper Mining, Smelting and Refining Industry; (d) The Non-Ferrous Smelting and Refining Industry, and also separate bulletins on the Canadian production of copper, metals of the platinum group, and miscellaneous metals.

[See also Reports on Iron and Steel and their Products, Manufactures of Non-Ferrous Metals, and Chemicals and Allied Products, listed under "Manufactures", Section VII, Subsections (6), (7), (8) and (9).]

VII. Manufactures.

(1) *General*—General Summary for Canada, also for the Provinces and Leading Cities (industrial groups classified by component materials, purposes and origins of products—comparative statistics); Alphabetical List of Products; Quantity of Manufacturing Production in Canada, 1923-29.

(2) *Manufactures of Vegetable Products*—General Report. Annual Bulletins as follows: (a) Coffee, Tea and Spices; (b) Fruit and Vegetable Preparation, including canning, evaporating and preserving and Pickles, Sauces, Vinegar and Cider; (c) Flour and Grist Mill Products; (d) Bread and other Bakery Products; (e) Biscuits and Confectionery including Cocoa and Chocolate; (f) Macaroni and Vermicelli; (g) Liquors, Distilled; (h) Liquors, Malt; (i) Liquors, Vinous; (j) Rubber Goods and Rubber Boots and Shoes; (k) Prepared Breakfast Foods; (l) Sugar Refineries; (m) Tobacco Products; (n) Linsed Oil and Oil Cake; (o) The Canned Foods Industry; (p) Ice Cream; (q) Pack of Fruits and Vegetables; (r) Barley and Its Production; (s) Mixed Feed Trade in Canada.

PRODUCTION—continued.

- (3) *Animal Products and their Manufactures*—Annual Reports and Bulletins as follows: (a) The Dairy Factory Industry; (b) Slaughtering and Meat Packing and Sausage and Sausage Casings; (c) Fish and Fish Products; (d) Leather Tanneries; (e) Harness and Saddlery, Leather Belting, Trunks and Valises, Miscellaneous Leather Goods; Boot and Shoe Findings, Leather; (f) Leather Boots and Shoes; (g) Leather Gloves and Mitts; (h) Fur Goods, Fur Dressing. Monthly Report on Boot and Shoe Production. Monthly Report on Concentrated Milk Products. Monthly Report on Creamery Butter Production.
[See also Reports on Live Stock, etc., listed under "Agriculture"]
- (4) *Textile and Allied Industries*—General Report on The Textile Industries of Canada. Annual Bulletins as follows: (a) Cotton Textiles (cloth, yarn, thread and waste); (b) Woollen Textiles (cloth, yarn, waste, carpets, etc., and woollen goods, n.e.s.); (c) The Silk Industry; (d) Clothing, Men's Factory; (e) Clothing, Women's Factory; (f) Hats and Caps; (g) Hosiery and Knitted Goods; (h) Men's Furnishings, n.e.s.; (i) Oiled Clothing and Waterproofs; (j) Cordage, Rope and Twine; (k) Corsets; (l) Cotton and Jute Bags; (m) Dyeing, Cleaning and Laundry Work; (n) Dyeing and Finishing of Textiles; (o) Production and Distribution of Raw Wool in Canada.
- (5) *Manufactures of Forestry Products*—Printed Annual Reports as follows: (1) The Lumber Industry; (2) The Pulp and Paper Industry; (3) Wood-Using Industries; (4) Paper-Using Industries. Mimeographed Preliminary Annual Reports as follows: (a) The Lumber Industry; (b) Lumber Distribution in Canada and the United States (biennial); (c) The Pulp and Paper Industry; (d) Planing Mills, Sash and Door Factories; (e) Hardwood Flooring; (f) Furniture; (g) Boxes, Baskets and Crates; (h) Carriages, Wagons and Materials; (i) Coopage; (j) Coffins and Caskets; (k) Sporting Goods; (l) Boatbuilding; (m) Lasts, Trees and Shoe Findings; (n) Handles, Spools and Woodturning; (o) Woodenware; (p) Excelsior; (q) Miscellaneous Wood-Using Industries; (r) Printing and Publishing; (s) Printing and Bookbinding; (t) Lithographing; (u) Engraving, Electrotyping, Stereotyping and Blueprinting; (v) Trade Composition; (w) Paper Boxes and Bags; (x) Stationery and Envelopes; (y) Roofing Paper and Wallboard; (z) Miscellaneous Paper Goods. *Mimeographed Monthly Reports*—(a) Asphalt Roofing; (b) Rigid Insulating Board
- (6) *Iron and Steel and Their Products*—Annual Report. Annual Bulletins as follows: (a) Primary Iron and Steel; (b) Castings and Forgings; (c) Boilers, Tanks and Engines; (d) Agricultural Implements; (e) Machinery; (f) Automobiles; (g) Automobile Supplies; (h) Railway Rolling Stock; (i) Wire and Wire Goods; (j) Sheet Metal Products; (k) Hardware and Tools; (l) Bridge Building and Structural Steel; (m) Miscellaneous Iron and Steel Products. Monthly reports on (a) Iron and Steel; (b) Automobile Statistics; Commodity bulletins on the production of Pig Iron; Washing Machines; Cream Separators; Warm Air Furnaces; Galvanized Sheets; Wire Nails; Wire Rope and Cable; Steel Wire; Wire Fencing; Stoves, etc.
- (7) *Manufactures of Non-Ferrous Metals*—Report issued biennially. Annual Bulletins as follows: (a) Aluminium Products; (b) Brass and Copper Products; (c) Lead, Tin and Zinc Products; (d) Jewellery and Silverware; (e) Electrical Apparatus and Supplies; (f) Miscellaneous Non-Ferrous Metal Goods. Quarterly Report on Production and Sales of Radio Sets. Commodity Bulletins on the Production of Batteries; Silverware; Vacuum Cleaners, etc.
- (8) *Manufactures of the Non-Metallic Minerals*—Report issued biennially. Annual Bulletins as follows: (a) Aerated Waters; (b) Asbestos Products; (c) Cement; (d) Cement Products; (e) Coke and Gas; (f) Glass (blown, cut and ornamental, etc.); (g) Lime; (h) Petroleum Products; (i) Products from Domestic Clays; (j) Products from Imported Clays; (k) Salt; (l) Sand-lime Brick; (m) Dressed Stone; (n) Artificial Abrasives and Abrasive Products; (o) Miscellaneous Non-Metallic Mineral Products, including Carbon Electrodes—Gypsum Products—Mica Products—Magnesite Products—Non-Metallic Minerals, n.e.s. Also special report on the Consumption of Coke in Canada. Monthly Report on Coke Statistics.
- (9) *Chemicals and Allied Products*—Annual Report. Annual Bulletins as follows: (a) Coal Tar Distillation; (b) Acids, Alkalies and Salts; (c) Compressed Gases; (d) Explosives, Ammunition and Fireworks; (e) Fertilizers; (f) Medicinal and Pharmaceutical Preparations; (g) Paints, Pigments and Varnishes; (h) Soaps, Cleaning Preparations and Washing Compounds; (i) Toilet Preparations; (j) Inks; (k) Adhesives; (l) Polishes and Dressings; (m) Flavouring Extracts; (n) Wood Distillation; (o) Miscellaneous Chemical Products, including Baking Powder; Boiler Compounds; Cellulose Products; Insecticides; Sweeping Compounds; Disinfectants; Matches; Dyes and Colours; Chemical Products, n.e.s. Special Report on the Fertilizer Trade in Canada. Commodity Bulletins on Sulphuric Acid, Ammonium Sulphate, etc. *Special Report*—Directory of Chemical Industries in Canada, as of July 1, 1932.

PRODUCTION—concluded.

(10) *Miscellaneous Manufactures*—General Report. Annual Bulletins as follows: (a) Brooms, Brushes and Mops; (b) Musical Instruments (including pianos, organs and phonographs) and Musical Instrument Materials and Parts; (c) Buttons; (d) Beds, Springs and Mattresses.

N.B.—For statistics of Water Power and Central Electric Stations, see under heading "Public Utilities".

VIII. Construction.—(a) Building Permits—Monthly and Annual Record.**EXTERNAL TRADE (IMPORTS AND EXPORTS)**—

- (1) Annual Report of the Trade of Canada, for the fiscal year ended Mar. 31 (showing summary historical tables, analyses of current trends, detailed tables by items, group analyses according to component material, origin and degree of manufacture, and purpose, and comparisons of the volume of trade).
- (2) Condensed Preliminary Report of the Trade of Canada, for the fiscal year ended Mar. 31.
- (3) Annual Report of the Trade of Canada for the calendar year.
- (4) Advance Preliminary Statement regarding the Trade of Canada during the calendar year.
- (5) Quarterly Report of the Trade of Canada (showing statistics of imports and exports by months and cumulative quarters).
- (6) Monthly Summary of the Trade of Canada (for latest month and 12 months).
- (7) Monthly Bulletins on Trade Statistics as follows: *General*—(a) Abstract of Imports, Exports, and Duty Collected (by latest month, accrued period, and latest 12 months); (b) Summary of Canada's Imports for latest month; (c) Summary of Canada's Exports for latest month. *Special*—(d) Imports and Exports of Asbestos; (e) Imports and Exports of Footwear (except Rubber); (f) Summary, Exports of Grain and Flour; (g) Exports of Lumber; (h) Imports of Lumber; (i) Exports of Meats and Lard; (j) Imports of Meats and Lard; (k) Exports of Milk, Milk Products and Eggs; (l) Imports of Milk, Milk Products and Eggs; (m) Exports of Non-Ferrous Ores and Smelter Products; (n) Imports of Non-Ferrous Ores and Smelter Products; (o) Exports of Paints and Varnishes; (p) Imports of Paints and Varnishes; (q) Exports of Pulp Wood, Wood Pulp and Paper; (r) Exports of Rubber Goods and Insulated Wire; (s) Imports of Rubber Goods; (t) Imports of Vehicles of Iron (Automobiles, Bicycles, Railway Cars, etc.); (u) Exports of Petroleum and Its Products; (v) Imports of Petroleum and Its Products; (w) Imports of Sheet Metal Products; (x) Exports of Farm Implements and Machinery; (y) Imports of Farm Implements and Machinery; (z) Imports of Coffee and Tea.

INTERNAL TRADE—

- (1) *Retail and Wholesale Trade*.—Decennial Census of Merchandising and Service Establishments. Bulletins on the Retail Trade of Cities with a population of 10,000 and over showing number of establishments, kind of business, type of organization, employees, wages, sales, etc. Bulletins on the Retail Trade of Provinces. Bulletins on the Retail Trade of Provinces by Counties or Census Districts. Bulletin on the Retail Trade of the Dominion. Bulletins on the Wholesale Trade of the Dominion, Provinces and Chief Cities, including the business of Agents of Distribution, such as Brokers, Sales Agents, Importers, and others, as distinguished from Wholesalers Proper. Survey of Chain Stores. The analysis of these Census data includes Special Studies such as: Channels of Distribution between Manufacturer and Consumer, Hotels, Co-operative Associations, Breakdown of Commodity Sales according to Kind of Business, etc. Monthly Index Numbers of Retail Sales. Monthly Retail Sales of Automobiles. Monthly figures of Automobile Financing.
- (2) *Prices Statistics*.—Annual and Monthly Reports on Wholesale and Retail Prices and Price Indexes in Canada, the British Empire and Foreign Countries. Index Numbers of Average Cost of Living in Canada. Monthly and Weekly Index Numbers (Speculative) of Security Prices. Monthly and Weekly Index Numbers (Investment) of Security Prices. Monthly and Weekly Index Numbers of Mining Stocks. Prices and Price Index Numbers of Services (Street Cars, Telephones, Electricity, Natural and Manufactured Fuel Gas, Hospitals, Doctors' Fees, etc.). Interest and Exchange Rates. Index Numbers of Import and Export Valuations. Special Bulletin as follows: (a) Post-War Sugar Prices; (b) Post-War Prices of Raw Cottons; (c) Post-War Silver Prices; (d) Post-War Tin Prices; (e) Post-War Lead Prices; (f) Coffee Prices; (g) Post-War Rubber Prices; (h) Price Trends and Economic Conditions in Germany (May, 1927); (i) Price Trends and General Economic

INTERNAL TRADE—concluded.

- Conditions in France (May, 1927); (j) Price Trends and General Economic Conditions in Great Britain (May, 1927); (k) Wholesale Prices in the British Empire and Foreign Countries, and Exchange Rates in 1925 (with reference to important trade tendencies in the leading countries); (l) Trend of Commodity Prices in Canada, Past and Future; (m) Recent Movements in Canadian Living Costs; (n) Exchange, 1931; (o) Price Movements, 1932.
- (3) *Capital Movements*.—Annual Records and Estimates of Capital Investments by Foreigners in Canada and of Canadian Investments in Foreign Countries.
 - (4) *Record of Branch Plant Development in Canada*.—Lists of New Concerns Locating in Canada in Recent Years. Bulletin on Branch and Subsidiary Industries in Canada.
 - (5) *Balance of International Payments*.—Compilation of Canada's Annual Balance of Payments. Estimation of the Invisible Items in Canada's Trade Balance (Receipts and Payments for Interest, Freight, Insurance, Non-Commercial Remittances, Government Expenditures, Capital of Immigrants and Emigrants, etc.).

TRANSPORTATION, COMMUNICATIONS AND PUBLIC UTILITIES—

- (4) *Bank Debits*.—Monthly and Annual Reports of Bank Debits to Individual Accounts at the Clearing-House Centres of Canada.
- (5) *Business Statistics*.—The Monthly Review of Business Statistics (a statistical summary, with charts and text, of current economic conditions in Canada). Special Report—Twelve Years of the Economic Statistics of Canada, 1919-30. Monthly Indexes of the Physical Volume of Business in Canada, 1919-32.
- (6) *Divorce*.—Annual Report.
- (7) *Liquor Control*.—Annual Report on the Control and Sale of Liquor.
- (8) *Tourist Trade*.—Annual Report.
- (9) *The Canada Year Book*.—The official statistical annual of the Physiography, Resources, History, Institutions and Social and Economic Conditions of the Dominion, with a Statistical Summary of the Progress of Canada, maps, diagrams, etc.

Contents: I. Physical Characteristics of Canada (Geographical Features; Geological Formation; Seismology; Flora; Faunas; Natural Resources; Climate and Meteorology). II. History and Chronology. III. Constitution and Government (Constitution and General Government of Canada; Provincial and Local Government in Canada; Parliamentary Representation in Canada). IV. Population (Growth and Distribution). V. Vital Statistics. VI. Immigration. VII. Survey of Production. VIII. Agriculture. IX. Forestry. X. Fur Trade. XI. Fisheries. XII. Mines and Minerals. XIII. Water Powers. XIV. Manufactures. XV. Construction. XVI. External Trade. XVII. Internal Trade. XVIII. Transportation and Communications (Government Control over Transportation and Communications; Steam Railways; Electric Railways; Express Companies; Roads and Highways; Motor Vehicles; Air Navigation; Canals; Shipping and Navigation; Telegraphs; Telephones; Radio; Post Office). XIX. Labour and Wages. XX. Prices. XXI. Public Finance (Dominion Public Finance; Provincial Public Finance; Municipal Public Finance; National Wealth and Income). XXII. Currency and Banking; Loan and Trust Companies. XXIII. Insurance (and Government Annuities). XXIV. Commercial Failures. XXV. Education. XXVI. Public Health and Benevolence. XXVII. Judicial and Penitentiary Statistics. XXVIII. Miscellaneous Administration (Public Lands; National Defence; Public Works, etc.). XXIX. Sources of Official Statistical and Other Information Relative to Canada. XXX. The Annual Register (Dominion Legislation; Principal Events of the Year; Extracts from *The Canada Gazette*, re Official Appointments, Commissions, etc.). Appendices.

(Issues of the Canada Year Book for 1921, 1924, 1926, 1930, 1931 and 1932 are available.)

- (10) *Canada*.—The Official Handbook of Present Conditions and Recent Progress, published annually.

Section 2.—Acts Administered by Dominion Departments.

List of the Principal Acts of Parliament administered by Departments of the Government of the Dominion of Canada, as compiled from information supplied by the respective Departments.

(Numbers within parentheses, unless otherwise indicated, denote chapters of the Revised Statutes of Canada, 1927—R.S.C., 1927.)

Note.—Copies of individual Acts of Parliament may be obtained from the King's Printer at prices of from 10 cents to \$1 per copy according to number of pages.

Agriculture.—Experimental Farm Stations (61); Fruit (80); Dairy Industry (45); Cold Storage (25); Seeds (185); Feeding Stuffs (67); Live Stock Pedigree (121); Live Stock and Live Stock Products (120); Animal Contagious Diseases (6); Meat and Canned Foods (77); Destructive Insect and Pest (47); Fertilizers (69); Root Vegetables (181); Section 235, Criminal Code (Race Track Betting) (36); Inspection and Sale (100); Maple Sugar Industry (20-21 Geo. V, c. 30); Agricultural Pests Control (5).

Auditor General.—Consolidated Revenue and Audit (21-22 Geo. V, c. 27).

Civil Service Commission.—Civil Service (22), as amended 1932, c. 40.

External Affairs.—The functions and duties of this Department are defined by the Department of External Affairs Act (65) and by the International Boundary Waters Treaty Act, 1911 (1-2 Geo. V, c. 28), as amended by the Statute of April 3, 1914 (4 Geo. V, c. 5).

Finance.—Appropriation; Bank (12); Bills of Exchange (16); Board of Audit (10); Canadian Farm Loan (66); Civil Service Superannuation (24); Consolidated Revenue and Audit (21-22 Geo. V, c. 27); Contingencies (31); Currency (40); Dept. of Finance and Treasury Board (71); Dominion Notes (41); Federal District Commission (Stats. 1926-27, c. 55); Finance (70); Interest (102); Ottawa Mint (134); Penny Bank (13); Provincial Subsidies (192); Quebec Savings Banks (14); Special War Revenue (179) (in part); Gold Export (1932, c. 33).

Fisheries.—Fisheries (73); Fish Inspection (72); Meat and Canned Foods (77) (so far as it relates to fish or shellfish); Deep Sea Fisheries (74); Northern Pacific Halibut Fishery Protection (75); Pelagic Sealing (153); Customs and Fisheries Protection (43) (in part); Navigable Waters Protection (140) (in part); The Biological Board Act (18) is also administered by the Minister of Fisheries.

Immigration.—The Immigration Act and Regulations, 1910 (93); the Chinese Immigration Act and Regulations, 1923 (95).

Indian Affairs.—Indian (98).

Insurance.—Department of Insurance (22-23 George V, c. 45); Canadian and British Insurance Companies, 1932 (22-23 George V, c. 46); Foreign Insurance Companies, 1932 (22-23 George V, c. 47); Loan Companies (28); Trust Companies (29).

Interior.—Forest Reserves and Parks Act (78); Seed Grain Act (87); Seed Grain Sureties (88); Department of the Interior Act (103); Irrigation Act (104); Dominion Lands Act (113); Public Lands Grants Act (114); Ordnance and Admiralty Lands Act (115); Railway Belt Act (116); Dominion Lands Survey Act (117); Land Titles Act (118); Manitoba Supplementary Provisions Act (124); Migratory Birds Convention Act (130); Northwest Game Act (141); Northwest Territories Act (142); Reclamation Act (175); Saskatchewan and Alberta Roads Act (180); Soldier Settlement Act (188); Dominion Water Power Act (210); Railway Belt Water Act (211); Yukon Act (215); Yukon Placer Mining Act (216); Yukon Quartz Mining Act (217); Lac Seul Conservation Act (18-19 George V, c. 32); The National Parks Act (20-21, George V, c. 33).

Justice.—Department of Justice (106); Solicitor-General's (107); Northwest Territories (142); Yukon (215); Royal Canadian Mounted Police (160); Judges (105); Supreme Court (35); Exchequer Court (34); Admiralty (33); Petition of Right (158); Criminal Code (36); Penitentiary (154); Prisons and Reformatories (163); Identification of Criminals (38); Ticket of Leave (197); Fugitive Offenders (81); Extradition (37); Juvenile Delinquents (108).

King's Printer and Controller of Stationery.—Public Printing and Stationery (162); The Publication of Statutes (2).

Labour.—Labour Department (111); Conciliation and Labour (110); Industrial Disputes Investigation (112); Fair Wages Resolution of the House of Commons, 1900; Employment Office Co-ordination (57); Technical Education (193), as amended 1929, c. 8; The Vocational Education Act, 1931 (21-22 Geo. V, c. 59); Government Annuities (as amended by Geo. V, c. 33) (7); Combines Investigation (26); Old Age Pensions (156) (as amended by 21-22 Geo. V, c. 42); White Phosphorus Matches (128); Fair Wages and Eight-Hour Day (20-21 Geo. V, c. 20); Unemployment Relief, 1930 (21 Geo. V, c. 1); Unemployment and Farm Relief Act, 1931 (21-22 Geo. V, c. 58); Relief Act, 1932 (22-23 Geo. V, c. 36).

Marine.—Government Harbours, Piers and Breakwaters (89); Shipping of Live Stock (122); Marine and Fisheries Department (125); Maritime Conventions (126); Navigable Waters' Protection (140); Quebec Harbour and River Police (169); Canada Shipping (186); Radiotelegraph (195); Government Vessels Discipline (203); Belleville Harbour Commission (1889, c. 35); Halifax Harbour Commission (1927, c. 58); Hamilton Harbour Commission (1912, c. 98); Montreal Harbour Commission (1894, c. 48; 1909, c. 24; 1912, c. 35; 1913, c. 32; 1914, c. 42); North Fraser Harbour Commission (1913, c. 162); New Westminster Harbour Commission (1913, c. 158); Quebec Harbour Commission (1899, c. 34) (1905, c. 33); Saint John, N.B., Harbour Commission (1927, c. 67); Three Rivers, Que., Harbour Commission (1923, c. 71); Trenton, Ont., Harbour Commission (1922, c. 50); Toronto Harbour Commission (1911, c. 26); Vancouver Harbour Commission (1913, c. 54); Winnipeg and St. Boniface Harbour Commission (1912, c. 55); Chicoutimi Harbour Commission (1926, c. 6).

Mines.—Geology and Mines (83); Explosives (62); The Domestic Fuel (17 Geo. V, c. 52).

National Defence.—Department of National Defence Act (136); Naval Service Act (139); Naval Discipline Act; Militia Act (132); Militia Pensions Act (133); Royal Military College Act (18-19 Geo. V, c. 7); Sec. 85 and 86 Criminal Code; Army Act; Regimental Debts Act; Aeronautics Act (3); Air Force Act; Visiting Forces, British Commonwealth, 1933.

National Revenue.—Customs Tariff (44); Customs (42); Canada Shipping (in part) (186); Animal Contagious Diseases (in part) (6); Destructive Insect and Pest (in part) (47); Export (63); Copyright (in part) (32); Petroleum and Naphtha (159); Excise (60); Special War Revenue, 1915 (179); Income War Tax, 1917 (97); Agricultural Pests Control (in part) (5); Customs and Fisheries Protection (in part) (43); Explosives (in part) (62).

Pensions and National Health.—*Pensions*—Department of Pensions and National Health (Part I) (18-19 Geo. V, c. 39); War Veterans' Allowance (20-21 Geo. V, c. 48); Pension (157); Returned Soldiers' Insurance (10-11 Geo. V, c. 54, and Amendments). The two latter Acts are adjudicated upon by the Board of Pension Commissioners. *National Health*.—Department of Pensions and National Health (Part II) (18-19 Geo. V, c. 39); Quarantine (168); Public Works Health (91); Leprosy (119); Canada Shipping (Sick and Distressed Mariners) (186); Proprietary or Patent Medicine (151); Opium and Narcotic Drug (144); Food and Drugs (including Honey Act) (76).

Post Office.—Post Office (161); Special War Revenue (in part) (179).

Public Works.—Public Works (166); Government Harbours and Piers (s. 589); Navigable Waters Protection (140); Telegraphs (194); Dry Dock Subsidies (191); Act to authorize the payment of a subsidy to the Collingwood Shipbuilding Co., Ltd. (2 Geo. V, 1912, c. 17); Government Works Toll Act (167); Act to incorporate the National Gallery of Canada (3-4 Geo. V, 1913, c. 33); Act to authorize the payment of a subsidy to the Western Dry Dock and Shipbuilding Co., Ltd. (3-4 Geo. V, 1913, c. 57); Act to extend an Agreement for one year between His Majesty the King and the Corporation of the City of Ottawa (22-23 Geo. V, c. 11); Ferries Act (68), transferred by Order in Council, June 3, 1918, for administration by Public Works Department. Act Regulating Vehicular Traffic on Dominion Property (20-21 Geo. V, c. 47).

Railways and Canals.—Department of Railways and Canals (171); Government Railways (173); Intercolonial and P.E.I. Railway Employees' Provident Fund (6-7 Edw. VII, c. 22 and amending Acts); Acts to amend the National Transcontinental Railway Act (4-5 Geo. V, c. 43 and 5 Geo. V, c. 18); Canadian National Railways (172) and amending Acts 1918, c. 13; 1929, c. 10 and 1931, c. 6; Canadian National Railway Branch Lines (14-15 Geo. V, cc. 14-32; 15-16 Geo. V, cc. 5, 6 and 7; 17 Geo. V, cc. 12-28; 18-19 Geo. V, cc. 18-36); Government Employees Compensation (30) and amending Act, 1931, c. 9; Canadian National Refunding, 1927 (17 Geo. V, c. 27); The Canadian National Refunding Act, 1929 (19-20 Geo. V, c. 11); Canadian National (Central Vermont) Financing, 1930 (20-21 Geo. V, c. 7); Canadian National Refunding, 1930 (20-21 Geo. V, c. 8); Grand Trunk Pacific Securities, 1927 (17 Geo. V, c. 7); Canadian National Steamships, 1927 (17 Geo. V, c. 29); Canadian National Railways Pension Act (19-20 Geo. V, c. 4); Canadian National Montreal Terminals Act, 1929 (19-20 Geo. V, c. 12); Maritime-Freight Rates Act (79).

The "Railway Act" (Companies) confers certain powers upon the Minister of the Department. In the case of subsidized railways, the authorizing Acts are carried out under the Department, which also has certain jurisdiction where Government guarantee has been given.

Secretary of State.—Companies (27); Naturalization (138); Patents (150); Copyright (32); Unfair Competition (22-23 Geo. V, c. 38); Canada Temperance (196); Boards of Trade (19); Ticket of Leave (197); Trade Unions (202); Treaties of Peace.

Trade and Commerce.—Canada Grain (86) (20-21 Geo. V, c. 5); Copper Bars and Rods Bounty (13-14 Geo. V, c. 40); Electricity and Fluid Exportation (54); Electricity Inspection (55); Electric Units (56); Gas Inspection (82); Hemp Bounty (13-14 Geo. V, c. 50); Inland Water Freight Rates (208); Precious Metals Marking (84) (18-19 Geo. V, c. 40) (19-20 Geo. V, c. 53); Statistics (190); Weights and Measures Inspection (212); Act to place Canadian Coal used in the Manufacture of Iron or Steel on a Basis of Equality with Imported Coal (20-21 Geo. V, c. 6).

Section 3.—Publications of Dominion Departments.

List of Principal Publications of the Departments of the Government of the Dominion of Canada as Compiled from Information Supplied by the respective Departments.

Note.—A catalogue of the official publications of the Parliament and Government of Canada, stating prices, is issued regularly once a year with supplements when required; copies may be obtained from the King's Printer, Ottawa.

Agriculture.—Annual Reports of the Minister, of the Experimental Farms and Stations and of the Veterinary Director-General. Bulletins, pamphlets and circulars of the Experimental Farms Branch on a great variety of agricultural subjects, including publications of the following Divisions: Field Husbandry; Animal Husbandry; Horticulture; Cereal; Chemistry; Forage Plants; Botanical; Poultry; Tobacco; Economic Fibre; Bacteriology; Bees; and Illustration Stations. Bulletins of the Dairy and Cold Storage Branch relating to the dairying and cold storage industries in Canada, the making of butter and cheese, dairying experiments, co-operation, etc. Reports, bulletins, pamphlets, etc., of the Live Stock Branch on sheep, swine, poultry, marketing of eggs, wool, etc. Bulletins of the Health of Animals Branch, with Regulations as to contagious abortion; rabies; sheep

scab; actinomycosis; anthrax; glanders; hog cholera; maladie du coft; tuberculosis; foot-and-mouth disease; quarantine; and meat inspection. Bulletins and reports of the Seed Branch as to seed-testing, the production and use of seed grains, the Seed Control Act, the Feeding Stuffs Act and the Fertilizers Act. Bulletins and circulars of the Entomological Branch, Household insects, Vegetable insects, Locust control, etc., and instructions to importers of nursery stock. Reports of the Canadian Seed Growers' Association. Fodder and Pasture Plants, by George H. Clark, B.S.A., and M. Oscar Malte, Ph.D., 143 pages, 27 plates, price \$1. Farm Weeds, by Clark and Fletcher, 180 pages, noxious weeds and seeds in natural colour, price \$2.

Dominion Experimental Farms.—(1) Report of the Director (contains summary of reports of Divisions, Farms and Stations); (2) Animal Husbandry Division; (3) Bee Division; (4) Botanical Division; (5) Chemistry Division; (6) Field Husbandry Division; (7) Illustration Stations Division; (8) Poultry Division; (9) Tobacco Division; (10) Horticultural Division; (11) Cereal Division; (12) Forage Crops Division; (13) Economic Fibre Division and (14) Division of Bacteriology. **Experimental Farms and Stations Reports.**—Agassiz, B.C.; Indian Head, Sask.; Nappan, N.S.; Charlottetown, P.E.I.; Invermere, B.C.; Sidney, B.C.; Brandon, Man.; Morden, Man.; Cap Rouge, Que.; Scott, Sask.; Swift Current, Sask.; Kapuskasing, Ont.; La Ferme, Que.; Kentville, N.S.; Leavenworth, Que.; St. Anne de la Pocatière, Que.; Rosthern, Sask.; Lethbridge, Alta.; Lacombe, Alta.; Summerland, B.C.; Farnham, Que.; Fredericton, N.B. **Experimental Sub-Stations.**—Beaverlodge, Alta.; Fort Vermilion, Alta.; Fort Resolution, N.W.T.; Salmon Arm, B.C.; Fort Providence, N.W.T.; Betsiamites, Que.; Fort Smith, N.W.T.

A pamphlet entitled "List of Publications" contains a list of the publications of the Department, numbering more than 400. These publications include, in addition to the reports, bulletins and pamphlets, on field crops, live stock, dairying, orchard and garden insect and plant diseases, poultry, household and miscellaneous topics. With few exceptions, the publications of the Department are free on application to its Publications Branch.

Auditor General.—Annual Report.

Board of Railway Commissioners for Canada.—Annual Report. Pamphlet containing Judgments, Orders, Regulations and Rulings, issued fortnightly.

Civil Service Commission.—Annual Report, including lists of permanent appointments, promotions and transfers; Classification of the Civil Service of Canada, revised up to Dec. 1, 1930; Regulations of the Civil Service Commission; How Appointments are made in the Public Service; Examinations for Clerks, Stenographers and Typists; Examinations for Customs Service; Examinations for Postal Service; Examinations for Junior Trade Commissioners.

Dominion Fuel Board.—The Dominion Fuel Board was created in 1922 primarily to instigate a thorough study of the underlying causes of recurring fuel shortages in Canada and of the methods by which they may be counteracted. It is composed of officers of the Departments of Mines and of the Interior, and the co-operation of both Departments is given to the Board in its investigations. The following reports and publications have been issued: Interim Report of the Dominion Fuel Board, 1923; Central and District Heating—Possibilities of Application in Canada, by F. A. Combe, 1923; Coke as a Household Fuel in Central Canada, by J. L. Landt, 1925; Smoky River Coal Field, by James McEvoy, 1925; Why You Should Insulate Your Home, by G. D. Mallory, 1927; Dominion Fuel Board, Second Progress Report, 1928; Humidity in House Heating, by E. S. Martindale, 1929; Cards bearing instructions on "How to Burn Coke".

Publications of Mines Branch, Department of Mines, in co-operation with Dominion Fuel Board.—Coking experiments on Coals from the Maritime Provinces, by B. F. Haanel and R. E. Gilmore, 1926; Tests of Various Fuels to Determine their Relative Heating Efficiency, by E. S. Malloch and C. E. Baltzer, 1927; Instructions for Burning Coal, Coke and Peat, 1927; Industrial Fuel and Power Statistics for Ontario, Calendar Year 1925, by E. S. Malloch and C. E. Baltzer, 1928.

Publication of the National Development Bureau, Department of the Interior, in co-operation with Dominion Fuel Board.—The Insulation of New and Old Houses, by G. D. Mallory, 1932.

External Affairs.—Annual Report, Annual Treaty Series.

Finance.—Annual Report on the Public Accounts of the Dominion of Canada. Monthly Statements of the Chartered Banks of Canada. Estimates.

Fisheries.—(Publications marked * are available in either English or French.)

* Annual Report including Fish Culture Report. Annual Statistical Report (contains both English and French sections). Fish Culture Report (separately). A Popular Account of Some Canadian Fishes—A. Halkett. *Canada's Fisheries. Map of the Atlantic Coast Provinces showing fishing grounds. Statistics of the Haddock Fishery in North American Waters—A. W. H. Needler. Statistics of the Cod Fishery—O. E. Sette. Fisheries Investi-

gation in Hudson and James Bays in 1914—Melville, Lower and Comeau. Discoloration, Smut or Blackening of Canned Lobsters—Harrison and Hood. Historical Account of the Lobster Canning Industry—R. H. Williams. *Fish Canning in Canada. Fish and Chip Shops. *Fisheries News Bulletin (monthly). Quarterly Bulletin of Sea Fisheries Statistics. *The Salmon Fishery of British Columbia. Report on Fisheries Investigations in Hudson Bay, 1930. *Summary of the Report by Messrs. Cockfield, Brown and Company, Ltd., on the Marketing of Canadian Fish and Fish Products. *Oyster Farming on the Atlantic Coast of Canada. Hardening Mud Bottoms for Oyster Culture (mimeographed bulletin). *Red Discoloration of Cured Codfish. *Factors in the Shipment of Live Lobsters from Eastern Nova Scotia. Investigation into the Natural History of the Herring—Hjort. Fish and How to Cook It (cook book, price 10c).

Various reports and bulletins of the Biological Board of Canada, dealing with fisheries research, are also available for distribution by the Department of Fisheries, but it is necessary that in asking for papers of this group applicants should indicate explicitly the particular research questions in which they are interested.

Geographic Board of Canada.—18th Report, containing all decisions to Mar. 31, 1924; 19th Report, containing all decisions from April 1, 1924, to July 31, 1927, with supplement numbers 1 to 12. "Place-Names of Alberta", 1928, 25c.; "Place-Names of Manitoba", 1931; "Meaning of Canadian City Names", 1922; "Place-Names on Magdalen Islands, Quebec", 1922; "Place-Names of Prince Edward Island with Meanings", 1925, 25c.; "Place-Names in Thousand Islands, St. Lawrence River", 1910; "Place-Names on Anticosti Island, Quebec", 1922; Catalogue and Graphical Index of Maps in the Geographic Board Library, two volumes, 1922, supplement, 1925.

Indian Affairs.—Annual Report. Indian Act, (c. 33, R.S.C., 1927). Schedule of Indian Reserves, 1928, price \$1. Indian Treaties and Surrenders, Vols. I, II, III, price \$15. Census of Indians in Canada, 1929.

Insurance.—Quarterly Statement showing List of Registered Companies. Annual Abstract of Statements of Insurance Companies in Canada (subject to correction). Annual Reports of the Insurance Department, Vol. I (Fire and Miscellaneous), Vol. II (Life Companies and Fraternal Benefit Societies). Annual List of Securities held by Insurance, Trust and Loan Companies in Canada, with Department's Valuation thereof. Abstract of Statements of Loan and Trust Companies in Canada. Annual Report of Loan and Trust Companies incorporated by the Dominion.

Interior.—Annual Report. The Department of the Interior issues publications dealing with the work of the following branches: National Parks Branch, including Historic Sites, Migratory Birds, and Tourist Information Bureau. Dominion Forest Service. Topographical and Air Survey Bureau. Dominion Water Power and Hydrometric Bureau. Geodetic Survey of Canada. International Boundary Commission. Dominion Lands Administration, including Northwest Territories and Yukon. Dominion Observatory, Ottawa. Dominion Astrophysical Observatory, Victoria. The publications of the Department were published in detail at pp. 970-978 of the 1932 Year Book. Reports on the work of the above branches may be had, if available, upon application to the Department, Ottawa, Canada.

International Boundary Commission.—*Reports.*—Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the source of the St. Croix River to the St. Lawrence River, 1925, \$5; Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the Western Terminus of the Land Boundary along the 49th Parallel, on the west side of Point Roberts, through Georgia, Haro and Juan de Fuca Straits, to the Pacific Ocean, 1921, with accompanying chart, \$5; Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada along the 141st Meridian from the Arctic Ocean to Mount St. Elias, 1913, \$5; Report of the International Waterways Commission upon the International Boundary between the Dominion of Canada and the United States, through the River St. Lawrence and the Great Lakes, 1915, with full set of 30 maps, \$7.50; Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the Northwesternmost Point of Lake of the Woods to Lake Superior, \$5. *Maps.*—From the source of the St. Croix River to the Atlantic Ocean, 18 sheets except sheet No. 13, not yet printed; various scales, sizes 26 by 38 inches, 50c. each; from the St. Lawrence River to the source of the St. Croix River, 61 sheets and index sheet, various scales, 26 by 38 inches, 50c. each; from the St. Lawrence River at St. Regis to the head of Pigeon Bay in Lake Superior, 29 sheets and index sheet, International Waterways Commission, various scales 29½ by 36 inches, 25c. each; Northwesternmost Point of Lake of the Woods to the head of Pigeon Bay in Lake Superior, 36 sheets and index sheet, various scales, 26 by 38 inches, 50c. each; 49th Parallel, Northwesternmost Point of the Lake of the Woods to Point Roberts, 59 sheets, index and profile sheets, scale 1:62,500, size 15 by 30 inches, sheets 1 to 19, 50c. each, sheets 20 to 59, 25c. each; west side of Point Roberts through Georgia, Haro and Juan de Fuca Straits to the Pacific Ocean, 1 sheet, scale 1:200,000, 28 by 41 inches, 50c.; Cape Muzon to

Mount St. Elias, 13 sheets 25 by 29 inches, scale 1:250,000, sheets 1 and 2 not yet published, 50c. each; Preliminary Map—Head of Portland Canal to Stikine River, scale 1:250,000, 24 by 33 inches, 25c. each; 141st Meridian from the Arctic Ocean to Mount St. Elias, 30 sheets, scale 1:62,500 with profile sheets, index sheet and special Arctic Coast sheet, size 18 by 27½ inches, 25c. each; Mount St. Elias to White River Sheet, scale 1:250,000, size 19 by 28 inches, 25c.

These reports or maps may be obtained on application to the International Boundary Commission, Department of Interior, Ottawa. Cheques should be made payable to the Receiver General of Canada.

Justice.—Annual Report of the Superintendent of Penitentiaries.

King's Printer and Controller of Stationery.—The *Canada Gazette*, published weekly, with occasional supplements and extras; subscription in Canada and United States, \$8 per annum payable in advance, single copies 20c. each, other countries \$10 per annum and 25c. per single copy. Judgments of the Board of Railway Commissioners, semi-monthly, \$3 per annum, single copies, 20c. Canada Law Reports, published monthly, yearly subscriptions, \$6. Revised Statutes of Canada, 1927 (5 vols.), \$10. Annual Statutes, 1928-32, \$5 each. Acts, Public and Private, with Amendments to date, 10c. to \$1 per copy. Canadian Postal Guide, \$1 paper cover, \$1.50 cloth cover; including supplements, additional 25c. Parliamentary Debates, "Hansard", issued daily during session, French and English, \$3 per session each for House of Commons and Senate Debates; single copies, 5c. Prices of bluebooks are in nearly every case printed upon the front cover and are based practically on cost. They may be ordered direct from the King's Printer, Ottawa. A catalogue of official publications of the Parliament and Government of Canada is issued regularly once a year with supplements when required and copies may be obtained from the King's Printer, Ottawa.

Labour.—*Monthly.*—The *Labour Gazette* (published in English and French) at a subscription price of 20c. per annum. *Annually.*—Report of the Department of Labour (including: Reports of Proceedings under the Industrial Disputes Investigation Act, Conciliation and Labour Act, Employment Offices Co-ordination Act, Technical Education Act, Government Annuities Act, Combines Investigation Act, Old Age Pensions Act, Fair Wages and Eight-Hour Day Act, Unemployment Relief Act, 1930, and Unemployment and Farm Relief Act, 1931). Labour Legislation in Canada as existing on Dec. 31, 1928 (a supplementary report thereto on Labour Legislation is published annually in February or March). Labour Organization in Canada. Organization in Industry, Commerce and the Professions in Canada. Wages and Hours of Labour in Canada. Prices in Canada and other Countries. Strikes and Lockouts in Canada and other Countries. *General Reports.*—Report of Royal Commission on Industrial Relations, bound with Report of Proceedings and Discussions of National Industrial Conference, 1919. Hours of Labour in Canada and other Countries, 1923. Report of Commissioner appointed under Order in Council (P.C. 1929), Sept. 22, 1923, to inquire into the Industrial Unrest among the Steel Workers at Sydney, N.S. Report of Provincial Royal Commission on Coal-Mining Industry in Nova Scotia, January, 1926. Judicial Proceedings respecting Constitutional Validity of the Industrial Disputes Investigation Act, 1907, and Amendments of 1910, 1918, 1920 and 1925. Legal Status of Women in Canada. The Employment of Children and Young Persons in Canada. *Reports of Investigations under the Combines Investigation Act.*—(1) Investigation into Alleged Combine in the Distribution of Fruits and Vegetables in Western Canada, 1925; (2) Investigation into Alleged Combine amongst Coal Dealers at Winnipeg and other places in Western Canada, 1925; (3) Investigation into Alleged Combine limiting Competition in the Marketing of New Brunswick Potatoes, 1925; (4) Investigation into Alleged Combine in the Manufacture and Sale of Bread in the City of Montreal, 1926 (out of print); (5) Investigation into Alleged Combine in the Distribution of Fruits and Vegetables produced in Ontario, 1926; (6) Investigation by Registrar into the Proprietary Articles Trade Association, 1926; (7) Investigation by Commissioner into the Proprietary Articles Trade Association, 1927; (8) Report of the Commissioner on the Amalgamated Builders' Council, 1929; (9) Report of Commissioner on the Electrical Estimators' Association, 1930; (10) Report of Registrar into Alleged Combine in the Bread-Baking Industry in Canada, 1931; (11) Report of Commissioner on Alleged Combine in the Motion Picture Industry in Canada. *Bulletins in Industrial Relations Series.*—(1) Joint Councils in Industry; (2) Report of a Conference on Industrial Relations, 1921; (3) Joint Conference of the Building and Construction Industries in Canada; (5) Canada and the International Labour Conference; (7) Canadian Railway Board of Adjustment, No. 1, Second Report; (8) National Conference Regarding Winter Employment in Canada; (9) Canadian Railway Board of Adjustment, No. 1, Third Report; (10) Canadian Railway Board of Adjustment, No. 1, Fourth Report; (11) Government Intervention in Labour Disputes in Canada.

Marine.—Annual Report. List of Canadian Shipping. Reports of Expeditions to Hudson Bay, Northern Waters and Arctic Archipelago. Canadian Port Directory. List of Lights, etc., in Canada: (a) Pacific Coast; (b) Atlantic Coast; (c) Inland Waters.

Charts and Publications of the Canadian Hydrographic Service.—Catalogue of Marine Charts, Sailing Directions, Tidal Information and other Canadian Government publica-

tions of interest to mariners (free). *Pilots*.—(price \$1 per copy payable in advance by P.O. order, express order or marked cheque, only) St. Lawrence Pilot (below Quebec), comprising sailing directions from cap des Rosiers to Quebec, 5th edition, 1929. Supplement No. 2 to above, 1933. St. Lawrence River Pilot, Quebec to Montreal and Richelieu River, 1931. Supplement No. 1 to the above, 1933. St. Lawrence Pilot, Montreal to Kingston and Ottawa River, 1933. Great Lakes Pilot Vol. I (Lake Huron & Georgian Bay) 1933. Great Lakes Pilot, Vol. II (Lakes Ontario, Erie and St. Clair and Welland Canal, Niagara, Detroit and St. Clair Rivers, 1933). Sailing directions for the Canadian shores of lake Superior, 1st edition, 1922. Supplement No. 2 to the above, 1931. Sailing directions for lake Melville and approaches (Coast of Labrador), 1931. Sailing directions for The Hudson Bay route, 1933. British Columbia Pilot, Vol. I, southern portion of the coast of British Columbia from Juan de Fuca strait to cape Caution including Vancouver I. and inner passages, 1st edition 1933. British Columbia Pilot, Vol. II, northern portion of the coast of British Columbia from cape Caution to Portland inlet and Queen Charlotte islands, 1st edition, 1930. Navigating charts. *Reports of the International Waterways Commission*.—On the International Boundary Line through the St. Lawrence river, Great Lakes and connecting waters, 1915. *Tidal and Current Survey Reports*.—(issued free of charge)—Currents in the gulf of St. Lawrence including the Anticosti region, Cabot strait and Northumberland strait. Currents of the southeastern coasts of Newfoundland (out of print). Currents in Belle Isle strait (temporarily out of print). Currents in the entrance to the St. Lawrence estuary. Tables of hourly directions and velocity of currents and time of slack water in the bay of Fundy. Tide levels and datum planes on the Pacific coast of Canada. Tide levels and datum planes in Eastern Canada; giving the levels in 86 harbours and other localities. Tides at the head of the bay of Fundy, with diagrams. Tidal investigations and results; Arctic tides, with map. Tides and tidal streams; a general description of the various types of tide and the behaviour of currents, with plates. Temperatures and densities of the waters of Eastern Canada, with maps. *Tide Tables*.—(issued free of charge) Tide tables for the Pacific coast of Canada including: Juan de Fuca strait, the strait of Georgia, and the northern coast with data for slack water in the navigable passes and narrows and information on currents. Tide Tables for the Atlantic coast of Canada, including: the river and gulf of St. Lawrence, the Atlantic coast, the bay of Fundy, Northumberland strait, Cape Breton, Magdalen Is., etc. Abridged edition for Quebec, Father point and the St. Lawrence river. Abridged edition for Saint John, N.B., and the bay of Fundy (with time of high water at Windsor, N.S.). Abridged edition for Halifax, N.S. and Sydney, N.S. Abridged edition for Charlottetown, P.E.I., Pictou, N.S., St. Paul I. with tidal differences for north shore of Prince Edward I., Sydney, Northumberland strait, Cape Breton, Magdalen Is., etc. Abridged edition for Vancouver, Sand Heads and the strait of Georgia, B.C. Abridged edition for Prince Rupert, B.C., with tidal differences for the northern coasts of British Columbia. Slack water tables for the strait of Canso and Great Bras d'Or lake, N.S. Slack water tables for first Narrows, Vancouver harbour, Active pass and Turn point, B.C. (Mimeograph copies of tide tables for Churchill harbour, Port Nelson, Hudson bay and Moosonee, Moose River, James bay.)

Charts of the Canadian Hydrographic Survey.—(Price 50 cents each.) Nearly four hundred charts and plans are published of the Atlantic coast and its harbours, Hudson bay, Hudson strait and harbours and anchorages, the St. Lawrence river, the Ottawa river, lake Ontario and harbours, lake Erie and harbours, lake Huron and Georgian bay and harbours, lake Superior and harbours, lake of the Woods, lake Winnipeg, Nelson river, Great Slave lake, Pacific coast and harbours. There is also a number of International Waterways Commission charts, not intended for navigation.

Radiotelegraph Branch.—Maps showing the Radiotelegraph and Radiotelephone coast stations in the Dominion of Canada. Postmaster-General's Handbook for Radiotelegraph Operators (Instructions re handling of traffic, etc.). Radiotelegraph Act and Regulations issued thereunder. Circular letter to Canadian Broadcast Listeners re Interference from the Regenerative Receiving Set. Official List of Radio Stations in Canada (price 25 cents).

Mines.—The scientific and investigatory work of the Department of Mines, which is chiefly concerned with the development of the Dominion's mineral industries, is carried on by the Department's four principal branches—the Geological Survey, the Mines Branch, the National Museum of Canada and the Explosives Division.

The Geological Survey carries on areal and economic investigations and research work in geology and mineralogy; the Mines Branch carries on field, laboratory, and industrial investigations covering the various phases of the mining and metallurgical industries from the primary occurrence of the ores to the utilization of the finished products; the National Museum of Canada carries on scientific investigations in all branches of natural history; and the Explosives Division, under the provisions of the Explosives Act (R.S.C., 1927, c. 82) has supervision of the manufacture, testing, storage and importation of explosives and issues the licences and permits authorized by the Act.

The Department of Mines publishes an annual administrative report covering the activities of the whole Department, and occasional pamphlets illustrating the services rendered the mining and metallurgical industries. Each of the branches publishes annual reports in addition to memoirs and bulletins on special investigations and districts.

The Geological Survey Branch.—From 1842 to 1904, published annual volumes. From 1904 to 1910, upwards of 80 reports were issued, all separately. Since then the publications have consisted of memoirs and bulletins appearing at irregular intervals, an annual summary report and miscellaneous publications, including geological and topographical maps, geological guide books and handbooks. The subjects dealt with include areal and economic geology of particular districts, mineralogy, palæontology and related topics. In 1926 the first volume of a new Economic Geology Series was published, and further volumes of this series have since been issued. A list of the reports published by this branch may be obtained on application to the Director, Geological Survey, Ottawa.

The National Museum of Canada has published a series of *Museum Bulletins* in many branches of natural history. A list of these may be obtained on application to the Director, National Museum of Canada, Ottawa.

The Mines Branch, since its inception in 1908, has published annual summary reports covering the investigations of the Divisions of Mineral Resources, Ore Dressing and Metallurgy, Fuels and Fuel Testing, Ceramic and Road Materials and Chemistry. More detailed and comprehensive reports have also been published by this branch, dealing with the technology of most of the economic minerals of Canada. A list of the Mines Branch reports may be had on application to the Director, Mines Branch, Ottawa.

The Explosives Division has published annual reports since 1919 and a number of pamphlets on the proper care and handling of explosives. Copies may be obtained on application to the Chief Inspector of Explosives, Department of Mines, Ottawa.

The publications of the Department of Mines cover all phases of mining from preliminary explorations and surveys of unmapped territory through the mining, milling, smelting and refining of the ores to the marketing and utilization of the finished product. Most of these reports and maps may be obtained free of charge by those interested on application to the Deputy Minister of Mines, Ottawa, or to the Directors of the Branches concerned, whose addresses are given above. Many of these reports may be had in French translations.

National Defence.—Annual Report, Militia and Air Services; Annual Report, Naval Service; Report on Civil Aviation; List of Officers, Defence Forces of Canada, Naval, Military and Air Services; Canadian Navy List; Naval General Orders; General Orders, Militia and Air Services; Militia Orders; Air Regulations.

National Research Council.—*Annual Reports.*—Reports of the National Research Council for the years 1917-18 to 1931-32. *Technical Reports.*—(For Nos. 1 to 21 see p. 1042 of the 1927-28 Year Book. Nos. 4, 6 and 12 are now out of print.) No. 22, An Experimental Study of Sieving, by J. B. Porter, Ph.D., D.Sc.; No. 23, The Storage of Apples in Air-cooled Warehouses in Nova Scotia, by S. G. Lipsett, Ph.D., covering investigation by Associate Committee on Fruit Storage; No. 24, The Drying of Wheat, covering an investigation by the Associate Committee on Grain Research; No. 25, The Drying of Wheat (Second Report), by E. Stansfield and W. H. Cook, covering an investigation under the Associate Committee on Grain Research; No. 26, Weed Survey of the Prairie Provinces, by J. M. Manson, prepared under the auspices of the Associate Committee on Weed Control; No. 27, Weeds and Their Control, a popular account prepared under the auspices of the Associate Committee on Weed Control, by G. P. McRostie, L. E. Kirk, G. Godel, W. G. Smith and J. M. Manson; No. 28, Report on Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn, by E. W. Crampton. *Bulletins.*—(For Nos. 1 to 12, see p. 1042 of the 1927-28 Year Book. Nos. 3, 4, 6, 7, 9, and 11 are now out of print.) No. 13, Interim Report on Protein Content as a Factor in Grading Wheat, prepared by the Associate Committee on Grain Research; No. 14, Report on Inquiry in Europe Regarding the Feasibility of Using Protein Content as a Factor in Grading and Marketing Canadian Wheat, by R. Newton, Ph.D.; No. 15, Review of Literature dealing with Health Hazards in Spray Painting, submitted by the Associate Committee on Spray Painting. *Periodical*—Canadian Journal of Research, published monthly since May, 1929.

National Revenue.—Annual Report, containing statements relative to Imports, Exports, Excise and Income. Annual Report of Shipping. National Revenue Review (monthly).

Pensions and National Health.—(2) The Canadian Mother's Book; (3) How to Take Care of the Baby; (4) How to Take Care of the Mother; (5) How to Take Care of the Children; (6) How to Take Care of the Father and the Family; (7) Beginning a Home in Canada; (8) How to Build the Canadian House; (9) How to Make the Canadian Home; (10) How to Make Outpost Homes in Canada; (11) How to Avoid Accidents and Give First Aid; (12) Canadians Need Milk; (13) How we Cook in Canada; (14) How to Manage Housework in Canada; (15) How to Take Care of Household Waste; (16) Household Cost Accounting in Canada; (19) Athlete's Foot; (23) Venereal Diseases—Diagnosis and Treatment; (24) Information for Men—Syphilis and Gonorrhoea; (25) Information for Young Women about Sex Hygiene; (26) Information for Parents—Teaching of Sexual Hygiene to Children; (27) Prevention of Blindness in Babies; (28) Periodic Medical Examinations; (29a) Goitre—Facts for the General Public; (30) How to Build Sound Teeth; (31) What

You Should Know About Tuberculosis; (32) Smallpox and Vaccination; (33) Narcotism in Canada; (41) Keep the Family Well; (43) Ricketts; (51) Be Prepared to Prevent Infantile Paralysis; (53) Maternal Care.

(NOTE.—Publications 23 and 28 are for the *Medical profession only*.)

Post Office.—Annual Report of the Postmaster General. Official Postal Guide. Regulations as to Rural Mail Delivery. Booklet of Postal Information.

Public Works.—Annual Report.

Railways and Canals.—Annual Report of the Department; Canals of Canada; The Trent Canal System; Canal Rules and Regulations; Port Colborne Elevator Tariff and Regulations; Prescott Government Grain Elevator Tariff.

Secretary of State.—Annual Report. The Arms of Canada.

Trade and Commerce. (NOTE.—Requests for those publications marked with an asterisk should be addressed to the King's Printer; the remaining publications may be obtained from the Deputy Minister, Department of Trade and Commerce.)

*Annual Report of the Dept. of Trade and Commerce, 25c.; *Annual Report of the Board of Grain Commissioners for Canada, 25c.; *Annual Report of Electricity and Gas, 25c.; *Annual Report of Weights and Measures, 10c.; Annual Reports, Dominion Grain Research Laboratory, 1928-29-30-31; *Canada-West Indies Conference, 1925, with text of Canada-British West Indies-Bermuda-British Guiana-British Honduras Trade Agreement (1925), \$1; Electrical Standards and their application to Trade and Commerce; *List of Licensed Elevators, etc., 50c.; Motion Pictures (catalogue of), 25c.; Precious Metals Marking Act, Office Consolidation, 10c.

Publications of the Commercial Intelligence Service.—Commercial Intelligence Journal Weekly (in English and French), containing Reports of Trade Commissioners and other Commercial Information. Annual subscription: In Canada, \$1; single copies, 5c. Outside Canada, \$3.50; single copies, 10c. (NOTE.—Subscribers to the Commercial Intelligence Journal are entitled to receive all other publications of the Commercial Intelligence Service free of charge); Australian Market for Fish Products (1931); Denmark as a Market for Canadian Products (1926) 25c.; Foreign Markets for Canadian Certified Seed Potatoes (1930) 25c.; French-Canadian Homespun Industry; Greece as a Market (1931) 25c.; Indian Empire as a Market for Canadian Products (1922) 25c. Invoice Requirements—Leaflets covering the following countries: Argentina, Australia, Belgium, Bolivia, Brazil, Central American Republics, Chile, China, Colombia, Cuba, Denmark, Ecuador, Finland, France, Greece, Holland, India, Italy, Japan, Mexico, Netherlands East Indies, New Zealand, Norway, Peru, South Africa, Switzerland, Turkey, Uruguay, and Venezuela. Yugoslavia as a Market (1930) 25c.; Map of the World showing Trade Routes (1930 Edition); Markets of Central America (1929) 25c. Points for Exporters—Leaflets covering the following countries: Australia, Belgium, the Bahamas, Brazil, British Honduras, China, Colombia, Cuba, Egypt, France, Germany, Haiti, Hong Kong, India, Jamaica, Japan, Mexico, British Malaya and Siam, Netherlands, Netherlands East Indies, New Zealand, Panama, South Africa, British West Indies, Venezuela and the United Kingdom. Republic of Chile: Its Economic Condition and Trading Opportunities (1923) 25c.; South American Markets (1929); Sweden as a Market for Canadian Products (1928) 25c.; Switzerland as a Market (1929) 25c.; Trade of the African Sub-Continent (1928) 25c.; Trade Possibilities of the Baltic States (1929) 25c.; Trading with Colombia and Venezuela (1928) 25c.; West Africa and its Opportunities for Canadian Trade (1921) 25c.

Dominion Bureau of Statistics.—For the publications of the Dominion Bureau of Statistics see pp. 1064 to 1071.

Section 4.—Publications of Provincial Governments.

PRINCE EDWARD ISLAND.

Journal of the Legislative Assembly. Statutes. General Index of Statutes of P.E.I., 1869-1923. Royal Gazette. Piché; Forêts et chutes d'eau de la province de Québec; Rapport du Service de Protection; Tableau des forces hydrauliques concédées de 1867 à 1923 (Supplément 1923 au 7 avril 1930); Forests and Waterfalls; Quebec, Natural Resources.

Agriculture.—Annual Reports.—Department of Agriculture: Competition for Agricultural Merit; Dairymen's Association; Pomological Society; Society for Protection of Elants. Journal of Agriculture and Horticulture, illustrated, monthly. *Bulletins.*—(1) Plans for Cheese and Butter Factories; (15) Culture du blé-d'Inde; (55) Poultry Raising in Towns and Villages; (63) La culture des arbres fruitiers; (40) How to plant your Fruit Trees; (43) Bean Culture; (44) Vegetable Culture; (45) List of Presidents and Secretaries of Agricultural Societies; (67) Insects nuisibles aux animaux de la ferme; (69) Enemies of Gardens and Orchards; (72) Nos érablières; (73) Instructions to School Farmers; (78) Farm Gas Engines; (83) L'élevage des dindons; (84) L'élevage des oies et canards; (87) La culture des pommes de terre; (89) The drainage of Farm Lands; (90) Experiments with Grain Crops; (92) The Corn Borer; (95) Comptabilité Agricole; Farm Account Book; (96) La remise à fumier; (100) Soils Drainage; (101) La luzerne; (102) Les conserves; (103) Les mauvaises herbes; (104) Les engrais chimiques; (106) Améliorer une ferme; (107) Maladies du bétail laitier. (108) Maladies du cheval; (109) Elevage du porc à bacon; (110) La pomme de terre; (111) Les abeilles; (112) Les bonnes semences; (113) Teinturerie domestique. *Circulars.*—(42) Sélection des troupeaux de volailles; (125) Guide des cercles de fermières; (65) Common weeds and their control; (66) Alfalfa growing in Quebec; (72) Loi des mauvaises herbes. *Miscellaneous.*—(107) Ventilation des étables; (108) Orientation de la culture maraîchère; (117, 118, 119) Plans de poulaillers; (136) Lois sur l'agriculture; (138) Lois-Conseil d'Agriculture; (159) Brochure—Mangeons du fromage; (164) Dairy farming; (165) Statuts et règlements des co-opératives; (184) Tableau des mauvaises herbes; (291) Cent poules par ferme; (293) The Maple, Pride of Quebec.

Highways.—*Note.*—Publications marked (1) are bilingual; (2) Separate French and English editions; (3) English only.

(1) Annual Report of the Minister of Highways; (2) An Act Respecting the Roads Department (1931); (2) Official Bulletin of the Roads Department (issued semi-monthly during the summer season and monthly during winter); (1) Official Highway and Tourist Map (1932); Tours in Quebec (80 pp. guide illustrated); (1) Laurentian Tours (32 pp. guide illustrated); (3) Montreal-Quebec (12 pp. illustrated); (3) The Eastern Townships (12 pp. illustrated); (3) Lake St. John and National Park (12 pp. illustrated); (3) The Old World at your Door; (3) The Gaspé Peninsula (32 pp. de luxe booklet); (3) Quebec, the Good Roads Province; Quebec, the Holiday Seeker's Playland (16 pp. illustrated booklet); (2) Gaspé Peninsula (260 pp.—complete guide—illustrated); (2) Along Quebec Highways (900 pp.—illustrated—price \$2).

Mines Branch.—*Esquisse géologique et minéraux utiles de la province de Québec* (1927); Iron Ores of the Province of Quebec, by P. E. Dulieux (1915); Extracts from Reports on the District of Ungava, by T. C. Denis (1915); Report on the Copper Deposits of the Eastern Townships, by J. Austen Bancroft (1910); L'industrie de l'amiante dans la province de Québec (1917); Report on Gold Deposits of Lake Demontigny, by Ad. Mailhot (1922); Geological Sketch and Economic Minerals of the Province of Quebec (1924); Annual Reports on Mining Operations in the Province of Quebec.

Colonization, Game and Fisheries.—Annual Report of the Minister; Report on Repatriation; Fisherman's Paradise; The Laurentide National Park; Elevage du rat musqué; Fur Farming in the Province of Quebec, 1921; Le Guide du colon, 1932; Quebec Ready Reference, 1931.

Labour.—Minister's Report; Workmen's Compensation Act; Annual Report of the Workmen's Compensation Commission; Report of the Quebec Social Insurance Commission.

Public Works.—Minister's Report; Statistics of Fire Losses in the Province.

Public Instruction.—Code scolaire (1927); School Law (1927); An Act respecting the Department of Education (1925); Regulations of the Catholic Committee (1930); Regulations of the Protestant Committee (1926); Memoranda of Instructions to Teachers for Intermediate and High Schools (1925); Annual Report: Financial Statement of the Superintendent of Public Instruction (annual): Mon premier livre (1st and 2nd parts) (1900), a fresh edition of which is printed every year; L'Enseignement primaire; Educational Record; Yearly circulars containing Instructions to School Boards and School Inspectors; Course of English and French for English Catholic Schools (1926); Manual respecting the course of study in the Protestant Elementary Schools; List of authorized text books.

Legislative Council.—Agenda Paper of the Legislative Council; Votes and Proceedings of the Legislative Council; Journals of the Legislative Council; Rules and Regulations of the Legislative Council.

Legislative Assembly.—Agenda Paper of the Legislative Assembly; Votes and Proceedings of the Legislative Assembly; Journals of the Legislative Assembly; Sessional Papers, Departmental Reports and Returns to Orders and Addresses of the Legislative Assembly; Report of the Clerk of the Crown in Chancery on Elections (published after every general election); Report of the Librarian of the Legislature; Annotated Rules and Standing Orders of the Legislative Assembly of Quebec; Private Bills in the Legislative Assembly of Quebec (a manual containing the rules relative to); Government and Legislature; List of the Chairmen and Members of the Committees of the Legislative Assembly.

ONTARIO.

Agriculture.—*Annual Reports.*—Minister of Agriculture; Agricultural College and Experimental Farm; Agricultural and Experimental Union; Stallion Enrolment Board; Agricultural Statistics; Bee-keepers' Association; Vegetable Growers' Association; Entomological Society; Agricultural Societies; Horticultural Societies; Annual Report of Ontario Veterinary College. *Bulletins.*—(337) Parasites Injurious to Sheep; (338) Hints on Judging Live Stock, Poultry, Grains, Grasses and Roots; (342) Fire Blight; (343) New Fruits; (344) Fruit Tree Diseases; (345) Fungus and Bacterial Diseases of Vegetables; (346) Hardy Alfalfa; (347) Hay and Pasture Crops; (348) Amateur Dramatics; (350) Warble Fly; (352) Potatoes; (354) The Pear; (355) The Raspberry and Blackberry; (356) Insects attacking Fruit Trees; (357) Top Working and Repair Grafting, including Budding; (358) The European Corn Borer; (359) Insects attacking Vegetables; (361) Farm Water Supply and Sewage Disposal; (363) Parasites injurious to Poultry; (364) Manures and Fertilizers; (365) Horses; (366) Soy beans in Ontario; (367) Pork on the Farm; (368) Farm Poultry; (369) Vegetable Gardening; (370) Testing Milk, Cream, and Dairy by-products; (371) Butter-making on the farm; (372) Soft Cheese and Cheddar Cheese; (373) Dairy Cattle; (374) Use More Ontario Honey; (375) Ontario-Grown Head Lettuce; (For previous bulletins, see p. 1046 of the 1927-28 Year Book.) *Specials* (without serial numbers).—Food for the Family.

Attorney General.—Reports of Inspectors; Legal Officers; Registry Offices; Insurance; Division Courts. Annual Reports of Liquor Control Board and Commissioner of Provincial Police. Powers and Duties of Justices of the Peace in Ontario (handbook).

Education.—Annual Report of the Minister of Education. School Acts. Regulations and Courses of Study: (1) Public and Separate Schools; (2) Continuation Schools; (3) High Schools and Collegiate Institutes; Courses of Study and Examinations in Schools Attended by French-speaking Pupils; School Cadet Corps; General Announcement of Summer courses; Text Book Regulations, including list of text books authorized and their prices; The list of school manuals with their prices; Summer Schools for Training of Teachers; English-French Training Schools; Syllabus of Normal School Courses and Regulations for First and Second Class and Kindergarten-Primary Certificates; List of Teaching Days of High, Continuation, Public and Separate Schools; Recommendations and Regulations for Vocational Schools, etc.; Recommendations and Regulations for Agriculture and Household Science Departments; High School Entrance Examination Regulations; Announcement re the Carter Scholarships; The Penny Bank of Ontario; The School Attendance Acts and the Recommendations and Regulations and the Part Time Courses; The Consolidation of Rural Schools; Suggestions for Teachers of Subnormal Children; Accommodation, Equipment and Grants for Auxiliary Training Classes; Literature Selections for Departmental Examinations; Regulations, Medical and Dental Inspection, Public and Separate Schools.

Game and Fisheries.—Annual Report, Department of Game and Fisheries; Ontario Game and Fisheries Laws; Summary of the Ontario Game and Fisheries Laws; Practical Observations on the Fox and Proven Treatments of Common Ailments; The Mink in Captivity; Report of the Special Fish Committee, 1928-30; Report of the Special Game Committee, 1931-33; The Small-mouthed Black Bass and its Conservation; The Maskinonge and its Conservation; The Speckled Trout and its Conservation.

Health.—*Acts.*—The Public Health Act and The Vaccination Act; The Venereal Diseases Prevention Act; The Cemetery Act; The Public Hospitals Act; The Private Hospitals Act; The Sanatoria for Consumptives Act; The Maternity Boarding House Act. *Regulations.*—Regulations for the Control of Communicable Diseases; Regulations Respecting Venereal Diseases; Regulations Respecting the Manufacture of Non-Intoxicating Beverages, Distilled and Mineral Water, and the Manufacture of Syrup, Wines and Brewed Beer; Regulations for the Sanitary Control of Lumber and Mining Camps; Regulations Governing the Construction and Management of Swimming Pools; Regulations re Cross Connection of Water Supplies. *Publications.*—Numerous pamphlets on The Baby, Cancer, General Clinic Service, Habit Training, Home Training, Speech Training, Special Problems and Venereal Diseases, may be obtained from the Director of Hospital Services, Ontario Department of Health, Toronto. A full list of these is published annually in the Health Almanac.

Highways.—Annual Report; Annual Proceedings, Ontario Good Roads Associations; (15) Highway Traffic Act and Regulations; (16) General Specifications for Concrete Highway Bridges, 1920; (17) General Specifications for Steel Highway Bridges, 1923; (19) General Plans for Steel Highway Bridges, 1917; (22) Report on Street Improvement, 1917; (34) The Planting and Care of Roadside Trees, 1923; (35) Public Commercial Vehicles Act, 1931; Public Vehicle Act and Regulations; Consolidated Highway Improvement Act, 1931; Official Government Road Maps of Ontario, price 25c. each.

Labour.—*Legislation.*—Department of Labour Act; Factory, Shop and Office Building Act; Steam Boiler Act; Canadian Interprovincial Regulations for the Construction and Inspection of Boilers, Tanks and Apparatuses; Operating Engineers Act and Regulations Governing the Issuance of Certificates; Employment Agencies Act and Regulations Governing Employment Agencies; Apprenticeship Act and Regulations Governing the Training of Apprentices in the Building Trades; Regulations Respecting the Protection of Persons Working in Compressed Air; Regulations Respecting the Protection of Persons Working in Tunnels or Open Caissons; Minimum Wage Act; Orders of the Minimum Wage Board. *Reports.*—Annual Report of the Department of Labour, including the reports of the General Superintendent of the Ontario Government Offices of the Employment Service of Canada, Chief Inspector of Factories, Chief Inspector of Steam Boilers, Chairman of the Board of Examiners of Operating Engineers, and of the Inspector of Apprenticeship; Annual Report of the Minimum Wage Board. *Booklets.*—Department of Labour of Ontario; Why Certificates for Stationary and Hoisting Engineers?; Boilers, Engines, Turbines and Condensers; Beginners' Book on Power Plant Operation; Survey of Industrial Welfare in Ontario.

Land and Forests.—(Free distribution.) Annual Report. Folder on Northern Ontario Settlers' Lands and Colonization. Folder on Summer Homes, Tourists and Campers in Ontario. The Forest Trees of Ontario (25c.). Woodlots of Ontario. Tree Planting, Ontario. Water Powers of Ontario (50c.). The Ferguson Highway. The Sault Ste. Marie-Pembroke Road. Forestry in Ontario. Gathering Pine Cones. Trees for Schools. Northwestern Ontario Highways and Tourist Attractions (50c.). Forest Resources of Ontario.

Mines.—The Mining Act, R.S.O., 1927, with Amendments from 1928 to 1932 inclusive. Handbook—Ontario's Mines and Mineral Resources, Fifth Edition, 1931. Bulletin 88, Preliminary Report of the Mineral Production of Ontario in 1931; Report of Royal Ontario Nickel Commission, 1917; Report of Ontario Iron Ore Committee, 1923; Volume XXX, Part II, Ontario Gold Deposits; Volume XXXIII, Part II, 1924, Porcupine Gold Area; Final Report of Joint Peat Committee, 1925; Volume XXXVII, Part II, 1928, Kirkland Lake Gold Area; Volume XLI, Part I, 1932, Statistical Review and Mines of Ontario in 1931; Bulletin No. 25, List of Publications (Third Edition), giving all reports issued up to March, 1932; Bulletin No. 80, Money and the World Crisis; Bulletin No. 83, Twenty-five Years of Ontario's Mining History.

Premier.—Reports of the Hydro-Electric Power Commission of Ontario and the Temiskaming and Northern Ontario Railway Commission. Tourists' Handbook. Report of the Queen Victoria Niagara Falls Park Commission.

Provincial Secretary.—Annual Reports: Ontario Board of Parole; Prisons and Reformatories; Annual Report of the Secretary and Registrar of the Province of Ontario (this report is presented to the Legislative Assembly each year, but has not been printed for several years). The Companies Act, including the Extra-Provincial Corporations Act. The Mortmain and Charitable Uses Act and the Companies Information Act. The Co-operative Credit Societies Act. The Marriage Act. Vital Statistics Act. Physicians' Pocket Reference to the International List of Causes of Death. Annual Report of Births, Marriages and Deaths. The Physicians' Pocket Reference to the International List of Causes of Death is published by the Dominion Bureau of Statistics but copies are kept in this Branch for purposes of distribution.

Public Works.—Annual Report of the Minister, with reports of the Deputy Minister, Architect's Engineer, Statements of Secretary and of Accountant.

Treasury.—Annual Statements; Main, Supplementary and Further Supplementary Estimates of Expenditure; Public Accounts; Budget Address of Treasurer delivered in the Legislative Assembly; Auditors' Report; Bureau of Archives Report; Report of the Board of Censors of Motion Pictures.

MANITOBA.

Agriculture.—*Booklets.*—Annual Crop and Live Stock Reports; Map of the Province; Calendar of the Manitoba Agricultural College. *Bulletins and Circulars.*—Alfalfa and Sweet Clover Growing in Manitoba; Sweet Clover; The Trench Silo; Making Silage in Manitoba; The Canada Thistle; Leafy Spurge; Noxious Weeds Act; How to Kill Couch Grass; Dealing with the Weeds Problem in Manitoba; Questions and Answers about the Sow Thistle; Control of Wild Oats; Preparing Grain for Exhibition Purposes; Good Seed Pays; Perennial Sow Thistle and What Can be Done to Control It; The Root Crop in Manitoba; Forage Crop Calendar; Prevention of Cereal Smuts; Growing Better Potatoes; Milk and Cream Tests; The Nutrition of the Family; Cream Profits; Farm Butter-Making; Cheese-Making on the Farm; The Cream Separator on the Farm; Home Made Brooders; Fattening, Killing, Dressing and Marketing Chickens; Horses in Manitoba; Sheep in Manitoba; Have You Dehorned your Market Cattle?; Standards for Flower Judging; The Peony; The Gladiolus; Shrubs for Manitoba; Success in Growing Annuals; Growing Vegetables in Manitoba; Vegetable Insects and their Control; Growing Better Rhubarb; The Gladiolus for Exhibition; Debates and Public Meetings; Meat Curing Recipes; Help for the Home Dressmaker; Fitting and Alteration of Dress Patterns.

Education.—Annual Report; Empire Day Booklet; Consolidation of Schools; Program of Studies, Elementary and Senior; Public School Act; Regulations.

Municipal Commissioner.—Statistical information respecting the Municipalities of the Province; Tax Arrears and other Information, and list of names and addresses of administrative and health officials of each Municipality. Report of Municipal and Public Utility Board. Manitoba Tax Commission.

Public Works.—Annual Report, included in Sessional Papers. Report of Insurance.

Attorney-General.—Annual Report. Government Liquor Commission. Workmen's Compensation Board. Annual Report of Manitoba Telephone System.

Provincial Treasurer.—Public Accounts; Estimates; Budget Speech; Report of Manitoba Farm Loan Association.

Provincial Secretary.—*Manitoba Gazette*; Journals and Sessional Papers. Statutes of the Province.

Mines and Natural Resources.—Manitoba Mines and Minerals; Mining Maps; Sectional Land Maps.

Health and Public Welfare.—Annual Report; Manitoba Mother: Monthly Pre-natal and Post-natal letters; Manitoba Baby; Manitoba Child; Child Study Material for small community groups; Patterns for Infants' Layettes (10c.); Regulations re Boarding Homes for Children, Maternity Homes, and Day Nurseries; Quarantine Regulations; The Common Cold; Measles; Scarlet Fever; Diphtheria; Diphtheria Immunization; Whooping Cough; Trachoma; Typhoid Fever; Health Training Material for Teachers; Report of the Royal Commission on Child Welfare Division: Report on the Poliomyelitis (Infantile Paralysis) Epidemic in Manitoba, 1928. Report on Hospitals and Nurses Training Schools in Manitoba—May 1929.

Publications issued by the Dominion Department of Pensions and National Health, The Canadian Council on Child Welfare, The Canadian National Institute for the Blind, also used in educational service.

SASKATCHEWAN.

Agriculture.—Annual Report of the Department of Agriculture. Annual Reports of Branches, etc.: Dairy, Live Stock, Field Crops, Statistics, Extension Department of College of Agriculture. Commission Reports: Live Stock Marketing, Better Farming, Wheat Marketing. Bulletins and leaflets on Live Stock, Field Crops, Dairying, Farm Buildings, Tillage Methods, etc.

Other Publications.—Sessional Papers. Annual Reports: Department of Railways, Labour and Industries; Department of Education; Department of Highways; Department of Municipal Affairs; Department of Provincial Secretary; Department of Public Works; Department of Public Health; Department of Telephones; Department of Natural Resources; Local Government Board; Public Accounts; Cancer Commission; Research Foundation; Mental Hospitals: The *Saskatchewan Gazette*. By Bureau of Publications: Weekly News Bulletin; Pamphlets on Saskatchewan—Legislation, Natural Resources, etc.

ALBERTA.

Agriculture.—Annual Report of the Department of Agriculture; The Ploughing Match; Summer-fallow in Southern Alberta; Sowing Good Seed; Weeds of Alberta; Weeds Poisonous to Live Stock; Soil Cultivation; Destruction of Gophers; Sheep in Alberta; School Fairs' Calendar; Agricultural Schools' Calendar; Growing Feed in Southeastern Alberta; Turkey Breeding and Management; Fur-bearing Animals and their Management.

Attorney-General.—Annual Report on Dependent and Delinquent Children.

Education.—Annual Report; Courses of Studies for Elementary Schools; Regulations re Public School Leaving Examinations; Regulations re Examinations for Secondary School Grades; Handbook for Secondary Schools; Promotion Tests for Grades V, VI, VII, VIII and IX; Departmental Examinations for Grades X-XII; Pamphlets on Picture Study; Architecture and Sculpture; Summer School Announcement; Course of Studies and Examinations for Commercial Diplomas; Normal School Announcement; Night Class Instruction in Mining Centres; Technical Education in Mining Centres; Bulletin and Regulations covering School Buildings in Rural and Village School Districts; Series of Plans and Specifications for Teachers' Residences; Series of Plans for one- and two-roomed Schools, with Specifications; The Certification of Teachers in Alberta; Annual Announcement of the Provincial Institute of Technology and Art; Courses of Study for pre-vocational classes; Courses of Study for Technical High Schools; School Act; Geography Manual for High Schools; Physical Education for Rural Schools; Physical Education for Secondary Schools; Rural Education in Alberta; High Schools Civics; Seat Work Problems for Junior Grades.

Lands and Mines.—Annual Report; Annual Report of the Chief Inspector of Mines; Alberta Oil Conditions, 1932; Handbook for information of public containing information on the following: the Survey System, Homestead Entries, Grazing on Provincial Lands, Hay Permits, Cultivation Permits, Irrigation, Leasing for Recreation Grounds or Exhibition Sites, Timber Licences and Permits, Timber Permit Berths, Fire-killed Permit Berths, Damaged Timber Berths, Liability of Persons cutting Timber without Authority, Permit Dues, Telegraph and Telephone Poles, Mining Timber Dues, Persons Exempted from Timber Dues, Timber for Homesteads, Fur-Farming Leases, Issue of Permits to Mine Coal, Coal-Mining Leases, Petroleum and Natural Gas Regulations, Carbon-black Permits, Placer Mining, Quartz Mining, Permits to remove Sand, Stone and Gravel from Beds of Rivers and Lakes, Dredging Leases, Disposal of Bar-Diggings, Alkali-mining Regulations, Potash Regulations, Regulations for disposal of Bituminous Sand Deposits, Regulations for Leasing of Lands containing Limestone, Granite, Slate, Marble, Gypsum, Marl, Gravel, Sand, Clay, Volcanic Ash or any Building Stone, Forest Reserve Regulations, Fishing Regulations, Schedule of Fees.

Municipal Affairs.—Annual Report of Department; List of Alberta Municipalities; Report of the Alberta Assessment Commission Triennial Assessment, 1931-33.

Public Health.—Annual Report of Department; Annual Report on Vital Statistics. Bulletins issued monthly on various health subjects. Pamphlets regarding infectious diseases—Diphtheria, Scarlet Fever, Measles, Whooping Cough, Smallpox, etc. (in different languages). Public Health Bulletin for Teachers; Alberta Mother's Book; Mouth Health; "What you should know about Cancer" (book); General Information regarding Tonsils; Health Rules for School Children; Hints on Home Nursing; Goitre; Systems of State Medicine (book).

Public Works.—Annual Report.

Publicity.—Official Highway Map of Alberta; Statistics of Progress, 1906-28; Alberta tourist literature.

Treasury.—Budget Speech containing extracts from Public Accounts and other financial statements; Public Accounts.

Other Publications.—Annual Reports are also issued by the following Departments and Branches: Railways and Telephones, Treasury (Insurance Branch), Board of Public Utilities, Labour Bureau, Lands and Mines.

BRITISH COLUMBIA.

Agriculture.—*Dairying.*—(5) Varying Butter-fat Tests; (71) Butter-making on the Farm; (2) Farm Cheese; (12) Rules Governing Cow-testing Associations in B.C.; (4) Clotted Cream; (17) The Story of Feed Unit; (20) First List of Dairy Sires; (6) Care of Milk and Cream; (22) Certified Milk and Butter-fat Records, 1932; (1) Ropy Milk in B.C.; (13) A Farm Dairy Sterilizer; (9) Dairy Farm Sterilizing Equipment. *Diseases and Pests.*—(45) Anthracnose; (39) Apple Aphides; (4) Apple-scab; (34) Woolly Aphid of the Apple; (38) The Lesser Appleworm; (32) Cabbage-root Maggot; (37) The Imported Cabbage-worm; (2) Colorado Potato-beetle in B.C.; (35) Currant Gall-mite; (68) Diseases and Pests of Cultivated Plants; (66) Fire-blight; (63) Locust-control; (61) Making Lime-sulphur at Home; (36) The Onion-thrips; (41) The Oyster-shell Scale; (31) Peach-twigg Borer; Field Crop and Garden Spray Calendar; Fruit Spray Calendar; (40) Soap Solutions for Spraying; (68) Oil Sprays; (71) Dust Sprays; (33) Strawberry-root Weevil. *Field Crops.*—(6) The Jerusalem Artichoke; (10) Cereal Smuts; (9) Production and Preparation of Grain; (8) Field Corn; (3) Kale and Rape Crops; (86) The Potato in B.C.; (7) Root-seed Production; (98) Roots and Root-growing; (104) Weeds and their Control; (4) Noxious Weeds. *Fruits and Vegetable Growing.*—(57) Blackberry Culture; (69) Cantaloupe-growing in B.C. CHAPTER XXX.—THE ANNUAL REGISTER, 1932.

Section 1.—Dominion Legislation, 1932.

Finance and Taxation.—Four Appropriation Acts were passed during the session, *viz.*, cc. 1, 2, 3 and 57, c. 1 applying to the fiscal year ended Mar. 31, 1932, cc. 2 and 3 to the fiscal year ended Mar. 31, 1933, and c. 57 to both years. C. 1 granted \$1,059,474.33 towards defraying the general charges and expenses of the Public Service as per the Schedule accompanying the legislation. C. 2 granted the further sum of \$33,018,718.84, being one-sixth of the amount of each of the several items to be voted in the Estimates, and a further \$2,236,407.85, being one-fourth of the several items set forth in the Schedule to the Act. By c. 3, a further one-twelfth of each of the several items to be voted in the Estimates, *viz.*, \$16,554,359.42, was granted and an additional sum of \$1,688,000, which was one-sixth of the amount of the several items set forth in the Schedule to that Act.

The Appropriation Act No. 4, 1932, c. 57, provided for \$146,707,826.92 to cover one-half of votes Nos. 35, 36, 45, 186, 207, 209-11, and 286 and the remaining three-fourths of the amount of each of the other items less deductions, as voted on in the Estimates and set forth in Schedule A appended to the Act. Further grants were made under this chapter of: \$2,242,474.83 as detailed in Schedule B; \$8,440,000, being five-sixths of the amount of each of the several items set forth in Schedule C; and \$6,620,472.95 as per Schedule D. Under this same chapter, the Governor General in Council was empowered to raise a loan of \$200,000,000 for public works and general purposes under the provisions of the Consolidated Revenue and Audit Act of 1931.

By c. 18 of the Statutes of 1932, debts due the Crown by any municipality, corporation, or public or private person or company may be retained by the Minister of Finance by way of deduction or set off out of any sums due or payable in the right of Canada to any such persons or bodies.

A payment from the Bank Circulation Redemption Fund of the amount at the credit of the Eastern Bank of Canada was authorized under c. 29.

Under the Gold Export Act (c. 33), the export of gold whether as coin or bullion may be prohibited by Regulations to be published in the *Canada Gazette*, except under licences to be issued by the Minister of Finance. The penalty for infringement of such Regulations is a sum not exceeding \$1,000, or imprisonment not exceeding two years or both fine and imprisonment.

The Income War Tax Act was amended by cc. 43 and 44. By c. 43 the general clause in former legislation providing for the 20 p.c. reduction was struck out and the rate of tax applicable to corporations and joint stock companies was increased; an additional rate of tax was made applicable to all persons including corporations and joint stock companies in receipt of income in excess of \$5,000; the exemption was reduced in the case of married and other persons with dependants; income derived from Dominion Government annuities, contracted for after the coming into force of the Amendment, was made exempt from income tax to the extent of \$1,200 only; Section 22 of the Income War Tax Act, as amended in 1930, permitting the organization of family corporations, was repealed; other amendments included the assessment of omitted income at double the amount and the revision of the

provisions for the making of returns by corporations. By c. 44 a special income tax of 10 p.c. was imposed on the salaries of the judiciary and commissioned officers of military, naval and air forces and of the R.C.M.P. for the fiscal year ended 1933.

Part III of the Special War Revenue Act, dealing with insurance premiums other than life and marine, is amended by c. 54 of the Statutes of 1932, as regards the tax imposed on net premiums received by certain insurance companies, the definition of premiums so regarded and the returns to be made by the insurance companies. Part IV, regarding a tax on cable, telegraph and telephone messages, and Part V, legislating for a tax on pullman seats, berths and other sleeping accommodation, are inserted in the Act after Part III.

Agriculture.—By c. 19, the Destructive Insect and Pest Act was amended to permit the Governor in Council to make Regulations to prevent the introduction or admission into Canada, or the spreading therein or shipment beyond her borders, of any insect, pest or disease destructive to vegetation. Health certificates may be granted, after inspection, for vegetable or other matter before export to any foreign country or for domestic use.

An Act respecting the incorporation of live-stock record associations—the Live-Stock Pedigree Act—is the subject of c. 49. This Chapter sets out the conditions to which applicants for the incorporation of such associations must conform, the corporate organization of these bodies, the certification of pure-bred live stock, the keeping of proper records and the penalties for false statements, etc.

Civil Service.—The Civil Service Act was amended by cc. 40 and 52. The amendments of c. 40 cover: rates of compensation on promotion, the deputy ministers' power to grant increases, the period of residence required of candidates at examinations, vacation leave, the payment of a gratuity in lieu of retiring leave, etc. A new section is added removing from the provisions of the Act post-masters of offices of which the annual revenue does not exceed \$3,000. The retirement from office of the then Civil Service Commissioners was provided for, and the subsection dealing with tenure of office of Commissioners was revised. By c. 52—the Salary Deduction Act—provision was made for the deduction of 10 p.c. from the compensation received by members of the public service of Canada for the fiscal year ending Mar. 31, 1933; the basis of superannuation benefits, however, was not to be changed.

Fisheries.—The Fish Inspection Act was amended by c. 31 as regards the kinds of domestic fish to which it applies, and the inspection of containers used for packing and marketing such fish and fish imported into Canada.

An amendment and consolidation of the Fisheries Act was carried out under c. 42. The new Act, known as the Fisheries Act, 1932, co-ordinates former legislation dealing with: fishery leases and licences; the regulation of whale fishing, seal fishing, salmon fishing, lobster fisheries, the possession of fish, construction of fishways, powers of fishery officers, protection of fishermen, penalties, etc.

Insurance, Loan and Trust Companies.—C. 45 is an Act respecting the Department of Insurance necessitated by the decisions of the Privy Council *re* the respective jurisdiction of the Dominion and the provinces in the matter of insurance. This Department is thereby officially re-constituted under the Minister of Finance and its duties defined. The deputy head is to be known as the Superintendent of Insurance and is appointed by the Governor in Council. Neither the Superintendent nor any officer of the Department is to be interested, directly or indirectly, in any insurance company coming under the jurisdiction of the Department. (See also p. 925).

Legislation governing Canadian, British and foreign insurance companies doing business in more than one province in Canada, defining the status and powers of such companies, and providing for a system of returns and inspection to safeguard policy-holders, is the subject of cc. 43 and 47—the Canadian and British Insurance Companies Act, 1932, and the Foreign Insurance Companies Act, 1932, respectively.

Interior.—C. 5, an Act respecting the boundary of Alberta and British Columbia, defines the boundary exactly as laid down by a survey made jointly by the Dominion and the two provinces concerned between 1915 and 1924.

The Yukon Quartz Mining Act is amended by c. 23 as regards the granting of relief in the way of a moratorium on the annual representation of work done which must be shown in accordance with the original Act, due to the low price of metals. The Mining Recorder is empowered to refuse right to obtain entry, or a certificate of work, for misrepresentation or the removing of posts or marks placed under the provisions of the Act.

Under c. 35 the Governor in Council upon recommendation of the Minister of the Interior is authorized to make refunds of monies representing dues, fees, guarantee deposits, credit balances, trust funds, etc., received in connection with the administration of the natural resources of the western provinces prior to the transfer thereof to the respective Provincial Governments.

By c. 55, Waterton Lakes National Park is made a part of the Waterton Glacier International Peace Park.

Justice.—The Admiralty Act was amended by c. 4 of the Statutes as regards the scope of the Rules which the President of the Exchequer Court of Canada may make, and the extent and effect thereof. Cc. 7, 8, 9 and 28 are Amendments of the Criminal Code. C. 7 relates to the passing of cheques without sufficient funds on deposit and the procedure to be followed in certain provinces; c. 8 prohibits the conveyance of prohibited articles for use in connection with lotteries; c. 9 is an Amendment in connection with the procedure governing summary trials in certain cases; and c. 28 re-defines the term "trustee"

The Marriage and Divorce Act was amended by c. 10, which permits marriage with a deceased's wife's sister or a daughter of a sister or brother of a deceased wife, or a deceased husband's brother or a son of a brother or sister of a deceased husband.

Cc. 16 and 48 are Amendments to the Judges Act, the first in its relation to travelling allowances and the second as regards the removal of judges of Circuit Court, district of Montreal.

C. 17 amended the Juvenile Delinquents Act and rules that, in the prosecution of cases of parents or adults aiding delinquency, it shall be no defence if the child does not become delinquent.

Labour.—The provisions of the Unemployment and Farm Relief Act of 1931 were extended until May 1, 1932, under c. 13, known as the Unemployment and Farm Relief Continuance Act, 1932.

Legislation respecting relief measures in the form of the Relief Act, 1932, is the subject of c. 36. This Act authorizes Agreements with provinces respecting relief, outlines the forms which such relief may take, and permits the Governor in Council to take all measures necessary, in his discretion, to protect the credit of the Dominion or any province. The power to make Orders and Regulations to facilitate the carrying out of the intention of the Act is also granted.

National Revenue.—The Excise Act was amended in several minor respects by c. 30. These included: the definition of 'Provincial Analyst', the power to refuse or suspend licences under the Excise Act, the recovery of penalties or forfeitures incurred under the Act, procedure in regard to penalties, conditions governing spirits entered for consumption, excise duties on screened malt, etc.

The Customs Tariff was amended by c. 41 with respect to repair parts, wool and hides listed as items 409, 549 and 599 of Schedule A.

Radio.—C. 51 of the Statutes is the Canadian Radio Broadcasting Act, 1932. It authorized the appointment of the Canadian Radio Broadcasting Commission and outlined its organization and powers, including the making of Agreements regarding broadcasting and the acquisition of property or the expropriation and compensation proceedings which may be taken. The expenditures of the Commission must not exceed the estimated revenue from receiving licences and must be appropriated by Parliament and audited by the Auditor-General in the same manner as other public moneys. (See also pp. 731-733.)

Trade and Commerce.—The use of the terms 'Board of Trade' and 'Chamber of Commerce' and the organization of other boards where there are existing boards are restricted under c. 14—an Act to amend the Boards of Trade Act. Any Board of Trade, duly registered, may become affiliated with the Canadian Chamber of Commerce on complying with certain requirements.

The Patent Act is amended by c. 21 of the Statutes in regard to conflicting applications for and infringements of patents, and the records and statements of applicants.

C. 22 amended the Petroleum and Naphtha Inspection Act as regards the tests applied to petroleum.

The Companies Act Amendment Act, 1932. is the subject of c. 27 of the Statutes. This Amendment deals with the registration of mortgages and charges, the maintenance of registration and transfer offices, and records.

The Trade Agreement between Canada and New Zealand assented to on May 13, 1932, is dealt with in c. 34. The Schedule accompanying the Act defines the scope of the Agreement in ten Articles. The new detailed tariff schedule agreed upon is appended to the Schedule.

The Unfair Competition Act, c. 38 of the Statutes, safeguarded the proper use of trade marks duly registered in Canada and limited the general form of design which may be adopted for trade-mark purposes and the registration thereof.

C. 39 amended the Bankruptcy Act in several respects including: proof of debt etc., appointment and powers of the interim receiver, the procedure in the case of bankrupt farmers whose liabilities exceed \$500, the proper registration of assignments, conditions governing the appointment of the trustee and custodian, the licensing and powers of a trustee, the ranking of claims, court procedure, and the records to be promptly forwarded to the Superintendent of Bankruptcy and the Dominion Statistician.

The Winding-up Act as it applies to Insurance Companies (Part III) was amended by c. 56, which re-defines the term 'assets' as it applies to such companies and describes when a company shall be deemed insolvent. Other important matters dealt with are: the order of priority for the payment of claims, the re-insurance of contracts by the liquidator without the consent of the policy-holders, and the duties of the liquidator as regards the making of reports and returns.

Transportation and Communications.—Cc. 6 and 25 of the Statutes of 1932 are Acts to authorize the additional provision of moneys to meet expenditures and indebtedness incurred on behalf of the Canadian National Railways during 1931 and 1932 respectively. The Acts grant the power to borrow for this purpose and outline the method of financing by securities which are to be issued by approval of the Governor in Council. The principle of competitive bids for the sale of such securities is laid down. Cc. 15 and 26 are Acts to authorize the guarantee by the Canadian Government of the securities to be issued under cc. 6 and 25 respectively. An extension of time for the completion of the construction of certain lines of railway by the Canadian National Railways is granted by c. 24.

Under c. 50—an Act to amend the Montreal Harbour Commissioners' Act, 1894—the original legislation is amended so that all harbour property, movable and immovable, "heretofore acquired or held" is vested in the Crown and shall be deemed to have been so vested since July 1, 1867.

Miscellaneous.—The Minister of Public Works was authorized, under c. 11, to extend for one year the provisions of the then existing Agreement with the Corporation of the City of Ottawa, for certain civic services in return for a fixed annual payment, in addition to payment for water. The Government is to undertake the upkeep of works in the vicinity of Parliament Hill.

By c. 12, Orders in Council or Regulations made by the Governor in Council under authority of the Forest Reserves and Parks Act or the Dominion Lands Act were declared to have the same force and effect as if approved by Parliament as required by those Acts.

The Opium and Narcotic Drug Act was amended by c. 20, which contains a new Schedule mentioning the substances recognized as "drugs" under the Act and re-defines "opium". An amendment is also made regarding the forfeiture of seized drugs.

The Royal Canadian Mounted Police Act is amended regarding the appointment of officers and the delegation of authority by c. 37. A new subsection is added extending the powers possessed by members of the Force in connection with the prevention of offences against the revenue laws of Canada. Amendments are also made regarding pensions and allowances to the personnel of the Force.

C. 53 amends the Soldier Settlement Act, permitting the transfer of lands which have not been sold by the Board to the municipality in which such land is situated, or the sale of lands in certain specified cases at prices not less than the estimated costs to a settler.

Section 2.—Provincial Legislation.

A list of the public Acts of the Provincial Legislatures usually appears under this section of the Year Book. In order to conserve space, it was decided last year to refer the reader to the different provincial authorities for information in this connection. The same procedure is followed this year. It is felt that whatever is lost to those readers who are interested in having all provincial legislation brought together and listed under one head, is more than offset by the information of more general interest which it has been possible to include in the limited space available, but which would otherwise have had to be omitted.

Section 3.—The Imperial Economic Conference, 1932.¹

The year 1932 witnessed a notable event in the history of the Dominion—the holding of the Imperial Economic Conference in Ottawa from July 21 to Aug. 20. Thirty-eight years previously Ottawa had acted as host to an assembly of delegates from the British Empire. That, however, was a Colonial, not an Imperial Conference, and was both restricted in its powers and incomplete in its representation. The 1932 meeting in Ottawa may, in fact, be considered as the first Imperial Conference which has met outside the United Kingdom. It is, therefore, an important landmark in Imperial development.

The origin of the Conference may be found in the previous Imperial Conference of 1930. That Conference unanimously adopted the following Resolution:—

“I. The Imperial Conference records its belief that the further development of intra-Imperial markets is of the utmost importance to the various parts of the Commonwealth.

“II. Inasmuch as this Conference has not been able, within the time limit of its deliberations, to examine fully the various means by which intra-Imperial trade may best be maintained and extended, it is resolved that the Economic Section of the Conference be adjourned to meet at Ottawa on a date within the next twelve months to be mutually agreed upon, when that examination will be resumed with a view to adopting the means and methods most likely to achieve the common aim; provided that this reference is not to be construed as modifying the policy expressed on behalf of any of the Governments represented at this Conference.

“III. The agenda for the meeting referred to in the previous resolution will be agreed between the several Governments”.

At the concluding meeting of the 1930 Conference the Prime Minister of Canada, in accordance with the above Resolution, moved that the Economic Section of the Conference adjourn to Ottawa, to meet within the next twelve months at a date to be mutually agreed upon. This motion was carried unanimously.

To implement the above Resolution the Canadian Government entered into negotiations with the other Governments of the Empire. It was not possible to hold the proposed meeting within the twelve months specified in the Resolution, but toward the middle of January, 1932, the Canadian Government formally invited the Governments of the United Kingdom, the Irish Free State, the Union of South Africa, Australia, New Zealand, India, Newfoundland and Southern Rhodesia to attend an Imperial Economic Conference at Ottawa in July, 1932. It was understood that this Conference would, in its organization and procedure, follow the well-established lines laid down at previous Imperial gatherings. The agenda, as finally agreed upon, was as follows:—

A. General Trade Questions.—

1. Examination of aspects of general trade and tariff policy and administration affecting Empire trade, including, *inter alia*, the following subjects:—
 - (a) Recognition of the principle of reciprocal tariff preferences within the Commonwealth;
 - (b) General application of existing and future tariff preferences within the Commonwealth;
 - (c) Extension to other parts of the Commonwealth of tariff advantages accorded foreign countries;
 - (d) Determination of percentage of “Empire Content” necessary to secure preferential tariff treatment;
 - (e) Export bounties and anti-dumping duties within the Commonwealth.

¹Prepared in the Department of External Affairs, Ottawa.

2. Commercial Treaty policy with respect to foreign countries, including, *inter alia*:—
 - (a) Relation of intra-Imperial preferences to concessions to foreign countries;
 - (b) Interpretation of most-favoured-nation clause, particularly with reference to the development of regional preferences and of systems of import quotas.
3. Consideration of the appropriate basis and means of effecting intra-Imperial economic co-operation, including review of existing agencies, examination of the report of the Imperial Economic Committee on Industrial Co-operation, and discussion of communications and of research and standardization.

B. Monetary and Financial Questions—

Consideration of existing inter-relationships of the various currencies and monetary standards of the Empire, and of the desirability and feasibility of taking steps to restore and stabilize the general price level and to stabilize exchange.

C. Negotiation of Trade Agreements.

PREPARATORY WORK.

The Canadian Government was responsible, not only for the preparation of economic data for the use of the Canadian delegation to the Conference, but also for the compilation, in convenient form, of general economic information which would be helpful to the visiting delegations. It was responsible, also, for the organization of a Conference Secretariat and the provision of accommodation and facilities for the business sessions of the Conference.

By direction of the Prime Minister, and under supervision of a Cabinet Committee, a General Preparatory Committee was set up to supervise the detailed work of preparation and to co-ordinate the activities of the various Departments of Government in connection with the Conference. Subordinate inter-departmental committees were constituted as follows:—

A Tariff Preparatory Committee, responsible for the preparation of complete tariff data, including studies of Canadian products on which tariff concessions in the other parts of the Commonwealth would be most beneficial, and of the tariff concessions which could be most easily granted in return; the examination of tariff classifications or other governmental laws or regulations tending to restrict the expansion of Canadian trade with other parts of the Commonwealth, and other tariff problems likely to be discussed at the Conference.

A General Economic Committee to undertake the preparation of exhaustive data on general economic subjects, including statistical studies of the trade of the Commonwealth, the tariff preferences already in force, the effects of such preferences on the development of trade, Empire content, import quotas, import boards or central buying or selling organizations, cartels, embargoes, steamship services, merchandise marks, preference in government contracts, industrial co-operation and specialization within the Commonwealth, and similar economic matters of intra-Imperial interest.

A Monetary Committee to prepare financial and monetary material, including: information on the discussions of monetary problems at previous Imperial Conferences, the evils of monetary instability, export credits, the international gold

standard, the re-monetization of silver, the balance of indebtedness, the movement of prices, and other monetary and financial questions likely to be of interest to the Conference.

An Administrative and Staff Committee, whose duty it was to arrange for office accommodation and supplies for delegates and their advisers, suitable meeting places for the various committees and for plenary sessions of the Conference; to organize clerical, filing, stenographic, and messenger services; to arrange for facilities for the press; and in general to make arrangements to facilitate the smooth functioning of the business sessions of the Conference.

A Government Hospitality Committee, responsible for the arrangements for the reception and accommodation of the visiting delegations and for official entertainments during the Conference. The work of this committee continued during the Conference, and there is every reason to believe that its work lived up to the fine traditions for hospitality established in London at previous Conferences.

The above committees were organized early in the spring of 1932, and in the following months a very great deal of intensive study and research was undertaken. It was evident that, in view of the special economic conditions both intra-Imperial and international under which the Conference would meet, it would require a completely new documentation on a much wider basis than for the Conference of 1930. As the preliminary and final reports of the various committees were turned in, they were studied by a Committee of the Cabinet, under the Chairmanship of the Prime Minister, and the broad lines of Canadian policy at the Conference laid down.

REPRESENTATION AT THE CONFERENCE.

The Conference opened on July 21, with the Governments represented by the following delegates:—

CANADA.

- THE RT. HON. R. B. BENNETT, K.C., M.P., Prime Minister and Secretary of State for External Affairs.
 THE RT. HON. SIR GEORGE H. PERLEY, K.C.M.G., M.P., Minister without Portfolio.
 THE RT. HON. ARTHUR MEIGHEN, K.C., Minister without Portfolio.
 THE HON. HUGH GUTHRIE, K.C., M.P., Minister of Justice.
 THE HON. EDGAR N. RHODES, K.C., M.P., Minister of Finance.
 THE HON. H. H. STEVENS, M.P., Minister of Trade and Commerce.
 THE HON. DR. R. J. MANION, M.C., M.P., Minister of Railways and Canals.
 THE HON. E. B. RYCKMAN, K.C., M.P., Minister of National Revenue.
 THE HON. ARTHUR SAUVÉ, M.P., Postmaster-General.
 THE HON. C. H. CAHAN, K.C., M.P., Secretary of State of Canada.
 THE HON. ALFRED DURANLEAU, K.C., M.P., Minister of Marine and Acting Minister of Fisheries.
 THE HON. MAURICE DUPRÉ, K.C., M.P., Solicitor General.
 THE HON. W. A. GORDON, K.C., M.P., Minister of Labour, Minister of Mines and Acting Minister of Immigration and Colonization.
 THE HON. ROBERT WEIR, M.P., Minister of Agriculture.

UNITED KINGDOM.

- THE RT. HON. STANLEY BALDWIN, M.P., Lord President of the Council.
 THE RT. HON. NEVILLE CHAMBERLAIN, M.P., Chancellor of the Exchequer.
 THE RT. HON. J. H. THOMAS, M.P., Secretary of State for Dominion Affairs.
 THE RT. HON. THE VISCOUNT HAILSHAM, Secretary of State for War.
 THE RT. HON. SIR PHILIP CUNLIFFE-LISTER, G.B.E., M.C., M.P., Secretary of State for the Colonies.
 THE RT. HON. WALTER RUNCIMAN, M.P., President of the Board of Trade.
 THE RT. HON. SIR JOHN GILMOUR, Bt., D.S.O., M.P., Minister of Agriculture and Fisheries.

COMMONWEALTH OF AUSTRALIA.

THE RT. HON. S. M. BRUCE, C. H., M.C., M.P., Minister without Portfolio.
THE HON. H. S. GULLETT, M.P., Minister of State for Trade and Customs.

NEW ZEALAND.

THE RT. HON. J. G. COATES, M.C., M.P., Minister of Public Works, Transport and Employment.
THE HON. W. DOWNIE STEWART, M.P., Minister of Finance and Customs, etc.

UNION OF SOUTH AFRICA.

THE HON. N. C. HAVENGA, M.P., Minister of Finance.
THE HON. P. G. W. GROBLER, M.P., Minister of Lands.
THE HON. A. P. J. FOURIE, M.P., Minister of Mines and Industries.

IRISH FREE STATE.

MR. SEAN T. O'KELLY, T.D., Vice-President of the Executive Council, Minister of Local Government and Public Health.
MR. SEAN LEMASS, T. D., Minister for Industry and Commerce.
DR. JAMES RYAN, T.D., Minister for Agriculture.

NEWFOUNDLAND.

THE HON. F. C. ALDERDICE, Prime Minister.
THE HON. L. E. EMERSON, K.C., Minister of Justice.

INDIA.

SIR ATUL C. CHATTERJEE, K.C.S.I., K.C.I.E., Member of the Council of India.
SIR HENRY STRAKOSCH, G.B.E., Member of the Council of India.
SIR GEORGE SCHUSTER, K.C.S.I., K.C.M.G., C.B.E., M.C., Member of Council of Governor-General of India.
SIR GEORGE RAINY, K.C.S.I., K.C.I.E., I.C.S., Late Member of Council of Governor-General of India.
SIR PADAMJI PESTONJI GINWALA, Kt.
MR. R. K. SHANMUKHAM CHETTY, M.L.A., Deputy President, Indian Legislative Assembly.
SAHIBZADA ABDUS SAMED KHAN, C.I.E., Prime Minister, Rampur State.
SETH HAJI ABDOOLA HAROON, M.L.A.

SOUTHERN RHODESIA.

(As Observers.)

THE HON. H. U. MOFFAT, C.M.G., M.L.A., Premier.
THE HON. P. D. L. FYNN, C.M.G., M.L.A., Treasurer.

There were in addition attached to each delegation advisers, secretaries and other assistants.

The Secretariat General of the Conference was composed of Canadian civil servants, together with one representative of each of the visiting delegations as follows:—

SECRETARY TO THE CONFERENCE.

DR. O. D. SKELTON, Under-Secretary of State for External Affairs.

DEPUTY SECRETARY TO THE CONFERENCE.

MR. J. E. READ, K.C., Legal Adviser, Department of External Affairs.

ADMINISTRATIVE SECRETARY.

LT.-COL. H. J. COGHILL, Sergeant-at-Arms, House of Commons.

SECRETARIES NOMINATED BY DELEGATIONS.

Canada.—MR. J. S. MACDONALD, Second Secretary, Department of External Affairs.

United Kingdom.—MR. R. B. HOWORTH, C.B., C.M.G., Deputy Secretary, Cabinet Office.

Commonwealth of Australia.—MR. J. F. MURPHY, Prime Minister's Department.

New Zealand.—MR. A. D. PARK, C.M.G., Secretary to Treasury.

Union of South Africa.—MR. G. P. JOOSTE, Private Secretary to the Minister of Finance.

Irish Free State.—MR. J. V. FAHY, Secretary of the Department of External Affairs.

Newfoundland.—MR. W. J. CAREW, Secretary to the Prime Minister.

India.—MR. H. A. F. LINDSAY, C.I.E., C.B.E., I.C.S.

Southern Rhodesia.—MR. F. M. C. STOKES, Private Secretary to the Premier.

On the opening of the Conference the Secretariat General took over the purely administrative side of its activities, including arrangements for the organization and meetings of committees and sub-committees, the circulation of Agenda, the drafting of reports of proceedings of the various committees and sub-committees and of the Conference itself and their distribution to the various delegations. The visiting delegations were generous in their acknowledgment of the manner in which these duties were carried out, and of the assistance of the Secretariat in the solution of the problems before the Conference.

OPENING OF THE CONFERENCE.

The Conference was opened by His Excellency the Governor General of Canada who first delivered a gracious message from His Majesty the King, which was in the following terms:—

"My thoughts and prayers are with the delegates of my Governments who are gathered in Conference to-day, to explore the means by which they may promote the prosperity of the Peoples of this great Empire.

"At this Conference you are opening a new page of history, on which within a few weeks will be written the record of a determined effort to solve the difficulties weighing so heavily, not only on us, but upon the whole world. It is my earnest hope that when this Conference rises there will be a record of results worthily reflecting the frankness, the sincerity, and the spirit of helpfulness with which, I feel confident, your deliberations will be conducted.

"The British Empire is based on the principle of co-operation, and it is now your common purpose to give the fullest possible effect to that principle in the economic sphere. By so doing you will set in motion beneficial forces within the British Commonwealth which may well extend their impulse also to the world at large. I pray that you may be given clear insight and strength of purpose for these ends.

GEORGE R.I."

July 21, 1932.

His Excellency, on behalf of the Government and people of Canada, then welcomed the delegations who had come from Overseas.

On the motion of the Leader of the Delegation of the United Kingdom, seconded by the Leader of the Delegation of Australia, the Prime Minister of Canada was asked to take the Chair at the meetings of the Conference and of the Heads of Delegations.

As its first official act, the Conference placed on record a resolution of respectful devotion to His Majesty the King, which was moved by the Prime Minister of Canada as Chairman of the Conference and seconded by the Leader of the Delegation of India, and passed unanimously.

ORGANIZATION.

The opening meeting of the Conference was held in the House of Commons Chamber, in the Parliament Buildings. It was found convenient, however, to conduct the work of the Conference at meetings of the Heads of Delegations and other Delegates, held in the Railway Committee Room and in Room 216 in the Centre Block, Parliament Buildings. These meetings were attended by the Heads of the Delegations, together with other Delegates.

It was decided to divide the matters which were under consideration by the Conference into five principal divisions, and to refer the matters comprised in each division to a committee for examination and report. These divisions included matters relating to the promotion of trade within the Commonwealth, matters relating to customs administration, matters relating to commercial relations with foreign countries, matters relating to monetary and financial questions and matters relating to methods of economic co-operation.

Committees were appointed in all instances by the meetings of Heads of Delegations and sub-committees were constituted by all of the five principal committees.

The total number of meetings was: Plenary Conference, 5; Heads of Delegations, 5; Committees and Sub-Committees, 49.

In addition to the committees and sub-committees of the Conference six groups were constituted made up of representatives of those Dominions which were interested in: (1) dairy products (including poultry and eggs); (2) meat (including live cattle and pig products); (3) fruit and vegetables; (4) cereals (including flour); (5) metals and minerals; (6) tobacco.

These groups held numerous meetings and their activities were of great assistance in connection with the bi-lateral negotiations between the United Kingdom and certain of the Dominions.

PUBLICITY.

The arrangements for publicity followed those adopted at previous Conferences. The Honourable R. J. Manion, M.C., M.P., Minister of Railways and Canals, Canada, was charged with responsibility for the general supervision of the publicity arrangements and acted as Minister in charge of Press Relations. He was assisted by the following press officers: L. B. Pearson, First Secretary, Department of External Affairs; A. W. Merriam, Private Secretary to the Prime Minister of Canada; A. Lalonde, Solicitor, Post Office Department of Canada. As evidence of the widespread interest which the Conference evoked it may be stated that 253 press representatives from Great Britain, the Dominions, the United States, France, Germany, Italy and Denmark, were given credentials.

CONCLUSIONS AND RESULTS.

The results of the Conference are to be found in (1) certain Intra-Imperial Trade Agreements, and (2) in the reports of the five committees previously referred to, which were submitted to and accepted by the Conference.

INTRA-IMPERIAL TRADE AGREEMENTS.

The following Trade Agreements were signed at the closing session of the Conference:—

- I. United Kingdom-Australia.
- II. United Kingdom-Union of South Africa.
- III. United Kingdom-New Zealand.
- IV. United Kingdom-India.
- V. United Kingdom-Newfoundland.
- VI. United Kingdom-Southern Rhodesia.
- VII. United Kingdom-Canada.
- VIII. Canada-Irish Free State.
- IX. Canada-Union of South Africa.
- X. Canada-Southern Rhodesia.
- XI. Union of South Africa-Irish Free State.

The United Kingdom-Canada Agreement.—The most important of these Agreements, from the Canadian point of view, is that between the United Kingdom and Canada. It may be summarized as follows:—

Article 1.—By this the free entry of Canadian products into the United Kingdom under the Import Duties Act of 1932 is continued after Nov. 15, 1932, when it otherwise would have lapsed. This is subject, however, to the following reservation: "As regards eggs, poultry, butter, cheese and other milk products, free entry for Canadian produce will be continued for three years certain. His Majesty's Government in the United Kingdom, however, reserve to themselves the right, after the expiration of the three years, if they consider it necessary in the interest of the United Kingdom producer to do so, to review the basis of preference so far as relates to the articles above enumerated and, after notifying His Majesty's Government in Canada, either to impose a preferential duty on Canadian produce whilst maintaining preferential margins, or in consultation with the Canadian Government to bring such produce within any system which may be put into operation for the quantitative regulation of supplies from all sources in the United Kingdom market".

Article 2.—Provides for the imposition by the United Kingdom of the following duties on foreign goods in place of the duties, if any, previously levied:—

"Wheat in grain.....	2/- per quarter.
Butter.....	15/-per cwt.
Cheese.....	15 p.c. <i>ad valorem</i> .
Apples, raw (excluding apples consigned direct to a registered cider manufacturer for use in making cider).....	4/6d. per cwt.
Pears, raw.....	4/6d. per cwt.
Apples, canned.....	3/6d. per cwt. in addition to the duty in respect of sugar content.
Dried fruits, now dutiable at 7/-.....	10/6 d. per cwt.
Eggs in shell:—	
(a) Not exceeding 14 lbs. in weight per great hundred.....	1/- per great hundred.
(b) Over 14 lbs., but not exceeding 17 lbs.	1/6d. "
(c) Over 17 lbs.....	1/9d. "
Condensed milk, whole, sweetened.....	5/- per cwt. in addition to duty in respect of sugar content.
Copper, unwrought, whether refined or not, in ingots, bars, blocks, slabs, cakes, and rods.....	2d. per lb.

Article 3.—The United Kingdom undertakes that the general *ad valorem* duty of 10 p.c. imposed by the Import Duties Act of 1932 on the foreign goods specified below shall not be reduced except with the consent of the Canadian Government:—

"Timber of all kinds imported into the United Kingdom in substantial quantities from Canada, in so far as now dutiable.

"Fish, fresh, sea.
Salmon, canned.
Other fish, canned.
Asbestos.
Zinc.
Lead."

Article 4.—"It is agreed that the duty on either wheat in grain, copper, zinc or lead as provided in this Agreement may be removed if at any time Empire producers of wheat in grain, copper, zinc and lead respectively are unable or unwilling to offer these commodities on first sale in the United Kingdom at prices not exceeding the world prices and in quantities sufficient to supply the requirements of the United Kingdom consumers."

Article 5.—Provides for the modification of the conditions at present governing the import into the United Kingdom of live cattle from Canada.

Article 6.—Declares that in the proposed quantitative regulation of the supplies of bacon and hams coming on to the United Kingdom market provision will be made for the free entry of Canadian bacon and hams of good quality up to a maximum of 2,500,000 cwt. per annum.

Article 7.—Secures for Canada the existing margin of preference over foreign tobacco over a period of ten years so long as the duty does not fall below 2/0½d. per lb., in which event the margin of preference shall be equal to the full duty.

Article 8.—Provides for the extension to Canada of any preference which may for the time being be accorded to any other part of the British Empire by the non-self-governing Colonies and Protectorates as well as new or additional preferences by the Colonies on a specified list of commodities and at rates shown in that list.

Article 9.—Provides for the alteration of the Canadian Customs duties on a specified list of commodities, with a proviso that nothing in the Article shall preclude the Canadian Government from reducing the duties specified in the said list so long as the margin of British preference is preserved or from increasing the rates under the intermediate or general tariff set out in the said list.

This Article of the Agreement includes the main concessions made to the United Kingdom by the Canadian Government; 225 Canadian tariff items are affected, on 223 of which the margin of British preference is increased. This result is secured in the following ways:—

- (a) By reduction of the British preferential rate on 81 items;
- (b) By increase in the intermediate or general rate, or both, on 89 items;
- (c) By reduction in the British preferential rate accompanied by increases in the other rates, 49 items;
- (d) By reduction in all rates, 2 items;
- (e) By increase in all rates, 1;
- (f) By reduction in the British preferential and intermediate rates, 1.

By major groups, the tariff changes mainly concern iron and steel, drugs and chemicals, textiles, leather goods, glass, vegetable oils, as well as a wide list of miscellaneous commodities.

As regards iron and steel, the changes aim to give a material widening of the preference on primary forms such as steel plates; black, galvanized and tinned sheets; boiler plates; and various kinds of strip and hoop steel. The preference is also widened on steel tires, railway axles, wire products, steel chains, certain machinery, cutlery and small tools. Duties are removed entirely on poundage steel in bars; large bars for shafting; casement sections; rust and heat resisting steels; certain special steels; tramway rails; heavy structural shapes; forgings; automobile engines of heavy rating; telephone and radio apparatus, etc. Automobiles, motor trucks and motorcycles are also given free entry.

The British preference has also been widened in the field of drugs and chemicals, flat glass, and on manufactured leathers such as belting, sole leather, pig and morocco leathers, and all leather further finished than tanned.

So far as textiles are concerned, the changes made on cotton goods cover a wide group of textile products from yarns to clothing, and the specific duties are generally reduced by one-third, though the domestic industry is still substantially protected. Piece cottons are made free of duty, while a wider preference is given mercerized cotton yarns and other cotton products. The specific duties on woollen goods—from yarns to clothing—are reduced by at least one-quarter on every item where such duties were operative. On blankets and carpets the specific duty is cut in half, and hair yarns, lusters, linings and light weight grey fabrics and articles not made in Canada and certain jute fabrics are given free entry.

Increased preferences were also granted on anthracite coal, alcoholic liquors, vegetable oils, and other miscellaneous commodities.

Article 10.—The Canadian Government “undertake that protection by tariffs shall be afforded against United Kingdom products only to those industries which are reasonably assured of sound opportunities for success”

Article 11.—“His Majesty’s Government in Canada undertake that during the currency of this Agreement the tariff shall be based on the principle that protective duties shall not exceed such a level as will give United Kingdom producers full opportunity of reasonable competition on the basis of the relative cost of economical and efficient production, provided that in the application of such principle special consideration shall be given to the case of industries not fully established.”

Articles 12, 13, 14 and 15.—Provide for the establishment of a Tariff Board in Canada and outline some principles by which it will be guided.

Article 16.—“His Majesty’s Government in Canada undertake that Customs administration in Canada shall be governed by such general principles as will ensure (a) the avoidance, so far as reasonably possible, of uncertainty as to the amount of Customs duties and other fiscal imposts payable on the arrival of goods in Canada; (b) the reduction of delay and friction to a minimum; and (c) the provision of machinery for the prompt and impartial settlement of disputes in matters appertaining to the application of tariffs.”

Article 17.—“His Majesty’s Government in Canada undertake that all existing surcharges on imports from the United Kingdom shall be completely abolished as soon as the finances of Canada will allow. They further undertake to give sympathetic consideration to the possibility of reducing and ultimately abolishing the exchange dumping duty in so far as it applies to imports from the United Kingdom.”

Article 18.—“His Majesty’s Government in Canada undertake to modify the existing Regulations governing the importation of pedigree stock from the United Kingdom into Canada in a manner already agreed upon in principle between themselves and His Majesty’s Government in the United Kingdom.”

Article 19.—Provides for the extension to the non-self-governing Colonies, Protectorates and Mandated Territories of the preferential rates of Canadian duties shown in a prescribed list and under certain conditions.

Article 20.—Provides that “nothing in the Agreement shall prejudice or diminish any of the benefits enjoyed by any of the parties thereto under the Canada-West Indies Trade Agreement dated the 6th of July, 1925”.

Article 21.—“This agreement is made on the express condition that, if either Government is satisfied that any preferences hereby granted in respect of any particular class of commodities are likely to be frustrated in whole or in part by reason of the creation or maintenance directly or indirectly of prices for such class of commodities through State action on the part of any foreign country, that Government hereby declares that it will exercise the powers which it now has or will hereafter take to prohibit the entry from such foreign country directly or indirectly of such commodities into its country for such time as may be necessary to make effective and to maintain the preferences hereby granted by it.”

Article 22.—"This Agreement between His Majesty's Government in the United Kingdom and His Majesty's Government in Canada is to be regarded as coming into effect as from the date hereof¹ (subject to the necessary legislative or other action being taken as soon as may be practicable hereafter). It shall remain in force for a period of five years, and if not denounced six months before the end of that period shall continue in force thereafter until a date six months after notice of denunciation has been given by either party."

Article 23.—"In the event of circumstances arising which, in the judgment of His Majesty's Government in the United Kingdom or of His Majesty's Government in Canada, as the case may be, necessitate a variation in the terms of the Agreement, the proposal to vary those terms shall form the subject of consultation between the two Governments."

The Canada-South Africa Trade Agreement.—This Agreement places the commercial relations between these two Dominions on a treaty basis for the first time. It covers the principal commodities which each Dominion can sell to the other, but is naturally somewhat more limited in scope than the trade agreements concluded earlier with Australia and New Zealand. A considerable extension of the preferred list of commodities has been obtained for Canada. Special consideration has been given to corn from South Africa, although fruits in certain seasons, peanuts, sugar and molasses are also given consideration. Wheat, canned goods, motor cars, electrical appliances, rubber goods and paper products are the chief items on which concessions are made to Canada.

Canada-Irish Free State Trade Agreement.—This Agreement secures for all goods the produce and manufacture of Canada imported into the Irish Free State the benefits of the lowest rates of duty accorded to similar products of any country. In return, goods the produce or manufacture of the Irish Free State, when imported into Canada, will be accorded the same tariff treatment as similar goods imported from the United Kingdom.

Canada-Southern Rhodesia Trade Agreement.—Provision is made in this Agreement for the exchange of preferential treatment on selected lists of commodities. In addition, other goods not enumerated in the schedules continue to enjoy the benefits of existing and future British preferences. Indian corn, citrous fruits and peanuts are given free entry by Canada, whereas Southern Rhodesia gives important concessions on farm machinery, boots and shoes, and wood and paper products.

In commending these Trade Agreements to the Governments of the several parts of the Empire, the Conference recorded its conviction that by the lowering or removal of barriers among themselves provided for in these Agreements the flow of trade between the various countries of the Empire would be facilitated, and that by the consequent increase of purchasing power of their peoples the trade of the world would also be stimulated and increased. Further, that the conclusion of these Agreements was a step forward which should in the future lead to further progress in the same direction and which would utilize protective duties to ensure that the resources and industries of the Empire were developed on sound economic lines.

In addition to the four Agreements with the United Kingdom, the Union of South Africa, the Irish Free State, and Southern Rhodesia, conversations took place with the delegations from Newfoundland, India, Australia and New Zealand which served to provide an opportunity for examining the openings for mutual trade and, with regard to Australia and New Zealand, discussions were held on the supplementing of the Trade Agreements of 1931 and 1932 respectively.

¹August 20, 1932.

THE REPORTS OF THE COMMITTEES.

The conclusions and recommendations of the Conference based on these reports may be summarized as follows:—

Resolutions Regarding Customs Administration.—The Conference recommended that the aims to be kept in view should be:—

- (i) The avoidance of uncertainty as to the amount of duty which would be payable on the arrival of goods in the importing country;
- (ii) The reduction of friction and delay to a minimum;
- (iii) The provision of facilities for the expeditious and effective settlement of disputes relating to all matters affecting the application of the Customs Tariff;

and that any measures which Customs Administrations might take to safeguard themselves against evasion should be consistent with these principles.

Statement Regarding Commercial Relations with Foreign Countries.—The Conference considered two broad groups of questions affecting the commercial relations of the several members of the Commonwealth with foreign countries.

In the first place, the Conference discussed the general question of the relationship between intra-Commonwealth preferences and the most-favoured-nation clause in commercial treaties with foreign powers. Each Government will determine its particular policy in dealing with this matter, but the representatives of the various Governments on the Committee stated that it was their policy that no treaty obligations into which they might enter in the future should be allowed to interfere with any mutual preferences which Governments of the Commonwealth might decide to accord to each other, and that they would free themselves from existing treaties, if any, which might so interfere. They would, in fact, take all the steps necessary to implement and safeguard whatever preferences might be so granted.

In the second place, attention was drawn to recent tendencies in foreign countries to conclude regional agreements between themselves for the mutual according of preferences which were designed as being exclusive, and not to be extended to countries which were not parties to, or did not adhere to the agreements. On this point, there was a general agreement that foreign countries which had existing treaty obligations to grant most-favoured-nation treatment to the products of particular parts of the Commonwealth could not be allowed to override such obligations by regional agreements of the character in question.

The Conference recognized that the fact that rights are accorded by most-favoured-nation treatment did not preclude a foreign country from seeking the consent of the various Governments of the British Commonwealth to the waiver of their rights in particular cases, and that these Governments must be guided by consideration of their individual interests in deciding whether or not to meet the wishes of the foreign country concerned, so long, however, as the general principle that rights of this kind cannot be arbitrarily withdrawn was fully and carefully preserved.

The Conference, in addition, recommended that where two or more Commonwealth Governments shared a common interest in any proposal for the waiver of particular treaty rights, they should consult together with a view to arriving, in so far as possible, at a common policy.

Resolutions and Statements Regarding Monetary and Financial Questions.—The Conference agreed that a rise throughout the world in the general levels of wholesale prices was in the highest degree desirable, and that for dealing with the problem in its widest aspects international action was urgently necessary.

The Conference also considered what action should be taken by the nations of the Commonwealth to help toward raising prices. In this connection the Chancellor of the Exchequer made the following statement on behalf of the United Kingdom:—

“His Majesty’s Government desire to see wholesale sterling prices rise. The best condition for this would be a rise in gold prices and the absence of a rise in gold prices inevitably imposes limitations on what can be done for sterling. A rise in prices cannot be effected by monetary action alone, since various other factors which have combined to bring about the present depression must also be modified or removed before a remedy is assured. His Majesty’s Government nevertheless recognize that an ample supply of short-term money at low rates may have a valuable influence, and they are confident that the efforts which have successfully brought about the present favourable monetary conditions can and will, unless unforeseen difficulties arise, be continued.”

The Conference in welcoming this statement recommended that the other countries of the Commonwealth should act in conformity with the line of policy as set out in it.

The Conference, further, recognized the great importance to traders of stability of exchange rates over as wide an area as possible. The complete solution of this problem was, however, dependent on the restoration of conditions for the satisfactory working of an international standard. In the meanwhile, and pending such a solution, the Conference considered the possibility of achieving valuable results in two directions—first by creating an area of stability among countries regulating their currencies in relation to sterling; and secondly, by avoiding wide day-to-day fluctuations between sterling and gold.

As regards the latter, the Conference noted with satisfaction that the United Kingdom had already established machinery aimed at preventing wide fluctuations in the gold value of sterling caused by speculative movements. As to the former, the Conference recognized the value of the countries within the Commonwealth whose currencies were linked to sterling maintaining stability between their exchange rates and looked to a rise in the general level of wholesale prices as the most desirable means for facilitating this result.

The Conference recognized that the ultimate aim of monetary policy should be the restoration of a satisfactory international monetary standard. Such a standard should so function as not merely to maintain stable exchange rates between all countries, but also to ensure the smooth and efficient working of the machinery of international trade and finance.

This postulated international agreement among the great trading nations of the world, and while certain of the States represented held very definite views on the question of the most desirable standard, the Conference refrained from making any recommendations on the subject in view of the fact that the question was shortly to be discussed at an international conference. It was agreed, however, that there were several conditions precedent to the re-establishment of any international monetary standard. The most important among them was a rise in the general level of commodity prices in the various countries to a height more in keeping with the level of costs, including the burden of debt and other fixed and semi-fixed charges;

and an adjustment of the factors political, economic, financial and monetary, which caused the breakdown of the gold standard in many countries, and which, if not adjusted, would inevitably lead to another breakdown of whatever international standard might be adopted.

Resolutions and Statements Regarding Methods of Economic Co-operation.—The Committee considering the question of methods of economic co-operation set up sub-committees on Industrial Standardization, Grading and Standards of Agricultural Products, Industrial Co-operation, Films and Radio, and on the Existing Machinery for Economic Co-operation. The resolutions accepted by the Conference on these subjects were based on the reports of the above sub-committees.

1. *Resolutions Concerning Industrial Standardization.*—The Conference recommended the observation of certain enumerated principles with a view to assisting the co-ordination of national standardization. In respect of steel, timber, industrial chemical products and replaceable parts of agricultural implements and machinery, it was recommended that immediate steps should be taken by the central standardizing bodies in those parts of the Commonwealth affected to secure a greater degree of uniformity in standard specifications and trade practices.

In order to maintain closer liaison in standardizing matters, the Conference recommended that the central standardizing bodies in the different parts of the Commonwealth should be authorized to call together, periodically or otherwise, representatives in their respective countries of the corresponding bodies, or persons otherwise designated for the purpose.

2. *Grading and Standards of Agricultural Products.*—The Conference recommended various measures designed to further the adoption of improved grading and standardization. It was felt that the British Commonwealth of Nations should work towards the adoption of uniform standards for those agricultural products which experience had shown most readily lend themselves to standardization. In order to facilitate the unification of Commonwealth grade-standards arrangements should be made for the exchange of memoranda describing in detail the grade-standards in existence in the different countries concerned.

3. *Resolutions Concerning Industrial Co-operation.*—The Conference felt that the object of co-operation in this field was not to arrest change, but wisely to direct and facilitate its course. The object of any policy of industrial co-operation within the Commonwealth should be to secure the best division of industrial activities among the several parts of the Commonwealth and the ordered economic development of each part, with a view to insuring the maximum efficiency and economy of production and distribution.

The precise nature and extent of the co-operation to be achieved in any particular industry must largely depend upon effective consultation between those engaged or proposing to engage, in that industry in any two or more parts of the Commonwealth.

The Conference therefore recommended to the various industries in which conditions were suitable for the purpose, the desirability of making arrangements for such consultation at the earliest possible date; but it recorded its belief that such consultation, to be fully effective, should be conducted between responsible persons or bodies adequately representative of the industry in each part of the Commonwealth concerned.

The Conference further recommended that the Governments concerned should facilitate and assist such consultations by all available means.

4. *Resolutions Concerning Films and Radio.*—The Report of the Sub-Committee on this subject, which was commended to the consideration of Governments, emphasized the need for the continued development of radio and film facilities throughout the Commonwealth, and the connection of these forms of instruction and entertainment not only with the commercial development but with the cultural development and the general outlook of the peoples of the Commonwealth. Gratification was expressed at the substantial progress made in the exhibition of Commonwealth

films not only in respect to quantity but in respect to quality. In some parts of the Commonwealth this was ascribed to the quota system which required that a stipulated proportion of such films be exhibited. It was recommended that close contact should be maintained between Commonwealth producers and the censorship authorities in the different countries, in order that the former might know the conditions of censorship obtaining in each part.

In respect to radio, closer liaison between the responsible bodies controlling radio in all parts of the Commonwealth was urged. It was felt that this would assist towards the ideal of ensuring accessibility to the whole Commonwealth of all material and programs of general interest.

5. Resolutions Concerning Existing Machinery for Economic Co-operation.—The Conference, having discussed the question of Economic Consultation and Co-operation within the Commonwealth, and having considered a report prepared for it on the constitution and functions of existing agencies, recommended that a Committee should be appointed forthwith, consisting of not more than two representatives of each of the participating Governments, to consider the means of facilitating economic consultation and co-operation between the several Governments of the Commonwealth, including a survey of the functions, organization and financial bases of the agencies specified in the annex report, and an examination of what alterations or modifications, if any, in the existing machinery for such co-operation within the Commonwealth were desirable.

The Conference further recommended that the Committee should report to the several Governments represented thereon not later than May 31, 1933, with a view to the consideration of their report by the several Governments not later than September, 1933.

The Committee referred to above met in London in February, 1933, and has submitted its Report to the various Governments.

Resolutions and Statements Regarding the Promotion of Trade within the Commonwealth.—1. Empire Content.—No definite understanding could be reached in the time allotted as to percentage of Empire content necessary to secure preferential tariff treatment, but the Conference drew the attention of the several Governments of the Commonwealth to the importance of this subject, and recommended that it should be investigated, bearing in mind the following principles:

(i) That though it must rest with each Government to decide what standard it will require, a greater degree of uniformity throughout the Commonwealth was desirable;

(ii) The standard required should not be such as to defeat or frustrate the intention of the preferential rate of duty conceded to any class of goods.

2. Export Bounties and Anti-Dumping Duties.—The Conference recognized that export bounties and exchange depreciation adversely affected the value of tariff preferences within the Commonwealth, and expressed the hope that with a rise in the level of commodity prices and with stabilized exchanges such bounties and the special duties which had been adopted as a means of adjusting the situation so created might be withdrawn.

Section 4.—Principal Events of the Year.

Subsection 1.—The Economic and Financial Year.

The situation in respect of international trade and finance showed steady deterioration throughout 1932, largely as the result of the general lack of confidence, the scramble for gold, the increases of tariffs to prohibitive levels, the establishment of quotas and the restrictions imposed by many countries on foreign exchange. In this stress of circumstances, most countries tried by every means in

their power to hold the gold in their possession, with the result of further immobilizing the existing gold supply and giving to gold a scarcity value which was very acceptable to the gold producers as tending to encourage production, but was much less satisfactory to the commercial world in general. Thus we find that the aggregate gold value of the recorded international trade of the world, which in 1929 had been in the neighbourhood of \$5 billions per month, was reduced in the last quarter of 1932 to about \$2 billions per month. Under these conditions, the exports of debtor countries were quite inadequate to meet the interest due on their obligations and the result in many cases was defaults occasioning a further decline of confidence in the ability of countries other than one's own to meet their engagements.

While the depression brought the value of world trade in 1932 down to about 39 p.c. of the value of 1929, yet this was largely the result of the scarcity of gold, the quantity of world trade in 1932 being estimated by the League of Nations at 73.5 p.c. of what it was in 1929 as compared with 84.5 p.c. in 1931 and 93 p.c. in 1930. This disproportion between gold values and physical quantities has been mainly responsible for the abandonment of the gold standard by most of the countries of the world, including in recent months the United States. While it is recognized that gold is by far the most suitable commodity for use in settling international balances, it is felt that there is nothing particularly sacrosanct providing that the weight of the gold dollar or the gold sovereign shall remain for all time to come what they were before the War or between 1925 and 1930. The restoration of the gold standard on a modified and equitable basis is one of the objects of the World Economic Conference sitting at London in June, 1933.

For Canada, indeed, and for the other newer countries of the British Empire, the prospects appeared more favourable than for their competitors outside the Empire. The Empire includes the United Kingdom, the largest importer in the world, which, as the result of the Agreements entered into at the Imperial Economic Conference described in the preceding section, admits the great bulk of Empire products free of duty while imposing customs duties upon the products of foreign countries. The Imperial Conference Agreements gave to Canada an assured market in the greatest importing country in the world and thus tended to promote recovery from the depression.

Agriculture.—Although the farm production of 1932 was notably larger than in the previous year, the continued fall in prices much more than offset this advantage and the total value of production declined further. Since prices of farm products continued to fall slightly faster than the prices of goods necessary to the farmer, the purchasing power of the farmer again declined slightly. The gross agricultural revenue of Canada in 1932 is estimated at \$711,898,000 compared with \$814,930,000 in the previous year. The net revenue declined from \$538,192,000 in 1931 to \$428,829,000 in 1932. Acreages under crop increased slightly and there was more uniformity of crop production throughout the country than has been apparent for some years. The western provinces harvested an average wheat crop, which was a large factor in maintaining their farm income, despite lower prices. The average price received by growers for their wheat was 7 to 8 cents lower than for the 1931 crop.

The movement of wheat into world trade has been very slow and there will evidently be a considerable increase in year-end stocks. The more favourable exchange and freight situation has encouraged a better trade in live stock and meats with the United Kingdom. Encouragement is also to be derived from the

improvement of prices since the late months of 1932. The wholesale all-commodity index on a 1926 base rose from 64.0 in December 1932 to 66.9 in May 1933, while the index of farm products rose from 42.7 to 51.2 in the same period, thus giving one more instance where farm prices rise first and most rapidly as the country moves out of depression.

Forest Products.—The production of the products of the forest, both in the form of lumber and of pulp and paper, has been greatly curtailed during the current depression. The cut of lumber, which in 1930 amounted to 3,989,421 M ft. b.m., declined to 2,497,553 M ft. b.m. in 1931. While figures are not yet compiled for 1932, an indication of a further serious decline in the latest year is given by the reported quantities of timber scaled in British Columbia, which were 2,332 million bd. ft. in 1930 and declined to 1,710 million bd. ft. in 1931 and to 1,442 in 1932. Pulp and paper production in Canada expanded greatly in the post-war period due to the immense resources of spruce forests and readily available water powers. The productive capacity of Canadian newsprint mills increased from 2,630 tons per day in 1920 to 12,630 tons per day in 1930. Newsprint production was 2,497,952 tons in 1930 and 2,227,052 in 1931, while a preliminary estimate for 1932 indicates a further decline to 1,907,566 tons. The decrease in building operations and the decline in newspaper and other forms of advertising, as a result of the depression, have curtailed the demand for the products of these industries. Furthermore, a large proportion of the annual Canadian production of these forest products is normally exported, so that the industries have been affected by the serious decline in world trade and in world prices. A disturbing factor in the world markets for agricultural and forest products in recent years has been the great increase in the quantities of these commodities exported by Russia. This re-appearance of Russia as a large exporter in direct competition with Canada has seriously reduced both the quantities exported and the prices received by Canadian exporters of these goods, and has been an important element in causing the present curtailment of production in Canada.

Mineral Production.—Canada's mining industry is in excellent condition to take advantage of any rise in the price of metals. During no time in recorded history have the prices of copper, lead and zinc and silver been so low as in the past year and at no time in Canadian history has Canada been better able to produce these metals; large metallurgical plants with the latest equipment were about completed when the decline in prices began. That they have been able to operate successfully is due in large part to efficient management and to successful low-cost metallurgical treatment. Continuous development work has maintained the ore reserves and operating companies are in a position to enlarge their outputs at the first indication of improvement in demand. In 1932 there was a decrease in quantity and a larger decrease in value in all metals except gold and in nearly all non-metallic minerals. The drop in prices of all other metals has been accompanied by a corresponding increase in the price of gold. The exchange situation has also assisted the gold mines and they have been able since September, 1931, to sell the product under extremely favourable conditions. In 1929, Canada's total mineral production was \$310,850,246; in 1931 it had declined to \$228,029,018 and in 1932 to \$182,320,150, a drop of 41 p.c. from 1929. On the other hand, gold production rose from a total of \$39,861,663 in 1929 to \$63,061,103 in 1932, an increase of 57 p.c., and the impetus gained by its increase in value, enhanced by the premium, has led to the development of new properties and the discovery of new reserves in old mines. All these factors indicate a larger production of gold during the next few years.

The level of employment in the mines was lower than in 1931, but the reduction in personnel was not so pronounced as in some other industrial groups. The employment index in mining, based on the 1926 average as 100, stood at 99.2, compared with 107.7 in the preceding year, while the number of persons on the pay rolls of the co-operating mine operators averaged 44,800 in 1932. Employment in the extraction of metallic ores was maintained in good volume, although activity was rather less than in 1931; coal mining showed a moderate falling-off from the level of the preceding year, while other non-metallic mineral mines were adversely affected by the general dullness in construction.

Hydro-Electric Power.—Although no new water-power development of any size was started during 1932, projects under way at the beginning of the year and completed during the year increased the total installed capacity to 7,045,260 horse-power, or by 378,923 horse-power. More than half of the total has been developed during the past nine years and almost two-thirds of it since the end of 1918. Work is well under way on three large projects totalling 700,000 horse-power, the major part of which should be completed in 1933. The output of both water and fuel electric power plants in Canada during 1932 amounted to 16,007,119,000 kilowatt hours. This was a decrease from the 1931 output of 323,748,000 kilowatt hours, but the decline of 567,135,000 kilowatt hours in exports to the United States more than accounted for this decrease, indicating an increased consumption in Canada. Canada was second only to the United States in the production of electric energy by central electric stations. In Canada 98 p.c. of the output was produced by water power, whereas the ratio in the United States was 40 p.c.

Manufactures.—In spite of the general curtailment in manufacturing since 1929, certain groups of industries have maintained a fairly high level of activity. This is particularly the case with the food and clothing industries. Thus the index of employment (1926=100) in manufactures of edible plant products was 110.9 for 1929 and 94.6 for 1932, of edible animal products, 113.8 in 1929 and 101.5 in 1932, and of textile products, 107.2 in 1929 and 97.0 in 1932. This is more or less to be expected since industries providing many of the necessities of life are included in these groups. Moreover, these same groups did not expand in production during the period from 1923 to 1929 (see pp. 409-410 of this volume) to anything like the same extent that groups producing luxuries and equipment did. On the other hand, nearly all branches of the iron and steel industry have been severely affected by the depression. In the primary section of the industry, the production of pig iron, which reached a high record at 1,080,000 long tons in 1929, dropped to 420,038 tons in 1931 and to 144,130 tons in 1932, while the production of steel, which reached a total of 1,378,000 long tons in 1929, was 672,109 tons in 1931 and 342,788 tons in 1932. In appraising this curtailment, it should be remembered that in 1929 the industry was more actively employed than in any other peace-time year. Since that time the contraction of operations in the construction industry, the drastically reduced expenditures on improvement and equipment forced upon the railways by falling revenues, and the greatly reduced demand for industrial equipment, agricultural machinery and motor vehicles, have all had a depressing effect upon the volume of operations in the primary iron and steel industry. As indicated, this has been partially due to a falling-off in the activity of the secondary iron and steel industries. The index of employment (1926=100) in the agricultural implement industry dropped from an average of 115.6 for 1929 to 37.2 for 1931 and 26.0 for 1932, as a direct result of the reduced purchasing power of the agricultural

population. The production of motor vehicles in Canada reached a high record in 1929 with a total of 262,625 cars and trucks, but declined to 82,621 in 1931 and 60,816 in 1932, a smaller total than in any year during the period of observation commencing in 1917. This has been the result not only of reduced purchases of cars in the domestic market due to the hard times, but to a large falling-off in exports, which amounted to 102,382 in the calendar year 1929 and only 13,022 in 1932.

Construction.—The decline in construction which was in evidence during 1931 was still more pronounced during 1932. The value of construction contracts awarded during the year was \$132,872,000 compared with \$315,482,000 in 1931 and \$456,999,600 in 1930, a decline of 57.9 p.c. from the 1931 total and 70.9 p.c. from that of 1930. The total was the lowest since 1918. The smallest declines as compared with 1931 occurred in the contracts awarded for public garages, office buildings and warehouses, while residential building showed the greatest falling-off in this comparison. The building permits issued by 61 cities declined from \$166,379,325 in 1930 to \$112,222,845 in 1931 and \$42,319,397 in 1932, or by 74.6 p.c. in the two years.

External Trade.—The external trade of Canada has been affected during the past three years, so far as exports are concerned, by the smaller crops from 1929 to 1931 and the much lower prices obtained for them, as well as by the general trade depression throughout the world. The decline in imports in 1932-33 has been greater than that of exports, the normal position for Canada in a time like the present, when, with heavy interest payments to make abroad, there is no large inflow of foreign capital taking place. Exports during the fiscal year 1933 were \$480,713,797 compared with \$587,565,517 in 1932 and \$1,388,896,075 in 1929, the record year since the War. Imports in the fiscal year 1933 amounted to \$406,271,329, compared with \$578,503,904 in 1932 and \$1,265,679,091 in 1929, which was the peak year for imports.

Railway Transportation.—The passenger traffic of railways in Canada has shown a more or less steady decline during the past decade, but the decline has been greatly accelerated during the past three years and for 1932 it was less than half of the 1929 traffic. Freight traffic has also suffered and would have been considerably less but for the fairly steady flow of grain from the western provinces which was affected less than any other class of freight by the world-wide stagnation. Compared with 1929 traffic the tonnage of agricultural products was reduced by 3.1 million tons, or 14.3 p.c.; animal products was reduced by 0.8 million tons, or 27.2 p.c.; mine products by 22.9 million tons, or 54.0 p.c.; forest products by 9.6 million tons, or 63.4 p.c. and manufactures and miscellaneous freight by 17.7 million tons, or 55.2 p.c. Although the rates on grain are very low, the long haul brings the average revenue per ton up to around \$3.40 as against \$3.50 for all freight. Gross revenues of the railways, however, were greatly depleted and for 1932 the principal railways showed a decrease of \$64,000,000, or 18 p.c., compared with 1931 revenues. Although drastic reductions were made in operating expenses by cutting wages and otherwise, certain maintenance and other expenses had to be maintained irrespective of traffic and net operating revenues were down by \$843,000. Car loadings for the first 23 weeks in 1933 were below 1932 loadings by 171,358 cars, or 17.9 p.c., but were improving during May and June, the decrease at the middle of April being 20.2 p.c.; with a large stock of grain in the western country elevators (97 million bushels on June 9) to be moved to make room for the new crop and indications of improvement in other classes of freight, car loadings should pass the 1932 records before the end of the year.

Canal Traffic.—Canal traffic, unlike most of the indexes, showed an increase in 1932, largely owing to the stimulus given by the opening of the Welland Ship Canal. Total freight carried in 1932 was 17,960,650 tons, as compared with 16,189,074 and 14,803,334 tons in 1931 and 1930 respectively. The increases were mainly in the traffic on the Welland and the St. Lawrence canals, and appear to be not unconnected with the decline in railway freight traffic.

Currency and Banking.—The impact of the depression in Canada was much less severe in the purely financial sphere than in the economic, the soundness of the Canadian banking structure being undoubtedly one of the most important individual factors in saving the Dominion from the worst consequences of the depression. The maintenance of confidence in the solvency of the banks is indicated by the fact that the total of notice deposits was larger at the end of December, 1932, than a year earlier, a total of \$1,377,520,000 compared with \$1,360,042,000 at the end of 1931. The downward trend of current loans during 1932 forms a sharp contrast with the relative stability of notice deposits. Current loans amounted to \$964,024,000 at the end of 1932 compared with \$1,082,097,000 at the end of 1931. The surplus of notice deposits over current loans at the close of 1932 was consequently \$413,496,000 compared with \$277,945,000 at the end of 1931. This surplus increased to \$486,519,000 (\$1,399,542,000 - \$913,023,000) at April 30, 1933. Owing to the diminished demand for credit caused by the low level of business operations and the deflation of wholesale prices, the banks have added to their holdings of bonds and high grade securities until the amount at the end of April, 1933, was greater than at any other time in the history of Canadian banking, *viz.*, \$805,893,000. The extensive purchase of government bonds by the banks during the current period has been one of the most constructive factors toward counteracting the influence of the depression. The absence of hoarding of currency shows the confidence of the people of Canada in their currency and banking system. During 1932 the total notes in the hands of the public varied only between \$139,500,000 in November and \$154,900,000 in June. The latest available figure is \$153,150,000 in April, 1933.

Interest Rates.—As the interest rate on current and call loans in Canada is fairly well stabilized, the trend of interest rates may be determined by the prices of high-grade bonds and those of the Ontario Government have been used as representative, its bonds having been subject to the Dominion's war income tax throughout. The yield on Ontario Government bonds reached a high point at 5.00 p.c. in May and September, 1929, and declined to 4.50 p.c. in December, 1930. There was a further decline to 4.40 p.c. by September, 1931, after which the rate rose steeply to 5.20 p.c. in December, 1931, and 5.74 p.c. in January, 1932. A declining trend was in evidence again in 1932, the rate in the final month being 4.92 p.c., falling still farther to 4.70 p.c. in May 1933.

Prices.—The general trend of prices during 1932 was downward, though the decline was not so steep as in 1931. The index number of wholesale prices, on the base of 1926 equals 100, fell from 70.4 in December, 1931, to 64.0 in December, 1932. A reversal of trend was apparent in the early months of 1933, the index number rising from 63.4 in February to 67.6 in June; this rise is generally considered to indicate the arrival of better times.

Subsection 2.—Other Principal Events of the Year.

Provincial General Election.—The Eighteenth Legislature of the Province of Manitoba was dissolved on May 7, 1932, and a general election took place on June 16, 1932, resulting in the retention of the Bracken Government in power. The voting in the city of Winnipeg was conducted by the method of proportional representation.

St. Lawrence Deep Waterway Treaty.—A Treaty providing for the construction of a deep waterway not less than 27 feet in depth for navigation from the interior of the continent of North America through the Great Lakes and the St. Lawrence river to the sea, with the development of the water power incidental thereto, was signed in Washington by the Canadian Minister in Washington and the Secretary of State of the United States on July 18, 1932. This Treaty had not been ratified by the United States Senate up to the end of June, 1933.

Official Opening of the Welland Ship Canal.—The new Welland Ship Canal was officially opened by the Governor General of Canada on Aug. 6, 1932, during the Imperial Economic Conference. The Heads of the various Delegations to the Conference joined in congratulating Canada on this great engineering achievement.

The general dimensions of the new canal are as follows: length, lake to lake, 25 miles; width at water line, 310 feet; width at bottom, 200 feet; depth of canal, 25 feet; depth at lock sills, 30 feet; number of lift locks, 7; usable length of locks, 820 feet; usable width, 79 feet; lift of each lock, 46.5 feet; total lift, 325.5 feet.

As the result of the construction of the canal, the largest vessels on the upper lakes are now able to go down into lake Ontario and down the St. Lawrence river as far as Prescott where a large elevator has been constructed to handle grain on its way to the sea.

Subsection 3.—Obituary.

1932.—(See also pp. 1003-1004 of the 1932 Year Book.) June 3, Lt.-Col. Alex. Montgomerie, C.B.E., Halifax, N.S., former M.L.A. for Halifax. June 6, Hon. Henry Miles, Montreal, P.Q., former member Legislative Council for Victoria. June 7, Thomas McMillan, Stratford, Ont., M.P. for South Huron. June 13, Frederick W. Babington, Ottawa, Ont., B.Sc., F.C.I.C., F.C.S., former Chief Analyst, Department of Customs. July 1, Arthur Gilbert, former M.P. for Drummond-Arthabaska, Que. July 3, Chas. T. Thornton, Otono, Ont., former M.P. for Durham. July 6, C. Noel Wilde, Mexico City, Mexico, Canadian Trade Commissioner to Mexico. July 10, Hon. H. A. McKeown, Westfield, N.B., late Chairman of the Board of Railway Commissioners and former Chief Justice of the Supreme Court of N.B. July 11, Michael Manson, M.L.A. for Mackenzie, B.C. July 19, Hon. Jan. 24, His Excellency the Governor General in Council has been pleased to cancel the Commission dated Dec. 17, 1932, issued by error in the name of John Cormack, Esq., described as Dominion Trade Commissioner at Dublin, I.F.S., and authorizing him to administer oaths concerning actions in the Supreme and Exchequer Courts of Canada and to direct the issue of a new Commission appointing James Cormack, Esq., Dominion Trade Commissioner at Dublin, I.F.S., to administer the aforesaid oaths. April 8, Ralph McDonald Spankie, Esq., K.C., Deputy Registrar of the Exchequer Court of Canada; to be a Commissioner to administer oaths and to take and receive affidavits, declarations and affirmations in any proceedings in the Supreme and Exchequer Courts of Canada. April 8, Paul C. Quinn, Esq., Saint John, N.B.; to be a Commissioner to investigate such charges of political partizanship against Government employees as may be referred to him.

Day of General Thanksgiving.—Monday, Oct. 10, 1932, was appointed by proclamation as a "day of general thanksgiving to Almighty God for the bountiful harvest and other blessings with which Canada has been favoured this year"

APPENDIX I.

1.—Immigration in the fiscal year 1932-33.

During the fiscal year ended March 31, 1933, the immigrants into Canada, classified as in the summary table appearing on p. 187 of this volume, were as follows: From U.K., 3,097; from U.S.A., 13,196; from other countries, 3,589; total, 19,872.

Canadians returned from the United States during the fiscal year ended March 31, 1933, classified as in the table on p. 200, were as follows: Canadian-born, 16,320; British-born with Canadian domicile, 757; naturalized Canadian citizens, 548; total, 17,625.

2.—External Trade of Canada in the fiscal year 1932-33.

Preliminary figures of the external trade of Canada for the fiscal year ended Mar. 31, 1933, show a grand total trade of \$886,985,126, as compared with a figure of \$1,166,089,421 in the preceding year, or a decrease of \$279,084,295. The decrease in the imports was \$172,232,575. Domestic exports decreased by \$102,544,347, and foreign exports by \$4,307,373. Figures by industrial groups are given in the following table, where the figures of imports and exports may be compared with the totals given for previous years in the tables on pp 516, 524-525 of this volume.

APPENDIX II.

Miscellaneous Statistics of the Census of Agriculture.¹

Table 1, following, gives final results of the Census of Agriculture taken as of June 1, 1931, regarding occupied farms, farm areas and values, mortgage indebtedness and farm expenditures. The outstanding feature of the table is the decrease shown in the number of owned farms and the large increases in the other two classes "partly-owned, partly-rented" and "occupied by tenants" as compared with 1921 census. The percentage of all farms fully owned for the whole of Canada has decreased from 86.52 p.c. in 1921 to 80.05 p.c. in 1931. The large acreage in the "partly-owned, partly-rented" type in the western provinces is due to the fact that most ranches are composed of small acreages actually owned and additional large acreages of pasture leased from the governments.

Farm values, when compared with 1921, show that for Canada as a whole they have decreased by 20.33 p.c. and most of this decrease has been suffered by land and live stock, the former accounting for 74.9 p.c. of the total decrease and the latter 21.8 p.c. Generally speaking the eastern provinces show a smaller decline in values than the Prairie Provinces.

Statistics covering mortgage indebtedness were compiled for the first time for Canada in 1931. Every farm owner was asked for a statement of the mortgage debt on his farm. The instructions to enumerators read as follows: "The mortgage debt to be reported includes not only the debt secured by an instrument called a 'mortgage' but also debts protected by deeds of trust, judgments or by any other legal instrument that partakes of the nature of a mortgage and which has the same legal effect. It has reference only to a debt secured by a mortgage, or by an equivalent legal instrument on lands and buildings" This, however, does not represent all the farmers' obligations as it covers only land operated by the owners themselves. The total mortgage debt reported on owned farm land in Canada amounted to \$671,776,500 on June 1, 1931. This amount was distributed among the provinces as follows: Ontario 29.74 p.c., Saskatchewan 26.16 p.c., Alberta 16.00 p.c., Quebec 14.35 p.c., Manitoba 8.82 p.c., British Columbia 2.26 p.c., Nova Scotia 0.98 p.c., New Brunswick 0.97 p.c., and Prince Edward Island 0.72 p.c.

In order to state the ratio of the mortgage debt to the value of the farms, only the "fully-owned" farms were considered, because in the case of the "partly-

¹ This material has been revised by E. S. Macphail, Chief, Demography Branch, Dominion Bureau of Statistics.

owned, partly-rented" farms the value of the farm was stated as a whole, consequently it is impossible to determine the value of the part which was owned. Since the number of fully-owned farms represents over 79 p.c. of the total, the sample is sufficiently large to be representative of the whole. For the Dominion as a whole 35.56 p.c. of the fully-owned farms reported mortgage debts. This percentage was distributed as follows: Prince Edward Island 33.49 p.c., Nova Scotia 10.35 p.c., New Brunswick 17.61 p.c., Quebec 31.74 p.c., Ontario 40.82 p.c., Manitoba 39.68 p.c., and British Columbia 25.88 p.c. The ratio of the mortgage debt to the value of the mortgaged farm is as follows: Canada 40.86 p.c., Prince Edward Island 33.74 p.c., Nova Scotia 40.45 p.c., New Brunswick 38.26 p.c., Quebec 38.27 p.c., Ontario 44.79 p.c., Manitoba 49.46 p.c., Saskatchewan 38.11 p.c., Alberta 38.75 p.c., and British Columbia 34.76 p.c.

Statistics of farm expenditures are also given in Table 1. The figures of taxes are for farms occupied by owners only and therefore do not represent the whole amount of taxes paid. There are no comparable figures for previous censuses, since this information was first asked for on the schedules in 1931.

The expenditure for feed has decreased generally in all the provinces from 1921 to 1931, but the indications are that the decreases are not in the quantities bought but in the prices which prevailed. There has been an increase in the use of fertilizers since 1921. This increase has taken place mostly in Ontario and the Maritime Provinces and may be associated with the growing of potatoes and fruits.

Information was obtained for the first time in 1931 relating to cash expenditure for electric light and power and for spraying chemicals.

The amount of money expended for labour may be taken as an index of the changes which have taken place in methods of farming during the period 1921-31. Compared with 1921 there has been an increase in money spent for hired labour in the Maritime Provinces, where specialized farming requiring manual labour has been developed during the past decade. There was, however, a decrease in labour costs in most of the other provinces where improved machinery has done away to a large extent with the necessity of using manual labour.
