PREFACE

This edition of the Statistics Canada Catalogue of Publications includes all current Catalogue numbered titles available from the department as of January 1, 1980. The next planned release of the Catalogue will be early 1981.

A number of changes and innovations have been incorporated in the 1980 edition of the Catalogue to make the final product more accurate, more current and more easily referenced. In particular: discontinued publications have been removed from the Catalogue except when the final issue appeared in 1979; old occasional publications (containing data more than 10 years old but excluding publications from the decennial Census of 1971) have been removed; all bibliographic information, including titles and prices, plus all abstracts have been verified for accuracy of content and corrected where necessary; publications resulting from the 1971 and 1976 Censuses are presented in separate blocks; the overall format of the Catalogue has been modified to more efficiently utilize available printing space, and; the photocomposition of the Catalogue is now undertaken utilizing a fully automated system, greatly increasing the timeliness of the final product. For budgetary reasons, the unpublished data section of the Catalogue has been eliminated. Information on unpublished data and non-catalogued publications is available from the User Advisory Services Reference Centres which are listed in the Introduction.

This Catalogue includes all publications from the 1971 and 1976 Censuses, although in certain instances the publications will be released after the reference date of January 1, 1980. Users should note that publications from the 1976 Census will not be listed in a separate Census Catalogue as previously announced.

Users should also note that the 1975 and subsequent editions of the Catalogue ceased listing all "vintage" publications. For users wishing to utilize such publications, it is suggested that reference be made to the following: the Historical Catalogue (which includes publications issued from 1918 to 1960); the 1968 edition of the Catalogue (which includes publications issued from the 1956 quinquennial Census of Canada); the 1973-74 edition of the Catalogue (which includes publications from the 1960-1973 period), and; post-1975 Catalogues (which include all publications issued from June 1973 to December 1979).

As in the case of previous Catalogues, single copies are provided at no charge. There is, however, a charge of \$5.00 for each additional copy in multiple copy requests (one copy of the Catalogue is considered to consist of one copy of each of the English and French versions). Additional copies of the Catalogue can be ordered from User Advisory Services, Ottawa, Ontario K1A 0T6, or from any of the User Advisory Services Reference Centres.

The preparation of this Catalogue has been under the direction of its Editor, Douglas Loken, with the valuable assistance of Susan Strader and Chris Habrowych.

INTRODUCTION

Statistics Canada responsibilities in the Canadian statistical system concern the whole range of statistics on the economic and social activities of the Canadian people.

The publishing program of the department reflects this responsibility, and is designed to make statistical information readily available to users in the forms in which it is most frequently wanted, including publications and computer print-outs, micro-form and computer tapes. Data are also available on-line through the Canadian Socio-economic Information Management System (CANSIM).

This Catalogue is presented in three main sections. The first section presents general introductory material, including summary lists of changes to the publications program of the department since the last issue of the Catalogue was released. The second section of the Catalogue provides annotations on all current Statistics Canada publications bearing Catalogue Numbers. The third section of the Catalogue is a detailed Subject/Title Index.

In using Statistics Canada data, the user should be aware of the fact that all information compiled by the department is subject to the clauses of the Statistics Act which protects organizations and persons from individual disclosure.

Formation of Five-digit Catalogue Numbers

Most Statistics Canada publications can be identified by their unique five digit Catalogue Numbers. These numbers are formed in the following way:

First Digit: Under the grouping arrangement, all Statistics Canada publications are classified into 8 major subject groups, as follows:

- 1 General
- 2 Primary Industries
- 3 & 4 Manufacturing
- 5 Transportation, Communications and Utilities
- 6 Commerce, Construction, Finance and Prices
- 7 Employment, Unemployment and Labour Income
- 8 Education, Culture, Health and Welfare
- 9 Census

Second Digit: Each of the above major groups is further divided into sub-groups. For example, Major Group 3 (Manufacturing) is divided into 6 sub groups: (1) General Survey; (2) Foods, Beverages and Tobacco; (3) Leather and Rubber Products; (4) Textiles and Apparel; (5) Wood Products; (6) Paper Products and Printing.

Third Digit: The third digit indicates the frequency of publication as follows:

- 0 Issued more than once per year
- 2 Issued annually
- 4 Issued biennially
- 5 Issued once only or occasionally
- 6 Issued annually with various sub-titles
- 7 1971 Census
- 8 1976 Census

Fourth and Fifth Digits: The fourth and fifth digits are used to give each title its own unique permanent number.

The numbers are allocated sequentially as new publications are officially approved by the department.

The following is a typical example of the above described catalogue numbering system: Catalogue Number 84-001 has been assigned to the publication **Vital Statistics**. This Catalogue Number was created as follows:

- 8 Major Group - Education, Culture, Health and Welfare
- 4 Minor Group - Vital Statistics
- 0 Frequency - Issued more than once per year (in this case, quarterly)
- 01 First Catalogue Number allocated in this group

International Standard Serial Numbers (ISSN)

The National Library of Canada, in cooperation with Statistics Canada, is assigning 8 digit International Standard Serial Numbers to all serial Statistics Canada publications for the purpose of facilitating identification, citation, ordering and bibliographic control on an international basis. With this edition of the Catalogue, complete coverage has been implemented.

Local Access to Data - Reference Services - Regional Advisors - Libraries

User Advisory Services has statistical Reference Centres in nine major cities across the country supported by a head office staff in Ottawa. Toll free telephone lines to the Reference Centres are available in several areas.

At no cost to the user, trained staff in the nine cities:

- Answer over 200,000 telephone inquiries a year for statistical data or advice on the availability, meaning and uses of the data;
- Maintain libraries of all Statistics Canada's recent publications as well as some historical ones and additional related material, some of which is on microform;
- Open the libraries to the public during normal working hours, provide users with study areas to work with the publications;
- Advise users on how to purchase Statistics Canada information through publications, microfiche and microfilm, and computer based products or services;
- Retrieve information directly from CANSIM, Statistics Canada's machine-readable database or advise users about the on-line services.

Each local Reference Centre of User Advisory Services has one or more Regional Advisors who:

- Assist both experienced and inexperienced users with their data problems;
- Promote the use of statistical data by participating in conferences, convention displays, workshops, seminars and briefing sessions;
- Provide important feedback to Ottawa on the statistical needs and problems of users so as to help Statistics Canada improve the content and availability of its products and services.

Toll-free access to the Halifax Reference Centre is available throughout Nova Scotia, New Brunswick and Prince Edward Island by dialing 1-800-565-7192, while in Saskatchewan, the Regina Reference Centre is available by dialing 1-800-667-3524, and in Alberta, the Edmonton Reference Centre can be reached at 1-800-222-6400.

In addition to being available from User Advisory Services local Reference Centres, Statistics Canada publications are also available for reference purposes from a large number of libraries throughout Canada, including most provincial legislative libraries and many public and university libraries. A complete historical collection of Statistics Canada material is held by the Statistics Canada Library in Ottawa and is available to the general public for reference purposes.

Canadian Socio-economic Information Management System (CANSIM)

One of the ways of accessing Statistics Canada's information is through

CANSIM, the agency's machine readable database. CANSIM comprises two modules, the CANSIM Time-Series module, containing current and historical information from a broad range of interrelated socio-economic fields, and the CANSIM Cross-Classified module, which addresses the demand for multi-dimensional data mostly expressed by scholars and practitioners in the fields of demography, education, health and justice.

The Time-Series module comprises major groups of data from the following subject-matter areas:

- System of National Accounts
- Prices and Price Indexes
- Labour
- Manufacturing and Primary Industries (including Fuel, Power and Mining)
- Capital and Finance
- Construction
- Merchandising and Services
- External Trade
- Transportation
- Agriculture and Food
- Population Estimates and Projections
- Health and Welfare

It also contains data from numerous tables in the Canadian Statistical Review, the Bank of Canada Review (including selected U.S. statistics) and the Quebec Statistical Review. The content is constantly growing as new sets of data are added. Currently some 250 publications are represented in part or in full in the CANSIM Time-Series module.

The CANSIM Time-Series module is offered to users in two formats: the CANSIM Main Base and the CANSIM Mini Base. The CANSIM Main Base currently contains some 290,000 time series and is updated on a daily basis, usually at the same time the data is officially released. It is located on on-line disk packs at the CANSIM host service bureau. The CANSIM Mini Base is a standard subset of data which originates from the CANSIM Main Base. The CANSIM Mini Base currently contains approximately 24,000 of the most widely used time series. The CANSIM Mini Base is updated daily, within the next working day of the series being released on the CANSIM Main Base. The CANSIM Mini Base is offered by a number of Secondary Distributors.

Recognition of the increasing use of multi-dimensional information in a machine-readable form has led to the development of the CANSIM Cross-classified module. The approach has been to adapt machine-processing techniques to current uses of multi-dimensional statistical aggregations.

Major data sources for the CANSIM Cross-Classified module currently are the Health, Justice, and Education, Science and Culture Divisions of Statistics Canada, as well as the Census of Population data base, from which larger geographical aggregations are currently being added.

The CANSIM Cross-Classified module will be of particular interest to analysts and researchers specializing in social studies and societal evolution and problems. It meets their need for cross-tabulation and analysis of data on social conditions (family structure, occupation, income and others) available from the Census data base with data on social phenomena in the fields of health, welfare, justice and others. At the present time, the CANSIM Cross-Classified module is available only at the CANSIM host service bureau.

At the present time, the CANSIM host service bureau is DataCrown Inc. (formerly Systems Dimensions Limited), 770 Brookfield Road, Ottawa, Ontario K1V 6J5. Further information, including lists of secondary

distributors, may be obtained from CANSIM Division, Statistics Canada, R.H. Coats Building, Holland Avenue, Ottawa, Ontario K1A 0T6, (613) 995-7406.

Publications in Microform

In addition to publications and machine readable data, Statistics Canada makes available large blocks of data in microform. A large part of the output of the 1976 Census of Population and Housing is available on microfiche, as are almost all 1976 Census of Agriculture tabulations and all current serial publications of the External Trade Division. Further information regarding the current microform offerings of the department can be obtained by contacting any of the Statistics Canada local Reference Centres.

The complete historical collection of Statistics Canada publications, with the exception of the "Statistics Canada Daily", is being reproduced on microfiche under arrangement with Micromedia Limited of Toronto. A project which has filmed all publications up to and including 1975 has created the most comprehensive body of Canadian statistical material ever assembled. Many rare and out-of-print items are included. Further information on the project is available from: Micromedia Ltd., 5th Floor, 144 Front Street W., Toronto, Ontario M5J 1G2, (416) 593-5211.

How to Order Publications

When ordering, the Catalogue numbers, titles and issues (month, year) of publications should be quoted. Subscription orders are accepted for all serial publications, but not for biennial and occasional publications. Orders should be forwarded to Publications Distribution, Statistics Canada,

Ottawa, Ontario K1A 0T6. It should be noted that subscriptions do not commence with the current issue of an ordered publication, but rather begin with the issue released following receipt of the subscription order. Individual publications may be ordered from Publications Distribution directly or the User Advisory Services local Reference Centres may be of assistance. When ordering, it is important to indicate if a subscription or a casual order, is desired. Alternatively, publications may be ordered through Government of Canada "authorized agent" bookstores throughout the country. These agents are listed in the Yellow Pages of the telephone book under "Book Dealers-Retail-Government of Canada Publications".

Those interested in all Statistics Canada data can order the Full Publication Service and receive publications automatically as soon as they are released. The current cost is \$4000 per year for the service to locations in Canada and \$4800 for the service outside Canada. The Full Publication Service does not include decennial or quinquennial Census Publications.

Prices listed in this Catalogue apply only to purchases within Canada and are subject to change without notice. Customers in other countries must add 20% to quoted prices to cover additional postage and handling charges. An additional charge is levied if Air Mail is required. Remittances should be in the form of cheque or money order made payable to the Receiver General for Canada. Currency and postage stamps should not be used in ordering publication by mail.

As credit is allowed in particular circumstances, delays in order fulfillment may be avoided by prepayment. However, Statistics Canada is prepared to invoice on a monthly basis customers who frequently order publications. Application forms for this service are available from Publications Distribution or from User Advisory Services local Reference Centres.

NEW PUBLICATIONS

Following is a list of new English Statistics Canada publications issued since the 1978-79 Catalogue was published. For serial publications, the date of first issue is given. Publications resulting from the quinquennial and decennial censuses are not included in the list.

3: MANUFACTURING

Description of Reports

Publications listed under "Manufacturing" relate to Division 5 of the Standard Industrial Classification.

These publications consist of a large number of reports, some of which provide summarized and analytical information for manufacturing as a whole and others which provide detailed information on individual manufacturing industries or on various commodities.

Although titles of the various reports are broadly indicative of the subject matter covered, explanatory notes have been included under title headings where necessary. Such notes are generally restricted to reports dealing with the manufacturing industries as a whole (sub-group 31) and to those publications dealing with commodities. The reports on individual industries are generally similar to each other in character and include such principal statistics as: number of establishments, number and type of employees and their salaries and wages, cost of fuel and electricity, value of shipments of goods of own manufacture, and value added. Comparative statistics are given for Canada for earlier years and for the preceding year for provinces. Also shown are the value and, where applicable, quantities of major products shipped and purchased materials used by establishments classified to the industry. Some reports also show total manufacturers' shipments of relevant commodities without regard to industry of origin, but this is given comprehensively for all commodities in an annual report on products shipped by Canadian manufacturers.

Primarily due to the fact that annual surveys cannot be initiated until the end of the calendar year and to the time required to collect edit and compile extensive data, most annual industry reports are not available until a year or more after the end of the year of survey.

In addition there are a large number of publications which are published more frequently than once a year and which contain current information on commodities (generally shipments, production or consumption). Although not exactly suitable to industry analyses, except in the case of one-industry commodities, they have proven to be most useful in commodity analyses.

Current estimates of the value of shipments, inventories and orders for manufacturing industries in total, numerous sub-aggregations and selected industries are issued monthly. They are based on a sample survey of establishments representing about 75% of the shipments, determined from the Census of Manufactures.

31: General Survey

- 31-001 **Inventories, Shipments and Orders in Manufacturing Industries.** Monthly. Bilingual. Up to 94 pp. First Issue, February 1947. (ISSN 0701-7367).

Estimated values of manufacturers' shipments, inventories and orders by months; Canada totals, durable and non-durable goods industries, major groups and selected individual industries as defined by the Standard Industrial Classification; also grouped by an economic use classification; shipments totals by province and major groups within provinces; inventory to shipments ratios; concepts and methods. Principal series also shown after adjustment for seasonal variation.

\$3.00 a copy, \$30.00 a year

- 31-001S **Inventories, Shipments and Orders in Manufacturing Industries.** Annual Supplement. Bilingual. 54 pp. First Issue, 1976-1978. (ISSN 0225-3712).

Three years of estimated monthly values of shipments in manufacturing industries by industry group within provinces, and shipments, inventories and orders values in selected individual industries. The earliest 12 months of data in each series have been adjusted to annual census of manufactures benchmark data for that year. Estimated values for the subsequent 24 months link benchmark year estimates with those in current issues of publication 31-001. Monthly series of benchmark year data for 1970 to

1975 are contained in 31-519, 31-520 and 31-521. Available only to subscribers to 31-001.

Free

- 31-003 **Capacity Utilization Rates in Canadian Manufacturing.** Quarterly. Bilingual. Up to 56 pp. First Issue, 1961-1976. (ISSN 0700-1517).

Presents capacity utilization rates for Canadian manufacturing by major group according to the 1970 Standard Industrial Classification, as well as aggregates for durable, non-durable and total manufacturing. The series are an analytical extension of the capital stocks series presented in publication 13-211, Fixed Capital Flows and Stocks.

- 31-522 **Destination of Shipments of Manufacturers, 1974.** Occasional. Bilingual. 227 pp.

Shows for each province of origin, the dollar value of total shipments of goods of own manufacture destined to each province and to the export market, by industry and industry group; for each industry and industry group, an origin and destination matrix of manufacturers' total shipments of goods of own manufacture by province, with export destination totals; for Census Metropolitan areas, destinations of all-industry shipments of manufacturers.

\$2.80

- 31-523 **Structural Aspects of Domestic and Foreign Control in the Manufacturing, Mining and Forestry Industries, 1970-1972.** Occasional. Bilingual. 220 pp.

Uses establishment-based data to highlight the element of foreign control in various structural characteristics of Canadian industry. Examines unconsolidated and consolidated enterprises; industrial concentration and diversification; and the relative importance of the leading 100, 500 and 1,000 consolidated enterprises, by industry and controlling country. Includes industry and enterprise analyses with illustrative tables; contains highlight, introduction and glossary.

\$2.80

- 31-524 **Inventory Accounting Methods in Manufacturing Industries, 1975.** Occasional. Bilingual. 100 pp.

Shows accounting methods used to determine the book value of manufacturers' inventory in 1975 and estimates of the relative importance of each method. Data are available for individual industries and industry groups for each of four inventory categories and total inventory. Also shown are estimates of inventory turnover periods by industry and by stage of fabrication. Includes an explanation of concepts and methods used.

\$2.10

- 31-528 **Concepts and Definitions of the Census of Manufactures.** Occasional. Bilingual. 118 pp.

Concepts and definitions used in the annual Census of Manufactures, with explanations of recent changes up through the 1977 Census. Sample 1977 questionnaires and reporting guide. Harmonization of Industrial Commodity Classification and Standard Industrial Classification, showing to which industries commodities serve to classify establishments.

\$1.40

- 31-529 **Apparent Domestic Availability of Selected Manufactured Products, 1975.** Occasional. Bilingual. 120 pp.

Measures the apparent domestic availability for some 800 commodities or

groups of commodities listed according to the Industrial Commodity Classification and relating shipments by Canadian Manufacturers to imports, exports and re-exports in order to provide an indication of the apparent market in Canada for the commodities included in the main table of the report.

Census Tract Series.

Reports in the Census Tract Series present basic population, housing, household, family and labour force characteristics for statistical areas (i.e., census tracts) within each of 29 larger rural centres and census metropolitan areas. Two reports are being issued for each tracted centre - one providing distributions of 100 percent data ("A" series) and the other containing classifications of sample data ("B" series). Each report contains an index map outlining the locations of the census tracts for that particular area.

"A" Series.

Census tract reports in the "A" series present basic distributions by age, sex, marital status, and mother tongue as well as family and household size and composition and housing attributes of tenure, type of dwellings, number of rooms, and sanitary facilities.

Census Analytical Studies.

- 99-750E **Canada's Farm Population: Analysis of Income and Related Characteristics.** by Paul Shaw. E. and F. 284 pp.

The main topics include socio-economic and demographic attributes of the farm population, analysis of the effects of these and other characteristics on farm family incomes, and the determinants of farm performance. This study is the first in-depth study of characteristics of Canada's farm population, using data from linkage of the Agriculture and Population Censuses.

\$2.80

- 99-751E **The Frequency of Geographic Mobility in the Population of Canada.** by Leroy O. Stone. E. and F. 131 pp.

A demographic analysis of an important aspect of the behaviour of Canadians in their geographic mobility. It concentrates upon variations in mobility patterns amongst different groups within the population rather than on the spatial pattern of residence change.

\$1.40

- 99-752E **Occupational Composition of Canadian Migration.** by Leroy O. Stone. E. and F. 121 pp.

The main topic is the analysis of the effects of regional characteristics on the occupational and educational composition of migration.

\$1.40

- 99-753E **Canadian Households and Families.** by Sylvia T. Wargon. E. and F. 146 pp.

The main topics include historical trends in numbers and sizes of households and census families, households by type, census families by structure and type, demographic composition of households and census families and children in census families.

\$2.10

- 99-755E **Income Distribution and Inequality in Canada.** by Roger Love. E. and F. 125 pp.

The main topics include family income distribution and characteristics of the family, an analysis of income differences within and between population groups, and income inequality.

\$2.10

- 99-756E **Off Farm Work by Farmers.** by Ray D. Bollman. E. and F. 214 pp.

The main topics include the history of part-time farming in Canada, off-farm work by characteristics of the farm and of the farm operator, and an explanatory analysis of off-farm work and employment income.

\$2.80

- 99-757E **Socio-economic Correlates of Fertility in Canadian Metropolitan Areas, 1961 and 1971.** by Evelyne Lapierre-Adamcyk. E. and F. 101 pp.

The main topics include fertility variations within and among Census Metropolitan Areas and an analysis of the association between environmental factors and socio-economic characteristics, and census-tract variation in fertility rates.

\$2.10

- 99-758E **An Analysis of Earnings in Canada.** by Peter Kuch and Walter Haessel. E. and F. 212 pp.

The main topics include the factors affecting the size distribution of earnings, an analysis of the effects of market attributes and socio-economic characteristics of the population on male earnings and on female earnings, and an analysis of the effects of sex and marital status on the distribution of wages and salaries.

\$3.50

- 99-759E **Patterns of Fertility in Canada, 1971.** by T.R. Balakrishnan, G.E. Ebanks and C.F. Grindstaff. E. and F. 269 pp.

Presents a multivariate approach to the study of fertility using data from the sample tapes to sort out the relative importance of various factors on fertility behaviour.

\$3.50

- 99-760E **Employment and Earnings of Married Females.** by A. Nakamura, M. Nakamura, D. Cullen, D. Grant and H. Orcutt. E. and F. 168 pp.

This monograph is devoted to an analysis of the labour force behaviour of Canadian wives, since married women are the most controversial and rapidly changing component of the female labour force.

Popular Series.

The five 1976 Census popular studies are produced in a journalistic style with coloured art work, simple graphs and summary tables. These studies are primarily intended for use at the high school and community college/university levels. They may, however, be of interest to the general public and other groups.

96-800E **Canada's Elderly.** E. and F. 32 pp.

Highlights some of the following facts about our aging population: declining fertility trends mainly account for the growing proportion of elderly; most of the elderly live in family settings but many elderly women live alone; almost half of all persons living in collective dwellings are elderly; Prince Edward Island has the highest proportion of elderly to its population; it is estimated that by 2001 the proportion of elderly may reach between 11 and 12 percent.

\$1.25

96-801E **Canada's Families.** E. and F.

Discusses many of the changes taking place in the traditional structure of the family: today's families are much smaller than ever before; families are more ready to disband if things are not working out between husband and wife, marriages, however, are on the increase; the number of female lone-parent families rose rapidly between 1971 and 1976, while their male counterparts actually declined; more and more wives are working outside the home and many of them have young children; low income families spend a greater proportion of their budgets on food and shelter than high income families; by 2001 there could be between 8.4 and 9.1 million families in Canada.

96-802E **Canada's Population.** E. and F.

Totalled 5.4 million in 1901 and by 1976 had increased to 23 million. The present century witnessed three major trends in population growth since the peak growth rate of 3.4% between 1901 and 1911: the number of females exceeded the number of males for the first time in 1976; the proportion of young children in the population is declining while the proportion of elderly is increasing; Canada's working age population increased from 9.2 million in 1961 to 12.7 million in 1976; single men outnumber single women, but widowed women far exceed widowed men; British Columbia and Alberta have had the greatest population percentage increase during 1971-1976; by 2001 Canada's population is likely to reach between 28.1 and 31 million; migration is expected to play an important role in future population growth in Canada.

\$1.25

98-803E **Canada's Cities.** E. and F. 32 pp.

Brings together some of the facts about our highly urban population: between 1901 and 1971 the share of the urban population increased from 37.5% to 76.1%; Calgary was Canada's fastest growing Census Metropolitan Area, while the population of the Windsor Census Metropolitan Area actually declined between 1971 and 1976; also during those years, 9 central cities recorded declines in their populations; most of the growth has occurred in the suburbs, Thunder Bay has the largest proportion of private households occupying single-detached dwellings among the Census Metropolitan Areas and Montreal the largest proportion occupying apartments; French is the dominant mother tongue for Chicoutimi-Jonquiere and English the most dominant for St. John's. Along with the slowdown in urban growth in recent years (1971-1976) there is a hint of a renewed interest in rural living.

\$1.25

98-804E **Canada's Female Labour Force.** E. and F. 34 pp.

Many facts about the female labour force are revealed: close to four million women were in the labour force in 1976, in recent years they have been entering the labour market at a faster rate than men; nearly two-thirds of the female labour force are married, the majority are in the younger age groups and they tend to have fewer children than those not in the labour force; women have higher unemployment rates than men and they work in a narrower range of industries; although men have higher average annual incomes than women, some of this difference is accounted for by full- or part-time work and length of work experience.

98-810 **Children in Canadian Families.** by Sylvia T. Wargon. Bilingual. 109 pp.

The proclamation of 1979 as the "Year of the Child" by the United Nations seemed a fitting occasion for a presentation on Canadian children by Statistics Canada's Social Statistics Field. This publication is intended for those who are interested in statistical series, data sources, and a general picture of the main features of recent demographic trends and aspects of children in Canadian families as revealed in the Canadian census data. The emphasis is on the display of data series not available elsewhere, and on their description and interpretation in broad outline form.

INDEX

The following index has been prepared to assist users in locating statistical information within Statistics Canada publications. The index combines titles, subjects and commodities for all Statistics Canada publications in one integrated index and includes numerous cross-references, prepared using the Library of Congress Subject Headings, to assist the user in locating required information. The numerical references found after each heading are the Catalogue numbers of publications in which the referenced information may be found. Further descriptive information related to publications may be found in the first section of this catalogue.

While searching for items in the index, users should keep in mind that the index has been prepared using the inverted form of heading. Wherever possible, wording of headings has been reversed so as to bring the most significant word(s) forward, followed by the descriptive term.

In addition to this index, a number of classification manuals produced by Statistics Canada contain alphabetical indexes which may be of assistance in locating information. These include the Standard Industrial Classification (12-501), the Canadian International Trade Classification (65-502), the Occupational Classification (12-537, 12-538) and the Standard Geographical Classification (12-556). Further information related to these and other manuals available can be found in the first section of this Catalogue.

Users who are unable to locate required statistics using this index should direct inquiries to their local User Advisory Services Regional Office or to the Central Inquiries Service in Ottawa.
