## Preface

This edition of the Statistics Canada Catalogue of Publications includes current Catalogue-numbered publications available for purchase from the agency as of January 1, 1981.

Discontinued publications have been removed from the Catalogue except when the final issue appeared in 1980. Vintage publications (containing data more (han 10 years old) and out of print publications including those from the 1971 and the 1976 Censuses have been removed. For users wishing information on discontinued. out of print, or vintage publications, it is suggested that reference be made to the following; the Historical Catalogue (which includes publications issued from 1918 to 1960); the 1968 edition of the Catalogue (which includes the 1956 quinquennial Census of Canada publications); the 1973-1974 edition of the Catalogue (which includes publications from the 1960-1973 period), and post-1975 Catalogues (which include all publications issued from June 1973 to December 1979).

In the fall of 1980, Statistics Canada released a Supplement updating the

1980 edition of the Catalogue. A Supplement will again be released in mid 1981 and a new Catalogue early in 1982.

As in the case of previous Catalogues, single copies and a Supplement are provided at no charge. There is, however, a charge of $\$ 5.00$ for each additional copy or multiple copy requested (one copy of the Catalogue can be considered to consist of one copy of each of the English and French versions). Copies of the Catalogue can be ordered from User Services, Ottawa, Ontario K1A 0T6 or from any of the reference centres listed on page nine.

The preparation of this Catalogue was coordinated by Susan Strader.

## INTRODUCTION

Statistics Canada's responsibilities in the Canadian statistical system concern the whole range of statistics on the economic and social activities of the Canadian people. The extensive publishing program of the agency reflects this responsibility.

In using Statistics Canada data, the user should be aware of the fact that all information compiled by the agency is subject to the clauses of the Statistics Act which protect organizations and persons from individual disclosure.

## how to locate publications in the catalogue

The key to finding publications in the Catalogue is the publication identification or catalogue number described in detail below. If the number for a publication is known, it may be used to find bibliographic and descriptive information in the numerically-arranged "Publications" section beginning on page 15 . If only the title of a publication is known, the alphabetically-arranged Subject/Tille Index beginning on page 85 will usually identify the required catalogue number. When numbers of titles are not known the Subject/Title Index will assist the user in locating publications related to specific or general subjects of interest by identifying the appropriate catalogue numbers. Since publications are grouped according to subject, the Table of Contents can also be a useful general guide.

## Formation of Catalogue Numbers

Statistics Canada publications can be identified by their unique five-digit catalogue numbers. These numbers are formed in the following way:

First Digit: Under the grouping arrangement, all Statistics Canada publications are classified into 8 major subject groups, as follows:

| 1 | General |
| :--- | :--- |
| 2 | Primary Industries |
| $3 \& 4$ | Manufacturing |
| 5 | Transportation, Communications and Utilities |
| 6 | Commerce, Construction, Finance and Prices |
| 7 | Employment, Unemployment and Labour Income |
| 8 | Education, Culture, Health and Welfare |
| 9 | Census |

Second Digit: Each of the above major groups is further divided into sub-groups. For example, Major Group 3 (Manufacturing) is divided into 6 sub-groups: (1) General Survey; (2) Foods, Beverages and Tobacco: (3) Leather and Rubber Products; (4) Textiles and Apparel; (5) Wood and Furniture Products: (6) Paper Products and Printing. Sub-groups covering all of the major subject groups may be found in the Table of Contents

Third Digit: The third digit indicates the frequency of publication as follows:

0 Issued more than once per year
2 Issued annually
4 Issued biennially
5 Issued once only or occasionally
6 Issued annually with various sub-titles

71971 Census
81976 Census
Fourth and Fifth Digits: The fourth and fifth digits are used to give each title its own unique permanent number.

The numbers are allocated sequentially as new publications are officially approved by the department.

The following is a typical example of the above described catalogue numbering system: catalogue number 84-001 has been assigned to the publication "Vital Statistics". This catalogue number was created as follows:

8 Major Group Education, Culture, Health and Welfare
4 Minor Group - Vital Statistics
0 Frequency - Issued more than once per year (in this case, quarterly)

01 First catalogue number allocated in this group
Catalogued publications represent Statistics Canada's definitive offerings within the mainstream of its publishing mandate. Typically, these publications contain one of the following kinds of information: (1) information consisting primarily of compilations of statistical data, possibly with related commentary or analysis; (2) reference material to assist in the understanding and use of statistical data; (3) special studies, monographs, etc., based on the agency's statistical data, but with primarily a statistical emphasis; and (4) descriptions of Statistics Canada services and operations.

Information such as technical papers, often of a tentative, transitory or possibly speculative nature, which may describe methodological or operational procedures at a level of detail going considerably beyond what is required for an ordinary understanding of the agency's statistical outputs, and of particular interest to technically specialized clienteles, is disseminated in non-catalogued publications. The Statistics Canada Library is compiling a listing of all such publications, which itself will be treated as a catalogued publication, 11-207 "Listing of Supplementary Documents".

## International Standard Serial and Book Numbers

Internasional Standard Serial and Book Numbers (ISSN, ISBN) are being assigned to all catalogued Statistics Canada publications for the purpose of facilitating identification, citation, ordering and bibliographic control on an international basis. ISSN's are assigned to all current serial publications and ISBN's to all new occasional publications.

## HOW TO ORDER PUBLICATIONS

When ordering, the catalogue numbers, titles and issues (month, year) of publications should be quoted. Subscription orders are accepted for all serial publications, but not for biennial and occasional publications. Orders should be forwarded to Publications Distribution. User Services Division, Statistics Canada, Ottawa, Ontario, K1A OV7. There are order forms at the back of the Catalogue. It should be noted that subscriptions do not commence with the current issue of an ordered publication, but rather begin with the issue released following receipt of the subscription order. Individual publications may be ordered from Publications Distribution directly or the local reference centres may be of assistance. When ordering, it is important to indicate if a subscription or a casual order is desired.

Those interested in all Statistics Canada data can order the Full Publication Service and receive publications automatically as soon as they are released. The current cost is $\$ 4,000$ per year for the service to
locations in Canada and $\$ 4.800$ for the service outside Canada. The Full Publication Service does not include decennial or quinquennial Census Publications.

Prices listed in this Catalogue apply only to purchases within Canada and are subject to change without notice. Customers in other countries must add $20 \%$ to quoted prices to cover additional postage and handling charges. An additional charge is levied if Air Mail is required. Remitances should be in the form of cheque or money order made payable to the Receiver General for Canada. Currency and postage stamps should not be used in ordering publications by mail.

Delays in order fulfillment may be avoided by prepayment: however. Statistics Canada is prepared to invoice on a monthly basis customers who frequently order publications. Application forms for this service are available from Publications Distribution or from all local reference centres. Payment may also be made using Visa or Master Charge by enclosing, with your order, the account number and expiry date of your card.

## OTHER DATA FORMATS AND HOW TO ORDER THEM

Statistics Canada endeavours to make statistical information readily available to users in the forms in which it is most frequently wanted, including publications micro-form and magnetic tape. Data are also available on-line through CANSIM.

## Canadian Socio-economic Information Management System

CANSIM is the agency's publicly accessible machine readable database and retrieval system. It comprises two modules, the CANSIM TimeSeries module, containing current and historical information from a broad range of interrelated socio-economic fields, and the CANSIM Cross-Classified module, which addresses the demand for multidimensional data expressed mainly by scholars and practitioners in the fields of demography, education, health and justice.

The Time-Series database contains major groups of data from the following subject-matter areas: System of National Accounts; Prices and Price Indexes; Labour: Manufacturing and Primary Industries (including Fuel, Power and Mining); Capital and Finance; Construction; Merchandising and Services; External Trade: Transportation; Agriculture and Food; Population Estimates and Projections; and Health and Welfare.

It also contains data from numerous tables in the Canadian Statistical Review, the Bank of Canada Review, selected U.S. statistics, and the Quebec Statistical Review. The content is constantly growing as new sets of data are added. Currently some 250 publications are represented in part or in full in the CANSIM Time-Series module.

The CANSIM Time-Series data are offered to users in two formats: the CANSIM Main Base and the CANSIM Mini Base. The CANSIM Main Base currently contains over 300,000 time series and is updated on a daily basis, usually at the same time the data are officially released. It is located on on-line disk packs at the CANSIM host service bureau. The CANSIM Mini Base is a standard subset of data which originates from the CANSIM Main Base and currently contains approximately 20,000 of the most widely used time series. The CANSIM Mini Base is updated daily, within the next working day of the series being released on the CANSIM Main Base. The CANSIM Mini Base is offered by a number of secondary distributors.

Major data sources for the CANSIM Cross-Classified module currently are the Agriculture, Health, Justice, and Education, Science and Culture Divisions of Statistics Canada, as well as the Census of Population database, from which detailed census profiles disaggregated to the census sub-division level for 1976 can be retrieved.

The CANSIM Cross-Classified module will be of particular interest to analysts and researchers specializing in social studies and societal evolution and problems. It meets their need for the tabulation and
analysis of data on social conditions (family structure, occupation, income and others) available from the census database with data on social phenomena in the fields of health. education. justice and others. At the present time, the CANSIM Cross-Classified database is available only at the CANSIM host service bureau.

The CANSIM host service bureau is Datacrown Inc.. 770 Brookfield Road. Ottawa. Ontario KIV 6J5. Further information, including lists of secondary distributors, may be obtained from CANSIM Division, Statistics Canada, R.H. Coats Building, Holland Avenue, Ottawa, Ontario KIA OT6. (613) 995-7406/995-0575, or from any regional reference centre.

## Data in Microform

In addition to publications and machine readable data. Statistics Canada makes available large blocks of data in microform. A large part of the output of the 1976 Census of Population and Housing is available on microfiche, as are almost all 1976 Census of Agriculture tabulations and all current serial publications of the External Trade Division. Further information regarding the current microform offerings of the department can be obtained by contacting any of the Statistics Canada local reference centres.

All publications ever issued by the agency are now available on microfiche under an arrangement with Micromedia Ltd. This includes those listed in the Historical Catalogue of the Dominion Bureau of Statistics 1918-1960, and all subsequent Catalogues. For details, please contact the firm at 144 Front Street West. 5th Floor, Toronto, Ontario, MSJ 2L7, telephone (416) 593-5211.

## Data on Magnetic Tapes

The CANSIM division of Statistics Canada provides a number of census data files on magnetic tape:

User Summary Tapes. These tapes contain tabulated data (not individual census records) and usually have more detail than is provided in printed reports. They allow users to aggregate the tabulations either on a geographic basis or by combining data cells. They are available from the 1961, 1966, 1971, and 1976 census years for a variety of geographic areas including enumeration areas, census tracts, census sub-divisions and municipalities. Summary tapes have been created to provide Canada wide coverage for a particular geographic level. Separate tape series have been produced for both short form ( $100 \%$ coverage) and long form (sample coverage) questionnaires.

Public Use Sample Tapes. These tapes provide the user access to nonidentifiable records of individual respondents from either of the 1971 or 1976 Censuses and include data from the long form (sample) census questionnaire. Data for these products have been organized into three separate files: Individual. Household and Family. For each of these files an independent $1 \%$ stratified sample has been taken from each of the census master files.

Spatial Reference Tapes. Machine readable files from the 1971 and 1976 censuses are also available containing supplementary geographic data. The most commonly used are the Geography Tape and the Statistical Area Boundary File (CARTLIB). The former contains the complete geographic codes for all enumeration areas and the latter contains a machine-readable base map (geographic boundaries) for computer mapping at census tract and census division levels.

To obtain more information regarding any of these products or other machine readable files that become available, contact Data Use Development Section, CANSIM Division, Statistics Canada, Otawa, Ontario. K1A 0Z8, or telephone (613) 995-0097.

User Summary Tapes, essentially as described above, are also available for the Census of Agriculture. Inquiries concerning these tapes should be
directed to: Agriculture Division, Room 2222, Main Building, Statistics Canada. Ottawa, Ontario, KIA 0T6, or telephone (613) 995-4936.

Computer tapes from the Survey of Consumer Finance containing micro data on incomes of census families and economic families are available for 1971, 1973, 1975 and 1977. Inquiries about this material as well as requests for special tabulations should be directed 10: Data Dissemination, Consumer Income and Expenditure Division, Statistics Canada, Ottawa, Ontario, KIA 0T6, or telephone (613) 996-5294.

Computer tapes are also available from External Trade Division, Special Information Section, Statistics Canada, Ottawa, Ontario, K1A 0Z9, or telephone (613) 996-6305. These tapes contain the same information as that published in regular reports and are available to users interested in obtaining revised time series of selected commodity classes. Also available on tape is information tailored to user's specifications, e.g., by mode of transport, region of lading, etc.

## HOW TO GET HELP IN USING DATA

Statistics Canada provides assistance to users in a number of ways. Foremost among these are the Inquiries, Professional Consultation and Educational services available in local reference centres as noted below. Staff in these offices are equipped to assist with most questions likely to arise concerning the supply and application of data to user problems. In addition, expert advice concerning source surveys and more complex applications of data can be obtained from subject- matter specialists associated with the collection activity in Ottawa. Should users require to communicate directly with these specialists, addresses and telephone numbers can be supplied from any local reference centre.

Statistics Canada has a Central Inquires unit in Ottawa and Advisory Services staff in eight cities across the country. Toll free telephone lines to these centres are available in several areas. The services provided are:

Inquiry Service: Answers requests for statistical data by telephone, letter and liron visitors:

- Provides a collection of all Statistics Canada's recent publications as well as certain historical ones for public reference;
- Provides tabulations of certain unpublished data and other selected government statistical publications for public reference;

Provides visitors with study areas.
Professional Consultation Service: Assists both experienced and inexperienced users with data problems;

- Advises on arranging direct access to CANSIM. Statistics Canada's machine-readable data base system:
- Provides feedback 10 Statistics Canada on the statistical needs and problems of users.

Data Distribution and Promotion Services: Takes orders for all Statistics Canada publications and related material such as census maps and microfiche;

- Retrieves data directly from CANSIM;
- Provides public copying facilities for printed materials and microfiche:

## - Arranges displays to promute the use of statistical data.

Education Service: Provides booklets on finding and using statistics and distributes copies of the Statistics Canada Catalogue of Publications;

- Holds workshops and seminars for users on subjects of special interest, on request:
- Visits educational institutions to speak on statistical subjects, on request;
- Arranges local training courses on statistical subjects, such as basic questionnaire design, and sampling techniques.

Data Collection Service: Arranges for the design, management and implementation of surveys for governments, institutions and private agencies;

- Advises on all aspects of information gathering.

In addition to the reference centres noted above. Statistics Canada publications are available for reference purposes from a large number of libraries throughout Canada. including most provincial legislative libraries and many public and university libraries. A complete historical collection of Statistics Canada material is held by the Statistics Canada Library in Ottawa and is available to the general public for reference purposes.

## HOW PUBLICATION PRICES ARE DETERMINED

Statistics Canada sets prices for its publications in an attempt to distribute information as widely as possible while recovering the overall printing and distribution costs for the program. Prices for most publications are set following a designated page count formula. If publications and distribution costs rise it will be necessary to raise prices unless there is an offsetting increase in sales. Statistics Canada will be promoting its publications more actively to increase sales. It should be noted that prices of publications are not set in an attempt to recover the costs of collecting and analysing data.

## 3: MANUFACTURING

## Description of Reports

Publications listed under "Manufacturing" relate to Division S of the Standard Industrial Classification.

These publications consist of a large number of reports, some of which provide summarized and analytical information for manufacturing as a whole and others which provide detailed information on individual manufacturing industries or on various commodities.

Although titles of the various reports are broadly indicative of the subject matter covered, explanatory notes have been included under title headings where necessary. Such notes are generally restricted to reports dealing with the manufacturing industries as a whole (sub-group 31) and to those publications dealing with commodities. The reports on individual industries are generally similar to each other in character and include such principal statistics as: number of establishments, number and type of employees and their salaries and wages, cost of fuel and electricity, value of shipments of goods of own manufacture, and value added. Comparative statistics are given for Canada for earlier years and for the preceding year for provinces. Also shown are the value and, where applicable, quantities of major products shipped and purchased materials used by establishments classified to the industry. Some reports also show total manufacturers' shipments of relevant commodities without regard to industry of origin, but this is given comprehensively for all commodities in an annual report on products shipped by Canadian manufacturers.

Primarily due to the fact that annual surveys cannot be initiated until the end of the calendar year and to the time required to collect edit and compile extensive data, most annual industry reports are not available until a year or more after the end of the year of survey.

In addition there are a large number of publications which are published more frequently than once a year and which contain current information on commodities (generally shipments, production or consumption). Although not exactly suitable to industry analyses. except in the case of one-industry commodities, they have proven to be most useful in commodity analyses.

Current estimates of the value of shipments, inventories and orders for manufacturing industries in total, numerous sub-aggregations and selected industries are issued monthly. They are based on a sample survey of establishments representing about $75 \%$ of the shipments, determined from the Census of Manufactures.

## 31: General Survey

31-001 Inventories, Shipments and Orders in Manufacturing Industries. Monthly. Bilingual. Uip to 75 pp. First Issuc, February 1947. (ISSN 0701-7367).

Estimated values of manufacturers' shipments, inventories and orders by months; Canada totals, durable and non-durable goods industries, major groups and selected individual industries as defined by the Standard Industrial Classification; also grouped by an economic use classification; shipments totals by province and major groups within provinces; inventory to shipments ratios: concepts and methods. ## Census Tract Series.

Reports in the Census Tract Series present basic population, housing, household, family and labour force characteristics for statistical areas (i.e., census tracts) within each of 29 larger rural centres and census metropolitan areas. Two reports are being issued for each tracted centre - one providing distributions of 100 percent data (" A " series) and the other containing classifications of sample data ("B" series). Each report contains an index map outlining the locations of the census tracts for that particular area.
"A" Series.

Census tract reports in the " A " series present basic distributions by age, sex, marital status, and mother tongue as well as family and household size and composition and housing attributes of tenure, type of dwellings, number of rooms, and samitary facilities.

## Popular Series.

The five 1976 Census popular studies are produced in a journalistic style with coloured art work, simple graphs and summary tables. These studies are primarily intended for use at the high school and community college/university levels. They may, however, be of interesi to the general public and other groups.

## 98-800E Canada's Elderly. E. and F. 32 pp .

Highlights some of the following facts about our aging population: declining fertility trends mainly account for the growing proportion of elderly: most of the elderly live in family settings but many elderly women live alone; almost half of all persons living in collective dwellings are elderly: Prince Edward Island has the highest proportion of elderly to its population; it is estimated that by 2001 the proportion of elderly may reach between 11 and 12 percent.

## 98-801E Canada's Families. E. and F.

Discusses many of the changes taking place in the traditional structure of the family: today"s families are much smaller than ever before; families are more ready to disband if things are not working out between husband and wife, marriages, however, are on the increase; the number of female lone- parent families rose rapidly between 1971 and 1976, while their male counterparts actually declined; more and more wives are working outside the home and many of them have young children; low income families spend a greater proportion of their budgets on food and shelter than high income families; by 2001 there could be between 8.4 and 9.1 million families in Canada.

## 98-802E Canada's Population. E. and F.

Totalled 5.4 million in 1901 and by 1976 had increased to 23 million. The present century witnessed three major trends in population growth since the peak growth rate of $3.4 \%$ between 1901 and 1911: the number of females exceeded the number of males for the first time in 1976; the proportion of young children in the population is declining while the proportion of elderly is increasing; Canada's working age population increased from 9.2 million in 1961 to 12.7 million in 1976; single men outnumber single women, but widowed women far exceed widowed men: British Columbia and Alberta had the greatest population percentage increase during 1971-1976; by 2001 Canada's population is likely to reach between 28.1 and 31 million: migration is expected to play an important role in future population growth in Canada.

98-803E Camada's Cities. E. and F. 32 pp.
Brings together some of the facts about our highly urban population: between 1901 and 1971 the share of the urban population increased from $37.5 \%$ to $76.1 \%$; Calgary was Canada's fastest growing census metropolitan area, while the population of the Windsor census metropolitan area actually declined between 1971 and 1976; also during those years, nine central cities recorded declines in their populations; most of the growth has occurred in the suburbs; Thunder Bay has the largest proportion of private houscholds occupying single-detached dwellings among the census metropolitan areas and Montreal the largest proportion occupying apart- ments; French is the dominant mother tongue for Chicoutimi-Jonquière and English the most dominant for St . John's. Along with the slowdown in urban growth in recent years (19711976) there is a hint of a renewed interest in rural living.

98-804E Canada's Female Labour Force. E. and F. 34 pp.
Many facts about the female labour force are revealed: close to four
million women were in the labour force in 1976; in recent years they have been entering the labour market at a faster rate than men; nearly twothirds of the female labour rorce are married, the majority are in the younger age groups and they tend to have fewer children than those not in the labour force; women have higher unemployment rates than men and they work in a narrower range of industries; although men have higher average annual incomes than women, some of this difference is accounted for by full- or part-time work and length of work experience.

## Census continued

98-810 Children in Canadian Families. by Sylvia T. Wargon. Bilingual. 109 pp .

The proclamation of 1979 as the "Year of the Child" by the United Nations seemed a fitting occasion for a presentation on Canadian children by Statistics Canada's Social Statistics Field. This publication is intended for those who are interested in statistical series, data sources, and a general picture of the main features of recent demographic trends and aspects of children in Canadian families as revealed in the Canadian census data. The emphasis is on the display of data series not available elsewhere, and on their description and interpretation in broad outline form.

The following index has been prepared to assist users in locating statistical information within Statistics Canada publications. The index combines titles, subjects and commodities for all Statistics Canada publications in one integrated index and includes numerous crossreferences, prepared using the Library of Congress Subject Headings, to assist the user in locating required information. The numerical references found after each heading are the Catalogue numbers of publications in which the referenced information may be found. Further descriptive information related to publications may be found in the first section of this Catalogue.

While searching for stems in the index, users should keep in mind that the index has been prepared using the inverted form of heading. Wherever possible, wording of headings has been reversed so as to bring the most significant word(s) forward, followed by the descriptive term.

In addition to this index, a number of classification manuals produced by Statistics Canada contain alphabetical indexes which may be of assistance in locating information. These include the Standard Industrial Classification (12-501), the Canadian International Trade Classification (65-502), the Occupational Classification (12-537) and the Standard Geographical Classification (12-556). Further information related to these and other manuals available can be found in the first section of this Catalogue.

Users who are unable to locate required statistics using this index should direct inquiries to their local Statistics Canada reference centre or to the Cental Inquiries Service in Ottawa.
