Preface

This edition of the Statistics Canada Catalogue of publications describes, as it has in past years, all publications up to 10 years old and still available for sale. This year, however, it has two new features. It describes some of the 1981 Census of Canada publications, as well as a number of selected 'Departmental' publications. Everything listed has been released prior to January 1, 1983. Please see the "How to Order" section of the Introduction for more information.

Selected 'Departmental' publications carry an 'X' within their Catalogue number and follow immediately after regular priced publications of the same general subject.

As long as recipients leave their address when they obtain the annual Catalogue, they will automatically be sent the mid-year Supplement.

One set of the Catalogue (one English copy, one French copy and the Supplement) is free. Additional copies of the Catalogue cost \$5.00 and can be ordered from any of the Statistics Canada regional reference centres listed in the "How to Get Help" section of the Introduction.

The 1983 Statistics Canada Catalogue was prepared in the Reference Products Section of the Business, Provincial and Municipal Relations Division by Susan Strader, assisted by Tim Closter and Pauline Ford.

Introduction

HOW TO USE THE CATALOGUE

This Introduction explains how to use the Catalogue, how to order publications, what else is available and where to obtain information or help. It is followed by three sections that record the changes which have occurred since the release of last year's Catalogue. The Catalogue then splits into the two major sections of the book.

Section one is a listing of publications arranged by Catalogue number and by subject. The entries include the Catalogue number, title, frequency, language(s), number of pages, first issue released (or the data year of the publication), International Standard Serial (or Book) Number, price and a paragraph describing the contents of the publication.

Section two is a title, subject and commodity index arranged alphabetically and cross-referenced for better user access. Where applicable authors' names are printed in bold face type. Publication titles are in italics. Please see the first page of the Index for a further explanation.

HOW TO ORDER PUBLICATIONS

Please note that there are now two types of Statistics Canada publications listed in this Catalogue: the "regular priced" publications (e.g. 53-216) and "Departmental" publications (e.g. 53-X-216). The "regular priced" publications should be ordered from Publication Sales and Services, authorized Bookstore Agents, other local bookstores, or most of the regional reference centres of Statistics Canada. The "Departmental" publications should be ordered from Statistics Canada offices and may also be available from local bookstores. There is a small service and handling fee for the "Departmental" publications. The order form at the back of this Catalogue gives further information, and the addresses of the Statistics Canada offices are listed in the "How to Get Help" section.

To order either type of publication please list the publication title, catalogue number and issue, and type of order required, i.e., subscription or individual copy.

Payment must accompany all publication orders. Cheques and money orders should be made payable to the Receiver General for Canada. Payment by Visa and MasterCard credit cards is also accepted, provided the number and expiry date of the card are noted on the order

form. An extra charge is levied if first class, air mail or courier service is requested. To cover additional postage and handling charges, on "regular priced" publications, customers from outside Canada must add 20% to quoted prices.

Postage stamps and currency should not be used in ordering publications by mail. Remittances from foreign countries should be by international money order.

Under the 'Full Publication Service' customers can automatically obtain copies of "regular priced" publications. The cost per annum is \$4,240 for inside Canada orders and \$5,088 for outside Canada orders. Not included in this service are: publications from the decennial or quinquennial Census of Population (\$1,700 for 1981 Census); the Census of Agriculture (\$175 for 1981 Census); or the Statistics Canada "Departmental" publications.

Organizations such as schools, school boards, colleges, universities and public libraries are allowed a 30% discount on priced publications.

N.B. Prices listed in the Catalogue are subject to change without notice.

HOW PRICES ARE DETERMINED

Prices for the "regular" priced publications are set to recover printing and handling charges. No attempt is made to recover the costs of collecting and analysing the data. Statistics Canada's marketing team is continuously promoting publications to increase sales. The "Departmental" publications usually carry a small service fee.

OTHER DATA FORMATS AND HOW TO ORDER THEM

Canadian Socio-Economic Information Management System (CANSIM®)

CANSIM is Statistics Canada's computerized data bank and information retrieval service. Nearly all of the data appearing in publications, as well as many more data, are available from CANSIM via terminal, on computer printout, or in machine readable form. CANSIM, on one hand allows the retrieval of the latest statistics such as Labour Force Estimates and Consumer Price Index on the same day they are released to the public, and on the other hand contains extensive historical data relevant to time series analysis. CANSIM also provides on-line access to statistics for the Censuses of Population and Housing for 1971, 1976 and 1981. The information in CANSIM is of two types: time series statistics which show changes over time; and cross-classified statistics which show the relationships between different data at a given point in time. The CANSIM data are available through a number of data processing service companies.

Details on CANSIM may be obtained from the CANSIM Division, Statistics Canada, R.H. Coats Building, Holland Avenue, Ottawa, Ontario K1A 0T6, (613) 995-0575 and from the regional reference centres of Statistics Canada.

Data in Microform

In addition to publications and on-line computer tabulations, Statistics Canada makes data available in microform. The regional reference centres listed in the "How to Get Help" section can provide further information.

A complete collection of Statistics Canada publications is offered on microfiche by Micromedia Limited of Toronto. The collection includes many rare and out of print items. For details, please contact the firm at 144 Front Street West, 5th Floor, Toronto, Ontario M5J 2L7, (416) 593-5211.

Data on Magnetic Tape

Data on magnetic tape can be obtained on the following subjects and from the following Divisions: Census of Population and Housing, Census of Agriculture, Labour Force Survey, Survey of Consumer Finance, Survey of Family Expenditure, and from External Trade Division.

For complete information on the availability of magnetic tapes, please contact the regional offices of Statistics Canada, the subject-matter area or watch for 11-514, *Sources of Unpublished Data* due to be released this fall.

HOW TO GET HELP

Guides and Indexes

Statistics Canada publishes numerous guides and indexes to assist users. A recently published companion to this Catalogue is the *Historical Catalogue of Statistics Canada Publication, 1918-80*, (Catalogue number 11-512E). The annual Catalogue excludes data which are more than 10 years old, which have been discontinued prior to 1982, or which are out-of-print. This information can be retrieved from the Historical Catalogue.

Another valuable publication is 11-513E the *Bibliography of Federal Data Sources, Excluding Statistics Canada*, 1981. It includes social and economic data that are produced on a regular basis by selected federal departments and agencies other than Statistics Canada.

Two new publications due for release in the Spring and in the Fall of 1983 are *Sources of Unpublished Data*, 11-514E and 11-515E, *Index to Municipal Data*, 1982.

A number of publications listed in the 1983 Catalogue may also assist users in locating needed statistics and in keeping up-to-date with new releases. They include the *Statistics Canada Daily* (11-001E), *Infomat* (11-002E), *New Surveys* (11-006), *Listing of Supplementary Documents* (11-207), *CANSIM Summary Reference Index* (12-202E), *The Standard Industrial Classification* (12-501E), *The Standard Occupational Classification*, 1980 (12-565E), *The Standard Geographical Classification* (12-567), *The Canadian International Trade Classification* (65-502E) and *Guide to Federal Government Labour Statistics* (72-512).

Non-catalogued reference aids include *Statistical Information on Transportation Available from Federal and Provincial Governments*, *Statistical Information on Municipalities Available from Provincial and Territorial Governments*, the *Directory of Health Division Information*, *CANSEL* (an on-line computer index to CANSIM), and *FACTS* (an on-line browsing system for census tabulations). For further information on these products, please contact any Statistics Canada regional reference centre.

Statistics Canada also publishes a number of materials designed to assist in the accessing and use of data. Among these are *Finding and Using Statistics*, *How a Manufacturer Can Profit From Facts*, *How a Retailer Can Profit From Facts*, *How Contractors and Builders Can Profit From Facts*, *How Communities Can Use Statistics*, *Understanding Labour Force Data*, and *Your Guide to the Consumer Price Index*. Each is available from regional reference centres. (All but the latter two publications carry a handling fee of \$1.00.)

Library Access to Statistics Canada Publications

Users who want to consult Statistics Canada publications may do so at any regional reference centre, at the Statistics Canada Library in the R.H. Coats Building in Ottawa, or at any of the more than 60 libraries across Canada that carry all Statistics Canada publications. Over 45 of these are Full Depository Libraries, which automatically receive all federal government publications free of charge. They include most provincial legislative libraries, and many university and public libraries.

Statistics Canada Advisory Services

The agency has eight regional offices across Canada and a Central Inquiries Service in Ottawa. Each Office offers an inquiry service, a professional consultation service, a data distribution and promotion service, an education service and a data collection service.

Title, Price and Other Changes

The following is a list of changes of titles, and all other changes, that have been made since the 1982 catalogue of Publications was issued. For title changes, the old title is shown in italics following the new title. For other changes, the exact nature of the change is specified.

Statistics Canada has been able to keep the prices of its regular statistical publications constant since 1979. (Prices for most publications are set following a designated page count formula.) However, rapidly increasing costs of production and especially of distribution have forced the department to initiate a more stringent review of the pricing structure of its publications.

Effective February 1, 1983 there will be an increase in the prices of the bureau's regular publications. (The new prices are listed in this issue of the Catalogue.) However, in keeping with the guidelines of the federal government's price restraint program, the increase will be 6% or lower.

Prices apply only to purchases within Canada and are subject to change without notice. Customers from outside Canada must add 20% to quoted prices. For additional information see "How to Order Publications", p. 1.

Manufacturing

Description of Reports

Publications listed under "Manufacturing" relate to Division E of the Standard Industrial Classification.

Some of these reports provide summarized and analytical information for manufacturing as a whole, others provide detailed information on individual manufacturing industries or on various commodities.

Although titles of the various reports are broadly indicative of the subject matter covered, explanatory notes have been included under title headings where necessary. Such notes are generally restricted to reports on the manufacturing industries as a whole (sub-group 31) and to those publications on commodities. The reports on individual industries are generally similar to each other in character and include such principal statistics as: number of establishments; number and type of employees, and their salaries and wages; cost of fuel and electricity; value of shipments of goods of own manufacture; and value added. Comparative statistics are given for Canada for earlier years and for the preceding year for provinces. Also shown are the value and, where applicable, quantities of major products shipped and purchased materials used by establishments classified to the industry. Some reports show total manufacturers' shipments of relevant commodities without regard to industry of origin, but this is given comprehensively for all commodities in an annual report on products shipped by Canadian manufacturers.

Primarily because annual surveys cannot be initiated until the end of the calendar year and because of the time required to collect edit and compile extensive data, most annual industry reports are not available until a year or more after the end of the year of the survey.

In addition, there are a large number of publications that are published more frequently than once a year and that contain current information on commodities (generally shipments, production or consumption). Although not exactly suitable to industry analyses, except in the case of one-industry commodities, they have proven to be most useful in commodity analyses.

Current estimates of the value of shipments, inventories and orders for manufacturing industries in total, numerous sub-aggregations and selected industries are issued monthly. They are based on a sample survey of establishments representing about 75% of the shipments, determined from the Census of Manufactures.

Popular Series

The 1976 Census popular studies are produced in a journalistic style with coloured art work, simple graphs and summary tables. These studies are primarily intended for use at the high school and community college/university levels. They may, however, be of interest to the general public and other groups.

- 98-801E Canada's Families.** E. and F. 27 pp. \$1.25

Discusses many of the changes taking place in the traditional structure of the family: today's families are much smaller than ever before; families are more ready to disband if things are not working out between husband and wife, (marriages, however, are on the increase); the number of female lone-parent families rose rapidly between 1971 and 1976, while their male counterparts actually declined; more and more wives are working outside the home and many of them have young children; low income families spend a greater proportion of their budgets on food and shelter than high income families; and by 2001 there could be between 8.4 and 9.1 million families in Canada.

- 98-802E Canada's Population: Demographic Perspectives.** E. and F. 32 pp. \$1.25

Totalled 5.4 million in 1901 and by 1976 had increased to 23 million. The present century witnessed three major trends in population growth since the peak growth rate of 3.4% between 1901 and 1911: the number of females exceeded the number of males for the first time in 1976; the proportion of young children in the population is declining while the proportion of elderly is increasing; Canada's working age population increased from 9.2 million in 1961 to 12.7 million in 1976; single men outnumber single women, but widowed women far exceed widowed men; British Columbia and Alberta had the greatest population percentage increase during 1971-76; by 2001 Canada's population is likely to reach between 28.1 and 31 million; and migration is expected to play an important role in future population growth in Canada.

- 98-803E Canada's Cities.** E. and F. 32 pp. \$1.25

Brings together some of the facts about our highly urban population: between 1901 and 1971 the share of the urban population increased from 37.5% to 76.1%; Calgary was Canada's fastest growing census metropolitan area, while the population of the Windsor census metropolitan area actually declined between 1971 and 1976, also during those years, nine central cities recorded declines in their populations; most of the growth has occurred in the suburbs; Thunder Bay has the largest proportion of private households occupying single-detached dwellings among the census metropolitan areas and Montreal the largest proportion occupying apartmentments; and French is the dominant mother tongue for Chicoutimi-Jonquiere and English the most dominant for St. John's. Along with the slowdown in urban growth in recent years (1971-76) there is a hint of a renewed interest in rural living.

- 98-804E Canada's Female Labour Force.** E. and F. 34 pp. \$1.25

Many facts about the female labour force are revealed: close to four million women were in the labour force in 1976; in recent years they have been entering the labour market at a faster rate

1976 Census of Canada

than men, nearly two-thirds of the female labour force are married, the majority are in the younger age groups and they tend to have fewer children than those not in the labour force, women have higher unemployment rates than men and they work in a narrower range of industries; and although men have higher average annual incomes than women, some of this difference is accounted for by full- or part-time work and length of work experience.

98-810 Children in Canadian Families. By Sylvia T. Wargon. Bilingual 109 pp. \$6.25

The proclamation of 1979 as the "Year of the Child" by the United Nations seemed a fitting occasion for a presentation on Canadian children by Statistics Canada's Social Statistics Field. This publication is intended for those who are interested in statistical series, data sources, and a general picture of the main features of recent demographic trends and aspects of children in Canadian families as revealed in the Canadian census data. The emphasis is on the display of data series not available elsewhere, and on their description and interpretation in broad outline form.

An analysis of the demographic, social and economic factors that contributed to the increase in one-person households between 1951 and 1976.

Volume 3 — Profile Series A

3.1 Bulletins Based on 100% Data

This series is based on the same concept as the Census Tract series in 1971 and 1976. A range of population, housing and socio-economic data is presented for specific geographic areas which, for 1981, will be expanded to cover Census Divisions. Previous geographic areas for this series in 1976 included Federal Electoral Districts, Census Metropolitan Areas, Census Agglomerations, and Census Subdivisions of 5,000 population and over.
