## Preface

This edition of the Statistics Canada Catalogue of publications describes all publications up to 10 years old and still available for sale, the majority of the 1981 Census of Canada publications, and a number of selected 'Departmental' publications. Everything listed has been released prior to January 1, 1984. Please see the "How to Order" section of the Introduction for more information.

Selected 'Departmental' publications carry an 'X' within their Catalogue number and follow immediately after the 'regular priced' publications of the same general subject.

As long as recipients leave their address when they obtain the annual Catalogue, they will automatically be sent the mid-year Supplement.

One set of the Catalogue (one English copy, one French copy and the Supplement) is free. Additional copies of the Catalogue cost \$5.00 and can be ordered from any of the Statistics Canada regional reference centres listed in the "How to Get Help" section of the Introduction.

The 1984 Statistics Canada Catalogue was prepared in the Reference Products Section of the Business, Provincial and Municipal Relations Division by Susan Irving, assisted by Tim Closter.

# Introduction

## HOW TO USE THE CATALOGUE

This Introduction explains how to use the Catalogue, how to order publications, what other documents are available and where to obtain additional information or help. The three sections that follow record the changes which have occurred since the release of last year's Catalogue. The Catalogue then splits into its two major sections.

Section one is a listing of publications arranged by Catalogue number and by subject, except for the Census publications, as explained below. The entries include the Catalogue number, title, frequency, language(s), number of pages, first issue released (or the data year of the publication), International Standard Serial (or Book) Number, price and a paragraph describing the contents of the publication. Please note that there are two types of Statistics Canada publications listed in this Catalogue: the 'regular' publications (e.g. 53-216) and the 'departmental' publications (e.g. 53-X-216). The 'departmental' publications are listed immediately after the 'regular' publications of the same subject and periodicity.

The 'departmental' publications were once called 'non-catalogued' publications and carried a reference number like A-237. To incorporate them into the Catalogue a numbering system was designed that resembled the catalogue system. These documents don't carry a regular catalogue number because their method of distribution is different and because they are mostly working papers, methodology journals and technical manuals. However, with this new 'X' system they can be shelved in the same subject area as the regular publications.

The 1981 Census departmental publications were extensively promoted using a different numbering system (e.g. E-479). For the convenience of users, these publications have been listed with the reference number as part of the entry.

All 1976 and 1981 Census publications are grouped consecutively by Census year. All have catalogue numbers with 9 as a first digit, and a third digit of 8 (1976 Census) or 9 (1981 Census). Thus, 93-821 precedes 92-901.

Section two is an alphabetical title, subject and commodity index, including a separate section for Census publications. Please see the first page of the Index for a further explanation.

## HOW TO ORDER PUBLICATIONS

Regular publications should be ordered from Publications Sales and Services, the regional reference centres of Statistics Canada or from local bookstores. Departmental publications should be ordered from Statistics Canada

regional reference centres and may also be available from some local bookstores. The order form at the back of this Catalogue gives further information and the addresses of the Statistics Canada offices are listed in the "How to Get Help" section.

To order either type of publication please list the publication title, Catalogue number and issue, and type of order required, i.e., subscription or individual copy. A subscription begins with the issue released following receipt of the order.

Payment (or an account number from Supply and Services Canada or Statistics Canada) must accompany all publication orders. Cheques and money orders should be made payable to the Receiver General for Canada. Payment by Visa or MasterCard is also accepted, provided the number and expiry date of the card are noted on the order form. An extra charge is levied if first class, air mail or courier service is requested. To cover additional postage and handling charges, on regular publications, customers from outside Canada must add 20% to quoted prices and remittances should be made by international money order. Postage stamps and currency should not be used in ordering publications by mail.

Under the "Full Publication Service" (the cost per annum is \$4,450) customers can automatically obtain copies of publications except those from the decennial or quinquennial Census of Population (\$1,700 for the 1981 Census); the Census of Agriculture (\$175 for the 1981 Census); or the Statistics Canada departmental publications.

Organizations such as schools, school boards, colleges, universities and public libraries are allowed a 30% discount from Statistics Canada regular publications. (This discount is not offered to individuals).

**N.B. Prices listed in the Catalogue are subject to change without notice.**

## HOW PRICES ARE DETERMINED

Prices are set to recover printing and handling charges and are subject to change without notice. No attempt is made to recover the costs of collecting and analysing the data. In the event of a discrepancy between the quoted price in this Catalogue and the price listed in a publication, the latter is the price to be paid.

The 'Departmental' publications listed in this Catalogue carry a small service fee.

### OTHER DATA FORMATS AND HOW TO ORDER THEM

#### Canadian Socio-Economic Information Management System (CANSIM®)

CANSIM is Statistics Canada's computerized data bank and information retrieval service. It provides detailed and timely statistical information to economists, statisticians, planners, analysts and academics in private and public sectors.

CANSIM contains the latest, as well as historical, statistical information. For example, Labour Force Estimates and the Consumer Price Index are available in electronic form on CANSIM on the same day they are released to the public and may be accessed simultaneously anywhere in Canada by terminal.

Business and economic statistics are available in a time series format, while social statistics and Census summary data have a cross-classified format showing various relationships at different points in time.

Secondary Distributors across Canada disseminate CANSIM data according to Statistics Canada guidelines. They offer a choice of software, telecommunications networks and technical support services. Also, CANSIM Division and the regional offices of Statistics Canada provide consulting and over-the-counter services on a cost recovery basis.

Recent CANSIM initiatives utilizing advanced technologies make access possible via micro computer, TELIDON terminals for graphic display and charting, and electronic messaging systems.

Further details on CANSIM may be obtained from the CANSIM Division, Statistics Canada, R.H. Coats Building, Holland Avenue, Ottawa, Ontario K1A 0T6, Telephone: (613)995-0575; and from the regional offices of Statistics Canada.

## Manufacturing

### Description of Reports

Publications listed under "Manufacturing" relate to Division E of the Standard Industrial Classification.

Some of these reports provide summarized and analytical information for manufacturing as a whole; others provide detailed information on individual manufacturing industries or on various commodities.

Although titles of the various reports are broadly indicative of the subject matter covered, explanatory notes have been included under title headings where necessary. Such notes are generally restricted to reports on the manufacturing industries as a whole (sub-group 31) and to those publications on commodities. The reports on individual industries are generally similar to each other in character and include such principal statistics as number of establishments, number and type of employees, and their salaries and wages, cost of fuel and electricity, value of shipments of goods of own manufacture, and value added. Comparative statistics are given for Canada for earlier years and for the preceding year for provinces. Also shown are the value and, where applicable, quantities of major products shipped and purchased materials used by establishments classified to the industry. Some reports show total manufacturers' shipments of relevant commodities without regard to industry of origin, but this is given comprehensively for all commodities in an annual report on products shipped by Canadian manufacturers.

Primarily because annual surveys cannot be initiated until the end of the calendar year and because of the time required to collect edit and compile extensive data, most annual industry reports are not available until a year or more after the end of the year of the survey.

In addition, there are a large number of publications that are published more frequently than once a year and that contain current information on commodities (generally shipments, production or consumption). Although not exactly suitable to industry analyses, except in the case of one-industry commodities, they have proven to be most useful in commodity analyses.

Current estimates of the value of shipments, inventories and orders for manufacturing industries in total, numerous sub-aggregations and selected industries are issued monthly. They are based on a sample survey of establishments representing about 75% of the shipments, determined from the Census of Manufactures.

### Popular Series

The 1976 Census popular studies are produced in a journalistic style with coloured art work, simple graphs and summary tables. These studies are primarily intended for use at the high school and community college/university levels. They may, however, be of interest to the general public and other groups.

- 98-801E Canada's Families.** E. and F. 27 pp. \$1.25

Discusses many of the changes taking place in the traditional structure of the family; today's families are much smaller than ever before; families are more ready to disband if things are not working out between husband and wife, (marriages, however, are on the increase); the number of female lone-parent families rose rapidly between 1971 and 1976, while their male counterparts actually declined, more and more wives are working outside the home and many of them have young children, low income families spend a greater proportion of their budgets on food and shelter than high income families, and by 2001 there could be between 8.4 and 9.1 million families in Canada.

- 98-802E Canada's Population: Demographic Perspectives.** E. and F. 32 pp. \$1.25

Totalled 5.4 million in 1901 and by 1976 had increased to 23 million. The present century witnessed three major trends in population growth since the peak growth rate of 3.4% between 1901 and 1911, the number of females exceeded the number of males for the first time in 1976, the proportion of young children in the population is declining while the proportion of elderly is increasing, Canada's working age population increased from 9.2 million in 1961 to 12.7 million in 1976, single men out-number single women, but widowed women far exceed widowed men, British Columbia and Alberta had the greatest population percentage increase during 1971-76, by 2001 Canada's population is likely to reach between 28.1 and 31 million, and migration is expected to play an important role in future population growth in Canada.

- 98-803E Canada's Cities.** E. and F. 32 pp. \$1.25

Brings together some of the facts about our highly urban population: between 1901 and 1971 the share of the urban population increased from 37.5% to 76.1%, Calgary was Canada's fastest growing census metropolitan area, while the population of the Windsor census metropolitan area actually declined between 1971 and 1976; also during those years, nine central cities recorded declines in their populations, most of the growth has occurred in the suburbs, Thunder Bay has the largest proportion of private households occupying single-detached dwellings among the census metropolitan areas and Montreal the largest proportion occupying apart-ments, and French is the

## 1976 Census of Canada

dominant mother tongue for Chicoutimi-Jonquiere and English the most dominant for St. John's. Along with the slowdown in urban growth in recent years (1971-76) there is a hint of a renewed interest in rural living.

**98-804E Canada's Female Labour Force.** E. and F. 34 pp. \$1.25

Many facts about the female labour force are revealed: close to four million women were in the labour force in 1976; in recent years they have been entering the labour market at a faster rate than men, nearly two-thirds of the female labour force are married, the majority are in the younger age groups and they tend to have fewer children than those not in the labour force, women have higher unemployment rates than men and they work in a narrower range of industries, and although men have higher average annual incomes than women, some of this difference is accounted for by full- or part-time work and length of work experience.

**98-810 Children in Canadian Families.** By Sylvia T. Wargon. Bilingual 109 pp. \$6.25

The proclamation of 1979 as the "Year of the Child" by the United Nations seemed a fitting occasion for a presentation on Canadian children by Statistics Canada's Social Statistics Field. This publication is intended for those who are interested in statistical series, data sources, and a general picture of the main features of recent demographic trends and aspects of children in Canadian families as revealed in the Canadian census data. The emphasis is on the display of data series not available elsewhere, and on their description and interpretation in broad outline form.

**98-811 Living Alone in Canada: Demographic and Economic Perspectives, 1951-76.** By Brian R. Harrison. Occasional Bilingual 67 pp. ISBN 0-660-50615-7 \$6.00

An analysis of the demographic, social and economic factors that contributed to the increase in one-person households between 1951 and 1976.
