FOREWORD

This is the fourth edition of the Annual Supplement; it contains the monthly and quarterly historical records, adjusted and unadjusted for seasonality, of all the series appearing in the S - section of the Canadian Statistical Review. The pages are numbered and the series are arranged in the same order as they appear in the August 1965 issue of the Review. Thus S-1-1 signifies that the series contained therein is the first one on page S-1 of the Review. This edition supersedes the previous editions, the last of which was published in July 1964.

The adjusted and unadjusted data are the latest revised figures published and extend to December 1964; they may be kept up-dated by referring to current issues of the Review. Should the original data or the method of seasonal adjustment be revised during the year, the complete revisions will be made available to all subscribers through the medium of the Weekly Supplement to the Canadian Statistical Review (Catalogue No. 11-004). These issues should be inserted into the publication in place of the obsolete sheets. In this way, the users will be kept abreast of all revisions to the data and all additions or deletions to the series in the S-section of the Review, and have available at all times the entire postwar record.

Five series have been added since the 1963 edition. They are: cheques cashed in clearing centres and total monthly consumer credit on pages S-8-6 and S-8-7 respectively; average hourly earnings in durable and non-durable manufacturing on pages S-4-4 and S-4-5 and the series "not in the labour force" on page S-1-6.

The unadjusted data on labour force series (pages S-1) have been revised back to 1956 in line with new weighting factors which take account of the 1961 Census of population. The seasonally adjusted counterparts of these series have been revised for the entire period from January 1953 on to take account of the revisions to the original data indicated above and to allow for the introduction of a computer method of seasonal adjustment. The method now used is the U.S. Bureau of the Census Method II (X-9) program and replaces the former hand method of adjusting these series.

The manufacturing series on new orders of machinery and construction and the shipments series of primary iron and steel by economic use classification (former pages S-6) have been temporarily discontinued pending revisions to the data.

AVANT-PROPOS

Le présent volume est la quatrième édition du Supplément annuel; il contient les chiffres chronologiques mensuels et trimestriels, désaisonnalisés et bruts, de toutes les séries de la Section "S" de la Revue statistique du Canada. Les pages sont numérotées et les séries présentées dans le même ordre que dans le numéro d'août 1965 de la Revue. Ainsi, S-1-1 signifie que la série contenue dans le Supplément est la première de la page S-1 de la Revue. La présente édition remplace les éditions antérieures dont la dernière a paru en juillet 1964.

Les données désaisonnalisées et brutes sont les chiffres revisés les plus récents et s'étendent à décembre 1964; on peut les garder à jour en se référant au numéro courant de la Revue. Avenant la modification, durant l'année, des données primitives ou de la méthode de désaisonnalisation, les revisions complètes seront mises à la disposition de tous les abonnés dans le Supplément hebdomadaire de la Revue statistique du Canada (n° de catalogue 11-004F), et devront être insérées dans la publication à la place des feuilles hors d'usage. De cette façon, l'utilisateur sera tenu au courant de toutes les revisions et de toutes les données ajoutées ou supprimées dans la Section "S" de la Revue et aura constamment à sa disposition l'ensemble des chiffres d'après-guerre.

Cinq séries ont été ajoutées depuis l'édition de 1963. Ce sont: les chèques encaissés dans les centres de compensation, le crédit mensuel total à la consommation, page S-8-6 et page S-8-7; la rémunération horaire moyenne dans les durables et dans les non-durables, pages S-4-4 et S-4-5, et la série population non active, page S-1-6.

Les chiffres bruts des séries relatives à la main-d'œuvre (pages S-1) sont revisés à partir de 1956 conformément aux nouveaux facteurs de pondération, qui tiennent compte de la population du recensement de 1961. Les contreparties désaisonnalisées de ces séries sont revisées pour la période entière à compter de janvier 1953 pour tenir compte des revisions apportées aux données primitives indiquées ci-dessus et permettre l'emploi de la méthode électronique de désaisonnalisation. La méthode employée actuellement est le U.S. Bureau of Census, Méthode II (X-9) et remplace l'ancienne méthode manuelle.

Les séries manufacturières relatives aux nouvelles commandes de machines et de construction et la série relative aux expéditions de fer et d'acier primaires classées suivant l'utilisation économique (anciennes pages S-6) ont été temporairement discontinuées d'ici la revision des données.

The seasonally adjusted data on house-building construction (pages S-6 and S-9) are revised as far back as 1955, in line with the new seasonal patterns which appear to be developing from the Winter House-Building Incentive Program. Also the series on starts of single family units has been discontinued temporarily pending further study of its seasonal adjustment.

Unadjusted data for exports and imports (pages S-7) have been revised to a "General" from a "Special" trade basis starting in January 1955. That is they are now compiled on the basis of the national boundary rather than the customs' boundary as in former years. References to describe the changes are given in the footnotes to the data. The change reflected the growing use of customs warehouses which began to create statistical problems in the latter part of 1962. The seasonally adjusted series have been revised for the entire period from 1946 to date.

Les chiffres désaisonnalisés sur la construction domiciliaire (pages S-6 et S-9) sont revisés à partir de 1955, conformément aux nouveaux régimes saisonniers qui découlent du programme d'encouragement à la construction durant l'hiver. De même, la série sur les logements unifamiliaux simples mis en construction a été discontinuée temporairement en attendant d'autres études sur sa désaisonnalisation.

Les chiffres bruts des importations et des exportations (pages S-7) passent du commerce "spécial" à commerce "général" à compter de janvier 1955, c'est-à-dire qu'ils sont maintenant calculés d'après la frontière nationale plutôt que la frontière douanière comme autrefois. Les références décrivant les modifications sont données en renvoi. Le changement reflète l'utilisation croissante des entrepôts de douane, qui ont commencé à créer des problèmes statistiques durant la dernière partie de 1962. Les séries désaisonnalisées sont révisées pour la période entière à compter de 1946.

(1) Prior to 1953, the data for total new motor vehicles sales are obtained by the addition of total commercial vehicles, page S-5-8, and total passenger vehicles, page S-5-(6+7). After January 1953, this series is a summation of total commercial vehicles and American and European passenger vehicles, pages S-5-6 and S-5-7 -- Les chiffres d'avant 1953 s'obtiennent par l'addition du total des voitures utilitaires, page S-5-8, et du total des voitures particulières, page S-5-(6+7). Après janvier 1953, la série est la sommation du total des voitures utilitaires et des voitures particulières américaines et européennes, pages S-5-6 et S-5-7.

(1) The breakdown of passenger car sales between American and European types is not available prior to January 1953. The original and seasonally adjusted series presented on this page are continuous with the sum of the series on pages S-5-6 and S-5-7 -- La répartition des ventes de voitures particulières entre américaines et européennes n'existe pas avant 1953. Les séries brute et désaisonnalisée présentées sur cette page équivalent chacune à la somme des séries des pages S-5-6 et S-5-7.

(1) Starting in January 1962, the data are not entirely comparable with earlier years because more centres are included and because of the expansion of the boundaries of metropolitan areas. This is based on information from the 1961 Census -- A compter de janvier 1962, les chiffres ne sont pas entièrement comparables à ceux des années antérieures en raison du plus grand nombre de centres et de l'expansion des limites des zones métropolitaines, d'après les renseignements tirés du recensement de 1961.

(1) Starting with January 1958, the monthly data reflect revisions 1) to incorporate the new revised Standard Industrial Classification and 2) to apply the new establishment concept. Values for 1958, however, are affected only slightly. For further details of changes see "Inventories, Shipments and Orders in Manufacturing Industries" (Cat. No. 31-001, monthly) 1963 First Report, and January, February, March 1964 -- À partir de janvier 1958, les chiffres mensuels reflètent les révisions apportées pour tenir compte 1) de la nouvelle Classification type (révisée) des industries et 2) du nouveau concept de l'établissement. Toutefois, les valeurs de 1958 ne sont que légèrement modifiées. On trouvera plus de détails dans Inventories, Shipments and Orders in Manufacturing Industries (no. 31-001 au catalogue mensuel) premier rapport de 1963, et janvier, février, mars 1964.

(1) Starting with January 1958, there is some discontinuity in monthly values of shipments caused by revisions described in the footnote on page S-8-1. The changes lowered monthly values in 1958 by 3.3 per cent from values before the revisions -- A partir de janvier 1958, il existe une certaine discontinuité dans les valeurs mensuelles des expéditions en raison des modifications mentionnées au renvoi de la page S-8-1. Les modifications ont fait baisser les valeurs mensuelles de 1958 de 3.3 p. 100 au regard des valeurs antérieures aux révisions.
