FOREWORD

This is the fifth edition of the Annual Supplement. It contains the monthly and quarterly historical records, adjusted and unadjusted for seasonality, of all the series appearing in the S - section of the monthly Canadian Statistical Review. The pages are numbered and the series are arranged in the same order as they appear in the Review. Thus S-1-1 signifies that the series contained therein is the first one on page S-1 of the Review. This edition supersedes all previous editions, the last of which was published in September 1965.

The adjusted and unadjusted data are the latest revised figures published and extend to December 1965; they may be kept up-dated by referring to current issues of the Review. Should the original data or the method of seasonal adjustment be revised during the year, the complete revisions will be made available to all subscribers through the medium of the Weekly Supplement to the Canadian Statistical Review (Catalogue No. 11-004). These issues should be inserted into the present publication in place of the obsolete sheets. In this way, users will be kept abreast of all revisions to the data and of all additions or deletions to the series in the S - section of the Review, and have at all times the entire postwar record.

The unadjusted and seasonally adjusted indexes of industrial production on pages S-2 have been revised for the entire 1949-1965 period. No revisions were made to any of the indexes for the pre-1949 period and these remain as the best available indicators. The revisions to the post-1948 period stem from the following: (1) the incorporation of more recent census-based annual levels (benchmarks) into the historical record for manufacturing, mining and electric power and gas utilities (2) the substitution of a few monthly projectors (3) the incorporation of revisions made to the underlying data subsequent to their use in the heretofore published Index of Industrial Production (4) the use of an improved method of adjusting monthly series to annual benchmark levels and (5) the re-seasonal adjustment of all components of the monthly Index of Industrial Production for the entire 1949-1965 period. The 1966 Annual Supplement to the monthly Index of Industrial Production (DBS Catalogue No. 61-005) provides revised estimates for all components of the index.

AVANT-PROPOS

Le présent volume est la cinquième édition du Supplément annuel. Il contient les chiffres chronologiques mensuels et trimestriels, désaisonnalisés et bruts, de toutes les séries de la Section "S" de la Revue statistique mensuelle du Canada. Les pages sont numérotées et les séries présentées dans le même ordre que la Revue. Ainsi, S-1-1 signifie que la série contenue dans le Supplément est la première de la page S-1 de la Revue. La présente édition remplace toutes les éditions antérieures dont la dernière a paru en septembre 1965.

Les données désaisonnalisées et brutes sont les chiffres revisés les plus récents et s'étendent à décembre 1965; on peut les garder à jour en se référant aux numéros courants de la Revue. Avenant la modification, durant l'année, des données primitives ou de la méthode de désaisonnement, les révisions entières seront mises à la disposition de tous les abonnés par l'intermédiaire du Supplément hebdomadaire de la Revue statistique du Canada, (no. de catalogue 11-004 F), et devront être insérées dans la présente publication à la place des feuilles périmentées. De cette façon, l'usager sera tenu au courant de toutes les révisions et de toutes les données ajoutées ou supprimées dans la Section "S" de la Revue et aura constamment à sa disposition l'ensemble des chiffres d'après-guerre.

Les données désaisonnalisées et non désaisonnalisées de l'indice de la production industrielle et de ses éléments (pages S-2) ont été revisées pour l'ensemble de la période 1949-1965. Aucune modification n'a été apportée à l'égard de la période antérieure à 1949, et les indices de cette période restent les meilleurs indicateurs dont on dispose. Les modifications apportées aux chiffres de la période postérieure à 1948 découlent de ce qui suit: (1) l'incorporation de niveaux annuels fondés sur des données censales plus récentes (chiffres de référence) dans les séries chronologiques intéressant la fabrication, les mines, ainsi que les services d'électricité et de gaz (2) le remplacement de quelques "projecteurs" mensuels (3) l'incorporation des modifications apportées aux données sous-jacentes, après leur emploi dans l'indice de la production industrielle paru jusqu'à (4) l'utilisation d'une méthode améliorée d'adaptation des séries mensuelles au niveau des données de référence annuelles (5) la nouvelle désaisonnement de tous les éléments de l'indice mensuel de la production industrielle pour l'ensemble de la période 1949-1965. Le Supplément annuel (1966) du rapport mensuel Index of Industrial Production (B.F.S. no. de catalogue 61-005) contient les chiffres revisés de tous les éléments constitutifs de l'indice.

All employment and payroll statistics on pages S-3 and S-4 have been revised to the 1960 Standard Industrial Classification, with all indexes revised to a 1961=100 time base. The present publication provides users with selected series from January 1961 to December 1965. The historical record for the period 1957-1960 together with the major series carried back to 1949 by linking will be available later in the year. The DBS publication "Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings" (Catalogue No. 72-504) carries a detailed breakdown of all labour series (unadjusted for seasonality) for the period January 1961-May 1965; the regular January 1966 publications "Employment and Weekly Wages and Salaries" (Catalogue No. 72-002) and "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) provide revisions from June to December 1965; and the February issues show the historical data on a seasonally adjusted basis.

The unadjusted manufacturing inventories, shipments and orders series (pages S-8-1 to S-8-4) have been revised starting with January 1961 and their seasonally adjusted counterparts have been modified throughout the entire period. In addition, the original and adjusted data for shipments have been carried back one year to January 1949.

Les chiffres des séries relatives à l'emploi et les salaires (pages S-3 et S-4) ont été revus d'après la Classification type des industries de 1960 et tous les indices ramenés à la base chronologique de 1961=100. Le présent numéro fournit aux usagers les révisions allant de janvier 1961 à décembre 1965 et ceci seulement pour certaines séries. Les chiffres chronologiques pour la période 1957-1960 de concert avec les principales séries remontant à 1949 seront disponibles plus tard durant l'année. La publication du B.F.S. intitulée "Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings", (no. de catalogue 72-504) contient un sommaire détaillé de toutes les séries non désaisonnalisées sur l'emploi pour la période allant de janvier 1961 à mai 1965; les publications régulières de janvier 1966 intitulées "Employment and Weekly Wages and Salaries" (no. de catalogue 72-002) et "Man-Hours and Hourly Earnings" (no. de catalogue 72-003) fournissent les révisions de juin à décembre 1965 et les éditions du mois de février présentent les chiffres chronologiques sur une base désaisonnalisée.

Les séries originales relatives aux stocks, expéditions et commandes des fabricants (pages S-8-1 à S-8-4) ont été modifiées à partir de janvier 1961 et les contre-parties désaisonnalisées ont été revisées pour la période entière. En outre, les données brutes et désaisonnalisées des expéditions ont été étendues de 1950 à 1949.

Walter E. Duffett,
Dominion Statistician

(1) Prior to 1953, the data for total new motor vehicles sales are obtained by the addition of total commercial vehicles, page S-5-8, and total passenger vehicles, page S-5-(6+7). After January 1953, this series is a summation of total commercial vehicles and American and European passenger vehicles, pages S-5-6 and S-5-7 -- Les chiffres d'avant 1953 s'obtiennent par l'addition du total des voitures utilitaires, page S-5-8, et du total des voitures particulières, page S-5-(6+7). Après janvier 1953, la série est la sommation du total des voitures utilitaires et des voitures particulières américaines et européennes, pages S-5-6 et S-5-7.

(1) The breakdown of passenger car sales between American and European types is not available prior to January 1953. The original and seasonally adjusted series presented on this page are continuous with the sum of the series on pages S-5-6 and S-5-7 -- La répartition des ventes de voitures particulières entre américaines et européennes n'existe pas avant 1953. Les séries brute et désaisonnalisée présentées sur cette page équivalent chacune à la somme des séries des pages S-5-6 et S-5-7.

(1) Starting in January 1962, the data are not entirely comparable with earlier years because more centres are included and because of the expansion of the boundaries of metropolitan areas. This is based on information from the 1961 Census -- À compter de janvier 1962, les chiffres ne sont pas entièrement comparables à ceux des années antérieures en raison du plus grand nombre de centres et de l'expansion des limites des zones métropolitaines, d'après les renseignements tirés du recensement de 1961.

(1) Starting with January 1958, the monthly data reflect revisions 1) to incorporate the new revised Standard Industrial Classification and 2) to apply the new establishment concept. Values for 1958, however, are affected only slightly. For further details of changes see "Inventories, Shipments and Orders in Manufacturing Industries" (Cat. No. 31-001, monthly) 1963 First Report, and January, February, March 1964 -- À partir de janvier 1958, les chiffres mensuels reflètent les révisions apportées pour tenir compte 1) de la nouvelle Classification type (révisée) des industries et 2) du nouveau concept de l'établissement. Toutefois, les valeurs de 1958 ne sont que légèrement modifiées. On trouvera plus de détails dans Inventories, Shipments and Orders in Manufacturing Industries (no. 31-001 au catalogue mensuel) premier rapport de 1963, et janvier, février, mars 1964.
