FOREWORD

This is the sixth edition of the Annual Supplement. It contains the monthly and quarterly historical records, adjusted and unadjusted for seasonality, of all the series appearing in the S - section of the monthly Canadian Statistical Review. The pages are numbered and the series are arranged in the same order as they appear in the Review. Thus S-1-1 signifies that the series contained therein is the first one on page S-1 of the Review. This edition supersedes all previous editions, the last of which was published in September 1966.

The adjusted and unadjusted data are the latest revised figures published and extend to December 1966; they may be kept up-dated by referring to current issues of the Review. Should the original data or the method of seasonal adjustment be revised during the year, the complete revisions will be made available to all subscribers through the medium of the Weekly Supplement to the Canadian Statistical Review (Catalogue No. 11-004). These issues should be inserted into the present publication in place of the obsolete sheets. In this way, users will be kept abreast of all revisions to the data and of all additions or deletions to the series in the S-section of the Review, and have at all times the entire postwar record.

The seasonally adjusted labour force series for Canada on pages S-1 have been modified for the entire period from January 1953 to date. No revisions were made to the unadjusted data.

The unadjusted and seasonally adjusted series on retail trade on pages S-5 have been changed from January 1961 onwards according to the 1960 Standard Industrial Classification. Classification changes and the current monthly sample have been linked to results of the 1961 Census of Merchandising. The seasonally adjusted counterparts have been adjusted by the X-11 variant of the United States Bureau of the Census, Method II program.

The monthly original and seasonally adjusted series on building permits (pages S-6-1, S-6-2 and S-6-3) have been revised for the entire period commencing with January 1948.

AVANT-PROPOS

Le présent volume est la sixième édition du Supplément annuel. Il contient les chiffres chronologiques mensuels et trimestriels, désaisonnalisés et bruts, de toutes les séries de la Section "S" de la Revue statistique mensuelle du Canada. Les pages sont numérotées et les séries présentées dans le même ordre que la Revue. Ainsi, S-1-1 signifie que la série contenue dans le Supplément est la première de la page S-1 de la Revue. La présente édition remplace toutes les éditions antérieures dont la dernière a paru en septembre 1966.

Les données désaisonnalisées et brutes sont les chiffres revisés les plus récents et s'étendant à décembre 1966; on peut les garder à jour en se référant aux numéros courants de la Revue. Advenant la modification durant l'année, des données primitives ou de la méthode de désaisonnement, les révisions entières seront mises à la disposition de tous les abonnés par l'intermédiaire du Supplément hebdomadaire de la Revue statistique du Canada, (no. de catalogue 11-004 F), et devront être insérées dans la présente publication à la place des feuilles périmées. De cette façon, l'usager sera tenu au courant de toutes les révisions et de toutes les données ajoutées ou supprimées dans la Section "S" de la Revue et aura constamment à sa disposition l'ensemble des chiffres d'après-guerre.

Les séries désaisonnalisées de la main-d'œuvre pour le Canada (pages S-1) ont été revisées pour la période entière, c'est-à-dire de janvier 1953 à ce jour. Les données brutes de ces séries demeurent inchangées.

Les chiffres bruts et désaisonnalisés sur le commerce de détail apparaissant aux pages S-5 ont été revisés à partir de janvier 1961 en conformité avec la Classification type des industries de 1960. Les changements apportés à la nouvelle Classification ainsi que le relevé mensuel échantillon ont été rattachés aux données repères du Recensement du commerce de 1961. Les contre-parties désaisonnalisées ont été ajustées d'après la variance 11 du Bureau du recensement des États-Unis suivant le programme de la Méthode II.

Les données mensuelles brutes et désaisonnalisées sur les permis de construire (pages S-6-1, S-6-2 et S-6-3) ont été rectifiées pour la période entière, c.-à-d. depuis janvier 1948.

The monthly original and seasonally adjusted data on new dwelling units in the remaining pages S-6 have been changed from "centres 5,000 and over" to "centres 10,000 and over" commencing with the year 1962. Prior to that date, the data relate to centres of 5,000 population and over.

The seasonally adjusted series on exports and imports by major countries on pages S-7 have been revised for the entire period from January 1946. The data now published have been adjusted by the X-11 variant of the United States Bureau of the Census, Method II program.

The original and seasonally adjusted data on total manufacturing inventories, shipments and orders on pages S-8 are revised starting with January 1962. A number of factors contributed to the change in the revised figures. Actual values of the 1962, 1963 and 1964 Census of Manufactures are now used for these years and the 1964 Census values have been used as the base values for the following years. The data for 1965 and 1966 have been adjusted to include values reported too late to be included in the original estimates.

Both the seasonally adjusted data on rail revenue freight loaded (page S-8-5) and cheques cashed in clearing centres (page S-8-6) have been modified starting with January 1962.

The monthly and quarterly seasonally adjusted series on consumer credit outstanding (pages S-8-7 and S-9-6 respectively) have been revised for the entire period from 1952 to date. The data now presented have been adjusted by the X-11 variant of the United States Bureau of the Census, Method II program.

Les données mensuelles brutes et désaisonnalisées des logements neufs (autres pages S-6) dans les centres de 5,000 habitants et plus ont été portées à 10,000 âmes et plus à partir de 1962. Les chiffres antérieurs à cette date s'appliquent aux centres de 5,000 et plus.

Les séries désaisonnalisées des importations et exportations par principaux pays (pages S-7) ont été revisées de janvier 1946 jusqu'à date. Les nouvelles données ont été rectifiées d'après la variance X-11 du Bureau du recensement des États-Unis suivant le programme de la Méthode II.

Les données originales et désaisonnalisées sur les inventaires, les expéditions et les commandes des fabricants (pages S-8) ont été changées à compter de janvier 1962. Plusieurs facteurs ont contribué aux changements effectués dans les chiffres. Les valeurs actuelles du Recensement des manufactures pour les années 1962, 1963 et 1964 sont maintenant employées pour ces années et les valeurs du Recensement de 1964 sont utilisées pour les années subséquentes. Les chiffres des années 1965 et 1966 ont été ajustés de manière à inclure les valeurs qui accusaient un retard lors de la préparation des estimations originales.

Les séries désaisonnalisées sur le trafic ferroviaire commercial (page S-8-5) et sur les chèques encaissés dans les centres de compensation (page S-8-6) ont été modifiées depuis janvier 1962.

Les données mensuelles et trimestrielles désaisonnalisées sur l'encours du crédit à la consommation telles qu'elles apparaissent aux pages S-8-7 et S-9-6 respectivement ont été revisées pour la période entière, c.-à-d. de 1952 à ce jour. Les chiffres ont été rectifiés d'après la variance X-11 du Bureau du recensement des États-Unis suivant le programme de la Méthode II.

Note: The data for all retail trade series on pages S-5-1 to S-5-4 inclusive have been revised according to the 1960 Standard Industrial Classification and linked to results of the 1961 Census of Merchandising. The revised data on the new basis for the years prior to 1961 will be available later. The data for the years 1947 to 1960 on the unrevised S.I.C. are available in the 1965 edition of the Supplement. -- Note: Les données pour toutes les séries du commerce de détail contenues aux pages S-5-1 à S-5-4 inclusivement ont été révisées en conformité avec la Classification type des industries de 1960 et rattachées aux données repères du Recensement du commerce de 1961. Les chiffres révisés d'après la nouvelle base pour les années antérieures à 1961 seront disponibles plus tard. Les données des années 1947 à 1960 fondées sur la Classification non révisée des industries sont disponibles dans l'édition 1965 du Supplément.

(1) Prior to 1953, the data for total new motor vehicle sales are obtained by the addition of total commercial vehicles, page S-5-8, and total passenger vehicles, page S-5-(6+7). After January 1953, this series is a summation of total commercial vehicles and Canadian, United States and overseas manufactured passenger vehicles, pages S-5-6 and S-5-7 -- Les chiffres d'avant 1953 s'obtiennent par l'addition du total des voitures utilitaires, page S-5-8, et du total des voitures particulières, page S-5-(6+7). Après janvier 1953, la série est la sommation du total des voitures utilitaires et des voitures particulières fabriquées au Canada, aux États-Unis et outre-mer, pages S-5-6 et S-5-7.

(1) The breakdown of passenger car sales between Canadian, United States and overseas manufactured types is not available prior to January 1953. The original and seasonally adjusted series presented on this page are continuous with the sum of the series on pages S-5-6 and S-5-7 -- La répartition des ventes de voitures particulières fabriquées au Canada, aux États-Unis et outre-mer n'existe pas avant 1953. Les séries brute et désaisonnalisée présentées sur cette page équivalent chacune à la somme des séries des pages S-5-6 et S-5-7.

(1) Starting in January 1962, the data are not entirely comparable with earlier years because more centres are included and because of the expansion of the boundaries of metropolitan areas. Prior to 1962, data relate to centres of 5,000 and over population. -- À compter de janvier 1962, les chiffres ne sont pas entièrement comparables à ceux des années antérieures en raison du plus grand nombre de centres et de l'expansion des limites des zones métropolitaines. Avant 1962, les données s'appliquent aux centres de 5,000 et plus de population.

(1) Starting with January 1958, the monthly data reflect revisions 1) to incorporate the new revised Standard Industrial Classification and 2) to apply the new establishment concept. Values for 1958, however, are affected only slightly. For further details of changes see "Inventories, Shipments and Orders in Manufacturing Industries" (Cat. No. 31-001, monthly) 1963 First Report, and January, February, March 1964 -- À partir de janvier 1958, les chiffres mensuels reflètent les révisions apportées pour tenir compte 1) de la nouvelle Classification type (révisée) des industries et 2) du nouveau concept de l'établissement. Toutefois, les valeurs de 1958 ne sont que légèrement modifiées. On trouvera plus de détails dans Inventories, Shipments and Orders in Manufacturing Industries (no. 31-001 au catalogue mensuel) premier rapport de 1963, et janvier, février, mars 1964.
