FOREWORD

This is the seventh edition of the Annual Supplement. It contains the monthly and quarterly historical records, adjusted and unadjusted for seasonality, of all the series appearing in the S - section of the monthly Canadian Statistical Review. The pages are numbered and the series are arranged in the same order as they appear in the Review. Thus S-1-1 signifies that the series contained therein is the first one on page S-1 of the Review. This edition supersedes all previous editions, the last of which was published in August 1967.

The adjusted and unadjusted data are the latest revised figures published and extend to December 1967; they may be kept up-dated by referring to current issues of the Review. Should the original data or the method of seasonal adjustment be revised during the year, the complete revisions will be made available to all subscribers through the medium of the Weekly Supplement to the Canadian Statistical Review (Catalogue No. 11-004). These issues should be inserted into the present publication in place of the obsolete sheets. In this way, users will be kept abreast of all revisions to the data had of all additions or deletions to the series in the S-section of the Review, and have at all times the entire postwar record.

The seasonally adjusted labour force series for Canada on pages S-1 have been modified for the entire period from January 1953 to date. No revisions were made to the unadjusted data.

The series for industrial production on pages S-2 have been completely revised due to the incorporation of a 1961 weight and reference base and the use of the 1960 Standard Industrial Classification. The data have been seasonally adjusted using the X-11 variant of the United States Bureau of the Census, Method II seasonal adjustment program.

The seasonally adjusted employment series on pages S-3 have been revised for the entire period from January 1961 to date. No revisions were made to the unadjusted data.

The seasonally adjusted series on average hourly earnings (Pages S-4-3, S-4-4 and S-4-5) and average weekly hours (Pages S-4-6, S-4-7 and S-4-8) in manufacturing have been revised for the entire period starting with January 1961. The original series have not been revised.

AVANT-PROPOS

Le présent volume est la septième édition du Supplément annuel. Il contient les chiffres chronologiques mensuels et trimestriels, corrigés des variations saisonnières et bruts, de toutes les séries de la Section "S" de la Revue statistique mensuelle du Canada. Les pages sont numérotées et les séries présentées dans le même ordre que dans la Revue. Ainsi, S-1-1 signifie que la série contenue dans le Supplément est la première de la page S-1 de la Revue. La présente édition remplace toutes les éditions antérieures, dont la dernière a paru en août 1967.

Les données corrigées des variations saisonnières et brutes sont les chiffres revisés les plus récents et s'étendent à décembre 1967; on peut les tenir à jour grâce aux numéros courants de la Revue. Advenant la modification durant l'année des données primitives ou de la méthode de correction des variations saisonnières, des révisions complètes seront mises à la disposition de tous les abonnés par l'intermédiaire du Supplément hebdomadaire de la Revue statistique du Canada, (no. de catalogue 11-004 F), et devront être insérées dans la présente publication à la place des feuilles périmées. De cette façon, l'usager sera tenu au courant de toutes les révisions et de toutes les données ajoutées ou supprimées dans la Section "S" de la Revue, et aura constamment à sa disposition l'ensemble des chiffres d'après-guerre.

Dans les séries sur la main-d'œuvre du Canada (pages S-1), les données corrigées des variations saisonnières relatives à l'ensemble de la période considérée, c'est à dire de janvier 1953 à ce jour, ont été revisées. Les données brutes de ces séries demeurent inchangées.

Les séries sur la production industrielle (page S-2) ont été complètement remaniées par suite de l'adoption de l'année 1961 comme base de pondération et de référence, ainsi que l'adoption de la Classification type des industries de 1960. Les données ont été corrigées des variations saisonnières à l'aide de la variante X-11 de la méthode II du programme de correction des variations saisonnières du United States Bureau of the Census.

Dans les séries sur l'emploi (pages S-3), les données corrigées des variations saisonnières relatives à la période allant de janvier 1961 jusqu'à maintenant ont été rectifiées. Les données brutes n'ont pas été revisées.

Dans les séries sur le gain horaire moyen (pages S-4-3, S-4-4 et S-4-5) et sur les heures hebdomadaires moyennes (pages S-4-6, S-4-7 et S-4-8) dans la fabrication, les données corrigées des variations saisonnières relatives à la période écoulée depuis janvier 1961 ont été revisées. Les données brutes n'ont pas été revisées.

The unadjusted retail trade statistics (pages S-5) have been revised for the period 1965 through 1967 to account for "births and deaths", i.e. new firms coming into business and firms ceasing operations. The seasonally adjusted series have been revised for the entire period 1961 to date.

The monthly original and seasonally adjusted value series on new motor vehicle sales have been replaced by units series. The value series have been discontinued due to changes in the valuation of new motor vehicles applied to sales in 1967 but not in previous years. Statistics of units sold are consistent over time. They have been adjusted by the X-11 variant of the Census Method II. A trading-day adjustment based upon the actual variations in the data was applied. The monthly adjustment factors were calculated by computer from seven daily weights as determined by a regression technique included in the X-11 program.

The value series (identified as S-5-5 (b) to S-5-8(b)) are also published with the original series extended to December 1967.

Seasonally adjusted data for value of building permits (pages S-6-1, S-6-2 and S-6-3) have been revised for the entire period commencing with January 1948. The series have been adjusted by the X-11 Variant of the Census Method II. Adjustments made for trading-day variation were derived from actual variations in the data.

Seasonally adjusted data for exports and imports (pages S-7) have been revised commencing with January 1961. Export and import series have been adjusted by the X-11 variant of the Census Method II. Adjustments made for trading-day variation were derived from actual variations in the data.

Both the seasonally adjusted data on rail revenue freight loaded (page S-8-5) and cheques cashed in clearing centres (page S-8-6) have been revised for the entire period from 1946. The X-11 variant of the Census Method II has been used for seasonal adjustment. Adjustments made for shipping-day variation (page S-8-5) and for trading-day variation (page S-8-6) were derived from actual variations in the data.

Les statistiques brutes sur le commerce de détail pour les années 1965, 1966 et 1967 (pages S-5) ont été révisées afin de tenir compte de l'ouverture de nouveaux commerces et de la fermeture d'anciens. Les séries corrigées des variations saisonnières relatives à l'ensemble de la période, c'est-à-dire de 1961 jusqu'à nos jours, ont été révisées.

Les séries mensuelles de données brutes et corrigées des variations saisonnières établies à partir de la valeur des véhicules automobiles neufs ont été remplacées par des séries établies à partir du nombre de véhicules vendus. La série établie à partir de la valeur a été abandonnée à cause de la modification du mode d'évaluation des ventes de véhicules automobiles neufs survenue en 1967, mais qui n'est pas applicable aux années antérieures. Les statistiques établies à partir du nombre de véhicules demeurent comparables d'année en année. Ces statistiques ont été corrigées au moyen de la variante X-11 de la méthode II du U.S. Census Bureau. On a effectué une correction pour tenir compte des écarts relatifs à la date de vente; cette correction est fondée sur les écarts réels. Les coefficients de correction de chaque mois ont été calculés mécanographiquement au moyen de sept poids correspondant respectivement à chacun des jours de la semaine, selon une méthode de régression qui fait partie du programme X-11.

Les séries établies à partir de la valeur (S-5-5(b) à S-5-8(b)) sont également publiées; les données brutes vont jusqu'à décembre 1967.

Dans les séries sur la valeur des permis de construire des pages S-6-1, S-6-2 et S-6-3, les données corrigées des variations saisonnières relatives à la période depuis janvier 1948 ont été révisées. Cette révision a été accomplie au moyen de la variante X-11 de la méthode II du U.S. Census Bureau. Les corrections effectuées pour tenir compte des écarts relatifs à la date du permis sont fondées sur les écarts réels.

Dans les séries sur les exportations et les importations, (pages S-7), les données corrigées des variations saisonnières relatives à la période depuis janvier 1961 ont été révisées. Les séries sur les exportations et les importations ont été rectifiées au moyen de la variante X-11 de la méthode II du U.S. Census Bureau. Les corrections effectuées pour tenir compte des écarts relatifs à la date d'importation ou d'exportation sont fondées sur les écarts réels.

Dans les séries tant sur trafic ferroviaire commercial (page S-8-5) que sur les chèques présentés à la compensation (page S-8-6), les données corrigées des variations saisonnières relatives à la période depuis 1946 ont été révisées. La correction des variations saisonnières a été faite au moyen de la variante X-11 de la méthode II du U.S. Census Bureau. Les corrections effectuées pour compenser les écarts relatifs à la date d'expédition (page S-8-5) et à la date d'opération (page S-8-6) sont fondées sur les écarts réels.

The monthly and quarterly original and seasonally adjusted series on consumer credit outstanding (pages S-8-7 and S-9-6 respectively) have been revised starting with 1965.

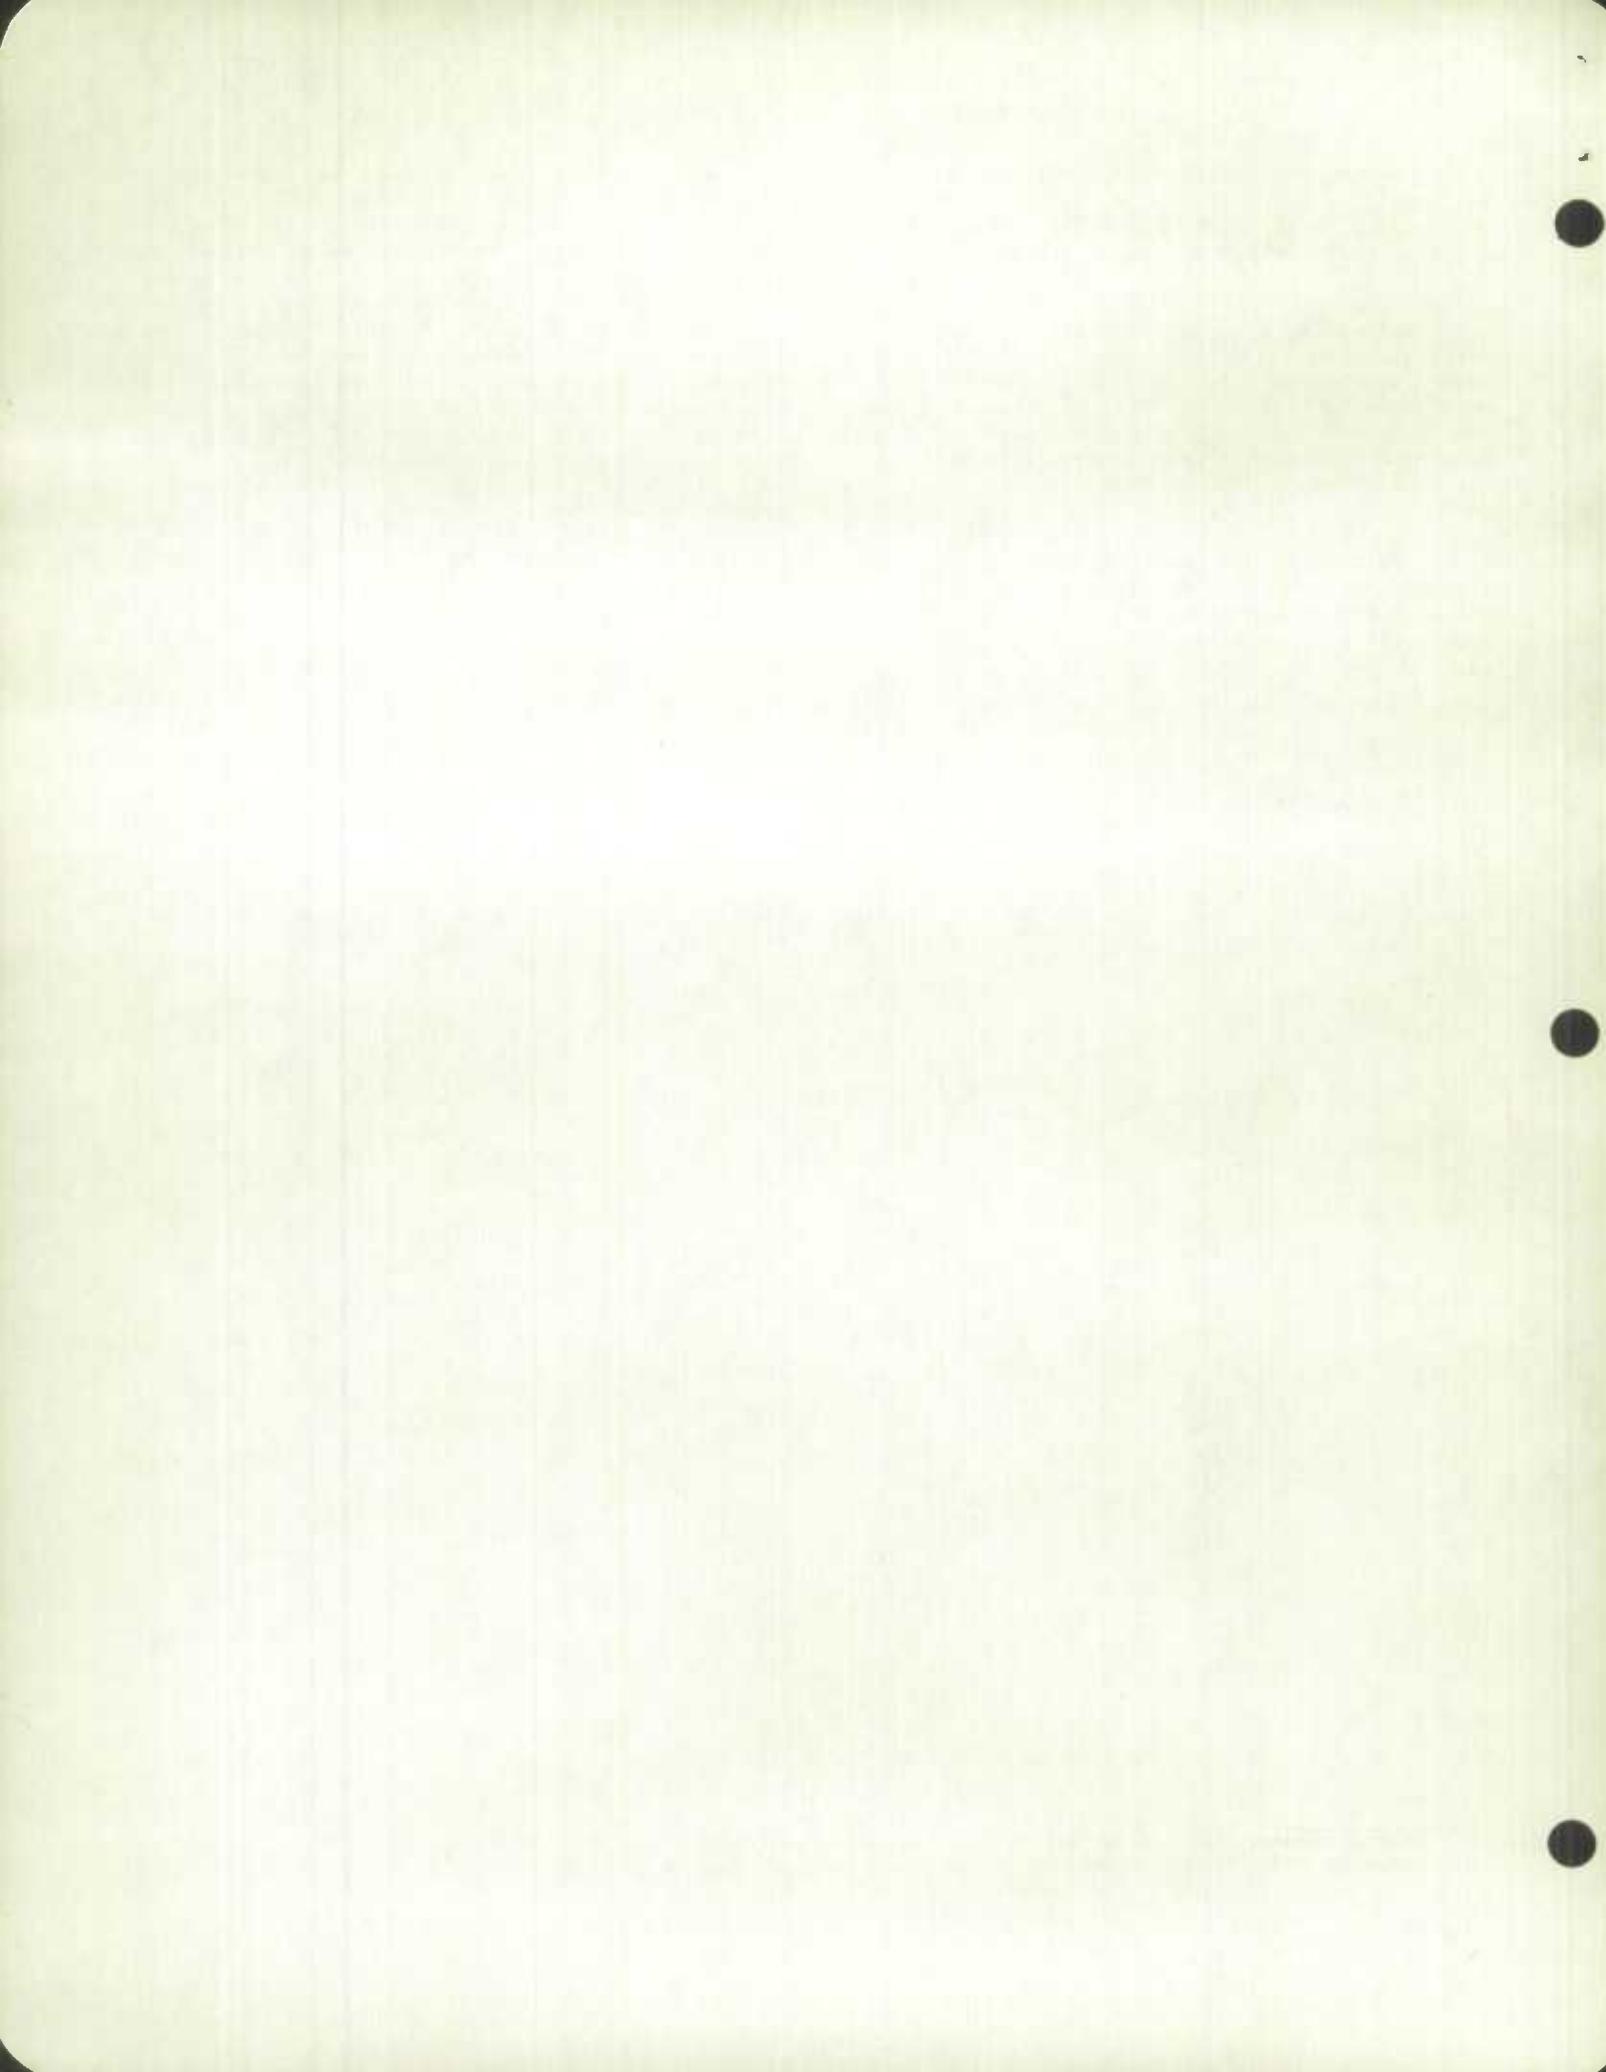

Seasonally adjusted data for commercial failures (page S-9-10) have been revised for the entire period from 1955. The series has been adjusted by the X-11 variant of the Census Method II. Adjustments made for trading-day variation were derived from actual variations in the data.

The monthly and quarterly seasonally adjusted series on new dwelling units (pages S-6-4, S-6-5, S-6-6 and S-9-7, S-9-8, S-9-9 respectively) have been revised starting with 1950.

Dans les séries mensuelles (page S-8-7) et trimestrielles (page S-9-6), les données brutes et corrigées des variations saisonnières sur le crédit à la consommation en cours postérieures à 1965 ont été révisées.

Dans la série sur les faillites commerciales (page S-9-10), les données corrigées des variations saisonnières relatives à la période depuis 1955 ont été révisées. Cette série a été corrigée au moyen de la variante X-11 de la méthode II du U.S. Census Bureau. Les corrections effectuées pour compenser les écarts relatifs à la date de la faillite sont fondées sur les écarts réels.

Dans les séries mensuelles (pages S-6-4, S-6-5 et S-6-6) et trimestrielles (S-9-7, S-9-9 et S-9-9), les données corrigées des variations saisonnières sur la construction domiciliaire relatives à la période depuis 1950 ont été révisées.

Note: The data for all retail trade series on pages S-5-1 to S-5-4 inclusive have been revised according to the 1960 Standard Industrial Classification and linked to results of the 1961 Census of Merchandising. The revised data on the new basis for the years prior to 1961 will be available later. The data for the years 1947 to 1960 on the unrevised S.I.C. are available in the 1965 edition of the Supplement. -- Nota: Les données pour toutes les séries du commerce de détail contenues aux pages S-5-1 à S-5-4 inclusivement ont été révisées en conformité avec la Classification type des industries de 1960 et rattachées aux données repères du Recensement du commerce de 1961. Les chiffres révisés d'après la nouvelle base pour les années antérieures à 1961 seront disponibles plus tard. Les données des années 1947 à 1960 fondées sur la Classification non révisée des industries sont disponibles dans l'édition 1965 du Supplément.

(1) The breakdown of passenger car sales between Canadian, United States and overseas manufactured types is not available prior to January 1953. The original and seasonally adjusted series presented on this page are continuous with the sum of the series on pages S-5-6 and S-5-7 -- La répartition des ventes de voitures particulières fabriquées au Canada, aux Etats-Unis et autre-mer n'existe pas avant 1953. Les séries brute et désaisonnalisée présentées sur cette page équivalent chacune à la somme des séries des pages S-5-6 et S-5-7.

(1) Prior to 1953, the data for total new motor vehicle sales are obtained by the addition of total commercial vehicles, page S-5-8, and total passenger vehicles, page S-5-(6+7). After January 1953, this series is a summation of total commercial vehicles and Canadian, United States and overseas manufactured passenger vehicles, page S-5-6 and S-5-7. -- Les chiffres d'avant 1953 s'obtiennent par l'addition du total des voitures utilitaires, page S-5-8, et du total des voitures particulières, page S-5-(6+7). Après janvier 1953, la série est la sommation du total des voitures utilitaires et des voitures particulières fabriquées au Canada, aux États-Unis et outre-mer, pages S-5-6 et S-5-7. (2) The 1967 dollar values of new motor vehicle sales are not comparable with previous years due to changes in the valuation. The seasonally adjusted data are not available for 1967. -- Les ventes, en dollars, de véhicules automobiles neufs pour l'année ne sont pas comparables aux années antérieures en raison des changements apportés dans l'évaluation. Les chiffres corrigés des variations saisonnières ne sont pas disponibles pour 1967.

(1) Starting in January 1962, the data are not entirely comparable with earlier years because more centres are included and because of the expansion of the boundaries of metropolitan areas. Prior to 1962, data relate to centres with a population of 5,000 and over. -- À compter de janvier 1962, les chiffres ne sont pas entièrement comparables à ceux des années antérieures en raison du plus grand nombre de centres et de l'expansion des limites des zones métropolitaines. Avant 1962, les données s'appliquent aux centres de 5,000 et plus de population.

(1) Starting with January 1958, the monthly data reflect revisions 1) to incorporate the new revised Standard Industrial Classification and 2) to apply the new establishment concept. Values for 1958, however, are affected only slightly. For further details of changes see "Inventories, Shipments and Orders in Manufacturing Industries" (Cat. No. 31-001, monthly) 1963 First Report, and January, February, March 1964 -- À partir de janvier 1958, les chiffres mensuels reflètent les révisions apportées pour tenir compte 1) de la nouvelle Classification type (révisée) des industries et 2) du nouveau concept de l'établissement. Toutefois, les valeurs de 1958 ne sont que légèrement modifiées. On trouvera plus de détails dans Inventories, Shipments and Orders in Manufacturing Industries (no. 31-001 au catalogue mensuel) premier rapport de 1963, et janvier, février, mars 1964.

(1) Starting with January 1958, there is some discontinuity in monthly values of shipments caused by revisions described in the footnote on page S-8-1. The changes lowered monthly values in 1958 by 3.3 per cent from values before the revisions -- A partir de janvier 1958, il existe une certaine discontinuité dans les valeurs mensuelles des expéditions en raison des modifications mentionnées au renvoi de la page S-8-1. Les modifications ont fait baisser les valeurs mensuelles de 1958 de 3.3 p. 100 au regard des valeurs antérieures aux révisions.
