FOREWORD

When, in the interest of economy, the tables in the monthly issue of the *Canadian Statistical Review* were considerably reduced in size with the May, 1951 number, it was proposed to publish a series of supplements in which historical data together with more monthly information would be shown. This report is the first in this series which will, in future, be published on a biennial basis.

These supplements were initiated in response to demands from businessmen, economists and statisticians and contain three important features. First, they present, from 1926 or the earliest year for which data are available, to the last complete year, the annual record of all statistical series carried in the regular monthly issues of the *Canadian Statistical Review*, so as to permit users of the statistics to locate historical figures without endless thumbing through back issues or maintaining extensive records. Secondly, the annual and monthly data are comparable throughout the period covered, and incorporate all revisions which have been made since the publication of the April, 1951 issue. Thirdly, the supplements provide monthly data for a longer period, thereby facilitating observation of seasonal trends. The 1953 supplement presents, for most series, monthly or quarterly data for the period 1950-1952 or for a longer period where more space was available as a result of the lack of historical figures.

Used in conjunction with the latest monthly issue of the *Canadian Statistical Review*, this volume presents the record of the more important economic indicators from 1926 to date. Through the means of weekly supplements, subscribers are assured of receiving most of the current figures as soon as they are forthcoming. These supplements are supplied without charge to regular subscribers to the *Canadian Statistical Review*.

The present volume was prepared by the Business Statistics Section of the Research and Development Division of the Bureau.

EXPLANATORY NOTES AND SOURCES

The sources shown below are applicable, for the most part, to the current data. Many other publications and records of the various divisions of the Bureau were consulted to obtain the historical series.

INTRODUCTION

Table 1

1. See note for Table 20.
2. Monthly data are producers' shipments.
3. Prior to 1945 relates to hourly earnings in one week in the month of highest employment (overtime included).
4. Prior to 1946 annual data as of June 1. From 1946 annual figures are survey averages.
5. For this purpose, paid workers are taken to include all those in the civilian labour force who are without jobs and seeking work.
6. Includes only those not at work and seeking work.
7. Conversions are included with annual data only.
8. Data for intercensal years 1942-1950 inclusive are subject to revision to conform with 1951 Census of Distribution. Newfoundland included in 1951 and 1952. Data from 1947-1950 inclusive exclude Yukon and North-West Territories.
9. Annual totals are for fiscal years ended March 31 of period shown.

Table 2

*Average of five weeks.

1. Annual data as of middle of July. Monthly data for dates varying from 8th to 17th of month.
2. Average quarterly statistics are given in the monthly section.
3. Great Britain.
4. Monthly average or calendar months.

Sources: Monthly Digest of Statistics and Statistical Abstract for the United Kingdom.

Table 3

1. Personal income is given on an annual basis for months as well as for years. Monthly data are seasonally adjusted.
2. Includes army civilian supply exports from February, 1947.
3. Annual totals are averages of end-of-month figures.
4. Standard and Poor's Corporation.

Source: Survey of Current Business, U.S. Department of Commerce.

Table 4

Note. Until the end of 1951, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Monthly figures for 1952 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

1. Estimates are given by years as of June 1 and by quarters for Canada from June 1, 1952.

Table 7

Note. These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Data include Newfoundland in estimates from October, 1949, and exclude persons in certain remote parts of several provinces and Indians on reservations. Prior to 1946, estimates are given by years as of June 1. From 1946, annual figures are survey averages.

1. The average for 1949 excludes Newfoundland.
2. Due to flood conditions, estimates for Manitoba for June, 1950, were based on previous experience rather than direct survey.

Table 8

Note. As of January, 1950, Newfoundland is included.

Tables 9-11

Note. Data reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

*Average weekly wages and salaries.
Newfoundland represented as of 1949.

Table 4 -- Concluded

2. Exclusive of stillbirths.
 3. Not applicable to figures on population.
 4. Yukon and North-West Territories are included in figures for population but not in figures for births, marriages and deaths. Newfoundland is included in Canada totals as of January, 1949.

Table 5

Note. Throughout this table, Newfoundland is included as of 1949. In 1948, the last year before accession, Newfoundland's Gross National Product was about \$175 million.

1. Accrued Net Income of Farm Operators from Farm Production. This item includes the undistributed earnings of the Canadian Co-operative Wheat Producers and the Canadian Wheat Board and an inventory valuation adjustment for grain in these channels, on a calendar year basis. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and no seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.
2. Net Income of Non-farm Unincorporated Business. This item includes net income of independent professional practitioners.
3. Includes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Also includes U.N.R.R.A., Mutual Aid and Military Relief, and the change in inventories of government commodity agencies.
4. Includes capital expenditures by private and government business enterprises, private non-commercial institutions, and outlays on new residential construction by individuals.
5. Excludes U.N.R.R.A., Mutual Aid and Military Relief.
6. The quarterly data on this page are not seasonally adjusted.
7. This item differs from Column 4 on pages 15 and 17 in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Co-operative Wheat Producers and the Canadian Wheat Board.
8. Includes all government debt interest paid to persons.
9. Includes net expenditure abroad.

LABOUR

Tables 9-11 -- Concluded

1. Includes wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies, and non-metallic mineral products.
2. Includes foods and beverages, tobacco and tobacco products, rubber products, leather products, textile products except clothing, clothing, paper products, printing, publishing and allied industries, products of petroleum and coal, chemical products and miscellaneous manufacturing industries.

Table 15

Note. Newfoundland data are included as of April, 1949. In the first five columns "Unemployment assistance" for that province is disregarded.

1. Monthly data as of end of month while annual section is based on averages of month-end statistics.
2. As of January 1950, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the last day of the month has been substituted for the number of payments in the week which includes the third Friday of the month.
3. Supplementary benefit payments are excluded.

Table 15 — Concluded

4. Prior to 1944, data included deferred as well as current vacancies.
5. Includes prepayment of \$4,000,000 by Post Office.

Table 18

1. Changed from silk fabrics to rayon fabrics in January, 1942.
2. From 1926 to 1941 rayon yarns and artificial silk hosiery.
3. Gold is included from 1935.
4. Years 1941 to 1946 are revised to exclude gasoline tax.

Source: Prices and Price Indexes, D.B.S.

Table 19

1. Excludes gold.
2. New series calculated to replace the index of general building materials.
3. Index arithmetically converted from base 1935-1939=100.
4. Excluding Newfoundland. The prices of western wheat and coarse grains prior to August, 1952 are final prices, whereas those used since August, 1952 are initial prices for oats and initial prices plus interim payments for wheat and barley.

Sources: Prices and Price Indexes, and Index Numbers of Farm Prices of Agricultural Products, D.B.S.

FUEL AND POWER

Table 20

Note. Newfoundland is included as of 1949. Monthly totals are not equivalent to annual data. West Kootenay plants assimilated by Consolidated Mining and Smelting Co. are not included in annual totals but retained in the monthly series to preserve continuity. In addition several smaller plants do not report monthly.

1. Less imports.

Table 23

1. Prior to 1940 data refer to products made for sale.
2. For some years prior to 1940 includes a small amount of aviation gasoline.
3. Prior to 1940 series used represent apparent domestic consumption. Data computed from production, imports, exports and stocks at refineries.

Source: Monthly Report on Refined Petroleum Products, D.B.S.

MINING

Table 24

Note. Newfoundland is included in production figures as of 1949.

1. Includes fine copper in ore, ingots, bars, billets, rods, strips, sheets and tubing.
2. Includes ingots, bars and billets.
3. Includes nickel in matte or speiss, oxide and fine.

Sources: Monthly Reports: Silver, Lead and Zinc; Gold; Copper and Nickel; Canada's Leading Minerals and Trade of Canada, D.B.S.

Table 25

1. Prior to 1948 contains a minor quantity used by plants reporting.
2. Total salt and salt content of brine.

Sources: Monthly Reports: Production of Canada's Leading Minerals, Cement and Cement Products and Trade of Canada, D.B.S.

MANUFACTURING

Table 26

1. As at end of period.
2. Prior to December, 1951, inventory estimates were made on the basis of manufacturers' own investment only. Since that date, they represent total inventories held including manufacturers' own investment and that portion not owned by reporting firms but financed by progress payments. Data for December, 1951 are shown in the table on both bases in order to facilitate comparison with previous figures.
3. Prior to December, 1951, shipments data in the majority of cases represented final sales only. Since that date, shipments generally continue to mean all shipments from the plant, whether for sale or for transfer to other units of the same firm; in addition they include all progress payments received during the period. The indexes of inventories in this section of the table represent manufacturers' own investment only in order to be consistent with the accompanying indexes of shipments. Data reflecting both concepts are shown for December, 1951.
4. Includes primary iron and steel, iron castings, sheet metal products and wire and wire products.
5. Includes heavy electrical machinery, office, household and store machinery and industrial machinery.

Table 26 — Concluded

6. Includes shipbuilding, railway rolling stock and aircraft.
7. Excludes heavy electrical machinery.
8. The indexes for shipments and orders take into account progress receipts in industries working on long-term contracts. These series are therefore comparable in concept to the inventories and shipments data. The shipments index, however, refers only to the firms reporting outstanding orders. Data on orders are reported by 950 manufacturing plants which accounted for approximately 30 per cent of total value of production in 1950. Orders represent total backlog of orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled but less progress receipts in industries working on long-term contracts. Sales in these industries include progress receipts.
9. Not applicable to ratio columns.
10. Ratio of current month's orders to current month's shipments.
11. Orders represent a two-month sales forecast, not total outstanding orders.
12. Excluding motor vehicles.

Note. Newfoundland is included as of 1949 in data for wood pulp and newsprint.

1. Monthly totals are not equivalent to annual data which include Newfoundland (since 1949) and Yukon and North-West Territories for which only annual statistics are collected.
2. Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

Table 36

1. Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.
2. The coverage was extended to 507 municipalities in 1948, and as of 1952, stands at 822, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.
3. As of 1950, Newfoundland is included.

Table 33A and 33B

1. As of January, 1951, includes some silvery pig iron formerly included with ferro-alloys.
2. Excluding producers' interchange.
3. Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products.
4. Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope. A substantial part of the imports appears after refinishing in total shipments. Production of primary iron and steel shapes from Canadian steel is equivalent to about 72 per cent of the total production of ingots.

Table 52

1. Official holdings of gold and U.S. dollars are given as of end of year or quarter.

2. The trade figures have been adjusted to conform to balance of payments definitions of the international exchange of commodities. Non-commercial items are deducted from trade statistics, as are items such as purchases by tourists which are entered elsewhere in the current account. An important adjustment during the war and again in 1951-52 arose from the abnormal movements of commodities on government account; payments data were substituted for the physical movement of commodities in order among other things, to reflect more closely the proper timing and valuation of these transactions.

3. Balance also reflects all other current transactions with the exception of wartime grants and mutual aid which are included in current receipts but excluded from current payments as follows:

1942, -251; 1943, -130; 1944, -240; 1945, -215; 1946, -24.

4. Net transfers for foreign direct investment in Canadian enterprises; from 1927 to 1939 also includes Canadian direct investment abroad.
5. Net sales (+) or purchases (-) by Canadians of Canadian and foreign securities (trading, new issues and retirements including official wartime repatriation).
