## FOREWORD

This is the second volume in the series of biennial supplements to the *Canadian Statistical Review*. The present report supersedes the first issue which was published in December, 1953.

These supplements were initiated in response to demands from businessmen, economists and statisticians for a readily available and continuous record of current economic indicators. They contain three important features: first, they present in the form of monthly averages, from 1926 or the earliest year for which data are available, to the last complete year, the annual record of the 1,600 statistical series carried in the regular monthly issues of the "Canadian Statistical Review". This permits users of the statistics to locate historical figures without endless thumbing through back issues or maintaining extensive records. Secondly, except in certain specified cases, the annual and monthly data are comparable throughout the period covered, and incorporate all revisions which have been made since the publication of the 1953 supplement. Thirdly, these reference volumes provide monthly data for a longer period than can be shown in the monthly bulletins, thereby permitting more extensive analysis of seasonal trends.

The 1955 supplement presents, for most series, monthly or quarterly data from January 1952 through December 1954 or for a longer period where more space was available as a result of the lack of historical figures. Since the publication of the first supplement, both monthly and annual data have been revised in several cases, so that, in the case of monthly and quarterly data, the figures for 1950 and 1951 as shown in the 1953 volume are not always strictly comparable with those for later years contained in the present report. An examination of the statistics for 1952, shown in both publications, will reveal the extent of changes for those series which have been altered during the past two years. The annual data are comparable throughout except where specifically noted.

Designed to be used in conjunction with the latest monthly issue of the "Canadian Statistical Review", this volume presents the record of the more important economic indicators from 1926 to date. Through the means of weekly supplements, subscribers are assured of receiving most of the current figures as soon as they are forthcoming. These supplements are supplied without charge to regular subscribers to the "Canadian Statistical Review".

The present volume was prepared by the Business Statistics Section of the Research and Development Division of the Bureau.

## EXPLANATORY NOTES AND SOURCES

## INTRODUCTION

Table 1

1. Seasonally adjusted at annual rates.
2. Inventories include manufacturers' own investment only.
3. Rough cords of 128 cu. ft.
4. End of period.
5. Before 1945, relates to week in month of highest employment.

Table 2

1. "De facto" population. Annual data are for June. Between 1940 and 1950 estimates refer to the total population including members of the forces serving overseas and merchant seamen at sea. From 1951 to 1954, the mid-year estimates on this basis were, respectively, 50,557, 50,722, 50,857 and 51,066.
2. Annual data are for June. Prior to 1948, estimates excluded private indoor domestic servants and gainfully occupied persons over pensionable age (men, 65; women, 60). Part-time women workers were counted as half units. The civil employment estimate for 1948 on the old basis was 19,064 and the estimate of unemployed was 272.
3. At current market prices. Annual data are totals for the year; for 1952, 1953 and 1954 they are the sum of the four quarters. Prior to 1946, data are unrevised and not strictly comparable to those of later years.
4. Annual data for 1948 and 1949 are for June.
5. As of 1952, data take account of the increased valuation of parcel post.
6. Output of building and civil engineering work, excluding the output of building operatives employed by private firms outside the building and civil engineering industries. Includes building by operatives employed by public authorities.

Sources: Monthly Digest of Statistics and Annual Abstract of Statistics, Central Statistical Office, London.

Table 3

1. Including Armed Forces Overseas. Prior to 1941, annual figures are mid-year estimates; thereafter they are monthly averages.
2. Includes wage and salary disbursements and other labour income. Excludes employer contributions for social insurance.
3. Includes shipments under the Mutual Security Program. Beginning with 1941, data include lend-lease exports. From 1947 onward army civilian supply shipments are included.
4. Annual figures are averages of the unadjusted data.
5. At book value. Annual data are the unadjusted December figures for each year.
6. Revised series beginning in 1948; not completely comparable with earlier years.
7. Production and related workers who worked during or received pay for the pay period ending nearest the 15th of the month. Covers both full-time and part-time employees.
8. Data for 1939 and later years are not strictly comparable with earlier years.
9. Data for 1951 and subsequent years not comparable with those of earlier years. In 1951, the monthly average on the old basis was 12,748.
10. As at Wednesday, nearest end of month. Coverage increased in 1952.

residence. Monthly data are by month of occurrence, Marriages are classified by place of occurrence throughout.

1. Annual and monthly data for population, births, marriages and deaths include the Yukon and North West Territories. Although Newfoundland data on population, births, marriages and deaths are shown separately for the entire period, they are included in the Canada totals only since 1949.
2. Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.
3. Exclusive of stillbirths. Annual data are monthly averages.
4. Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.
5. Annual data are monthly averages.

Table 5

Note. Throughout this table, Newfoundland is included as of 1949. In 1948, the last year before accession, Newfoundland's Gross National Product was about \$175 million.

1. Accrued Net Income of Farm Operators from Farm Production. This item includes the undistributed earnings of the Canadian Co-operative Wheat Producers and the Canadian Wheat Board and an inventory valuation adjustment for grain in these channels, on a calendar year basis. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and, since 1951, a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.
2. Net Income of Non-farm Unincorporated Business. This item includes net income of independent professional practitioners.
3. Includes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Also includes U.N.R.R.A., Mutual Aid and Military Relief, and the change in inventories of government commodity agencies.
4. Includes capital expenditures by private and government business enterprises, private non-commercial institutions, and outlays on new residential construction by individuals.
5. Excludes U.N.R.R.A., Mutual Aid and Military Relief.
6. Beginning in 1950, columns will not cross-add due to the omission of an adjusting entry arising from the mechanical conversion of constant dollar data from a 1949 base to a 1935-39 base.
7. This item differs from Column 4 on pages 16 and 18 in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Co-operative Wheat Producers and the Canadian Wheat Board.
8. Includes all government debt interest paid to persons.
9. Includes net expenditure abroad.

## LABOUR

Table 7

Note. These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Data include Newfoundland in estimates from October, 1949, and exclude residents of the Yukon and the North-West Territories and Indians on reservations.

Prior to 1946 estimates are given by years as of June 1. From 1946 to 1952, annual figures are averages of quarterly surveys.

For 1953 and 1954 annual figures are averages of monthly surveys.

1. The average for 1949 excludes Newfoundland.
2. Due to flood conditions, estimates for Manitoba for June, 1950, were based on previous experience rather than direct survey.

Tables 9-11

Note. Data reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

\* Average weekly wages and salaries. Newfoundland is represented as of 1949.

1. Includes wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies, and non-metallic mineral products.
2. Includes foods and beverages, tobacco and tobacco products, rubber products, leather products, textile products except clothing, clothing, paper products, printing, publishing and allied industries, products of petroleum and coal, chemical products and miscellaneous manufacturing industries.

## FUEL AND POWER

## Table 20

Note, Newfoundland is included as of 1949.  
Monthly totals are not equivalent to annual data for several reasons. First, for purposes of the annual surveys, results of which are published in the "Central Electric Stations" annual reports, generating stations are allowed to file returns for their fiscal years which are not calendar years in all cases. The annual series, however, are comparable for the period covered. Secondly, the monthly surveys do not include statistics for the smaller stations and do not cover output in the Yukon and North-West Territories. The annual series cover all stations generating power for sale. Thirdly, the annual surveys exclude all power generated for own use by reporting establishments. For long-term comparability, the monthly series retain the West Kootenay plants which were dropped from the annual survey in 1947. The entire output of these plants was taken over by the Consolidated Mining and Smelting Co. and is reported annually under the Non-Ferrous Metal Smelting and Refining Industry.

The annual surveys do not provide data on primary and secondary power. Secondary production in the annual section of the table is taken from the monthly surveys, while primary production is a residual figure obtained by deducting the secondary production figure from the annual output total.

Sources: Monthly Report: "Central Electric Stations"; Annual Report: "Central Electric Stations", D.B.S.

## Table 21

1. As of April, 1949, Newfoundland data are included.
  2. Annual computation to 1953 entails considerable adjustments in production and external trade as described on page 19 of the Coal Mining Report for 1953.

## Table 22

1. As of January, 1954, 8 minor distributors were added to the survey after amalgamation under one distributing agency.
2. Beginning with 1952, excludes miscellaneous gas.
3. Includes gas used for house heating.
4. Barrels of 35 imperial gallons.

Sources: Monthly Reports: "Crude Petroleum, Natural Gas and Manufactured Gas"; "Trade of Canada", D.B.S. Annual Report: "Crude Petroleum and Natural Gas Industry", D.B.S.

## Table 23

1. Prior to 1940 data refer to products made for sale.
2. For some years prior to 1940 includes a small amount of aviation gasoline.
3. Prior to 1937, series represents production for sale of all fuel oils including stove oil. Beginning with 1937, stove oil is excluded. In 1937, the monthly average (including stove oil) comparable to previous years, was 1,165 thousand barrels.
4. Prior to 1940 series used represent apparent domestic consumption. Data were computed from production, imports, exports and stocks at refineries. Since 1940, data exclude a certain amount of imported fuels.
5. Prior to 1946, fuel oil data include stove oil; stove oil is excluded since 1946. Apparent sales of light fuel oils including stove oil in 1946 (comparable to previous years) is estimated at 1,045 thousand barrels.
6. Prior to 1946 series includes stove oil. In 1946, stocks of light fuel oils including stove oil are estimated at 3,198 thousand barrels.

## MINING

## Table 24

- Note, Newfoundland is included in production figures as of 1949.
1. Includes fine copper in ore, ingots, bars, billets, rods, strips, sheets and tubing.
  2. Includes ingots, bars and billets.
  3. Includes nickel in matte or speiss, oxide and fine.
  4. Includes lead in ore and in pigs.

## MANUFACTURING

Table 26

1. As at end of period.
2. Total inventories held including manufacturers' own investment and that portion not owned by reporting firms but financed by progress payments.
3. Inventories represent manufacturers' own investment only. Shipments represent all shipments from the plant, whether for sale or for transfer to other units of the same firm, and include all progress payments received during the period.
4. Includes primary iron and steel, iron castings, sheet metal products and wire and wire products.
5. Includes heavy electrical machinery, office, household and store machinery and industrial machinery.
6. Excludes heavy electrical machinery.
7. Prior to 1952, data represent "gross value of products". Annual data for 1952 and subsequent years represent shipments except for certain industries which are still represented by gross value of products. It is for this reason that the quarterly data are not quite comparable with the annual figures; the quarterly series represent shipments in all cases. The quarterly estimates are based on the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.
8. Estimated total unfilled orders on books at end of period, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value of over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953.

9. Total New Orders received during the period at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.
- Annual data for 1952 are averages of 11 months; January data were not available.

Note. Newfoundland is included as of 1949 in data for wood pulp and newsprint.

1. Monthly totals are not equivalent to annual data which include Newfoundland (since 1949) and Yukon and North-west Territories for which only annual statistics are collected.
2. Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.
3. Monthly totals are not equivalent to annual data due to differences in classification in the annual data and to the receipt of additional statistics which cannot be allocated by months.
4. Totals include unspecified pulp.
5. Mill shipments destined for export.

1. As of January, 1950, includes some silvery pig iron formerly included with ferro-alloys.
2. Excluding producers' interchange.
3. Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products.
4. Prior to 1946, imports include castings, forgings and rolling mill products. Since 1946 they include, in addition to all other shapes, wire and wire rope. Beginning January 1954 imports exclude castings, forgings, fittings and couplings. A substantial part of the imports appears after refinishing in total shipments. Production of primary iron and steel shapes from Canadian steel is equivalent to about 72 per cent of the total production of ingots.

## CONSTRUCTION

Table 36

- Construction of dwelling units.

Note. These data are the result of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. The remainder of the country is covered on a sample basis.

Beginning with January, 1952, the 100 per cent coverage by the Central Mortgage and Housing Corporation was extended to those urban centres which had reached populations of 5,000 or more according to the 1951 Census. In addition, the boundaries of the Metropolitan Areas have been altered to agree with the 1951 Census Metropolitan Areas.

Source: Monthly Report: "New Residential Construction", D.B.S.

Table 37

1. Generally, the municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December 1946. The data down to 1949 represent building permits within the actual limits of these cities. Data for subsequent years, and monthly data, cover approximately the metropolitan areas of the selected cities according to the 1951 decennial census definitions. For the year 1949 both sets of data are given to maintain comparability.
2. The coverage was extended to 507 municipalities in 1948 and as of 1955 stands at 821, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.
3. As of January 1950, Newfoundland is included.

1. Monthly figures are not equivalent to annual data due to receipt of additional or more comprehensive statistics which cannot be allocated by months.
2. Newfoundland included as of 1949 for clay products, as of 1950 for iron and steel products and as of 1952 for gypsum products.
3. Includes shingle-type siding.
4. Hollow blocks including fireproofing and load-bearing tiles.
5. See Note 1, Table 32.
6. Includes planks and boards, flooring and square timber.
7. Prior to 1944 data represent factory sales.
8. Monthly data for concrete brick and blocks and monthly and annual data for cement pipe and tile, cover production of firms which normally account for 75 to 80 per cent of total Canadian Production of cement products.
9. Prior to 1946, annual data represent hardwall plaster only, while later figures include other gypsum plasters. Average monthly production of hardwall plaster only in 1947, (comparable to previous years) was 10.0 thousand tons.
10. Monthly data represent sales of firms which normally account for 96 per cent of total for Canada.
11. Annual data prior to 1952 represent value of production.
12. Since 1948 includes concrete chimney blocks.
13. Annual figures for concrete brick and concrete blocks for 1952 1953 are factory shipments.
14. For building insulation only.
15. Annual data for 1952 and 1953 represent factory shipments.

3. Instalment receivables outstanding on the books of retail dealers, Newfoundland included from 1951.
4. Instalment paper held by sales finance and acceptance companies in connection with the financing of retail purchases of consumer goods, largely new and used automobiles.
5. Includes estimated personal loans by chartered banks, small loan companies, licensed money lenders and credit unions.
6. Estimates of charge accounts and instalment receivables outstanding on the books of retail dealers were revised from 1951 on the basis of data obtained from the 1951 Census, and the estimates prior to the first quarter of 1951 are not strictly comparable with data for later periods. At March 31, 1951, the figures on the old basis for charge accounts and instalment credit of retail dealers were 349 and 143 respectively.

## EXTERNAL TRADE

Table 50

Note. Commencing with April, 1949, the Trade of Canada includes that of Newfoundland.

1. Does not include re-exports.
2. These price and volume indexes are considered reasonably accurate for the periods 1926-40 and 1946-54. They are not given for the period 1941-45 since their validity is dubious. The composition of Canada's trade was sharply different from its peacetime pattern in these years, and since no reliable price indicators could be obtained for the bulk of the war materials recorded in the trade statistics, the price indexes could not be adapted to reflect this change in the composition of trade.
3. Includes pigs, ingots, blooms and billets, castings and forgings and rolling mill products.

Table 53

1. Official holdings of gold and U.S. dollars are given as of end of year or quarter.
2. The trade figures have been adjusted to conform to balance of payments definitions of the international exchange of commodities. Non-commercial items are deducted from trade statistics, as are items such as purchases by tourists which are entered elsewhere in the current account. An important adjustment during the war and again since 1950 arises from the abnormal movements of commodities on government account; payments data were substituted for the physical movement of commodities in order, among other things, to reflect more closely the proper timing and valuation of these transactions.
3. Balance also reflects all other current transactions with the exception of wartime grants and mutual aid which are included in current receipts but excluded from current payments as follows:

(million dollars)

1942	.....	1,002	1945	.....	858
1943	.....	518	1946	.....	97
1944	.....	960			

4. Net transfers for foreign direct investment in Canadian enterprises; from 1927 to 1939 also includes Canadian direct investment abroad.
5. Net sales (+) or purchases (-) by Canadians of Canadian and foreign securities (trading, new issues and retirements including official wartime repatriation).

## TRANSPORTATION

Table 54

Note. Monthly figures are not necessarily equivalent to annual data due to the receipt of additional statistics which cannot be allocated by months.

1. Prior to 1941 statistics are for shipping years ending March 31.
2. Since 1941, data include Great Lakes shipping between United States and Canadian inland ports.
3. Annual data are averages of 9 months.
4. Includes Canadian territorial operations of foreign carriers. As from 1947, civil aviation data have been revised to include C.P.A. and T.C.A. Overseas Services, and, in the case of revenue goods ton miles, to exclude goods ton miles of charter and contract services. These data which represent unit toll traffic are therefore not strictly comparable with data for earlier years.

Table 58

Note. The classification of chartered bank assets and liabilities was revised by the Bank Act of 1954. Figures for the end of July 1954 are on the new basis and, except for "Other Loans in Canada" (see footnote 5) adjustments have been made to put figures for earlier dates on a comparable basis. Statistics of Newfoundland branches are included as Canadian from April, 1949.

1. Total Cash Reserves include Bank of Canada deposits and Bank of Canada notes. Prior to July, 1954, all figures in this section are daily averages. From July 1954, Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.
2. From July 1954 the figures are not adjusted for items in transit and are not strictly comparable with the figures in this section for earlier periods.
3. Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent calculated as described in footnote 1.
4. Mainly deposits of foreign banks.
5. Including issues payable in foreign currency.
6. Includes securities guaranteed by provincial governments. Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans.
7. Excluding Canadian day-to-day loans.
8. Figures for June 1954 and later are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The transit adjustment at June 30, 1954, would have been + 37.
9. Includes deposits with other banks in foreign currencies, foreign bank notes, gold and coin outside Canada and foreign currency items in transit (net).
10. Includes day-to-day loans, insured residential mortgages, bank premises, shares of and loans to controlled corporations, gold and coin in Canada, Canadian dollar deposits with other banks, non-current loans and other assets.

Table 62A

Note. This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada, representing 90 per cent of new ordinary insurance sales.

The sales figures reported for 1954 are unrevised, and therefore not strictly comparable with the sales figures reported for earlier years.

Table 65

Note. Annual data for the years 1944 to 1952 are based on the Department of National Revenue publication "Taxation Statistics". Quarterly data from a selected sample of corporations are used to allocate the annual figures for 1950-1952 by quarters and to project these quarterly totals to 1953 and 1954. For years before 1944, estimates are based on a special study made by the Department of National Revenue.

The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges and charitable donations are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses.

1. Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.
2. Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic Mineral Products, Products of Petroleum and Coal and Miscellaneous Manufacturing Industries.
3. Includes Printing and Publishing and Allied Industries.
