Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this product and related statistics or services should be directed to: Client Services and Dissemination, Housing, Family and Social Statistics Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-5979) or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(780) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 12M0012GPE is published occasionally as a standard paper product for \$1,600.00 in Canada. Outside Canada the cost is US\$1,600.00.

Please order by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at (613) 951-7277 or 1 800 700-1033; by fax, at (613) 951-1584 or 1 800 889-9734; or by Internet, at order@statcan.ca. For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

1. INTRODUCTION

This document is designed to enable interested users to access and manipulate the microdata file for the twelfth cycle of the General Social Survey, conducted from February 1998 through January, 1999. It contains information on the objectives, methodology and estimation procedures as well as guidelines for releasing estimates based on the survey.

This document gives a description on how to correctly use the microdata files. Appendices D and F contain the data dictionaries for the Main File and the Time Use Episode File, respectively, which is the major part of this documentation package. The variance tables are in Appendix A and the survey questionnaire, in Appendix B.

This package is available in machine readable form.

2. OBJECTIVES OF THE GENERAL SOCIAL SURVEY

Increased pressure, over the last decade, to operate more efficient government funded programmes has led to a related increase in the information needed for policy formulation, programme development and evaluation. Many of these needs could not be filled through existing data sources or vehicles because of the range or periodicity of the information required.

The two primary objectives of the General Social Survey (GSS) aim at closing these gaps. These objectives are: to gather data on social trends in order to monitor temporal changes in the living conditions and well-being of Canadians; and to provide immediate information on specific social policy issues of current or emerging interest. The GSS is a continuing program with a single survey cycle each year. However, there was no GSS undertaken for the 1997 reference year due to budgetary priorities at that time.

To meet the stated objectives, the data collected by the GSS are made up of three components: Classification, Core and Focus.

Classification content consists of variables which provide the means of delineating population groups and for use in the analysis of Core and Focus data. Examples of classification variables are age, sex,

education, and income.

Core content is designed to obtain information which monitors social trends or measures changes in society related to living conditions or well-being. Cycle 12 was the third cycle to return to previous core content: time use. Most of the core content of Cycle 12 repeated Cycles 7 and 2, conducted in 1992 and 1986, respectively.

Focus content is aimed at the second survey objective of GSS. This component obtains information on specific policy issues which are of particular interest to certain federal departments or other user groups. In general, focus content, is not expected to be repeated on a periodic basis. The focus content for Cycle 12 was participation in sport and cultural activities sponsored by Heritage Canada. Information on media use was also collected for the Canadian Broadcasting Corporation.

3. TARGET POPULATION

The target population for the GSS was all persons 15 years of age and over residing in Canada, excluding:

1. Residents of the Yukon and Northwest Territories;
2. Full-time residents of institutions.

In the survey, all respondents were contacted by telephone. Households without telephones were therefore excluded; however, persons living in such households represent less than 2% of the target population. Survey estimates have been adjusted (i.e., weighted) to account for persons without telephones. The tacit assumption is that, given the small number of people without telephones, their characteristics are not different enough from those of the rest of the target population to have an impact on the estimates. Since no one without a telephone is in the sample, this assumption cannot be verified using GSS data. The characteristics of the population without telephones has been examined using data from the Survey of Consumer Finance and the Household Facilities and Equipment Survey. Telephone ownership is high among virtually all socio-economic groups, but is lowest among the 3% of the population with the lowest household income (less than \$10,000). The telephone ownership rate was 92.6% for this population, while it was over 96% for all other groups.

4. SURVEY AND SAMPLE DESIGN

Data for Cycle 12 of the GSS were collected monthly from February 1998 to January 1999 inclusive. The sample was evenly distributed over the 12 months to represent the seasonal variation in the information. The sample was selected using the Elimination of Non-Working Banks technique of Random Digit Dialing (RDD). Since people's activities also differ by the day of the week, a sample that was representative of each day of the week was required. Each telephone number was therefore assigned a "designated day". Cases were eligible for collection for 2 days following the designated day; with priority given to collecting diary information on the day following the designated day.

The response rate for Cycle 12 was 77.6%, yielding 10,749 respondents from whom usable diary information was obtained. A description of the RDD methods is provided in Section 4.2. Stratification used in the survey design is outlined in Section 4.1.

4.1 Stratification

In order to carry out sampling, each of the ten provinces was divided into strata or geographic areas. Generally, for each province, one stratum represented the Census Metropolitan Areas (CMAs) of the province and another represented the non-CMA areas. ✓

There were two exceptions to this general rule:

- Prince Edward Island has no CMAs and so did not have a CMA stratum
- Montreal and Toronto were each separate strata.

There were small changes from previous GSS cycles in the allocation of the sample to the various strata because it is based on the total populations of the strata, and these change slightly, relative to each other, every year.

4.2 Elimination of Non-working Banks RDD Design

The Elimination of Non-Working Banks (ENWB) sampling technique is a method of Random Digit

Dialing in which an attempt is made to identify all working banks¹ for an area (i.e., to identify all banks containing at least one number that belongs to a household). Thus, all telephone numbers within non-working banks are eliminated from the sampling frame.

For each province, lists of telephone numbers in use were purchased from the telephone companies and lists of working banks were extracted. Each bank was assigned to a stratum within its province.

A special situation existed in Ontario and Quebec because some small areas are serviced by independent telephone companies for whom we did not have lists. Area code-prefixes² from Ontario and Quebec and not on our list files were identified. All banks within these area code prefixes were generated and added to the sampling frame.

In each stratum, a simple random sample without replacement of telephone numbers was selected by choosing a simple random sample with replacement of banks from the frame, and then randomly generating the last two digits for each bank to obtain the telephone number. The entire monthly sample of telephone numbers was produced before the first day of interviewing for the month. Therefore, a prediction had to be made as to the percentage of numbers dialed that would reach a household (this percentage is known as the "hit rate"). Hit rates from Cycle 11 RDD sample and those observed during data collection were used to estimate the hit rates for the Cycle 12 RDD sample monthly samples.

For Cycle 12 of the GSS, 46.8% of the numbers dialed reached households. An attempt was made to conduct a GSS interview with one randomly selected person from each household.

5. COLLECTION

As in the other General Social Surveys taken since 1994, data for Cycle 12 were collected using Computer Assisted Telephone Interviewing (CATI) using Computer-Assisted Survey Execution System software (CASES). With CATI, the survey questions appeared on a computer monitor. The interviewer asked the respondent the questions, and entered the responses into the computer as the

¹ A bank of telephone numbers is a set of 100 numbers with the same first eight digits (i.e., the same Area Code-Prefix-Bank ID). Thus 613-951-9180 and 613-951-9192 are in the same bank, but 613-951-9280 is in a different bank.

² An area code-prefix is determined by the first six digits of a telephone number, for instance 613-951.

interview progressed. CATI methodology eliminated the need for paper and pencil questionnaires. All interviewing took place using centralized telephone facilities in four of Statistics Canada's regional offices with calls being made from 9:00 until 21:00, Monday to Friday inclusive, and from 12:00 until 16:00 on Saturday and Sunday. The four regional offices were: Halifax, Montreal, Winnipeg and Vancouver. Interviewers were trained by Statistics Canada staff in telephone interviewing techniques using CATI, survey concepts and procedures in a two day classroom training session. The majority of interviewers had computer and telephone interviewing experience.

Using CATI, responses to survey questions were entered directly into computers as the interview progressed. The CATI data capture program allowed a valid range of codes for each question and automatically followed the flow of the questionnaire. Certain edits were also executed by the CATI system. The data were then transmitted to Ottawa electronically.

In Cycle 12, the CATI system provided the interviewer with two main "components" which can be imagined to represent two paper questionnaires:

GSS 12-1 Selection Control Questionnaire

GSS 12-2 Time Use Questionnaire

These are included in the document "Cycle 12 Questionnaire Package." The questionnaire documents include the skip patterns that were built into CATI although these did not appear on the screen.

A GSS 12-1 selection control questionnaire was completed for each telephone number generated in the sample. When a private household was contacted, all household members were enumerated and basic demographic information (age, sex, marital status) was collected for everyone. A computer algorithm randomly selected an eligible household member age 15 or over to answer the Time Use questionnaire. This form was also used to determine the eligible collection days for the purpose of scheduling appointments to complete the questionnaire.

The Time Use questionnaire collected the following types of information: general questions related to time (Section A); the time use diary (Section B); a child care diary for respondent's with children less than 15 years of age living in the household (Section C); perceptions of time (Section D); information on unpaid help supplied by the respondent to household members and other individuals, as well as information on volunteering (Section E); paid work and education activities of the respondent (Section F); work and education activities of the respondent's partner or spouse, if applicable (Section G);

cultural and recreational activities of the respondent (Section H); sport participation (Section J); enjoyment of activities (Section K); background socio-economic questions for classification purposes (Section L).

It would be too lengthy to include all the survey manuals as part of this documentation package. However, more information can be obtained from Statistics Canada (see Section 10). Shown below is a list of the manuals used in the survey:

GSS Cycle 12 Time Use Interviewer's Manual

GSS Cycle 12 Time Use Coding Manual

6. PROCESSING

6.1 Data Capture

Using CATI, responses to survey questions were entered directly into computers as the interview progressed. The CATI data capture program allowed a valid range of codes for each question and built-in edits, and automatically followed the flow of the questionnaire. The information output by the CATI system was transmitted electronically to the Head Office in Ottawa.

6.2 Coding

The coding of the daily activities was done by the interviewer during the interview with the aid of CATI screens. These formed a decision tree leading to a narrow selection of possible codes. These screens are included in the questionnaire package.

Diary activities that the interviewer could not code ('precised') were coded manually at head office from write-in information. In addition, write-in information from residual activities ('specified') was provided on the diary to describe selected types of activities. These were reviewed at head office and where necessary, the code was changed. In some instances, large numbers of similar activities were observed in a residual activity code and new codes were created.

This activity coding methodology was very different from that used in previous time use surveys. In Cycle 7, for example, the senior interviewer coded diary entries on a paper questionnaire, using a

coding manual. During the collection of Cycle 12, selected diaries were concurrently captured by paper and pencil. A comparison of the coded results will be done to evaluate the impact of the new CATI coding method.

Where possible (e.g., occupation, industry, education, country of birth and religion), the coding followed the standard classification systems as used in the Census of Population. In addition, the write-in information describing responses in residual codes was reviewed: when appropriate, some were coded to existing categories. In some instances new codes were created. All interviewers' comments were reviewed and taken into account in head office editing.

6.3 Edit and Imputation

During the interview, the CATI system ensured that branchings were correct and that the values were valid. In cases where the interviewer was unable to correct errors detected by the system, he/she could provide a comment and leave the problem for Head Office to solve.

The Head Office edit system performed the same kind of checks as the CATI system, as well as verifications of greater complexity. The flow of the responses through the various paths in the questionnaire were verified.

The data items used for weighting, such as age, sex and number of telephone lines, needed to have values for all respondents. In the case of the age variable, the procedure used to select the respondent ensured that a response would be present. By contrast, values were imputed in the rare cases where the number of residential telephone lines was missing. The number of residential telephone lines was assumed to be one (1) when the respondent failed to provide the information.

Due to the nature of the survey, imputation was not appropriate for most items and thus 'not stated' codes were usually assigned for missing data. In some cases, the answer was not known but could be obtained deterministically from other information on the survey.

6.4 Creation of Combined and Derived Variables

A number of variables on the file have been derived from information collected on the questionnaires. In some cases, the derived variables are straightforward and involve collapsing of categories. In other cases, two or more variables have been combined to create a new variable. The data dictionary identifies which variables are derived and the nature of their derivation.

6.5 Amount of Detail on Microdata File

In order to guard against disclosure, the amount of detail included on this file is less than is available on the master file retained by Statistics Canada. Variables with extreme values have been capped and information for some variables have been aggregated into broader classes (e.g., occupation, religion, country of birth).

The measures taken to cap, group or collapse data have been indicated in the data dictionary. Variables with a very limited number of observations or referring to small population areas have been excluded from the file.

7. ESTIMATION

When a probability sample is used, as was the case for the GSS, the principle behind estimation is that each person selected in the sample 'represents' (in addition to himself/herself) several other persons not in the sample. For example, in a simple random sample of 2 % of the population, each person in the sample represents 50 persons in the population. The number of persons represented by a given person in the sample is usually known as the weight or weighting factor of the sampled person.

There are two microdata files from which GSS Cycle 12 estimates can be made. The **Main File** contains summary time use information from 10,749 respondents. It also contains the questionnaire responses obtained from these respondents. The **Time Use Episode File** contains information describing the details of the 221,105 time use episodes reported by these respondents. Questionnaire information was not collected for those respondents who refused to complete a full diary. For a description of the file layouts, contents and correct interpretation of data on the microdata file, users should refer to Appendices D, E, F, G, H and N.

When analyzing GSS Cycle 12 data, it is necessary to use one of the weighting factors WGHTFIN on

the Main File and WGHTEPI on the Time Use Episode File. WGHTFIN indicates the number of persons in the population that a record on the Main file represents, while WGHTEPI indicates the number of time use episodes that a record on the Episode file represents. For example, using the Main File, the estimate of the number of Canadians 15 years of age and older who feel 'trapped in a daily routine' (i.e. D2G = 1) is 8,859,095. This is the sum of WGHTFIN over all records on the Main File with D2G = 1. Using the Time Use Episode File, the estimate of the number of episodes of watching TV by Canadians 15 years of age and older in an average day is 33,559,271, the sum of WGHTEPI over all records on the Time Use Episode File with ACTCODE=911, 912, 913, or 914.

In the last GSS Time Use survey, Cycle 7, there were also two weights, one to be used for estimates not based on the episode data and one for estimates that used the episode data. In Cycle 7 the time use diaries were only collected for a subsample (due to non-response to the diary section of the questionnaire). To account for this subsampling of episodes, the episode weights were larger than the person weights (in the same way that the person weights differ from the household weights to account for the sampling of only one respondent per household (see Section 7.1- 4)). In this GSS cycle, there was no sub-sampling of time use episodes; GSS Cycle 12 collected data for all time use episodes during the reference day for all respondents. Since there was no sub-sampling, the weight for each episode is the same as the weight for the respondent by whom it was reported³.

The Time Use Episode File is structured differently from the Main File in that there are multiple time use episode records for each respondent. Each time use episode is a separately identified record, with each respondent having on average 21 episode records. This introduces additional complexity in applying the weights correctly. Users should refer to Appendix N for the correct methods of using this file.

7.1 Weighting

We view each cycle of the General Social Survey as being composed of a number of independent surveys - one per collection month. Wherever possible, therefore, we weight each monthly survey independently so that the data collected for each month contribute to the estimates in proportion to

³In the last GSS Time Use survey, Cycle 7, diaries were only collected for a sub-sample (due to non-response to the diary section of the questionnaire) and thus the weight for the Cycle 7 Time Use Episode File differs from that for the Cycle 7 Main File.

the Canadian population for that month. Where the sample size for a particular month is not large enough, the records for two or more months are grouped together at certain stages of the weighting process.

A self-weighting sample design is one for which the weights of each unit in the sample are the same. The GSS sample for Cycle 12 was selected using the Elimination of Non-Working Banks (ENWB) sampling technique, which has such a design, with each household within a stratum having an equal probability of selection.

This probability is equal to:

$$\frac{\text{Number of telephone numbers sampled within the stratum}}{\text{Total number of possible telephone numbers within the stratum}}$$

(The total number of possible telephone numbers for a stratum is equal to the number of working banks for a stratum times 100).

Where possible, each survey month was weighted independently. This was done in an attempt to ensure that each survey month contributes appropriately to estimates. If monthly sample sizes were not large enough, two or more survey months were combined in certain steps of the weighting.

1) Basic Weight Calculation

Each working (in service) telephone number (responding and non-responding) in the RDD sample was assigned a weight equal to the inverse of its probability of selection. This weight was calculated independently for each stratum-month group as follows:

$$\frac{\text{Number of possible telephone numbers in each stratum-month group}}{\text{Number of sampled telephone numbers in each stratum-month group}}$$

2) Non-Response Adjustment

Weights for responding telephone numbers were adjusted to represent non-responding telephone numbers. This was done independently within each stratum-month group. Records were adjusted by the following factor:

$$\text{Factor 1} = \frac{\text{Total of the basic weights of all telephone numbers in each stratum-month group}}{\text{Total of the basic weights of responding telephone numbers in each stratum-month group}}$$

Non-responding telephone numbers were then dropped.

3) Household Weight Calculation

The weight from Step 2 was used as an initial household weight. For households with more than one residential telephone number⁴ (i.e. not used for business purposes only), this weight was adjusted downwards to account for the fact that such households had a higher probability of being selected. The weight for each household was divided by the number of residential telephone numbers that serviced the household.

$$\text{Factor 2} = \frac{1}{\text{Number of non-business telephone numbers}}$$

This produces a household weight = Basic Weight * Factor 1 * Factor 2.

4) Person Weight Calculation

A person weight was then calculated for each person who responded to the survey, by multiplying

⁴Less than 6% of the households in the sample have more than one non-business telephone number.

the household weight for that person by the number of persons in the household who were eligible to be selected for the survey (i.e. the number of persons 15 years of age or older).

This produces a person weight = Basic Weight * Factor 1 * Factor 2 * Number of eligible household members.

5) Adjustment of Person Weight to External Totals

The person weights were adjusted several times using a raking ratio procedure. This procedure ensures that, based on the survey's total sample, estimates produced that should match certain external reference totals do indeed match them. Three sets of external references were used for this survey, all of them population totals: for stratum by month, for age-sex groups by province, and for day of the week by province by month.

It should be noted that persons living in households without telephone service are included in the external references though such persons were not sampled.

5a) Regional Office (RO) - Stratum - Month Adjustment

An adjustment was made to the person weights on records within each stratum per month in order to make population estimates consistent with projected population counts. This was done by multiplying the person weight for each record within the stratum by the following ratio:

$$\frac{\text{Projected population count for the RO-stratum-month}}{\text{Sum of the person weights for the RO-stratum-month}}$$

When sample sizes were small, adjacent months' data for the same stratum were combined before this adjustment was made.

5b) Province - Age - Sex Adjustment

The next weighting step was to ratio adjust the weights to agree with projected province-age group-sex distributions. Projected population counts were obtained for males and females within the following twelve age groups:

15-19,	20-24,	25-29,	30-34,
35-39,	40-44,	45-49,	50-54,
55-59,	60-64,	65-69,	70-74,
75-79,	80-84,	85-89,	90 +

For each of the resulting classifications the person weights for records within the classification were adjusted by multiplying by the following ratio:

$$\frac{\text{Projected population count}}{\text{for the province-age-sex group}}$$

$$\frac{\text{Sum of the person weights of records}}{\text{for the province-age-sex group}}$$

where,

$$\text{Projected population count} = \frac{\text{Jan 1999} \sum \text{Projected population count for province-age-sex group}}{\text{Feb 1998}}$$

12

When sample sizes were small, adjacent age group data for the same province and sex were combined before this adjustment was made.

5c) Province - Day of the week (Designated Day) - Month Adjustment

Time use information was collected from respondents for a selected day of the week so that each day would have an approximately equal number of respondents. An adjustment was made to the person weights on records within each province, selected day of the week, and month of collection

to ensure that population estimates would represent each day of the week. The adjustment was done by multiplying the person weight for each record within the province - day of the week - month combination by the following ratio:

$$\frac{\text{Projected population count for the province-day-month}}{\text{Sum of the person weights for the province-day-month}}$$

where,

$$\text{Projected population count} = \frac{\text{Projected population count for province-month}}{7}$$

5d) Raking Ratio Adjustments

The weights of each respondent were adjusted several times using a raking ratio procedure. This procedure ensured that estimates produced for RO-Stratum-Month, Province-Age Group-Sex and Province-Day of the week- Month totals would agree with the projections. This adjustment was made by repeating steps 5a), 5b) and 5c) of the weighting procedures until each repetition of the step made a minimal adjustment to the weights.

6) Final Person Weight

The weight produced at the end of 5) is the final person weight WGHTFIN placed on the Main File and on the Episode File.

7) Episode Weight

In GSS-7, diaries were collected from only 90% of the respondents who provided otherwise usefully complete data. Thus many time use variables and all the episode data were only available for a subsample of respondents, so a second weight (TIMEWGT) was needed to account for this subsampling, and this was the weight to use when using the Time Use Episode File. In GSS-12 there was no such subsampling, so the weight that should be used with episode data has the same value as the person weight; it does however have a different interpretation, weighting up to a total

over time use episodes rather than over persons, so it has been given a different name, WGHTEPI. It is only on the Time Use Episode File.

7.2 Weighting Policy

Users are cautioned against releasing unweighted tables or performing any analysis based on unweighted survey results. As was discussed in Section 7.1, there were several weight adjustments performed that depended on the province, stratum, age, sex, and reference day of the respondent. Sampling rates as well as non-response rates varied significantly from province to province and non-response rates varied with demographic characteristics. For example, it is known that non-respondents are more likely to be males and more likely to be younger. In the responding sample, 3.3% were males between the ages of 15 and 19, while in the overall population, approximately 4.3% were males between 15 and 19. Therefore, it is clear that unweighted sample counts cannot be considered to be representative of the survey target population.

Contact was made or attempted with 13,860 households during the survey. From these households, 10,749 usable responses were obtained, for a response rate of 77.6% (when it is assumed that all of the households for which there was no response were "in scope", i.e., had at least one eligible member). The distribution of types of non-response and response is shown in the table below:

Total sample of households	13,860	100%
1 Households not reached	613	4.4%
2 Household refusal	1,203	8.7%
3 Other household non-response	337	2.4%
4 Respondent refusal	514	3.7%
5 Other respondent non-response	444	3.2%
6 Responses	10,749	77.6%

Lines 1, 2, and 3 above represent non-response that occurred at the household level; in total there were 2,153 household non-responses, 15.5% of the sample. Line 1 indicates the number of households that could not be reached during the entire survey period ("ring-no-answer" households). Lines 4 and 5 represent non-response that occurred after the respondent for the household had been

selected. In total there were 958 of these person level non-responses, 6.9% of the sample. The 'other non-response' categories include cases where a response could not be obtained due to language difficulties or other problems.

7.3 Types of Estimates

Two types of 'simple' estimates are possible from the results of the General Social Survey. These are qualitative estimates (estimates of counts or proportions of people possessing certain characteristics) and quantitative estimates involving quantities or averages. More complex estimation and analyses are covered in Section 7.4.

7.3.1 Qualitative Estimates

It should be kept in mind that the target population for the GSS was non-institutionalized persons 15 years of age or over, living in the ten provinces. Qualitative estimates are estimates of the number or proportion of this target population possessing certain characteristics. The number of people (5,461,588) who describe their state of health as excellent (Question L22 = 1) is an example of this kind of estimate. These estimates are readily obtained by summing the final weights (WGHTFIN) of the records possessing the characteristic of interest. This estimate does not however adjust for non-response to the question in any way. If we make the assumption that those who either refused to answer the question or who responded 'don't know' have the same distribution as those who responded, then an adjusted estimate can be made. To do this, the proportion of the target population with this characteristic is estimated by ignoring the respondents with 'Not stated' or 'Don't know' answer to question L22 and calculating the ratio of the total of the weights of those respondents who answered that their state of health was 'excellent' (L22=1). This proportion is then multiplied by the size of the target population to produce the final estimate (it should be noted that this adjustment does not have to be done, but it can be if needed) :

$$5,995,025 = 24,260,137 \times \frac{5,461,588}{22,101,471}$$

When the proportion of responses that are 'don't know' or 'refused' is high the differences between the two estimates will be large.

Another example of a qualitative estimate is the number of women (4,165,026) who are very

satisfied with their self-esteem (D6E = '1'). Again this estimate does not adjust for non-response to the question in any way. The adjustment is done and a final estimate produced by following the same method used in the previous example. We end up with the final estimate being:

$$4,494,068 = 12,322,774 \quad X \quad \begin{array}{r} 4,129,719 \\ \hline 11,323,726 \end{array}$$

7.3.2 Quantitative Estimates

Average

Some variables on the General Social Survey microdata file are quantitative in nature (e.g. age, minutes spent working, number of weeks worked in the past 12 months). From these variables, it is possible to obtain such estimates as the average number of weeks worked in the last 12 months. These quantitative estimates are of the following ratio form:

$$\text{Estimate (average)} = \frac{X}{Y}$$

The numerator (X) is a quantitative estimate of the total of the variable of interest (for example, the number of weeks worked in the past 12 months) for a given sub-population (for example, males in Ontario who worked in the past 12 months). In this example, X would be calculated by multiplying the final weight (WGHTFIN) by the variable of interest (F8 or F13a) when they are known, $1 \leq F8 \leq 52$ or $1 \leq F13a \leq 52$, (i.e. not equal to '97' or '99'), and summing this product over all records for males in Ontario who worked i.e. SEX=1 and PRV=35 and $(1 \leq F8 \leq 52$ or $1 \leq F13a \leq 52)$, which yields 152,570,576.70.

The denominator (Y) is the qualitative estimate of the number of persons within that sub-population (males in Ontario who worked in the past 12 months). In this example, Y would be calculated by summing the final weight (WGHTFIN) over all male respondents in Ontario with $1 \leq F8 \leq 52$ or $1 \leq F13a \leq 52$, yielding 3,286,294.16.

The two estimates X and Y are derived independently and then divided to provide the quantitative estimate. The average number of weeks is then calculated to be:

$$\frac{152,570,576.70}{3,286,294.16} = 46.4$$

7.4 Guidelines for Analysis

As is detailed in Section 4 of this document, the respondents from the GSS do not form a simple random sample of the target population. Instead, the survey had a complex design, with stratification and multiple stages of selection, and unequal probabilities of selection of respondents. Using data from such complex surveys presents problems to analysts because the survey design and the selection probabilities affect the estimation and variance calculation procedures that should be used.

The GSS used a stratified design, with significant differences in sampling fractions between strata. Thus, some areas are over-represented in the sample (relative to their populations) while some other areas are relatively under-represented; this means that the unweighted sample is not representative of the target population, even if there were no non-response. Non-response rates may vary by demographic group, making the unweighted sample even less representative.

The survey weights must be used when producing estimates or performing analyses in order to account as much as possible for the geographic over- and under-representation and for the under- or over- representation of age-sex groups, months of the year, or days of the week in the unweighted file. While many analysis procedures found in statistical packages allow weights to be used, the meaning or definition of the weight in these procedures often differs from that which is appropriate in a sample survey framework, with the result that while in many cases the estimates produced by the packages are correct, the variances that are calculated are almost meaningless.

For many analysis techniques (for example linear regression, logistic regression, estimation of rates and proportions, and analysis of variance), a method exists which can make the variances calculated by the standard packages more meaningful. If the weights on the data, or on the subset of the data that is of interest, are rescaled so that the average weight is one (1), then the variances produced by the standard packages will be more reasonable; they still will not take into account the stratification and clustering of the sample's design, but they will take into account the unequal probabilities of selection. This rescaling can be accomplished by dividing each weight by the overall

average weight before the analysis is conducted.

For an analysis of all respondents who consider themselves as "workaholics", the following steps are required:

- Select all respondents from the file who considered themselves as a workaholic (D2B = 1);
- Calculate the Average Weight for these records;
- For each of these respondents calculate a "working" weight equal to WGHTFIN / Average Weight;
- Perform the analysis for these respondents using the "working" weight.

Section 8 describes sampling variability and data reliability in more detail and Appendix A gives a series of tables that can be used to estimate the sampling variability of many qualitative estimates of totals and proportions.

The calculation of variance estimates that are specific to a variable of interest requires detailed knowledge of the design of the survey; such detail cannot be given in this microdata file because of the risk of breaching confidentiality. Variances that take the sample design into account can be calculated for many statistics by Statistics Canada on a cost recovery basis.

7.5 Methods of Estimation and Interpretation of Estimates

A weight has been assigned to each sampled individual and each sampled time use episode and, as described in section 7.1, these weights have been adjusted to reflect the age and sex composition of the various provincial populations as projected by Statistics Canada, for each month covered by Cycle 12.

$$\sum_{i=1}^{10,749^5} \text{WGHTFIN} = 24,260,137$$

⁵There were 10,749 responding households (with one randomly chosen respondent per household).

= an estimate of the number of persons 15 years of age and older in the population.

221,105⁶

$\sum_{i=1} \text{WGHTPEI} = 497,943,804$

$i=1$

= an estimate for an average day⁷ of the number of time use episodes of all persons 15 years of age and older in the population.

In general, when an estimate is based on the unit of observation being the person, the Main File and WGHTEFIN should be used. Examples of this are the average number of weeks worked by persons aged 25-29, the average number of hours spent on housework by persons with children under 5, and the number of persons who watch television on an average day.

Similarly, when an estimate is based on the unit of observation being the time use episode, the Time Use Episode File and WGHTEPI should be used. Examples of this are the average length of an episode of travel for work in the morning, the average length of an episode of meal preparation for the evening meal, and the distribution by time of day of episodes of 'surfing the net'.

However, these generalizations do not apply to all estimates. Some characteristics of the respondent that are needed for person based estimates can only be determined from the Time Use Episode File. Since estimates derived from such characteristics are based on the person as the unit of observation (rather than the time use episode), the weight WGHTEFIN should be used rather than WGHTEPI, even though the Time Use Episode File is used.

For instance, while the number of Canadians 15 years of age and older who participate in an educational activity on an typical day can be estimated from the Main File (sum WGHTEFIN for all records with SCHLEDUC greater than 0, yielding 2,172,602), to estimate the number of Canadians 15 years of age and older who attended educational classes in the evening (after 6:00 PM) on an typical day can only be estimated using the Time Use Episode File. This is because, while the estimate is for a person level characteristic, the person level file, the Main File, does not have the necessary detail

⁶There were 221,105 time use episodes reported by the 10,749 respondents.

⁷The average over the seven days of the week.

about each episode in the respondent's day. In essence, you have to use the Time Use Episode File to derive a person level as opposed to episode level variable that you then use with WGHTFIN to produce the estimate of interest. In this case, you would derive a variable that indicated the existence, among all of the episodes for a respondent, of an educational class that took place after 6:00 PM, and then sum WGHTFIN over all of those persons where the variable indicated the existence of such an activity. Since WGHTFIN is not the correct weight to use with time use episode level data it would not normally be placed on the Time Use Episode File. To facilitate the derivation and use of person level variables from this file, WGHTFIN has been added to the file, but to help avoid its misuse, it has been given a value of blank or missing for all episodes except the last for each respondent.

To make the estimate described above, one would create a new variable that indicated the existence of an educational activity after 6:00 PM. This variable would be set to the value meaning 'No' when one encounters the first episode for a respondent, then each episode for that respondent would be examined in turn from the first to the last. If an episode has an activity code of 500, 510, 520, or 560 and an end time after 6:00 PM, then the new variable would be set to 'Yes'. If after examining the last episode for a respondent the new variable has a value of 'Yes' then WGHTFIN for that respondent would be added to the estimate. In this example the sum over the 10,749 last episodes on the Time Use Episode File of WGHTFIN, when the derived variable is 'Yes', is 199,343 persons.

Estimates of the total time spent on some activities or groups of activities can be made either from the Main File or from the Time Use Episode File. For instance, to estimate the total amount of time Canadians over the age of 15 spend travelling for school and education in a day, one could form the weighted sum of the variable DUR590 on the Main File, or the weighted sum of the variable DURATION for all episodes with an activity code of '590' on the Time Use Episode File.

$$\sum_{i=1}^{10,749} \text{WGHTFIN} * \text{DUR590} = 77,958,520 \text{ minutes}$$

$$\sum_{i=1}^{221,105} \text{WGHTPEI} * \text{DURATION} = 77,958,520 \text{ minutes}$$

(when ACTCODE=590)

In the first sum we are summing over all persons the total amount of time each spent travelling for school and education (a person based estimate), while in the second we are summing the episode duration over all episodes of travel for school or education (an episode based estimate).

An example of a total time spent estimate that could not be made from the Main File would be the total time spent on education in the evenings, which would be the weight sum over the Time Use Episode File of the duration after 6:00 PM of each episode with an ACTCODE between '500' and '590'.

221,105

$$\sum_{i=1} \text{WGHTEPI} * \text{DURATION after 6:00 PM} = 126,131,637 \text{ minutes}$$

(when 500 <= ACTCODE <= 590)

Examples & Interpretation:

- (i) In 1998, 50.4% of female (SEX = 2) Canadians 15 years of age and older (6.2 million) stated they felt more rushed than compared to five years ago (A3 = 1).
- (ii) 56% of Canadians 25 to 44 years of age ($2 \leq \text{AGEGR10} \leq 3$) tend to cut back on their sleep, when they need more time for other activities (D2C = 1).
- (iii) 70% of males (SEX = 1) aged 15 to 24 (AGEGR10 = 1) stated that during the past 12 months they regularly participated in sports (J1 = 1) while only 46% of females (SEX = 2) in the same age category took part regularly.

8. RELEASE GUIDELINES AND DATA RELIABILITY

It is important for users to become familiar with the contents of this section before publishing or otherwise releasing any estimates derived from the General Social Survey microdata files.

This section of the documentation provides guidelines to be followed by users. With the aid of these guidelines, users of the microdata files should be able to produce figures consistent with those produced by Statistics Canada and in conformance with the established guidelines for rounding and release. The guidelines can be broken into four broad sections: Minimum Sample Sizes for Estimates; Sampling Variability Policy; Sampling Variability Estimation; and Rounding Policy.

8.1 Minimum Sample Size For Estimates

Users should determine the number of records on the particular microdata file which contribute to the calculation of a given estimate. This number should be 15 or more. When the number of contributors to the weighted estimate is less than this, the weighted estimate should not be released regardless of the value of the Approximate Coefficient of Variation.

8.2 Sampling Variability Guidelines

The estimates derived from this survey are based on a sample of households. Somewhat different figures might have been obtained if a complete census had been taken using the same questionnaire, interviewers, supervisors, processing methods, etc. as those actually used. The difference between the estimates obtained from the sample and the results from a complete count taken under similar conditions is called the sampling error of the estimate.

Errors which are not related to sampling may occur at almost every phase of a survey operation. Interviewers may misunderstand instructions, respondents may make errors in answering questions, the answers may be incorrectly entered on the questionnaire and errors may be introduced in the processing and tabulation of the data. These are all examples of non-sampling errors.

Over a large number of observations, randomly occurring errors will have little effect on estimates derived from the survey. However, errors occurring systematically will contribute to biases in the

survey estimates. Considerable time and effort was made to reduce non-sampling errors in the survey. Quality assurance measures were implemented at each step of the data collection and processing cycle to monitor the quality of the data. These measures included the use of highly skilled interviewers, extensive training of interviewers with respect to the survey procedures and questionnaire, observation of interviewers to detect problems of questionnaire design or misunderstanding of instructions, procedures to ensure that data capture errors were minimized and coding and edit quality checks to verify the processing logic.

A major source of non-sampling errors in surveys is the effect of non-response on the survey results. The extent of non-response varies from partial non-response (failure to answer just one or a few questions) to total non-response. Total non-response occurred because the interviewer was either unable to contact the respondent, no member of the household was able to provide the information, or the respondent refused to participate in the survey. Total non-response was handled by adjusting the weight of households who responded to the survey to compensate for those who did not respond.

In most cases, partial non-response to the survey occurred when the respondent did not understand or misinterpreted a question, refused to answer a question, could not recall the requested information.

Since it is an unavoidable fact that estimates from a sample survey are subject to sampling error, sound statistical practice calls for researchers to provide users with some indication of the magnitude of this sampling error.

Although the exact sampling error of the estimate, as defined above, cannot be measured from sample results alone, it is possible to estimate a statistical measure of sampling error, the standard error, from the sample data. Using the standard error, confidence intervals for estimates (ignoring the effects of non-sampling error) may be obtained under the assumption that the estimates are normally distributed about the true population value. The chances are about 68 out of 100 that the difference between a sample estimate and the true population value would be less than one standard error, about 95 out of 100 that the difference would be less than two standard errors, and virtually with certainty that the differences would be less than three standard errors.

Because of the large variety of estimates that can be produced from a survey, the standard deviation is usually expressed relative to the estimate to which it pertains. The resulting measure, known as the coefficient of variation (c.v.) of an estimate is obtained by dividing the standard error of the estimate by the estimate itself and is expressed as a percentage of the estimate. Before releasing and/or publishing any estimates from the microdata file, users should consider whether or not to release the estimate based on the following guidelines.

Type of Estimate		Coefficient of Variation	Policy Statement
1.	Moderate Sampling Variability	0.0 to 16.5 %	Estimates can be considered for general unrestricted release. No special notation is required.
2.	High Sampling Variability	16.6 to 33.3 %	Estimates can be considered for general unrestricted release but should be accompanied by a warning cautioning users of the high sampling variability associated with the estimates.
3.	Very High Sampling Variability	33.4 % or over	Estimates should generally not be released, but when they are it should be with great caution and the very high sampling variability associated with the estimate should be prominently noted.

Note: The sampling variability policy should be applied to rounded estimates.

8.3 Estimates of Variance

Variance estimation is described separately for qualitative and quantitative estimates.

8.3.1 Sampling Variability for Qualitative Estimates

Derivation of sampling variabilities for each of the qualitative estimates which could be generated from the survey would be an extremely costly procedure, and for most users, an unnecessary one. Consequently, approximate measures of sampling variability, in the form of tables, have been developed for use and are included in APPENDIX A ("Approximate Variance Tables"). These

tables were produced using the coefficient of variation formula based on a simple random sample. Since estimates for Cycle 12 of the General Social Survey are based on a complex sample design, a factor called the Design Effect has been introduced into the variance formula.

The Design Effect for an estimate is the actual variance for the estimate (taking into account the design that was used) divided by the variance that would result if the estimate had been derived from a simple random sample. The Design Effect used to produce the Approximate Variance Tables has been determined by first calculating Design Effects for a wide range of characteristics and then choosing among these a conservative value which will not give a false impression of high precision. These Design Effects are specified in the table below.

Design Effects	
<u>Geographic Area</u>	
Canada	1.58
Newfoundland	1.29
Prince Edward Island	1.31
Nova Scotia	1.29
New Brunswick	1.29
Quebec	1.27
Ontario	1.28
Manitoba	1.29
Saskatchewan	1.29
Alberta	1.23
British Columbia	1.37
Atlantic Region	1.36
Prairie Region	1.33

Approximate variance tables for estimates using WGHTFIN are provided at the Canada and provincial levels as well as for the Atlantic and the Prairie Regions.

It should be noted that all coefficients of variation in these table are approximate and therefore unofficial. Variable specific estimates of variance calculated for particular variables may be purchased from Statistics Canada. The use of variable specific variance calculation instead of the table-based approximations may allow users to feel more certain of the quality of their estimates, especially those with coefficients of variation estimated from the tables in the "Highly Qualified" range (see the guidelines regarding the release of the survey estimates on preceding pages).

Statistics Canada is investigating the feasibility of releasing to GSS microdata file users a set of supplementary weights that would allow them to calculate a variable specific variance for any estimate produced from the microdata file. The variance calculation would be done using the bootstrap method. A large number of additional weights, known as bootstrap weights, would be provided for each respondent. When a variable specific variance estimate is required, the estimate for the variable in question would be first made with WGHTFIN, and then using each of the bootstrap weights in place of WGHTFIN to produce many bootstrap versions of the same estimate. The variance of the set of bootstrap estimates can be used to calculate an estimate of the sampling variability of the estimate of interest. Please contact Statistics Canada for more information on the availability of the bootstrap weights and on the bootstrap method for the calculation of variable specific variance estimates by microdata file users.

8.3.2 Sampling Variability For Quantitative Estimates

Approximate variances for quantitative variables cannot be as conveniently summarized. As a general rule, however, the coefficient of variation of a quantitative total will be larger than the coefficient of variation of the corresponding qualitative estimate (e.g., the number of persons contributing to the quantitative estimate). If the corresponding qualitative estimate is not releasable, then the quantitative total will in general not be releasable.

8.4 Rounding

In order that estimates produced from the General Social Survey microdata files correspond to those produced by Statistics Canada, users are urged to adhere to the following guidelines regarding the rounding of such estimates. It may be misleading to release unrounded estimates, as they imply greater precision than actually exists.

8.4.1 Rounding Guidelines

- 1) Estimates of totals in the main body of a statistical table should be rounded to the nearest thousand using the normal rounding technique (see definition in Section 8.4.2).
- 2) Marginal sub-totals and totals in statistical tables are to be derived from their corresponding unrounded components and then are to be rounded themselves to the nearest thousand units using normal rounding.
- 3) Averages, proportions, rates and percentages are to be computed from unrounded components and then are to be rounded themselves to one decimal using normal rounding.
- 4) Sums and differences of aggregates and ratios are to be derived from corresponding unrounded components and then rounded to the nearest thousand units or the nearest one decimal using normal rounding.
- 5) In instances where, due to technical or other limitations, a different rounding technique is used resulting in estimates different from Statistics Canada estimates, users are encouraged to note the reason for such differences in the released document.

8.4.2 Normal Rounding

In normal rounding, if the first or only digit to be dropped is 0 to 4, the last digit to be retained is not changed. If the first or only digit to be dropped is 5 to 9, the last digit to be retained is raised by one. For example, the number 8499 rounded to thousands would be 8 and the number 8500 rounded to thousands would be 9.

9. FILE STRUCTURE

In view of the nature of the time use data, the microdata file consists of the two subfiles described below.

The **Main File** consists of one record per respondent. It contains well over three hundred questionnaire-based variables. In addition it summarizes the total time spent on the diary day on each category of activity, the 10 major categories, the 24 subcategories¹, total time spent at each location, total time spent with various persons, and time spent helping persons outside the household.

This is the most widely used file for time use analysis. There are 10,749 records.

The **Time Use Episode File** consists of all episodes reported by respondents. Each respondent generated a variable number of records depending on the number of episodes reported. For each episode, there is information on the activity, start and end time, duration, location and an indication of who the respondent was with for that episode. New for Cycle 12, information on who an activity helped is included for selected types of activities. There are 221,105 records.

There is minimal duplication across the two files. However, the variable CASEID can be used for linking respondent characteristics and other main file variables with the detailed diary information on the Episode file. See Appendix N for guidelines for using Time Use data.

Special Notes

1. The diary response determined whether or not a respondent was included in the file. Therefore, the respondent may have stopped responding at any point from Section C of the questionnaire onwards. This methodological change may increase the rate of non-response to many questions and should be taken into account in any comparisons over time.
2. The sample and population counts for each variable in the data dictionaries are calculated from all respondents not only the ones specified in the coverage component of the description of the variable.

3. Not Stated Categories - Generally a code 9 for a one digit field, a code 99 for a 2 digit field, etc. indicate that the respondent did not answer a question and therefore the answer is not stated. As the following example indicates, two types of "Not Stated" categories may appear.

PLACE ²	Where were you?/Were you still....
01	Respondent's home
02	Respondent's work place
03	Someone else's home
04	Other place
05	Car (Driver)
06	Car (Passenger)
07	Walking
08	Bus and subway
09	Bicycle
10	Other form of transit
97	Missing or refused location (activity code is 001 or 002)
98	Unknown location
99	Not stated

Code 9, 99, etc. is the "true" not stated category for all variables on the file.

In certain questions, however, a second 'Not Stated' category appears. Although the respondent may not have marked a response, the information was actually partially available. Because of the branching pattern of a particular response, related information which followed allows imputations of the original question. Other responses within the question were truly not stated. These cases are thus identified separately.

10. ADDITIONAL INFORMATION

Additional information about this survey can be obtained from the individuals listed below. Data from the survey are available through published reports, special request tabulations, and this microdata file. The microdata file is available from the Housing, Family and Social Statistics Division of Statistics Canada at a cost of \$1,600.00. Tabulations can be obtained at a cost that will reflect the resources required to produce the tabulation.

Approximate Variance Tables

APPROXIMATE VARIANCE TABLES

By using the Approximate Variance Tables and the following rules, users should be able to determine approximate coefficients of variation for aggregates (totals), percentages, ratios, differences between totals, and differences between ratios.

Rules for Obtaining Approximate Variances

The following rules should enable the user to determine the approximate coefficients of variation from the Approximate Variance Tables for estimates of the number, proportion or percentage of the surveyed population possessing a certain characteristic and for ratios and differences between estimates.

As noted in Section 8.1, each estimate should be derived from at least 15 respondents in order to be released, regardless of the Approximate Coefficient of Variation.

Rule 1: Estimates of Numbers Possessing a Characteristic (Aggregates)

The coefficient of variation (cv) depends only on the size of the estimated aggregate itself. On the Approximate Variance Table, locate the estimated aggregate in the left-most column of the table (headed "Numerator of Percentage") and follow the asterisks across to the first figure encountered. This figure is the estimated coefficient of variation.

Example 1:

A user estimates that in Canada 393,344 females aged 15 years and over describe their state of health as poor compared to other people their age (question L22=5). How does the user determine the approximate coefficient of variation for this estimate?

Refer to the approximate variance table for Canada level estimates. The estimated aggregate does not appear in the left-most column (the 'Numerator of Percentage' column), so it is necessary to use the closest figure, namely 400,000. The coefficient of variation for an estimated aggregate is found by referring to the first non-asterisk entry for that row, in this case 9.3%. This cv falls within the range of cv's for 'Unqualified' estimates (i.e. 0.0% - 16.5%, pg. A-9) allowing the estimate to be released without restriction.

Rule 2: Estimates of Percentages or Proportions Possessing a Characteristic

The coefficient of variation of an estimated percentage or proportion depends on both the size of the percentage or proportion and the size of the total upon which the percentage is based. Estimated

percentages or proportions are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. (Note that in the tables the cv's decline in value reading from left to right).

When the percentage or proportion is based upon the total population of the geographic area covered by the table, the cv of the percentage or proportion is the same as the cv of the numerator of the percentage. In this case, Rule 1 can be used.

When the percentage or proportion is based upon a subset of the total population (e.g., those in a particular age-sex group), reference should be made to the percentage (across the top of the table) and to the numerator of the percentage or proportion (down the left side of the table). The intersection of the appropriate row and column gives the coefficient of variation.

Example 2:

A user estimates that in Canada 3.19% of females aged 15 years and over describe their state of health as poor compared to others their age (question L22=5). This is the expression of the estimate obtained in Example 1 as a percentage of all females aged 15 years and over in Canada. How does the user determine the approximate coefficient of variation for this estimate?

Refer to the approximate variance table for Canada level estimates. Because the estimate is a percentage which is based on a subset of the population covered by the table, it is necessary to use both the percentage (3.19%) and the numerator portion of the percentage (393,344) to determine the approximate coefficient of variation. Since the numerator does not appear in the left-most column (the 'Numerator of Percentage' column), it is necessary to use the figure closest to it, namely 400,000. Similarly, the percentage estimate does not appear among the column headings, so it is necessary to use the figure closest to it, namely 2.0%. The figure at the intersection of the row and column selected, namely 9.3%, is the coefficient of variation. This cv falls within the range of cv's for 'Unqualified' estimates (i.e. 0.0% - 16.5%, pg. A-9) allowing the estimate to be released without restriction.

Rule 3: Ratios

In the case where the numerator is a subset of the denominator, the ratio should be converted to a percentage and Rule 2 applied. This would apply, for example, to the case where the denominator is the number of males and the numerator is the number of males who read a newspaper during the past week.

In the case where the numerator is not a subset of the denominator, the coefficient of variation of the ratio of two estimates is approximately equal to the square root of the sum of squares of each

coefficient of variation considered separately. That is, the standard deviation of a ratio

$$R = X / Y \quad \text{is} \quad \text{sd}(R) = R * (\text{cv}(X)^2 + \text{cv}(Y)^2)^{1/2}$$

The coefficient of variation of R is approximately:

$$\begin{aligned} \text{cv}(R) &= \text{sd}(R) / R \\ &= (\text{cv}(X)^2 + \text{cv}(Y)^2)^{1/2} \end{aligned}$$

This formula will tend to overstate the error if X and Y are positively correlated and understate the error if X and Y are negatively correlated.

Example 3:

A user estimates that in Canada among females aged 15 years and over, 393,344 describe their state of health as poor compared to other people their age (question L22=5) and 2,498,337 describe their state of health as excellent as compared to others their age (question L22=1). The user is interested in the ratio of females describing their health as excellent versus those describing their health as poor. How does the user determine the approximate coefficient of variation for this ratio estimate?

The numerator of the ratio estimate is 2,498,337 (X). Using Rule 1 (refer to Example 1), the coefficient of variation for this estimate is determined to be 4.0% cv(X). The denominator of the ratio estimate is 393,344 (Y). Again using Rule 1, the coefficient of variation is determined to be 9.3% cv(Y). Using Rule 3, the coefficient of variation of the ratio estimate is

$$\begin{aligned} \text{cv} &= (0.040^2 + 0.093^2)^{1/2} \\ &= 0.1012 \end{aligned}$$

Therefore at the Canada level, the ratio of females who describe their health as excellent versus females who describe their health as poor is 2,498,337/393,344 or 6.4 to 1. The coefficient of variation of this estimate is 10.12%, and so the estimate can be released without restriction.

Rule 4: Differences Between Totals or Percentages

The standard deviation of a difference between two estimates is approximately equal to the square root of the sum of squares of each standard deviation considered separately. That is, the standard deviation of a difference:

$$\begin{aligned} d &= X - Y \\ \text{is} \\ \text{sd}(d) &= ((X * \text{cv}(X))^2 + (Y * \text{cv}(Y))^2)^{1/2} \end{aligned}$$

The coefficient of variation of d is approximately:

$$cv(d) = sd(d) / d$$

This formula is accurate for the difference between separate and uncorrelated characteristics but is only approximate otherwise.

Example 4:

A user estimates that in Canada, among those 15 years and over, 3.19% (X) of females describe their state of health as poor compared to others their age and 2.42% (Y - an estimated 289,082) of males describe their state of health as poor compared to other people their age. The user is interested in the difference between these two estimates. How does the user determine the approximate coefficient of variation for the estimate of the difference?

From Example 2, the coefficient of variation for the female estimate is 9.3%. The coefficient of variation for the male estimate is 10.8%.

The difference between the estimates ^{in % is} is 0.77%. Using Rule 4, standard deviation of the difference between the estimates is

$$\begin{aligned} sd &= ((0.0319 \times 0.093)^2 + (0.0242 \times 0.108)^2)^{1/2} \\ &= 0.0040 \end{aligned}$$

and the coefficient of variation is

$$\begin{aligned} cv &= \frac{0.0040}{0.0077} \\ &= 0.5195 \end{aligned}$$

Therefore the coefficient of the difference between the estimates is 51.95% and the estimate should not be released.

Rule 5: Difference of Ratios

In this case, Rules 3 and 4 are combined. The cv's of the two ratios are first determined using Rule 3, and the cv of their difference is found using Rule 4.

Confidence Limits

Although coefficients of variation are widely used, a more intuitively meaningful measure of sampling error is the confidence interval of an estimate. A confidence interval constitutes a statement on the level of confidence that the true value for the population lies within a specified range of values. For example a 95% confidence interval can be described as follows:

If sampling of the population is repeated indefinitely, each sample leading to a new confidence interval for an estimate, then in 95% of the samples the interval will cover the true population value.

Using the standard error of an estimate, confidence intervals for estimates may be obtained under the assumption that under repeated sampling of the population, the various estimates obtained for a population characteristic are normally distributed about the true population value. Under this assumption, the chances are about 68 out of 100 that the difference between a sample estimate and the true population value would be less than one standard error, about 95 out of 100 that the difference would be less than two standard errors, and about 99 out of 100 that the differences would be less than three standard errors. These different degrees of confidence are referred to as the confidence levels.

Confidence intervals for an estimate, \bar{X} , are generally expressed as two numbers, one below the estimate and one above the estimate, as $(\bar{X}-k, \bar{X}+k)$ where k is determined depending upon the level of confidence desired and the sampling error of the estimate.

Confidence intervals for an estimate can be calculated directly from the Sampling Variability Tables by first determining from the appropriate table the coefficient of variation of the estimate, and then using the following formula to convert to a confidence interval CI:

$$CI_{\bar{X}} = \{\bar{X} - (t)(\bar{X})(\alpha_{\bar{X}}), \bar{X} + (t)(\bar{X})(\alpha_{\bar{X}})\}$$

where $\alpha_{\bar{X}}$ is the determined coefficient of variation of \bar{X}

- $t = 1$ if a 68% confidence interval is desired;
- $t = 1.6$ if a 90% confidence interval is desired;
- $t = 2$ if a 95% confidence interval is desired;
- $t = 3$ if a 99% confidence interval is desired.

Example 5(a):

An estimated 682,426 persons described their state of health as poor as compared to other people their age (question L22=5). This estimate has an approximate coefficient of variation of 6.7% (obtained from the 750,000 row, left-most column, of the Canada approximate variance table). The 95% confidence interval for this estimate is thus:

$$\begin{aligned}
 CI &= \{682,426 - (2)(682,426)(0.067), 682,426 + (2)(682,426)(0.067)\} \\
 &= \{682,426 - 91,445, 682,426 + 91,445\} \\
 &= \{590,981, 773,871\}
 \end{aligned}$$

Example 5(b):

An estimated 3.19% of females aged 15 years and over in Canada described their state of health as poor when compared to other people their age or .0319 expressed as a proportion. From Example 2 this estimate has an approximate coefficient of variation of 9.3%. A 95% confidence interval for this estimate (expressed as a proportion) is

$$\begin{aligned}
 CI &= \{.0319 - (2 \times .0319 \times 0.093), .0319 + (2 \times .0319 \times 0.093)\} \\
 &= \{0.0260, 0.0378\}
 \end{aligned}$$

With 95% confidence it can be said that between 2.60% and 3.78% of females aged 15 years and over in Canada, describe their state of health as poor, compared to other people their age.

Note: Release guidelines which apply to the estimate also apply to the confidence interval. For example, if the estimate is not releasable, then the confidence interval is not releasable either.

T-test

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The sample estimates can be numbers, averages, percentages, ratios, etc. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the characteristics are different when, in fact, they are identical.

Let X_1 and X_2 be sample estimates for 2 characteristics of interest. Let the standard error of the difference $X_1 - X_2$ be σ_d

$$\text{If } t = \frac{X_1 - X_2}{\sigma_d}$$

is between -2 and 2, then no conclusion about the difference between the characteristics is justified at the 5% level of significance. If however, this ratio is smaller than -2 or larger than +2, the observed difference is significant at the 5% level.

Example 6:

A user wishes to test at the 5% level of significance the hypothesis that at the Canada level there

is no difference between percentage estimates of males and females who describe their state of health as poor, as compared to other people their age. From Example 4 the estimate of the standard deviation of the difference between the estimates is 0.0040.

$$\begin{aligned}\text{Hence } t &= \frac{0.0319 - 0.0242}{0.0040} \\ &= 1.93\end{aligned}$$

Since $t = 1.93$ is less than 2, there is no evidence to reject the hypothesis at the 5% significance level.

B - 5

(The next paragraph should be optional.)

My supervisor is working with me today and may listen to the interview to evaluate the survey. If you don't have any questions I'd like to continue.

- <0> continue
- <1> arrange call back appointment
- <3> household member already interviewed for this survey (20, 30)
- <4> refusal (21, 31)
- <5> non-interview due to illness (22, 32)
- <6> non-interview due to language problems (23, 33)
- <7> other non-int, : death, unknown, etc. (24, 34)
- <8> not available for interview during collection period (26, 36)
- <14> business, institution, or other non-residence
- <72> child's phone
- <98> respondent requests survey verification
- <f> reassign to French speaking interviewer

cf8 **I need to select one person from your household for an interview. What is the first name and age of each person living or staying there who has no usual place of residence elsewhere? Please start with the oldest.**
Name, age, sex of each person

cf14 **Is there anyone who USUALLY lives there that you may have left out, such as a child, someone temporarily away (attending school, visiting, in hospital, travelling), another relative, a roomer or boarder, or an employee?**

- <1> Yes, someone was missed Goto othr
- <3> No, everyone accounted for
- <x> Don't know Goto cf33
- <r> Refused Goto cf33

othr **Is there another person to be added?**

- <1> Yes Name, age, sex
- <3> No Goto cf14

cf33 **The person I am to interview is: Name (Age: ##)**

Is Name there?

- <1> Yes Goto GSS 12-2
- <3> No, set an appointment with key F9

Time Use

General Social Survey, Cycle 12 - GSS 12 - 2

Confidential when completed. Collected under the authority of the Statistics Act, Revised Statutes of Canada, 1985, Chapter S19. STC/HFS-027-75095

INTRODUCTION

Date/Time stamp

INTRO_1 INTERVIEWER:

Repeat the introduction below if selected respondent is different from household respondent.

Hello, I'm.....from Statistics Canada. We are calling you for a study on the way Canadians spend their time.

All information we collect in this voluntary survey will be kept strictly confidential. Your participation is essential if the survey results are to be accurate.

(The next paragraph should be optional.)

My supervisor is working with me today and may listen to the interview to evaluate the survey.

MARSTAT Is {household member x}'s marital status...

- <1> Living common-law?
- <2> Married?
- <3> Widowed?
- <4> Divorced?
- <5> Separated?
- <6> Single (never married)?

[CATI]: *If household roster members = 1, then [Go to INTRO_5Y], else do until all household roster members are completed, then [Go to INTRO_2]*

[CATI]: *If age of household member is less than 15 years of age, then MARSTAT = 6 (Single, never married)*

INTRO_2 What is {household member x }'s relationship to {household member y }?

- <2> Husband/wife/spouse
- <3> Common-law partner
- <4> Son or daughter *Go to INTRO_3*
- <10> Father or mother *Go to INTRO_4*
- <15> Brother or sister
- <20> Grandchild
- <21> Grandfather or grandmother
- <30> Son-in-law or daughter-in-law
- <31> Father-in-law or mother-in-law
- <32> Brother-in-law or sister-in-law
- <40> Nephew or niece
- <41> Uncle or aunt
- <42> Cousin
- <50> Other relative
- <60> Non-relative
- <70> Same sex partner

[CATI]: If value of y for {household member y } = total amount of household members and $x = (y - 1)$, then [Go to INTRO_5Y], else return and select next member of roster.

INTRO_3 Is {household member x } the birth or step-child of {household member y }?

- <5> Birth child
- <6> Adopted child
- <7> Step-child
- <8> Foster child

[CATI]: If value of y for {household member y } = total amount of household members and $x = (y - 1)$, then [Go to INTRO_5Y], else return and select next member of roster.

INTRO_4 Is {household member x } the birth or step-father/mother of {household member y }?

- <11> Birth parent
- <12> Adoptive parent
- <13> Step parent
- <14> Foster parent

[CATI]: If value of y for {household member y } = total amount of household members and $x = (y - 1)$, then [Go to INTRO_5Y], else return and select next member of roster.

INTRO_5Y What is your year of birth? (year)

<1890-1984>

INTRO_5M What is your month of birth? (*month*)

<01-12>

INTRO_5D What is your day of birth? (*day*)

<01-31>

[CATI]: Go to A0

Section A: General Questions

A0 Date/Time stamp

A1 I will start with a few general questions related to time.

A2 How often do you feel rushed? Would you say it is...

Include times when being pressed for time was a positive stimulant as well as times the respondent felt stress because of the number of activities he/she had to do in a day.

- <1> Every day?
- <2> A few times a week?
- <3> About once a week?
- <4> About once a month?
- <5> Less than once a month?
- <6> Never?
- <r> Refused

A3 Compared to five years ago, do you feel more rushed, about the same or less rushed?

- <1> More rushed
- <2> About the same
- <3> Less rushed
- <x> Don't know
- <r> Refused

A4 How often do you feel you have time on your hands that you don't know what to do with?
Would you say it is...*Exclude:*

- times when the respondent chooses to do nothing;
- times when the respondent had to think for a few minutes about what to do next.

Select "never" if the respondent can always think of something to do.

- <1> Every day?
- <2> A few times a week?
- <3> About once a week?
- <4> About once a month?
- <5> Less than once a month?
- <6> Never?
- <r> Refused

A5 Do you feel that weekdays are just too short to do all the things you want?

- <1> Yes
- <3> No Go to B0
- <x> Don't know Go to B0

<r> Refused Go to B0

A6 On which main activity would you choose to spend more time if you could? (Only one activity)

<1> Time with family (spouse, children, boy-friend - girl-friend)

<2> Relaxation - personal time

<3> Practising sports

<4> Crafts or hobbies

<5> Outdoor activities

<6> Reading - writing

<7> Studies

<8> Work

<9> Other Go to A6S

<x> Don't know

<r> Refused

A6S Specify <50 characters>

Section B: Time Use Diary

B0 Date/Time stamp

B1 We need accurate information on the way people use their time and the best way is to complete a diary listing of all of your activities over a 24-hour period. We start our diary at 4:00 in the morning because most of the people are asleep at that time.

Let me give you an example:

[CATI]: If RCHD = 1 and RSEX = 1 and RSPO = 1, then [Go to Example 2B]
 If RCHD = 1 and RSEX = 1 and RSPO = 1 and INTRO_2=70, then [Go to Example 2A]
 If RCHD = 1 and RSEX = 2 and RSPO = 1, then [Go to Example 2A]
 If RCHD = 1 and RSEX = 2 and RSPO = 1 and INTRO_2=70, then [Go to Example 2B]
 If RSPO = 1, then [Go to Example 1]
 Otherwise [Go to Example 3]

B2a EXAMPLE 1: (Respondent living with spouse with no children)
 Yesterday morning I was asleep until 6:00. From 6:00 to 6:15 I got dressed. Then from 6:15 until 6:25 I made breakfast. From 6:25 to 6:35 I ate breakfast with my spouse.

B2b EXAMPLE 2A: (Female respondent with spouse and children)
 Yesterday morning I was asleep until 7:15. From 7:15 to 7:30 I got dressed. Then from 7:30 to 7:45 I made breakfast. Then I ate breakfast with my spouse and children until 8:10.

B2c EXAMPLE 2B: (Male respondent with spouse and children)
 Yesterday morning I was asleep until 7:15. From 7:15 to 7:30 I got dressed. Then from 7:30 to 7:45 I made breakfast. Then I ate breakfast with my spouse and children until 8:10.

B2d EXAMPLE 3: (Person living alone or other situation)
 Yesterday morning I was asleep until 8:30. From 8:30 to 8:40 I had a shower and got dressed. Then from 8:40 until 8:55, I made breakfast.

B3 In this survey, you do not need to report activities of less than 5 minutes duration unless it involves travel or a change in who you are with.
 Let's begin.

Information to capture for each episode ##:

part a)

##

[CATI]: If first activity- On- print [designated day] at 4:00 a.m. what were you doing?

or If not first activity- And then, what did you do?

[CATI]: Use screen specified in Section S to capture the description of the activity

[CATI]: If first activity code = 450 then [Go to Exception 1], otherwise go to (##b)

Exception 1

##ax What time did you fall asleep [designated day-1] night?

This question is asked in order to measure the amount of sleep on a given night. This would otherwise be missed as the designated day begins only at 4:00 a.m.

<00:00-23:59>

##a1 Check 1: $00 \leq \text{first two numbers} \leq 23$ and
 $00 \leq \text{last two numbers} \leq 59$

<x> Don't know

<r> Refused

[CATI]: If first activity, impute ##b=0400 or

##b When did you start?

<00:00-23:59>

##b1 Check 1

<x> Don't know

<r> Refused

##c When did this end?

<00:00-23:59>

##c1 Check 1

##c2 Check 2: $\text{time in (##c)} \geq \text{time in (##b)}$

##c3 Checks 11: duration of sleep is more than 8 hours

##c4 Checks 12: duration of activity other than sleep is more than 5 hours

##c5 Checks 13: no children under 5 years old live in the household

##c6 Checks 14: no children under 15 years old live in the household

##c7 Checks 15: no adults live in the household

[CATI]: If ##c = 0400 and activity code = 450, then [Go to Exception 2], otherwise [Go to (##d)]
 If activity code = 001 or 002, then [Go to next episode, part a]

 Exception 2

##cx What time did you wake up?

This question is asked in order to measure the amount of sleep on a given night. This would otherwise be missed as the designated day ends only at 4:00 a.m.

<00:00-23:59>

##c8 Check 1

- <x> Don't know
- <r> Refused

##d Where were you? / Were you still... (Accept only one answer)**PLACE**

- <1> respondent's home
- <2> work place
- <3> someone else's home
- <4> other place (include park, neighbourhood)

OR IN TRANSIT:

- <5> car (driver)
- <6> car (passenger)
- <7> walk
- <8> bus & subway (includes street cars, commuter trains or other public transit)
- <9> bicycle
- <10> other (for example, airplane, train, motorcycle)

##d1 Check 3: the activity requires a transit code (5 to 10)**##d2 Checks 17: the activity requires a location code equal to 1 - respondent's home****##d3 Checks 18: the activity requires a location code not equal to 1 - respondent's home***[CATI]: If activity code = 400, 450, 460 or 480 then [Go to next episode, part a]***##e Who was with you? / Were you still... (Mark all that apply)****Living in the household**

- <1> alone
- <2> spouse/partner
- <3> child(ren) less than 15 years old *Go to ##eC*
- <4> parent(s) or parent(s) in-law
- <5> other member(s) (include children of 15 and older)

Living outside the household

- <6> child(ren) of the respondent less than 15 years old
- <7> child(ren) of the respondent 15 or older
- <8> parent (s) or parent(s) in-law
- <9> other family member (s)
- <10> friend(s)
- <11> other person(s)
- <x> Don't know
- <r> Refused
- <0> to continue
- make a correction *Go to ##eb*

- ##e1 *Check 4: alone cannot appear with another category*
 ##e2 *Check 5: <2> should be consistent with household members list*
 ##e3 *Check 16: respondent cannot be alone for these activities*
 ##e4 *Check 7: <3> should be consistent with the presence of children in the household*

[CATI]: Go to ##ex

##eb What do you want to erase?

Living in the household

- <1> alone
- <2> spouse/partner
- <3> child(ren) less than 15 years old *Go to ##eC*
- <4> parent(s) or parent(s) in-law
- <5> other member(s) (include children of 15 and older)

Living outside the household

- <6> child(ren) of the respondent less than 15 years old
- <7> child(ren) of the respondent 15 or older
- <8> parent (s) or parent(s) in-law
- <9> other family member (s)
- <10> friend(s)
- <11> other person(s)
- <x> Don't know
- <r> Refused
- <99> all
- <0> none or continue

CHILDREN

##eC Which ones?

[CATI]: Bring display 1 (children of the household)

- <95> All children of the respondent in the household
- make a correction *Go to ##eB*
- <0> to continue

##eB What do you want to erase?

- <95> All children of the respondent
- <99> all
- <0> none or continue

[CATI]: ##ex- If activity code = 660, [Go to ##h2]

If activity code = 671 to 678, [Go to ##g2]

[CATI]: *If activity code is one of the codes in italic in Appendix H, then [Go to next episode, part a]*

##f *Many of our daily activities help persons living outside our own household. The following question is asked to determine how much informal support people provide to one another.*

Did this activity help a person outside your household or an organization?

- <1> Person Go to ##g2
- <2> Organization Go to ##h2
- <3> No Go to next episode, part a
- <x> Don't know Go to next episode, part a
- <r> Refused Go to next episode, part a

##g2 **Was the person helped 65 years or older?** *(If more than one, principal person helped.)*

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

##g3 **Does the person you helped have a long-term health or physical limitation?**

(Any conditions lasting or expected to last more than 6 months and which can be either chronic or permanent.)

- <1> Yes
- <3> No
- <r> Refused

##h1 **What is this person's relationship to you?**

- <1> Parent(s) or parent(s) in-law
- <2> Children of respondent living outside the household
- <3> Other member(s) of the family outside the household
- <4> Friend(s)
- <5> Neighbour(s)
- <6> Co-worker(s)
- <7> Others
- <x> Don't know
- <r> Refused

[CATI]: Go to next episode, part a

##h2 **Was this organization mostly concerned with seniors, children, persons with disabilities or other?**

- <1> Seniors
- <2> Children
- <3> Persons with disabilities
- <4> Other
- <x> Don't know

<1> Refused

[CATI]: Go to next episode, part a

End of loop: [CATI]: Once the list of activities has been collected, do checks 8 and 9

Check 8 : Total duration of the diary is smaller or equal to 1435 minutes

Check 9 : Total duration of the diary is over or equal to 1445 minutes

B4 Date/Time Stamp

[CATI]: If status of diary is partial or complete, then [Go to section C]; otherwise [Go to L35]

Section C: Questions about the Designated Day

CO Date/Time stamp

C1a Of the activities you just reported, which one did you enjoy the most?

[CATI]: Display list of activities<0-60> (record the episode number from B3) *[Go to CATI- C2]***Check 20 :** the enjoyed period is not valid (no duration or refused or don't know activity)<00> None *[Go to CATI- C2]*

<95> All

C1Ba Is there one in particular that you enjoyed?

(Interviewer: Probe the respondent for the most enjoyable activity)

C1Bb <0-60> (record the episode number from Question B3)

<95> All

*[CATI- C2] If respondent has children less than 15 years old living in the household, then
[Go to C3], otherwise [Go to D0].*

C3 Looking after children is an activity that places many demands on our time, but which is often missed by the kind of diary we've just completed because we often do something else at the same time such as preparing meals or watching TV.

C4 When did your child/children wake up on *[Cati: print designated day]*? *(Children less than 15)*
(Interviewer: Record the time of the child who woke up first.)

<00:00-23:59>

C4e Check 1

<s> Child did not sleep in household

<x> Don't know

<r> Refused

C5 When did your child/children go to sleep on *print [designated day]*?*(Children less than 15)**(Interviewer: Record the time of the child who went to sleep last)*

<00:00-23:59>

C5e1 Check 1

C5e2 Check 24: $C4 \geq C5$

- <s> Child did not sleep in household
- <x> Don't know
- <r> Refused

C6s# [designated day], at what other times were you looking after your child/children? (Children less than 15)

[CATI]: Allow 10 episodes

Start time: <00:00-23:59>

C6Z# Check 1

C6Y# Check 22: $Start\ time \geq C4$

- <9999> No other period
- <s> Child did not sleep in household
- <x> Don't know
- <r> Refused

C6e# End time: <00:00-23:59>

- <x> Don't know
- <r> Refused

C6z# Check 1

C6x# Check 21: $Start\ time < End\ time$

C6y# Check 23: $End\ time \geq C5$

End of loop: [CATI]: Go to D0

Section D: Perceptions of Time**D0** Date/Time Stamp**D1** Now I would like to ask you some questions on your outlook towards your use of time.*[CATI]: The next 10 questions were asked in a random order.***D2a** Do you plan to slow down in the coming year?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2b Do you consider yourself a workaholic?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2c When you need more time, do you tend to cut back on your sleep?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2d At the end of the day, do you often feel that you have not accomplished what you had set out to do?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2e Do you worry that you don't spend enough time with your family or friends?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2f Do you feel that you're constantly under stress trying to accomplish more than you can handle?

- <1> Yes

- <3> No
- <x> Don't know
- <r> Refused

D2g Do you feel trapped in a daily routine?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2h Do you feel that you just don't have time for fun any more?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2i Do you often feel under stress when you don't have enough time?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D2j Would you like to spend more time alone?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

D3 During the past 2 weeks, would you say that you experienced a lot of stress, a moderate amount of stress, relatively little stress or almost no stress at all?

- <1> A lot
- <2> Moderate
- <3> Relatively little
- <4> Almost none
- <5> Don't know what stress is
- <x> Don't know
- <r> Refused

[CATI]: If D3 = 1 or 2, [Go to D4], else [Go to D5]

D4 What is your main source of stress?

- <1> Work
- <2> Financial concerns
- <3> Family
- <4> School work
- <5> Other *Go to D4S*
- <x> Don't know
- <r> Refused

D4S Specify <50 characters>

D5 Presently, would you describe yourself as...

- <1> Very happy?
- <2> Somewhat happy?
- <3> Somewhat unhappy?
- <4> Very unhappy?
- <5> No opinion
- <r> Refused

D6 I am going to ask you to rate certain areas of your life. Please rate your feelings about them as very satisfied, somewhat satisfied, somewhat dissatisfied or very dissatisfied.

D6a Your health

- <1> very satisfied
- <2> somewhat satisfied
- <3> somewhat dissatisfied
- <4> very dissatisfied
- <5> No opinion
- <r> Refused

D6b Your job or main activity

- <1> very satisfied
- <2> somewhat satisfied
- <3> somewhat dissatisfied
- <4> very dissatisfied
- <5> No opinion
- <r> Refused

D6c The way you spend your other time

- <1> very satisfied
- <2> somewhat satisfied
- <3> somewhat dissatisfied

- <4> very dissatisfied
- <5> No opinion
- <r> Refused

D6d Your finances

- <1> very satisfied
- <2> somewhat satisfied
- <3> somewhat dissatisfied
- <4> very dissatisfied
- <5> No opinion
- <r> Refused

D6e Your self-esteem

- <1> very satisfied
- <2> somewhat satisfied
- <3> somewhat dissatisfied
- <4> very dissatisfied
- <5> No opinion
- <r> Refused

D7 Using the same scale, how do you feel about your life as a whole right now?

- <1> very satisfied
 - <2> somewhat satisfied
 - <3> somewhat dissatisfied
 - <4> very dissatisfied
 - <5> No opinion
 - <r> Refused
-

Section E: Unpaid Work

E0 Date/Time Stamp

E1 The next few questions refer to unpaid activities.

E2 Last week, how many hours did you spend looking after one or more of your own children or the children of others, without pay?

Include:

- time when the respondent was doing another activity while looking after the children;
- time when looking after the children was shared with someone else;
- time when the child was having a nap.

Exclude:

- time the child spent sleeping during the night;
- time the child spent at school, at a friend's or in organized activities.

Fractions should be reported as follows:

1/2 hour = .5

1/4 hour = .25

3/4 hour = .75

<0.00-168.00>

<x> Don't know

<r> Refused

E3 Last week, how many hours did you spend doing unpaid housework, yard work or home maintenance for members of your household, or others?

Fractions should be reported as follows:

1/2 hour = .5

1/4 hour = .25

3/4 hour = .75

<0.00-99.00>

<x> Don't know

<r> Refused

E4 Last week, how many hours did you spend providing unpaid care or assistance to one or more seniors?

Fractions should be reported as follows:

1/2 hour = .5

1/4 hour = .25

3/4 hour = .75

<0.00-99.00>

<x> Don't know

<r> Refused

Date/Time Stamp

E8 The next questions refer to your participation in a variety of unpaid volunteer activities helping various groups or organizations.

In the past 12 months, have you volunteered through a group or organization?

- ☐ Yes
☐ No *Go to F0*
☒ Don't know
☐ Refused *Go to F0*

E9 In the past 12 months, did you do any canvassing, campaigning, or fundraising as an unpaid volunteer?

- ☐ Yes
☐ No
☒ Don't know
☐ Refused

E11 In the past 12 months, did you provide information or help to educate, influence public opinion or lobby others on behalf of an organization?

- ☐ Yes
☐ No
☒ Don't know
☐ Refused

E12 In the past 12 months, did you help to organize or supervise activities or events for an organization?

- ☐ Yes
☐ No
☒ Don't know
☐ Refused

E13 In the past 12 months, did you do any volunteer consulting or administrative work or were you an unpaid member of a board or committee for an organization?

- ☐ Yes
☐ No
☒ Don't know
☐ Refused

E14 In the past 12 months, did you teach or coach for an organization as an unpaid volunteer?

- ☐ Yes
☒ No

- <x> Don't know
<r> Refused

E15 In the past 12 months, did you provide care or counselling to individuals or to groups as a volunteer through an organization?

- <1> Yes
<3> No
<x> Don't know
<r> Refused

E18 In the past 12 months, did you collect, serve, or deliver food or other goods or drive as a volunteer through an organization?

- <1> Yes
<3> No
<x> Don't know
<r> Refused

E19 In the past 12 months, did you help as a volunteer to maintain, repair or build facilities for an organization?

- <1> Yes
<3> No
<x> Don't know
<r> Refused

E21 In the past 12 months, did you help with first-aid, fire-fighting or search and rescue, as a volunteer for an organization?

- <1> Yes
<3> No
<x> Don't know
<r> Refused

E23 Finally, in the past 12 months, did you volunteer any time to a group or organization in a way you have not mentioned yet? Please include help given to schools, religious organizations, community associations, protection of the environment, etc.

- <1> Yes *Go to E23S*
<3> No
<x> Don't know
<r> Refused

E23S Specify <50 characters>

[CATI]: If any of E9 to E14 = 1, then VOLU= 1

E24 **Considering all of your volunteer activities, on average, how many hours per month did you volunteer?**

<1-90> hours

<x> Don't know

<r> Refused

Section F: Work and education

F0 Date/Time Stamp

F1 The next few questions refer to your work and education activities. Last week, was your main activity working at a paid job or business, looking for paid work, going to school, caring for children, household work, retired or something else? (Note: If sickness or short-term illness is reported, ask for usual major activity)

- | | | |
|------|------------------------------------------------------------------------------------|------------|
| <01> | Working at a paid job or business (<i>Include training paid by the employer</i>) | Go to F13a |
| <02> | Vacation (<i>from paid work</i>) | Go to F13a |
| <03> | Looking for paid work | Go to F3 |
| <04> | Going to school | |

F26b At your main job, given the choice, would you, at your current wage rate, prefer to work:

[CATI]: Read list. Mark one only

<1> Fewer hours for less pay?

<2> More hours for more pay?

<3> The same hours for the same pay?

<4> None of the above

<x> Don't know

<r> Refused

F27 Which of the following best describes your schedule? (For respondent's main job.)

"On call" means no prearranged schedule, but called as need arises (for example, a substitute teacher). "Irregular schedule" is usually prearranged one week or more in advance (for example, pilots)

<1> A regular daytime schedule or shift?

<2> A regular evening shift?

<3> A regular night shift?

<4> A rotating shift? (that changes from days to evenings)

<5> A split shift? (consisting of two distinct periods each day)

- <6> On call or casual?
- <7> An irregular schedule?
- <8> Other *Go to F27S*
- <x> Don't know
- <r> Refused

F27S Specify <50 characters>

F30 Do you have a flexible schedule that allows you to choose the time you begin and end your work day?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

F31 Some people do all or some of their paid work at home. Excluding overtime, do you usually work any of your scheduled hours at home?

Exclude respondents who occasionally perform some overtime work in their homes.

- <1> Yes
- <3> No *Go to CATI- F35e*
- <x> Don't know *Go to CATI- F35e*
- <r> Refused *Go to CATI- F35e*

F32 What is the main reason you do some of your work at home? *[Do not read list. Mark one only.]*

- <1> Care for children
- <2> Care for other family members
- <3> Other personal/family responsibilities
- <4> Requirements of the job, no choice
- <5> Home is usual place of work
- <6> Better conditions of work
- <7> Saves time, money
- <8> Other reason *Go to F32S*
- <r> Refused

F32S Specify <50 characters>

F33 How many paid hours per week do you usually work at home?

[CATI]- Round to the nearest whole hour

- <0-168>
 - <x> Don't know
 - <r> Refused
-

[CATI- F35e]: Date/Time Stamp

If F1 = 04, [Go to F36]

F35 During the past 12 months, did you take courses towards a degree, diploma or certificate?

- <1> Yes
 <3> No Go to F37a
 <r> Refused Go to F37a

F36 For how many weeks during the past 12 months, were you taking courses towards a degree, diploma or certificate?

- <1-52> weeks
 <x> Don't know
 <r> Refused

F37a Now, last month did you attend any courses or training sessions of any kind?

- <1> Yes
 <3> No Go to F39
 <r> Refused Go to F39

F37b Were any of these courses credit courses?

Include courses taken at the university, college or high school level.

<x>	Don't know	
<r>	Refused	Go to H11a

H10 Were any of these hours spent listening to a CBC radio station - that is, either CBC Radio One, the mostly news and information station, or CBC Radio Two, the classical music station?
Exclude CBC's French-language radio stations, Radio Canada AM or Radio Canada FM.

<1>	Yes	
<2>	No	Go to H11a
<x>	Don't know	Go to H11a
<r>	Refused	Go to H11a

H10a How many hours last week?
Fractions should be reported as follows:
 $\frac{1}{2}$ hour = .5
 $\frac{1}{4}$ hour = .25
 $\frac{3}{4}$ hour = .75

<0.25-99.00>	
<x>	Don't know
<r>	Refused

[CATI]: This number must not exceed the response given in Question H9.

H11a Last week, how many hours did you watch television, even if you were doing something else at the same time?

Fractions should be reported as follows:

$\frac{1}{2}$ hour = .5

$\frac{1}{4}$ hour = .25

$\frac{3}{4}$ hour = .75

<0> None at all Go to H12

<0.25-99.00>

<x> Don't know

<r> Refused Go to H12

H11b Were any of these hours spent watching a CBC television station- that is, either CBC TV or CBC Newsworld?

Include time spent watching stations that carry CBC programming such as The National, The Nature of Things, This Hour Has 22 Minutes, Wind at My Back, Air Farce, etc. Do not include CBC's french-language television stations, Radio Canada or RDI.

<1> Yes

<3> No Go to H12

<x> Don't know Go to H12

<r> Refused Go to H12

H11c How many hours last week?

Fractions should be reported as follows:

$\frac{1}{2}$ hour = .5

$\frac{1}{4}$ hour = .25

$\frac{3}{4}$ hour = .75

<0.25-99.00>

<x> Don't know

<r> Refused

[CATI]: This number must not exceed the response given in Question H11a.

H12 During the past 12 months, did you access the Internet for reasons other than for paid work or studies?

The Internet connects computers to the global network of networks for electronic mail services, file transfer, and information search and retrieval.

<1> Yes

<3> No Go to CATI- H12p

<x> Don't know Go to CATI- H12p

<r> Refused Go to CATI- H12p

H12a When you accessed the Internet, was it to communicate (via e-mail, chat groups, live conferences, video phone, etc.)?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

H12b When you accessed the Internet, was it to do research?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

H12c When you accessed the Internet, was it to read a newspaper, magazine or book?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

H12d When you accessed the Internet, was it to view a film, video or television program or to listen to live or recorded music?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

H12e When you accessed the Internet, was it to view works of art (e.g. paintings, sculptures, photographs) or to view museum or other similar collections?

The works of art may be part of an art gallery or art museum site, or may be the work of an individual artist or group of artists. "Photographs" here refers to those taken as artistic compositions, rather than strictly as family or personal snapshots.

Exclude collections of works of art. Include collections related to archaeological artifacts, natural history, First Nations Peoples, etc.

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

Section L: Other classification

L0 Date/Time Stamp

L1 Now, I'd like to ask you a few general questions.

L2 In what type of dwelling are you now living? Is it a... *[Interviewer: If respondent answers "condominium" or "seniors' housing", ask whether the building is a townhouse or high-rise or low-rise apartment.]*

- <1> Single detached house?
- <2> Semi-detached or double? *(side by side)*
- <3> Garden house, townhouse or row house?
- <4> Apartment or flat in a detached duplex? *(one above the other)*
- <5> Apartment in a building that has fewer than five stories?
- <6> Apartment in a building that has five or more stories?
- <7> Trailer home?
- <8> Another type of dwelling? *Go to L2S*
- <r> Refused

L2S Specify <28 characters>

<r> Refused

L3 How many rooms are there in this dwelling?

Include kitchen, bedrooms, finished rooms in attic or basement, etc. Do not count bathrooms, halls, vestibules and rooms used solely for business purposes.

- <01-30>
- <r> Refused

L4 Is this dwelling owned by a member of this household?

- <1> Yes
- <3> No
- <x> Don't know
- <r> Refused

L5 What is your postal code *(for your current residence)*?

Interviewer: We use postal codes to determine if the respondent lives in an urban or rural area. If the respondent lives in a rural area and received his/her mail at a post office in a nearby town, obtain the postal code of his/her residence if possible, otherwise enter the postal code of the mailing address.

We require at least the first two digits of the postal code to determine if the residence is in an urban or rural area.

<x> Don't know
<r> Refused

L6 Do you have more than one telephone in your home?
Exclude cellular telephones

Interviewer: Because the survey sample is based on random telephone numbers, households with more than one telephone number have a greater chance of being selected by the survey. We need to ask a few questions to adjust for this.

<1> Yes
<3> No Go to L13
<r> Refused Go to L13

L7 Do all the telephones have the same number?

<1> Yes Go to L13
<3> No
<r> Refused

L9 Households with more than one telephone number have a greater chance of being selected by the survey. We ask these questions to adjust for this.

How many different numbers are there?

<2-9>
<r> Refused

L10 Are any of these numbers for business, computer or fax use only?

<1> Yes
<3> No Go to L13
<r> Refused Go to L13

L11 How many are for business, computer or fax use only?

<1-9>
<r> Refused

[CAT!]: Numbers of phones in the household is smaller than the number of phones that are used for business use only.

L13 Now, a few general questions about your background.**In what country were you born?** *(Report your place of birth according to current boundaries)*

Topical Index to Variables - Main File

VARIABLE	VARIABLE DESCRIPTION	PAGE
GENERAL CHARACTERISTICS		
RECID	Record identification.	D- 3
WGHTFIN	Final Person Weight.	D- 3
SURVMNTH	Survey month of data collection.	D- 4
LANINT	Language of interview.	D- 4
AGEC	Age of respondent.	D- 5
AGEGR5	Age group of the respondent.	D- 5
AGEGR10	Age group of the respondent.	D- 6
SEX	Sex of respondent.	D- 6
MARSTAT	Marital status of the respondent.	D- 7
AGEPRGR5	Age group of respondent's spouse/partner.	D- 7
PRYPEC	Type of partner the respondent has within the household.	D- 8
CHRFLAG	Child(ren) of the respondent living in the household.	D- 8
AGECHRYC	Age of respondent's youngest single child living in the household.	D- 8
CHR0004C	Number of respondent's children 0 to 4 years of age living in the household.	D- 9
CHR0512C	Number of respondent's children 5 to 12 years of age living in the household.	D- 9
CHR1314C	Number of respondent's children 13 to 14 years of age living in the household.	D- 9
CHR1518C	Number of respondent's children 15 to 18 years of age living in the household.	D- 10
CHR1924C	Number of respondent's children 19 to 24 years of age living in the household.	D- 10
CHR25UPC	Number of respondent's children 25 years of age and older living in the household.	D- 10
CHH0004C	Number of children aged from 0 to 4 living in the respondent's household.	D- 11
CHH0512C	Number of children aged from 5 to 12 living in the respondent's household.	D- 11
CHH1314C	Number of children aged from 13 to 14 living in the respondent's household.	D- 12
CHRTIME6	Number of respondents children living at home.	D- 12
PARHSD	Type of parents the respondent has within the household.	D- 13
LIVARR12	Living arrangement of respondent's household.	D- 13
LIVARR08	Living arrangement of respondent's household.	D- 14
HSDSIZEC	Household size of respondent.	D- 14
FAMTYPE	Respondent's type of family structure.	D- 15
MULTIGEN	Three-generation family in respondent's household.	D- 15
PRV	Province of residence of the respondent.	D- 16
REGION	Region of residence of the respondent.	D- 16
CMAPRV	Census Metropolitan Area (CMA) of the respondent's residence	D- 17
SECTION A: GENERAL QUESTIONS		
A2	How often do you feel rushed? Would you say it is....	D- 17
A3	Compared to five years ago, do you feel more rushed, about the same, or less rushed?	D- 18
A4	How often do you feel you have time on your hands that you don't know what to do with? Would you say it is....	D- 18
A5	Do you feel that weekdays are just too short to do all the things you want?	D- 19
A6	On which main activity would you choose to spend more time if you could?	D- 19
SECTION B: TIME USE DIARY		
DDAY	Designated day of interview.	D- 20
DIARYDAY	Date of interview.	D- 20
DIARYREC	Recall of diary interview.	D- 21
DVTDAY	Type of day of interview.	D- 21
DUR001	Total duration (in minutes) for information missing.	D- 22

VARIABLE	VARIABLE DESCRIPTION	PAGE

SLEEP1D	Sleep duration the first night.	D- 175
SLEEP2E	Wakeup time the second night.	D- 175
SLEEP2D	Sleep duration the second night.	D- 176
ENJOYAC	The most enjoyable activity specified on the designated day.	D- 176

VARIABLE	VARIABLE DESCRIPTION	PAGE
ENJOYDU	Duration of the most enjoyable activity specified.	D- 177
ENJOYLC	Location of the most enjoyable activity specified.	D- 177
ENJOYS01	Most enjoyable activity was done alone.	D- 178
ENJOYS02	Most enjoyable activity was done with spouse/partner.	D- 178
ENJOYS03	Most enjoyable activity was done with household children under 15 years of age.	D- 179
ENJOYS04	Most enjoyable activity was done with parent(s) or parent(s)-in-law who are living in the household.	D- 179
ENJOYS05	Most enjoyable activity was done with other members (including children 15 and older) who are living in the household.	D- 180
ENJOYS06	Most enjoyable activity was done with children of the respondent under 15 years of age who are living outside the household.	D- 180
ENJOYS07	Most enjoyable activity was done with children of the respondent 15 years of age and older who are living outside the household.	D- 181
ENJOYS08	Most enjoyable activity was done with parent(s) or parent(s)-in-law who are living outside the household.	D- 181
ENJOYS09	Most enjoyable activity was done with other family members living outside the household.	D- 182
ENJOYS10	Most enjoyable activity was done with friends.	D- 182
ENJOYS11	Most enjoyable activity was done with other person(s).	D- 183

SECTION C: QUESTIONS ABOUT THE DESIGNATED DAY

C4	When did your child/children wake up on (designated day)?	D- 183
C5	When did your child/children go to sleep on (designated day)?	D- 184
C4C5	Time (in minutes) between first child awake and last child asleep.	D- 184
C6EPI01	Start time of 1st child care episode.	D- 185
C6EPIE01	End time of 1st child care episode.	D- 185
C6EPI02	Start time of 2nd child care episode.	D- 186
C6EPIE02	End time of 2nd child care episode.	D- 186
C6EPI03	Start time of 3rd child care episode.	D- 187
C6EPIE03	End time of 3rd child care episode.	D- 187
C6EPI04	Start time of 4th child care episode.	D- 188
C6EPIE04	End time of 4th child care episode.	D- 188
C6EPI05	Start time of 5th child care episode.	D- 189
C6EPIE05	End time of 5th child care episode.	D- 189
C6EPI06	Start time of 6th child care episode.	D- 190
C6EPIE06	End time of 6th child care episode.	D- 190
C6EPI07	Start time of 7th child care episode.	D- 191
C6EPIE07	End time of 7th child care episode.	D- 191
C6EPI08	Start time of 8th child care episode.	D- 192
C6EPIE08	End time of 8th child care episode.	D- 192
C6EPI09	Start time of 9th child care episode.	D- 193
C6EPIE09	End time of 9th child care episode.	D- 193
C6EPI10	Start time of 10th child care episode.	D- 194
C6EPIE10	End time of 10th child care episode.	D- 194
C6DUR	Total time (in minutes) spent looking after all children less than 15 years of age.	D- 195

SECTION D: PERCEPTIONS OF TIME

D2A	Do you plan to slow down in the coming year?	D- 195
D2B	Do you consider yourself a workaholic?	D- 196
D2C	When you need more time, do you tend to cut back on your sleep?	D- 196

VARIABLE	VARIABLE DESCRIPTION	PAGE
D2D	At the end of the day, do you often feel that you have not accomplished what you had set out to do?	D- 196
D2E	Do you worry that you don't spend enough time with your family or friends?	D- 197
D2F	Do you feel that you're constantly under stress trying to accomplish more than you can handle?	D- 197
D2G	Do you feel trapped in a daily routine?	D- 197
D2H	Do you feel that you just don't have time for fun any more?	D- 198
D2I	Do you often feel under stress when you don't have enough time?	D- 198
D2J	Would you like to spend more time alone?	D- 198
TIMECR	Time crunch variable.	D- 199
TIMENS	Number of NOT STATED codes for Questions D2A to D2J	D- 199
D3	During the past 2 weeks, would you say that you experienced a lot of stress, a moderate amount of stress, relatively little stress, or almost no stress at all?	D- 200
D4	What is your main source of stress?	D- 200
D5	Presently, would you describe yourself as...	D- 201
D6A	Please rate your feelings about your health.	D- 201
D6B	Please rate your feelings about your job or main activity.	D- 202
D6C	Please rate your feelings about the way you spend your other time.	D- 202
D6D	Please rate your feelings about your finances.	D- 203
D6E	Please rate your feelings about your self-esteem.	D- 203
D7	Using the same scale, how do you feel about your life as a whole right now?	D- 204
UNWKCHHD	Unpaid work-number of hours the respondent spent looking after one or more of his children, or the children of others in the last week?	D- 204
UNWKHSDD	Unpaid work-number of hours the respondent spent doing unpaid housework, yard work or home maintenance for members of his household, or others in the last week?	D- 205
UNWKSEND	Unpaid work-number of hours the respondent spent providing care or assistance to one or more seniors in the last week?	D- 205
SECTION E: UNPAID WORK		
E8	In the past 12 months, have you volunteered through a group or organization?	D- 206
E9	In the past 12 months, did you do any canvassing, campaigning, or fundraising as an unpaid volunteer?	D- 206
E11	In the past 12 months, did you provide information or help to educate, influence public opinion or lobby others on behalf of an organization?	D- 207
E12	In the past 12 months, did you help to organize or supervise activities or events for an organization?	D- 207
E13	In the past 12 months, did you do any volunteer consulting or administrative work or were you an unpaid member of a board or committee for an organization?	D- 208
E14	In the past 12 months, did you teach or coach for an organization as an unpaid volunteer?	D- 208
E15	In the past 12 months, did you provide care or counselling to individuals or to groups as a volunteer through an organization?	D- 209
E18	In the past 12 months, did you collect, serve, or deliver food or other goods or drive as a volunteer through an organization?	D- 209
E19	In the past 12 months, did you help as a volunteer to maintain, repair or build facilities for an organization?	D- 210
E21	In the past 12 months, did you help with first-aid, fire-fighting or search and rescue, as a volunteer for an organization?	D- 210
E23	In the past 12 months, did you volunteer any time to a group or organization in a way you have not mentioned yet?	D- 211
E24	Considering all of your volunteer activities, on average, how many hours per month did you volunteer?	D- 211

VARIABLE	VARIABLE DESCRIPTION	PAGE
SECTION F: WORK AND EDUCATION		
ACT7DAYS	Main activity of the respondent in the last 7 days.	D- 212
F2	Were you studying full-time or part-time?	D- 212
F3	Did you have a job or were you self-employed at any time last week?	D- 213
WKLTWE	Respondent did any work at a job or business last week?	D- 213
F4	Did you have a job or were you self-employed at any time during the past 12 months?	D- 214
F5	In the last four weeks, did you look for a job?	D- 214
F6	Have you ever worked at a job or business?	D- 215
AGELTWKC	Age of respondent when they last did paid work.	D- 215
WKWE	Weeks employed during the past 12 months.	D- 216
F13B	How many days of paid vacation did you take during the past 12 months?	D- 216
F14	Were you a paid worker or self-employed?	D- 217
F16	Did you have any paid employees?	D- 217
F17	About how many employees did you have?	D- 218
SIC80C13	Standard Industrial Classification (1980) of the respondent € 13 categories.	D- 218
SIC80C18	Standard Industrial Classification (1980) of the respondent € 18 categories.	D- 219
NAICS16	North American Industrial Classification System € 16 categories.	D- 220
SOC80C10	Standard Occupational Classification (1980) of the respondent € 10 categories.	D- 221
SOC91C08	Standard Occupational Classification (1991) of the respondent € 8 categories.	D- 221
SOC91C10	Standard Occupational Classification (1991) of the respondent € 10 categories.	D- 222
BLISH12	Blishen Socio-economic Index for Occupation of the respondent.	D- 223
PINEOC06	Pineo Socio-economic Classification of the respondent.	D- 223
F22	Are you a union member or covered by a union contract or collective agreement in this job?	D- 224
F23	Did you have more than one paid job last week?	D- 224
F24	How many hours a week do you usually work at your job?	D- 225
F25A	How many hours a week do you usually work at your main job?	D- 225
F25B	How many hours a week do you usually work at your other jobs?	D- 226
WKWEHR	Number of hours of paid work that the respondent performed in the last seven days.	D- 226
F26_C1	Reason for working less than 30 hours a week: Own illness or disability.	D- 227
F26_C2	Reason for working less than 30 hours a week: Child care responsibilities.	D- 227
F26_C3	Reason for working less than 30 hours a week: Elder care responsibilities.	D- 228
F26_C4	Reason for working less than 30 hours a week: Other personal or family responsibilities.	D- 228
F26_C5	Reason for working less than 30 hours a week: Going to school.	D- 229
F26_C6	Reason for working less than 30 hours a week: Could only find part-time work.	D- 229
F26_C7	Reason for working less than 30 hours a week: Did not want full-time work.	D- 230
F26_C8	Reason for working less than 30 hours a week: Full-time work under 30 hours per week.	D- 230
F26_C9	Reason for working less than 30 hours a week: Others.	D- 231
F26B	At your main job, given the choice, would you, at your current wage rate, prefer to work:	D- 231
F27	Which of the following best describes your schedule?	D- 232
F30	Do you have a flexible schedule that allows you to choose the time you begin and end your work day?	D- 232
F31	Some people do all or some of their paid work at home. Excluding overtime, do you usually work any of your scheduled hours at home?	D- 233
F32	What is the main reason you do some of your work at home?	D- 233
F33	How many paid hours per week do you usually work at home?	D- 234
LFSGSS	Labour Force Status of the respondent	D- 234
LFSHSD12	Labour Force Status of the household.	D- 235
F35	During the past 12 months, did you take courses towards a degree, diploma or certificate?	D- 235
F36	For how many weeks during the past 12 months, were you taking courses towards a degree,	D- 236

VARIABLE	VARIABLE DESCRIPTION	PAGE
	diploma or certificate?	
F37A	Now, last month did you attend any courses or training sessions of any kind?	D- 236
F37B	Were any of these courses credit courses?	D- 237
F37C	For how many hours last month did you take credit courses?	D- 237
F38	Were any of these courses non-credit courses?	D- 238
F38A	For how many hours last month did you take non-credit courses?	D- 238
F39	Many people improve their knowledge of a subject or upgrade their skills on their own instead of taking a course. They read books, watch television programs, use a computer or talk to someone with the necessary expertise. Have you undertaken any of these activities during the past month?	D- 239
F40_C01	What were you learning? ... Child care.	D- 239
F40_C02	What were you learning? ... Computer.	D- 239
F40_C03	What were you learning? ... Specified internet.	D- 240
F40_C04	What were you learning? ... Gardening.	D- 240
F40_C05	What were you learning? ... Farming, agriculture and animals (domestic).	D- 240
F40_C06	What were you learning? ... Business services.	D- 241
F40_C07	What were you learning? ... Financial services, investing.	D- 241
F40_C08	What were you learning? ...Health.	D- 241
F40_C09	What were you learning? ... Construction and trades.	D- 242
F40_C10	What were you learning? ... Carpentry and woodworking.	D- 242
F40_C11	What were you learning? ... Vehicle maintenance and operation.	D- 242
F40_C12	What were you learning? ... Environmental, nature.	D- 243
F40_C13	What were you learning? ... Natural sciences.	D- 243
F40_C14	What were you learning? ... Social sciences.	D- 243
F40_C15	What were you learning? ... History, current affairs and politics.	D- 244
F40_C16	What were you learning? ... Fine Arts not elsewhere specified.	D- 244
F40_C17	What were you learning? ... Music.	D- 244
F40_C18	What were you learning? ... Crafts and hobbies	D- 245
F40_C19	What were you learning? ... Languages and literacy skills.	D- 245
F40_C20	What were you learning? ... Education activities and teaching.	D- 245
F40_C21	What were you learning? ... Personal development.	D- 246
F40_C22	What were you learning? ... Spirituality and religion.	D- 246
F40_C23	What were you learning? ... Cooking and food or beverages.	D- 246
F40_C24	What were you learning? ... Sports.	D- 247
F40_C25	What were you learning? ... Work related.	D- 247
F40_C26	What were you learning? ... General knowledge.	D- 247
F40_C27	What were you learning? ... Other, not elsewhere specified.	D- 248
NUMSUBJ	Number of subjects the respondent was self-learning.	D- 248
F41_C1	Media used to improve the knowledge of a subject or upgrade the skills: Book.	D- 249
F41_C2	Media used to improve the knowledge of a subject or upgrade the skills: Human interaction.	D- 249
F41_C3	Media used to improve the knowledge of a subject or upgrade the skills: Computer.	D- 250
F41_C4	Media used to improve the knowledge of a subject or upgrade the skills: Internet.	D- 250
F41_C5	Media used to improve the knowledge of a subject or upgrade the skills: Video, cassette.	D- 251
F41_C6	Media used to improve the knowledge of a subject or upgrade the skills: T.V.	D- 251
F41_C7	Media used to improve the knowledge of a subject or upgrade the skills: Other.	D- 252
F42	How many hours in total did you devote to these learning activities last month?	D- 252
F44	Have you graduated from high school?	D- 253
F45	Have you had any further schooling beyond elementary/high school?	D- 253
EDU10	Highest Level of Education Obtained by the respondent € 10 groups.	D- 254
EDUSTAT	Full-time or part-time education status for the respondent.	D- 254
EDUYR	Number of years of elementary/secondary school education for the respondent.	D- 255
F47	In what year did you complete your studies?	D- 255

VARIABLE	VARIABLE DESCRIPTION	PAGE
F48	Are you satisfied or dissatisfied with the balance between your job and home life?	D- 256
F49_C1	Reason being dissatisfied with the balance between your job and home life - Not enough time for family (include spouse/partner and children).	D- 256
F49_C2	Reason being dissatisfied with the balance between your job and home life - Spends too much time on job/main activity.	D- 257
F49_C3	Reason being dissatisfied with the balance between your job and home life - Not enough time for other activities (exclude work or family related activities).	D- 257
F49_C4	Reason being dissatisfied with the balance between your job and home life - Cannot find suitable employment.	D- 258
F49_C5	Reason being dissatisfied with the balance between your job and home life - Employment related reason(s) (exclude spending too much time on job).	D- 258
F49_C6	Reason being dissatisfied with the balance between your job and home life - Health reasons (include sleep disorders).	D- 259
F49_C7	Reason being dissatisfied with the balance between your job and home life - Family related reason(s) (exclude not enough time for family).	D- 259
F49_C8	Reason being dissatisfied with the balance between your job and home life - Other reason(s).	D- 260

SECTION G: SPOUSE'S MAIN ACTIVITY

ACMPRWEC	Main activity of the respondent's spouse/partner in the last 7 days.	D- 260
G3	Was he/she studying full-time or part-time?	D- 261
WKWEPR	Did he/she have a job or was he/she self-employed at any time last week?	D- 261
WKWEHRPR	How many hours did he/she work last week?	D- 262
WKDYPR	Did he/she work on (designated day)?	D- 262
G7	Did he/she work regular hours or a split shift on designated day?	D- 263
G8ST	What hours did he/she work on designated day? (start time).	D- 263
G8EN	What hours did he/she work on designated day? (end time).	D- 264
G9ST	What hours did he/she work on designated day? (start time).	D- 264
G9EN	What hours did he/she work on designated day? (end time).	D- 265
WKDYHRPR	Number of hours of paid work by the respondent's spouse/partner on designated day.	D- 265
G10	Last week, did he/she spend any time doing housework including cooking, cleaning, grocery shopping and laundry for your household?	D- 266
G10A	For how many hours did he/she spend any time doing housework including cooking, cleaning, grocery shopping and laundry for your household?	D- 266
G11	Last week, did he/she do any unpaid work to maintain or improve your house, yard or automobile?	D- 267
G11A	For how many hours did he/she do any unpaid work to maintain or improve your house, yard or automobile?	D- 267
G12	Last week, how many hours did he/she spend looking after children who live in your household?	D- 268
EDUPR10	Respondent's spouse/partner's education level.	D- 268

SECTION H: CULTURE

H1	During the past 12 months, as a leisure activity (not for paid work or studies) did you read... a newspaper?	D- 269
H1A	How often?	D- 269
H2	During the past 12 months, as a leisure activity (not for paid work or studies) did you read... a magazine?	D- 270
H2A	How often?	D- 270
H3	During the past 12 months, as a leisure activity (not for paid work or studies) did you read... a book?	D- 271
H3A	On average, how many?	D- 271
H5	During the past 12 months did you use library services as a leisure activity (including accessing a	D- 272

VARIABLE	VARIABLE DESCRIPTION	PAGE
	library's World Wide Web internet site)?	
H5A	How often during the past 12 months did you use library services as a leisure activity (including accessing a library's World Wide Web internet site)?	D- 272
H5B_C1	For what purpose(s) you use library services as a leisure activity (including accessing a library's World Wide Web internet site) - Borrow library materials (including books, magazines, audio or video tapes or cassettes, etc).	D- 273
H5B_C2	For what purpose(s) you use library services as a leisure activity (including accessing a library's World Wide Web internet site) - Use Internet services in the library.	D- 273
H5B_C3	For what purpose(s) you use library services as a leisure activity (including accessing a library's World Wide Web internet site) - Do research.	D- 274
H5B_C4	For what purpose(s) you use library services as a leisure activity (including accessing a library's World Wide Web internet site) - Attend a program (e.g., a reading, children's program, etc.).	D- 274
H5B_C5	For what purpose(s) you use library services as a leisure activity (including accessing a library's World Wide Web internet site) - Other.	D- 275
H6	During the past 12 months did you ... go to a movie theatre or drive-in?	D- 275
H6A	How often did you go to a movie theatre or drive-in?	D- 276
H7	During the past 12 months did you ... watch a video, rented or purchased, on VCR?	D- 276
H7A	How often did you watch a video, rented or purchased, on VCR?	D- 277
H8	During the past 12 months did you ... listen to cassettes, CDs or records?	D- 277
H8A	How often did you listen to cassettes, CDs or records?	D- 278
H9	Last week, how many hours did you listen to the radio either at home, in a car, at work, or elsewhere?	D- 278
H10	Were any of these hours spent listening to a CBC radio station - that is, either CBC Radio One, the mostly news and information station, or CBC Radio Two, the classical music station?	D- 279
H10A	How many hours last week?	D- 279
H11A	Last week, how many hours did you watch television, even if you were doing something else at the same time?	D- 280
H11B	Were any of these hours spent watching a CBC television station - that is, either CBC TV or CBC Newsworld?	D- 280
H11C	How many hours last week did you spent watching a CBC television station - that is, either CBC TV or CBC Newsworld?	D- 281
H12	During the past 12 months, did you access the Internet for reasons other than for paid work or studies?	D- 281
H12A	When you accessed the internet, was it to communicate (via e-mail, chat groups, live conferences, videophone, etc.)?	D- 282
H12B	When you accessed the internet, was it to do research?	D- 282
H12C	When you accessed the internet, was it to read a newspaper, magazine or book?	D- 283
H12D	When you accessed the internet, was it to view a film, video or television program or to listen to live or recorded music?	D- 283
H12E	When you accessed the internet, was it to view works of art (e.g., paintings, sculptures, photographs) or to view museum or other similar collections?	D- 284
H12F	When you accessed the internet, was it to create artistic composition/design (e.g., a home page, other graphic images or artwork, etc.)?	D- 284
H12G	When you accessed the internet, was it for electronic banking, to purchase goods and services, etc?	D- 285
H12H	When you accessed the internet, was it to download software, other, etc?	D- 285
H13	During the past 12 months did you attend a concert or performance by professional artists of music, dance, theatre or opera, excluding cultural festivals?	D- 286
H14	Did you attend a theatrical performance such as a drama, musical theatre, dinner theatre, comedy?	D- 286
H14A	How often did you attend a theatrical performance such as a drama, musical theatre, dinner theatre, comedy?	D- 287
H18	Did you attend a popular musical performance such as pop/rock, jazz, blues, folk, country	D- 287

VARIABLE	VARIABLE DESCRIPTION	PAGE
	and western?	
H18A	How often did you attend a popular musical performance such as pop/rock, jazz, blues, folk, country and western?	D- 288
H19	Did you attend a symphonic or classical music performance?	D- 288
H19A	How often did you attend a symphonic or classical music performance?	D- 289
H20	Did you attend an opera?	D- 289
H20A	How often did you attend an opera?	D- 290
H21	Did you attend a choral music performance?	D- 290
H21A	How often did you attend a choral music performance?	D- 291
H22	Did you attend a dance performance (ballet, contemporary or other)?	D- 291
H22A	How often did you attend a dance performance (ballet, contemporary or other)?	D- 292
H23	Did you attend a performance for a children's audience (music, theatre or dance)?	D- 292
H23A	How often did you attend a performance for a children's audience (music, theatre or dance)?	D- 293
H24	During the past 12 months did you go to a cultural or artistic festival (such as film, fringe, dance, jazz, folk, rock, buskers or comedy)?	D- 293
H24A	How often did you go to a cultural or artistic festival (such as film, fringe, dance, jazz, folk, rock, buskers or comedy)?	D- 294
H25	During the past 12 months did you go to a performance of cultural/heritage music, theatre or dance (e.g., Aboriginal Peoples, Chinese, Ukrainian)?	D- 294
H25A	How often did you go to a performance of cultural/heritage music, theatre or dance (e.g., Aboriginal Peoples, Chinese, Ukrainian)?	D- 295
H26	During the past 12 months did you go to another popular stage performance such as a circus, stand-up comedy, ice show, etc.?	D- 295
H26A	How often did you go to another popular stage performance such as a circus, stand-up comedy, ice show, etc.?	D- 296
H27	During the past 12 months did you go to a museum (including science centre) or Art gallery?	D- 296
H28	Did you go to a public art gallery or art museum (including attendance at special art exhibits)?	D- 297
H28A	How often did you go to a public art gallery or art museum (including attendance at special art exhibits)?	D- 297
H29	Did you go to a commercial art gallery?	D- 298
H29A	How often did you go to a commercial art gallery?	D- 298
H30	Did you go to a science centre or science and technology museum, or a natural history or natural science museum?	D- 299
H30A	How often for all locations combined?	D- 299
H31	Did you go to a general, human history or community museum?	D- 300
H31A	How often for all locations combined?	D- 300
H32	During the past 12 months did you go to an historic site?	D- 301
H32A	How often did you go to an historic site?	D- 301
H33	During the past 12 months did you go to a zoo, aquarium, botanical garden, planetarium or observatory?	D- 302
H33A	How often for all locations combined?	D- 302
H34	During the past 12 months did you go to a conservation area or nature park?	D- 303
H34A	How often did you go to a conservation area or nature park?	D- 303
H35A	During the past 12 months as a leisure activity including taking courses for pleasure, did you do any visual art activities such as painting or sculpting?	D- 304
H35B	During the past 12 months as a leisure activity including taking courses for pleasure, did you do any crafts such as woodworking, weaving, pottery, jewellery, etc.?	D- 304
H35C	During the past 12 months as a leisure activity including taking courses for pleasure, did you play a musical instrument?	D- 305
H35D	During the past 12 months as a leisure activity including taking courses for pleasure, did you sing as part of a group, choir or solo?	D- 305

VARIABLE	VARIABLE DESCRIPTION	PAGE
H35E	During the past 12 months as a leisure activity including taking courses for pleasure, did you do any choreography or other dance-related activity?	D- 306
H35F	During the past 12 months as a leisure activity including taking courses for pleasure, did you do any acting or other theatrical activity?	D- 306
H35G	During the past 12 months as a leisure activity including taking courses for pleasure, did you write poetry, short stories, non-fiction, etc?	D- 307
H35H	During the past 12 months as a leisure activity including taking courses for pleasure, did you take any photographs in order to create an artistic composition, rather than strictly to record a person, place or event?	D- 307

SECTION J: SPORT

J1	Did you regularly participate in any sports during the past 12 months?	D- 308
J2J4SP02	Participation in badminton.	D- 308
J2ASP02	Frequency of participation in badminton.	D- 309
J2J4SP03	Participation in baseball.	D- 309
J2ASP03	Frequency of participation in baseball.	D- 310
J2J4SP04	Participation in basketball.	D- 310

		=====	=====
		10,749	24,260,137

Coverage: All respondents.

Source: General Social Survey household composition matrix.

Format: 11

Weight variable: WGHTFIN

Note: This variable was derived using the children listed on the household composition matrix only. In cases of multigeneration households where the respondent lived with a spouse or partner as well as a child and a grandchild, FAMTYPE was set to 1. In cases where the respondent had no children in the household and lived with only one parent, FAMTYPE was set to 5. An intact family refers to a now-married or common-law couple where all children (listed in the household composition matrix) have both biological parents in the household. A step family refers to a now-married or common-law couple in which at least one of the children (listed in the household composition matrix) is in a step relationship with one of the parents. The respondent might be a parent or a child aged 15 or older in the family.

Variable: **MULTIGEN** Position: 49 Length: 1

Three-generation family in respondent's household.

Activity Coding List and Instructions

CARE OF CHILDREN

- 200 CHILD CARE (INFANT TO 4 YEARS OLD - HOUSEHOLD CHILD)
- 211 PUTTING THE CHILDREN TO BED
- 212 GETTING THE CHILDREN READY FOR SCHOOL
- 213 PERSONAL CARE FOR CHILDREN OF THE HOUSEHOLD
- 220 HELPING/TEACHING/REPRIMANDING
- 230 READING/TALKING/CONVERSATION WITH CHILD
- 240 PLAY WITH CHILDREN
- 250 MEDICAL CARE - HOUSEHOLD CHILD
- 260 UNPAID BABYSITTING
- 271 PERSONAL CARE - HOUSEHOLD ADULTS
- 272 MEDICAL CARE - HOUSEHOLD ADULTS
- 281 OTHER CHILD CARE
- 282 OTHER CARE TO HOUSEHOLD ADULTS
- 291 *Travel: Household Child ONLY when WHERE = <5> DRIVER OF THE CAR*
- 292 *Travel: Household Adult ONLY when WHERE = <5> DRIVER OF THE CAR*

SHOPPING AND SERVICES

- 301 *Groceries*
- 302 *Clothing, Gas, etc.*
- 303 *Take-out Food*
- 304 *Video rental*
- 310 *Shopping for Durable*
- 320 PERSONAL CARE SERVICES (E.G HAIRCUT)
- 331 *Financial Services (e.g. banking)*
- 332 *Government Services (e.g. UIC)*
- 340 *Adult Medical and Dental Care*
- 350 *Other Professional Services*
- 361 *Automobile Maintenance and Repair*
- 362 *Other Repair Services (e.g. T.V., Appliance)*
- 380 *Other Shopping and Services*
- 390 *Travel: Goods/Services ONLY when WHERE = <5> DRIVER OF THE CAR*

PERSONAL CARE

- 400 WASHING, DRESSING
- 410 PERSONAL MEDICAL CARE (HOME)
- 411 PRIVATE PRAYER, MEDITATION AND OTHER INFORMAL SPIRITUAL ACTIVITIES
- 430 MEALS AT HOME/SNACKS/COFFEE
- 431 OTHER MEALS (NON-RESTAURANT/NON-SOCIALIZING)
- 440 RESTAURANT MEALS
- 450 NIGHT SLEEP/ESSENTIAL SLEEP
- 460 INCIDENTAL SLEEP, NAPS
- 470 RELAXING, THINKING, RESTING
- 480 OTHER PERSONAL CARE OR PRIVATE ACTIVITIES

*Note: The activities in **italic** are those who were asked questions on helping somebody or an organisation. See Questionnaire in Appendix B.*

EMPLOYED WORK

- 011 WORK FOR PAY AT MAIN JOB
- 012 WORK FOR PAY AT OTHER JOB(S)
- 021 OVERTIME WORK
- 022 LOOKING FOR WORK
- 023 UNPAID WORK IN A FAMILY BUSINESS OR FARM
- 030 TRAVEL DURING WORK
- 040 WAITING/DELAYS AT WORK
- 050 MEALS/SNACKS AT WORK
- 060 IDLE TIME BEFORE/AFTER WORK
- 070 COFFEE/OTHER BREAKS
- 080 OTHER WORK ACTIVITY
- 090 *Travel: To/From Work ONLY when WHERE = <5> DRIVER OF THE CAR*

DOMESTIC WORK

- 101 *Meal Preparation*
- 102 *Baking, Preserving Food, Home Brewing, etc.*
- 110 *Food (or Meal) Cleanup*
- 120 *Indoor Cleaning*
- 130 *Outdoor Cleaning*
- 140 *Laundry, Ironing, Folding, Drying*
- 151 *Mending/Shoe Care*
- 152 *Dressmaking and Sewing*
- 161 *Interior Maintenance and Repair*
- 162 *Exterior Maintenance and Repair*
- 163 *Vehicle Maintenance*
- 164 *Other Home Improvements*
- 171 *Gardening/Grounds Maintenance*
- 172 *Pet Care*
- 173 *Care of House Plants*
- 181 *Household Management, e.g. Organizing and Planning Activities, Paying Bills, etc.*
- 182 *Stacking and Cutting Firewood*
- 183 *Other Domestic Work (not specified above)*
- 184 *Unpacking groceries*
- 185 *Packing and unpacking luggage and/or car*

RESIDUAL CODES

- 001 MISSING GAP IN TIME
002 REFUSED INFORMATION

ACTIVITY CODING INSTRUCTIONS

In Cycle 12, the CATI system was used to capture the daily activities of the respondents. The interviewers were viewing screens to choose the proper category applying to the respondent's declared activity on screen-line. These screens are reproduced in Appendix B, Section Q (Questionnaire). Once the diary was completed, a key was available, who would permit them to review all the activities declared with the start and end time for each.

1. General information

(excerpt from Interviewer's Manual - GSS 12 - Chapter 4)

The following are general points concerning the collection of diary information:

- The designated day begins in the morning at 04:00 and continues until 04:00 the next day. This time is chosen because we want to start the diary before the respondent's day begins. Beginning at 04:00 ensures this in most cases.

Note: The designated day ends at 04:00. Enter 04:00 as the end time for the last activity of the respondent's day. For example, if the respondent went to bed at midnight, ask "When did this end". If the respondent says 6:45, enter 0400 as the end time for the day.

- It is important that the respondent describe what he/she actually did on the designated day, not what is usually done on that particular day of the week.
- Make sure the respondent understands for which day you are collecting information.
- Each diary has space to list 60 activities.
- If more than 60 activities are reported, a final activity screen will be provided to summarize the additional activities and their durations.

2. Activity detail

Follow these guidelines when listing activities:

- Record all activities that lasted more than 5 minutes. Try to discourage respondents from reporting very short activities which lasted only a few minutes.

Reminder: Always use the 24-hour clock when entering times.

- Details regarding the respondent's precise activities at work are not required. Only coffee breaks, lunch breaks or out of the ordinary activities such as medical appointments need to be recorded.
- If the respondent reports more than one activity happening at the same time, such as "talking with my son and watching T.V.", ask the respondent to determine the main activity.

- If the respondent reports more than one main activity for the same time period, and the activities took place in obvious chronological order, then make separate entries for each activity.
- If a few activities are broken up and intermingled and exact start times cannot be remembered but durations can be estimated, make only one entry for each and enter the total time for each one. For example, the respondent tells you that:
 - 1) She put a load of laundry in the washer (5 minutes)
 - 2) Made a cake and put it in oven (10 minutes)
 - 3) Did some vacuuming (18 minutes)
 - 4) Transferred the wash to the dryer (5 minutes)
 - 5) Took cake out of oven (a couple of minutes)
 - 6) Iced the cake (15 minutes)

(Total of 55 minutes)

These activities could be recorded as follows:

- laundry 0900 to 0910
 - baking 0910 to 0937
 - indoor cleaning 0937 to 0955
- (Total of 55 minutes)

- A new episode should be used each time the activity, the location or the social contact changes. For example, two episodes must be completed if the respondent reports that she took her child to the park from 10:00 to 11:00 and that her husband joined them there at 10:30. One episode should cover the period 10:00 to 10:30 and the next episode should cover the period 10:30 to 11:00.
- A screen will appear prompting you to probe if the respondent reports a length of time that does not seem reasonable for a given activity. For example: if the respondent reports gardening from 9:00 to 15:00, probe for lunch or rest breaks. Any interruption lasting more than 5 minutes should be recorded as a separate entry.
- The end time of one activity should be the start time of the next.
- Activities should be reported in chronological order. However, if an activity was forgotten, it can be recorded at the end of the diary or at any point that it is remembered.

Note: Remember to go back to adjust the start and end times of the previously recorded activities so that there is no overlap of time between activities.

3. Location of activity

Respondent's home

In some cases it may be difficult to distinguish between the respondent's workplace and his/her home. For example, a mother babysits children in her home, an insurance agent does most of his work from an office in the basement. In cases where the respondent works from home, mark "respondent's home" and not "workplace" unless the respondent's home and workplace are in the same building but have a different address (e.g., a hairstylist has a shop at 201 Main Street and lives in the apartment above the shop at 201B Main Street).

Work place

Select this category for traveling sales persons traveling between appointments, taxi drivers, bus drivers and couriers when they are on the job, not one of the "in transit" categories (described on the next page). Volunteers are not to be considered in their place of work even if the work is regularly performed in an institution. In these cases "other" is to be marked.

Someone else's home

Select this category if the respondent is in a private home other than his/her own.

Other place

Include all other places not listed above, for example, shopping center, school, park, cottage.

In transit

An in transit category must be selected for any activity described as being "travel".

4. Interaction

It may be difficult to make a distinction between a respondent doing something alone or doing something with someone else. For these difficult cases accept the respondent's perception of whether he/she was alone or with someone else.

Multiple responses are permitted for the question "Who was with you?", except for cases where the respondent is "alone".

Below are some examples to help you determine those cases which are difficult and to help the respondent give you a more precise response:

- Consider the respondent "alone" if he/she is watching television in one room while other household members are in another room. If other household members were watching television with the respondent, select the appropriate category.
- Consider the respondent "alone" if he/she is making dinner on his/her own while someone else is in the kitchen doing an unrelated activity, for example reading the newspaper. If the other household member is helping the respondent make dinner or interacting with the respondent in some other way, select the appropriate category.

Exception:

If the children of the household under 15 years of age are present in the same room, select "children of the household" even if they are not actually participating in the activity or interacting with the respondent.

- Consider the respondent "alone" where there are no co-workers in the workplace. If the respondent works for a firm with other co-workers, mark "other persons".
- If the respondent is in the company of strangers while shopping, riding a bus or obtaining other services, consider that person "alone", even if he/she speaks to the store clerk, hairdresser or doctor. Otherwise, if a friend is with the respondent, consider that person with someone else and mark "friends" or "other persons".

5. Helping others

Many of our daily activities help persons living outside our own households. For example:

- You made extra quantities of a meal so that you would have leftovers to take over to an ill neighbour.
- While doing your own laundry, you are also doing laundry for your child who has his or her own apartment.
- Your child had a sport event to attend and as a favour to your neighbour, you offered to drive his or her child as well.

In order to determine the level of informal social support in society, respondents will be asked to indicate whether each activity helped someone outside the household or helped an organization.

The exceptions are:

- activities which are personal in nature;
- activities described as helping household members only;
- activities related to paid work or education; and
- certain leisure activities such as listening to the radio or watching t.v.

6. Edition of the diary at the Main Office

Time - 24 hours

Total time for activities done on the reference day must cover 24 hours or more. That is, from 4:00 a.m. to 4:00 a.m., plus the time the respondent went to bed on the day preceding the designated day and the time he awoke on the day following the designated day. Verifications were made to insure that the "time ended" for each activity is the same as the "time began" for another activity, i.e.:

DROVE TO THE STORE	11:30 - 11:45
SHOPPED FOR A HAMMER	11:45 - 12:05

If there are gaps in time or overlapping times, edit was made using the instructions below.

Gaps

When a gap of 10 minutes or less exists between the time one activity ended and the next activity

began, allocate 1/2 of the time to the activity preceding the gap and 1/2 of the time to the activity following the gap, i.e.:

	WAS	EDITED TO
SHOWERED	7:10 - 7:25	7:10 - 7:30
ATE BREAKFAST	7:35 - 7:55	7:30 - 7:55

If the gap is longer than 10 minutes, edit in a "time began" and "time ended" for this time period at the end of the activity entries. Label the edited time as "MISSING" and code it 001. Leave items (d) and (e) blank.

Overlaps

Overlaps were corrected the following way:

	WAS	EDITED TO
WATCHED TV	11:00 - 12:00	11:00 - 11:50
EATING	11:40 - 12:15	11:50 - 12:15

In the above example, there is a 20 minute overlap.

Refusal

If the respondent has given no activities for some period of the day which sum up to more than 4 hours in total, the record has been considered as a REFUSAL and has not been kept in the sample.

ACTIVITY CODES DESCRIPTION

EMPLOYED WORK - CODES 011-090

011 Work for pay at main job

Description

Normal work; activities at the main job including work brought home, travel which is part of the job; "working", "at work".

Work activities for pay done in the home when home is the main workplace.

Part-time job for students.

Location of activity

This activity should be coded to a non-transit location. For respondents whose main job is within the area of transportation (e.g., bus driver, airline pilot, truck driver), the activity should be coded to 'work place'.

Examples

Working at home in the kitchen.

Attending a lunch meeting until two.

Negotiating a contract in office.

Bought groceries for client.

Warmed up truck, checked tires and brakes - (truck driver).

Repaired plumbing of tenant (superintendent).

Made rounds, visited patients.

Delivering mail on postal route.

Did flight plan - called weather service (pilot).

Research for computer hardware for work - part of his work.

I made some phone calls after arriving home to join clients.

I corrected student=s homework all night.

Coffee in a restaurant for work.

Supervising school children.

Making up his work schedule.

Prepare for school day (teacher).

Banking for work.

Making telephone calls related to work.

Loading up work truck to return home.

Teacher -correcting homework.

Packed vehicle with food to take to her cooking class she teaches.

She is a house keeper/done some ironing.

To purchase a cattle dog for the farm.

Met with client away from main office.

Unusual cases

Work activities related to attending conference or convention away from regular place of work.

On-the-job travelling for bus, taxi and truck drivers.
Babysitting or house cleaning for pay (as respondent's main job).
Paid babysitting performed by a teenager.

Cases coded elsewhere

021 Overtime, specified as such by the respondent.
450 Sleep at motel while on work trip.

012 Work for pay at other jobs

Description

Normal work; activities at other job(s) including work brought home, travel which is part of the job; "working", "at work".

Location of activity

This activity should be coded to a non-transit location. For respondents whose other job is within the area of transportation (e.g., taxi driver, pizza delivery driver), the activity should be coded to 'work place'.

Example

Working for pay on neighbor's farm.

021 Overtime Work

Description

Overtime specifically differentiated from normal work by respondent.

022 Looking for work

Description

Job search; looking for work, including visits to employment agencies, phone calls to prospective employers, answering want ads.

Examples

Picked up job applications.
Distributing resumes.
Working on resume.
Interview with prospective employer.
Attended job fair at school.

Case coded elsewhere

332 Applying for or collecting employment insurance benefits or welfare.

023 Unpaid work in a family business or farm

Description

Work done for a family business or farm for which a salary or wage was not paid.

Example

Did brother's paper route.

030 Travel during work

Description

Travel during work that is specifically differentiated from normal work yet part of the work.

Examples

Delivered forms to hospital offices.

Contractor was travelling between job sites

Unusual cases

Travelling to conference.

Walked to park with children who respondent was babysitting.

Drove around looking for parts to repair farm equipment.

Cases coded elsewhere

011 Travel within workplace.

011 Travel as part of the job, e.g., bus driver, delivery person, travelling salesperson.

090 Trip to or from work.

040 Waiting/delays at work

Description

Waiting time or interruption **during** work that is specifically differentiated from normal work; e.g. machine breakdown, supply shortage.

Examples

Reading while waiting for a plane on a business trip.

Waiting at print shop for xerox copying to be done.

Case coded elsewhere

070 Coffee breaks.

050 Meals/snacks at work

Description

Meals or snacks at the place of work (in the company cafeteria or outside on the grounds).

Cases coded elsewhere

- 431 Ate lunch in the park across the street from the office.
- 440 Ate lunch at a restaurant.

060 Idle time before/after work

Description

Non-working time spent at respondent's workplace before starting or after finishing normal work, e.g., changing clothes, talk with fellow employees (usually activities occurring in the time period between trip to or from work.)

Examples

Went to desk, had coffee, read paper.
Unlocked office, made coffee.
Have coffee, wait to start work.

Cases coded elsewhere

- 440 Had breakfast at restaurant before going to work.
- 760 Had a drink with co-workers at bar after work.

070 Coffee/other breaks

Description

Prescribed non-working breaks or periods, e.g., coffee break, smoke break.

080 Other work activity

Description

Other activities related to work not described in above categories.

Examples

Research for computer hardware for work - outside his regular work (unpaid work).
Picking up pay check.

090 Travel to/from work

Description

Travel to and from the workplace including time spent waiting for transportation. Also include travel (including waiting time related to travel) for job search.

Examples

I took the bus to go for a job interview.
Starting the car - to go to work.

DOMESTIC/HOUSEHOLD WORK CODES 101 - 190

101 Meal preparation

Description

Include time spent preparing meals or snacks, and packing lunches for the next day.

Examples

Got apple from kitchen.
Went to the kitchen, fixed a cup of coffee.
Reheated dinner in microwave.
Started dinner and set table.
Prepared lunches for kids and myself.
Prepared food for a party.
I prepared lunches for the children

Cases coded elsewhere

- 102 Baked a cake for a birthday party.
- 181 Planned meal menu for the week (household management).
- 184 Unpacking groceries

102 Baking, preserving food, home brewing, etc.

Description

Include all activities associated with non-meal preparation such as baking, preserving (canning or freezing) and the home brewing of beer or wine.

Examples

Bottle the wine - home wining.
Cutting fish & freezing.
Sterilize equipment for the wine.

110 Food (or meal) cleanup

Description

Cleaning up after meals, baking or preserving.

Examples

Doing dishes.

Putting away food (leftovers).

Straightening up the kitchen.

Unloaded dishwasher.

Clean barbecue.

Cases coded elsewhere

120 Cleaned kitchen (unrelated to specific meals).

120 Indoor cleaning

Description

Indoor (routine) cleaning; dusting, making beds, picking up, washing windows, vacuuming, fall/spring cleaning, work around the house, etc.

Examples

Cleaning out refrigerator.

Reorganized the kitchen cupboards.

Tidied up the living room.

Sorted through magazines for garbage.

130 Outdoor cleaning

Description

Outdoor cleaning; sidewalks, garbage, garbage removal, snow shovelling, storm windows, cleaning garage, etc.

Examples

Cleaned and stored camping equipment.

Swept/washed out garage.

I shovelled snow.

Garbage taken out.

Cases codes elsewhere

171 Mowed the lawn.

190 Took garbage to dump.

140 Laundry, ironing, folding, drying

Description

Laundry and ironing, includes hand washing delicate items, putting items in the dryer and hanging clothes on the line.

Example

Washing clothes, hanging clothes out.

151 Mending/shoe care

Description

Mending and upkeep of clothes, especially maintenance activities such as replacing a lost button, shining shoes.

Examples

Wax his shoes - shoe care.

I patched my son's pants

152 Dressmaking and sewing (for self or household members)

Examples

Hemmed a dress.

Cut out the pattern for an outfit.

I sewed a dress for my daughter for Christmas

Case coded elsewhere

841 Sewing a dress when done as a hobby (not for sale or exchange).

842 Sewing a dress when done as a hobby (for sale or exchange).

161 Interior maintenance and repair

Description

Include all home repairs and home operations done inside the residence.

Examples

Painting a bedroom.

Plastering the basement wall.

Tinkering around the house.

Installed fire alarm in kitchen.

Setting up new CD player.

We put on wall-paper in the living-room.
Fixed leak in waterbed.
Trying to start the oil furnace.
Refinishing some old furniture for personal use.
Getting cottage winterized.

162 Exterior maintenance and repair

Description

Include all outside maintenance and repairs.

Examples

Painting the house.
Painting the trim on the house.
Fixing the roof.
Repairing the driveway (patching).
Putting the sealer on the drive-way.
Set up a patio table.

163 Vehicle maintenance

Description

Car, truck, motorcycle and bicycle maintenance; necessary repairs and routine care to cars.
Performed on personally owned/leased vehicles only.

Examples

Washed car in driveway.
Helped husband change oil.
Put a new chain on bicycle.
Tuned up motorcycle.
Worked on motorcycle.
Cleaning out car.
Doing the car brakes.

Case coded elsewhere

831 Auto repair when done strictly as a hobby (not for sale or exchange).

164 Other home improvements

Description

Home improvements: additions to and remodelling done to the house, garage.

I constructed a shed in my back yard.

Unusual case

A respondent has purchased a building lot and is building his own home.

Case coded elsewhere

171 Landscaping of backyard.

171 Gardening/grounds maintenance

Description

Gardening; flower or vegetable gardening; spading, weeding, composting, picking. Also include activities related to the care of the grounds: raking and bagging leaves, cutting and watering the grass. Pool maintenance should be also coded here.

Examples

Cleaned pool.

Went outside and turned on sprinklers.

Cleaned pool filter.

I cleaned the swimming pool and stop the filter for the winter

I raked the leaves with the kids.

I planted tulip bulbs.

Putter around yard.

Preparing lawnmower oil; gas etc.

Covered plants to prevent from getting frost.

Worked on grass in yard at cottage.

Case coded elsewhere

164 Installed a pool and deck.

172 Pet care

Description

Include all activities associated with pet care: feeding pets, cleaning cages, walking the dog.

Examples

Drained the aquarium.

Played frisbee with the dog.

Walked the dog.

Cleaned the cat litter.

Case coded elsewhere

380 Visit to veterinarian.

173 Care of house plants

Description

Include watering and replanting of plants that are usually found indoors.

181 Household management

Description

Include activities such as household paperwork.

Examples

Went through recipe book.

Wrote out checks to pay bills.

Prepared shopping list.

Planned my supper.

Preparing income tax.

Getting things together for income tax purposes.

Man came to see mirror for sale.

Leaving the kids notes on chores to do.

Planning and coordinating family activities.

Unusual case

Showing house to prospective buyer or tenant.

182 Stacking and cutting firewood

Description

Include cutting, splitting and stacking of firewood for use in fireplace or wood stove of residence (for personal consumption only). Also include starting fires and cleaning and maintaining of fireplace or wood stove.

Examples

Brought in wood to put in fire.

Cut wood with chain saw.

Stacked firewood.

Lit fire in wood-burning stove.

Put sawdust in burner.

I started the fire to warm up the basement.

183 Other domestic/household work

Examples

Supervised unpacking of a delivery.
Rearranging the living room.
Getting front bedroom ready for visitors.
Turned off lights and fan, got ready to leave the house.
Making cigarettes.
Wrapping gifts.
Giving out Halloween candy.
Holding a garage sale.
I closed the cottage for the winter (shut the water off, etc.)
Fed birds outside filled feeders - at home
Looking around at the new house/grounds.
Filling up propane tanks.
Taking clothes to Salvation Army

184 Unpacking groceries

Description

Include unpacking and putting away of groceries.

185 Packing and unpacking luggage and/or car

Description

Include packing and unpacking of luggage for trips and packing and unpacking of household vehicles, including recreational vehicles (e.g., RV's and trailers)

Examples

Unloading the gifts from the car.
Packed up the car for travelling.
Unpacking.
Packed bags for vacation.

186 Packing and unpacking for a move of the household

Description

Include packing and unpacking of boxes and furniture for a move from respondent's old household to their new household.

Examples

Packing boxes to move.

Moving boxes & furniture from one apt to another across the hall.
Unpacking after move.

190 Travel for domestic work

Description

Travel (including waiting time related to travel) for domestic/household work.

Examples

Drove to the laundromat.
Walked to supermail box to pick up mail.
Went to the dump.
Took goods to recycling depot.

CARE GIVING FOR HOUSEHOLD MEMBERS - CODES 200 - 292

200 Child care (infant to 4 years old)

Description

All childcare (including housework, feeding, nursing and cooking) for children less than 5 years old not described in Codes 220 to 250.

Examples

Microwaved baby's bottle.
Nursed the baby.
Stayed up with crying baby.
Took baby for a stroll in the stroller.
At day care with child.
Watching a Barney tape with son.
Night feeding.
Extract breast milk.

Cases coded elsewhere

100 to 190 Housework devoted to children, especially fixing meals or snacks.
220 to 250 Specific childcare activities.

211 Putting children to bed

Description

Preparing and putting children 5 years of age to less than 15 years old to bed.

212 Getting children ready for school

Description

Dressing, personal care and other activities related to preparing children 5 years of age to less than 15 years old for school.

213 Personal care for children of the household

Description

Dressing, personal care and other activities related to children 5 years of age to less than 15 years old for non-school activities. Including waking children up and bathing children.

Examples

Get his daughter dress.
Wake up younger child.
Bathing children.
Put them down for a nap.
Helping kids getting clothes ready for swimming.
Helping child shower & dress after swimming lesson.

220 Helping/teaching/reprimanding

Description

Helping/teaching children learn, fix, make things. Help with art projects, homework, supervising homework.

Examples

Teaching son how to swing the baseball bat.
Coaching the kids in the park for soccer.
Checked school work for son.
I revised my daughter's homework with her.
Preparing a lesson for child whom has problems with his speech.

Case coded elsewhere

800 Coaching little league baseball team

230 Reading/talking/conversation with child

Examples

Read to my son.
Talking to my daughter.

Watched daughter painting for leisure.

240 Play with children

Description

Indoor and outdoor play with children.

Examples

Played Nintendo with children.

Played Scrabble with children.

Went biking with children.

250 Medical care - household child

Description

Providing medical care to children of the household.

Examples

Gave son medication.

Admitted daughter to hospital and waited.

Was at son's psychiatrist's office.

I bought antibiotics for my son.

Child development person came.

Calming autistic son talking.

Pick up daughter's eyeglass prescription.

260 Unpaid babysitting

Description

Unpaid babysitting or child care provided to children of the respondent's household.

Include all child care provided by household members other than the parent or guardian that has not been coded elsewhere.

Case coded elsewhere

673 Unpaid babysitting for neighbour's child(ren).

011 Paid babysitting (as a job or performed by a teenager)

271 Personal care - household adults

Description

Care given to adults aged 15 years and older living in the household, if not included as household

work.

Routine non-medical care to adults in household.

Examples

Got my wife up.

Ran a bath for my husband.

Washed disabled husband's hair.

272 Medical care - household adult

Description

Medical care given to adults aged 15 years and older living in the household. Include assisting in emergencies.

Example

Took care of my sister who was ill (sister lives in the respondent's household).

281 Help and other care - household children

Description

Other child care not described in Codes 200 to 250.

Examples

Visiting household child in the hospital.

At boys' football practice.

Meeting with teacher at my son's high school.

Worked on kids' Halloween costumes.

Talking with child care worker before or after picking up child.

I signed the school agenda and I wrote a special note to my daughter's teacher.

I attended my son's parent teacher interview.

I reviewed the children school report card.

Went on school field trip with my child.

Cases coded elsewhere

673 Unpaid babysitting or child care to children not residing in household.

230 Reading to or talking with children.

282 Help and other care - household adults

Description

Other care given to household adults not described in Codes 271 and 272.

Examples

Visiting household adult in the hospital.
Helped husband grade his student's exam papers.
Waited at doctor's office for spouse to receive medical care.
Caring for wife in hospital.
Took dinner out to husband in the field working.
Talked with the educator of her handicapped son who is 17 years.

291 Travel: Household child

Description

Travel (including waiting time related to travel) for child care.

Examples

Dropped daughter at babysitter's.
Dropped off brother at school.
Picked daughter up at school.

RESIDUAL CODES

001	Missing Gap in Time
002	Refused Information

001	Missing Gap in Time
002	Refused Information

1. As boundaries between 213 and 281 may be indistinct, it is recommended that the following aggregates be used for comparisons:
210 + 281 in Cycle 7, 1992 = 211 + 212 + 213 + 281 in Cycle 12, 1998
2. The activity 'Roller Skating' was included in 805 in Cycle 7, 1992 but in 810 in Cycle 12, 1998.

* denotes 'part of'

1992 to 1998 Activity Code Comparison

The following document compares the codes for daily activities that were used in the 1998 General Social Survey (GSS) to those codes used during the 1992 GSS.

CYCLE 7**EMPLOYED WORK**

- 011 Work for Pay at Main Job
- 012 Work for Pay at Other Job(s)
- 021 Overtime Work
- 022 Looking for Work
- 023 Unpaid Work in a Family Business or Farm
- 030 Travel During Work
- 040 Waiting/Delays at Work
- 050 Meals/Snacks at Work
- 060 Idle Time Before/After Work
- 070 Coffee/Other Breaks
- 080 Other Work Activity
- 090 Travel: To/From Work

DOMESTIC WORK

- 101 Meal Preparation
- 102 Baking, Preserving Food, Home Brewing, etc.
- 110 Food (or Meal) Cleanup
- 120 Indoor Cleaning
- 130 Outdoor Cleaning
- 140 Laundry, Ironing, Folding
- 151 Mending/Shoe Care
- 152 Dressmaking and Sewing
- 161 Interior Maintenance and Repair
- 162 Exterior Maintenance and Repair
- 163 Vehicle Maintenance
- 164 Other Home Improvements
- 171 Gardening/Grounds Maintenance
- 172 Pet Care
- 173 Care of House Plants
- 181 Household Administration, e.g. Paying Bills, Menu Planning, etc.
- 182 Stacking and Cutting Firewood
- 183 Other Domestic/Household Work

CYCLE 12**EMPLOYED WORK**

- 011 Work for Pay at Main Job
- 012 Work for Pay at Other Job(s)
- 021 Overtime Work
- 022 Looking for Work
- 023 Unpaid Work in a Family Business or Farm
- 030 Travel During Work
- 040 Waiting/Delays at Work
- 050 Meals/Snacks at Work
- 060 Idle Time Before/After Work
- 070 Coffee/Other Breaks
- 080 Other Work Activity
- 090 Travel: To/From Work

DOMESTIC WORK

- 101 Meal Preparation
- 102 Baking, Preserving Food, Home Brewing, etc.
- 110 Food (or Meal) Cleanup
- 120 Indoor Cleaning

RESIDUAL CODES

001 Missing Gap in Time
002 Refused Information

001 Missing Gap in Time
002 Refused Information

1. As boundaries between 213 and 281 may be indistinct, it is recommended that the following aggregates be used for comparisons:
 $210 + 281$ in Cycle 7, 1992 = $211 + 212 + 213 + 281$ in Cycle 12, 1998
2. The activity 'Roller Skating' was included in 805 in Cycle 7, 1992 but in 810 in Cycle 12, 1998.

* denotes "part of"

1998 Activity Classification Structure

The following table shows the definitions of the Major and Minor activity groupings derived from the 177 activity codes used in the 1998 General Social Survey (GSS). This is similar to the grouping of activities used in the 1992 survey.

TWENTY-FOUR CODE ACTIVITY SYSTEM**A. PAID WORK AND RELATED ACTIVITIES****1. Paid Work (WORKPAID)**

- 011 Work for Pay at Main Job
- 012 Work for Pay at Other Job(s)
- 021 Overtime Work
- 023 Unpaid Work in a Family Business or Farm
- 030 Travel During Work
- 040 Waiting/Delays at Work
- 070 Coffee/Other Breaks
- 832 Hobbies Done For Sale or Exchange
- 842 Domestic Home Crafts Done For Sale or Exchange
- 080 Other Work Activities

2. Activities Related to Paid Work (OTHRPAID)

- 022 Looking for Work
- 060 Idle Time Before/After Work
- 893 Travel: Hobbies & Crafts for Sale

3. Commuting (DUR090)

- 090 Travel: To/From Work

B. HOUSEHOLD WORK AND RELATED ACTIVITIES**4. Cooking/Washing Up (COOKDOMS)**

- 101 Meal Preparation
- 102 Baking, Preserving Food, Home Brewing, etc.
- 110 Food (or Meal) Cleanup

5. Housekeeping (HSKPDOMS)

- 120 Indoor Cleaning
- 130 Outdoor Cleaning
- 140 Laundry, Ironing, Folding
- 151 Mending/Shoe Care
- 152 Dressmaking and Sewing

6. Maintenance and Repair (MAINDOMS)

- 161 Interior Maintenance and Repair
- 162 Exterior Maintenance and Repair
- 163 Vehicle Maintenance
- 164 Other Home Improvements

7. Other Household Work (OTHRDOMS)

- 171 Gardening/Grounds Maintenance
- 172 Pet Care
- 173 Care of House Plants
- 181 Household Management
- 182 Stacking and Cutting Firewood
- 183 Other Domestic/Household Work, n.e.s.
- 184 Unpacking Groceries
- 185 Packing and Unpacking Luggage and/or Car
- 186 Packing and Unpacking for a Move of the Household
- 190 Travel: Domestic Work

8. Shopping for Goods and Services (SHOPDOMS)

- 301 Groceries
- 302 Everyday Goods and products (Clothing, Gas, etc.)
- 303 Take-out Food
- 304 Rental of Videos
- 310 Shopping for Durable Goods
- 320 Personal Care Services
- 331 Financial Services
- 332 Government Services
- 340 Adult Medical and Dental Care (Outside Home)
- 350 Other Professional Services (Lawyer, Veterinarian)
- 361 Automobile Maintenance and Repair Services
- 362 Other Repair and Cleaning Services
- 380 Other Shopping and Services
- 390 Travel: Shopping for Goods and Services

9. Child Care (CHLDDOMS)

- 200 Child Care (Infant to 4 Years Old)
- 211 Putting Children to Bed
- 212 Getting Children Ready for School
- 213 Personal Care for Children of the Household
- 220 Helping/Teaching/Reprimanding
- 230 Reading/Talking/Conversation with Child
- 240 Play with Children
- 250 Medical Care - Household Child
- 260 Unpaid Babysitting
- 281 Help and Other Care - Household Children
- 291 Travel: Household Child

C. SOCIAL SUPPORT, CIVIC AND VOLUNTARY ACTIVITY**10. Civic and Voluntary Activity (VLNTORGN)**

- 800 Coaching
- 600 Professional, Union, General Meetings
- 610 Political, Civic Activity

620	Child, Youth, Family Organizations
630	Religious Meetings, Organizations
651	Fraternal and Social Organizations
652	Support Groups

671	Housework and Cooking Assistance
672	House Maintenance and Repair Assistance
673	Unpaid Babysitting
674	Transportation Assistance
675	Care for Disabled or Ill
676	Correspondence Assistance
677	Unpaid Help for a Business or Farm
678	Other Unpaid Help
680	Other Organizational, Voluntary and Religious Activity
271	Personal Care - Household Adults
272	Medical Care - Household Adults
282	Help and Other Care - Household Adults
691	Travel: Civic & Voluntary Activity
892	Travel: Coaching
292	Travel: Household Adults

D. EDUCATION AND RELATED ACTIVITIES**11. Education and Related Activities (SCHLEDOC)**

500	Full-Time Classes
511	Other Classes (Part-Time)
512	Credit Courses on Television
520	Special Lectures: Occasional
530	Homework: Course, Career/Self-Development
550	Breaks/Waiting for Class
560	Leisure and Special Interest Classes
580	Other Study
590	Travel: Education

E. SLEEP, MEALS AND OTHER RELATED ACTIVITIES**12. Night Sleep (DUR450)**

450	Night/Essential Sleep
-----	-----------------------

13. Meals (excl. Restaurant Meals) (MEALPERS)

050	Meals/Snacks at Work
430	Meals/Snacks/Coffee at Home
431	Meals/Snacks/Coffee at Another Place (excl. Restaurants)
540	Meals/Snacks/Coffee at School
642	Meals/Snacks/Coffee at Religious Services
661	Meals/Snacks/Coffee at Place of Volunteer Work

14. Other Personal Activities (OTHRPERS)

- 400 Washing, Dressing
- 410 Personal Medical Care at Home
- 411 Private Prayer, Meditation and Other Informal Spiritual Activities
- 460 Incidental Sleep, Naps
- 470 Relaxing, Thinking, Resting, Smoking
- 480 Other Personal Care or Private Activities
- 492 Travel: Other Personal Activities
- 640 Religious Services/Prayer/Bible Readings
- 692 Travel: Religious Services

F. SOCIALIZING**15. Restaurant Meals (RESTSOCL)**

- 440 Restaurant Meals
- 491 Travel: Restaurant Meals

16. Socializing (In Homes) (HOMESOCL)

- 751 Socializing with Friends/Relatives (No Meal)
- 752 Socializing with Friends/Relatives (With Meal)
- 950 Talking, Conversation, Phone

A Guide to Using the Time Use Data Files

A Guide to Using the Time Use Data Files

The time use portion of the GSS Cycle 12 collected data on the daily activities of Canadians. Information was collected by asking respondents to report their daily activities during the course of a 24 hour reference day starting at 4:00 in the morning. While multiple activities may be done simultaneously, the scope of the survey only allowed for the collection of data on one activity - the main activity as determined by the respondent.

For each activity respondents were asked the start and end time of the activity, where the activity took place and who the respondent was with at the time. The latter was not asked for sleep and most other personal care activities (codes 400, 450, 460 and 480).

The activities reported by respondents were coded into 177 individual groups and these groups were then categorized into 10 major activity groups and 24 minor groups. See Appendix L for details of the classification.

Two separate data files were created from the results of the 1998 Time use Survey: the main file and the time use episode file. The following is a guide to their use.

Three main measures of time use

The analysis done using the file will usually make use of one or more of the following measures.

1. Participation Rate

This is the proportion of the population who reported a particular activity. This is calculated as:

$$P^a = \frac{\sum_i W_i X_i^a}{\sum_i W_i}$$

where

P^a = participation rate for activity a

X_i^a = 1 if respondent reported activity a, = 0 otherwise

W_i = weight for person i

Note that the indicator of participation is a non-zero number of episodes for that activity.

2. Average time for participants

The average time spent on an activity by all participants in that activity is calculated as:

$$TP^a = \frac{\sum_i W_i t_i^a}{\sum_i W_i X_i^a}$$

where

TP^a = average time for all participants in activity a

X_i^a = 0 or 1, indication of participation in activity a

t_i^a = time on activity a for person i (=0 if no participation)

W_i = weight for person i

3. Average time for total population

The average time spent on an activity by the total population (including both participants and non participants) is calculated as:

$$T^a = \frac{\sum_i W_i t_i^a}{\sum_i W_i}$$

where T^a = average time for total population in activity a

t_i^a = time on activity a for person i (=0 if no participation)

W_i = weight for person i

This time will always be less than the average time for participants and is equal to the time for participants if the participation rate is 100%.

The following are a number of comments that are intended to help in using the time use files:

1. The participation rates and the average times can be calculated for any subgroup of the population by including only the individuals in the subgroup.
2. The average time spent either for the participants or the entire population represent an average over a full seven day week (automatically due to the weight) unless a selection is done for a particular day of the week using variable DDAY.
3. The average time for the total population summed across all activities is equal to 1440 minutes (24 hours).
4. Average time for the total population can be added to obtain average time for a grouping of activities.
5. The participation rate can be also calculated by dividing the average time for the population by the average time for the participants. Similarly, the average for participants can be approximated by dividing the average time for the population by the participation rate.
6. Adding durations for social contacts (i.e. variables DURSOC01 to DURSOC11) will likely exceed 24 hours in most situations since time spent for a given activity with more than one type of social contact is counted each time. For example, watching television for an episode of 45 minutes with spouse and children will account for 45 minutes in DURSOC02 (spouse) as well as 45 minutes in DURSOC03 (children of the household).
7. Code 002 represents time spent on activities the respondent refused to report, while code 001 represents gaps in time when the respondent described his/her reference day. Respondents included in the results will not have more than 4 hours missing or refused in total.
8. Durations for each activity are for main activity only (as perceived by the respondent).
9. Variables on the Main File can be linked to variables on the Episode File using the variable RECID as a matching key.

Main File

In addition containing the bulk of the questionnaire responses and derived variables, the Main File provides summary time use activity information for each respondent on:

- i) the total time spent on each activity;
- ii) the total time spent at various locations;
- iii) the total time spent with various persons.
- iv) the total time spent on helping a person or an organization and its characteristics .

Note that this file summarizes the data for each respondent along each of these four dimensions of activities.

It does not, however, provide the details on individual activity episodes. For example, the Main file provides the total time spent on an activity such as T.V. watching, although the total time may have been reported on more than one episode of T.V. watching during the day. The Main file indicates the number of episodes of each activity but does not indicate when during the day they occurred.

Similarly the information for location and "who with" is the total for the day. The "who with" data do not add to 24 hours as a respondent could be with more than one person or groups of persons at a time. DURMEIN provides an unduplicated measure of time spent with the household members. There is no information on this file which links an activity with a location or who the person was with at the time. This information is provided on the detailed episode file described below.

Further summarization of the diary information produced variables for 10 major groups of activities and the 24 subcategories found in Appendix L. Other derived variables are:

- Total duration of time in transit
- Total duration of time spent with household members
- Number of activities
- Number of episodes

In order to provide control counts in using the Main File related to time use, a table is included at the end of this appendix. Users should be able to replicate these using the file.

Examples using the Main file

a) **ACTIVITY TABLES**

When weighted estimates for the duration of time spent at an activity, for example, employed work, by the population are required, use the variables

WGHTFIN	(weight)
DVPAID	(employed work).

When weighted estimates for the duration of time spent at an activity for participants only are required, exclude the respondents who did not report that activity, e.g., employed work,

i.e., Select respondents for whom DVPAID > 0.

The participation rate of a given activity is the percentage of the total population that reported the activity and can be derived using the formula provided.

When weighted estimates are required for a sub-group of the population, select the provided code for the desired sub-group, for example, time spent at employed work (DVPAID) for males and employed males. The variables used would be

WGHTFIN (weight)
 DVPAID (employed work)
 ACT7DAYS (main activity in the past 7 days)
 SEX (sex of respondent)

The selected subgroup would be defined as those where SEX = 1 and ACT7DAYS = 1.

DVPAID	Total Population	Total Participants ¹	Participation Rate (%)
Males	11,937,362	6,085,025	51
Employed Males	7,208,912	5,225,699	73

b) LOCATION

When weighted estimates for the duration of time spent at various locations or in various means of transit by the population are required use the following variables:

WGHTFIN (weight)
 DURLOC01 (home)
 DURLOC02 (work)
 DURLOC03 (someone else's home)
 DURLOC04 (other place)
 DURLOC05 (car as a driver)
 DURLOC06 (car as a passenger)
 DURLOC07 (walking)
 DURLOC08 (bus or subway)
 DURLOC09 (bicycle)
 DURLOC10 (other form of transit)
 DURLOC97 (missing or refused location)
 DURLOC98 (location not known)
 DURLOC99 (location not stated)

When weighted estimates for duration of time spent at various locations or in transit by participants only are required, exclude the respondents who did not report any time at that location or in transit,

i.e., Select respondents for whom DURLOC## > 0.

¹

For any activity, if sample size is less than 25 or weighted sample size is less than 35,000 (at the Canada level) then the data are not considered reliable and should be suppressed.

The participation rate of activity at a given location or given means of transit, is the percentage of the total population that reported activity at the location or in transit and can be derived using the formula provided.

DURLOC02			
Location	Total	Total	Participation
(Work)	Population	Participants	Rate (%)
Employed			
Males	7,208,912	4,523,220	63

DURLOC01 to DURLOC99 provides an estimate of the duration of time spent at various locations or in various means of transit. These categories are mutually exclusive, therefore the time will add to 24 hours for any given population.

c) SOCIAL CONTACTS

When weighted estimates for the duration of time spent with various social contacts for the population are required, use the following variables:

WGHTFIN	(weight)
DURSOC01	(alone)
DURSOC02	(spouse/partner)
DURSOC03	(with household child(ren) less than 15 years of age)
DURSOC04	(with parent(s) or parent(s)-in-law who is living in the household)
DURSOC05	(with other member of the household)
DURSOC06	(with respondent's non-household child(ren) less than 15 years of age)
DURSOC07	(with respondent's non-household child(ren) 15 years of age or older)
DURSOC08	(with parent(s) or parent(s)-in-law who is not living in the household)
DURSOC09	(with other family member(s) who is not living in the household)
DURSOC10	(with friend(s) who is not living in the household)
DURSOC11	(with another person(s) who is not living in the household)
DURSOC97	(refused or missed activities)
DURSOC98	(personal activities ²)
DURSOC99	(don't know or not stated)

When weighted estimates for the duration of time spent with social contacts for participants only are required, exclude the respondents who did not report the required social contact,

i.e., Select respondents for whom DURSOC## > 0

The participation rate of activity with a given social contact is the percentage of the total population that reported some activity with the contact and can be derived using the formula provided.

²

Respondents were not asked for social contacts during personal care activity codes 100, 450, 460 and 480.

Social Contact (Spouse)	Total Population	Total Participants ³	Participation Rate (%)
Employed Males	7,208,912	4,571,896	63

DURSOC01 to DURSOC11 provides estimates of the duration of time spent alone or with others. The duration of time with social contacts will not necessarily add to 24 hours because a respondent can spend time in the company of more than one person at a time.

Social contacts are further summarized in two derived variables:

DURMEIN includes total time with any household member (any of DURSOC02 to DURSOC05 is greater than zero) but with no persons outside the household.

DURMOUT includes the total time with any non-household person (any of DURSOC06 to DURSOC11 is greater than zero) but with no household member.

Although these are mutually exclusive, they do not add to 24 hours since time spent with both household and non-household members is not included.

Episode File

The episode file provides the detailed information on each activity episode reported by respondents. For each episode there is information on the start and end time of the activity, the duration of episode (derived from start and end time), the location of the episode, a set of variables that reflect who the respondent was with during the episode, and information on who an activity helped. Since there could be multiple contacts for an episode, the contact data is provided in the form of a set of variables, one for each type of contact.

The episode file consists of 221,105 records. The unit record for this file is the episode and not the respondent. Each record represents a single activity⁴ in a respondent's day, and all respondent's episodes must add up to twenty four hours (1440 minutes). For example, a respondent who has reported 26 different episodes for his/her reference day has generated 26 records on the Episode file. There is no information on the characteristics of the respondent. However each episode can be linked to the respondent using the RECID and characteristics can be obtained from the Main File. In addition, each episode includes information on the diary day and the total number of episodes for a respondent.

³ For any activity, if sample size is less than 25 or weighted sample size is less than 35,000 (at the Canada level) then the data are not considered reliable and should be suppressed.

⁴ It is not uncommon to find a string of two or more episodes with the same activity codes. These would have been reported as separate episodes when the location of the activity changed or when there was a change in the social contacts present.

Each episode has a weight, WGHTEPI. This is the weight to use when using the Episode File to make estimates based on episodes. When the episode file is used to derive a respondent characteristic, the person weight, WGHTFIN, should be used with the derived characteristic. To make this easier, WGHTFIN has been added to the Episode File on last episode for each respondent.

Examples using the Episode file

The episode file can be used for a number of different types of analysis. One use of the file is to consider a given activity (e.g. T.V. watching) and to analyze the distribution of episodes across time (time of day and/or day of week). The file can also be used to look at where various activities take place (e.g. paid work at home) or the social contacts for various activities. The file can also be used to look at the distribution of activities at any point in time (e.g. what is the population doing at 8:00 a.m., 11:00 p.m., 3:00 a.m., etc). More complicated analysis can be done by linking episodes for an individual and looking at the sequencing of different activities. The episode sequence number EPINO will facilitate this. Similarly by linking the episodes back to the characteristics of respondents, one can look at who in the population engages in various activities at different times during the day.

In view of the additional complexity of exploiting of the episode file, the GSS staff is interested in any work that is done with the file. Users are encouraged to contact the GSS staff to pass on any experiences with the data. The GSS staff will attempt to share whatever experience they have and that which other researchers have reported to them.

In cases where an analysis focuses on an activity, e.g. television viewing, that could have more than one episode in a day, the analyst must decide which weight to use. If, in the analysis, each episode should contribute separately to the estimate, then the episode weight, WGHTEPI, should be used. If, on the other hand, each respondent should contribute at most once to the estimate then the person weight, WGHTFIN, should be used with a derived person level variable.

For instance, the average length of an episode of watching television is an episode based statistic, while the average amount of time a person spends watching television in a typical day is a person based statistic. The first would be estimated as the (weighted) average over all episodes of watching television of the length of the episode. The second would be estimated by taking the weighted average over all respondents of the total length for each respondent of all episodes of watching television.

Here are some examples of the logic and algorithms that should be used when working with the Time Use Episode File. The file should for most purposes be sorted by RECID (the respondent identifier) and EPINO (the identifier of separate episodes for the respondent).

a) A PERSON BASED STATISTIC

When weighted estimates for the average amount of time spent daily at an activity, e.g., work for pay at main job, at a given location, e.g., at home, are required, the estimate is a person based one, the average time a person spends each day at an activity.

Use the variables: ACTCODE
DURATION
PLACE
WGHTFIN

Select ACTCODE = 011 (Working for pay at main job)
PLACE = 01 (Home).

Calculate the average time by summing across all records as follows:

$$\frac{\sum_k \text{WGHTFIN}_k \left(\sum_i \text{DURATION}_i, \text{ where ACTCODE}=011 \text{ and PLACE}=01 \right)}{\sum_k \text{WGHTFIN}_k}$$

where DURATION_i = episode time for episode i (of respondent k).
 WGHTFIN_k = respondent weight for respondent k .

This could be done by using the episode file to create a new file with one record for each respondent and these variables: WGHTFIN, DURINT, where DURINT is the 'duration of interest' for the respondent, the total duration of all episodes for the respondent with ACTCODE=011 and PLACE=01. The procedure would be to set DURINT to zero, then look through the episode records for the first respondent, and whenever ACTCODE=011 and PLACE=01, add DURATION to DURINT. After examining the last episode for the first respondent, save WGHTFIN and DURINT to the new file, reset DURINT to zero and continue with the second respondent. Continue in this way until a record has been added to the new file for each respondent. Then the equation above become:

$$\frac{\sum_k \text{WGHTFIN}_k \text{DURINT}_k}{\sum_k \text{WGHTFIN}_k} = \frac{291,687,822}{24,260,137} = 12.02 \text{ minutes}$$

Interpretation: On an average day, Canadians spend 12.02 minutes working at their main job while they are at home.

Calculate the participation rate as follows:

$$\frac{\sum_k \text{WGHTFIN}_k \left(\text{for those with } \sum_i \text{DURATION}_i, \text{ where ACTCODE}=011 \text{ and PLACE}=01 \text{ not equal to zero, (i.e. DURINT not equal to zero)} \right)}{\sum_k \text{WGHTFIN}_k}$$

$$= \frac{1,422,215}{24,260,137} = 5.9 \%$$

Interpretation: On an average day, 5.9% of Canadians do some work at their main job while they are at home.

And so the average time spent per participant is:

$$= \frac{291,687,822}{1,422,215} = 205.1 \text{ minutes}$$

Interpretation: On an average day when they do some work at home, Canadians spend 205.1 minutes working at their main job while they are at home.

b) AN EPISODE BASED STATISTIC

When weighted estimates for the average duration of a single episode of a certain activity, e.g., watching television, the estimate is an episode based one, the average length of an episode of watching t.v.

Use the variables: ACTCODE
 DURATION
 WGHTEPI

Select ACTCODE = 911, 912, 913, or 914 (Watching t.v.)

Calculate the average time by summing across all episode records as follows:

$$\frac{\sum_j \text{WGHTEPI}_j \text{ DURATION}_j, \text{ where ACTCODE}=911, 912, 913, \text{ or } 914}{\sum_j \text{WGHTEPI}_j, \text{ where ACTCODE}=911, 912, 913, \text{ or } 914}$$

where DURATION_j = episode time for episode j.
WGHTEPI_j = episode weight for episode j.

This yields an estimate of:

$$\frac{3,198,292,910}{33,559,271} = 95.30 \text{ minutes}$$

Statistical analysis software packages and database management software packages are currently used for exploiting these types of data files. For example, SAS and SPSS are widely used for statistical analysis of this data. While these types of packages can be used to merge information from the Main and the Episode files, intensive users of the Episode file may also want to consider bringing these files together in a relational database. Most database management system software packages provide a mechanism for easily linking and retrieving data from the two files with a one-to-many relation. This is usually based on Standard Query Language (SQL). Among these are Access, Oracle, Paradox, SQLServer.

Table 1

Average time spent¹ on various activities for the population 15 years and over and participants showing participation rate by sex, Canada, 1998

Activity group	Population 15+			Participants			Participation rate		
	Total	Male	Female	Total	Male	Female	Total	Male	Female
	(Hours per day)			(Hours per day)			(Percent)		
Total work²	7.8	7.8	7.8	8.0	8.0	7.9	98	97	99
Paid work and related activities	3.6	4.5	2.8	8.3	8.8	7.7	44	51	36
