INTRODUCTION

Volume III of the Export Commodity Classification is designed for use in compiling Canada's export statistics. It lists in alphabetic order both the descriptions of all export commodity classes as they appear in monthly trade reports, and the "office rulings" on commodity descriptions not specifically mentioned in the commodity classes but frequently encountered on customs export documents. Its purpose is to assist the staff in locating the class codes and units of quantity appropriate to the principal commodity descriptions with which they are faced. Because it is a working document whose content is continually changing, it is printed in loose-leaf form to facilitate revisions to individual pages as required.

This volume makes no attempt to provide a ruling for every product exported from Canada or for every term encountered on export documents. A complete index would be too unwieldy for daily use. Nor are the rulings it contains designed to be self-sufficient; each ruling must be read in the context of the full class description and notes contained in Volume I of the Export Commodity Classification (Catalogue No. 12-521). Finally, it is not intended to illustrate the contents of particular classes; that purpose is better served by Volume II of the Export Commodity Classification (Catalogue No. 12-522) which presents the same material arranged by commodity class, although even in that arrangement its lack of completeness limits its illustrative value.

All office rulings are kept on punch cards to aid in making revisions and in controlling their accuracy and adequacy. This volume has been printed from copy prepared by listing these punch cards. This has imposed certain important limitations on the phrasing, punctuation and format which are used. The most important limitation is that of length: all class descriptions and most rulings are confined to one descriptive line not exceeding 35 characters in length (including all blank spaces, but not including the class code or unit of quantity). Because of this limitation there is extensive use of abbreviations, and this volume must be read carefully if users are to avoid being misled by these abbreviations. When the meaning of a ruling could not be expressed in one line even with abbreviations, a second line of not more than 30 characters was added. In these cases the second descriptive line is identified by a 4-letter indentation.

This volume contains three distinct types of item:

1. Specific commodity rulings: these consist of a 35 character description (occasionally supplemented by a second descriptive line of up to 30 characters), a unit of quantity (or a dash if goods which would be governed by a specific ruling are recorded without a quantity), and a class code. Leader dots link the ruling and its unit of quantity. Specific commodity rulings account for the vast majority of items in this volume.

Note that some rulings to certain classes specify a unit of quantity, while other rulings to the same classes show a dash in the quantity column. This may occur whenever a class takes both complete units and parts of units; rulings on complete units will usually specify a quantity (commonly "number"), while "parts" rulings will show a dash because parts are recorded without quantities.

2. Class descriptions: These consist of one descriptive line of up to 35 characters, a unit of quantity (or a blank if the class does not record quantity), and a class code. They do not have leader dots, and are further identified by the symbol < preceding the description. In many cases class descriptions are sufficiently specific to make rulings on these classes unnecessary, but in other cases they are so general that they are useful only in locating a particular class in the classification.

Some class descriptions are preceded by the symbol # instead of <; an extra digit follows the class number for these class descriptions and for all rulings relating to these classes. Statistics on commodities so identified are not available except to employees of Statistics Canada. In all publicly available records such classes are combined with the most appropriate general class within the same commodity group (e.g.: class 400-99-1 is included with 400-99, class 411-99-1 with 411-99, etc.).

3. Definitions and special instructions: these contain one or two descriptive lines, omitting both quantity and codes. They may provide general guides to commodity classification (e.g.: MANGANESE COPPER IS COPPER ALLOY..), or warnings against basing a decision on commodity classification on a term known to apply to more than one class of commodity (e.g.: AMBERLITE IS A GENERAL TRADE NAME..). As indicated in these examples the spaces for description are completed by leader dots.

These three types of item are intermingled throughout this volume in alphabetic order. The alphabetic arrangement has a few special features:

1. If the first word of an item is abbreviated (this is rare), it is nevertheless listed as though printed in full (e.g.: the class description RR TIES NES, HEWN MINE TIES OF WOOD comes in the middle of a group of rulings whose first word is RAILWAY).
2. If the first part of a description is numeric, it is listed according to the alphabetic portion of the description (e.g.: 2, 4, 5T BUTYL ESTER FORMULATION... is the first ruling in the "T" section).

3. Punctuation marks and hyphens are treated as blank spaces

4. Blank spaces take precedence over either numbers or letters (e.g.: STEEL WOOL precedes STEELHEAD...). This results in the grouping of all items having the same first word, and is especially important in view of the "key word" principle used in preparing this volume.
5. In a series of rulings using the same "key word", the ruling or class description for the n.e.s. (not elsewhere specified) category usually appears at the end of this series, e.g.:

GRASS SEED, MEADOW FESCUE	LUMBER, PINE, WESTERN JACK
GRASS SEED, TIMOTHY	LUMBER, PINE, WHITE
GRASS SEED NES	LUMBER, PINE NES

The "key word" principle was used to reduce the need for double-indexing rulings, and thus to reduce the bulk of this volume. It requires that items be shown according to the word which most clearly expresses the basic nature of the commodity, and as a result it is usually unnecessary to index any term more than once. The following examples show how a few terms which may be encountered on customs documents are indexed in this volume according to the key word principle:

<u>Terms which May be Used on Customs Documents</u>	<u>Terms as Indexed by Key Word Principle</u>
UNEXPOSED FORMALITH <u>FILM</u>	FILM, FORMALITH, UNEXPOSED
ALUMINUM <u>FOIL</u>	FOIL, ALUMINUM
LADIES <u>SLACKS</u>	SLACKS, LADIES
ROLLS OF CITRUS <u>WRAPPERS</u>	WRAPPERS, CITRUS, IN ROLLS

If a commodity is usually identified on documents primarily by a trade name, the trade name is normally the key word in rulings (e.g.: NOXEMA SKIN CREAM; PELTEX /LIGNOSULPHONATE/). Where machinery and other equipment is encountered, the key word is that word which identifies the type of machine or apparatus (e.g.: TOBACCO MANUFACTURING MACHY AND PARTS; RADIO-TELEPHONE LINKING EQUIPMENT). In the above cases the terms "machinery" and "equipment" have such a broad meaning that they do not provide a sufficiently specific answer to the question "What is the commodity?", and are therefore not suitable as "key words". To index under such terms would result in overlong and unwieldy lists in certain parts of this volume.

To use this volume properly it is essential that the key word principle be thoroughly understood, and that the key word of a description be determined before an attempt is made to locate that description in this volume. While double-indexing has not been completely eliminated, it is

much less extensive than in earlier editions, and failure to take the key word principle into account could make it difficult or impossible to find a particular item. The chief exceptions to the key word principle are the class descriptions and the cross-reference items used occasionally to direct attention to the proper "key words", and some chemical terms (both acids and alcohols are still listed both by key word and by the word which normally appears first on customs documents, e.g. ALCOHOL, METHYL and METHYL ALCOHOL).

This volume makes extensive use of abbreviations because of the need to limit most descriptions to 35 characters. Some are standard dictionary abbreviations, some are terms widely used in industry, and some have been tailored to the specific needs of this volume by such devices as the omission of vowels or the omission of terminal syllables. There is no complete list of the abbreviations used, more than one abbreviation may be used for the same word or phrase, and one abbreviation sometimes has two different meanings. The following examples define some of the more common abbreviations and illustrate the lack of uniformity:

ACC)	according	GR grade
ACCORD)		green
BL bleached		INDUS) industrial
BRD broad		INDUST)
COMM commercial		MACH) machines
DERIV derivatives		MCH)
ELEC electric		MCHY) machinery
electrical		MACHY)
ELEC electric		MAT materials
EXC except		PDR powder
FAB fabrics		powdered
FIB fibre		PT parts
FROZ) frozen		PTS
FZ)		WOV woven
		broad woven

UNITS OF QUANTITY AND DEFINITIONS USED IN CANADIAN EXPORT STATISTICS

Bbl. Volume in barrels (for petroleum: 35 Canadian gallons or 42 U.S. gallons)

Broad woven ... More than 12 inches in width.

UNITS OF QUANTITY AND DEFINITIONS USED IN CANADIAN EXPORT STATISTICS
(continued)

Canned Preserved solely by being shut off from air.

Carat Weight in carats.

Cord Volume in cords.

Cwt. Weight in hundredweights of 100 lb. each.

Cwt.N. For canned foods, weight of contents of cans in hundredweights of 100 lb. each, the weight of all containers and packing being excluded.

Doz. Number in dozens.

Doz. Pr.) Number of pairs in dozens.
Dz. Pr.)

Ft. Length in linear feet.

Gal. Volume in Canadian gallons (1 U.S. gal. = 0.83 Can. gal.).

Hardwood Wood from broad-leaved trees.

Lb. Weight in pounds.

Lb. N. For canned foods, weight of contents of cans in pounds, the weight of all containers and packing being excluded.

M. Number in thousands.

M. B. Ft.) Volume in thousand board feet.
M. B. F.)

M. Cu. Ft.) Volume in thousand cubic feet.
M. C. F.)

M. Kw. H.) Thousand kilowatt hours.
M. KWH.)

Narrow woven.... Not more than 12 inches in width.

N.E.S. Not elsewhere specified.

No. Number.

Pair Number of pairs.

P. Gal. Volume of alcoholic content in terms of Canadian gallons of the strength of proof (1 U.S. P. gal. = 0.74 Can. P. gal.).

Rf. Sq. Area in roof squares.

Softwood Wood from coniferous trees.

UNITS OF QUANTITY AND DEFINITIONS USED IN CANADIAN EXPORT STATISTICS
(concluded)

Sq. Ft. Area in square feet.
Sq. Ft.) Volume in square feet of 3/8" thickness, other thick-
3/8" equiv.).... ness to be converted to the equivalent of 3/8" thick-
SF3/8).... ness (e.g. 10,000 sq. ft. of 3/16" plywood = 5,000 sq.ft.
of 3/8" equivalent).
Ton Weight in short tons of 2,000 lb. each: 1 long ton =
1.12 short tons or 2,240 lb.
1 metric ton = 1.1 short tons or 2,205 lb.
Tr. Oz. Weight in troy ounces.
- In Unit of quantity column: no quantity recorded.
< Summary class description card as used in monthly
and quarterly trade reports.
..... Statistics on this class not available except to
employees of External Trade Division of Statistics Canada.

UNITS OF QUANTITY USED IN THE FRENCH CLASS DESCRIPTIONS

BRL Volume en barils.
CARAT..... Poids en carats.
C TOI Superficie en carrés à toiture.
CORDE..... Volume en cordes.
DOUZ..... Nombre de douzaines.
D PRE..... Nombre de douzaines de paires.
GALL..... Volume en gallons canadiens.
GAL P Volume du contenu alcoolisé en gallons canadiens de
preuve.
LIV Poids en livres.
LIV N..... Poids du contenu en livres (récipients exclus).
M Nombre en milliers.
M KWH Milliers de kilowatts-heure.
M PCU Volume en milliers de pieds cubes.
M P P Volume en milliers de pieds planche.
NOMB Nombre.
ON TR Poids en onces troy.
PAIRE Nombre de paires.
PC 3/8 Volume en pieds carrés de 3/8 de pouce d'épaisseur.

UNITS OF QUANTITY USED IN THE FRENCH CLASS DESCRIPTIONS
(concluded)

- PI Longueur en pieds linéaires.
- PI CA Superficie en pieds carrés.
- QTL Nombre en quintal en poids de 100 livres.
- QTL N Poids du contenu en quintal de 100 livres
(réceptacles exclus).
- TONNE Poids en tonnes courtes de 2,000 livres.
