## INTRODUCTION

This edition of the "Convertibility Index" is the third complete revised edition since the introduction of the new Import Commodity Classification in January 1964, the second revised edition since the introduction of the new tariff item numbering system in August 1965.

Changes implemented in the Import Commodity Classification as well as deletions and additions in customs tariff items made it necessary to print this edition effective April 1966.

As changes in customs tariffs are mostly effective at the beginning of a new fiscal year, publishing of new editions will follow the fiscal year rather than the calendar year. The yearly reprinting of this volume will limit updating service only to exceptional cases.

With the English edition for the fiscal year 1966-67, the first French version of the Convertibility Index is being published simultaneously, and for the future both versions will be available.

This index does not include all possible valid relationships between tariff items and commodity classes. It merely attempts to show the commodity classes which account for 90% or more of the goods entered under each of the 2,400 items of Schedule A of the Customs Tariff, and also to ensure that the relationships shown account for 90% or more of the content of each of the 2,400 classes of the Import Commodity Classification. To achieve this coverage it was necessary to show some relationships which often occur in practice, but which appear to be technically "incorrect".

### Purpose:

The main purpose of this volume is to acquaint those who prepare import entries with the sort of commodity distinctions and quantity information required for import statistics. Whenever customs entries and invoices do not contain sufficient information, it is necessary to obtain the missing particulars by special enquiries directed through port officers to importers or their customs brokers. This causes extra work for all concerned, which could usually be avoided by proper use of this index and of Volume I of the Import Commodity Classification.

This volume is also intended to assist the statistical clerks who process customs entries to find appropriate commodity classes for unfamiliar commodities, and is often used by analysts who wish to relate the commodity statistics published in the Trade of Canada reports to the Customs Tariff.

This volume can NOT be used to determine the proper tariff status of any commodity! It is simply a record of the tariff items under which goods are initially entered with more than occasional frequency. Some tariff items are cross-indexed to obviously inappropriate commodity classes (e.g., T.I. 52305-1), but these relationships have been encountered often enough to require special mention. Valid information as to the tariff item under which any commodity should be entered can be obtained only from the Customs and Excise Division of the Department of National Revenue.

Format:

Each column-line in the main body of this volume consists of a tariff item number, a commodity class description or "special case" indication (see p. 4), a unit of quantity (if required by the commodity class), and a commodity class number. Because this volume was printed from copy prepared by listing a set of punch cards there are certain mechanical limitations on its format and phrasing, especially through the restriction of class descriptions to a maximum of 35 characters. If this limitation obscures the meaning of a commodity class the full description can be found in Volume I of the Import Commodity Classification. Units of quantity are limited to 5-letter abbreviations, but their meaning is given on pages 5 and 6.

Use of this Index:

Statistical requirements for commodity descriptions and quantity information regarding any import shipment can be checked in the following manner:

1. Locate in this volume the tariff item(s) under which goods are to be entered (e.g.: 56821-1).
2. Scan the commodity class descriptions shown for the tariff item(s) to determine the type of description required. For goods entered under T.I. 56821-1 the description should indicate:
  - (a) whether the hosiery is for men, women or children,
  - (b) the material from which the hosiery is made,
  - (c) if applicable, whether seamless or full fashioned (women's), or whether elastic (support) hosiery.

A typical satisfactory description might read: Men's nylon and cotton socks as "Socks and stockings n.o.p."

3. Note the quantity unit(s) specified for the description(s) which most closely relates to the goods. For imports under T.I. 56821-1 the statistical unit of quantity is "dozen pair", the same unit as is required by the tariff item.

Reporting of Quantity:

Weight is the most common measure of quantity in the Import Commodity Classification. It may be expressed in tons, hundredweights (of 100 pounds), pounds, ounces, troy ounces or kilograms, but any of these units are readily convertible to any other so long as the one used is clearly specified. Whenever weight is required the net weight of the goods should be given, excluding all packing materials. For most canned foods the statistical unit of quantity is specially indicated as net weight to emphasize that even the weight of the cans should not be included in statistical totals.

Number is also frequently used to measure quantities. It may be expressed in thousands, gross, dozens, pairs or units, but again these units are readily convertible to each other so long as the one used is clearly specified.

Measures of volume, length or area are required for some classes. These are often difficult to convert, and special care should be taken to specify the proper unit in each case if enquiries are to be avoided.

When goods are entered under a tariff item which levies duty at a specific rate or at a combination of specific and ad valorem rates, the commodity class in which the goods belong will normally require the same type of quantity information as the tariff item. When the statistical unit differs from a unit which must be shown for duty calculations, the Dominion Bureau of Statistics can usually manage to convert the quantity required by the tariff item to that required for statistics. However there are 27 tariff items which specify a quantity which is not always suitable for statistical use; in these cases the statistical quantity unit should also be reported on either entry or invoice.

501-1	11000-1	12001-1	13705-1	22006-1	53410-1
600-1	11901-1	12002-1	13900-1	26901-1	54210-1
905-1	11902-1	12003-1	14315-1	26902-1	
10300-1	11903-1	12004-1	15900-1	26910-1	
10400-1	11904-1	13505-1	20335-1	53405-1	

The greater part of Canada's imports is entered free or at ad valorem rates of duty. In these cases there is no customs requirement for quantity information, but the proper statistical quantities should always be shown on customs entries. To simplify this task, the Import Commodity Classification uses common commercial quantity units whenever possible. Every effort has been made to avoid using different types of unit of quantity for different commodities covered by a single tariff item, but these could not be eliminated entirely. Sixty-five such cases remain; special care should be exercised in showing quantities for goods entered under these tariffs:

504-1	26902-1	35900-1	44059-1	54305-1	69605-1
13505-1	27102-1	36215-1	44200-1	54320-1	69615-1
13900-1	27200-1	39905-1	44205-1	56300-1	71100-1
15630-1	27300-1	41105-1	44510-1	56805-1	90603-1
19200-1	27305-1	42701-1	44516-1	57200-1	90800-1
19900-1	27502-1	42706-1	44603-1	57300-1	91503-1

26901-1	35400-1	44051-1	53305-1	61800-1	

#### Special Cases:

Three special phrases sometimes occur in the "Usual Commodity Classes" column of this volume instead of a class description. Two of these phrases identify cases where it is especially difficult to relate particular tariff items to the Import Commodity Classification because of the broad commodity coverage of these tariff items, the third identifies cases where no statistical requirements apply.

OTHER CLASSES IF APPROPRIATE identifies cases where some of the goods entered under a tariff item can be cross-indexed to specific commodity classes of which they form a significant part, but where other goods entered under that item form very minor parts of classes too numerous to mention. This phrase occurs some 60 times on tariff items such as 22025-1, 44022-1, 70100-1 and 92100-1, but always at the end of a list of classes to which goods imported under the specified tariff item often belong. It could also be applied to such tariff items as 20839-1, 36215-1, 42720-1 and 71100-1, but the length of the list of indexed classes was considered as sufficient warning in these cases.

DESCRIBE COMMODITIES IN DETAIL identifies cases where imports under a particular tariff item are not known to form a significant part of any commodity class but form very small parts of very many classes. In this edition it is also used for a few rarely-encountered tariff items which do not relate to single commodity classes. This phrase occurs some 35 times on tariff items such as 10525-2, 26200-1, 45800-1 and 86300-1, and is always the only descriptive phrase shown for the tariff item in question. In such cases a special effort should be made to ensure that entry or invoice provide detailed descriptive information.

NOT INCLUDED IN STATISTICS identifies five tariff items which cover special transactions not included in import statistics. These are 17330-1, 43600-1, 43700-1, 70200-1 and 70305-1. In these cases no statistical requirements for information need be met.

In any case where the total value of an import shipment is less than fifty dollars (\$49.99 or less), the only statistical requirement is that the value of the goods be shown, regardless of the tariff item under which the goods are cleared.

ABBREVIATIONS, DEFINITIONS AND UNITS OF QUANTITY USED IN CANADIAN IMPORT STATISTICS

Bbl. ....	Volume in barrels (for petroleum: 35 Canadian gallons or 42 U.S. gallons).
Broad woven ...	More than 12 inches in width.
Bu. ....	Volume in bushels, for barley, 48 lb. for oats, 34 lb. for buckwheat, 48 lb. for rye, 56 lb. for Indian corn (maize), 56 lb. for wheat, 60 lb.
Canned ....	Preserved solely by being shut off from air.
Carat.....	Weight in carats.
Cord.....	Volume in cords.
Cwt. ....	Weight in hundredweights of 100 lb. each.
Cwt. N. ....	For canned foods, weight of contents of cans in hundredweights of 100 lb. each, the weight of all containers and packing being excluded.
Doz. ....	Number of dozens.
Doz. Pr.)	Number of pairs in dozens.
Dz. Pr. )....	
Ft. ....	Length in linear feet.
Gal. ....	Volume in Canadian gallons (1 U.S. gal. = 0.83 Can. gal.).
Gross.....	Number in gross.
Hardwood.....	Wood from broad-leaved trees.
Kg. ....	Weight in kilograms (1 Kg. = 2.2 lb.).
Lb. ....	Weight in pounds.
Lb. N. ....	For canned foods, weight of contents of cans in pounds, the weight of all containers and packing being excluded.
M. ....	Number in thousands.
M. B. Ft.)	
M. B. F. )....	Volume in thousand board feet.
M. Cu. Ft.)	
M. C. F. )....	Volume in thousand cubic feet.
M. Kw. H. ....	Thousand kilowatt hours.
Narrow woven...	Not more than 12 inches in width.
N. E. S. ....	Not elsewhere specified.
No. ....	Number.
Oz. ....	Weight in ounces.
Pack .....	Number in packs.
Pair .....	Number of pairs.

P. Gal. ....	Volume of alcoholic content in terms of Canadian gallons of the strength of proof (1 U.S. P.gal. = 0.74 Can. P.gal.).
Pkg. ....	Number of packages.
Softwood.....	Wood from coniferous trees.
Sq. Ft. ....	Area in square feet.
Sq. Ft. 1/4" equiv.)... SF1/4 )	Volume in square feet of 1/4" thickness, other thicknesses to be converted to the equivalent of 1/4" thickness (e.g. 10,000 sq.ft. of 1/8" plywood = 5,000 sq.ft. of 1/4" equivalent).
Sq. Yd. ....	Area in square yards.
Ton .....	Weight in short tons of 2,000 lb. each: 1 long ton = 1.12 short tons or 2,240 lb. 1 metric ton = 1.1 short tons or 2,205 lb.
Tr. Oz. ....	Weight in troy ounces.
- .....	In Unit of Quantity Column: no quantity recorded.
* .....	Preceding tariff item: tariff item or commodity class revised since last printing.
