Note of Appreciation

Note de reconnaissance

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

## Release Schedule

The Provincial Economic Accounts are released twice a year. The preliminary version, released approximately four months after the reference year, includes estimates of GDP, final domestic demand at 1986 prices, sources and disposition of personal income and selected economic indicators for the provinces and territories. The other release of the Provincial Economic Accounts, available about thirteen months after the reference period, comprises not just revised estimates contained in the preliminary release, but also thirteen detailed tables on government sector revenue and expenditures.

## Échéancier

Les Comptes économiques provinciaux sont mis à jour deux fois l'an. La version préliminaire diffusée environ quatre mois après la période de référence, présente des estimations du PIB, de la demande intérieure finale aux prix de 1986, de la provenance et l'emploi du revenu personnel et de certains indicateurs économiques pour les provinces et territoires. L'autre version des Comptes économiques provinciaux, disponible environ treize mois après la période de référence, comprend non seulement les estimations révisées de la version préliminaire, mais aussi treize tableaux détaillés sur les recettes et dépenses du secteur des administrations.

## Note

Most of the series shown in these tables have two lines. The first of these lines is the series itself, usually expressed in millions of dollars and sometimes expressed as an index with 1986=100. The second line, italicized and in smaller typeface, is the annual percentage change. The percentage change line is omitted for series which are either very volatile or quite small.

## Note

La plupart des séries figurent dans ces tableaux sous deux lignes. La première ligne représente la série elle-même, habituellement exprimée en millions de dollars, et parfois sous forme d'indice (1986=100). La deuxième ligne, en italique et en caractères plus petits, représente la variation annuelle en pourcentage. Dans le cas des séries très instables ou très faibles, la ligne de variation en pourcentage est omise.
