### **Note of Appreciation**

*Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.*

## 1.0 INTRODUCTION

---

### **Meeting Users' Needs**

The Whole Farm Data Base (WFDB) is the product of a joint venture between Agriculture and Agri-Food Canada and Statistics Canada. It was developed with the intention to meet the increasing demands of users of agricultural statistics for more disaggregated data at the whole farm level. There are various potential users, from public sector policy-makers, to industry analysts and private sector decision-makers. The WFDB provides the means for users to evaluate agricultural policies and programs as well as analyze the viability, stability, and competitiveness of various farm businesses.

### **All the Information in a Single Base**

Integrating into one base the agricultural data, which are available from administrative and survey sources, is the essence of the WFDB. While committed to reducing response burden, eliminating duplication and maximizing the use of existing resources, the WFDB can offer users access to a wider than ever range of disaggregated physical and financial data at the farm level.

### **A Guide to the Whole Farm Data Base**

The following chapters will familiarize potential users of the WFDB with the structure of the data base and the quality of the data and give a description of the WFDB products and services that are currently available.

## 2.0 WHOLE FARM DATA BASE

---

### 2.1 BACKGROUND

---

Since the mid-1920s, the Agriculture Division of Statistics Canada has been publishing data series depicting provincial levels and trends within the agriculture industry. Although timely and reliable, these series have not always satisfied the growing demand for more disaggregated farm level data.

In 1991, Agriculture and Agri-Food Canada obtained the funding to launch the Farm Level Data Project (FLDP). Its aim is to provide the data necessary for monitoring the financial position of farm businesses; assessing the impact of changing policies, programs and economic conditions on farms; and administering and evaluating agricultural programs.

Agriculture Division of Statistics Canada and Agriculture and Agri-Food Canada have begun to address these requirements by launching the Whole Farm Data Base (WFDB), an essential component of the FLDP. The ultimate objective of this base is to provide a set of physical and financial data at the whole farm level that is as complete as possible.<sup>1</sup> This is achieved by integrating data from various existing surveys and

---

<sup>1</sup> For more information, please refer to "Report on User Consultations and Proposed Whole Farm Data Base Tabulations" Jan. 1992, Ménard, Chartrand and Culver, available from the Agriculture Division of Statistics Canada.

administrative sources to produce disaggregated statistics by farm type, revenue class and subprovincial geographic regions.

## 2.2 DATA BASE STRUCTURE

---

There are several major data sources currently offered in the WFDB, which produce annual data at the farm level. They are: the Taxation Data Program (TDP), the National Farm Survey (NFS), the June Crops Survey (JCS), the July Livestock Survey (JLS), and the Farm Financial Survey (FFS). Although the WFDB can be used to produce estimates for selected domains regardless of the revenue level, **the base was primarily structured to provide data for farms with reported annual revenues of \$10,000 and more.** The following components have been targeted for each source for the stated reference years:

- **Taxation Data Program <sup>2</sup> – 1987 to 1995 – 1996 \***
  - detailed revenues and expenses
  - additions and disposals of depreciable assets
  - operator off-farm income (unincorporated only) <sup>3</sup>
  - operator off-farm income (unincorporated and incorporated) <sup>4</sup>
  - farm family off-farm income <sup>5</sup>
- **National Farm Survey <sup>6,7</sup> – 1988 to 1992**
  - cropland acreages
  - livestock inventories
  - certain financial components <sup>8</sup>
- **June Crops Survey <sup>9</sup> – 1993 to 1995 – 1996 \***
  - cropland acreages
- **July Livestock Survey <sup>9</sup> – 1993 to 1995 – 1996 \***
  - livestock inventories
- **Farm Financial Survey <sup>10</sup> – 1988, 1990, 1992, 1993 <sup>11</sup>, 1994 and 1996**
  - capital investments and sales
  - assets and liabilities
  - long-term capital borrowed

<sup>2</sup> The TDP did not cover the Prairie provinces from 1987 to 1989, also data for 1988 and 1989 are not available for the BC Peace Region.

<sup>3</sup> Unincorporated sector only. Farm operators involved in a single farm operation.

<sup>4</sup> Farm operators operating incorporated and unincorporated agricultural holdings. Available since 1993.

<sup>5</sup> Unincorporated sector only. Farm families involved in a single farm operation, 1989 to 1994 only. The 1995 data will be available in January 1998.

<sup>6</sup> In 1993, the NFS was replaced by the June Crops Survey and the July Livestock Survey.

<sup>7</sup> The NFS did not cover Newfoundland for 1992.

<sup>8</sup> Prairie provinces only. These data are not available for 1992.

<sup>9</sup> The JCS and JLS did not cover Newfoundland from 1993 to 1995.

<sup>10</sup> The Farm Credit Corporation under the name "Farm Survey" originally collected the FFS. The dates listed are for reference years 1987, 1989, 1991, 1992, 1993 and 1995 respectively.

<sup>11</sup> Prairie provinces and British Columbia only.

\* The 1996 data will be available in March 1998.

For further information about the sampling and methodology for the TDP, the NFS, the JCS, the JLS and the FFS, see Appendix C.

## 2.3 SELECTION CRITERIA

---

The WFDB can produce tables using, as selection criteria, any of the variables available from each data source. However, the production of cross tabulations using the various data sources is limited to a group of descriptive variables, known as the "core" variables. Financial data from the Taxation Data Program, for example, could not be tabulated by number of animals on a farm because this particular data source does not have any variables on livestock inventories.

The "core" variables are divided into three information groupings: regional information, farm activities, and farm operator. It is the "core" variables that enable the structured disaggregation of the WFDB. As these variables are common to most of the data sources, the data base is capable of offering tabulations with the same selection criteria (e.g., revenues and expenses from TDP, livestock inventories from JLS, and assets and liabilities from the FFS could all be produced for the same census division, farm type, and revenue class). **Although most of the core variables are available for each record, disaggregations will be somewhat limited by the data quality and the number of respondents for a given variable** (e.g., data cannot be disaggregated by a single postal code, however, the postal codes are included on the individual records, allowing a user to specify a group of codes to create a custom region).

The "core" variables are defined in Appendix A.

## 2.4 STANDARD OUTPUT FORMATS

---

The WFDB can provide estimates for every variable collected from all data sources. However, for reasons of quality and consistency, a specific series of agricultural variables in a standard output format has been devised for each source. Once combined, these series create a comprehensive set of physical and financial data at the *whole farm level*. The variables selected from each source are complementary, thus providing more thorough coverage of the agricultural sector on an annual basis.

In practical terms, these formats will produce tables from the WFDB containing the most concise and reliable estimates. The standard output formats are listed in Table 2.1 on pages 4 to 9.

The TDP variables listed in the *Standard Output Formats* are defined in Appendix B. The JCS, JLS and FFS variables are described in the individual survey questionnaires in Appendix E.

## 2.5 DATA QUALITY

---

### 2.5.1 Sampling Errors

---

All of the estimates produced by the WFDB are products of samples. As such, they are subject to possible sampling errors. Sampling errors arise when observations are based only on a sample and not the population as a whole. The size of the sample, the variability of the characteristic of interest in the population, the sampling design, and the estimation method are all factors that may affect the quality of the estimates. In sample surveys, since inference is made about the entire population based on data obtained from only a part of the population, the results are likely to be different than if a complete census was taken under the same survey conditions. The most important feature of probability sampling is that the sampling error can be measured from the sample itself.

Each estimate released through the WFDB is assigned a *coefficient of variation* (C.V.) as a measure of data quality. The C.V. is an objective statistical measure obtained through random sampling of the variation between each estimate and its "true" value. By measuring the sampling error of the estimate, the C.V. indicates the degree of confidence that should be placed on the individual data points. It is the user's responsibility to determine if an estimate with a significant C.V. is appropriate for use.

The following is a suggested C.V. rating system:

<u>C.V.</u>	<u>Rating</u>
0.01% - 4.99%	- very good
5.0 % - 9.99%	- good
10.0 % - 14.99%	- acceptable but use with caution
15.0 % - 24.99%	- use with caution unless independent data source concurs with the estimate value
25.0% +	- unreliable

### 2.5.2 Non-sampling Errors

---

Non-sampling errors can occur whether an estimate is based on a sample or on a complete census. These errors can occur at various stages of data processing (e.g., coding, data entry, editing, weighting, and tabulation) and include errors introduced inadvertently by the respondents. Such errors are reduced through extensive edits and data analysis. However, some limitations have been identified:

- The TDP is unable to assign farm types to certain crop farms in Quebec; these farms have been classified as "unspecified crop farms" (see Appendix A). This limitation has been addressed by subject matter specialists. Since the 1993 taxation year, the "unspecified crops" revenues have been allocated to the crop type.
- TDP estimates for the Peace River Region in British Columbia are unavailable for the years 1988 and 1989.

## 2.6 CONFIDENTIALITY

---

Statistics Canada is aware of the importance of maintaining a strict level of confidentiality for all of its data sources. All tabulated data are subject to restrictions prior to release. Several computerized checks are performed on all data cells to prevent the publication or disclosure of any information deemed confidential.

For each of the tabulations produced, the *estimated number of farms* is rounded to the base "5" and the estimates of the other variables within that table are adjusted by a variable factor. The estimated number of farm families is rounded to the base "10". Should the degree of detail to answer user requests create confidentiality concerns, the affected data or the entire table will be automatically suppressed by the data base system.

This method preserves the confidentiality of the data, without jeopardizing the quality of the estimates.

## 3.0 PRODUCTS AND SERVICES

---

### 3.1 INTRODUCTION

---

To satisfy a variety of user needs, the WFDB offers a diverse collection of products and services. From an annual publication of Taxation Data Program financial data, to a biennial diskette publication of Farm Financial Survey financial data to the Extraction System of Agricultural Statistics (ESAS) and customized requests, the WFDB Project Team is dedicated to offering users the data they need whether in hard copy or electronic format.

### 3.2 ANNUAL PUBLICATION

---

The *Agricultural Financial Statistics* (AFS) publication (Statistics Canada catalogue no. 21-205-XPB) is a series of statistical tables with the Taxation Data Program portion of the WFDB as their source. Included in this publication are: complete itemizations of operating revenues and expenses by province, farm type and revenue class; sources and levels of farm and off-farm income data for unincorporated operators and farm families. The tables are accompanied by text outlining concepts, methods, data quality and data highlights.

The most current version of *Agricultural Financial Statistics* is available for \$47.00 (CAN \$). New editions are published annually in the spring. To obtain a copy, just fill out the order form provided at the end of this document.

### 3.3 BIENNIAL DISKETTE PUBLICATION

---

The *Farm Financial Survey* (FFS) publication (Statistics Canada catalogue no. 21F0008XDB) is a series of statistical tables featuring estimates derived from the Farm Financial Survey portion of the WFDB as their source. Included in this diskette publication are: financial balance sheets by region; financial structure by farm type and region and by revenue class; and capital investments and capital sales by region. Charts and text outlining concepts, methods and data highlights supplement the tables.

The first issue of this diskette publication entitled *Farm Financial Survey* was released in the fall of 1996 and is currently available for \$50.00 (CAN \$). New editions will be published every two years in the fall. To obtain a copy, just fill out the order form provided at the end of this document. A discount is available to all educational institutions.

### 3.4 EXTRACTION SYSTEM OF AGRICULTURAL STATISTICS

---

The *Extraction System of Agricultural Statistics* (ESAS) CD-ROM (Statistics Canada catalogue no. 21F0001XCB) is a compilation of the most commonly requested estimates from the Whole Farm Data Base. This CD-ROM product has been designed to provide you with desktop access to a wide array of physical and financial farm statistics. The system offers: a complete itemization of operating revenues and expenses; sources and levels of farm and off-farm income for operators and farm families; assets, liabilities and capital investment for farms; and information on land use and livestock inventories by region, farm type and revenue class. Users have the option of selecting pre-defined tables or customizing a tabulation to meet specific needs. The resulting tabulations can be viewed on-line, printed, or exported to another computer application.

ESAS 1997 is now offered in a Windows version. In addition to the existing options, ESAS gives you the option to make horizontal bar graphs. The User's Guide and the Reference Manual are now available in electronic format.

The ESAS CD-ROM is \$625 (CAN \$). Annual updates are available for only \$295 after the purchase of the initial package. A discount is available to all educational institutions.

If you would like to order ESAS 1997, just fill out the order form provided at the end of this document.

### 3.5 CUSTOMIZED REQUESTS

---

Customized tables are another option available to users of the WFDB. Users should be prepared to specify the type of components required (see Section 2.2) (e.g., off-farm income, livestock inventories), the applicable data sources, and the appropriate "core" variable disaggregation (e.g., farm type, revenue class, region).

Customized WFDB tables are available on paper or diskette (in ASCII format).

It is important to note that the degree of detail for certain requests may limit data availability due to confidentiality concerns and, as a result, some data will be suppressed.

The cost of customized WFDB products varies with the size and the complexity of each request.

### **3.6 ORDERING WFDB PRODUCTS AND SERVICES**

---

For more information about the Whole Farm Data Base, please write to:

Whole Farm Data Projects Section  
Agriculture Division  
Statistics Canada  
12th Floor, Jean Talon Building  
Ottawa, Ontario K1A 0T6

or call (613) 951-5027

or fax (613) 951-3868

To order *Agricultural Financial Statistics*, *Farm Financial Survey* or *ESAS*, please refer to the order form provided at the end of this document.

**APPENDIX A**

**DESCRIPTION OF CORE VARIABLES**

## REGIONAL INFORMATION

---

**\*Province:** Refers to the major political divisions of Canada. From a statistical point of view, provinces are a basic unit used to tabulate and cross-classify data.

**\*Census Agricultural Region<sup>1</sup>:** More commonly referred to as a **CAR**, this subprovincial geographic area is used by the Census of Agriculture for disseminating agricultural statistics and the WFDB uses it for the same purpose. In all provinces except Prince Edward Island and Saskatchewan, a CAR is made up of groups of **adjacent divisions**. In Saskatchewan, census agricultural regions are groups of **adjacent consolidated subdivisions**, but these groups do not necessarily respect census division boundaries. Census agricultural regions have not been defined for Prince Edward Island. In the Prairie provinces, census agricultural regions are commonly referred to as crop districts.

**Census Division:** Refers to intermediate geographic areas between the census subdivision and the province level. They have been established by provincial law, with the exception of those in Newfoundland, Manitoba, Saskatchewan, and Alberta. In these provinces, the census divisions have been created by Statistics Canada in co-operation with the province. The census divisions correspond to existing counties, regional districts, regional municipalities, etc.

**Census Subdivision:** Applies to municipalities, as defined by provincial law, and geographic areas equivalent to municipalities. In Newfoundland, Nova Scotia, and British Columbia, the term also describes geographic areas that have been created by Statistics Canada as equivalents to municipalities, in co-operation with the provinces.

**Enumeration Area:** Term used by the census to refer to a geographic area canvassed by one census representative.

**Federal Electoral District:** These districts include any place or territorial area entitled to return a member to serve in the House of Commons (source: **Canada Elections Act**, 1990).

**Postal Code:** This is a six-digit alphanumeric code designed and maintained by Canada Post Corporation for the processing of mail (sorting and delivery).

## FARM INFORMATION

---

**\*Farm Type:** For each data source, the type of farm is based on a percentage of agricultural sales. The commodity or commodity group that makes up 51% or more of the sales determines the **primary** farm type that will be assigned to an individual farm. Farms are also assigned a **secondary** farm type, which is determined by the next highest percentage of commodity sales. The *Standard Industrial Classification* (SIC 4 digit codes) acts as a basis for classifying the farm types. In some cases, the WFDB has added a fifth digit to the codes to further breakdown the farm type.

---

\* Indicates variables currently available on ESAS.

<sup>1</sup> The CARs are outlined on the maps found in **Appendix D** (pages D1 to D8). All the maps are based on the **1996 Census boundaries**.

The **degree of specialization** is another "core" variable offered for further disaggregation. This variable is an indication of the level of concentration of total agricultural sales in relation to the sale of commodities or commodity groups as indicated by the farm type. For example, if a cattle farm realizes 90% of its total agricultural sales from the sale of cattle, then the degree of cattle specialization will be 90%.

Listed below are the 11 most commonly requested farm types. These are available for each of the data sources and they can also be found on the *Extraction System of Agricultural Statistics CD-ROM*. For a complete set of farm types and their respective availability see **Table A.1**.

<b>Farm Type</b>	<b>WFDB Code</b>
Dairy	1110
Cattle	1120
Hogs	1130
Poultry and Eggs	1140
Livestock Combination	1190
Grain and Oilseed	9990
Potato	1380
Tobacco	1370
Fruit and Vegetable	1500
Greenhouse and Nursery	1625
Other Farm Types	9995

**\*Revenue:** Refers to the total operating revenues. That is, all revenues from the sale of agricultural commodities as well as agriculture payments and subsidies. Also included are sales from forest products and interfarm sales.

The WFDB makes use of standard revenue classes, which are available for the pre-determined tables. These pre-determined classes are the same as those used by the Census of Agriculture when producing estimates. The levels are:

\$ 10,000	to	\$ 24,999
\$ 25,000	to	\$ 49,999
\$ 50,000	to	\$ 99,999
\$ 100,000	to	\$ 249,999
\$ 250,000	to	\$ 499,999
\$ 500,000	and more	

**Type of Organization:** The types of organizations are defined as incorporated and unincorporated farms.

---

\* Indicates variables currently available on ESAS.

## **OPERATOR INFORMATION:**

---

**Age:** Most data sources provide the age of the principal farm operator.

**Sex:** Data on the gender of the farm operator are also available from most data sources.

**Marital Status:** Marital status is defined by 5 variables: married, widowed, divorced, separated or single.

For further information about operator variables and their availability, contact Agriculture Division.

**APPENDIX B**

**DEFINITION OF TDP VARIABLES**

## DEFINITION OF TDP VARIABLES

---

The WFDB offers a wide range of physical and financial variables from several survey sources. The suggested formats are listed in Table 2.1 (pages 4 to 9). Although other variables are available, those listed in the table are recommended as the most reliable estimates, maximizing the usefulness of each of the data sources.

The TDP suggested variables are listed and defined below and on the subsequent pages. All of the 4 digit codes signify aggregations and their contents are listed and defined wherever necessary.

### Revenues

- R400 All Wheat – winter wheat, spring wheat, durum wheat, red spring wheat and utility wheat
- R401 Oats
- R402 Barley
- R405 Canola (Rapeseed)
- R406 Soybeans
- R407 Corn – grain corn and seed corn
- R423 Other and Non-Specified Small Grains – used when an aggregate amount or an amount for other small grains was reported
- R2002 Other and Non-Specified Grains and Oilseeds – includes:
  - R403 rye
  - R404 flaxseed
  - R416 dry peas and beans – white beans, kidney beans, dry peas, dry lentils and dry pulses
  - R418 other and non-specified oilseeds – used when an aggregate amount or an amount for other oilseeds was reported
- R2005 Total Grains and Oilseeds
- R410 Potatoes – table potatoes, seed and processing potatoes
- R2006 Fruits and Vegetables – includes:
  - R408 apples
  - R409 other fruits – all fruits except apples and blueberries
  - R411 vegetables (non-greenhouse) – artichokes, asparagus, wax and green beans, table beets, broccoli, Brussels sprouts, cabbage, carrots, cauliflower, celery, sweet corn, cucumbers, garlic, horseradish, leeks, lettuce, onions, peas, peppers, pumpkins, radishes, rhubarb, edible rutabagas (turnips), spinach, squash, tomatoes, and vegetable seeds
  - R419 blueberries
- R412 Tobacco – flue-cured, leaf and dark tobacco
- R415 Greenhouse and Nursery Products – nursery, greenhouse or floriculture operations. Also included are: ornamental plants, shrubs and trees; cut and field grown flowers; rooted cuttings; seeds and bulbs; and sod and turf farms.
- R435 Forage Crops (including Seed) – hay, alfalfa, clover and clover seed, alsike clover, timothy and fescue, as well as grass seed farming

- R437 Unspecified Crops (Quebec only) – used when an aggregate amount for crop revenues was reported (not applicable after 1992)
- R2007 Other Crops – includes:
- R413 ginseng
  - R414 mushrooms
  - R427 other field crops – sugar beets, hops, mangels and turnips (for livestock feed)
- R2010 Total Other Crops
- R2015 Total Crop Revenues
- R2016 Cattle and Semen – includes:
- R440 livestock sold - cattle – steers (feeder and stocker), heifers, cows (dairy and beef), calves and bulls
  - R468 semen – semen, stud service, embryo transplants or artificial insemination <sup>1</sup>
- R441 Swine – also referred to as hogs, weaners, gilts, feeders, sows, stags, boars, and market pigs
- R2017 Poultry and Eggs – includes:
- R442 livestock sold - poultry – chicks, pullets, hens, cockerels, capons, commercial broilers and roasters, turkeys, ducks, geese and other fowl
  - R445 eggs
  - R497 chicks from hatcheries and hatching eggs \*
- R443 Sheep and Goats – sheep, goats, lambs, wool, and goat milk
- R2018 Dairy Products and Subsidies – includes:
- R450 milk and cream – for both fluid and industrial purposes
  - R455 dairy subsidies
- R2019 Other Livestock and Products – includes:
- R444 livestock sold - other – other livestock such as horses, ponies, dogs, etc.
  - R460 bees, honey – bees, honey (natural and processed), and beeswax
  - R461 furs – fur-bearing animals raised in captivity and/or fur pelts, includes fox ranching, chinchilla ranching, mink ranching, and rabbit farming
  - R477 P.M.U. (pregnant mare's urine)
  - R498 aquaculture \*
  - R499 artificial insemination, semen and stud service \*
- R2025 Total Livestock and Product Revenues
- R2026 Program Payments (excluding insurance proceeds) – includes:
- R430 all stabilization payments income
  - R472 Christmas tree grants, subsidies
  - R473 NISA
  - R476 Special Grains Program
  - R478 GRIP
  - R495 other subsidies – subsidy income other than dairy subsidies (hog incentive programs, acreage payments, assistance for clearing land, government grants, etc.)
  - R496 subsidies, reimbursements, rebates, patronage dividends, government payments, or payments from co-operatives – used when farm taxfiler reports an aggregate amount and no split can be obtained

<sup>1</sup> Artificial insemination, semen and stud service (see R499) are excluded from R468 in the 1996 TDP (available in March 1998).

\* Only available in the 1996 TDP (available in March 1998).

- R475 Custom Work and Machine Rental – custom work, contract work, machinery leasing or rental, hauling, custom trucking, harvesting, combining, crop dusting or spraying, seeding, drying, packing, cleaning and treating of seeds
- R2027 Rental Income – includes:  
 R457 quota rental income – (milk quota, tobacco quota, etc.)  
 R481 rental income: land and buildings  
 R482 other rental income – surface rental of oil or natural gas properties, right-of-way or road rent
- R490 Insurance Proceeds – insurance payments for loss of crops as a result of adverse weather conditions such as drought, loss of livestock due to disease or other causes, and other
- R2028 Forest and Maple Products – includes:  
 R465 maple products – maple syrup, maple sugar, or maple taffy  
 R470 wood (incl. stumpage fees) – logs, trees, wooden fence posts or any related forest products such as chips or slab wood  
 R471 Christmas trees  
 less R353 logging expenses
- R2004 Cash Advances (Net) – R425 cash advances less R315 cash advances repayment  
 Note: this includes any Wheat Board Payments reported on statement.
- R2029 Miscellaneous Revenues – includes:  
 R459 quota refund or levy refunds  
 R467 sand or gravel – sand, gravel, soil or top soil  
 R479 GST  
 R480 patronage dividends – (grain pools, payments from cooperatives, co-op proceeds, etc.)  
 R500 other farm income excluding rental income – miscellaneous, other or sundry income  
 R508 profit share income (or share)  
 R649 inputs bought for resale - sold – agricultural commodities sold which were bought, but no agricultural process applied to them, (fertilizers sold for resale, chemicals sold for resale, wood sold for resale, etc.)  
 R650 outputs bought for resale - sold – agricultural commodities bought in addition to what was grown or produced, (grain, fruits, produce, vegetables or berries, etc.)  
 R651 horse racing income (<100%) – relates to R354 horse racing expenses below (used when any horse racing expenses reported)  
 less R351 inputs bought for resale (see R649 inputs bought for resale above)  
 less R352 outputs bought for resale (see R650 outputs bought for resale above)  
 less R354 horse racing expense (<100%) (see R651 horse racing income above)
- R2035 Total Other Revenues
- R2040 Total Operating Revenues
- R458 Quota Sale Income
- R469 CCA Recaptured – capital cost allowance recovered, recaptured from last year, etc.
- R2041 Inventory Adjustments – includes:  
 R510 optional value of livestock, end of current year – livestock inventories only (prior to 1990)  
 R635 mandatory inventory adjustment <sup>2</sup>  
 R641 optional inventory adjustment <sup>2</sup>
- R2042 Non-Applicable Income – income not earned from the sale of farm products
- R2045 Total Income Adjustments

<sup>2</sup> For definitions please refer to **Farming Income Tax Guide** available from Revenue Canada.

R2050 Gross Farm Income for Tax Purposes

**Expenses**

R230 Fertilizer and Lime

R235 Pesticides – pesticides, herbicides, insecticides and fungicides or any other type of chemical such as sprays or dusts applied to crops or animals

R240 Seed and Plants – also ornamental plants, rooted cuttings and bulbs

R264 Non-Specified Greenhouse and Nursery Expenses – used when aggregate amount reported for greenhouse and nursery (*prior to 1990*)

R265 Containers, Twine and Baling Wire – bags, containers, twine, all types of materials used to package, contain or ship farm produce or products

R2102 Other Crop Expenses – includes:

R314 irrigation – any expense directly associated with irrigation on the farm including water rights

R324 crop supplies – used when aggregate or a single amount is reported for “crop supplies”

R2105 Total Crop Expenses

R245 Cattle Purchases – cattle, feeders, stockers, dairy or beef cows, bulls, and calves

R246 Swine Purchases – hogs such as service boars, gilts, sows, and weanlings

R247 Poultry and Egg Purchases – chicks, pullets, broilers, layer hens, ducks, geese, turkeys, and other fowl

R248 Sheep and Lamb Purchases – sheep, lambs, and goats

R249 Other Livestock Purchases – horses, ponies, minks, foxes, rabbits, ostriches, and bees (or colonies)

R250 Feed, Supplements, Straw and Bedding – hay, straw, feed grains such as oats, barley, and corn; supplements such as salt, minerals, vitamins, concentrates and milk replacer; and beddings items such as shavings, chips, and sawdust

R255 Vet. Fees, Medicine and Breeding Fees – veterinary fees and medicine as well as breeding fees, stud service and semen, embryo transplants, disease testing, neutering or spaying

R2107 Other Livestock Expenses – includes:

R312 D.H.I.A. and animal grading – Dairy Herd Improvement Association expenses and animal grading

R323 dairy or livestock supplies

R2110 Total Livestock Expenses

R270 Small Tools

R2111 Net Machinery/Truck/Auto Expenses (Fuel) – includes:

R220 machinery and truck expenses – gasoline, diesel and oil

R225 automobile expenses (farm share) – gasoline and oil  
less R485 gasoline tax rebates

R2112 Repairs, Licences/Insurance – includes:

R221 machinery and truck expenses – repairs, licences and insurance

R226 automobile expenses (farm share) – repairs, insurance and licences/permits

R2120 Total Machinery Expenses

R2121 Salaries (including CPP, QPP, UI) – includes:

- R195 salaries (incl. CPP, QPP, or UI) – wages and salaries paid to hire help together with the cost of their board. Also includes wages and salaries paid to children and spouses and all employee benefits
- less R605 salaries or wages paid to self

R2122 Rent – includes:

- R205 rent (land, buildings and pasture)
- R318 quota rental

R275 Insurance

R285 Telephone (Farm Share)

R2123 Net Electricity (Farm Share) – includes:

- R290 electricity farm share
- less R488 electricity rebates

R295 Heating Fuel (Farm Share) – natural gas, coal or oil to heat farm buildings, as well as curing fuel for tobacco and fuel for crop-drying or greenhouses

R300 Custom Work and Machine Rental – harvesting, combining, baling, threshing, crop dusting and spraying, soil preparation, planting and cultivating, grain drying, seed cleaning and treating, sheep dipping and shearing, livestock spraying, soil testing, blacksmithing, animal boarding and grooming, slaughtering, butchering, cutting and wrapping; and rental or leasing of machinery used for purpose of generating farm income

R2126 Net Interest Expenses – includes:

- R210 interest paid on real estate mortgages
- R211 interest paid other than on real estate mortgages
- less R487 interest rebates

R2127 Net Property Tax – includes:

- R215 property taxes on agricultural land and buildings as well as farm share of principal dwelling, also school and municipal taxes
- less R486 property tax or land rebates

R2128 Building and Fence Repairs – includes:

- R260 building repairs
- R261 fence repairs

R2129 Marketing Expenses – includes:

- R305 freight and trucking – transportation of agricultural products to market
- R328 selling costs – commissions, auctioneering charges, or road side stands
- R332 marketing board fees – e.g., Milk Marketing Board, Egg Marketing Board, also dairy levies, milk quota or quota penalties

R2131 Miscellaneous Farm Expenses – includes:

- R280 accounting, legal, office, advertising, memberships, subscriptions
- R283 insurance program overpayment recapture
- R284 GRIP
- R308 share expenses
- R311 sand, soil and gravel
- R320 other farm expenses – miscellaneous or sundry
- R321 other farm expenses

- R322 farm supplies – e.g., oxygen and acetylene
- R333 stabilization levies or fees (government levies)
- R263 maple product expenses – when aggregate reported
- R267 wood expenses – when aggregate reported
- R307 raising expenses – when aggregate reported
- R317 expense for bad debts (incorporated farms only)
- R660 business use of home expense
- less R615 cost for saleable products consumed
- less R621 personal or non-business expenses

R2135 Total General Expenses

R2140 Total Operating Expenses

R2500 Net Operating Income – R2040 total operating revenues less R2140 total operating expenses

R310 Clearing and Improving Land – drilling or digging wells, removing stumps or rocks, etc.

R316 Tile Drainage

R2141 Inventory Adjustments – includes:

- R325 optional value of livestock, end of previous year – if value of livestock at end of previous year exceeds fair market value of livestock on hand, may be deducted (*not valid for 1990+*)
- R326 mandatory inventory adjustment<sup>3</sup>
- R327 optional inventory adjustment<sup>3</sup>

R330 Capital Cost Allowance – applies to amount deducted for depreciable property

R331 Allowance on Eligible Capital Property - all eligible capital expenditures to purchase intangible capital property for use in the farm business, e.g., milk quotas, tobacco quotas or other government rights for an unlimited period

R350 Non-Applicable Expenses – expenses not incurred in order to produce farm income

R2142 Other Expense Adjustments – includes:

- R319 quota purchased
- R334 capital expense
- R309 capital tax

R2145 Total Expense Adjustments

R2150 Total Expenses for Tax Purposes

### **Additions and Disposals of Depreciable Assets – Until the 1995 taxation year**

The following percentages represent the rate at which Revenue Canada allows assets to be depreciated along with the more common items included in each class. For a more complete list of the depreciable assets included in each class, refer to the **Farming Income Tax Guide**.

**Class 1**            **4%**  
                       buildings acquired after 1987  
                       dams

<sup>3</sup> For definitions please refer to **Farming Income Tax Guide** available from Revenue Canada.

<b>Class 2</b>	<b>6%</b> permanent piping
<b>Class 3</b>	<b>5%</b> buildings acquired between 1978 and 1988 cement, steel, or stone docks cement or stone breakwaters
<b>Class 6</b>	<b>10%</b> wood breakwaters greenhouses fences – all types wood, galvanized, or portable buildings and component parts
<b>Class 7</b>	<b>15%</b> boats and component parts
<b>Class 8</b>	<b>20%</b> bee equipment grain or seed cleaners storage buildings drawn hay bailers and stokers tools over \$200 silo and silo fillers, etc.
<b>Class 9</b>	<b>25%</b> aircraft acquired after May 25, 1976 electric-generating equipment acquired before May 26, 1976 (not exceeding 15 Kw)
<b>Class 10</b>	<b>30%</b> automobiles (incl. passenger vehicles - Class 10.1) tractors, trailers, trucks, wagons, and sleighs, etc. computer hardware and systems software
<b>Class 12</b>	<b>100%</b> tools under \$200
<b>Class 16</b>	<b>40%</b> aircraft acquired before May 26, 1976
<b>Class 17</b>	<b>8%</b> roads and other surface areas (paved or concrete)
<b>Class 34</b>	<b>25 - 50%</b> wind-energy conversion equipment
<b>Class 50</b>	<b>Quota <sup>4</sup></b>
<b>Class 60</b>	<b>Other <sup>4</sup></b>

---

<sup>4</sup> Agriculture Division of Statistics Canada created these classes.

**Additions of Assets – Starting with the 1996 taxation year \***

S140	Equipment class 7 to 10, 12, 16, 17 and 34
S141	Building class 1 to 6
S142	Land class 55
S150	Quota class 50
S160	Other class 60
S198	Total

**Disposals of Assets – Starting with the 1996 taxation year \***

S240	Equipment class 7 to 10, 12, 16, 17 and 34
S241	Building class 1 to 6
S242	Land class 55
S250	Quota class 50
S260	Other class 60
S298	Total

**Off-Farm Income <sup>5</sup>**

T6010	Wages and Salaries – includes: T101 employment income before deductions T104 other employment income including tips and gratuities less T109 deduction – other allowable expenses ( <i>not applicable after 1987</i> )
T6020	Net Business Income T135 business income
T6030	Net Professional Income T137 professional income

<sup>5</sup> The 3-digit codes are all (except TCHIL and FAQUE) from the *Revenue Canada Taxation T-1 General Taxation Form*, which are defined in *Your Guide: Federal and Provincial Tax Guide and Returns*.

\* The 1996 data will be available in March 1998.

- T6040 Net Commission Income
  - T139 commission income
- T6050 Net Fishing Income
  - T143 fishing income
- T6060 Net Off-Farm Self-Employment Income
- T6070 Investment Income – includes:
  - T120 taxable amount of dividends
  - T126 net rental income
  - T121 interest and other investment income
  - T122 net limited partnership income
- T6080 Pension Income – includes:
  - T113 Old Age Security pension
  - T114 CPP/QPP
  - T115 other pensions or superannuation
  - T146 net federal supplements <sup>6</sup>
- T6090 Other Off-farm Income - includes:
  - T118 family allowance payments (not applicable after 1992)
  - T119 unemployment insurance benefits
  - T128 alimony or separation allowance
  - T130 other income
  - T144 Worker's Compensation payments <sup>6</sup>
  - T145 social assistance payments <sup>6</sup>
  - TCHIL child tax benefits <sup>7</sup>
  - FAQUE Quebec family allowance <sup>8</sup>
- T6091 Taxable Capital Gains
  - T127 taxable capital gains
- T6092 RRSP
  - T129 registered retirement savings plan income
- T6100 Total Off-Farm Income

<sup>6</sup> Not applicable before 1992.

<sup>7</sup> The Child Tax Benefit (CTB) Program was introduced in January 1993 (CTB replaced family allowance payments). Unlike 1994 estimates, these benefits were not included in the 1993 off-farm income estimates.

<sup>8</sup> Starting in 1994, the statistical series on off-farm family income includes the Quebec family allowances.

**APPENDIX C**

**SURVEY SAMPLES AND METHODOLOGIES**

## TAXATION DATA PROGRAM

---

### The Sample

---

The Taxation Data Program (TDP) samples unincorporated and incorporated taxfiler records annually to estimate a range of financial agricultural variables. Detailed income and expenses, additions and disposals of depreciable assets, and off-farm income of operators and farm families compose the variables produced by the TDP. All of the standard variables and their codes are listed in Table 2.1 (pages 4 and 5).

From 1987 to 1989, the TDP sampled both sectors (incorporated and unincorporated) for all of the non-Prairie provinces. The unincorporated sector of the Prairie provinces was sampled in 1987. For the 1990 taxation year and all subsequent years, the sample includes both sectors in all of the provinces.

*For further information about the sample size of all surveys, refer to Table C.1 WFDB - Provincial Data Availability and Sample Size by Sector.*

### The Methodology

---

TDP data is compiled from two separate sources: a random sample of **unincorporated income tax returns** selected from the Self-Employment File for Agriculture (SEFA); and a random sample of **incorporated tax returns** selected from the CORPAC file that were classified as farms according to the Standard Industrial Classification (SIC) with sales exceeding \$25,000. The sampling rate varies depending on the province, from almost census size in Newfoundland to a 15 to 20% sample in Ontario.

Statistics Canada captures all necessary data (for example, reported revenues, expenses and additions/disposals) from the tax records. The affected data is then subjected to a series of detailed edit and imputation procedures, after which it is expanded by the sampling "weight", adjusted according to the partnership share, and aggregated to arrive at the final estimates. These procedures take into account the possibility that the sampled records reporting farm income could include sales that should not be considered as agricultural sales.

*More information on the sample and methodology of the Taxation Data Program is available in the publication "Agricultural Financial Statistics" (refer to Section 3.2 entitled Annual Publication, or to the order form provided at the end of this document).*

**Note:** Since the 1993 taxation year, communal farming organizations have been in-scope for the Taxation Data Program. A census of communal organizations that reported farming income on their T3 Trust Income Tax and Information Return is performed. Estimates with or without these organizations can be obtained.

## **TAXATION DATA PROGRAM - Off-farm Income**

---

Total operators' off-farm income items are estimated using the same approach as the TDP except that the "weight" is not multiplied by the partnership share.

There are three statistical series on off-farm income: farm operators operating incorporated or unincorporated agricultural holdings; farm operators operating single unincorporated agricultural holdings; and families operating single unincorporated agricultural holdings.

The sample and methodology for estimates on off-farm family income differ somewhat from the rest of the TDP because they are the result of a record linkage. TDP tax records are linked with a family file to produce total estimates for farm families. The Small Area and Administrative Data Division (SAADD) within Statistics Canada creates the family file. SAADD's family file (T1FF) combines individual taxation records in order to create groups modeled after *Census families*.<sup>1</sup>

The TDP target family population (for off-farm family income statistics) is designed to include only those families operating single unincorporated agricultural holdings (single-farm families). The TDP family sample is in effect a subsample of the regular TDP sample.

*More information on the sample and methodology of the TDP off-farm family estimates is available from Agriculture Division of Statistics Canada.*

## **NATIONAL FARM SURVEY**

---

### **The Sample**

---

The National Farm Survey (NFS) was conducted annually until the 1992 reference year and covered all the provinces. The three main types of agricultural variables targeted were: cropland areas, livestock inventories, and certain financial components. All of the NFS variables that are recommended by the WFDB for the suggested formats are listed in Table 2.1 (page 6).

### **The Methodology**

---

Two types of sampling frames were used: a list frame and an area frame. The country was divided into three main geographical regions: the Canadian Wheat Board region (CWB), Ontario and Quebec, and the Maritimes (along with the part of British Columbia not included in the CWB). All farms that registered annual agricultural sales of \$250 or more were included in the survey.

---

<sup>1</sup> *Census families are defined as a husband and wife, legal or common law, with or without their never married children; or lone parent with at least one child, of any age, never married.*

The data collection process began with detailed questionnaires requesting information on the size and use of farm land, detailed livestock inventories, and selected financial variables. Next, these questionnaires went through an extensive edit process which involved imputations for partial respondents. Sampling weights were adjusted for non-respondents and then assigned to the "usable" questionnaires to produce estimates.

## **JUNE CROPS SURVEY**

---

### **The Sample**

---

The June Crops Survey (JCS) is one of a series of annual probability surveys conducted for the main field crops in Canada in order to collect and disseminate data on seeding intentions, acreage seeded and harvested, yields, production and inventories.

In 1995, a sample of approximately 31,600 farms was drawn. This survey includes the acreage that growers seeded with field crops at the beginning of the 1995-1996 crop year. All of the JCS variables that are recommended by the WFDB for the suggested formats are listed in Table 2.1 (page 7).

### **The Methodology**

---

Every five years, the Census of Agriculture gathers information on agricultural holdings throughout Canada, including institutional farms, community pastures, Indian reserves, etc. The Census of Agriculture provides a list of the farms and their productive acreage, and it is on the basis of this list that a probability sample for the June Crops Survey is selected.

Two sampling frames are used for the June Crops Survey: a list frame and an area frame. The "list"-type frame represents all agricultural holdings in Canada as enumerated in the Census of Agriculture, except for institutional farms, farms on Indian reserves and farms in the Northwest Territories, Yukon and Newfoundland. This frame is stratified into homogeneous groups according to census characteristics (for example: farm size, productive acreage and farm type) and also according to provincial geographic boundaries. The area frame is made up of geographic regions and allows for including agricultural holdings that did not exist at the time of the last Census.

The data collection process is undertaken through the system of "Computer-Assisted Telephone Interviews" (CATI). With the CATI system, edit procedures can be carried out during the interview itself, thus lessening the need for telephone follow-up and reducing the respondent burden. No imputation is carried out for missing data. Theoretical weighting factors are adjusted through a process called weighting factor adjustment in cases of partial or total non-response.

## **JULY LIVESTOCK SURVEY**

---

### **The Sample**

---

The July Livestock Survey (JLS) is a probability survey conducted each year. The farms surveyed are asked to report all animals within the agricultural holding, regardless of who their owner is.

In 1995, a sample was drawn of approximately 27,650 farms, including 1,600 by way of postal interviews and 26,050 by means of the "Computer-Assisted Telephone Interviews" (CATI) system. All of the WFDB suggested formats for these data are listed in Table 2.1 (page 7).

### **The Methodology**

---

Every five years, through the Census of Agriculture, information is gathered on all farms in Canada. Census farms include all agricultural holdings whose output is intended for sale, including feedlots, institutional farms, farms on Indian reserves, community pastures, community pasture reserves, etc.

Two sampling frames are used for the July Livestock Survey: a list frame and an area frame. The "list"-type frame represents farms that have been identified in the most recent Census. The area frame is made up of geographic regions and it allows for estimating livestock inventories on farms that did not exist at the time of the last Census.

The data collection process is conducted by means of both postal interviews and the CATI system. With the CATI system, edit procedures can be carried out during the interview itself, thus lessening the need for telephone follow-up and reducing the respondent burden. Farmers must report their inventories as of July 1. The questionnaires are put through numerous edit and imputation procedures before the final estimates are produced.

## **FARM FINANCIAL SURVEY**

---

### **The Sample**

---

Before 1992, the Farm Financial Survey (FFS) was known as the Farm Credit Corporation (FCC) survey. The FCC survey was conducted in 1981, 1984, 1988 and 1990 (collecting data for 1980, 1983, 1987 and 1989). Beginning in 1992, the FFS targeted over 12,000 farms to collect annual detailed financial data. In 1993, however, due to budget constraints, the FFS reduced its sample to include only the Prairie provinces and British Columbia. Since 1994, this survey has been conducted on a biennial basis only. While the relatively small sample size may constrain some disaggregations, it is capable of providing reliable financial agricultural data. All of the WFDB suggested formats for these data are listed in Table 2.1 (pages 8 and 9).

## The Methodology

---

The Farm Financial Survey uses two types of sampling frames, a list frame and an area frame<sup>2</sup>, to estimate detailed financial variables, just as the National Farm Survey, the June Crops Survey and the July Livestock Survey does. The FFS questionnaires are also subjected to several edit and imputation procedures before the actual estimates are finalized.

More information on the sample and methodology of the Farm Financial Survey is available in the publication Farm Financial Survey (refer to Section 3.3 entitled Biennial Diskette Publication, or to the order form provided at the end of this document).

*More detailed information on the methodology of the National Farm Survey, the June Crops Survey, the July Livestock Survey and the Farm Financial Survey is available from Agriculture Division of Statistics Canada.*

---

<sup>2</sup> There was no area frame in 1988.

**Table C.1      WFDB - Provincial Data Availability and Sample Size by Sector (Standard Output Format)**

Reference Year	Variables	Availability	Sample size <sup>1</sup> Usable records		Total

### **JCS, JLS AND FFS SURVEY QUESTIONNAIRES**

# JUNE FARM SURVEY 1995 WESTERN CANADA

Manitoba, Saskatchewan, Alberta, B.C. Peace

For reference only.

## A. Did you or will you seed any crops in 1995?

YES ☐ (GO TO SECTION B.)  
NO ☐ (GO TO SECTION C.)

## B. Which of the following crops did you or will you seed in 1995?

Crop	code	seeded area	ac	ha
1. Durum Wheat	204		1	2
2. Hard Red Spring Wheat	252		1	2
3. Prairie Spring (semi-dwarf) Wheat	233		1	2
4. Soft White Spring Wheat	207		1	2
5. Other Spring Wheat (CWES, unregistered varieties...)	287		1	2
6. Oats	208		1	2
7. Barley	209		1	2
8. Mixed Grains	213		1	2
9. Flaxseed	214		1	2
10. Canola or Rapeseed	215		1	2
11. Spring Rye	210		1	2
12. Lentils - LAIRD	036		1	2
13. Lentils - ESTON	038		1	2
14. Lentils - OTHER OR UNKNOWN	040		1	2
15. Dry Peas - YELLOW	042		1	2
16. Dry Peas - GREEN	044		1	2
17. Dry Peas - OTHER OR UNKNOWN	046		1	2
18. Mustard Seed - YELLOW	251		1	2
19. Mustard Seed - ORIENTAL	253		1	2
20. Mustard Seed - BROWN	254		1	2
21. Mustard Seed - OTHER OR UNKNOWN	240		1	2
22. Sunflower Seed (sunola, other dwarfs)	230		1	2
23. Canary Seed	234		1	2
24. Buckwheat	226		1	2
25. Corn for Grain	216		1	2
26. Fodder Corn	217		1	2
27. Dry White Beans (navy, pea beans)	229		1	2
28. Dry Coloured Beans	236		1	2
29. Triticale	248		1	2
30. Fababeans	235		1	2
31. Safflower	239		1	2
32. Sugar Beets	232		1	2
33. Potatoes	218		1	2
34. Other Crops	225		1	2

## B. continued

Of your total area to be seeded to field crops this spring, what percentage  
is seeded or planted at this time?

code	%
099	

**C. Did you seed any Winter Wheat in the fall of 1994?**

YES

	095
	095

(GO TO QUESTION 1.)

NO

005		4
005		2
005		3
004		12
004		13

The purpose of this survey is to collect information on livestock. The statistics produced from the survey enable those active in the agricultural sector to observe and assess changes in the industry, measure performance and keep the agricultural community and general public informed of developments.

### NOTE:

Please complete and return this questionnaire to Statistics Canada by **July 5, 1995** in the postage-paid envelope provided.

## SECTION A. OTHER FARMING OPERATIONS

Do the operators of this holding manage any farming operation(s) **INDEPENDENT** from **THIS** farming operation?  
(If more than one, use the Comments box below).

Yes ☐ 022 ☐ 1

No ☐ (GO TO SECTION B)

☐ 019 ☐

Office use only

FARM NAME (if applicable)

OPERATOR(S) (if applicable)

### NOTE TO RESPONDENT:

Statistics Canada is collecting information concerning the farm described on the label.

If the operators of this holding manage any other farm(s) entirely separate from this farm  
(i.e., separate accounting books are kept), please do not include any data for the other farm(s) on this questionnaire.

### COMMENTS:

## SECTION B. CATTLE AND CALVES

OFFICE USE ONLY

400

9

At July 1, 1995, do you expect to have any cattle or calves on this operation?

**Include** all cattle or calves on **your** operation, **regardless of ownership**, including all cattle or calves pastured, custom fed or fed under contract for others. **Please do not** report cattle or calves which were owned by you but kept on a farm, ranch or feedlot operated by someone else.

- PRAIRIES:** Please also include all cattle or calves held by this operation, **regardless of ownership**, including livestock pastured on crownland, community pastures, grazing co-operatives.
- BRITISH COLUMBIA:** Please also include all cattle or calves held by this operation, **regardless of ownership**, including livestock pastured on crownland, community pastures, grazing co-operatives and the British Columbia Grazing Project.

Yes

693		

### Other Livestock Product

5. Embryos .....
6. Bovine Semen .....
7. Pregnant Mare Urine .....

696		
697		
698		

## SECTION G. FEDERAL/PROVINCIAL AGREEMENT TO SHARE INFORMATION

### NEW BRUNSWICK, ONTARIO, MANITOBA, SASKATCHEWAN AND BRITISH COLUMBIA ONLY:

To reduce response burden and to ensure more uniform statistics, Statistics Canada has entered into data sharing agreements under Section 12 of the Statistics Act with:

- the New Brunswick Department of Agriculture and Rural Development
- the Ontario Ministry of Agriculture and Food and the Ontario Central Statistical Services
- the Manitoba Department of Agriculture
- Saskatchewan Agriculture and Food
- the British Columbia Ministry of Agriculture and Fisheries.

The information collected and shared will be kept confidential and used only for statistical purposes. Under Section 12 of the Statistics Act you may refuse to share your information. Do you agree to share this information?

Yes 

051		1
-----	--	---

No 

051		2
-----	--	---

### QUEBEC ONLY:

To avoid duplication of enquiry this survey is conducted under a co-operative agreement with the Quebec Bureau of Statistics pursuant to Section 11 of the Statistics Act. The Quebec Statistics Act includes the same provisions for confidentiality and penalties for disclosure of information as the Federal Statistics Act.

# Agriculture Statistics at work for you

**D**id you know that Statistics Canada's **Agriculture Division** provides many of its clients with *special services* tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with *the data you need to make important decisions as an agri-business specialist*.

## SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require. You can pick and choose the variables from one or more of our databases and receive them in a format that *best suits your needs*.

## ANALYTICAL STUDIES

Require in-depth analysis of the data that affect your industry or market? Agriculture Division's specialized team of professionals has the hands-on experience in data analysis *you want working for you*.

## CUSTOM SURVEYS

Do you need information that no one has but you don't know how to get it? Agriculture Division can conduct a special survey or expand on an existing one *just for you*.

Find out for yourself what many agriculture professionals have known for years — **Statistics Canada** has the know-how and expertise to get the job done!

**Call us toll-free at 1-800-465-1991 or contact  
the Statistics Canada Regional Reference Centre nearest you  
and find out today what we can do for you!**

c) Do not know ☐ 3

## D. H.O. USE ONLY

DATE: \_\_\_\_\_

NAME: \_\_\_\_\_

Follow-up required? YES ☐ NO ☐

Action: \_\_\_\_\_

## NOTE TO INTERVIEWER:

- Ensure all updates to label information are recorded in the boxes provided on the cover page of the questionnaire.
- If this operation went out of business or had a change of operator since December 31, 1995, complete this questionnaire.

# SECTION A. CHARACTERISTICS OF THE OPERATOR/OPERATION

Section R

050

9

- Report questions 1 to 4 as of **December 31, 1995**.

A farm **OPERATOR** is an individual responsible for the day-to-day operation of the farm who participates in the decisions to borrow money; to rent, buy or sell assets; and to reduce debts. An operation may have more than one operator but only one questionnaire is to be completed for each operation.

1. How many operators 18 years of age and over were responsible for this operation? .....

051

2. What was the age of:

a) The oldest operator .....

052

b) The youngest operator (*minimum age of 18*) (*if only one operator enter age under oldest operator*) ...

053

3. How many years has the most experienced operator on this farm been managing a farm business? .....

054

4. Which of the following best described this operation? ("X" one circle)

- Report family and hobby farms in 4a) to 4c)

a) Proprietorship .....

056

☐ 3

b) Corporation (Ltd. Co.) .....

☐ 4

c) Partnership .....

☐ 5

d) Cooperative

- Include Hutterite Colonies .....

☐ 6

e) Other (*please specify*) **078** .....

☐ 7

5. How many independent families received income from this farm in **1995**?

610

- **Exclude** families of hired workers whether related or not .....

COMMENTS:

079

## SECTION B. LAND USE

Section R    100    9

- Round to the nearest whole number.

1. How will you report area of the land? ("X" one circle)

199

- ☐ 1 acres  
☐ 2 hectares  
☐ 3 arpents (Quebec only)

2. For the total and cultivated land area operated as of December 31, 1995, how much was:

Area of Total Land as of December 31, 1995	Area of Cultivated Land as of December 31, 1995
121	131
102	112

a) Owned

- **Exclude** land rented or leased to others

b) Rented from others

3. How much land did this operation rent or lease to others as of December 31, 1995?

103

4. Were there any greenhouse products or mushrooms grown for sale on this operation in 1995?

160

YES ☐ 1 NO ☐ 2

5. For the land operated, what was the area in 1995 for the following:

- Report area seeded for crop questions.

a) Wheat

- **Include** winter wheat seeded in 1994 for harvest in 1995

b) Oats

c) Barley

d) Flaxseed

e) Canola or rapeseed

f) Corn for grain

g) Corn for fodder

h) Soybeans

i) Potatoes

j) Fruits and vegetables

- **Include** tree fruits
- **Exclude** greenhouse products

k) Other crops, e.g. mixed grains, tobacco, sugar beets, nursery stock, Christmas trees, sod, lentils, dry peas, dry beans, etc.

l) Summerfallow

m) Tame Hay, Forage Seed

n) Total Cultivated Land (sum of 5 a) to 5 m))

o) All other land

- **Include** improved and unimproved pasture, woodland, buildings, laneways, greenhouses, mushroom houses, sugarbushes, etc.

Total land operated (sum of 5 n) and 5 o))

Total Area Operated In 1995	Did you have provincial crop insurance on these crops in 1995? • Exclude private hail insurance.

## SECTION E. CAPITAL SALES

Section R **230** **9**

- Exclude GST.
- Report to the nearest \$1,000.
- Report for the calendar year 1995.

1. During 1995, did this operation receive any money from the sale of capital items?

**230**

YES ☒ 1

NO ☐ 2 (GO TO SECTION F)

2. What was the amount of capital sales in 1995 for:

- a) Land and buildings .....
- b) Machinery and equipment traded-in .....
- c) Machinery and equipment sold outright, i.e. excluding trade-ins .....
- d) Quota sold separately from other assets .....
- e) Breeding and replacement livestock
- Exclude culls for slaughter .....

237	000
234	000
235	000
236	000

# SECTION F. ASSETS

Section R	300		9
-----------	-----	--	---

1. What was the value of the following assets of this operation (including those of all operators) on **December 31, 1995**?

- Report at current market value.
- Report to the nearest \$1,000.

a) Farmland and buildings owned

- **Include** the farmhouse, storage sheds, silos, grain bins, machine shops, etc. ....

b) Machinery and equipment

i) Total value of all cars used totally or partially in the farm business .....

ii) Of these cars (*Box 310 above*), what is the share used for the farm business .....

iii) Total value of all trucks used totally or partially in the farm business .....

iv) Of these trucks (*Box 312 above*), what is the share used for the farm business .....

v) All other machinery and equipment .....

c) Quota (market value, if not valued elsewhere) .....

d) Breeding and replacement livestock

- **Include** bulls, cows, heifers for replacement, boars, sows, bred gilts, rams, ewes, replacement lambs, goats for milk or hair .....

e) Market livestock

- **Include** heifers for slaughter or feeders, steers, calves, pigs excluding boars and sows, slaughter lambs, poultry, goats for meat, culls .....

f) Accounts receivable (receipts due) .....

g) Inputs (feed, supplies, fertilizer, fuel, seed, chemicals) .....

h) Crops for sale

- **Exclude** greenhouse or nursery products .....

i) Cash, bonds, savings, stocks, shares, RRSP's .....

j) Balance of your NISA account on **December 31, 1995** for:

i) FUND 1 .....

ii) FUND 2 .....

iii) FUND 3 .....

k) Other farm assets, e.g. greenhouse and nursery products, horses, fur animals, bees.

**084**

409	000	489	000
441	000		

## Capital Borrowed in 1995

For long term loans, how much was borrowed in 1995?

(repayment period is 12 months or more)

581	000
582	000
583	000
580	000
585	000
587	000
588	000
589	000

3. Of the total amount owed, how much was outstanding under the Advance Payments for Crops Act (A.P.C.A.) or the Prairie Grain Advance Payments Act (P.G.A.P.) on **December 31, 1995**?

435	000
-----	-----

**EDIT:** Is the figure in Box **435** more than the figures in boxes **402 + 409**?

YES ☐ (Make appropriate adjustment with respondent)

NO ☐ (Go to Question 4)

4. a) Of the money borrowed in **1995** and intended to be repaid within a year, what was the highest amount owed at any one period during the year?

b) Of this amount (Box 501 above), what was the highest amount borrowed under the Advance Payments for Crops Act or the Prairie Grain Advance Payments Act in **1995**?

## Capital Borrowed in 1995

501	000
535	000
540	000

5. Of **all** the money borrowed in **1995**, what amount was used to refinance previous loans?

**EDIT:** Is the figure in Box **501** less than the figure in Box **441**?

YES ☐ (Make appropriate adjustment with respondent)

NO ☐ (Go to Section H)

## SECTION H. RECEIPTS AND EXPENSES

- Report to the nearest \$1,000.

1. Did this operation participate in the provincial crop insurance program (Atlantic Canada include both provincial crop insurance and GRIP)

- a) in 1993? 640 YES ☐ 1 NO ☐ 2
- b) in 1994? 641 YES ☐ 1 NO ☐ 2
- c) in 1995? 642 YES ☐ 1 NO ☐ 2

Section R	600		9
-----------	-----	--	---

(GO TO QUESTION 2)

- d) How much were your provincial crop insurance premiums for the 1995 crop? .....
- e) How much were the gross receipts if any, from provincial crop insurance for the 1995 crop? .....

643	000
644	000

2. Did this operation participate in NISA in 1995? 633 YES ☐ 1 NO ☐ 2 (GO TO QUESTION 3)

- a) How much were your NISA contributions in 1995? .....
- b) How much were your NISA withdrawals in 1995? .....

634	000
635	000

3. In 1995, how much were total farm operating expenses.

- **Exclude** capital cost allowances or depreciation
- **Exclude** the value of inventory adjustments

### Expenses in 1995

606	000
-----	-----

4. Of the total farm operating expenses (Box 606 above) how much was for:

- a) Total interest paid on farm debt
- **Exclude** payments on the principal

605	000
609	000

- b) Wages and salaries paid to family members and operators .....

5. In 1995, what were the total **gross** farm receipts of this operation, before expenses?

- **Include** receipts from capital sales of breeding and replacement livestock (Box 236 page 6, Section E), direct program payments, agricultural custom work.
- **Exclude** NISA withdrawals (Box 635 above), private insurance payouts, the value of inventory adjustments, the sale of land and buildings, and of machinery and equipment.

### Gross Farm Receipts in 1995

601	000
-----	-----

6. Of the total gross farm receipts (Box 601 above), how much was from:

- a) Direct program payments
- **Include** GRIP gross payouts, provincial crop insurance, stabilization payments, tax rebates (e.g. fuel tax, property tax, GST), dairy subsidies, etc.
  - **Exclude** NISA withdrawals (Box 635 above)

604	000
-----	-----

- b) Sales of grains, oilseeds and specialty crops
- **Include** lentils, dry peas, dry beans, etc.

623	000
-----	-----

- c) Sales of horticulture products

- **Include** potatoes, fruit, vegetables, greenhouse products, nursery products, sod, mushrooms, etc.

624	000
-----	-----

- d) Sale of cattle

- **Include** breeding and replacement livestock

625	000
-----	-----

- e) Sale of pigs

- **Include** breeding and replacement livestock

626	000
-----	-----

- f) Sale of poultry

- **Include** eggs

627	000
-----	-----

- g) Sale of dairy products .....

628	000
-----	-----

- h) Other, i.e., horses, sheep, hay, sugar beets, maple products, forage seed, custom work, contract work, etc. (please specify) 086

629	000
-----	-----

**NOTE TO INTERVIEWER:** Determine Enterprise Code.

ENTERPRISE CODE

008

# SECTION I. NON-FARM FINANCES

• Report to the nearest \$1,000.

Section R	800	9
-----------	-----	---

1. In 1995, what was the income of operators and family members from sources other than this operation:

- a) Wages and salaries (before deductions) from all sources .....
- b) Interest, dividends (actually received) .....
- c) Pensions
- Include C.P.P., Q.P.P., old age security .....
- d) Other income not from this operation
- Include non-agricultural custom work, non-farm business income (net of expenses but before taxes), Child Tax Benefit, Unemployment Insurance.
- (please specify) **087** .....

Off-Farm Income in 1995	
617	000
618	000
619	000
622	000

2. In 1995, did any of the operators and/or family members operate a non-farm business, e.g., computer consulting, school bus operation, medical practice, etc.

**850**

YES ☒ 1

NO ☐ 2 (GO TO QUESTION 5)

3. a) What was the value of this operation's non-farm business assets on December 31, 1995?

- Report at current market value.
- Include assets for all individuals who are principal operators.
- Exclude personal assets, e.g. furniture, etc.

(please specify) **088** .....

Non-Farm Business Assets on December 31, 1995	
350	000

**NOTE TO INTERVIEWER:** the value of stocks, bonds, shares and RRSP's should be reported in Box 309, page 7.

b) Of this amount (Box 350 above), what was the value of this operation's non-farm business assets purchased in 1995?

- Exclude personal assets.

(please specify) **089** .....

Non-Farm Business Investments in 1995	
250	000

**NOTE TO INTERVIEWER:** the purchase of stocks, bonds, shares and RRSP's should be reported in Box 217, page 6.

4. On December 31, 1995, how much did this operation owe on these non-farm business assets? .....

Non-Farm Liabilities on December 31, 1995	
450	000

5. What was the amount of capital gifted to, or inherited by, the operator(s) in 1995?

- Exclude grants .....

Gifts and Inheritance in 1995	
241	000

**EDIT:** Is one or more of the Non-Farm Finances reported above greater than zero?

**805**

YES ☐ 1

NO ☐ 2

## SECTION J. AGREEMENT TO SHARE INFORMATION

This survey is being conducted jointly on behalf of Statistics Canada and Agriculture and Agri-Food Canada. The information will be kept confidential and will be used only for statistical purposes.

Do you agree to share this information with Agriculture and Agri-Food Canada?

**900**

YES ☐ 1

NO ☐ 2

**NOTE:** Names and addresses are not shared with Agriculture and Agri-Food Canada.

### NOTE TO INTERVIEWER:

Mark an "X" if any of the following conditions apply:

- |  |            |                         |
|--|------------|-------------------------|
| a) All livestock and/or poultry were sold prior to December 31, 1995. ....   | <b>931</b> | <input type="radio"/> 1 |
| b) There were loans outstanding and/or money borrowed but no interest expense for 1995. ....   | <b>932</b> | <input type="radio"/> 2 |
| c) Low receipts, compared with expenses, for 1995 were due to a poor crop or poor prices. ....   | <b>933</b> | <input type="radio"/> 3 |
| d) Low receipts, compared with expenses, for 1995 were due to the building up of this operation. ....  | <b>934</b> | <input type="radio"/> 4 |
| e) Low receipts, compared with expenses, for 1995 were due to some or all of the crops or livestock not being sold in 1995, but will be sold in 1996. .... | <b>935</b> | <input type="radio"/> 5 |

### COMMENTS FROM INTERVIEWER/FARM OPERATOR:

**090**

**NOTE TO INTERVIEWER:**

1. Who provided the information in this questionnaire? ("X" one circle)

- a) Farm operator (NA1) ..... ☒ 057 ☐ 1
- b) Partner (NA 3 or NA 4) ..... ☐ 2
- c) Spouse (if different from partner) ..... ☐ 3
- d) Employee ..... ☐ 4
- e) Other (please specify relation to NA 1) ☒ 091 ..... ☐ 5

2. Was the majority of the interview conducted by personal interview ☒ 058 ☐ 1  
OR telephone interview ☐ 2

# ESAS

## Agricultural Statistics on CD-ROM

Whether you are interested in detailed statistics on dairy farming in Ontario, off-farm income in Saskatchewan, or poultry production in Quebec, the data are all there in one easy-to-use package on the **ESAS** CD-ROM. **ESAS**, the Extraction System of Agricultural Statistics, combines software with data on a compact disc to give clients desktop access to a wide array of farm financial and physical statistics.

Whether you need the information by region, farm type or revenue class, **ESAS** has:

- ▶ *a complete itemization of operating revenues and expenses;*
- ▶ *sources and levels of off-farm income for operators and farm families;*
- ▶ *assets, liabilities, and capital investment for farms; and*
- ▶ *land use and livestock inventories.*

The job of administering and evaluating agricultural programs is a challenging one. **ESAS** simplifies the research burden of program analysts and government administrators with important data on the financial and physical status of Canadian farms. Trade in your stacks of computer printouts for one easy-to-use CD-ROM.

The **ESAS** CD-ROM (catalogue no. 21F0001XCB) is \$625 (plus GST/HST and applicable PST) in Canada and US \$625 outside Canada. Annual Updates are available after the initial purchase for only \$295 (plus GST/HST and applicable PST) in Canada and US \$295 outside Canada. A discount is available to all educational institutions.

*To learn more  
about ESAS, call  
the Agriculture  
Division of  
Statistics Canada  
toll-free at  
1-800-465-1991*

**To order**, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to **1-800-889-9734** or call toll-free **1-800-267-6677** and use your Visa or MasterCard.

**Via Internet:** [order@statcan.ca](mailto:order@statcan.ca)

*ESAS is the product of a joint venture between Statistics Canada and Agriculture and Agri-Food Canada.*
