## PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS RE GRAIN, FLOUR MILLING, ETC.

- (1) Monthly Bulletin of Agricultural Statistics, carried out in collaboration with Provincial Departments of Agriculture, recording general agricultural conditions statistically for month to month, with special references to acreages, conditions and yields of field crops, agricultural prices, wages, etc., etc. The September, November and January issues of the Bulletin contain the official annual estimates of the crop.
- (2) An annual report on the Grain Trade of Canada, showing the general movement of grain throughout Canada from the farm to final market and in relation to the grain trade of the world.
- (3) A weekly statement showing stocks of grain in store, receipts and shipments at country elevators, interior terminal elevators, public and private terminal elevators in the Western Inspection Division, and at public elevators in the East, together with a statement showing stocks of Canadian grain at United States Lake and Atlantic ports.
- (4) Monthly supplements are added to the weekly grain statistics mentioned above, showing exports of grain and principal grain products by ports of exit and by shipping routes, together with inspections by months in both the Western and Eastern inspection divisions.
- (5) A monthly statement showing grain ground and products produced by merchant and customs mills in Canada.
- (6) An annual report on the Flour Milling Industry.
- (7) The monthly and annual trade statistics of the Bureau contain full details of the imports and exports of grain, flour, etc., whilst canal statistics and general transportation statistics include a full treatment of grain traffic by rail and water. Grain and flour prices are comprehensively covered in the monthly and annual reports on prices of the Internal Trade Branch.

## GRAIN STATISTICS, 1924.

The present report on the Grain Trade of Canada was compiled in the Internal Trade Branch of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada.

The report has been prepared by Mr. W. Dougan under the supervision of Mr. F. J. Horning, B.A., F.S.S., Chief of the Internal Trade Branch of the Bureau.

Statistics are presented showing in detail the various channels and markets through which the grain passes from the farm to its final destination. The domestic movement of the grain is covered to show the production, inspection and handlings of grain at country, interior terminal, public terminal and private terminal elevators in the Western Inspection Division (comprising Fort William and Port Arthur and all territory west thereof) and at public elevators in the East. Handlings of United States grain in the Eastern elevators and of Canadian grain at United States Atlantic ports are also covered. Records of prices at representative markets, freight rates and insurance charges are also tabulated. Comprehensive data for countries other than Canada bring the grain and cereal resources of the world into review.

Owing to the important development of Vancouver as a grain shipping point, statistics as to the movement through this port have been extended to cover, so far as possible, the same features as are covered concerning the movement to the Head of the Lakes.

During the past few years, the movement of new grain has begun in August, somewhat earlier than was formerly the case. For this reason the question of the crop year, which formerly ended August 31st, was taken into consideration at a conference of officials of the Dominion and Provincial Departments of Agriculture and the Dominion Bureau of Statistics, held in January, 1924, at which the whole subject of agricultural statistics was reviewed. It was decided at this conference to change the date of the crop year in Canada to end July 31st. This brings the Canadian crop year into conformity with the international crop year adopted by the International Institute of Agriculture. This change was also approved by resolution of the Board of Grain Commissioners for Canada. Tables in the present report are therefore shown for the period ended July 31, 1924, with supplementary data for August so that a full twelve months' period is covered. Data included in the next report will cover the crop year August 1, 1924, to July 31, 1925.

An important portion of the data has been supplied by Mr. E. A. Ursell, Statistician of the Board of Grain Commissioners for Canada. Material relating to international grain production and trade is based upon the statistics of the International Institute of Agriculture and other official sources. The Board of Railway Commissioners for Canada has supplied the information relating to railway freight rates. The cordial thanks of the Bureau are tendered to the several departments co-operating and to elevator and other officials who have also assisted.

## MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1923-24

Canada's wheat crop for 1923 was the largest in its history. The production amounted to 474,199,000 bushels, exceeding the previous crop by 74,412,600 bushels. The Western Inspection Division produced 453,396,446 bushels, an increase of over 77,000,000 bushels as compared with the 1922 crop. Production in Eastern Canada showed a small falling off.

Inspection returns for the year showed a slight reduction in the percentage grading within contract grades. Some 86 per cent of the spring wheat crop graded No. 3 Northern and better compared with 92 per cent for the previous year. The following statement shows the total number of cars inspected with the percentage grading within contract grades for the crop years 1915-16 and 1919-20 to 1923-24.

Crop year ended August 31	Total number of cars inspected*	Rated Grading No. 3 and over
1915-16.....	281,279	80.3 %
1919-20.....	100,014	72.7 %
1920-21.....	149,669	86.3 %
1921-22.....	181,023	75.2 %
1922-23.....	228,611	92.1 %
1923-24.....	294,468	86.0 %

\*Exclusive of winter wheat.

A total of 196,980 cars were inspected during the four months ended December 1923 compared with 168,160 cars during the same period in 1922. The number of cars of the 1923 crop inspected in August was only 1,347, while for the same month in 1922 there were 3,293 cars. During September 33,991 cars were inspected compared with 39,323 for the same month of the previous year. The remaining months of the crop year show large increases over the previous year with the exception of April and August 1924. The largest monthly increase took place in December 1923 when 21,378 cars were inspected.

Inspections by months for the crop years 1922-23 and 1923-24 were as follows:—

Month	Crop Year 1922-23	Crop Year 1923-24	Increase
	Number of cars		
September.....	39,323	33,991

During the first four months of the crop year 1923-24 the number of cars of wheat unloaded at the Head of the Lakes was 165,474, the remaining eight months handling 60,073 cars. Last year the unloadings for the same periods were 163,995 cars and 53,352 cars respectively. At Vancouver, B.C., the number of cars received during the crop year was 37,031.

The vessel shipments from Fort William and Port Arthur for the period from September 1 to the close of navigation 1923 compared with the same period last year were as follows:—

From September to May of the crop year the average price of No. 1 Northern Wheat did not go above \$1.00 except in September when it rose to \$1.06. During the remaining months average prices ranged from 93·2c. to 99·7c. From May average prices increased from \$1.04 and steadily advanced to \$1.43 in August.

The Western wheat crop amounted to 453,396,446 bushels. The carry-over from the previous year of 5,402,426 bushels together with a small import of wheat and wheat flour from the United States of 188,316 bushels make a total quantity of 458,987,188 bushels available for distribution. Of this amount 363,074,083 bushels were disposed of commercially. The major part consisted of exports direct from the Western Division and shipments into the Eastern Division. Details of commercial shipments with comparative figures for the previous two crop years are—

The amount required for seed amounted to 36,950,100 bushels, while the amount in the elevators, flour mills and farmers' hands at the end of the crop year was 16,367,642 bushels.

Inspections totalled 391,274,959 bushels, or 86·3 per cent of the crop. The receipts at the Head of the Lakes were 296,694,136 bushels. 807,747 bushels were shipped by rail to the East without touching the Head of the Lakes (via Armstrong, Ont.), 7,807,904 bushels were shipped by rail from Fort William and Port Arthur, including the amount ground at Fort William. Direct shipments, other than via Armstrong, amounted to 6,236,736 bushels, making a total all-rail movement eastward from the Western Division of 7,044,483 bushels.

The increase in the wheat crop of the Western provinces was reflected in marketings and shipments as is shown in the following summaries:

No shipments of bonded Canadian wheat by water were made from Duluth to Canadian ports, but 704,655 bushels were shipped to United States ports.

The elevator returns in the Eastern Division show the amount of wheat received at Georgian Bay ports and Goderich amounted to 61,963,858 bushels. The shipments by rail amounted to 61,459,632 bushels and were distributed as follows:—To Montreal 18,364,614 bushels, Canadian seaboard 14,351,627 bushels, other Canadian points 4,234,430 bushels, United States seaboard 9,690,788 bushels, other United States points 14,352 bushels, while the amount consumed or ground locally was 14,787,821 bushels. The water receipts at Port Colborne and Kingston amounted to 61,954,459 bushels, an increase over the previous year of 18,614,465 bushels. Transhipments to Montreal were 46,631,935 bushels. This, together with the amount of 7,473,341 bushels shipped direct from the Head of the Lakes, makes a total receipt at Montreal of 54,105,276 bushels. Two small water shipments were made from Kingston to other Canadian ports of 843 bushels and 679 bushels to Canadian seaboard. The elevator returns at Montreal and Quebec show water receipts of 59,605,877 bushels and rail receipts of 29,619,883 bushels, which make the total handled 89,225,760 bushels. Receipts at Montreal included 13,868,567 bushels shipped by water from Buffalo.

Rail shipments from Port Colborne and Kingston were as follows:—To Montreal 48,525 bushels; Canadian Seaboard 314,297 bushels; Local 11,657,437 bushels, and other Canadian points 2,574,209 bushels; a total of 14,594,468 bushels.

Shipments by water from Fort William and Port Arthur to United States Lake Ports with comparative figures for the previous year were as follows:

According to customs figures 128,493,332 bushels and 1,043,276 bushels were exported from Fort William and Port Arthur to United Kingdom and other countries respectively. These shipments went by way of Buffalo and other United States Lakeports and United States Atlantic Seaboard ports. Export figures show that 20,880,479 bushels were exported direct to the United States for consumption.

The crop in the Eastern Division amounted to 20,802,554 bushels, a decrease of 2,722,451 bushels. The quantity carried over was 3,529,692 bushels; imports from United States were 235,243 bushels. The receipts of wheat from the Western Division were 140,750,685 bushels. This makes a total stock of 165,318,174 bushels for distribution in the Eastern Division. The amount disposed of commercially was 162,345,782 bushels, exports amounting to 84,635,151 bushels, 46,976,282 bushels to the United Kingdom, 37,547,424 bushels to other countries, and 111,445, bushels to United States. Wheat ground in the Eastern Division for consumption in Canada was 29,532,150 bushels and for export 48,178,481 bushels, a total of 77,710,631 bushels. Seed requirements were 1,647,392 bushels, and the carry-over 9,899,323 bushels.

The Canadian Eastern Seaboard ports show a net increase of 3,935,977 bushels in exports during the crop year over the previous year, as below.

Of the total export of wheat from Canada 289,190,061 bushels, Vancouver B.C., exported 53,809,505 bushels, or 18.6 per cent. The total export of wheat from Canadian Seaboard ports during the crop year 1923-24 was 126,790,482 bushels.

Exports from the Eastern Division to the United States for consumption were 111,445 bushels. The quantity exported from United States Atlantic Seaboard ports to the United Kingdom was 11,466,666 bushels, to other countries 76,063 bushels. These exports left Canada through the following Quebec and Ontario ports of exit:—Coaticook 7,977,292 bushels, St. Johns, Que., 2,012,477 bushels, Abercorn 688,065 bushels, Bridgeburg 390,300 bushels, Niagara Falls 363,043 bushels, Prescott 111,532 bushels. Shipments via Portland were 8,262,548 bushels.

Exports by countries of destination show that 200,077,132 bushels went to the United Kingdom and 21,320,242 bushels to United States, to other Countries in the Empire 2,494,295 bushels and other foreign countries 65,298,392 bushels. Full details of exports by countries of destination are shown in table 00. An important feature was the increased amount shipped to China and Japan.

Comparative figures of export shipments overseas via Canadian and United States Seaboard ports are as follows:

United States Department of Commerce returns show that 128,760,434 bushels of Canadian wheat were cleared for export from the United States to overseas countries, compared with 115,799,903 bushels last crop year. New York exported the largest quantity, viz. 63,091,140 bushels. Philadelphia handled 23,224,838 bushels, Baltimore 14,989,417 bushels, Norfolk, Va., 12,568,440 bushels, Portland 7,713,330 bushels, and Boston 7,173,269 bushels.

Complete data showing the movement of wheat and other grains by inspection divisions and for Canada as a whole are contained in tables 73, 74 and 75. Summaries of the handling of grain by the different classes of elevators—country, interior terminal, public terminal, private terminal and public elevators in the East—show the movement through each particular grain centre in Canada during the crop year. A more detailed study of the movement of wheat and other grains can be made from these summaries.

## MOVEMENT OF CANADIAN OATS, CROP YEAR 1923-24

More oats are produced in Canada than all the other grains (wheat, barley, flax, and rye) combined. The crop of 1923 was 563,997,500 bushels, an increase of 72,758,500 bushels over the crop of 1922. The Western Division produced 395,242,597 bushels. The quantity on hand from the previous year amounted to 10,552,568 bushels, and imports from the United States to 1,317 bushels, making a total of 405,796,482 bushels available for distribution from the Western Division. Only 69,278,103 bushels were disposed of commercially, 16,155,734 bushels being exported as grain, 45,889,562 bushels were shipped to the Eastern Division, 7,158,747 bushels were milled for consumption in the West and 74,060 bushels exported in the form of oatmeal and rolled oats. The seed requirements were 23,202,097 bushels, and the quantity in store in the elevators and farmers' hands at the end of the crop year amounted to 33,042,408 bushels.

A total of 125,522,608 bushels are accounted for, and of this amount 84,354,889 bushels were inspected, or 21.3 per cent of the crop. The small proportion inspected and entering commercial markets is due to the large amounts fed directly on the farm. The amount of oats received at the elevators at Fort William and Port Arthur was 58,272,344 bushels. Water shipments from the Head of the Lakes were 46,199,598 bushels (an increase over the previous year of 26,800,712 bushels), 32,306,500 bushels going to Canadian ports and 13,733,099 bushels to United States ports. There were 4,042,063 bushels shipped by rail from elevators at Fort William and Port Arthur. This includes the amount milled at Fort William. 3,252,530 bushels were shipped all-rail via Armstrong, Ont., making, with other direct shipments a total rail movement east of 10,416,927 bushels. Of the shipments from the Head of the Lakes to Canadian lake ports, Georgian Bay ports received 17,463,912 bushels and Goderich 6,237,481 bushels. The shipments from these points were by rail and amounted to 15,240,282 bushels and 5,857,842 bushels respectively.

The water receipts at Port Colborne and Kingston amounted to 5,497,216 bushels, and rail 285,509 bushels. The shipments by water were 3,859,187 bushels, 3,758,975 bushels going to Montreal. The rail movement from these ports was 1,305,335 bushels, destined as follows: to Montreal 16,250 bushels; to Canadian Seaboard ports 290,402 bushels; local shipments 24,199 bushels; to other Canadian points 937,036 bushels; to United States points 37,448 bushels.

The water and rail shipments from Port Colborne to Montreal were 4,189,169 bushels, making the direct water movement of 3,324,550 bushels from the Head of the Lakes, the total shipped to Montreal of 7,513,719 bushels. The elevator returns at Montreal show that 6,619,818 bushels were received by water and 3,999,803 bushels by rail, a total of 10,619,621 bushels.

Exports from the Western Division to the United States were 1,175,913 bushels; 13,910,192 bushels to United Kingdom, to overseas countries 14,979,821 bushels, and 1,069,629 bushels to other countries. 13,347,263 bushels went out from Fort William and Port Arthur direct, while 1,632,543 bushels were exported from Vancouver and 15 bushels from Dawson.

The Eastern oat crop amounted to 168,754,903 bushels, a decrease of 29,811,007 bushels from the previous year. The amount shipped from the Western Division was 45,889,562 bushels, making, with a small import of 184,191 bushels and a carryover of 10,426,249 bushels, a total of 225,254,905 bushels for distribution. The amount milled in Eastern Canada for consumption was 303,816 bushels, and for export 5,170,910 bushels. The exports were 21,469,410 bushels, of which 3,991,964 bushels went to the United States for consumption, and of the remainder 14,064,628 bushels were exported to United Kingdom and 3,412,818 to other countries.

The Canadian Atlantic Seaboard Ports exports amounted to 13,967,844 bushels and exports via United States ports 3,509,602 bushels. Of the former amount 10,912,017 bushels were destined to the United Kingdom and 3,055,827 to other countries. The latter moved by rail

through inland ports of exit as follows: Coaticook 1,735,705; Niagara Falls 855,271; Bridgeburg 306,829; Prescott 303,301; Cornwall 99,943; St. Armand 63,533; St. John's, Que., 63,520; Abercorn 59,563 bushels and Athelston 21,937 bushels.

Seed requirements amounted to 13,026,125 bushels and at the end of the year 12,552,918 bushels were carried in store.

Shipments from the Head of the Lakes by water to Buffalo amounted to 13,678,099 bushels and New York 55,000 bushels, a total of 13,733,099 bushels. 3,509,602 bushels were shipped by rail into United States destined overseas making a movement into that country of 17,242,701 bushels from the Eastern Pool. There was a small movement of oats by water from Buffalo to Montreal of 53,000 bushels. This with direct shipments from the Western Division show a total export into United States from Canada of 22,024,742 bushels of which 5,167,877 bushels were for consumption and 16,856,865 bushels for re-export from United States Atlantic Seaboard to Overseas Countries.

Exports of oats via Canadian Pacific Seaboard Ports amounted to 1,632,543 bushels, via Canadian Atlantic Seaboard Ports 13,967,844 bushels and via United States Seaboard Ports 16,856,865 bushels. The total export movement, including the small shipment via Dawson and exports to the United States for consumption, was 37,625,144 bushels, an increase of 14,063,974 bushels over the previous year.

Comparative figures of export shipments of oats via Canadian and United States Seaboard ports from 1919-20 to 1923-24 are as follows:—

Crop Year	Via Canadian Ports	Via United States Ports	Total
1919-20.....	3,427,156	5,802,538	9,229,694

Complete data showing the movement of oats by inspection divisions and for Canada as a whole are contained in tables 73, 74 and 75. Summaries are also shown in the report dealing with the handling of the grain by the several classes of elevators and centres throughout Canada.

### BARLEY, FLAX AND RYE.

Details of the production and distribution of these grains are shown in tables 73, 74 and 75. As in the case of oats, the percentage of these grains exported is much smaller than in wheat, the bulk being consumed within the country.

**MOVEMENT OF CANADIAN GRAIN THROUGH THE EASTERN  
DIVISION FOR THE CROP YEAR PERIOD 1923-24.  
(September 1 to July 31, 1924.)**

A huge crop of grain was harvested in Western Canada during the past year. A large quantity of this was moved as grain through the elevators in the Eastern Division. The increase in the movement is reflected in the handlings of these elevators.

On the accompanying map on page 18 it has been endeavoured to show the receipts and distribution by groups of elevators. These are depicted as a series of pools to enable the reader to trace the movement of the grain. As it has been found impossible to give the name of each individual destination, the alternative of grouping the ports under the following headings: "To Canadian Seaboard," "Other Canadian Points," "United States Seaboard," "Other United States Points," has been used.

Public elevators in the East are licensed to handle western grain after it has been inspected, acting as transfer houses, and are situated at points on the Georgian Bay, Lower Lakes, St. Lawrence River and the Atlantic Seaboard. For convenience, Goderich has been included in the Georgian Bay ports.

The figures showing the detail of the movement are for the eleven months' period (September 1 to July 31) except for the following summary which shows amounts handled and shipped during the last five crop years comparatively.

**COMPARATIVE MOVEMENT OF CANADIAN GRAIN WITH OTHER  
CROP YEARS**

The following statement shows the Handlings of Canadian grain at the Public Elevators in the East during the crop years 1919-20 to 1923-24 inclusive.

**GEORGIAN BAY PORTS POOL**

The following table shows that there was a total of 87,306,129 bushels received at the Georgian Bay elevators. This amount does not include a carryover of 1,168,933 bushels from the previous crop year which makes a total handled of 88,475,062 bushels. The amounts received by individual ports were as follows:

	Bushels

## LOWER LAKE PORTS POOL

Port Colborne received 62,077,562 bushels and 379,164 bushels by water and rail respectively. Kingston also received small amounts of 654,995 bushels and 126,384 bushels by the same routes as Port Colborne. The combined carryover was 460,221 bushels, making a total amount available for distribution of 63,698,326 bushels. 46,324,627 bushels and 48,525 bushels were forwarded to Montreal from Port Colborne by vessel and rail respectively. No grain was shipped to Montreal from Kingston. The balance was distributed as follows:

## ST. LAWRENCE PORTS POOL

According to Montreal elevator returns some 60,638,802 bushels were received by vessel and 34,530,029 bushels by rail. Adding a carryover of 2,879,665 bushels the total Canadian grain for disposition amounted to 98,048,496 bushels.

The receipts at the Port of Quebec by vessel and rail amounted to 3,306,124 and 859,383 bushels respectively. The carryover was 172,613 bushels making the total handled 4,338,120 bushels.

The largest part of this grain was shipped to United Kingdom and other countries, the amount being 80,417,028 bushels from Montreal and 2,451,329 bushels from Quebec, making a total St. Lawrence River movement of 82,868,357 bushels. The disposal of the shipments was as follows:—

		Montreal	Quebec

## CANADIAN SEABOARD

The amount of Canadian grain handled by the Port St. John, N.B. was practically the same as in the previous year. The quantity received was 15,429,956 bushels, together with a carry-over of 3,229 bushels, making the total handlings 15,429,956 bushels. This quantity was all received by rail. Shipments of 15,426,713 bushels were destined to United Kingdom and overseas countries, while a small amount of 1,854 bushels was consumed locally.

Portland, Me., received some 11,409,264 bushels of Canadian grain which was all shipped to overseas countries.

The receipts and shipments of Canadian grain at the public elevators in the east during the crop year period 1923-24 by grains were as follows:—

## MOVEMENT OF UNITED STATES GRAIN THROUGH CANADA, CROP YEAR PERIOD 1923-24.

**(September 1 to July 31, 1924.)**

The map on page 22 shows graphically the movement of United States grain from its receipt at a Canadian port to its final shipment from the St. Lawrence and Atlantic Seaboard. In describing this movement through the public elevators in the East it must be first stated that the bulk of the grain is handled twice, first on its entry at the lake ports and secondly when finally shipped out.

The amount of United States grain handled this year shows a decrease of 55,291,463 bushels from the quantity handled during the crop year 1922-23. This was due to the reduced production and exportation from the United States during the year. Another factor was the increased production of the Canadian crop.

As in the case of Canadian grain the period covered is for the eleven months (September 1 to July 31) except the following statement which shows the handlings for the last five crop years.

### COMPARATIVE MOVEMENT WITH OTHER CROP YEARS

The following table shows the handlings of United States grain at the Public Elevators in the East during the crop years 1919-20 to 1923-24 inclusive.

Crop Year	Total Handlings Bush.	Gross Shipments Bush.
1919-20.....	35,430,074	33,573,529

### GEORGIAN BAY PORTS POOL

The receipts at the above ports amounted to 8,016,722 bushels to which must be added the carryover from the previous year of 894,422 bushels, making a total of 8,911,144 bushels. The amount received by individual elevators was as follows:

	Bush.
Port McNicoll.....	486,442
Midland.....	378,787
Tifin.....	564,358
Goderich.....	626,182
Collingwood.....	1,692,334
Depot Harbour.....	4,269,819
Total.....	8,016,722

The shipments of this grain were by rail and amounted to 8,140,741 bushels. In former years the bulk of this went to Montreal for shipment. During this crop year period the destination of 6,173,897 bushels of the above was "Other U.S. Points", while the balance was forwarded to the following destinations:

	Bush.
To Montreal.....	529,442
To Canadian Seaboard.....	407,426
To Other Canadian Points.....	536,921
To United States Seaboard.....	387,514
Consumed locally.....	105,541
Total.....	1,966,844

### LOWER LAKE PORTS POOL

Port Colborne was the only port in this pool handling United States grain and the quantity received was 15,332,883 bushels by vessel which with a small carryover of 116,734 bushels from the previous year, makes the total handled 15,449,617 bushels. The shipments to Montreal by vessel amounted to 15,096,466 bushels. There were no other shipments from this Port.

## ST. LAWRENCE PORTS POOL

The elevator returns from Montreal show that 20,666,771 bushels were received by water and 1,140,678 bushels by rail. These amounts together with the carryover of 3,577,080 bushels make the total quantity handled 25,384,529 bushels. The water shipments from Port Colborne do not correspond with the water receipts at Montreal by 5,570,305 bushels, nor do the rail shipments agree with the rail receipts at Montreal by 611,236 bushels. This is accounted for by direct shipments from United States ports to Montreal.

Practically all this United States grain was shipped by vessel to the United Kingdom and other overseas countries, the amount being 22,680,517 bushels. This joined with an overseas shipment of 545,305 bushels from Quebec makes a total St. Lawrence River movement of 23,225,822 bushels. There was also a small amount of 465,023 bushels consumed locally.

At the Port of Quebec there was a large carryover of 505,732 bushels from the previous crop year. The rail and water receipts were 16,579 bushels and 350,652 bushels respectively making a total handled of 872,963 bushels. 545,305 bushels were shipped out by vessel as stated above, while 273,716 bushels were moved by rail to local points.

## CANADIAN SEABOARD

The total receipts at the Port of St. John were 491,947 bushels, while the carryover was 2,502 bushels, making a total quantity of United States grain handled of 494,449 bushels. Shipments amounting to 491,947 bushels went to United Kingdom and other overseas countries. 2,502 bushels were shipped to local points. According to the figures from the Georgian Bay Ports 407,426 bushels were shipped to "Canadian Seaboard." This is 84,521 bushels less than the rail receipts at St. John, N.B. This is accounted for no doubt by some of the destinations being marked "other Canadian points" instead of "Canadian Seaboard." The amount forwarded overseas added to the quantity shipped via the St. Lawrence Ports, viz: 23,225,822 bushels, makes a total re-export of 23,717,767 bushels.

Receipts and shipments of United States grain at Canadian Public Elevators in the East during the crop year period September 1, 1923 to July 31, 1924, by grains were as follows:—

	Receipts			Shipments		
	Water	Rail	Total	Water	Rail	Total
	Bush.	Bush.	Bush.	Bush.	Bush.	Bush.

Wheat was the chief grain handled during the past period with rye second oats and corn following in the order named.

Statistics as to mill grindings in Canada, by grains, and inspection divisions, by months during the crop year 1923-24 are shown in table 91, while products produced therefrom are covered in table 92. Total grindings during the crop year were as follows:—

	Bush.
Wheat.....	92,995,487
Oats.....	12,707,533
Barley.....	1,031,703
Corn.....	1,277,783

## EXPORTS

Exports of wheat flour during the crop year 1923-24 amounted to 11,990,842 barrels, of which 4,112,356 barrels were to the United Kingdom; 184,381 barrels to the United States; and 7,694,105 barrels to other countries. The total value of flour exported amounted to \$62,080,203. During the previous crop year, exports of flour amounted to 11,069,054 barrels, valued at \$62,891,156.

Of the exports of 11,806,461 barrels of flour to the United Kingdom and countries other than the United States, 6,420,379 barrels were shipped via Canadian ports and 5,386,082 via United States ports.

Converted to a wheat basis at the rate of 4½ bushels of wheat per barrel of flour, combined exports of wheat and wheat flour during the crop year 1923-4 amounted to 343,148,851 bushels, with a total value of \$356,075,330, as compared with 279,492,557 bushels valued at \$326,710,586 during the crop year 1922-3. Of the combined exports of wheat and wheat flour, 218,582,734 bushels were shipped to the United Kingdom; 22,149,958 bushels to the United States and 102,416,159 bushels to other countries. Of the exports overseas 155,682,186 bushels were shipped via Canadian ports and 165,316,707 bushels via United States ports.

Exports of bran and shorts during the crop year 1923-4 amounted to 3,321,451 cwt. The major part of this, viz., 3,214,835 cwt. were shipped to the United States. Of this balance, 33,329 cwt. went to the United Kingdom and 73,287 cwt. to other countries.

Exports of oatmeal and rolled oats amounted to 936,602 cwt., of which 2,612 cwt. were shipped to the United States, 698,405 cwt. to the United Kingdom and 235,585 cwt. to other countries. Shipments via Canadian Seaboard ports totalled 688,812 cwt., while 245,178 cwt. were shipped via United States ports.

## SUMMARY

The following tables show the amount of wheat ground, wheat flour produced, and wheat flour exported, by months, during the crop year 1923-4, with supplementary figures for the calendar year 1924:—
