GRAIN STATISTICS, 1928

The present report on the Grain Trade of Canada was compiled in the Agricultural Branch of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada, and is the eleventh of its series.

Statistics are presented showing in detail the various channels and markets through which the grain passes from the farm to its final destination. Comparative data are included for countries other than Canada bringing the grain and cereal resources and trade of the world into review.

The first part of the report deals with the domestic movement of grain—the production, inspection and handlings at country, interior terminal, public terminal, private terminal and private and manufacturing elevators in the Western Inspection Division (comprising Fort William and Port Arthur and all territory West thereof) and at public elevators in the East. Handlings of United States grain in the Eastern elevators and of Canadian grain in the United States are covered. Records of prices at representative markets, freight rates and insurance charges are also included.

Features of earlier issues of the report have been somewhat extended and enlarged. The movement of grain from the Head of the Lakes to Buffalo and Montreal has been segregated. An arrangement was completed in March, 1925, whereby the United States Department of Commerce furnishes the Bureau monthly with statements of shipments of Canadian wheat and wheat flour from United States ports by countries of destination. These additional data are valuable for the light they throw on the export movement of grain from Canada by shipping routes and as to the countries finally importing the grain. The material in the report has been brought into final review through charts and summaries.

The report has been prepared by Mr. W. Dougan under the supervision of Mr. F. J. Horning, B.A., F.S.S., Chief of the Agricultural Branch of the Bureau.

An important portion of the data has been supplied by Mr. E. A. Ursell, Statistician of the Board of Grain Commissioners for Canada. The tables relating to the international grain trade are based upon the statistics of the International Institute of Agriculture and other official sources. The Board of Railway Commissioners has supplied the information relating to railway freight rates and revised the rates to include any change that has taken place according to the latest decision issued. The cordial thanks of the Bureau are tendered to the several departments co-operating and to elevator and other officials who have also assisted.

R. H. COATS,

Dominion Statistician.

MOVEMENT OF CANADIAN WHEAT, CROP YEAR 1927-28

Production of wheat in Canada in 1927 was estimated at 479,665,000 bushels, the largest crop harvested up to that time. The previous high record, made in 1923, was 474,199,000 bushels.

The spring of 1927 was cold and backward. Excessive moisture was also a handicap in Manitoba and Saskatchewan, and seeding was late. Weather conditions improved and rapid germination and growth overcame the early setback. Frost in August adversely affected the quality of the crop and continuous rain and snow made harvesting and threshing difficult. Improved conditions later, however, allowed operations to be carried on well into December. Inspection returns show only 30.78 per cent of the crop coming within the contract grades, while a large quantity was reported "No grade." In 1926-27 the percentage rated No. 3 or better was 42.9 and in 1925-26, 63.1, indicating the degree in which the quality had fallen off.

The following table shows the total number of cars inspected, with the percentage grading within contract grades for the crop years 1920-21 to 1927-28 inclusive.

Crop year	Total number of cars inspected	Rated grading
		No. 3 and over per cent

The number of cars inspected increased 47,298 over the previous year. During the first five months of the crop year, 177,128 cars were inspected, and 123,751 cars during the remaining seven months. Inspections during the latter period were heavier than usual, owing to the delay in harvesting and threshing mentioned above.

The number of cars unloaded at the Head of the Lakes was 200,151, an increase of 6,829 as compared with the previous year. Vancouver handlings amounted to 60,093 cars, an increase of 35,071 or 140 per cent over the previous year, while Prince Rupert unloaded 6,181 cars of wheat as against 4,412 in 1926-27.

The vessel movement from the Head of the Lakes during the period from August 1 to the close of navigation, 1928, compared with the same period last year, was as follows:—

The average cash price during the present crop year was 146.3c., which is 0.1c. more than the average of the previous year. During the opening month of the crop year, the price averaged 159.9c., which was the highest point reached. The next month, September, the average dropped

to 145.1c. and remained about that level until the months of April and May, when the price averaged 156.3c. and 157.2c. respectively. Prices fell off during June and in the closing month of the year, July, averaged 130.9c., the lowest during the crop year.

The crop in the Western Division was estimated at 456,069,950 bushels; the carryover from the previous year was 35,474,011 bushels, while the imports amounted to 403,948 bushels, making a total available for distribution of 491,947,909 bushels. The bulk of this, 357,525,410 bushels, was disposed of commercially, as exports, shipments to the Eastern Division and mill grindings for consumption and export. The exports amounted to 225,460,165 bushels, 56,831,401 bushels greater than last year.

Details of commercial shipments with comparative figures for the four previous crop years are:—

Seed requirements were 40,631,850 bushels and the amount in store at the end of the crop year was 54,835,440 bushels.

Inspection returns covered 397,160,280 bushels or 87.08 of the total crop. The elevators at the Head of the Lakes reported receipts of 261,313,956 bushels. Rail shipments from the Western Division via Armstrong, Ont. (not touching the Head of the Lakes), amounted to 66,993 bushels, while the quantity moved by rail from elevators at Fort William and Port Arthur (not including the amount ground there) was 3,465,691 bushels. The total amount shipped all rail eastward from the Western Division was 4,288,065 bushels. Deducting the first two amounts from the last, a balance of 755,381 bushels is shown to have moved eastward, in addition to the unloadings of 261,313,956 bushels at the head of the lakes, making a total of 262,069,337 bushels handled.

Shipments by lake and rail during the past two crop years may be summarized as follows:—

This wheat was shipped via Buffalo and other United States Lake ports, to the United States Atlantic Seaboard ports for export. Direct exports to the United States for consumption amounted to 8,336,479 bushels. This with 81,774 bushels exported from other ports in the Western Division to the United States makes a total of 8,418,253 bushels. Vancouver, B.C., exports amounted to 44,558,424 bushels to the United Kingdom and 34,456,124 bushels to other overseas countries, a total of 79,014,548 bushels. Prince Rupert showed an export to the United Kingdom of 3,916,089 bushels and to other overseas countries of 3,665,500 bushels or 7,581,589 in all. The total export from the Western Division amounted to 225,460,165 bushels, an increase of 56,831,401 bushels. Of the total exports 178,700,804 bushels were destined to the United Kingdom and 38,341,108 to other overseas countries.

The crop in the Eastern Division amounted to 23,595,050 bushels a decrease of 1,476,938 bushels from the previous year. The carryover was 12,365,274 bushels, the amount shipped from the Western Division 112,883,270 bushels and the imports 69,360 bushels. This makes a total of 148,912,954 bushels available for distribution.

Prince Rupert, B.C., exported 7,581,589 bushels of which 3,916,089 bushels went to the United Kingdom and 3,665,500 bushels to other overseas countries.

The total export of wheat from Canada during the crop year 1927-28 amounted to 288,567,390 bushels. Of this amount 144,205,990 bushels were shipped via Canadian ports, while 40,388,023 bushels were transhipped from Buffalo to Montreal making 184,594,013 bushels shipped via Canadian ports. Exports via United States ports are shown to be 135,929,070 bushels including the above 40,388,023 bushels. Deducting this amount leaves 95,541,047 bushels actually going via these ports. The balance of 8,432,330 bushels consisted of direct exports to the United States.

Vancouver and Prince Rupert show a combined export of 86,596,137 bushels or 30 per cent of the total export. The balance 97,997,876 bushels moved via Canadian Atlantic Seaboard ports.

The amount exported from the Eastern Division to the United States for consumption amounted to only 14,077 bushels. Exports overseas via inland customs ports of exit were 5,483,295 bushels, 5,102,327 going to United Kingdom and 380,968 bushels to other overseas countries. These shipments left Eastern Canada through the following ports of exit in Ontario and Quebec:—Coaticook, 2,259,801 bushels; Welland, 1,263,660 bushels; Niagara Falls, 819,708 bushels; Bridgeburg, 421,181 bushels; St. John's, P.Q., 384,664 bushels; Sutton, P.Q., 308,412 bushels; St. Armand, 18,950 bushels; Prescott, 6,919 bushels. Shipments overseas via Portland, Me., amounted to 2,143,065 bushels.

The bulk of Canada's export of wheat, 201,732,699 bushels, went to the United Kingdom, according to the customs returns, while other parts of the British Empire received 1,652,163 bushels and foreign countries 85,182,528 bushels. The chief importing countries other than the United Kingdom were as follows:—Netherlands 18,514,583 bushels; Germany, 12,503,521 bushels; Belgium, 12,223,681 bushels; Japan, 10,435,913 bushels; United States, 8,432,330

bushels; Italy, 8,231,806 bushels; Greece, 3,887,173 bushels; France, 3,052,604 bushels; and Switzerland, 2,340,045 bushels.

The destinations of export shipments shown above have been taken from Canadian customs returns, but it has been found that the total of 201,732,699 bushels shown going to United Kingdom includes quantities later diverted to other countries. According to returns of the United States Department of Commerce, the amount forwarded to the United Kingdom via United States Atlantic Seaboard ports was 44,666,861 bushels, the balance being diverted to other overseas countries. This added to the amount shipped through Canadian Seaboard ports, viz., 66,404,081 bushels, makes a total of 111,070,942 bushels actually shipped to the United Kingdom instead of 201,732,699 as stated above.

Comparative figures of export shipments overseas via Canadian and United States Seaboard ports are as follows:—

The difference between the movement via Canadian ports and United States ports as originally shown is 8,276,920 bushels in favour of the former. The amount transhipped from Buffalo was 40,388,023 bushels. After this deduction has been made, the balance in favour of Canadian ports is increased to 89,052,966 bushels.

According to returns of the United States Department of Commerce, 74,952,823 bushels were cleared from the following United States Atlantic Seaboard ports:—New York, 52,352,126 bushels; Baltimore, 10,658,362 bushels; Philadelphia, 7,298,572 bushels; Boston, 2,572,071 bushels; Portland, 1,901,972 bushels; Norfolk, Va., 169,720 bushels. The difference between actual clearances and the amount shown exported via United States ports by Canadian customs returns, viz., 135,929,070 bushels, is 60,976,247 bushels. The amount re-routed from Buffalo was 40,388,023 bushels.

Canadian wheat ground in bond amounted to 17,868,000 bushels, while the export from Canada to the United States for consumption was 8,432,330 bushels. The difference, 9,435,670 bushels, consisted of wheat billed for shipment overseas but diverted and ground in bond for final export as flour. Stocks of Canadian wheat in the United States Atlantic Seaboard ports on July 27, 1928, were 1,511,375 bushels.

During the crop year 1927-28 Canada maintained her leading place as an exporter of wheat, the total being 288,567,390 bushels. Other important exporting countries were:—Argentina, 169,419,000 bushels; United States, 141,571,000 bushels; Australia, 50,287,000 bushels; Hungary, 12,114,000 bushels; India, 7,147,000 bushels; and Rumania, 5,423,000 bushels.

Complete data showing the movement of wheat and other grains by inspection divisions and for Canada as a whole are contained in tables 88, 89 and 90, pages 133 to 135. Summaries of the handling of grain by the different classes of elevators—country, private and manufacturing, interior terminal, public terminal, private terminal and public elevators in the East—show the movement through each important grain centre in Canada during the crop year. A more detailed study of the movement can be made from these summaries.

MOVEMENT OF CANADIAN OATS, CROP YEAR 1927-28

The oat crop in Canada in 1927 was estimated at 439,712,700 bushels compared with 383,416,000 for the previous year. The production in the Western Division amounted to 273,944,705 bushels, an increase of 50,144,419 bushels over the 1926 crop, although the oat crop in Manitoba was practically a failure. Stocks of oats on hand at the beginning of the crop year amounted to 13,333,534 bushels, while imports were 3,942 bushels, making a total available for distribution of 287,282,181 bushels in the Western Division.

Only 30,716,053 bushels are accounted for commercially and according to official returns 38,576,160 bushels were inspected or 14.08 per cent of the crop. Oats are consumed largely on the farm and do not enter commercial channels to a large extent.

Elevator receipts at the Head of the Lakes amounted to 22,118,780 bushels. Lake shipments included 15,236,131 bushels for Canadian ports and 711,195 bushels for United States ports. The rail shipments from the Western Division were 8,893,978 bushels; the movement eastward not touching Fort William and Port Arthur was 2,434,999 bushels, while the amount shipped from Fort William and Port Arthur (not including mill grindings) is 3,791,264 bushels. Deducting the last two amounts from the former leaves 2,667,715 bushels which passed through the Head of the Lakes in addition to the 22,118,780 bushels received at the elevators, making the total handled 24,786,495 bushels in all.

Public elevators in the East report 2,918,283 bushels received at Lake Huron and Georgian Bay ports. Shipments out by rail amounted to 3,178,671 bushels. Port Colborne and Kingston elevators received 8,531,913 bushels by vessel and 257,730 bushels by rail. The shipments from these ports were 7,935,374 bushels by vessel and 887,212 bushels by rail. Water shipments to Montreal totalled 7,925,924 bushels while 9,450 bushels were shipped to local points. MOVEMENT OF CANADIAN FLAXSEED, CROP YEAR 1927-28

The flaxseed crop in Canada in 1927 amounted to 4,884,600 bushels. The Western Division produced 4,791,280 bushels which, with a carryover of 1,881,085 bushels, and as there was no importation during the year, the amount available for distribution totalled 6,672,365 bushels. Returns show that 4,116,280 or 85.9 per cent of the crop was inspected.

Exports from the Western Division amounting to 2,383,961 bushels went to the United States and the amount shipped to the Eastern Division was 1,769,720 bushels, making a total of 4,153,681 bushels.

Of the 2,383,961 bushels exported from the Western Division, 2,380,281 bushels were shipped by vessel from the Head of the Lakes. The balance consisted of small quantities shipped by rail from the following provinces: Saskatchewan, 1,286 bushels; Manitoba, 1,284 bushels; Alberta, 75 bushels; and Ontario, 1,035 bushels.

Crushings in the Western Division amounted to 940,330 bushels. Seed requirements are estimated at 184,242 bushels and the amount in store at the end of the crop year was 1,264,528 bushels. This accounts for 6,542,781 bushels.

According to the elevator returns receipts at the Head of the Lakes totalled 3,361,734 bushels. Shipments by lake amounted to 3,919,142 bushels, 1,523,612 bushels going to Canadian ports and 2,395,530 bushels to United States ports. Rail shipments from the Western Division were 246,108 bushels, including 223,267 bushels moved from elevators at Fort William and Port Arthur. After deducting this amount a balance of 22,841 bushels remains to be added to the receipts at the Head of the Lakes, making a total of 3,384,575 bushels handled.

Production of flaxseed in the Eastern Division amounted to 93,320 bushels, only a slight reduction from the previous year. This with 1,769,720 bushels shipped in from the Western Division and an import of 3 bushels together with a carryover of 77,679 bushels from the previous crop makes the total available for distribution 1,940,722 bushels.

Exports from the Eastern Division were small consisting of 1,215 bushels to the United States and 482 bushels to other overseas countries. Crushings amounted to 1,642,937 bushels, and seed requirements 4,798 bushels; the amount in store at the end of the crop year was 31,819 bushels; accounting in all for 1,681,251 bushels.

MOVEMENT OF CANADIAN GRAIN, CROP YEAR 1927-28

(WHEAT, OATS, BARLEY, FLAX AND RYE)

The spring of 1927 was cold and backward in Western Canada. The weather during the period of growth was excellent for all grains, but the harvest was wet and an early snow delayed threshing operations. The production of wheat exceeded that of any previous year. Oat production was greater than in 1926, but barley, flax and rye show slight decreases.

On the map on page 26 receipts and shipments of grain by groups of elevators are shown in the form of a series of pools. It has been found impossible to specify the different destinations of the shipments individually, and the alternative is used of grouping the ports under the following headings: "Canadian Seaboard," "Other Canadian Ports," "United States Seaboard" and "Other United States Ports."

Total grain received and shipped at western elevators and loading platforms was as follows:—

	Receipts		Shipments	
	Wheat	Total Grain	Wheat	Total Grain
	Bush.	Bush.	Bush.	Bush.
Western Country Elevators.....	380,084,872	459,830,337	381,620,153	461,861,510
Interior Terminal Elevators.....	12,822,179	15,063,096	4,942,977	3,220,775
Private and Manufacturing Elevators.....	64,088,432	87,675,319	63,367,540	86,581,292
Loading Platforms.....	19,569,192	27,188,735	19,569,192	27,188,735
Total.....	476,564,675	589,757,487	469,499,862	578,852,312

Of the total shipments, 323,318,293 bushels were received at the Head of the Lakes, 84,458,065 bushels at Vancouver, B.C., and 8,005,918 bushels at Prince Rupert, B.C. Private and manufacturing elevators report 50,013,494 bushels as milled, manufactured or sold for feed, and shipments out of 36,567,798 bushels as grain. Of the total quantity received at the Head of the Lakes, 48,446,422 bushels were forwarded to Georgian Bay ports by vessel, 73,359,067 bushels to Port Colborne and Kingston, and 14,805,669 bushels to Montreal and Quebec direct. Rail shipments from the Head of the Lakes amounted to 13,317,733 bushels, while 5,259,536 bushels came through from private and manufacturing elevators. The total grain shipped to Canadian ports amounted to 155,148,247 bushels, while 50,400 bushels were loaded for through shipment to Europe and 262,502 bushels were lost in wrecks. Other shipments were made to the United States lake ports.

Public elevators in the East act as transfer houses or distributors and are situated at Georgian Bay, Lower Lake, St. Lawrence and Atlantic Seaboard ports. Wheat is the principal grain handled by these elevators, and in order to show its relation to the total grain movement, figures for wheat and total grain are both given.

ST. LAWRENCE PORTS

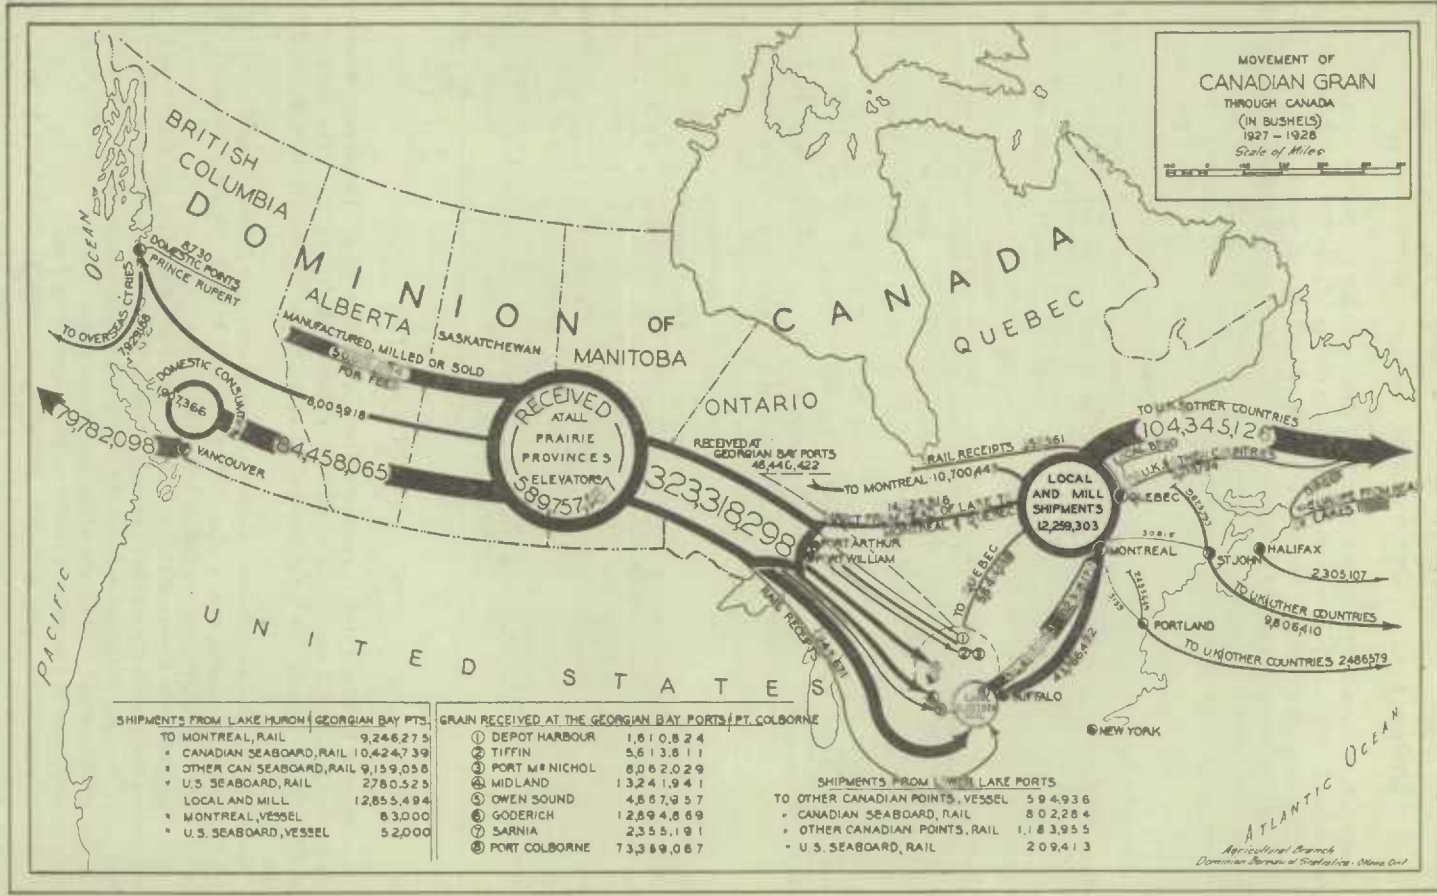

Handlings at Montreal show an increase over the previous year. The amount received at Montreal was 102,308,171 bushels by vessel and 10,700,447 bushels by rail. The carryover was 5,410,038 bushels, making the total handled 118,418,656 bushels compared with 104,216,002 bushels in 1926-27.

Port of Quebec shows a decrease. Vessel and rail receipts were 5,844,919 bushels and 950,561 bushels respectively, making with a carryover of 1,135,408 bushels, the total handled 7,930,978 bushels as against 9,870,801 bushels during the previous year.

Rail shipments from Georgian Bay and Lower Lake Ports show that 9,246,275 bushels were moved to Montreal, while the amount received according to the elevator returns was 10,700,447 bushels. Rail receipts at Quebec amounted to 950,561 bushels, compared with 339,581 bushels during the previous year. The increased movement was direct from the Prairie Provinces, shipments taking advantage of the reduced freight rate via Armstrong, Ont.

Transshipments to Montreal from Port Colborne amounted to 59,469,518 bushels; direct shipments by water from the Head of the Lakes to Montreal and Quebec were 13,952,731 bushels and 822,938 bushels respectively; rerouted grain from Buffalo accounted for 43,766,472 bushels, making a total water movement to St. Lawrence ports of 118,041,659 bushels. Receipts by vessel at the elevators in Montreal and Quebec were 102,308,171 and 5,844,919 bushels respectively,

MOVEMENT OF UNITED STATES AND ARGENTINE GRAIN THROUGH CANADA, CROP YEAR 1927-28

The map on the following page shows the movement of United States grain through Eastern Canada. The bulk of the grain is handled twice, first on its entry at the lake ports and secondly when it is finally shipped out through the St. Lawrence and Atlantic ports. As in previous years the handlings of Argentine corn are shown in addition to United States grain. Production of grain in the United States in 1927 showed a further increase as compared with 1926, which was naturally reflected in the movement of this grain through Eastern Canada. A new high record was established in the handlings of grain from the United States in Canadian elevators.

COMPARATIVE MOVEMENT WITH OTHER CROP YEARS

The following table shows the total handlings of United States grain at the Public Elevators in the East during the crop years 1923-24 to 1927-28 inclusive.

LOWER LAKE PORTS (PORT COLBORNE AND KINGSTON)

Port Colborne elevators received 33,038,517 bushels by vessel as compared with 23,232,660 bushels in the previous crop year. Included in the former amount is 770,622 bushels of Argentine corn. The carryover from the crop year 1926-27 amounted to 142,201 bushels, making the total handled 33,180,718 bushels. The bulk of this, 31,232,019 bushels, was reshipped to Montreal, while the balance of 382,181 bushels was shipped to other Canadian points. The rail shipments amounted to 1,255,691 bushels, the distribution of which was as follows:—To Canadian Seaboard ports, 81,348 bushels; local points, 295,647 bushels; United States Seaboard, 10,989 bushels; and other Canadian points, 867,707 bushels.

Kingston received 58,174 bushels of United States corn and 319,194 bushels of Argentine corn by vessel. This, with a small carryover of 4,437 bushels, makes the total handled 381,805 bushels. Shipments from Kingston totalled 363,549 bushels.

ST. LAWRENCE PORTS

According to returns made by Montreal elevators, 57,436,491 bushels were received by vessel and 23,798,750 bushels by rail. This with a carryover of 2,322,979 bushels from the previous year makes a total of 83,558,220 bushels. During the previous crop year 52,373,386 bushels were handled. Water receipts included 3,962,492 bushels of Argentine corn. The shipments from Port Colborne to Montreal were 31,232,019 bushels, while other shipments through the Welland Canal amounted to 20,911,178 bushels. Of this amount 15,190,634 bushels were transhipped from Buffalo, the balance coming direct from the United States ports of Milwaukee, Chicago and Duluth.

Shipments by vessel from Montreal to the United Kingdom and other overseas countries amounted to 76,295,113 bushels. This, with 1,885,079 bushels moved to other Canadian points and local shipments of 35,000 bushels, makes a total water movement from Montreal of 78,215,192 bushels. Rail shipments included 100,940 bushels for the Canadian Seaboard and 3,133,519 bushels used locally. The total amount shipped from Montreal was therefore 81,449,651 bushels.

Handlings at Quebec, including 686,815 bushels of Argentine corn, amounted to 1,590,424 bushels. Rail receipts were made up of 215,835 bushels of United States wheat, while water

receipts of 1,162,188 bushels included 320,438 bushels of wheat and 208,167 bushels of corn from the United States and 633,583 bushels of Argentine corn. Local requirements took 916,679 bushels and 591,273 bushels were moved out by water—536,273 bushels of United States wheat overseas and 55,000 bushels of Argentine corn to other Canadian points. With the water shipments of 78,215,192 bushels from Montreal this makes a total movement via the St. Lawrence route of 78,806,465 bushels.

CANADIAN ATLANTIC SEABOARD PORTS

The Port of Saint John, N.B., received 11,666,595 bushels of United States grain by rail and 437,156 bushels of Argentine corn by vessel. The carryover was 104,979 bushels, making the total handled 12,208,730 bushels. The shipments to overseas countries amounted to 11,494,068 bushels—969,174 bushels to United Kingdom, and 10,524,894 bushels to other overseas countries. The rail shipments included 548,304 bushels consumed locally and 2,192 bushels shipped to "Other Canadian points."

Halifax receipts were made up of 337,398 bushels of Argentine corn and 126,820 bushels of rye from the United States, which with carryover of 41,414 bushels made the total handlings 505,632 bushels. Local shipments accounted for 332,704 bushels by rail, while the rye, 126,820 bushels, was shipped to overseas countries.

Statements of rail shipments to the "Canadian Seaboard" from Georgian Bay, Lower Lake and St. Lawrence ports showed that 12,346,660 bushels were moved. This is 553,245 bushels more than shown by the rail receipts at St. John, N.B., and Halifax. The difference is accounted for by some grain being diverted to "Other Canadian points" after being billed to Canadian Seaboard. The total re-export from St. Lawrence and Seaboard ports amounted to 88,452,275 bushels, a gain of 35,627,593 bushels over the previous crop year.

Receipts and shipments of United States grain at Canadian Public Elevators in the East during the crop year August 1, 1927, to July 31, 1928, by grains were as follows:—

Converting the flour to a wheat basis at the rate of $4\frac{1}{2}$ bushels of wheat to a barrel of flour, the combined exports of wheat and wheat flour during the crop year 1927-28 amounted to the equivalent of 332,963,283 bushels of wheat, and had an aggregate value of \$441,038,200. Of

these combined exports, 215,679,171 bushels were shipped to the United Kingdom, 8,462,777 bushels to the United States and 108,821,335 bushels to other countries. Of the total exported overseas, 172,985,889 bushels were handled via Canadian ports and 151,515,617 bushels via United States ports.

Exports of oatmeal and rolled oats amounted to 445,001 cwt., as against 333,979 cwt. in the previous year, an increase of 111,122 cwt. Of this 326,841 cwt. went to the United Kingdom, 24,813 cwt. to other parts of the British Empire, 23,106 cwt. to Belgium, 28,231 cwt. to Finland and 28,933 cwt. to the Netherlands. According to returns compiled by the International Institute of Agriculture at Rome, Canada ranked second among the countries exporting wheat flour during the crop year 1927-28. The eight leading exporting countries, with the amount shipped during the twelve months August 1, 1927, to July 31, 1928, were as follows:—United States, 12,779,000 barrels; Canada, 9,866,000 barrels; Australia, 4,381,000 barrels; Hungary, 2,108,000 barrels; Argentina, 1,828,000 barrels; Japan 983,000 barrels; India, 673,000 barrels; and Rumania, 439,000 barrels.

Shipments of wheat flour from Canada within the British Empire amounted to 5,293,682 barrels, while 2,760,005 barrels were sent by the United States to corresponding destinations during the same period. This latter amount is a decrease of 366,238, while Canada shows an increase of 158,960 barrels. Foreign shipments by Canada totalled 4,572,072 barrels in 1927-28 against 4,113,111 barrels in 1926-27, while United States shipped 10,014,767 barrels and 10,333,449 barrels respectively. A comparison of the shipments made by both countries to the larger importers of wheat and wheat flour is shown in the following table:—
