## GRAIN STATISTICS, 1941-42

A summary of the production of the principal grain crops in 1941 and their distribution during the crop year 1941-1942 is contained in this annual report of the Grain Trade of Canada. Statistics relating to the movement of grain on the Great Lakes are included up to the close of navigation in December 1942. This is the 25th in a series compiled by the Agricultural Branch of the Dominion Bureau of Statistics in collaboration with the Statistics Branch of the Board of Grain Commissioners for Canada.

For security reasons the publication of export statistics was suspended early in the war, but their publication is now resumed in summarized form and appear as part of this report.

The flour milling industry in Canada is dealt with at some length. Statistics showing the quantities of wheat milled each year during a 22-year period and other data relating to the industry as a whole are tabulated.

This report was prepared by Mr. W. Dougan under the supervision of Mr. James McAnsh, Statistician, Agricultural Branch. Much of the data have been supplied by Mr. E. A. Ursell, Statistician of the Board of Grain Commissioners for Canada. The Bureau extends its thanks also to elevator operators and other officials whose co-operation has greatly assisted in the compilation of this record of Canada's grain trade.

D. A. CUDMORE,  
*Dominion Statistician.*

DOMINION BUREAU OF STATISTICS,  
OTTAWA.

January 4, 1944.

## CANADIAN GRAIN MOVEMENT, 1941-42

Drastic reduction of Canada's wheat acreage was a feature of the 1941 season. The highest wheat acreage on record had been attained in 1940, when 28,726,000 acres were seeded to wheat in the Dominion, but in view of the accumulation of surplus stocks and the need for greater production of feed grains, the Federal Government initiated an acreage policy designed to bring about a shift from wheat to other grains. Bonus payments were made to farmers who took land out of wheat and put it in summerfallow, coarse grains or grass. The net result was that wheat acreage in 1941 declined 6,844,000 acres from the 1940 level. Practically all of this reduction took place in the three Prairie Provinces, where the acreage dropped from 27,750,000 acres in 1940 to 21,140,000 acres in 1941. The Government also put a limit on the amount of wheat which farmers could deliver, either to the Canadian Wheat Board, or through the open market. This limit was 230,000,000 bushels during the period August 1, 1941 to July 31, 1942.

The growing season in 1941 was not very favourable and the wheat crop for all Canada totalled approximately 315,000,000 bushels compared with 540,000,000 in 1940. Production of feed grains was also smaller despite substantial increases in acreage, and this was particularly true of certain parts of Eastern Canada, where scarcity of feed for live stock resulted in the Dominion Government establishing the Federal Freight Assistance Policy in October 1941. Under this policy the Government paid freight on western grain shipped from Fort William and Port Arthur to the Eastern Provinces, provided such grain was utilized for the feeding of live stock and poultry. The record of claims paid during the crop year 1941-42 shows that more than 37,000,000 bushels of western wheat, oats and barley were distributed in the five Eastern Provinces. This was made up of approximately 12,000,000 bushels of wheat, 15,000,000 bushels of oats and 10,000,000 bushels of barley. Minor quantities of rye also figured in the movement, while very substantial amounts of millfeeds and screenings were distributed under the Freight Assistance Plan. The Province of British Columbia was brought under the scheme in November 1941, and approximately 3,000,000 bushels of wheat, oats and barley from the Prairie Provinces received freight assistance to the Pacific Coast province.

A surplus of 480,000,000 bushels of old wheat was on hand at the beginning of the 1941-42 crop year, so that the new crop, plus carry-over, totalled 795,000,000 bushels. Exports of both wheat and wheat flour reached a total of 222,000,000 bushels, of which 176,000,000 bushels went out in the form of grain, and the equivalent of 46,000,000 bushels in the form of wheat-flour. The use of wheat for animal feed reached a new high level during the crop year 1941-42, approximately 70,000,000 bushels disappearing in this way, including about 13,500,000 bushels of western wheat moved under the Federal Freight Assistance Policy to the five Eastern Provinces and British Columbia. The carry-over on July 31, 1942, was down to about 424,000,000 bushels, indicating a disappearance of 371,000,000 bushels during the 12 months preceding. Thus, the carry-over was reduced by 56,000,000 bushels from the record level reached a year earlier.

### WESTERN WHEAT CROP

The final estimate of the 1941 wheat crop in the three Prairie Provinces was 296,000,000 bushels. This was a reduction of 218,000,000 bushels compared with the 1940 harvest. Drought and extreme heat in the latter part of June and during July led to rapid deterioration of grain crops in both Saskatchewan and Alberta. Legislation provided that only 230,000,000 bushels of wheat could be delivered by growers in the whole of Canada during the crop year 1941-42 and producers in the West marketed a total of 227,000,000 bushels. This compared with a total of 456,000,000 bushels delivered by farmers in the three Prairie Provinces during the crop year 1940-41.

According to the annual report of the Canadian Wheat Board, wheat producers in the West delivered to the Board about 100,000,000 bushels of wheat during the crop year 1941-42.

This represented only 44 per cent of the marketings, the balance of approximately 128,000,000 bushels having been sold directly through the open market. The relatively small percentage marketed through the Canadian Wheat Board reflected the difference between the Board's initial price of 70 cents per bushel and the open market quotations which were above the Board's price throughout the year, despite the payment of farm storage by the board. Farm storage payments were made to producers at the rate of 1/45th of a cent per bushel per day commencing October 8 and affecting wheat delivered to the Board between November 1, 1941 and July 31, 1942.

A delivery quota system operated during the year. In the case of wheat this began at 5 bushels per "authorized acre" and rose rapidly to reach 15 bushels on November 21. No delivery quotations were applied to oats, barley, rye or flaxseed, and producers were permitted to deliver these without restriction. Special measures were taken regarding flaxseed when on March 5, 1942, the stocks of flaxseed in Canada were frozen and placed under the supervision of the Canadian Wheat Board. This was made necessary by the war developments in the Pacific area which jeopardized the supply of vegetable oils. The Wheat Board was given power to take title to and possession of all flaxseed in the country and to accept delivery from producers.

### EASTERN WHEAT CROP

The wheat crop in the five eastern provinces amounted to 16.7 million bushels of which 15.8 million bushels were grown in Ontario. No figures are available showing separately the distribution of this crop, but it is known that 3,962,862 bushels of Ontario winter wheat were milled during the year under review. The amount of eastern wheat retained for seed was 1,677,724 bushels and it was estimated that 11,256,000 bushels were fed on farms.

### COARSE GRAINS IN 1941

The production of oats, barley, rye and flaxseed in Canada in 1941 totalled 433.6 million bushels, of which 292.8 million bushels or 66 per cent originated in the Prairie Provinces. It is shown by figures available that only a small portion of oats and barley reached commercial channels in the form of grain. A large part of the rye crop was exported, while flaxseed was practically all sent to the Canadian crushers for the manufacture of linseed oil.

Of the coarse grain crops grown in Eastern Canada, there is little detail available for 1941-42, but as in other years a large part of the production was utilized on farms in Ontario and Quebec. Domestic distribution covering commercial stocks of western-grown grains is available, however, and the following is a summary of the quantities utilized by mills and manufacturing plants.

	Oats	Barley	Rye	Flaxseed
	Bu.	Bu.	Bu.	Bu.
To flour mills.....	13,620,478	3,991,809	470,055	.....
To feed plants, etc.....	17,014,072	11,907,474	990,559	67,903
To distilleries.....	.....	.....	578,268	.....
To breweries.....	.....	7,275,960	.....	.....
To linseed mills and paint works.....	.....	.....	.....	3,548,690
Total.....	30,634,550	23,265,243	2,038,879	3,616,593

In addition to the above, small quantities of oats, barley and rye were exported or retained for seed, while larger quantities were fed on farms. Total disappearance of coarse grains, adding exports to domestic utilization, was as follows.

	Million Bushels
Oats.....	318.5
Barley.....	109.3
Rye.....	13.2

DELIVERIES FROM FARMS

The deliveries of wheat from farms in western Canada during the crop year 1941-42 were only about half the quantity marketed during the preceding crop year. A marketing quota system on the basis in effect in 1940-41 operated for wheat only, and the first quota on deliveries effective August 1, 1941 was set at 5 bushels per authorized acre. By the term "authorized acre" is meant the wheat acreage for delivery purpose established by the Canadian Wheat Board and shown in each permit book issued to the producer.

The rates of delivery under the quota increased very rapidly and on October 16, 1941 the general quota was increased to 12 bushels, and on November 21 to 15 bushels per authorized acre. Shortly afterward, on December 4, all delivery points in the west were placed on an "open delivery" basis.

Under the Government's program for 1941-42 deliveries of wheat from the 1941 crop were limited to a total of 230 million bushels for the whole of Canada. The statistical record shows that farmers in the western provinces marketed 227,000,000 bushels of which only about 100,000,000 bushels went to the Canadian Wheat Board, while the balance was sold in the open market.

(a) Production—Final official estimate for Prairie Provinces.

(b) Primary Marketings—Points in Ontario west of Fort William are included in Manitoba figures; country points in the Peace River Valley situated in British Columbia are included in Alberta figures.

(c) Inspections—These are compiled according to provinces in which the grain was grown.

## GRAIN INSPECTIONS

The records of the Inspection Branch of the Board of Grain Commissioners show that a total of 296,490,000 bushels of wheat were inspected and graded in the western division. Of the eight points of inspection, Winnipeg handled by far the largest volume, accounting for about 85 per cent of the total western inspections. Edmonton and Calgary were next on the list, while a small volume moved through Moose Jaw, Saskatoon and Medicine Hat. Only minor quantities were inspected at Lethbridge and Vancouver.

In the following series of tables will be found the result of grain grading during the crop year 1941-42, and the quantities inspected at each of the various inspection points. A special table shows the inspections compiled by railways over which the grain was moved and by provinces in which the grain originated.

## TERMINAL ELEVATORS

A feature of the terminal elevator situation in the crop year 1941-42 was the addition of large temporary storage annexes to the terminal elevators at Fort William and Port Arthur. The annexes at the head of the lakes provided storage for another 52,000,000 bushels of grain and raised the capacity at Fort William and Port Arthur to a total exceeding 145,000,000 bushels.

As in the previous year the bulk of the movement continued to go eastward. The terminal elevators at the Pacific Coast were fairly well filled and only a small export movement was possible out of Vancouver and New Westminster. A series of tables summarizing the handling of grain at terminal elevators during the past five years, together with details of receipts and shipments, during the crop year 1941-42 is set out in the following pages.

### FORT WILLIAM AND PORT ARTHUR

TABLE 10.—Summary of receipts and shipments of grain at the Semi-Public and Private Terminal elevators, Fort William and Port Arthur, crop years 1937-38 to 1941-42

Crop Year Aug. 1 to July 31	Wheat	Oats	Barley	Rye	Flaxseed	*Mixed Grain	Canadian Western Corn	Total

## LAKE MOVEMENT OF GRAIN

The movement of grain down the Great Lakes from Fort William and Port Arthur showed some falling-off from 1941, but the volume of all grain carried by vessel from the Head of the Lakes to both Canadian and United States ports was approximately 211,000,000 bushels during the entire season of navigation in 1942. Incidentally, the season was a particularly long one, the first boats moving on the 31st of March and the last vessel leaving Fort William-Port Arthur on December 15, three days after insurance rates were lifted. The quantity of wheat shipped by water was 178,511,465 bushels, of which 143,821,853 bushels went to Canadian ports. The balance was destined for United States lake ports, and the bulk of it went to Buffalo.

In the tables that follow will be found a record of lake shipments from Fort William-Port Arthur compiled for the crop year 1941-42 and for the period of navigation during the calendar year 1942. A summary showing the number of Canadian and foreign vessels engaged in the transport of this grain is also included.

## EASTERN ELEVATORS

The bulk of the shipments by vessel from Fort William and Port Arthur again went to Georgian Bay ports during the season of navigation in 1942. Very limited amounts were shipped to the St. Lawrence ports and only one or two cargoes went as far down as Prescott. A feature of the 1941-42 crop year was the increased movement of grain by rail. A poor harvest in eastern Canada resulted in the Federal Government establishing a Freight Assistance Plan, whereby western grain was made available for feeding purposes in the five eastern provinces, the Government absorbing most of the freight from Fort William to points of consumption in the east.

A summary of the handling of grain at eastern elevators during the past five years and details of receipts and shipments in the crop year 1941-42 will be found in the tables that follow. United States and other foreign grain handled at eastern elevators appear in separate tables.

Grand Total Exported or moved into Consumptive Channels via Eastern Elevators.....	165,418,310	1,961,959	5,494,919

Georgian Bay Elevators include Goderich and Sarnia.

Lower Lake Elevators comprise Port Colborne, Humberstone, Toronto, Peterborough, Kingston and Prescott.

St. Lawrence Elevators comprise Montreal, Sorel, Three Rivers and Quebec.

NOTE.—Exports by Ports include bagged grain shipped direct to steamers from Western Canada and Eastern Elevators which did not all appear in the handlings of Eastern Elevators.

(Average of daily quotations for crop year 1941-42=158/1)

\*Under authority of Order-in-Council P.C. 1636 dated March 6, 1942 all stocks of Flaxseed were placed under control of the Canadian Wheat Board who established a fixed price basis for the balance of the crop year as follows:—

1 C.W.	\$ 1 64 per bush.
2 C.W.	1 59½ "
3 C.W.	1 54 "
4 C.W.	1 50 "

\*The following is an extract from Canadian Wheat Board instructions to trade—re flaxseed— No. 2 dated March 27, 1942. —

1. (a) All trading in flaxseed futures in Canada is hereby prohibited.

(b) All open contracts in Winnipeg, May, July, and October flaxseed futures be cleared through the Winnipeg Grain and Produce Exchange Clearing Association with the Canadian Wheat Board at \$1.64 per bushel.

## DOCKAGE

The definition of "dockage" (when applied to material intermixed with a mass of grain which might be assigned to a grade) means any material other than kernels of grain of the standard of quality as fixed by the schedules to the Canada Grain Act for that particular grain, which material is required to be and is of such a nature that can be separated from the mass in order that the same may properly be assigned to that grade. Most of this dockage is removed at the terminal elevators where cleaning facilities are available, and a record of this is kept by the Board of Grain Commissioners.

In the three tables that follow figures are compiled separately for Fort William and Port Arthur and for the various Interior and Pacific Coast terminal elevators, while a small table deals with dockage on lake shipments. It will be seen that in the case of wheat the number of bushels is quite substantial, but full allowance for this has been made in the tables covering farmers' marketings, these having been adjusted on the basis of outturns at terminal elevators to reflect net bushels.

TABLE 43.—Dockage on cars of grain received from western points at semi-public and private terminal elevators, Fort William-Port Arthur, crop year 1941-42

## WEIGHTS AND MEASURES

TABLE 47.—The following table shows the weights and measures used in Canada in connection with the principal field crops and for wheat flour

Grain—	Pounds per bushel
Wheat.....	60
Oats.....	34
Barley.....	48
Rye.....	56
Flaxseed.....	56
Corn.....	56
Buckwheat.....	48
Mixed Grains.....	50
Screenings.....	48
All others.....	60

*Wheat Flour—*

1 barrel equals 196 pounds and approximately 4.5 bushels of wheat are used in the production of a barrel of flour.

## FLOUR MILLING IN CANADA

A small increase is noted in the production of flour mills in 1941-42 over the previous year's output. The amount of wheat flour produced was 19.9 million barrels from a total of 89.3 million bushels of wheat milled during the crop year 1941-42. The wheat grindings were the third largest on record, being exceeded only by the crop year 1928-29, when a total of 94.7 million bushels of wheat were milled and in 1923-24 when 91.5 million bushels were milled into flour.

In the following table is shown the record of flour milling in Canada during the twenty crop years from 1923 to 1942 with export figures.

Aug. 1-July 31	Amount of Wheat milled	Wheat Flour including low grade produced	Wheat Flour exported
	bu.	bl.	bl.
1922-23.....	85,820,884	19,543,689	11,003,460
1923-24.....	91,546,706	20,542,400	12,021,424
1924-25.....	81,825,302	18,179,820	10,169,692
1925-26.....	85,247,552	19,024,715	10,896,654
1926-27.....	81,105,500	17,891,911	9,247,824
1927-28.....	87,612,153	19,074,007	9,865,754
1928-29.....	94,739,029	20,872,094	11,808,775
1929-30.....	70,630,963	15,757,850	6,778,023
1930-31.....	71,380,459	15,997,696	6,701,663
1931-32.....	65,431,599	14,631,504	5,383,594
1932-33.....	66,791,977	15,012,865	5,370,613
1933-34.....	66,655,667	14,942,257	5,464,636
1934-35.....	63,518,102	14,168,621	4,750,310
1935-36.....	67,772,898	14,921,562	4,978,917
1936-37.....	64,451,550	14,249,010	4,525,665
1937-38.....	57,827,593	12,897,728	3,609,656
1938-39.....	68,762,009	15,197,297	4,604,245
1939-40.....	80,411,521	17,778,311	6,781,367
1940-41.....	87,819,472	19,575,833	10,288,827
1941-42.....	89,315,195	19,905,741	10,205,778

The milling capacity in operation during the crop year showed an increase of only 1 per cent over the previous year. The monthly percentages gradually declined from the opening month of August 1941, until April 1942, when they advanced to 87.5. During the next three months, percentages registered decided decreases.

Months	Percentage of Mill Capacity in Operation	
	1941-42	1940-41
	p. c.	p. c.
August.....	82.3	53.8
September.....	74.6	76.2
October.....	69.9	80.0
November.....	79.4	70.5
December.....	71.5	47.6
January.....	71.3	51.5
February.....	73.5	68.2
March.....	77.7	64.4
April.....	87.5	74.8
May.....	67.0	94.3
June.....	60.0	96.9
July.....	68.1	93.5
Total crop year.....	73.5	72.5

Manitoba spring wheat was the chief type of wheat ground in the mills during the year accounting for over 90 per cent of the total wheat passing through the milling machinery.

The quantities of each type of wheat ground and the percentage that each represented of the total grindings are shown in the following table:

Type of Wheat	Grindings	Percentage of Total Grind
		p. c.
	bu.	
Manitoba Spring Wheat.....	80,799,840	90.5
Ontario Winter Wheat.....	3,902,802	4.4
Garnet.....	399,675	0.4
Durum.....	654,977	0.7
All other Wheat, including United States.....	3,497,841	4.0
Total.....	89,315,195	100.00

In the following tables it will be seen that in 1941 there were 1,129 plants with a daily production capacity of 98,739 barrels of flour representing a capital investment of \$59,941,631. These figures show a considerable advance over the year 1940.

Province	Number of Flour and Feed Mills	Number of Chopping Mills	Total Number of Mills	Rolls, pair	Stones, pair	Capacity of Flour Mills in Barrels per diem
CANADA.....	285	844	1,129	3,933	118	98,739
Prince Edward Island.....	6	3	9			
Nova Scotia.....	3	8	11	40	9	378
New Brunswick.....	4	16	20	18		275
Quebec.....	45	139	184	380	56	11,322
Ontario.....	101	606	707	1,798	36	50,684
Manitoba.....	31	7	38	504	5	10,246
Saskatchewan.....	45	13	58	547	12	13,317
Alberta.....	48	49	97	634		12,443
British Columbia.....	2	3	5	12		74

Total mill grindings in Canada during the crop year 1941-42 were as follows:

	Bushels
Wheat.....	89,315,195
Oats.....	16,011,733
Barley.....	3,146,198
Corn.....	2,555,691
Other grains, including mixed grain.....	26,466,455

Total flour produced amounted to 19,905,741 barrels, shorts 267,325 tons, middlings 145,529 tons, bran 273,450 tons, oatmeal 3,216,100 pounds, rolled oats 179,179,469 pounds, buckwheat flour 1,121,796 pounds, rye flour 6,711,824 pounds, cornflour and meal 18,883,830 pounds, barley, pot and pearl 4,697,854 pounds.

Total feeds were as follows:—Ground oats for feed 181,981,606 pounds, barley, feed 139,615, 818 pounds, corn cracked 75,852,106 pounds, mixed grain, feed 1,181,562,835 pounds.

Additional statistics of the industry by provinces for the calendar year 1941 may be summarized as follows:—

## GROUP 1

Grain rates apply on:

- Barley
- Buckwheat
- Corn except popping
- Oats
- Rye
- Speltz
- Wheat

## Grain Products:

- Barley cleanings
- Barley meal
- Biscuit flour
- Bran
- Breakfast foods or cereals (uncooked) in bags, barrels or cases
- Buckwheat flour
- Chopped feed
- Corn flour
- Cornmeal
- Crushed oats
- Feed grain in sacks
- Flour (made from grain only)
- Grits
- Groats
- Malt

## Middlings

- Millfeed
- Oat hulls
- Oatmeal
- Pancake flour
- Pearl Barley
- Pot barley
- Rolled oats
- Rolled wheat
- Rye flour and meal
- Shorts
- Sprouts barley
- Sweepings and Screenings
- Wheat germ
- Wheatmeal

Feed, animal and/or poultry (not medicated or condimental) containing not more than 35 per cent of the ingredients, other than grain or grain products in bags or barrels.

## GROUP 2

- Flaxseed
- Flaxseed (feed) in sacks
- Linseed meal
- Linseed oilcake
- Linseed oilcake meal

\* 584,689 bus. imported into U.S.A. under classification of Oats Scalpings.

† 1,677,357 bus. imported in July, 1941, but not included in official returns until later.

<sup>1</sup> Carry-over 31st July, 1941, does not include grain on farms and in Eastern Flour mills but includes 19,713 bus. Eastern-grown wheat in elevators.<sup>2</sup> Primary marketings—net bushels after dockage removed.<sup>3</sup> Includes shrinkage in drying, loss in wrecks, losses in transportation etc.<sup>4</sup> Carry-over 31st July, 1942, does not include grain on farms and in Eastern Flour mills but includes 60,779 bus. Eastern-grown wheat in elevators.

## GRAIN STORAGE CAPACITY

Approximately 90,000,000 bushels of storage space was added to the total grain storage capacity in Canada during the crop year 1941-42. Records of the Board of Grain Commissioners show that between December 1, 1940 and December 1, 1941 licensed storage rose from 509,000,000 bushels to 599,000,000 bushels. More than 50 per cent of this increase occurred at Fort William and Port Arthur, where large temporary annexes with a capacity of approximately 52,000,000 bushels came into use in the fall of 1941. Substantial additions were made also to the temporary annexes attached to country elevators in the three Prairie Provinces, the increase in Manitoba being almost 8,000,000 bushels, in Saskatchewan 8,000,000 bushels and in Alberta more than 19,000,000 bushels. New temporary storage was erected also to the extent of 6,000,000 bushels at eastern elevators.

TABLE 78.—Summary of the Total Licensed Storage Capacity by Provinces, Season 1941-42. As at 1st December, 1941

**CARRY-OVER OF CANADIAN WHEAT AND COARSE GRAINS IN CANADA  
AND THE UNITED STATES, 1921 TO 1942**

The figures shown below are not entirely comparable, and the following omissions should be noted. The Canadian carry-over figures from 1921 to 1923 do not include grain afloat on Canadian Lake and St. Lawrence Ports, rail transit in these years being reported only. From 1921 to 1931, grain afloat to U.S. Ports was not reported. For the year 1932 to 1941, this item is included in the second column below. Stocks of Canadian grain in U.S. Lake and Seaboard Ports from 1921 to 1931 are not exact month-end figures, but rather are for the week-end nearest the crop year-end for each of those years.
