Statistics Branch

GRAIN TRADE OF CANADA 1959-60

Published by Authority of The Honourable George Hees, Minister of Trade and Commerce

PREFATORY NOTE

This report has been prepared by the Agriculture Division of the Dominion Bureau of Statistics in collaboration with the Statistics Branch of the Board of Grain Commissioners. Grateful acknowledgement is made to the Canadian Wheat Board, to mill and elevator operators and to many other agencies and officials for their co-operation.

GRAIN TRADE OF CANADA

1959-60

CANADIAN GRAIN SUPPLIES AND MOVEMENT

World grain supplies in 1959-60 registered a 1 per cent increase over the record level of the preceding year, with an increase in carry-in stocks more than offsetting a slight decline in production. Estimated stocks of wheat, tye, barley, oats and corn in the four traditional major exporting countries (United States, Canada, Argentina and Australia) at July 1, 1959 amounted to 139.5 million metric tons, exceeding by 12 per cent the July 1, 1958 total of 124,3 million and representing the seventh consecutive year of increase. Total world production of the same five grains in 1959 was estimated at some 589.1 million metric tons, 2 per cent lower than the 1958 outturn of 599.5 million. Production of breadgrains decreased by 6 per cent and reflected smaller outturns for both wheat and rye, World wheat production declined from the record level of 236.8 million metric tons in 1958 to 221.8 million in 1959, with most of the decrease occurring in the United States. World rye production amounted to 36.6 million metric tons compared with the 1958 harvest of 37.2 million. Production of oats, at 57.4 million metric tons, and barley, at 71.2 million, were both below the comparable 1958 totals of 65.7 million and 72.0 million metric tons, respectively. Production of corn amounted to a record 202.1 million metric tons, 8 per cent greater than the 1958 level of 187.8 million.

World exports of wheat, wheat flour in terms of grain, rye, oats, barley and corn during the 1959-60 (July-June) crop year amounted to some 50.9 million metric tons, representing an increase of 5 per cent over the 1958-59 total of 48.3 million. World trade in wheat and wheat flour in terms of grain in 1959-60 exceeded the level of the preceding year due almost entirely to larger exports of wheat while flour movement showed relatively little change. According to "World Grain Trade Statistics", published by the Food and Agriculture Organization in Rome, the 1959-60 (July-June) world trade in wheat and wheat flour in terms of grain equivalent (excluding trade within the Communist Block) amounted to 31.9 million metric tons, an increase of 3 per cent over the 1958-59 total of 30.8 million. The "Review of the World Wheat Situation", November 1960, published by the International Wheat Council placed total world trade in wheat and wheat flour in 1959-60 at 36 million metric tons (including estimates for the U.S.S.R. and Eastern Europe), compared with 35.3 million tons in the preceding year. It should be pointed out, however, that one of the major factors underlying the increase in world wheat trade in recent years has been the expansion of government-assisted programmes, as opposed to strictly commercial transactions. This applies particularly to the United States. In the July-June, 1959-60 crop year approximately three quarters of the United States exports of wheat and flour in terms of wheat were reported shipped under government programmes, such as for local currency, with about one-quarter (or some 132 million bushels) exported for dollars. Regarding the commercial market for wheat, Canada's share has increased from a long-term average of about 30 per cent to some 35 per cent in recent years, Of Canada's wheat and flour exports during the August-July, 1959-60 crop year more than 95 per cent (or some 264 million bushels) was sold on normal commercial terms. Based on total figures, and again reflecting the influence of exports under government programmes, the United States retained its position as the leading world exporter of wheat (including flour), accounting for some 43 per cent of the 1959-60 (July-June) total world trade in these commodities. A rather notable change occurred in the pattern of the international wheat trade in 1959-60 with exports to western Europe declining and those to Asian areas increasing. World exports of tye in 1959-60 were placed at 820 thousand metric tons compared with 740 thousand exported during the preceding year. Reflecting the increased export movement of wheat, flour and rye, the total international trade in breadgrains, (based on FAO data), at 32.7 million metric tons, was 4 per cent greater than the 31.6 million moved

International trade in coarse grains (oats, barley and corn), reflecting the continued high levels of world cattle and hog numbers, increased by 9 per cent from 16.7 million metric tons

in 1958-59 to 18.2 million in 1959-60. Although world exports of barley declined by 7 per cent, this was more than offset by increases of 11 per cent and 19 per cent in shipments of oats and corn, respectively. World trade in grain sorghum, which has recently attained relatively significant proportions, registered a slight increase from approximately 3.0 million tons in 1958-59 to 3.1 million in 1959-60.

In addition to wheat, flour and the feed grains, shipments of flaxseed and oil in terms of seed from the four major exporting countries (Canada, United States, Argentina and India) amounted to 1,153 thousand metric tons in 1959-60 compared with 1,055 thousand in 1958-59.

Based on the crop year (August-July) exports of Canadian grain and grain products during 1959-60 amounted to 281.8 million bushels of breadgrains and 69.8 million of feed grains (oats and barley) representing approximately 23 per cent of the world trade in breadgrains and 9 per cent of the trade in feed grains (including corn). In 1958-59 Canadian exports of these same commodities were the equivalent of 26 per cent of the International trade in breadgrains and 11 per cent of the non-breadgrains. The 12.7 million bushels of Canadian flaxseed and oil in terms of seed shipped during August-July 1959-60 equalled approximately 28 per cent of the July-June clearances from the four major exporters and represented a decrease of about 13 per cent from the corresponding 1958-59 level.

Crop conditions across Canada were variable in 1959 and, although drought was a problem in the Prairie Provinces for the third successive year, heavy general rains in late June helped to alleviate this situation. Hail losses were light but insect outbreaks required extensive control measures. It appeared for a time that the Prairie crop would be taken off early and in good condition, but unseasonable snow storms and wet weather interrupted operations, and as a result, some 56 million bushels of wheat, 26 million bushels of oats and barley and 2.6 million bushels of flaxseed had to be left in the fields over winter. Harvesting of the over-wintered grain was largely completed by early May and a satisfactory recovery was reported from most areas, although some ioss of yield and grade dld occur. The pressure on Canada's grain handling and storage facilities remained great, with the cumulative effect of five bumper crops in the six-year period 1951 - 56 only partially offset by reduced production in the three years 1957-59. In addition, a large quantity of the 1959 grain crop was harvested in tough or damp condition and marketing quotas had to be adjusted to bring this grain forward for terminal drying. Marketing of and payments for wheat, oats and barley continued under the compulsory crop year pools system under the jurisdiction of the Canadian Wheat Board.

With decreases recorded for carryover stocks of wheat, oats and rye, total carryover stocks of the five principal Canadian grains declined from the 1958-59 level. Total production of these grains increased by 3 per cent in 1959, due to larger outturns of wheat, oats and rye. The effect of smaller carryovers, however, more than offset the increase in production and as a result, total estimated domestic supplies of wheat, oats, barley, tye and flaxseed in 1959-60 at 1,893.6 million bushels. represented a decline of 4 per cent from the 1958-59 combined total of 1,976.6. Domestic supplies of wheat, consisting of the August 1 carryover of 549.0 million bushels and the 1959 crop of 413.5 million amounted to 962.5 million bushels, 5 per cent less than the 1958-59 total of 1,011.2 million and 16 per cent below the record 1956-57 domestic supplies of 1,152.8 million bushels. This was the first time since 1954-55 that total supplies slipped below the billion bushel level. Supplies of oats, at 536.9 million bushels, were 19.0 million less than the 1958-59 level, while barley supplies, totalling 353.7 million bushels, represented a small decrease from those of the preceding year. Supplies of rye, in the 1959-60 crop year, amounted to 16.1 million bushels compared with 18.1 million in 1958-59. Flaxseed supplies, reflecting reduced production, totalled 24.4 million bushels, 15 per cent less than the 1958-59 figure of 28.5 million,

Total marketings of the five major grains by farmers in the Prairie Provinces, during the crop year 1959-60, amounted to 516.7 million bushels representing a decrease of 6 per cent from the comparable 1958-59 level of 552.0 million and 13 per cent less than the ten-year (1948-49-1957-58) average of 595.5 million.

Total exports of the five major grains and their products in 1959-60 amounted to 364.1 million bushels of grain equivalent representing a decline of 7 per cent from the 1958-59 movement of 390.0 million and 10 per cent less than the 10-year (1948-49-1957-58) average of 404.7 million, but 13 per cent greater than the long-term (1928-29-1957-58) average of 323.2 million bushels. The 1959-60 total exports of Canadian grain and grain products fell short of the 1958-59 level due to reduced shipments of each of the grains with the exception of rye. Exports of wheat and wheat flour in terms of grain equivalent, at 277.3 million bushels, represented a decrease of 6 per cent from the 294.5 million bushel level of the preceding year. Shipments of the feed grains, including milled and processed products, amounted to 6.1 million bushels of oats and 63.8 million of barley, with both grains registering decreases from the 1958-59 totals of 7.5 million and 70.4 million bushels, respectively. Exports of rye increased from 3.2 million bushels in 1958-59 to 4.5 million in 1959-60. Clearances of flaxseed amounted to 12.5 million bushels 12 per cent below the 1958-59 level of 14.3 million.

The crop year 1959-60 coincided with the first year of the fourth three-year International Wheat Agreement. In the preceding agreements, exporting countries undertook to supply guaranteed quantities to importing countries when prices reached the maximum price; and importing countries undertook to purchase guaranteed quantities from exporting countries when prices reached the minimum price. This was abandoned in favour of a continuing obligation by individual importing countries to purchase when prices are below the maximum price a specified percentage, set out in an annex to the new agreement, of their annual commercial imports. Sales under the agreement were quite widely distributed with 30 of the 34 importing countries included in the pact purchasing wheat and/or flour from Canada. The return of the United Kingdom to the International Wheat Agreement, for the first time since 1952-53, resulted in a substantial increase in Canadian sales under the Agreement. Purchases of Canadian wheat and flour under the terms of the International Wheat Agreement amounted to the equivalent of 235.2 million bushels during 1959-60 and accounted for 42 per cent of all sales by the nine exporting countries participating in the Agreement. The leading market for Canadian wheat and flour under the new Agreement was the United Kingdom with shipments to that country, at some 93.6 million bushels, accounting for 41 per cent of the total Canadian exports under the International Wheat Agreement. Other major importers of Canadian wheat and wheat flour through the media of the International Wheat Agreement were Japan, 46.8 million bushels, the Federal Republic of Germany, 24.9 million; Belgium-Luxembourg, 10.9 million; Switzerland, 7.8; the Netherlands, 7.9 million: Union of South Africa, 6.7 million; and the Philippines, 6.2 million. Exports of Canadian Class II wheat were sharply reduced, and reflected the re-entry of the United Kingdom to the International Wheat Agreement. The larger importers of Class II wheat in 1959-60 were as follows, in millions of bushels: France, 5.5; Poland, 4.9 and United States, 3.6.

Exports of bulk wheat during the 1959-60 season amounted to 234.7 million bushels, 7 per cent less than the 1958-59 level of 252.2 million and 1 per cent below the ten-year (1948-49-1957-58) average of 237.6 million. The decline of 17.5 million bushels in exports of wheat in bulk was largely due to reduced shipments to the United Kingdom, the Federal Republic of Germany, and India while those to Japan attained record proportions. The United Kingdom, although remaining in its position as Canada's principal market for wheat in bulk, decreased purchases of Canadlan wheat from 87.0 million bushels in 1958-59 to a total of 80.0 million during 1959-60. Shipments to the Federal Republic of Germany, at 24.9 million bushels. and to India, at 4.8 million, were both sharply reduced from the 1958-59 levels of 35.0 million and 11.4 million bushels, respectively. At the same time, exports of wheat to Japan were the largest ever and amounted to some 45.7 million bushels compared with 41.0 million in 1958-59. In addition, twenty-one other countries purchased Canadian wheat in bulk in amounts exceeding one million bushels. These countries with quantities imported during the 1959-60 crop year were as follows in

millions of bushels: Belgium, 10.7; Netherlands, 7.9; Switzerland, 7.8; Union of South Africa, 6.7; France, 5.5; Poland, 4.9; Norway, 3.7; Venezuela, 3.5; Austria, 3.5; Iraq, 2.5; Peru, 2.3; Algeria, 2.3; Pakistan, 2.2; Italy, 2.2; United States, 2.1; Israel, 1.5; Philippines, 1.5; Ecuador, 1.4; Ireland, 1.3; Malta, 1.3; and Finland, 1.3. Total wheat shipments to Commonwealth countries, including the United Kingdom amounted to 95.6 million bushels, while those to non-Commonwealth countries totalled 139.2 million. Of the 232.6 million bushels of bulk wheat shipped to overseas destinations, some 92.2 million were cleared from Vancouver-New Westminster. The next largest amount, 48.3 million bushels, was shipped from Montreal while clearances from the Port of Churchill amounted to 21.7 million. Most of the remainder was accounted for by the following St. Lawrence and Atlantic Ports with quantities shipped in millions of bushels: Sorel, 16.8; West Saint John, 12.6; Three Rivers, 11.4; Halifax, 9.9; Fort William-Port Arthur direct, 7.3; and Quebec 7.0.

Exports of bagged seed wheat, based on adjusted Customs returns, amounted to some 5.6 million bushels, with United States being the principal market.

The export movement of Canadian wheat flour during the 1959-60 crop year amounted to 16.1 million hundredweight (37.0 million bushels of wheat equivalent), practically unchanged from the 1958-59 crop year total of 16.1 million hundredweight (37.1 million bushels of wheat equivalent). As with bulk wheat, the United Kingdom was Canada's best customer for wheat flour, taking 5.9 million hundredweight or 13.6 million bushels of wheat equivalent, and accounting for 37 per cent of the total crop year movement. Seven other countries or colonies each purchased Canadian wheat flour equivalent to at least one million bushels of wheat. These countries or colonies in order of their volume of purchases and with quantities in millions of bushels of wheat equivalent, were as follows: Philippines, 4.7; Trinidad and Tobago, 1.9; Ghana, 1.7; Jamaica, 1.7; United States, 1.5; Japan, 1.2; and Leeward and Windward Islands, 1.1.

Combined exports of oats, barley, rye and flaxseed (including exports of rolled oats and oatmeal, malt and pot and pearl barley in terms of grain equivalent) amounted to 86.8 million bushels during the crop year 1959-60, some 9 per cent below the comparable 1958-59 level of 95.5 million and 28 per cent less than the ten-year (1948-49-1957-58) average of 120.3 million bushels. Rye was the only one of the four grains exported in greater volume than in 1958-59.

Canadian oats exports in 1959-60 amounted to 5.6 million bushels, representing a slight decline from the preceding year's total of 7.1 million. The Federal Republic of Germany and the Netherlands with imports of 2.2 million and 1.2 million bushels, respectively, absorbed the bulk of the 4.5 million bushels exported overseas. Shipments to the United Kingdom amounted to only 0.6 million bushels. United States imports of Canadian oats accounted for 1.1 million bushels, approximately the same as in 1958-59. Canadian Customs exports of rolled oats in terms of grain equivalent during 1959-60 amounted to 0.5 million bushels, relatively unchanged from the previous year.

Exports of barley from Canada in the crop year 1959-60 amounted to 57.7 million bushels compared with 64.4 million in the preceding year. Three of the major importers increased their purchases during 1959-60: United States by 3.4 million, Germany by almost 4.0 million and Poland by 1.0 million bushels. The United Kingdom, still taking more than half the total of Canadian barley exports, accounted for shipments amounting to 30.1 million bushels. There were no exports of Canadian barley to Japan in 1959-60, however, the temporary loss of this market was somewhat anticipated due to the excellent crops of rice in Japan and other nations of the Pacific area. Canadian Customs exports of malt and pot and pearl barley amounted to the equivalent of 6.1 million bushels during the crop year 1959-60, the same as in 1958-59.

Exports of Canadian rye in the crop year 1959-60 registered an improved volume of 4.5 million bushels and represented a gain of 1.3 million over the preceding crop year. Principal increase was reflected in shipments to the United States, 4.1 million bushels as against 2.1 million in 1958-59. The overseas clearances dropped from 1.1 million bushels to only 0.5 million shipped to the United Kingdom, the Federal Republic of Germany and Japan.

Exports of Canadian flaxseed moving overseas during 1959-60 amounted to 12.5 million bushels compared with 14.3

million during the previous year. The number of countries importing flaxseed from Canada actually increased to fourteen, with Denmark, Italy and Spain reappearing as overseas customers. The United Kingdom, with imports amounting to 5.3

million bushels, was the leading market for Canadian flaxseed, followed by Japan and the Netherlands with 2.7 million and 1.5 million bushels, respectively.

WESTERN WHEAT CROP

Reflecting the combined effect of an increase in the average yield per acre from 17.1 bushels in 1958 to 17.7 bushels in 1959 as well as an expansion of 2.3 million acres in seeded acreage, production of wheat in the Prairie Provinces in 1959 was estimated at 399 million bushels, 15 per cent more than the 1958 outturn of 346 million but 14 per cent below the ten-year (1949-58) average of 466 million. Production by provinces, in millions of bushels, was estimated as follows: Saskatchewan, 232; Alberta, 107; and Manitoba, 60.

Under the terms of the Temporary Wheat Reserves Act, the carrying costs of temporary wheat reserves owned by the Canadian Wheat Board in respect to Board stocks of wheat in excess of 178 million bushels at the commencement of a crop year were paid for by the Minister of Finance out of the consolidated revenue fund. On the basis of stocks owned by the Canadian Wheat Board on August 1, 1959 payments to the Board's Account under the Temporary Wheat Reserves Act amounted to \$43,604,072.28. Of this amount \$32,410,770.86 was allocated to the 1958-59 pool and \$11,193,301.42 to the 1959-60 pool.

There were no amendments to the Canadian Wheat Board Act during the crop year 1959-60, but two Acts relative to marketing of western grain, the Prairie Grain Provisional Payments Act and Prairie Grain Loans Act, were passed. The Prairie Grain Provisional Payments Act was enacted in January and proclaimed on February 1, 1960. Under the terms of this legislation the Board was authorized to make Provisional Payments to producers for the 1959-60 crop year in respect of unthreshed wheat, oats and barley, at the rate of 50 cents per bushel for wheat, 20 cents per bushel for oats and 35 cents per bushel for barley. Each Provisional Payment was subject to a limitation of the deliverable quantity of grain and to a maximum amount of \$1,500.00, with a further stipulation that the aggregate of a Provisional Payment to a producer and the Advance Payment made to him in respect of the 1959-60 crop year under the Prairie Grain Advance Payments Act shall not exceed \$3,000.00. Total advances under this legislation between February 1 and July 31, 1960 amounted to \$1,025,839.00 and at the year-end date there was an amount of \$291,211.00 still to be refunded. The Prairie Grain Advance Payments Act, which came into force on November 25, 1957, differed from the Provisional Payments Act in that it authorized payments to producers on farm-stored wheat, oats and barley and to a maximum of \$3,000. The rates per bushel were the same as those prevailing under the Provisional Payments Act. Loans made under the terms of the Advance Payments Act amounted to \$38,492,505,00 in 1959 - 60 and advances repaid during the crop year amounted to \$35,897,247.00.

The Prairie Grain Loans Act was passed January 21, 1960 and provided for government guaranteed bank loans on the security of both threshed and unthreshed grain of any kind, including flaxseed and rapeseed. Repayments were to be made out of deliveries. Loans were obtainable until June 1, 1960 with a maximum of \$1,500.00 per farmer. From January 21 to May 31, 1960, 64 loans totalling \$34,210 were granted. There were 53 in Saskatchewan amounting to \$26,703; nine in Manitoba totalling \$6,642; and two in Alberta amounting to \$865.

On November 27, 1959, Prime Minister Diefenbaker announced a program of assistance to western farmers who had been unable to harvest at least 50 per cent of their field crops due to abnormal and unseasonable snow storms. To provide some compensation such farmers, who would suffer a considerable loss even if they were able to salvage a large proportion of their crop in the spring, the federal government offered to share on a 50-50 basis with each of the three Prairie Provinces a payment of up to \$3.00 per acre on a maximum of 200 acres per farmer, for unthreshed crops of wheat, oats, barley, rye and flax, Various scales of payment were established by the individual provinces, details of which may be found in "Canadian Agriculture In 1959", a Chronology of Federal Policies, pages 72, 73 and 74.

Acreage payments were again distributed in 1959-60. These payments to western grain producers were on the basis of \$1 per specified acre on up to two hundred acres per farm

and including acreage seeded to flaxseed. The Hon. Alvin Hamilton, Minister of Agriculture, announced on March 9, 1961 that with more than 99 per cent of the cheques mailed by February 24, the total of 227,520 western grain producers had received \$40,411,302.00 in acreage payments. The special acreage payment on the 1959-60 crop was the second of its kind, the previous payment being on the 1957-58 crop. Details of the special payments of \$1 per acre up to a maximum of 200 acres are given by provinces in order of claims, values and average amounts: Manitoba 42,712-\$7,190,148-\$168.30; Saskatchewan 106,079-\$19,732,906-\$186.00; Alberta 76,965-\$13,203,028-\$171.50; British Columbia 1,763-\$285,090-\$161.70 and Ontario 1-\$130.

Marketing of Western Canadian Wheat during the crop year 1959-60 was again conducted by the Canadian Wheat Board on a one-year pool basis, with the initial payment remaining at \$1.40 per bushel basis No. 1 Northern in store Fort William-Port Arthur or Vancouver. No adjustment payments on 1959-60 deliveries were made during the crop year but on February 14. 1961 an interim payment on the 1959-60 pool account for wheat was announced. As in the preceding year, this payment was based on 10 cents per bushel for all grades and the full amount of this payment was some \$37.7 million. The final payment (announced on June 21, 1961) amounted to some \$45.3 million after providing for Board operating costs, including carrying charges in country and terminal elevators and Board administrative expenses and a 1 per cent Prairie Farm Assistance Act levy. The average final payment amounted to the equivalent of 12.017 cents per bushel while the total payment for No. 1 Northern basis in store Fort William-Port Arthur or Vancouver and prior to deduction of P.F.A.A. levy amounted to \$1.58999

On July 28, 1959 the Canadian Wheat Board announced the main features of the delivery quota policy for the 1959-60 crop year for western grain. As in the preceding season an initial unit quota of 100 units was in effect at local delivery points at the beginning of the marketing year. Permit holders were entitled to deliver a maximum of 300 bushels of wheat or 800 bushels of oats or 500 bushels of barley or 500 bushels of tye or any combination of these grains which, when calculated on a unit basis, did not exceed 100 units. Deliveries of flaxseed were subject to an initial quota of five hushels per seeded acre, effective August 1, 1959. The initial unit quota was followed by general delivery quotas, based upon bushels per specified acreage and the removal of the flaxseed quota on October 13, 1959. Specified acreage consisted of each permit holder's acreage seeded to wheat (including Durums), oats, barley and tye, as well as summerfallow and eligible acreage seeded to cultivated grasses and forage crops. The crop year ended with 45 stations on a six-bushel quota and 1,962 stations on a quota of seven bushels per specified acre. During the crop year a number of supplementary delivery quotas were issued on oats and barley. The amount of grain marketed under these special authorizations was, of course, in addition to the quantities of oats and barley which producers chose to deliver under the initial and general quota policies. On July 28, 1960 the Board advised that all delivery quotas in effect in the 1959-60 crop year including specified acreage quotas, supplementary quotas on oats, open quota on flaxseed and all special permit authorizations, would automatically expire as at the close of business July 31, 1960.

Inspections of wheat in the Western Division during the crop year amounted to 198,000 carloads compared with 185,000 inspected in 1958-59. Fort William-Port Arthur, the principal inspection center, accounted for 110,000 carloads, representing 56 per cent of the total inspections for 1959-60. The quality of the 1959-60 marketings of wheat, as indicated by the proportions falling into the higher grades, was below that of the two preceding years. Sixty-seven per cent of the wheat inspected during the crop year graded Nos. 1 to 4 Northern compared with 77 per cent in 1958-59 and 75 per cent in 1957-58. Reflecting the adverse harvesting conditions in 1959, moisture content was sharply higher with 12.8 per cent of all grades and varieties grading "Toughs" and 6.1 per cent grading "Damps" compared with 7.8 per cent and 0.5 per cent, respectively, in 1958-59.

EASTERN WHEAT CROP

Production of wheat in Eastern Canada in 1959, reflecting a severe winterkiil, was estimated at 13.4 million bushels, 46 per cent less than in 1958. With the exception of an estimated 488,000 bushels produced in Quebec and the Maritime Provinces, all of the 1959 Eastern wheat crop was grown in Ontario. All but 403,000 bushels of the Ontario crop of 12.9 million was winter wheat, yielding an average of 29.3 bushels per acre.

The quantity of Ontario winter wheat milled into flour during 1959-60 amounted to 5,680,000 bushels, 10 per cent below the 6,332,000 bushels milled in 1958-59. Deliverles of Ontario winter wheat from farms were governed by the regulations of the Ontario Wheat Producers' Marketing Board and in the crop year 1959-60 amounted to some 5.5 million bushels.

OATS, BARLEY, RYE AND FLAXSEED

Outturns of oats and rye in Canada in 1959 exceeded their comparable 1958 levels while production of barley and flax-seed were below those of the preceding year. The largest increase, some 16.9 million bushels, occurred in production of oats, with the all-Canada outturn of this crop placed at 417.9 million bushels, 4 per cent more than the 1958 harvest of 401.0 million. Production of barley, estimated at 225.6 million bushels, was some 8 per cent lower than the 1958 outturn of 244.8 million. Production of oats and barley in the Prairie Provinces amounted to 263 million and 219 million bushels, respectively. The 8.1 million bushels of rye produced in Canada in 1959 was 2 per cent more than the 1958 crop of 8.0 million. Flaxseed production, at 17.7 million bushels, represented a decrease of 22 per cent from the 22.8 million harvested in 1958.

Marketing of Western Canadian oats and barley was again carried on through compulsory crop-year pools, administered by the Canadian Wheat Board. During the crop year a number of supplementary delivery quotas were issued on oats and barley (for details of these supplementary quotas see "Report of the Canadian Wheat Board, crop year 1959-60). The amount of grain marketed under these special authorizations was, of course, in addition to the quantities of oats and barley which producers chose to deliver under the initial and general quota policies outlined in the foregoing section on "Western Wheat Crop".

The initial payment of oats in the 1959-60 crop year basis No. 2 C.W. in store Fort William-Port Arthur, was 60 cents per bushel, the same as in 1958-59. The initial payment for barley basis No. 3 C.W. Six-Row, in store Fort William-Port Arthur, at 96 cents per bushel, was also unchanged from

that of 1958-59. No interim payments were made on either grain during the crop year. Final payment on the 1959-60 oat pool was announced on February 13. The final surplus for distribution was some \$3.9 million and based on 23,700,000 bushels delivered to the 1959-60 pool averaged 16.281 cents per bushel. The final payment on the 1959-60 barley pool was announced on April 20 and based on deliveries of 94,900,000 bushels and a final payment to producers of some \$2 million, the average payment was 2.131 cents per bushel, after deduction of Board operating costs, including carrying charges in country and terminal elevators, Board administrative costs, etc., but before deducting one per cent P.F.A.A. levy. Total prices (basis in store Fort William-Port Arthur) realized by producers for representative grades after deduction of the aiready mentioned expenses but before deducting the one per cent P.F.A.A. levy were \$0.77146 per bushel for No. 2 C.W. oats and \$0.71045 per bushel for No. 1 Feed oats and \$0.98195 per bushel for No. 3 C.W. Six-Row barley and \$0.88194 per bushel for No. 1 Feed

Deliveries of the various grains from Western farms in 1959-60 in millions of bushels, with the 1958-59 figures in brackets, were as follows: oats, 24.3 (39.3); barley, 95.6 (122.8); rye, 4.3 (4.7); and flaxseed, 14.0 (17.5). Based on Board of Grain Commissioners' inspections during the crop year 1959-60, percentages of the four grains falling into the higher grades (excluding "Toughs" and "Damps") with comparable data for the 1958-59 crop year and the five-year (1953-54-1957-58) averages, respectively, in brackets, were as follows: oats, 1 Feed or higher, 88.4 (94.5, 89.8); barley, 1 Feed or higher, 78.5 (80.4, 65.9); rye, 3 C.W. or higher, 90.1 (89.8, 78.0); and flaxseed, 1 C.W. and 2 C.W., 71.7 (94.8, 91.9).

GRAIN MOVEMENT VIA THE ST. LAWRENCE SEAWAY 1960

The following analysis of Canadian and United States grain movements through the St. Lawrence Seaway system in 1960 was extracted from the Weekly Bulletin "Canadian Grain Position" published by the Statistics Branch of the Board of Grain Commissioners for Canada, for the week ending December 14, 1960.

Direct Overseas Shipping.—To illustrate the effect of the Seaway on the direct movement of grain from the Lakehead to the United Kingdom and other European markets, a comparison in the table below shows the all-grain totals for several seasons before, and the two seasons after, the opening of the Seaway.

	Mill,	Bu,
1956	0.	7
1957 1958		_
	1.	
1959	16.	- 200
1300	20.	B

During the 1960 season, 79 ocean vessels called at the Lakehead and carried 20.6 millions of Canadian grain, an average 261,000 bushel load per cargo, as against 71 ocean vessels and a 231,000 bushel cargo average in the previous season. The number of ocean vessels moving directly into the Atlantic ocean route, more than doubled during 1960, with 39 "non stop" cargoes as against 15 previously. The remaining 40 vessels topped off at St. Lawrence River ports. Note: The totals mentioned above are based on wheat to flaxseed tabulations. Not included are 12,000 tons of screenings and 47,000 bushels of buckwheat direct overseas.

Direct Shipping to St. Lawrence Export Points. — The gradual elimination of the traditional transfer operations to canalers at Lower Lake ports continued during the 1960 season, and direct one run shipments to Montreal, Quebec, Baie Comeau, etc., represented 80 per cent of the St. Lawrence terminal vessel receipts. The proportion calculated for last season's final returns was 50 per cent while the 1958-before the opening-showed only 4 per cent. Consequently the receipts from Lower Lake ports, such as Port Colborne, Kingston and Prescott, registered a further sharp drop and were reported at only 22.1 million or 20 per cent. The volume moved by rail ex Bay ports to St. Lawrence points continued the declining trend

and represented 10.5 per cent of the combined total receipts at St. Lawrence ports. The proportion was 15 per cent for 1959 and 22 per cent in 1958 (before the opening).

Foreign Ocean Vessels in Coasting Trade.—The direct movement to St. Lawrence ports, as outlined above, was partly carried by foreign registry ocean vessels; some 18 salties plied in the transfer operations of Canadian grain, several of them making two to four runs during the season, to a total of 50 cargoes and 15.5 million bushels (wheat to flaxseed) and 5,000 tons of screenings, Last season's saltie participation was as follows: 15 vessels, 41 cargoes and 15.4 million bushels.

Direct Shipments to Maritimes.—The Maritime ports of Halifax, Shediac, etc. received 3.8 million bushels of grain from one run vessels ex Lakehead, an increase of over 2 million from the volume moved in this manner during the previous season.

United States Grain Movement. - The United States grain movement continued to utilize the Seaway facilities to full extent and supported by rapid changes in Duluth-Superior harbour loading structures reached a scope high above the expected levels. Approximately 97.4 million bushels of United States grain was shipped as a direct export overseas from Duluth-Superior (85.3 million) and Chicago (11.7 million) and smail parcels (0.4 million) from Toledo, representing an increase of 12.4 million bushels over the 85 million exported through the Seaway by these two Lake ports during 1959. The Canadian ports at Lower St. Lawrence River again contributed to a considerable extent to United States Seaway exports and loaded, in transfer or topping-off operations, 26.3 million bushels of United States grain for overseas, almost in line with the 26.7 million the previous season. Little change was reported in Eastern elevator handlings of United States grain for Canadian domestic consumption (7.0 million - chiefly corn - compared with 7.3 million previously), while the transshipments to United States eastern points decreased from 3.1 million for the previous season to only 0.1 million currently. Of the season's United States grain total, reported by the United States Department of Agriculture as 'inspected for shipment to Canada' at 52 million bushels, the licensed elevators in the Canadian eastern sector received 9.5 million from Duluth, 14.1 million from Toledo, 8.8 million from Chicago and 4.2 million from other United States ports.

PRODUCTION OF GRAIN

Overseas clearances as reported by the Statistics Branch, Board of Grain Commissioners for Canada, for all countries except the United States.

Compiled from returns of Canadian elevator licensees and shippers and advice from American grain correspondents. Excluding bagged seed.

Compiled from Canadian Customs returns, adjusted to remove effect of time lag.

In terms of wheat,
Four-year average 1955-56-1958-59 only.

Bagged seed wheat included in average from 1955-56-1958-59 only.

Import data for wheat, oats, bariey and rye, respectively, include flour in terms of wheat, rolled oats and oatmeal in terms of oats, mait and pearl barley in terms of barley and rye flour in terms of rye.

Export data for wheat, oats and barley, respectively, include bagged seed wheat, wheat flour in terms of wheat, rolled oats and oatmeal in terms of oats and mait and pot and pearl barley in terms of barley.

Food uses estimated as follows: wheat—wheat flour (includes some quantities used for making alcohol and live-stock feed) and breakfast foods; oats—rulled oats, oatmeal and breakfast foods; barley—pot and pearl barley and breakfast foods; rye—rye flour and breakfast foods; and flaxseed—breakfast foods.

Industrial uses: wheat—distilling, feeds, starch, adhesives, miscellaneous chemicals, and pulp and paper industries; oats andrye—distilling; barley—maiting distilling and breakfast foods;

barley - mailting, distilling and brewing; flaxseed - for crushing.

Adjusted for imports and exports of malt.

Includes drying loss, outturn loss (lake and rail), fire loss, storage loss, etc.

Residual after estimating for other uses.

¹ Since August 1, 1949 Western Canadian oats and barley have been marketed through the Canadian Wheat Board.

CARRYOVER OF CANADIAN GRAIN IN CANADA AND THE UNITED STATES, 1930 - 60

The figures shown below are not entirely comparable, and the following omissions should be noted. The Canadian carryover figures for 1930-31 do not include grain in transit to United States ports. Beginning with 1932, this item is included in stocks of Canadian grain in the United States. Stocks of Canadian grain in United States Lake and Seaboard

ports from 1930-31 are not exact month-end figures, but rather are for the week-end nearest the crop year-end for each of those years. Stocks of Canadian wheat held in bond by United States flour mills were omitted each year until 1940-41 when they were included for the first time, but have since been part of the carryover, Stocks on farms are included in all years.

TABLE 121. Carryover of Canadian Wheat and Oats in Canada and the United States, 1930-60

		Wheat		Oats

FLOUR MILLING IN CANADA

Canadian flour mills reporting on a monthly basis for the crop year 1959-60 had a total flour outturn of 40.3 million hundredweight compared with 39.8 million hundredweight recorded for the previous crop year. Wheat milled for flour in the crop year under review amounted to 91.4 million bushels yielding an average of one hundredweight (100 pounds) of flour

for every 2.3 bushels of milled wheat. Wheat flour exports (based on Customs returns adjusted to remove effect of time lag) for 1959-60 amounted to 16.1 million hundredweight relatively unchanged from the previous crop year shipments of 16.1 million hundredweight.

Flour Milling and Exports Canada, Crop Years 1935 - 36 to 1959 - 60

¹ Based on Customs returns. Exports for 1945-46 to 1959-60 inclusive, adjusted to remove effect of time lag in reporting.

The percentage of milling capacity utilized for the crop year 1959-60 averaged 78.0 per cent compared with 76.2 per cent for the previous crop year. The highest percentage of

utilization for 1959-60 was in the month of November as shown in the following table.

	Percentage of mill capacity in operation

¹ Computed on the basis of actual production x 100 + number of working days (24 hours) x potential capacity.

Manitoba spring wheat was the principal type of wheat milled for flour in Canada during the crop year 1959-60 and

represented 90.3 per cent of the total milled wheat, Ontario winter wheat accounted for 6.2 per cent of the total.
