ERRATUM

Dairy Review for February

Page 1 - Delete the last sentence of paragraph 2, page 1 and substitute the following:

It will also be seen from Table 1 that 51.7 per cent of the cows were milked which represents a fractional increase over the same month of the previous year.

THE DAIRY SITUATION IN FEBRUARY

According to preliminary sample indications, February milk production increased approximately 4 per cent over that of February, 1951. However, when comparisons are made on the basis of a 28-day month the increase would be reduced to only 1 per cent, which is exactly the same increase from the previous year as that recorded in January. Production of dairy factory products (in terms of milk) showed a more pronounced increase over the previous February than did the total milk production. Here again, the 6 1/2 per cent advance indicated for total receipts at factories would be adjusted to only 3 per cent when comparisons are made on a 28-day month. This adjustment factor should be taken into consideration in evaluating all data shown in the table below:

MILK EQUIVALENT OF DAIRY FACTORY PRODUCTION

Product	FEBRUARY			JANUARY-FEBRUARY		
	1951	1952	Percentage Change	1951	1952	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	165,650	177,295	(+) 7.0	356,792	384,182	(+) 7.7
Cheddar Cheese	13,970	11,552	(-) 17.3	36,274	24,140	(-) 33.5
Concentrated Milk Products	30,499	32,450	(+) 6.4	64,256	65,791	(+) 2.4
Ice Cream	20,070	23,940	(+) 19.3	40,338	44,262	(+) 9.7
TOTAL	230,189	245,237	(+) 6.5	497,660	518,375	(+) 4.2

From information supplied by Dairy Correspondents it is evident that an increase has taken place in the milch cow population, probably due to the introduction of young stock into dairy herds since the survey of live stock numbers was made on December 1, 1951. The increase in milk production, therefore, may be attributed principally to this situation, although the daily yield of milk per cow amounting to 12.3 pounds for all cows and 23.7 pounds for those actually milked was slightly greater than last year. On the other hand, the percentage of cows being milked fell to approximately 12 per cent as compared to 14 per cent in February, 1951.

Weather conditions were about normal during February. Heavy snowfalls occurred in the Maritimes and Northern parts of the Central provinces, accompanied by slightly lower temperatures and fewer hours of sunshine than last year. Generally, however, there was less precipitation, with higher temperatures and longer periods of bright sunshine than in February, 1951. The absence of heavy storms kept roads in fair condition and farmers were able to haul feed and make milk deliveries with reasonable regularity. Farmers have ample supplies of home grown feeds and consequently do not appear to be using supplementary rations as extensively as they did a year ago.

★ Data for Newfoundland are not available.

1/ Based on cows and heifers two years old and over, kept mainly for milking purposes.

FARM MILK PRODUCTION, UTILIZATION AND INCOME IN JANUARY, 1952

Farm Milk Production: The estimated quantity of milk produced on farms in January amounted to 903 million pounds, an increase of 8.8 million pounds or approximately 1 per cent more than that of January, 1951.* Of the total production, 273 million pounds or 30 per cent of the total was utilized in factory production; fluid sales accounted for 40 per cent, while 30 per cent was used in the production of dairy butter, farm-home consumption and for live stock feeding.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 357,892,000 pounds in January, an increase of approximately 4 million pounds or 1.1 per cent in comparison with last year. The total fluid sales included about 302 million pounds of fluid milk comprising about 33 per cent of the farm milk supply, and fluid cream sales of 56 million pounds in milk equivalent, representing 6 per cent of the total milk output.

Dairy Butter: The dairy butter make in January amounted to 3,290,000 pounds, decreasing 27,000 pounds or 1 per cent from the corresponding month in 1951. All provinces contributed to the decline except Nova Scotia, New Brunswick and Quebec.

Farm Cash Income: Cash income from the sales of dairy products in January amounted to \$22,263,000. This represented an increase of approximately \$2,133,000 from last year. The weighted average price of \$3.49 per hundred pounds of milk may be compared with \$3.21 in the corresponding month of 1951. All prices except cheese milk showed increases over those of the previous January. Fluid milk at \$4.39 per hundred was 35 cents per hundred above that of January, 1951; cheese milk at \$2.96 decreased 17 cents per hundred pounds of milk, and milk used for manufacturing at \$3.29 increased 17 cents per hundred. Creamery butter-fat, on the other hand, increased 7.6 cents to 68.5 cents per pound, and dairy butter advanced 7.8 cents which established the price at 64.0 cents per pound.

* Data for Newfoundland are not available.

* Data for Newfoundland are not available.

1/ Total milk production by months does not include the milk equivalent of factory cheese other than Cheddar, shown in the annual statement.

^r Includes milk equivalent of concentrated milk products reported by less than three firms (see footnote "x/" in Table 5).

2/ Statistics for the separate provinces shown under this caption do not include data for products manufactured in those provinces indicated by footnote "x/" in Table 5, but are included in the Canada total at the top of this column.

3/ Includes fluid milk and fluid cream expressed as milk.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JANUARY, 1952

Butter: Total butter production including creamery, dairy and whey butter amounted to $12\frac{1}{4}$ million pounds in January, 1952. This was $\frac{3}{4}$ million pounds or approximately 6 per cent more than that produced in the same month of the previous year.

Stock Holdings: Holdings of butter in store and transit on February 1 amounted to $36\frac{1}{4}$ million pounds, approximately $10\frac{1}{2}$ million pounds more than last year. On January 1, 1952, the stock holdings of 45 million pounds represented an increase of $5\frac{3}{4}$ million pounds from the previous year.

The Butter Supply: The quantity of butter represented by stocks on January 1, production and imports during the month amounted to 59 million pounds in January, 1952. This was an increase of approximately $8\frac{1}{4}$ million pounds in comparison with January, 1951.

Domestic Disappearance: The domestic disappearance of butter in January, including creamery, dairy and whey butter, amounted to 23 million pounds, a decrease of $2\frac{1}{4}$ million pounds or 9 per cent. On a per capita basis the domestic disappearance amounted to 1.62 pounds as against 1.79 pounds a year ago.

Butter Prices at Montreal: Butter prices at Montreal, based on quotations of the Canadian Commodity Exchange for first grade solids, averaged $67\frac{5}{8}$ cents per pound in January as against $57\frac{1}{2}$ cents last year.

Cheese Production: Cheddar cheese production amounted to approximately $1\frac{1}{4}$ million pounds, representing a decrease of about $\frac{3}{4}$ million pounds as compared with that produced in the same month of the previous year.

Cheese Prices: The Montreal price of Ontario coloured cheese averaged $37\frac{1}{4}$ cents per pound in January. The comparative price in 1951 was $38\frac{1}{4}$ cents.

Concentrated Milk Products: The total quantity of concentrated milk products manufactured in January was approximately $17\frac{3}{4}$ million pounds, an increase of $\frac{1}{2}$ million pounds over last year. Concentrated whole milk products remained unchanged while milk by-products registered an increase of $\frac{1}{2}$ million pounds. Evaporated milk, one of the most important of the whole milk products, showed an increase of $\frac{1}{4}$ million pounds and the production of skim milk powder, the leading skim milk product, advanced $\frac{1}{2}$ million pounds.

Ice Cream: The quantity of ice cream manufactured in January was approximately $1\frac{1}{4}$ million gallons or 3 thousand gallons more than that produced a year ago.

1951-52	5,089	939	168	3,091	2,731	3,984

- 1/ Butter statistics as shown in this report include Creamery, Dairy and Whey Butter; statistics for Newfoundland are not available.
- 2/ Stocks include shipments in transit.
- 3/ Foreign Trade Statistics (Exports and Imports) include Newfoundland as from April 1, 1949. Cheese manufactured by the Cheddar Process imported from New Zealand during the period January to October 1951 and not accounted for in this statement amounted to 6,471,394 pounds.
- (a) Domestic disappearance data are not shown for the months indicated because stocks and exports exceed the total supply.

TABLE 9 - CONCENTRATED MILK, SUPPLY AND DISPOSITION

Canada, January, 1948 to 1952

Year	Whole Milk Products	Milk By-Products	Total
J A N U A R Y			
(A) Production - '000 lb.			
1948	10,416	2,724	13,140
