THE DAIRY SITUATION IN 1956

It will be seen from data shown in the milk section of the supplement attached to this report (Part II) that the output of milk on Canadian farms amounted to 17,303,082,000 pounds in 1956. Compared with the previous year, these figures represent a gain of approximately 4 1/2 million pounds. This increase arose from higher production in four of the provinces, namely, Prince Edward Island, Nova Scotia, New Brunswick and Quebec, all other provinces having produced less milk than in 1955. During the first four months milk production in the Dominion was above that of the previous year. This was followed by declines in both May and June; and while increased production in July and August more than offset declines in the two previous months, the usual downward trend from September to December was much more pronounced than in the previous year, making the output for each month less than for corresponding months in 1955.

Weather conditions were generally favourable for dairying during the year. The winter was relatively cold, and heavy storms in March slowed up traffic from farms to factories. Cool, backward weather in April and May prolonged the stabling period in many parts of the country. Likewise, pastures were slow to start and provided scant forage for dairy cattle until well on in June. Generally the season was about ten days behind that of the previous spring period. However, ample rainfall and the absence of abnormally high temperatures during the summer months produced a luscious growth of pasture grass. Consequently, from about June 15th to the end of August, pasture conditions were above normal, and condition averages for Canada moved up from 72 per cent of normal on May 15th to 94 on June 15th, 98 on July 15th, and 100 on July 31st. On August 15th pasture conditions were rated at 92, and, as on the two previous dates, exceeded the estimate of a year earlier.

1/ Dairy heifers include all breeds (grade and pure bred) being raised mainly for milking purposes.

2/ Calves include those raised for both beef and dairy purposes.

THE DAIRY SITUATION IN JANUARY, 1957.

The quantity of milk produced in January, 1957, reflected the general downward trend in output which commenced in the early autumn of the previous year. Tentatively estimated at 950 million pounds, the total farm milk supply declined approximately 3 per cent as compared with the revised estimate for the Dominion in January, 1956. This amount includes 325 million pounds delivered to factories and 122 million pounds used on farms for home consumption and livestock feeding. The former represents a reduction of 12 per cent, while the latter was about 1 per cent below the estimated quantities used for these purposes in the corresponding month of the previous year. A detailed statement covering factory production in January and for the years 1955 and 1956 appears in the table below.

MILK EQUIVALENTS OF DAIRY FACTORY PRODUCTION

	January-December			January		
	1955	1956*	Percentage Change	1956*	1957	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	
Creamery Butter	7,454,701	7,096,003	(-) 4.8	275,066	225,248	(-) 18.1

* Revised.

1/ Data are not available by months, for the products indicated.

The cow population, which generally indicates the current and future trend in milk production, remains relatively close to the 1956 level. Advance indications point to a total of 3,308 thousand head on farms in January, being just slightly above the numbers estimated in the semi-annual livestock survey of December 1, 1956, which in turn was only 7 thousand above that of December 1, 1955. However, the estimate of December 1, 1956, was 54 thousand below the numbers reported at June 1, 1956. The percentage of cows milked in January was 54.3 in comparison with 56.0 in the same month a year earlier. More cows were reported in calf, although freshenings fell off almost 4 per cent in January as compared with the same month of 1956. Exports of dairy cattle at 981 thousand in December may be compared with 1,576 thousand in the previous December, and the total for the year numbering 23,500 was up from 20,544 in 1955. Sales of butcher cows at stockyards and packing plants advanced from 53,472 in December, 1955 to 63,043 in December, 1956, while those for the full year advanced from 526,290 in 1955 to 584,402 in 1956.

1/ Refers to dairy cows two years old and over.

January was a cold month throughout Canada, all the 21 stations reporting to the Dominion Experimental Farm showing temperatures below those of the previous January. The lowest temperatures were reported from Normandin, P.Q., and Kapuskasing, Ont., where respective averages of 12° below and 10° below were recorded. Precipitation was quite variable between different sections of the Dominion, but rain and snowfall were generally less than a year earlier except at a number of points in the Central Provinces where snowfall, though not abnormally heavy, was greater than that of January, 1956. In comparison with the same month last year increased hours of sunshine was an outstanding feature of the January weather pattern, and a situation which seemed to apply to most parts of the country. Thus, despite generally low temperatures, the conditions during January were not unfavourable for dairy enterprises.

FARM MILK PRODUCTION, UTILIZATION AND INCOME IN DECEMBER, 1956.*

Farm Milk Production: The estimated quantity of milk produced on farms in December amounted to 1,011,504 thousand pounds. This represents a decrease of 52 million pounds or 5 per cent below that of December, 1955. Of this amount 368 million pounds or about 36 per cent was utilized in factory production, while fluid sales absorbed approximately 490 million pounds or nearly 49 per cent of the total milk supply. In the previous December 41 per cent was used for factory products and 44 per cent for fluid sales.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 490 million pounds in December, an increase of approximately 20 million pounds or 4.2 per cent in comparison with a year earlier. This included about 410 million pounds of fluid milk, comprising almost 40.6 per cent of the farm milk supply, and 79 million pounds of fluid cream, representing 7.8 per cent.

Dairy Butter: The dairy butter make in December amounted to 1,379 thousand pounds, decreasing 16.4 per cent from the corresponding month of 1955. Compared with the previous December, production declined in all provinces with the exception of New Brunswick. The total production for the year 1956 amounted to 18,589 thousand pounds only 6 thousand pounds more than that of the previous year. Of this amount 1,552 thousand pounds were sold off farms, compared with 1,468 thousand pounds in 1955.

Farm Cash Income: Cash income from the sale of dairy products in December amounted to \$29,506,000. This represented an increase of \$86,000 in comparison with the same month last year. The weighted average price of \$3.48 per hundred pounds of milk was 18 cents higher than in the previous December. Fluid milk at \$4.46 per hundred was 12 cents higher than in December, 1955. Creamery butter-fat at 60.4 cents and dairy butter at 59 cents were approximately the same as prices recorded a year earlier. In dollars per hundred, milk used in manufacture increased from \$2.87 to \$2.97, and cheese milk at \$2.78 was 26 cents per hundred higher.

* Data for Newfoundland are not available.

PRODUCTION, DISTRIBUTION AND PRICES OF DAIRY PRODUCTS IN DECEMBER, 1956

Butter: Total butter production (including creamery, dairy and whey butter) amounted to 12 1/2 million pounds in December, 1956. This represented a decrease of 3 1/2 million pounds or 22 per cent as compared with the same month last year. The January-December output of 323 3/4 million pounds was 5 per cent below the total of the same period of the previous year.

Stock Holdings: Holdings of butter in store and transit, which amounted to 105 million pounds at December 1, declined to 88 1/4 million pounds on January 1. Compared with those of a year ago, the stocks at December 1, showed a decrease of approximately 9 million pounds, while those of January 1, increased 12 1/2 million pounds.

The Butter Supply: The quantity of butter represented by stocks on December 1, production and imports during the month, amounted to 117 1/2 million pounds. This was a decrease of 12 1/2 million pounds as compared with last year.

Domestic Disappearance: The domestic disappearance of butter in December, including creamery, dairy and whey butter, amounted to 29 million pounds, an increase of 3/4 million pounds. On a per capita basis the domestic disappearance amounted to 1.81 pounds as compared with 1.82 pounds a year ago. During the January-December period the domestic disappearance of total butter amounted to 334 million pounds as compared with 322 million pounds in the same period of 1955; and the per capita disappearance of 20.78 pounds may be compared with 20.63 pounds a year earlier.

Butter Prices at Montreal: Butter prices at Montreal, based on quotations of the Canadian Commodity Exchange for first grade solids, averaged 58 cents per pound in December as against 58 cents in the same month last year.

Cheese Production: Cheddar cheese production in December, 1956 amounted to 3 1/4 million pounds, an increase of 798 thousand pounds or 31 per cent more than that produced in December, 1955.

Cheese Prices: Ontario coloured cheese at Montreal averaged 35 3/8 cents per pound in December, 1956. This compared with 32 cents in December, 1955.

Concentrated Milk Products: The total quantity of concentrated milk products manufactured in December was approximately 23 1/2 million pounds, which represented a decrease of 2 million pounds in comparison with the same month last year. Concentrated whole milk products increased 1/4 million pounds, while by-products registered a decrease of 2 1/4 million pounds. Evaporated milk, one of the most important of the whole milk products decreased almost 1/4 million pounds and the production of skim milk powder, the leading milk by-product, was 1 3/4 million pounds below the output of December, 1955.

Ice Cream: The quantity of ice cream manufactured in December was approximately 1 3/4 million gallons, an increase of 178 thousand gallons in comparison with the December production a year earlier. Production during the twelve-month period January-December amounted to 33,217,000 gallons. This represented an increase of 807 thousand gallons as compared with that produced in the same period of 1955.

* Data for Newfoundland are not available.

1/ Total milk production by months does not include the milk equivalent of factory cheese other than cheddar, shown in the annual statement.

a/ Includes milk equivalent of concentrated milk products reported by less than three firms. (see Footnote "x/" in Table 4).

2/ Statistics for the separate Provinces shown under this caption do not include data for products manufactured in those Provinces indicated by foot-note "x/" in table 4, but are included in the Canada total at the top of this column.

3/ Includes fluid milk and fluid cream expressed as milk.

TABLE 2 - MILK EQUIVALENTS OF FACTORY PRODUCTS AND FLUID SALES

Canada, by Provinces*, December, 1955 and 1956

^{1/} Data for Newfoundland are not available.

CONVERSION RATES^{1/}

APPENDIX

N.B. To obtain the butter-fat or milk equivalent, multiply the gallons or pounds of product by the conversion rates shown under respective headings below.

lb. Product	Lb. B.F. ^{2/}	Lb. Milk
Butter.....	.82	23.4
Cheese (Cheddar and other factory cheese made from whole milk).....	.385	11
Ice Cream (gallons) ^{3/}60	17
Cottage Cheese (creamed).....	.03	7.86
Cream Cheese.....	.36	10.3
Condensed Milk.....	.08	2.3
Evaporated Milk.....	.08	2.3
Whole Milk Powder.....	.28	8.0
Cream Powder.....	.735	21.0
Malted Milk.....	.087	2.5
Condensed Coffee.....	.078	2.22
Condensed Skim Milk.....	- Skim Milk	3
Evaporated Skim Milk.....	- " "	3
Skim Milk Powder.....	- " "	11
Casein.....	- " "	33
Cottage Cheese.....	- " "	7
Condensed Buttermilk.....	- Buttermilk	3
Buttermilk Powder.....	- "	12
Lactose (Sugar of Milk).....	- Whey	22
Whey Powder.....	- "	20.00

NET WEIGHT OF STANDARD UNITS

Commodity	Gallons	Quarts	Pints
	CONVERSION RATE TO POUNDS		
Whole milk	10.3	2.58	1.29
Skim milk	10.4	2.6	1.3
Cream	10.0	2.5	1.25

^{1/} Applicable to data published for 1952 to 1956.
^{2/} Butter-fat is converted to milk testing 3.5 per cent.
^{3/} Prior to 1953 ice cream was converted on basis of .61 lb. butter-fat and 17.5 lb. milk.
