#### THE DAIRY SITUATION IN OCTOBER, 1957

Total milk production in Canada for the month of October is estimated to be about 1,559 million pounds, an increase of 7.5 per cent over the same month last year. This increase was sufficient to advance cumulative January - October total milk production to approximately 15,218 million pounds, 1 per cent ahead of cumulative production at the same time last year. The seasonal decline in milk production is much less apparent this autumn than it was in 1956 or 1955.

As indicated by the table below, most of the increased milk production was used for butter manufacture. The sharp increase in butter production this fall has brought the January - October cumulative total of milk used for butter production to within 2.3 per cent of the comparable figure for last year. At the end of August this year the cumulative total trailed 6 per cent behind last year. Increased butter production appears to come also at the expense of other dairy factory products, particularly cheese production which utilized much larger quantities of milk earlier this year.

## MILK EQUIVALENTS OF DAIRY FACTORY PRODUCTION

	1 10 10	October		J	anuary-Octobe	r
	1956	1957	Percentage Change	1956	1957	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	590,545	686,416	(+) 16.2	6,480,302	6,332,274	(-) 2.3
Cheddar Cheese	95,403	95,876	(+) 0.5	831,061	934,648	(+) 12.5
Concentrated Milk Products	78,685	77,376	(_) 1.7	852,299	906,233	(+) 6.3
Ce Cream	38,131	39,525	(+) 3.7	502,673	531,590	(+) 5.8
TOTAL	802,764	899,193	(+) 12.0	8,666,335	8,704,745	(+) 0.4

Fluid sales for October are tentatively estimated to be 3.5 per cent above fluid sales for the same month last year although September sales of fluid milk showed a smaller increase when compared with last September. The estimate is based on a July, August and September average.

Milk utilized on farms, according to the Dairy Correspondent's monthly survey, continues to show a decrease over last year. Expected increased production of dairy butter in October will more than likely be offset by an estimated 5 1/2 per cent decrease in milk fed to livestock and a 3 per cent decrease in milk consumed on the farm, compared with October 1956.

The monthly survey also indicates that cow numbers in October are up about 1 per cent over last October while cows milked are up 1 1/2 per cent. Average production per cow in October this year increased sharply over the same month in 1956 and, combined with the increased number of cows milked, supports the estimated increase in total milk production.

The weather in October across Canada was generally cooler, with more rain than last year.

Tame hay production was below the 1950-54 average and varies between regions, although only the Maritimes show prospects of fodder shortage before next spring. Feed grain supplies are below last year but quite adequate for the feeding season.

## FARM MILK PRODUCTION, UTILIZATION AND INCOME IN SEPTEMBER, 1957\*

Farm Milk Production: The estimated quantity of milk produced on farms in September amounted to 1,666,156,000 pounds. This represents an increase of 72 million pounds or 4.5 per cent above that of September, 1956. Of this amount 1,052 million pounds or 63 per cent was utilized in factory production, while fluid sales absorbed approximately 456 million pounds or 27.4 per cent of the total milk supply. During January-September production was estimated at 13,659 million pounds, an increase of 54 million pounds in comparison with the same period of the previous year. The quantity of milk utilized for factory production in January-September amounted to 7,806 million pounds, while fluid sales accounted for 4,272 million pounds.

Fluid Sales: During September sales of fluid milk and cream (the latter expressed as milk) amounted to 456,052,000 pounds, an increase of approximately 686 thousand pounds or 0.2 per cent in comparison with the previous September. This included about 386 million pounds of fluid milk, comprising about 23.1 per cent of the farm milk supply and fluid cream sales of 70 million pounds representing 4.2 per cent. During the nine month period, January-September, fluid sales totalled 4,272,437,000 pounds which was about 136 million pounds or 3.3 per cent over those of January-September, 1957.

Dairy Butter: The dairy butter make in September amounted to 1,734,000 pounds increasing 5 per cent from the corresponding month in 1956. For the nine months, January-September 13,384,000 pounds were produced, a decrease of 4 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in September amounted to \$44,304,000. This represented an increase of 8.9 per cent or \$3,637,000 in comparison with the same month last year. The weighted average price of \$2.93 per hundred pounds of milk was 11 cents higher than in September, 1956. Fluid milk at \$4.49 per hundred was 22 cents higher than that of September, 1956. Creamery butterfat increased from 59.9 cents to 63.6 cents per pound, and dairy butter at 60 cents was 1 cent higher than in September, 1956. Milk used in manufacture increased from \$2.63 per hundred in September, 1956 to \$2.96 per hundred in September, 1957. Cheese milk advanced to \$2.62 per hundred, an increase of 2 cents per hundred in comparison with the same month a year earlier.

## PRODUCTION, DISTRIBUTION AND PRICES OF DAIRY PRODUCTS IN SEPTEMBER, 1957

Butter: Total butter production (including creamery, dairy and whey butter) amounted to 35 3/4 million pounds in September, 1957. This represented an increase of 2 3/4 million pounds or 8 per cent as compared with the same month last year. The January-September output of 256 1/4 million pounds was 4 per cent below the total for the same period of the previous year.

Stock Holdings: Holdings of butter in store and transit, which amounted to 83 1/2 million pounds at September 1, advanced to 89 1/2 million pounds on October 1. Compared with those of a year ago, the stocks at September 1, showed a decrease of approximately 32 1/2 million pounds, while those of October 1, declined 32 3/4 million pounds.

The Butter Supply: The quantity of butter represented by stocks on September 1, production and imports during the month, amounted to 119 1/2 million pounds. This was a decrease of approximately 30 million pounds as compared with last year.

Domestic Disappearance: The domestic disappearance of butter in September including creamery, dairy and whey butter, amounted to 30 million pounds, an increase of 3 million pounds. On a per capita basis the domestic disappearance amounted to 1.84 pounds as compared with 1.69 pounds a year ago. During the January-September period the domestic disappearance of total butter amounted to 255 1/4 million pounds as compared with 243 3/4 million pounds in the same period in 1956; and the per capita disappearance of 15.61 pounds may be compared with 15.16 pounds a year earlier.

Butter Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 61 1/4 cents per pound in September as against 57 cents in the same month of the previous year.

Cheese Production: Cheddar Cheese production in September, 1957 amounted to approximately 11 million pounds, an increase of 1/2 million pounds or 5 per cent above that produced in September, 1956.

Cheese Prices: Ontario coloured cheese at Montreal averaged 35 3/8 cents in September, 1957. This compared with 35 1/8 cents in September, 1956.

Concentrated Milk Products: The total quantity of concentrated milk products manufactured in September was approximately 50 1/2 million pounds, which represented an increase of 4 1/4 million pounds in comparison with the same month a year earlier. Concentrated whole milk products declined 1 3/4 million pounds, while by-products registered an increase of 6 million pounds. Evaporated milk, one of the most important of the whole milk products decreased 1 3/4 million pounds and the production of skim milk powder, the leading milk by-product, was 5 3/4 million pounds above the output of September, 1956.

Ice Cream: The quantity of ice cream manufactured in September was approximately 3 million gallons, an increase of 349 thousand gallons in comparison with the output of September, 1956. Production during the nine month period January-September amounted to 28,945,000 gallons. This represented an increase of 1,619 thousand gallons as compared with that produced in the same period last year.

<sup>\*</sup> Data for Newfoundland are not available.

<sup>1/</sup> All data are based on prices f.o.b. farm.

Income from manufacturing milk is based on the farm sales of milk and cream used in concentration, and in the manufacture of ice cream. Thus, comparable data for September, 1956 differ from those published in the supplement to the Dairy Review for January, 1957, in which cream used in the manufacture of ice cream was separately shown by months for 1956.

<sup>\*</sup> Data for Newfoundland are not available.

Price average for all products include fluid cream prices, not separately reported.

Manufacturing milk prices include milk and cream used in ice cream and in the production of concentrated milk products, all expressed as milk equivalents. Data for September, 1956, are revised from those published for 1956, by months, in the supplement to the Dairy Review for January, 1957.
