MILK PRODUCTION AND UTILIZATION, 1956-57

## THE DAIRY SITUATION IN 1957

Total milk production for Canada in 1957 came to approximately 17,288,000,000 lbs. an increase of about 322,000,000 lbs. or almost 2 per cent over 1956. Until August, cumulative milk production lagged behind the same period in 1956. Commencing in September, total milk production showed successive increases each month when compared with 1956. This strong finish was accentuated by comparison to 1956 in which the seasonal decline was more pronounced than usual. Most of the milk was utilized for the manufacture of creamery butter. Total milk production exceeded that of 1956 in Ontario, Quebec, Manitoba, Saskatchewan, Alberta and British Columbia while it declined in Prince Edward Island, Nova Scotia and New Brunswick.

Weather conditions throughout 1957 were generally favourable to dairying. January, February and March were a little milder than the same months in 1956. A normal spring was experienced with good pastures but a little less rain fell than in 1956. The summer was warmer and drier than 1956 with a spell of near drought in parts of the prairies and the maritimes occurring in late July and early August. Late August rains, generally distributed across Canada, refreshed pastures which continued above normal throughout a very open fall. These generally more favourable conditions along with moderate increases in the price of milk, contributed to a new record for total milk production in Canada.

TABLE 1

Numbers of Dairy Cows on Farms, Canada, by Provinces,  
December 1, 1956 and 1957 and June 1, 1957. <sup>1/</sup>

The term "dairy cows" refers to all cows two years old and over, being kept mainly for milking purposes.

1/ Dairy heifers include all breeds (grade and pure bred) being raised mainly for milking purposes.

2/ Data for Newfoundland are not available.

3/ Calves include those raised for both beef and dairy purposes.

THE DAIRY SITUATION JANUARY, 1958.

The trend of total milk production to exceed the same month last year, which has been in evidence during the last five months of 1957, was carried over into the new year. Preliminary indications are that total milk production for January amounted to about 995,000,000 pounds, an increase of 9.1 per cent over January last year.

Milk utilized by dairy factories in January also followed the pattern set in the last quarter of 1957. Butter production continued to show a strong increase over last year. The late 1957 upswing in butter production compensated for the lag in butter production earlier in the year. While cheddar cheese production in the last half of 1957 was slightly lower than for the same months in 1956, production in the first half of the year was sufficient to raise the annual total considerably over 1956. More milk was used for concentrated products and ice cream in 1957 than in 1956 and this trend appears to be continuing. Cottage and other cheese production increased 10.6 per cent over production in 1956. The 2.3 per cent increase in milk used for factory products in 1957 over 1956 was in contrast with a 2.5 per cent decline for 1956 compared with 1955. The table below, shows a breakdown of milk used for factory products for the years 1956 and 1957 and for January 1957 and 1958.

Milk Equivalents of Dairy Factory Production

Product	January-December			January		
	1956 <u>1/</u>	1957 <u>1/</u>	Percentage Change	1957 <u>1/</u>	1958	Percentage Change

1/ Revised.

2/ Data are not available by months, for the products indicated.

December fluid sales showed an increase over the previous December of one-half per cent. The December, November, October average increase over the same months in 1956 came to 1.7 per cent. January fluid sales are expected to have shown more than one-half per cent increase over January 1957.

Indications from the Dairy Correspondent's survey are that milk consumed in farm homes remained about the same this January as last but more milk was fed to livestock. About 11.7 per cent less butter was made on farms in December 1957 compared to December 1956.

The Dairy Correspondent's survey also indicated that cow numbers in January were down about 1 per cent compared with the same month last year but cows milked were up about 3.7 per cent. Milk production per cow was 5.5 per cent above January last year. These indications are compatible with the preliminary estimate of total milk production.

<sup>1/</sup> Refers to milk cows two years old and over.

<sup>2/</sup> Data for Newfoundland are not available.

FARM MILK PRODUCTION, UTILIZATION AND INCOME IN DECEMBER, 1957\*

Farm Milk Production: The estimated quantity of milk produced on farms in December amounted to 1,063,431,000 pounds. This represents an increase of 87 million pounds or 8.9 per cent above that of December, 1956. Of this amount 457 million pounds or 42.9 per cent was utilized in factory production, while fluid sales absorbed approximately 458 million pounds or 43.1 per cent of the total milk supply.

Fluid Sales: During December sales of fluid milk and cream (the latter expressed as milk) amounted to 458,107,000 pounds, an increase of approximately 2.5 million pounds in comparison with the previous December. This included about 382 million pounds of fluid milk, comprising about 36 per cent of the farm milk supply and fluid cream sales of 76 million pounds representing 7 per cent.

Dairy Butter: The dairy butter make in December amounted to 911,000 pounds decreasing 12 per cent from the corresponding month in 1956.

Farm Cash Income: Cash income from the sale of dairy products in December amounted to \$31,235,000. This represented an increase of 11 per cent or \$3,087,000 in comparison with the same month last year. The weighted average price of \$3.41 per hundred pounds of milk was the same as in December, 1956. Fluid milk at \$4.69 per hundred was 21 cents higher than that of December, 1956. Creamery butterfat increased from 60.4 cents to 64.5 cents per pound, and dairy butter at 61 cents was 4 cents higher than in December, 1956. Milk used in manufacture increased from \$2.84 per hundred in December, 1956 to \$2.98 per hundred in December, 1957. Cheese milk at \$2.82 per hundred, was 3 cents higher than in December, 1956.

\* Data for Newfoundland are not available.

PRODUCTION, DISTRIBUTION AND PRICES OF DAIRY PRODUCTS IN DECEMBER, 1957

Butter

Production: Total butter production (including creamery, dairy and whey butter) amounted to 15 1/2 million pounds in December, 1957. This represented an increase of 3 1/2 million pounds or 29 per cent as compared with the same month last year. The January-December output of 318 million pounds was slightly less than one-half of one per cent below the total for the same period of the previous year.

The Butter Supply: Holdings of butter in store and transit, which amounted to 82 million pounds at December 1, declined to 70 million pounds on January 1. Compared with last year, stocks at December 1, showed a decrease of approximately 23 million pounds, while stocks at January 1, declined 18 1/4 million pounds. The quantity of butter represented by stocks on December 1, and production and imports during the month, amounted to 97 1/2 million pounds. This was a decrease of approximately 19 1/2 million pounds compared with last year.

Domestic Disappearance: The domestic disappearance of butter in December, including creamery, dairy and whey butter, amounted to 27 1/2 million pounds, a decrease of 1 1/4 million pounds. On a per capita basis the domestic disappearance amounted to 1.66 pounds as compared with 1.79 pounds a year ago. During the January-December period the domestic disappearance of total butter amounted to 336 1/2 million pounds as compared with 329 3/4 million pounds in the same period of 1956; and the per capita disappearance of 20.28 pounds may be compared with 20.51 pounds a year earlier.

Butter Prices at Montreal: Butter prices at Montreal, based on dealers quotations for first grade solids, averaged 62 1/2 cents per pound in December, as compared with 58 cents in December, 1956.

Cheddar Cheese

Production: Cheddar Cheese production in December, 1957 amounted to approximately 3 1/4 million pounds, a decrease of 138 thousand pounds or 4 per cent from that produced in December, 1956.

Prices: Ontario coloured cheese at Montreal averaged 35 cents in December, 1957. This compares with 35 3/8 cents in December, 1956.

Concentrated Milk Products:

The total quantity of concentrated milk products manufactured in December was approximately 27 1/4 million pounds, which represented an increase of 3 1/4 million pounds in comparison with the same month last year. Concentrated whole milk products decreased 1 1/4 million pounds, while by-products registered an increase of 4 1/2 million pounds. Evaporated milk, one of the most important of the whole milk products decreased 1 3/4 million pounds and the production of skim milk powder, the leading milk by-product, was 4 3/4 million pounds above the output of December, 1956.

Ice Cream:

The quantity of ice cream manufactured in December was approximately 1 3/4 million gallons, an increase of 134 thousand gallons in comparison with December production a year earlier. Production during the twelve-month period January-December amounted to 35,115,000 gallons. This represented an increase of 1,882,000 gallons as compared with that produced in the same period of 1956.

\* Data for Newfoundland are not available.

1/ Total milk production by months does not include the milk equivalent of factory cheese other than cheddar, shown in the annual statement.

a/ Includes milk equivalent of concentrated milk products reported by less than three firms (See Footnote "x/" in Table 4).

2/ Statistics for the separate provinces shown under this caption do not include data for products manufactured in those provinces indicated by footnote "x/" in Table 4, but are included in the Canada total at the top of this column.

3/ Includes fluid milk and fluid cream expressed as milk.

CONVERSION RATES

To obtain the butter-fat or milk equivalent, multiply the gallons or pounds of product by the conversion rates shown under respective headings below.

Lb. Product	Lb. B.F.	Lb. Milk <u>1/</u>
Butter.....	.82	23.4
Cheese (Cheddar and other factory cheese made from whole milk) .....	.385	11.0
Ice Cream (gallons) <u>2/</u> .....	.60	17.0
Cottage Cheese (creamed) .....	.03	0.86
Cream Cheese .....	.36	10.3
Condensed Milk .....	.08	2.3
Evaporated Milk .....	.08	2.3
Whole Milk Powder .....	.28	8.0
Cream Powder .....	.735	21.0
Malted Milk .....	.087	2.5
Condensed Coffee .....	.078	2.22
Condensed Skim Milk .....	- Skim Milk	3.0
Evaporated Skim Milk .....	- " "	3.0
Skim Milk Powder .....	- " "	11.0
Casein .....	- " "	33.0
Cottage Cheese .....	- " "	7.0
Condensed Buttermilk .....	- Buttermilk	3.0
Buttermilk Powder .....	- "	12.0
Lactose (Sugar of Milk) .....	- Whey	22.0
Whey Powder .....	- "	20.0

NET WEIGHT OF STANDARD UNITS

Commodity	Gallons	Quarts	Pints
	CONVERSION RATE TO POUNDS		
Whole milk	10.3	2.58	1.29
Skim milk	10.4	2.60	1.30
Cream	10.0	2.50	1.25

1/ Milk with 3.5% butterfat.

2/ Prior to 1953 ice cream was converted on basis of .61 lb. butter-fat and 17.5 lb. milk.
