DOMINION BUREAU OF STATISTICS
OTTAWA - CANADA

THE DAIRY REVIEW

The preliminary estimate places total milk production in November at about $1,196,000,000$ pounds, only one half of one per cent greater than milk production in November 1957. The small increase may be partly explained by the fact that it is compared with milk production last fall which diỏ not show as sharp a seasonal decline as normally experienced. Cumulative January to November production is estimated to have been $16,932,000,000$ pounds, 5.2 per cent greater than in the first eleven months of 1957.

For the second time this year, less milk was used for the manufacture of dairy factory products than in the corresponding month in 1957. The decrease in November was 1. 2 per cent, the decrease in August only 0.1 per cent. November was the first month in 1958 to show a decrease from the corresponding month in 1957 for milk going into creamery butter. Although November production was about 1 per cent below last November, creamery butter production in the first eleven months of 1958 was 11.5 per cent higher than in the corresponding period during 1957. The trend toward the utilization of less milk for cheddar cheese manufacture was still in evidence during November. Milk used for ice cream manufacture in November remained at about 3 per cent over the corresponding month last year, and slightly more milk was processed into concentrated whole milk products.

Milk Equivalents of Dairy Factory Production

Fluid sales in October and in the three month period August to October were about 2 per cent higher than in the corresponding period in 1957. For the purpose of the preliminary estimate, fluid sales in Noverber were assumed to have been about 2 per cent above the sme month a year ago.

Dairy correspondents reported milk consumed in farm homes in November at the same level as November 1957. In the first oleven months consumption of milk in farm homes has been I per cent above the corresponding period in 1957. Milk fed to livestock was reported to be 17 per cent higher than in November last year, although milk fed to livestock in the first eleven months was only 4 per cent higher than the corresponding period in 1957. Milk cows in the herd and cows milked were reported to be at the same level as last year.

Exq Mtik Prodution: The astimited çantity of milk promoed on farms in October amounted to $1,563,9^{r} 13,000$ pounds. This represents an increase of 63 million pounds or 402 per cent from that of October, 1957 . Of this mount, 943 million pounds or 60 per cent was utilized in factory production, while fluid sales absorbed approximately 466 million pounds or 30 per cent of the total milk supply. During JanuaryOctober the estimated producifon was 15,738 million pounds, an increase of 823 million pounds over that produced in the sane period of the previous year. The quantity of milk utilized for factory production in January-October amounted to 9,428 million pounds while fluid sales accounted for 4,567 million pounds.

Fluid Sa`es: Sales of fluid milk and cream, the latter expresses as milk, amounted to $465,645,000$ pounds in October, an increase of approximately 9 million pounds in comparison with October of the previous year. Thisincluded about 393 million pounds of fluid milk, comprising about 25 per cent of the farm milk supply, and fluid cream sales of 73 million pounds representing 5 per cent. During the ten month period, January-October, fluid sales totalled $4,566,925,000$ pounds, an increase of 92 million pounds or approximately 2 per cent over those of the 1957 period.

Dainy Butter: The dairy butter make in October amounted to 1,046,000 pounds, decreasing 7 per cent from the corresponding month in 1957. For the ten months. January-Cctober, $10,015,000$ pounds were produced, a decrease of 5 per cent from the same period last year.

Farm Cashi Incone: Cash income from the sale of dairy products in Octobor amounted to $\$ 43,422,000$. This represented an increase of approximately 5 per cent or $\$ 2,015,000$ in comparison with the same month last year. The wolghted average price of $\$ 3.08$ per hundred pounds of milk was 2 cents higher than in October, 1957. Fluid milk at $\$ 4.69$ per hundred was 2 cents higher than October, 1957. Creamery butter-fat increased from 63.9 cents to 66.4 cents per pound, and dairy butter at 61 cents was 2 cents higher than in Octobor, 1957. Milk used in manufacture declined from $\$ 2.95$ per hundred in Octoker, 1957, to \$2.86 per hundred in October, 1958. Cheese milk increased to $\$ 2.7 \perp$ per hundred, an increase of 3 cents per hundred in comparison with the same month a year earlier.

## PRODUCTION AND PRICES OF DAIRY PRODUCTS IN OCTOBER, 1958

## SUTTER

Production: Total butter production including creamery, dairy and whey butter amounted to 33.0 million pounds in October, 1958. This was 2.6 million pounds or approximately 9 per cent more than that produced in the same month of the previous year.

Stocks: Holdings of butter in store and transit on November 1 amounted to 114.1 million pounds, approximately 23.3 million pounds more than last year. On October 1, 1958, the stock holdings of 111.7 million pounds represented an increase of 21.6 million pounds as compared with the previous year.

Supply: The quantity of butter represented by stocks on October 1, plus production and imports during October, amounted to 144.7 million pounds. This was an increase of approximately 24.2 million pounds in comparison with October, 1957 .

Domestic Disappearance: The domestic disappearance of butter in October including croamery, dairy and whey butter, amounted to 30.6 million pounds, an increase of 0.9 million pounds or 3 per cent. On a capita basis the domestic disappearance amounted to 1.81 pounds as compared with 1.79 pounds a year ago.

Prices: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged63変 cents per pound in October as against 6l $\frac{1}{2}$ cents last year.

## CHEDDAR CHEPSE

Production: Cheddar cheese production amounted to approximately 8.5 million pum: $\mathrm{is}_{3}$ representing a decrease of about 0.2 million pounds as compared with that produced in the same month of the previous year.

Prices: The Montreal price of Ontario coloured cheese averaged $351 / 8$ cents per pound in October. The comparative price in 1957 was $353 / 8$ cents.

## CONCENTRATED MILK PRODUCTS

The total quantity of concentrated milk products manufactured in October was approximately 47.3 million pounds, an increase of 2.1 million pounds as compared with last year. Concentrated whole milk products decreased 3.6 million pounds while milk by-products increased 5.7 million pounds. Evaporated milk, the most important of the whole milk products, showed a decrease of 2.8 million pounds and the production of skim milk powder, the leading skim milk product, increased 6.0 million pounds.

ICE CREAM
The quantity of ice cream manufactured in October was approximately 2.4 million gallons or 88 thousand gallons more than that produced a year ago.
