SUMMARY STATEMENT OF DAIRY PRODUCTION IN CANADA (July, 1941)

CREAMERY BUTTER PRODUCTION in July decreased approximately 1 per cent as compared with the July make of 1940 and decreased 3 per cent as compared with the output for the preceding month. During the month of July 39.3 million pounds of butter were produced and during the seven months ending July, the output reached a total of 166.0 million pounds. The decrease in the July make occurred only in Quebec, Ontario and British Columbia.

CHEESE PRODUCTION increased approximately one-half of one per cent in July as compared with July, 1940, and decreased 2 per cent as compared with the output for the preceding month. The July make was approximately 25.2 million pounds and the total for the seven months, January to July, amounted to 74.9 million pounds. The increase in the July make occurred only in Prince Edward Island, Quebec and Alberta.

EVAPORATED WHOLE MILK increased approximately 17 per cent as compared with the same month last year and there was also an increase of 10 per cent as compared with the preceding month. During the month of June 21.9 million pounds of evaporated whole milk were produced, and during the six months ending June the output reached a total of 86.7 million pounds. SKIM MILK POWDER. During the month of June 3.8 million pounds of skim milk powder were produced, while during the six months ending June the output reached a total of 14.1 million pounds. There was an increase of approximately 5 per cent as compared with the same month last year, and an increase of 13 per cent as compared with the preceding month.

CREAMERY BUTTER PRICES at Montreal, as quoted daily by the Canadian Commodity Exchange for the first grade product, averaged 35 3/8 cents a pound, compared with 22 5/8 cents in July 1940. Ontario white cheese at Montreal based on daily quotations averaged 16 cents in July compared with 14 cents in July, 1940.

The combined output of creamery butter and factory cheese during the month of July represented the equivalent of 1.2 billion pounds of milk, registering a decrease of approximately 5.4 million pounds as compared with the combined make in terms of milk for the same month a year ago. Creamery butter represented 76.5 per cent and cheese represented 23.5 per cent of the total.

The domestic disappearance of butter in the month of June amounted to 23.2 million pounds, representing an increase of 4.3 per cent as compared with the same month last year and an increase of 1.4 per cent in comparison with the preceding month. This estimate is based on storage and transit stocks amounting to 37.2 million pounds at July 1, 1941, and exports and imports amounting to 155,200 pounds and 9,544 pounds, respectively.

DAIRY PRODUCTION CONDITIONS

Weather:

In the Maritimes weather conditions during July were generally favourable, while in Saskatchewan and Alberta the rainfall was below normal. At Charlottetown, P.E.I., there was 2.15 inches of rainfall against a normal of 2.91 inches and at Nappan, Nova Scotia, they had 3.56 inches as compared with a normal of 2.84 inches. Fredericton, New Brunswick, had a very heavy rainfall amounting to 5.25 inches, an increase of about 50 per cent over the same month last year. Lennoxville, Quebec, reported a rainfall of 3.9 inches as against a normal of 4.01 inches, while at Ottawa they had 2.8 inches as compared with a normal of 3.25 inches. Very dry weather was experienced at Morden, Manitoba, where only 0.99 inches was recorded as compared with a normal of 2.73 inches; however, this was not representative of the province as a whole. At Scott, Saskatchewan, the precipitation amounted to only 0.78 inches as against a normal of 2.23 inches and at Manyberries, Alberta, there was only 0.46 inches as compared with a normal of 1.17 inches.

Feed Prices:

The price of Linseed Oil Cake, 38 per cent, was \$39.00 per ton at Toronto as compared with \$30.75 at the end of July, 1940, while Gluten Feed, 25 per cent, was quoted at \$30.00 per ton, an increase of \$5.00 over the same date of last year. There was a reduction of \$3.00 per ton in the price of Bran from last month which is now quoted at \$25.25 per ton at Montreal, this being also the prevailing price for the corresponding month of the previous year. Oats increased approximately 13 cents per bushel at Montreal and Winnipeg, and Barley also advanced 21½ cents per bushel at Montreal and 13 1/8 cents at Winnipeg.

Milk Cows:

The number of milk cows on the farms of Dairy Correspondents in June reveal a slight decline from the previous year and the percentage milking also declined from 84.2 per cent in 1940 to 82.1 in 1941.

Milk Production:

The reports from Dairy Correspondents indicated that milk production in June was slightly lower than last year. The production of milk per cow, including those both dry and in milk was 20.4 pounds per day, which was practically the same as last year.
