A CALENDAR OF IMPORTANT HAPPENINGS AFFECTING DAIRYING IN 1946

At the beginning of 1946 farm prices of dairy products were maintained at a high level by the continuation of Dominion Government subsidies which had reached the maximum. Milk sold for fluid purposes was subject to a subsidy of 55 cents per hundred pounds at principal markets, and 35 cents per hundred pounds at a number of other centres; cream sold for the production of creamery butter was subsidized at 10 cents per pound butter-fat; cheese milk prices were enhanced by a subsidy of 30 cents per hundred, and the subsidy on milk used for concentration had been advanced to 23 cents per hundred. Consumers also benefited by the stabilization of milk prices through the payment of a consumers' subsidy of 2 cents per quart.

March 1: The shortage of butter led to an acute distribution problem, making it necessary for the weekly butter ration to be reduced from 6 to 4 ounces per person. This reduction, originally intended to cover March and April only, was continued until May 16, when the ration was advanced to 5 1/3 ounces. On June 1, the full 6-ounce ration was restored.

March 26: Rt. Hon. James G. Gardiner, Minister of Agriculture, announced in the House of Commons that the 1945-1946 contract which called for the delivery of 125 million pounds of cheese and 600,000 pounds of evaporated milk to the British Ministry of Food, had been renewed for a two year period, ending March 31, 1948. While the 1946-1947 prices would remain the same, those for 1947-1948 would be decided by later negotiation. The new agreement also covered the delivery of 6,720,000 pounds of skim milk powder during the fiscal year 1946-1947 at 11 $\frac{3}{4}$ cents per pound.

April 1: The price of creamery butter was advanced 4 cents per pound under Administrators' Order No. A1930 of the Wartime Prices and Trade Board.

April 15: The prices of dairy butter and whey butter advanced 4 cents per pound under Orders A621 and A1962, respectively, of the Wartime Prices and Trade Board.

May 15: Rt. Hon. James G. Gardiner, Minister of Agriculture, announced that the producer subsidy payments of 55 cents and 35 cents per hundred on fluid milk would be continued during the summer period, May 1 to September 30. (In the previous year, subsidies fell to 35 cents and 25 cents respectively during this period.)

May 17: Order No. 632 of the Wartime Prices and Trade Board announced that on and after June 1, the Dominion Government subsidy of 2 cents per quart on the sales of milk to consumers would be discontinued.

May 21: Rt. Hon. J.L. Ilsley, Minister of Finance, announced in the House of Commons that the cheese milk subsidy would be continued at 30 cents per hundred. (In the previous year, the subsidy remained at 20 cents per hundred.)

May 31: The Wartime Prices and Trade Board ceased to exercise control over the prices of fluid milk and cream, thus giving the Provinces complete authority to amend or adjust prices in accordance with existing needs and requirements.

June 1: The cost of fluid milk to consumers was automatically advanced 2 cents a quart on account of subsidy payments being discontinued.

September 25: "The Prime Minister, Mr. Mackenzie King, announced that the Government, after carefully examining and reconsidering the situation as a whole, has decided that the producers' milk subsidy of 55¢ per hundred pounds on milk sold for fluid consumption (which is equal to slightly less than $1\frac{1}{2}$ ¢ per quart) should not be continued after September 30th.

On May 16th last the Government announced the continuation of the producer subsidy on fluid milk sales at the former winter rate of 55¢ until September 30th only. On August 27th the House of Commons adopted a resolution urging the Government to reconsider this decision in order to ensure an adequate return to milk producers without any further increase in the price to consumers.

The Government, in reconsidering this decision, felt that if there were any real assurance that the continuation of the present subsidy would achieve the objectives endorsed by the House it might be justified in continuing the subsidy for a further limited period of time. In fact, however, there have been strong indications that even if the subsidy were continued, milk producers would demand, and at least several of the provincial milk boards would be prepared to authorize significant increases in the price of milk over and above the subsidy.

Under these circumstances the Government has felt that the wise and proper course is to adhere to the program already announced and on October 1st to return control over the price of fluid milk wholly to the provincial authorities. Conditions surrounding the production of milk for the fluid market vary widely from province to province and even within provinces, and while under wartime conditions it was desirable to establish an overall policy on fluid milk prices, it was felt that the time has now come when the established and experienced milk boards should resume full jurisdiction.

The Prime Minister announced at the same time that the subsidy of 23¢ per hundred pounds on milk used in the manufacture of concentrated milk products would also be discontinued on September 30th. Simultaneously the Wartime Prices and Trade Board will authorize equivalent price increases in evaporated milk, condensed milk and milk powder." (Release from Prime Minister's office).

October 1: Following the cancellation of subsidies to producers the maximum prices at which concentrated milk products might be sold by manufacturers on a delivered basis were advanced as follows: Evaporated milk 35 cents per case; condensed whole and skim milk in barrels 1 cent and $1\frac{1}{2}$ cents per pound, respectively; whole milk powder $2\frac{1}{2}$ cents and skim milk powder 2 cents per pound.

October 1: Fluid milk prices to consumers were advanced from $1\frac{1}{2}$ to 3 cents a quart under Provincial Orders or agreements between producers and distributors in a number of markets in the different provinces of Canada. The lesser increase applied to Manitoba, where a price advance had been ordered earlier in the year; while the 3 cent advance took place in Ontario, covering all markets in the province.

December 24: The Dominion-Provincial Agricultural Conference was convened in Ottawa, to plan the farm production programme for 1947. The Rt. Hon. James G. Gardiner, Minister of Agriculture, addressed the Conference and took part in the discussions.
