Calendar of Important Happenings Affecting Dairying in 1947

At the end of 1947 dairy production was stimulated by the high price level which went into effect with the removal of price ceilings on dairy products in the early summer. The consumption was well maintained, although slight reactions to higher prices were indicated during the last two months of the year. The more important announcements are recorded in chronological sequence below:

February 15 -- Maximum prices of evaporated milk were increased 12 cents per case, making the total price \$4.57 per case in Eastern Canada and \$4.67 in northern districts and Western Canada.

March 31 -- Restrictions on the output of ice cream were removed, leaving manufacturers free to produce any quantities desired. The addition of milk and cream in the production of ice cream mix was also legalized.

March 31 -- Orders regulating the number of processed cheese manufacturers and the quantities of cheddar used in processing were rescinded.

April 25 -- Orders controlling inter-provincial movements of butter and cheese were rescinded.

April 30 -- It was announced by the Minister of Agriculture that the British Ministry of Food had agreed to purchase at least 8,000,000 pounds of roller skim milk powder at 13½ cents per pound and 600,000 cases of evaporated milk at \$5.25 per case.

April 30 -- The contract price of first grade cheese exported to Britain was increased to 25 cents as compared with 20 cents in the previous year.

April 30 -- Butter-fat and cheese milk subsidies amounting to 10 cents per pound butter-fat and 30 cents per hundred of cheese milk, were discontinued as from this date.

May 1 -- To compensate producers for the loss of the subsidy and to encourage a higher level of production, the ceiling prices were increased by 10 cents per pound of butter, 3 cents per pound of cheese and 2 cents per pound of dairy butter and whey butter at all levels.

May 1 -- Condensed whole milk and skim milk prices were increased by 1 cent per pound, bringing the total price to 15 cents in the Maritimes, 14¹/₂ cents in the Central Provinces and 16 cents in Western Canada. Evaporated milk prices were advanced 30 cents per case above those of February 15, 1947.

May 12 -- Cheese prices which had been advanced on May 1 were made exclusive of any subsidies or bonuses paid by the Dominion or Provincial Government.

June 9 -- Butter rationing was lifted in Canada.

June 9 -- Orders covering the priority sales of evaporated milk were rescinded.

June 9 -- Ceiling prices on all dairy products were removed.

June 11 -- The Canadian Council of Agriculture meeting in Ottawa, recommended that the present price structure governing the sale of feed grains (floor prices, ceilings and drawbacks) be retained, and that the plans be made for the early movement of grains to Eastern Canada and British Columbia in order to prevent a probable feed shortage resulting from the late spring and the reduced acreages sown to coarse grains.

June 15 -- A cream marketing scheme to include all cream delivered directly or indirectly to creameries was announced by the Minister of Agriculture for Ontario.

August 21 -- Cheese produced in Ontario and Quebec up to November 30th was requisitioned for export by Order in Council.

September 15 -- Price ceilings were removed on mill feeds, concentrates, commercial mixed feeds, corn and buckwheat.

October 22 -- Price ceilings on oats, barley and screenings were removed, and at the same time subsidies amounting to 25 cents per bushel on wheat and barley and 10 cents per bushel on oats were discontinued by order of the Dominion Government. It was announced, however, that the feed grain freight assistance policy would remain in effect until July 31, 1948.

December 1-3 -- At the Dominion-Provincial Agricultural Conference held in Ottawa decisions were made in regard to the production programme for 1948.

Table I - SUMMARY OF DAIRY PRODUCTION AND FARM INCOME FROM SALES, 1946 AND 1947
