THE DAIRY REVIEW

Volume No. XX Report No. 1

JANUARY 1959

Price \$2.00 per year

THE DAIRY SITUATION IN 1958

Total milk production in Canada during 1958 is estimated to have reached 13,057,000,000 pounds, an increase of 751,000,000 lb. or 4.3 per cent over milk production in 1957. The increase over 1957 production in Manitoba, Saskatchewan and Ontario was greater than 4.3 per cent. Production of milk in Nova Scotia which showed the smallest increase, was just equal to production in 1957. Only in August and November was less milk produced than in corresponding months a year earlier. Increased milk production was reflected mostly in a pronounced increase in the manufacture of creamery butter. Less milk was used for other factory products, including cheddar cheese, than in 1957. About 2 per cent more milk was used for fluid milk and cream sales and slightly more milk was used on farms in 1958.

From Ontario westward, dry weather followed a fairly mild winter and land became workable early. The dry weather continued, however, and by late June pastures and the hay crop had been retarded. In contrast, ample rainfall in Quebec and the maritime provinces supported a heavy hay crop which in many areas was reduced in quality. Relief from the drought arrived in the latter half of the summer and except for hay, near normal yields of good quality field crops were obtained. It is interesting to note that in Saskatchewan, where hay and pastures suffered most severely, milk production in 1958 was higher than in 1957.

Gross farm cash income from dairying in 1958 increased by a greater percentage than did milk production because, on the average, the prices for milk and cream that prevailed throughout 1958 were slightly higher than in 1957.

COTTAGE CHIESE STATISTICS 1958

The annual survey of cottage cheese manufacturers has been completed and indications are that cottage cheese production has increased about one per cent from production in 1957.

	Production of C	ottage Cheese		
	1958 1000 lb	1957	Percent	Change
Maritime Provinces	582	526	+	11
Quebec	1,653	1,568	+	5
Ontario	8,330	8,642		4
Manitoba	1,720	1,664	+	3
Saskatchewan	650	570	+	14
Alberta	1,663	1,536	+	8
British Columbia	4,526	4,462	+	1
CANADA	19,124	18,968	+	1

Most cottage cheese is creamed. In 1957, 2,703,000 pounds and in 1958 2,764,000 pounds were reported as "not creamed". This makes up about 14 per cent of total cottage cheese production in both years.

THE DAIRY SITUATION IN JANUARY 1959

Milk production in Canada during the month of January is tentatively estimated at 1,028,000,000 pounds, an increase of 2.3 per cent over milk production in January, 1958.

No significant change from January 1958 was recorded for milk used in the manufacture of dairy factory products and therefore, the January increase in milk production must have been reflected mostly in sales of fluid milk and cream. All dairy factory products, except concentrated whole milk products, used less milk in January 1959 than in January 1958. The decrease from the corresponding month a year earlier in milk used for creamery butter was greater than in any month since July 1957. Most of the decrease was due to a 20 per cent reduction from January 1958 in the Quebec creamery butter make.

The revised annual statistics shown below are different from the preliminary figures shown last month in two respects. A slight downward revision was made to the figure for milk used in creamery butter, and milk utilized for the manufacture of concentrated whole milk products was revised downward from a one per cent increase over 1957 to a 5 per cent decrease. The revised estimates show that dairy factory products in 1958 used 6.5 per cent more milk than in 1957.

^{1/} Revised.

2/ Data are not available by months, for the products indicated.

Sales of fluid milk and cream in December were 4.4 per cent greater than in December 1957, and for the purpose of the tentative estimate fluid sales in January were expected to have exceeded those in January 1958 by the same amount. The December increase over the corresponding month in 1957 was in contrast to November which showed a decrease and October which only showed a 2 per cent increase.

Dairy Correspondents report one per cent more milk consumed in farm homes and almost 5 per cent more milk fed to livestock in January than in the same month a year ago. About 1/2 per cent fewer cows were reported on the farms surveyed and 1.5 per cent fewer cows were reported to be milking than in January 1958. Milk production per cow remained sharply higher than last year.

PRODUCTION, DISTRIBUTION AND PRICES OF DAIRY PRODUCTS IN DECEMBER, 1958

Butter

Production: Total butter production (including creamery, dairy and whey butter) amounted to 16.0 million pounds in December, 1958. This represented an increase of 0.4 million pounds or 3 per cent as compared with the same month last year. The January - December output of 350.0 million pounds was 10 per cent higher than the total for the same period of the previous year.

The Butter Supply: Holdings of butter in store and transit, which amounted to 106.8 million pounds at December 1, declined to 93.9 million pounds on January 1. Compared with last year, stocks at December 1, showed an increase of approximately 24.9 million pounds, while stocks at January 1, increased 23.8 million pounds. The quantity of butter represented by stocks on December 1, plus production and imports during the month, amounted to 122.8 million pounds. This was an increase of approximately 25.3 million pounds compared with last year.

Domestic Disappearance: The domestic disappearance of butter in December, including creamery, dairy and whey butter, amounted to 29.0 million pounds, an increase of 1.5 million pounds. On a per capita basis the domestic disappearance amounted to 1.70 pounds as compared with 1.66 pounds a year ago. During the January - December period the domestic disappearance of total butter amounted to 326.2 million pounds as compared with 336.4 million pounds in the same period of 1957; and the per capita disappearance of 19.13 pounds may be compared with 20.28 pounds a year earlier.

Butter Prices at Montreal: Butter prices at Montreal, based on dealers quotations for first grade solids, averaged 64 cents per pound in December, as compared with 62½ cents in December, 1957.

Cheddar Cheese

Production: Cheddar Cheese production in December, 1958 amounted to approximately 3.5 million pounds, an increase of 51 thousand pounds or 1 per cent from that produced in December, 1957.

Prices: Ontario coloured cheese at Montreal averaged 35% cents in December, 1958. This compares with 35 cents in December, 1957.

Concentrated Milk Products

The total quantity of concentrated milk products manufactured in December was approximately 32.4 million pounds, which represented an increase of 5.5 million pounds in comparison with the same month last year. Concentrated whole milk products increased 4.6 million pounds, while by-products registered an increase of 0.9 million pounds. Evaporated milk, one of the most important of the whole milk products increased 4.8 million pounds and the production of skim milk powder, the leading milk by-product, was 0.6 million pounds above the output of December, 1957.

Ice Cream

The quantity of ice cream manufactured in December was approximately 2.0 million gallons, an increase of 182 thousand gallons in comparison with December production a year earlier. Production during the twelve-month period January - December amounted to 36.5 million gallons. This represented an increase of 1.4 million gallons as compared with that produced in the same period of 1957.

FARM MILK PRODUCTION, UTILIZATION AND INCOME IN DECEMBER, 1958

Farm Milk Production: The estimated quantity of milk produced on farms in December amounted to 1,104,439,000 pounds. This represents an increase of 41 million pounds, 3.9 per cent above production in December, 1957. Of this amount 476 million pounds or 44 per cent was utilized in factory production, while fluid sales absorbed approximately 478 million pounds or 43 per cent of the total milk supply.

Fluid Sales: During December, sales of fluid milk and cream (the latter expressed as milk) amounted to 478,174,000 pounds, an increase of approximately 20 million pounds in comparison with the previous December. This included about 397 million pounds of fluid milk, comprising about 36 per cent of the farm milk supply and fluid cream sales of 81 million pounds representing 7 per cent.

Dairy Butter: Dairy butter production estimated at 905,000 pounds for December, exceeded production in the corresponding month of last year by 1,000 pounds.

Farm Cash Income: Cash income from the sale of dairy products in December amounted to \$33,033,000. This represented an increase of 5.8 per cent or \$1,808,000 in comparison with the same month last year. The weighted average price of \$3.46 per hundred pounds of milk was 5 cents higher than in December, 1957. Fluid milk at \$4.70 per hundred was 2 cents higher than that of December, 1957. Creamery butter-fat increased from 64.5 cents to 66.2 cents per pound, and dairy butter at 61 cents was the same as in December, 1957. Milk used in manufacture increased from \$2.99 per hundred in December, 1958. Cheese milk at \$2.78 per hundred, was 3 cents lower than in December, 1957.

CONVERSION RATES

To obtain the butter-fat or milk equivalent, multiply the pounds (or gallons) of product by the conversion rates shown under respective headings below.

Product (1b.)	Butter-fat (lb.)	Milk (lb.) 1/
	proter-rat (10%)	MITH (100) T)
Butter	.82	23.4
Cheese (Cheddar and other factory cheese made from whole milk)	.38	11.0
Ice Cream (gallons)	.60	17.0
Cottage Cheese (creamed)	.03	0.86
Cream Cheese	.36	10.3
Condensed Milk	.08	2.3
Evaporated Milk	.08	2.3
Whole Milk Powder	.28	8.0
Cream Powder	.735	21.0
Malted Milk	.087	2.5
Condensed Coffee	.078	2,22
		Skim Milk (lb.)
Condensed Skim Milk	040	3.0
Evaporated Skim Milk	***	3.0
Skim Mill: Powder		11.0
Casein	-	33.0
Cottage Cheese	-	7.0
		Buttermilk (lb.)
Condensed Buttermilk	00	3.0
Buttermilk Powder	400	12.0
		Whey (1b.)
Lactose (Sugar of Milk)		22.0
Whey Powder	- 7 11 - 11	20.0

NET WEIGHT OF STANDARD UNITS
