## THE DAIRY REVIEW

Volume No. XX Report No. 11

NOVEMBER 1959

Price \$2.00 per year

BIBLIOTHÈQUE  
FABRIK  
1911

Preliminary Indications of the Dairy Situation, November, 1959

Preliminary estimates show November milk production at 1.2 billion pounds, up 2 per cent over the corresponding month a year earlier. For the eleven months, January through November, milk production is estimated at 17 billion pounds, substantially the same as a year earlier.

Dairy factories used 594 million pounds of milk in November, 2.4 per cent more than in November last year. This increase can be attributed, in the main, to a larger output of cheddar cheese which more than offset a decline in the production of creamery butter. For the past seven months, monthly cheddar cheese production has exceeded that of the corresponding months last year; in May the increase was 1.3 per cent and by November the margin had widened to 43 per cent.

TABLE 1. - Milk Equivalent of Dairy Factory Products, November and Cumulative January to November, 1958 and 1959

Product	November			January - November		
	1958	1959	Percentage Change	1958	1959	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	441,511	431,894	(-) 2.2	7,512,945	7,212,863	(-) 4.0
Cheddar Cheese	55,572	79,387	(+) 42.9	957,462	1,093,147	(+) 14.2
Concentrated Whole Milk Products	49,006	48,393	(-) 1.3	882,992	913,874	(+) 3.5
Ice Cream	33,762	33,915	(+) 0.5	586,653	638,979	(+) 8.9
Totals	579,851	593,589	(+) 2.4	9,940,052	9,858,863	(-) 0.8

November fluid milk and cream sales are estimated at 465 million pounds, 3 per cent more than in November 1958. This has been the average increase of the last eleven months.

the

Estimates based on/monthly farm survey indicate that 141 million pounds of milk were used on farms, 4 per cent less than during November a year ago. Compared to last November, 4 per cent less milk was consumed in farm homes and 1.5 per cent more was fed to livestock.

Farmers included in the sample actually reported slightly lower milk production per cow than for November 1958. This does not conform to indications of total milk production based on factory and other utilizations, but the difference is within the margin of error that may be attributed to the survey.

Farm Milk Production, Utilization and Income in October, 1959

**Farm Milk Production:** The estimated quantity of milk produced on farms in October amounted to 1,573,271,000 pounds, an increase of 1.8 million pounds or 0.1 per cent above that of October, 1958. Of this amount, 939 million pounds or 60 per cent was utilized in factory production, and approximately 486 million pounds or 31 per cent was used for fluid sales. During January - October, the estimated production was 15,747 million pounds, an increase of 6 million pounds above that produced in the same period of the previous year. The quantity of milk utilized for factory production in January - October amounted to 9,362 million pounds while fluid sales accounted for 4,681 million pounds.

**Fluid Sales:** Sales of fluid milk and cream, the latter expressed as milk, amounted to 486,354,000 pounds in October, an increase of approximately 21 million pounds in comparison with October of the previous year. This included about 408 million pounds of fluid milk, comprising about 26 per cent of the farm milk supply, and fluid cream sales of 78 million pounds representing 5 per cent. During the ten month period, fluid sales totalled 4,680,994,000 pounds, an increase of 119 million pounds or approximately 2.6 per cent over those of the corresponding 1958 period.

**Farm Butter:** Butter made on farms in October amounted to 837,000 pounds, decreasing 20 per cent from the corresponding month in 1958. For January - October, 8,440,000 pounds were produced, a decrease of 15 per cent from the same period last year.

**Farm Cash Income:** Cash income from the sale of dairy products in October amounted to \$45,764,000. This represented an increase of approximately 4.8 per cent or \$2,095,000 in comparison with the same month last year. The weighted average price of \$3.21 per hundred pounds of milk was 13 cents higher than in October, 1958. Fluid milk at \$4.80 per hundred was 12 cents higher than in October, 1958. Creamery butter-fat increased from 66.3 cents to 67.7 cents per pound, and farm butter at 61 cents was 1 cent higher than in October, 1958. Milk used in manufacture increased from \$2.89 per hundred in October, 1958, to \$2.90 per hundred in October, 1959. Cheese milk increased to \$3.08 per hundred, an increase of 38 cents per hundred in comparison with the same month a year earlier.

## Production and Prices of Dairy Products in October, 1959

### Creamery Butter

**Production:** Creamery butter production amounted to 28.8 million pounds in October, 1959. This was 2.9 million pounds or approximately 9 per cent less than that produced in the same month of the previous year.

**Stocks:** Holdings of creamery butter in store and transit on November 1, amounted to 132.1 million pounds, approximately 18.2 million pounds greater than at November 1 last year. On October 1, 1959, stock holdings at 133.8 million pounds were 22.3 million pounds greater than at the same date a year earlier.

**Supply:** The quantity of creamery butter represented by stocks on October 1, plus production and imports during the month, amounted to 162.5 million pounds at October 31, 1959. This was an increase of approximately 19.5 million pounds compared to the corresponding supply figure at October 31, 1958.

**Domestic Disappearance:** The domestic disappearance of creamery butter in October amounted to 30.4 million pounds, an increase of 1.2 million pounds or 4 per cent from the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.76 pounds as compared with 1.71 pounds in October, 1958.

**Prices at Montreal:** Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 1/4 cents per pound in October as against 63 1/2 cents in October 1958.

### Cheddar Cheese

**Production:** Cheddar cheese production amounted to approximately 11.6 million pounds, an increase of 2.9 million pounds compared to production in the same month of the previous year.

**Prices:** Although very little trading occurred, the Montreal price of Ontario coloured cheese averaged 37 cents per pound in October. The comparative price in 1958 was 35 1/8 cents.

### Ice Cream

The quantity of ice cream manufactured in October was approximately 2.4 million gallons or 18 thousand gallons less than that produced a year ago.
