Advance Indications of the Dairy Situation in March, 1959

Total milk production in March, according to preliminary indications reached 1,168,000,000 pounds, 1.5 per cent more than in March 1958. This would bring the cumulative total for the first three months in 1959 to 3,149,000,000 pounds, 2.2 per cent greater than in the first quarter of 1958. Although the rate of increase in milk production is smaller, the expected leveling off was not evident in the first quarter.

Milk utilized in the manufacture of dairy products during March was 1.2 per cent greater than in March 1958. Creamery butter production, with a 1.5 per cent increase over March 1958, utilized most of the increase, although ice cream production was 5 per cent higher than in the same month last year. Cheddar cheese used 3 per cent less milk than in the corresponding month in 1958 and also slightly less milk was used for concentrated whole milk products. First quarter production in dairy factories used 2 per cent more milk than in the corresponding quarter of 1958. The products in order of importance, with increases over the same quarter last year in brackets, are: butter (1 per cent), concentrated milk (6 per cent) ice cream (4 per cent) and cheddar cheese (2 per cent).

TABLE 1. - Milk Equivalent of Dairy Factory Products, March and January to March, 1958 and 1959

Product	March			January - March		
	1958	1959	Percentage Change	1958	1959	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	342,810	348,005	(+ 1.5	384,240	392,921	(+ 1.0
Cheddar Cheese	38,038	36,960	(-) 2.8	84,909	86,812	(+ 2.2
Concentrated Whole Milk Products	64,717	64,337	(-) 0.6	150,003	159,326	(+ 6.2
Ice Cream	39,610	41,616	(+ 5.1	101,184	104,907	(+ 3.7
Totals	485,175	490,918	(+ 1.2	1,220,336	1,243,966	(+ 1.9

Fluid sales of milk and cream in February were 3 per cent higher than in February 1958. For the purpose of making the preliminary estimate of total milk production the same rate of increase was assumed for March.

Milk consumed in farm homes during March was 1 per cent lower than in March last year but in the first quarter it remained about the same as in the corresponding period a year earlier. This information was reported by farm correspondents who also indicated that 1 per cent more milk was fed to livestock during the first quarter although in March, livestock received 1 per cent less milk than in the same month a year ago. Cow numbers on reporting farms were down 1.6 per cent from last year, but the number of cows being milked was .6 per cent higher. Production per cow also was higher than at this time last year.

Farm Milk Production, Utilization and Income in February, 1959

Farm Milk Production: The estimated quantity of milk produced on farms in February amounted to 945,676,000 pounds, an increase of 30 million pounds or 3.3 per cent over that of February, 1958. Of this amount, 359 million pounds or 38 per cent was utilized in factory production, and approximately 443 million pounds or 47 per cent was used for fluid sales. During January and February the estimated production was 1,981 million pounds, an increase of 51 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in January-February amounted to 769 million pounds while fluid sales accounted for 918 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 443,147,000 pounds in February, an increase of approximately 13 million pounds in comparison with February of the previous year. This included about 374 million pounds of fluid milk, comprising about 40 per cent of the farm milk supply, and fluid cream sales of 69 million pounds representing 7 per cent. During the two month period, fluid sales totalled 917,875,000 pounds, an increase of 34 million pounds or approximately 4 per cent over those of the corresponding 1958 period.

Farm Butter: Butter made on farms in February amounted to 762,000 pounds, decreasing 5 per cent from the corresponding month in 1958. For January and February, 1,544,000 pounds were produced, a decrease of 7 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in February amounted to \$28,555,000. This represented an increase of approximately 5 per cent or \$1,410,000 in comparison with the same month last year. The weighted average price of \$3.55 per hundred pounds of milk was 4 cents higher than in February, 1958. Fluid milk at \$4.68 per hundred was 5 cents higher than February, 1958. Creamery butter-fat increased from 64.5 cents to 65.5 cents per pound, and dairy butter at 63 cents was 3 cents higher than in February, 1958. Milk used in manufacture increased from \$2.98 per hundred in February, 1958, to \$3.04 per hundred in February, 1959. Cheese milk increased to \$2.77 per hundred, an increase of 10 cents per hundred in comparison with the same month a year earlier.

Production and Prices of Dairy Products in February, 1959

CREAMERY BUTTER

Production: Creamery butter production amounted to 10.7 million pounds in February, 1959. This was 0.4 million pounds or approximately 4 per cent more than that produced in the same month of the previous year.

Stocks: Holdings of creamery butter in store and transit on March 1, amounted to 71.0 million pounds, approximately 24.2 million pounds higher than at March 1, last year. On February 1, 1959, stock holdings at 82.3 million pounds were 24.1 million pounds greater than at the same date a year earlier.

Supply: The quantity of creamery butter represented by stocks on February 1, plus production and imports during the month amounted to 93.0 million pounds at February 28, 1959. This was an increase of approximately 24.4 million pounds compared to the corresponding supply figure at February 28, 1958.

Domestic Disappearance: The domestic disappearance of creamery butter in February, amounted to 22.1 million pounds, an increase of 0.2 million pounds or 1 per cent over the corresponding figure for the month last year. On a per capita basis it amounted to 1.28 pounds, the same as in February, 1958.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 64 cents per pound in February as against 62½ cents in February, 1958.

CHEDDAR CHEESE

Production: Cheddar cheese production amounted to approximately 2.1 million pounds, an increase of 0.3 million pounds compared to production in the same month of the previous year.

Prices: The Montreal price of Ontario coloured cheese averaged 36 cents per pound in February. The comparative price in 1958 was 35¼ cents.

ICE CREAM

The quantity of ice cream manufactured in February was approximately 1.9 million gallons or 171 thousand gallons more than that produced a year ago.
