THE DAIRY REVIEW

Volume No. XX Report No. 5

MAY 1959

Price \$2.00 per year

Preliminary Indications of the Dairy Situation in May, 1959

Milk production in Canada during May, according to the preliminary estimate, amounted to about 1,800,000,000 pounds, 2 per cent less than in May, 1958. Cumulative January to May milk production however, is estimated at 6,400,000,000 pounds, 0.3 per cent greater than production in the same period a year earlier.

The manufacture of dairy factory products in May utilized about 4 per cent less milk than in May, 1958. The greatest decrease occurred in creamery butter manufacture which was 5 per cent below that of last May. Concentrated whole milk products also used 5 per cent less milk than in the corresponding month last year. Cheddar cheese and ice cream production on the other hand, used 1 per cent and 8 per cent, respectively, more milk than in the same month a year earlier.

TABLE 1. - Milk Equivalent of Dairy Factory Products, May and January to May, 1958 and 1959

		May		January - May			
Product	1958	1959	Percentage Change	1958	1959	Percentage Change	
	1000 lb.	0000 lb.	%	000 1b.	1000 lb.	%	
Creamery Butter Cheddar Cheese	850,472 106,810	806,083	(-) 5.2 (+) 1.3	2,293,668 257,136	2,267,086 262,064		
Concentrated Whole Milk Products Ice Cream	113,965	108,583 69,428	(-) 4.7 (+) 8.0	358,205 218,518	354,115 226,321		
Totals	1,135,558	1,092,257	(-) 3.8	3,127,527	3,109,586	(-) 0.6	

Fluid milk and cream sales, for the purpose of the preliminary estimate, were estimated to have increased 1.7 per cent over fluid sales in May 1958. This is the increase shown by both April and February to April, over the corresponding periods a year earlier.

Indications from the dairy correspondents survey are that milk consumed in farm homes was 2 per cent lower in May and 1 per cent lower in the first five months than in the corresponding periods last year. In May and in the January-May period, 1 per cent more milk was pail fed to livestock than in the corresponding periods in 1958. One per cent fewer milk cows were reported to be milked by farmers reporting in the monthly survey, but milk production per cow was still reported to be higher than in the same month last year.

Pasture growth started slowly in most provinces. Winterkilling was reported in parts of Prince Edward Island and New Brumswick and cold dry weather retarded pasture growth. Conditions during May were only slightly better in Nova Scotia. Quebec, on the other hand, experienced a fairly early spring although pastures did not benefit as much as did the seeding. Sixty-seven per cent of the dairy correspondents in Quebec reported pastures in May on their farms to be good or excellent. The corresponding figure for Ontario was 77 per cent. Pastures in Manitoba and Alberta were reported to be in fairly good condition, but in Saskatchewan, cool dry weather and low moisture reserves held back growth. In contrast, 80 per cent of the dairy correspondents in British Columbia reported pastures to be good or excellent on May 15.

Federal Government Assistance Programme for the Dairy Industry

The Honourable Douglas S. Harkness, Minister of Agriculture, announced in the House of Commons on April 23 price supports that will be in effect for dairy products during the 12 month period commencing May 1, 1959.

Creamery Butter - the support price will continue at 64 cents per pound, for Canada First Grade butter packed to government specifications delivered to Montreal or Toronto.

Cheddar Cheese - the support price will be 32 cents per pound, for First Grade cheddar cheese, f.o.b. warehouse in Ontario, and 31½ cents per pound, delivered Montreal, for Quebec cheddar cheese.

Skim Milk Powder - the support price will be reduced from 15 cents to 10 cents per pound for spray skim milk powder and from 12 cents to 8 cents per pound for roller skim milk powder in the period May 1 to September 30, after which date the support price for skim milk powder will be discontinued.

Whole Milk Utilized for the Manufacture of Dairy Factory Products - a payment of 25 cents per hundred pounds will be made for all whole milk used in the manufacture of dairy factory products except milk that is supplied by producers who, at any time, sell milk for bottling purposes.

The support programme for dairy products was designed to cut down production of skim milk powder and increase production and consumption of cheese and the production of other dairy products such as casein. The payments for milk used in manufacture will supplement the income of dairy farmers who ship all of their milk to dairy factories, a relatively low priced market for milk.

On May 1 the Agriculture Stabilization Board announced that it would purchase butter which was solid packed and without specifications as to the required colour, salt content, number of parchment liners, or type of package to be used. The butter may be tendered to the board after the original grading, but not later than 8 weeks after manufacture. The board will pay 60 cents per pound basis, Halifax, Saint John, Montreal and Toronto; 59 cents per pound basis Vancouver. The seller undertakes to repurchase the butter so tendered on or before March 15, 1960, at the price originally paid by the board, f.o.b. storage. This plan was set up to enable a firm to buy back its own butter rather than take the next shipment of butter that was available as in the regular support programme.

Farm Milk Production, Utilization and Income in April, 1959

Farm Milk Production: The estimated quantity of milk produced on farms in April amounted to 1,461,250,000 pounds, an increase of 5 million pounds or 0.4 per cent over that of April, 1958. Of this amount, 782 million pounds or 53 per cent was utilized in factory production, and approximately 461 million pounds or 32 per cent was used for fluid sales. During January - April, the estimated production was 4,597 million pounds, an increase of 60 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in January-April amounted to 2,051 million pounds while fluid sales accounted for 1,853 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 461,155,000 pounds in April, an increase of approximately 8 million pounds in comparison with April of the previous year. This included about 388 million pounds

of fluid milk, comprising about 27 per cent of the farm milk supply, and fluid cream sales of 73 million pounds representing 5 per cent. During the four month period, fluid sales totalled 1,853,267,000 pounds, an increase of 45 million pounds or approximately 2.5 per cent over those of the corresponding 1958 period.

Farm Butter: Butter made on farms in April amounted to 849,000 pounds, decreasing 17 per cent from the corresponding month in 1958. For January - April, 3,172,000 pounds were produced, a decrease of 11 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in April amounted to \$39,411,000. This represented an increase of approximately 2 per cent or \$759,000 in comparison with the same month last year. The weighted average price of \$3.17 per hundred pounds of milk was 4 cents higher than in April, 1958. Fluid milk at \$4.67 per hundred was 6 cents higher than April, 2958. Creamery butter-fat increased from 65.6 cents to 66.0 cents per pound, and farm butter at 63 cents was 2 cents higher than in April, 1958. Milk used in manufacture increased from \$2.86 per hundred in April, 1958, to \$2.89 per hundred in April, 1959. Cheese milk increased to \$2.62 per hundred, an increase of 11 cents per hundred in comparison with the same month a year earlier.

Production and Prices of Dairy Products in April, 1959

CREAMERY BUTTER

Production: Creamery butter production amounted to 24.3 million pounds in April, 1959. This was 0.4 million pounds or approximately 2 per cent more than that produced in the same month of the previous year.

Stocks: Holdings of creamery butter in store and transit on May 1, amounted to 62.2 million pounds, approximately 26.9 million pounds higher than at May 1, last year. On April 1, 1959, stock holdings at 61.7 million pounds were 24.5 million pounds greater than at the same date a year earlier.

Supply: The quantity of creamery butter represented by stocks on April 1, plus production and imports during the month amounted to 86.0 million pounds at April 30, 1959. This was an increase of approximately 24.9 million pounds compared to the corresponding supply figure at April 30, 1958.

Domestic Disappearance: The domestic disappearance of creamery butter in April, amounted to 23.8 million pounds, a decrease of 2.0 million pounds or 8 per cent from the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.37 pounds, as compared with 1.51 pounds in April, 1958.

Prices at Montreal: Butter prices at Montreal, based on dealers quotations for first grade solids, averaged 63% cents per pound in April as against 62% cents in April, 1958.

CHEDDAR CHEESE

Production: Cheddar cheese production amounted to approximately 6.1 million pounds, an increase of 0.2 million pounds compared to production in the same month of the previous year.

Prices: The Montreal price of Ontario coloured cheese averaged 36 cents per pound in April. The comparative price in 1958 was 34 7/8 cents.

ICE CREAM

The quantity of ice cream manufactured in April, was approximately 3.1 million gallons or 61 thousand gallons less than that produced a year ago.
