DOMINION BUREAU OF STATISTICS

OTTAWA - CANADA

Published by Authority of the Hon. Gordon Churchill, Minister of Trade and Commerce

THE DAIRY REVIEW

JUNE 1959 Price \$2.00 per year Volume No. XX Report No. 6 MILLION TOTAL MILK PRODUCTION AND UTILIZATION FOR CANADA BY MONTHS 1958 AND 1959 2,400 2,400 STATISTICS STATISTIQUE CANADA CANADA 2,200 2,200 A00 14 1007 2,000 2,000 LIBRARY BIBLIOTHÈQUE 1,800 1,800 1,600 1,600 CREAMERY BUTTER 1,400 1,400 1,200 1,200 1,000 1,000 USED IN 800 800 FACTORIES CHEDDAR CHEESE 600 600 USED ON FARMS 400 400 USED FOR FLUID CONSUMPTION 200 200 0 0 J 1958 1959

Total milk production in Canada during June was tentatively estimated at about 2,116,000,000 pounds, almost equal to milk production in June, 1958. Milk production in the first six months of 1959 at 8,502,000,000 pounds, was also at the same level as production for this period last year.

Milk utilized for dairy factory products in June also remained at the same level as last year but was about 1/2 per cent below the first six months of 1958. Creamery butter production in June and for the first half of the year was one per cent lower than the corresponding periods last year, while cheddar cheese used 1.5 per cent more milk both in June and in the January to June period. About 7 per cent less milk was used for concentrated whole milk products in June compared to June, 1958, but 25 per cent more milk was used for ice cream.

TABLE 1. - Milk Equivalent of Dairy Factory Products, June and January to June, 1958 and 1959

		June		J	anuary - Ju	ne

Fluid milk and cream sales, for the purpose of the tentative estimate, were assumed to have increased 0.3 per cent over fluid sales in June, 1958. This is the increase from March through May over the corresponding 3 month period a year earlier.

The monthly survey of dairy correspondents indicates that about one-half of one per cent less milk was consumed on farm homes in June than in June 1958 and in the first six months of 1959, one per cent less milk was consumed in farm homes. Milk pail fed to livestock, however, was reported 1 per cent higher than in the corresponding period a year ago, both in June and in the first six months. About 2 per cent fewer cows than last June were reported to be on the farms covered in the survey but only one per cent fewer cows were reported milking. Milk production per cow on these farms in June was reported to be higher than in the corresponding month last year, continuing the trend evident in previous months.

According to the Bureau's Telegraphic Crop Reports, pastures in June were good in all parts of Canada except Saskatchewan where they were only fair. Dairy correspondents confirm this information. Pastures were rated good or excellent at June 15 by 73 per cent of all dairy correspondents. At June 15, 1958, only 60 per

cent of these reporters indicated that pastures were good or excellent. Pastures in the maritime provinces were slow to recover from the hard winter, but by the end of June, growth was about normal. The weather was cool and moisture ample, particularly in Prince Edward Island and Nova Scotia. In both Ontario and Quebec 89 per cent of the dairy correspondents reported pastures to be good or excellent. Pastures in both provinces showed improvement compared to last June when 81 per cent of the dairy correspondents in Quebec and 70 per cent of the dairy correspondents in Ontario reported pastures good or excellent. On the Prairies, pastures were generally dry, particularly so in Saskatchewan. Timely showers improved pastures compared to last June in Saskatchewan and Manitoba while pastures were about the same as last June in Alberta. Pastures in British Columbia remained good.

Farm Milk Production, Utilization and Income in May, 1959

Farm Milk Production: The estimated quantity of milk produced on farms in May amounted to 1,788,633,000 pounds, a decrease of 54 million pounds or 2.9 per cent below that of May, 1958. Of this amount, 1,101 million pounds or 62 per cent was utilized in factory production, and approximately 479 million pounds or 27 per cent was used for fluid sales. During January — May the estimated production was 6,385 million pounds, an increase of 6 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in January—May amounted to 3,151 million pounds while fluid sales accounted for 2,332 million pounds.

Fluid Siles: Sales of fluid milk and cream, the latter expressed as milk, amounted to 478,649,000 pounds in May, a decrease of approximately 5 million pounds in comparison with May of the previous year. This included about 398 million pounds of fluid milk, comprising about 22 per cent of the farm milk supply, and fluid cream sales of 81 million pounds representing 5 per cent. During the five month period, fluid sales totalled 2,331,916,000 pounds, an increase of 39 million pounds or approximately 1.7 per cent over those of the corresponding 1958 period.

Farm Butter: Butter made on farms in May amounted to 909,000 pounds, decreasing 15 per cent from the corresponding month in 1958. For January - May, 4,081,000 pounds were produced, a decrease of 12 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in May amounted to \$18,618,000. This represented a decrease of approximately 5.3 per cent or \$1,043,000 in comparison with the same month last year. The weighted average price of \$2.99 per hundred pounds of milk was 2 cents higher than in May, 1958. Fluid milk at \$4.63 per hundred was 7 cents higher than in May, 1958. Greamery butter-fat decreased from 66.0 cents to 65.9 cents per pound, and farm butter at 60 cents was 2 cents lower than in May, 1958. Milk used in manufacture decreased from \$2.84 per hundred in May, 1958, to \$2.80 per hundred in May, 1959. Cheese milk increased to \$2.74 per hundred, an increase of 25 cents per hundred in comparison with the same month a year earlies.

Production and Prices of Dairy Products in May, 1959

Creamery Butter

Production: Creamery butter production amounted to 34.4 million pounds in May, 1959. This was 1.9 million pounds or approximately 5 per cent less than that produced in the same month of the previous year.

Stocks: Holdings of creamery butter in store and transit on June 1, amounted to 71.6 million pounds, approximately 26.7 million pounds greater than at June 1, last year. On May 1, 1959, stock holdings at 62.2 million pounds were 26.9 million pounds greater than at the same date a year earlier.

Supply: The quantity of creamery butter represented by stocks on May 1, plus production and imports during the month amounted to 96.7 million pounds at May 31, 1959. This was an increase of approximately 25.0 million pounds compared to the corresponding supply figure at May 31, 1958.

Domestic Disappearance: The domestic disappearance of creamery butter in May amounted to 25.1 million pounds, a decrease of 1.7 million pounds or 6 per cent from the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.45 pounds as compared with 1.57 pounds in May, 1958.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 632 cents per pound in May as against 623 cents in May, 1958.

Cheddar Cheese

Production: Cheddar cheese production amounted to approximately 9.8 million pounds, an increase of about 123 thousand pounds compared to production in the same month of the previous year.

Prices: The Montreal price of Ontario coloured cheese averaged 35 cents per pound in May. The comparative price in 1958 was 34 3/8 cents.

Ice Cream

The quantity of ice cream manufactured in May was approximately 4.1 million gallons or 301 thousand gallons more than that produced a year ago.
