Fistorical File Copy

The preliminary estimate of milk produced in November is 1,321,500,000 pounds. This is an increase of 8.1 per cent over mills production in November, 1960. Milk production for the first eleven months of the year was estimated at 17,932,200,000 pounds, 4.0 per cent above production in the January = November period a year ago.

About 53 per cent of the milk produced in November, or 703,700,000 pounds, was used for dalry factory products. Dairy factory utilization was 15.6 per cent greater than in November, 1960, with increased quantities going into all products except concentrated milk. The quantity going into creamery butter production was up 19.8 per cent over last year. More milk was also used for the production of factory cheese and ice cream mix than in November last year, with increases of 22.4 and 6.8 per cent, respectively, for these two products. Concentrated milk products utilized 14.8 per cent less milk than a year ago. During the January - November period, 6.2 per cent more milk was used in dairy factory products than in the same eleven month period in 1960.

TABLE 1. - Milk Equivalent of Dairy Factory Products, November and January to November, 1960 and 1961

| Product | November |  |  | January - November |  |  |

1/ Data include cheddar and other whole milk and cream cheese.

Fluid sales of milk and cream in October increased 0.6 per cent over sales last year. Assuming about the same rate of increase for November, fluid sales accounts for $475,500,000$ pounds or about 36 per cent of the preliminary estimate of total milk production.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was the same as that used in November, 1960, while milk used for livestock feeding was 9.3 per cent above that of a year ago. Farm dairy correspondents report 0.4 per cent more milk cows kept on farms at November 15, and 2.3 per cent more cows being milked than at the same time last year. Milk production per cow, for cows milked on farms in the sample, increased 2.8 per cent above the level at November 15, 1960.

Farm Mink Production, Utilization and Income in October, 196:
ParII Milk Productions The estimated quantity of milk produced on fanins in October amounted to 1,658 miilion pounds, an increase of 165 million pounds or 11.1 per cent over that of October, 1960. of this amount, 1,022 mililion pounds or 62 per cent was utilized in factory productiong and approximately 487 miliion pounds or 29 per cent was used for fluid sales. During the January - October poriod, the estimated production was 16,611 million pounds, an increase of 583 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January - October period amounted to 10,086 million pounds while fluld sales accounted for 4 , 810 million pounds.

Fluid Sales: Sales of fluid milik and cream, the latter expressed as milk, amounted to 487 million pounds in October, an increase of approximately 3 million pounds in comparison with Octobor of the previous year. This included about 410 million pounds of fluid milk, comprising about 25 per cent of the farm milk supply, and fluid cream sales of 77 million pounds representing 4 per cent. During the ten month period, fluid sales totalled 4,810 million pounds, an increase of 57 million pounds or 1.2 per cent over those of the corresponding 1960 period.

Farm Butter: Butter made on farms in October amounted to 756,000 pounds, decreasing 11 per cent from the corresponding month in 1960. For the Janugry October period, 6,963,000 pounds were produced, a deerease of 14 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in October amounted to $\$ 47,181,000$. This represented an increase of 8.8 per cent or $\$ 3,830,00 \%$ in comparison with the same month last year. The weighted average velue of $\$ 3.13$ pes hundred pounds of milk was 9 cents lower than in October, 1960. Fluid milk at \$4081 per hundred was 3 cents higher than in October, 1960. Greamery butter-fat decreased from 69.0 cents to 68.7 cents per pound, and farm butter at 62 cents per pound was the same as in October, 1960. Milk used in manufaeture averaged \$2.74 per hundred, 10 cents lower than in October, 1960. Cheese milk decreased to $\$ 2.62$ per hundred, a decrease of 2 cente per hundred in comparison with the same month a year sarlier.

Farm cach income ostimates cover all monoy received by farmers for the sale of milk, cream and farm butter. Goverment subsidies and bonuses are included in these estimates.

Production and Prices of Dairy Products in October, 1961
Creamery Butter
Productions Greamery butter production amounted to 32.4 million pounds in October, 1961. This was 6.8 million pounds or approximately 27 per cent more than that produced in the same month of the previous year.

Stocks: Holdings of cresmery butter in store and transit on November 1 amounted to 159.7 million pounds, approximately $25 . \mathrm{C}$ million pounds higher than at November I last year. On October $I_{9} 1961$, stock holdings at 159.0 million pounds were 20.0 million pounds greater than at the same date a year earlier. It should also be noted that 43.7 million pounds of butter oil was reported held in cold storage on November 1, compared with 37.4 million pounds reported in storage on October 1, 1961。

Supply: The quantity of creamery butter represented by stocks on October 1, plus production and imports during the month, amounted to 191.4 million pounds at October 31, 1961. This was an increase of approximately 26.9 million pounds compared to the corresponding supply figure at October 31. 1960.

Domestic Disappearance: The domestic disappearance of creamery butter in October amounted to 23.7 million pounds, a decrease of 3.3 million pounds or 12 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.31 pounds as compered with 1.51 pounds in October, 1960.

Prices at Montreal: Butter prices at Montreal, based on dealers ${ }^{1}$ quotations for first grade solids, averaged $62 \mathrm{l} / 2$ cents per pound in October as against $631 / 4$ cents in October, 1960.

Cheddar Cheese
Production: Cheddar cheese production amounted to approximately 11.2 million pounds, an increase of about 1.4 million pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged $343 / 4$ cents per pound in October. The comparative price in 1960 was 33 cents. Ice Oream Mix

The quantity of ice cream mix manufactured in October was approximately 1.4 million gallons or 109 thousand gallons more than that produced a year ago.

TABLE 2. - Ice Greams Production of Hard and Soft Types, Canada, by Province, November and Cumulative January to November, 1961
Notes Data compiled from reports by mix manufacturors who report ice cream production and mix sales. Not comparable to old ice cream estimate of mix production $\times 2$ because of variations in stocks and overrun.
