

THE DAIRY REVIEW

Volume No. XXIII Report No. 3

MARCH 1962

Price: \$ 2.00 per year

Preliminary Indications of the Dairy Situation, March, 1962

The preliminary estimate of milk produced in March is 1,294,000,000 pounds. This is 0.2 per cent less than production in the same month last year, and would make the total estimate of production during the first three months of the year 3,468,000,000 pounds. This is 2.0 per cent higher than production in the January - March period a year ago.

About 46 per cent of the milk produced in March, or 598,000,000 pounds, was used for dairy factory products. Compared to March, 1961, this represented a decline of 1.0 per cent and is the first time in 15 months that dairy factory utilization has fallen below that of the corresponding month a year earlier. Only slightly less milk was used in the manufacture of creamery butter and factory cheese than a year ago, but that used for concentrated whole milk products declined 9.4 per cent. Ice cream mix on the other hand, utilized 4.9 per cent more milk than in March, 1961. Following closely the pattern for creamery butter, milk utilized for factory cheese fell below that of the corresponding month a year earlier for the first time since February, 1961.

TABLE 1. - Milk Equivalent of Dairy Factory Products, March and January to March, 1961 and 1962

Product	March			January - March		
	1961	1962	Percentage Change	1961	1962	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	411,022	409,500	(-) 0.4	1,034,958	1,061,354	(+) 2.6
Factory Cheese <u>1/</u>	67,596	67,470	(-) 0.2	152,386	170,396	(+) 11.8
Concentrated Whole Milk Products	75,132	68,094	(-) 9.4	182,896	168,168	(-) 8.1
Ice Cream Mix	50,048	52,496	(+) 4.9	118,898	125,596	(+) 5.6
Totals	603,798	597,560	(-) 1.0	1,489,138	1,525,514	(+) 2.4

1/ Data include cheddar and other whole milk and cream cheese.

Fluid sales of milk and cream in March, for the purpose of the preliminary estimate, were assumed to have amounted to 511,000,000 pounds, an increase of 2.3 per cent over fluid sales in March, 1961. This is the percentage increase shown in the month of February, when compared to sales a year earlier.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was slightly less than one per cent below that used in March, 1961, while milk used for livestock feeding was 6.1 per cent below that of a year ago. Farm dairy correspondents participating in the survey, report 1.5 per cent more cows on farms at March 15, but 0.5 per cent less cows being milked than at the same date last year.

Farm Milk Production, Utilization and Income in February, 1962

Farm Milk Production: The estimated quantity of milk produced on farms in February, amounted to 1,036 million pounds, an increase of 17 million pounds or 1.7 per cent over that of February, 1961. Of this amount, 430 million pounds or 42 per cent was utilized in factory production, and approximately 468 million pounds or 45 per cent was used for fluid sales. During the January - February period, the estimated production was 2,175 million pounds, an increase of 69 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January - February period amounted to 928 million pounds while fluid sales accounted for 963 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 468 million pounds in February, an increase of approximately 10 million pounds in comparison with February of the previous year. This included about 394 million pounds of fluid milk, comprising about 38 per cent of the farm milk supply, and fluid cream sales of 74 million pounds representing 7 per cent. During the two month period, fluid sales totalled 963 million pounds, an increase of 27 million pounds or 2.8 per cent over those of the corresponding 1961 period.

Farm Butter: Butter made on farms in February amounted to 530,000 pounds, decreasing 10 per cent from the corresponding month in 1961. For the January - February period, 1,072,000 pounds were produced, a decrease of 12 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in February amounted to \$31,406,000. This represented an increase of 1.5 per cent or \$459,000 in comparison with the same month last year. The weighted average value of \$3.49 per hundred pounds of milk was 2 cents lower than in February, 1961. Fluid milk at \$4.76 per hundred was the same as in February, 1961. Creamery butter-fat decreased from 68.1 cents to 66.9 cents per pound, and farm butter at 62 cents per pound was the same as in February, 1961. Milk used in manufacture averaged \$2.81 per hundred, 1 cent lower than in February, 1961. Cheese milk increased to \$2.64 per hundred, an increase of 2 cents per hundred in comparison with the same month a year earlier.

Farm cash income estimates cover all money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates.

Production and Prices of Dairy Products in February, 1962

Creamery Butter

Production: Creamery butter production amounted to 12.7 million pounds in February, 1962, a decrease of approximately 59 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on March 1 amounted to 183.6 million pounds, approximately 67.2 million pounds higher than at March 1 last year. On February 1, 1962, stock holdings at 190.8 million pounds were 65.5 million pounds greater than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on February 1, plus production and imports during the month, amounted to 203.5 million pounds at February 28, 1962. This was an increase of approximately 65.4 million pounds compared to the corresponding supply figure at February 28, 1961.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in February amounted to 19.8 million pounds, a decrease of 1.7 million pounds or 8 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.08 pounds as compared with 1.18 pounds in February, 1961.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 1/2 cents per pound in February, as against 64 cents in February, 1961.

Cheddar Cheese

Production: Cheddar cheese production amounted to approximately 3.4 million pounds, an increase of about 0.5 million pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 32 1/2 cents per pound in February. The comparative price in 1961 was 32 3/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in February was approximately 1.1 million gallons or 45 thousand gallons more than that produced a year ago.

TABLE 2. - Ice Cream: Production of Hard and Soft Types, Canada, by Province, March and Cumulative January to March, 1962

Note: Data compiled from reports by mix manufacturers who report ice cream production and mix sales. Not comparable to old ice cream estimate of mix production x 2 because of variations in stocks and overrun.
