THE DAIRY REVIEW

PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

MAY 15th 1963

MAY 15th 1962

The preliminary estimate of fluid milk produced in May is 1,902,000,000 pounds. This is 1.5 per cent lower than production in the same month last year, and would make the total estimate of production during the first five months of the year 6,980,000,000 pounds. This is 0.4 per cent higher than production in the January - May period a year ago.

About 62 per cent of the milk produced in May, or 1,184,000,000 pounds, was used for dairy factory products. This was 2.4 per cent below factory utilization in May, 1962. Less milk was utilized for the manufacture of creamery butter and ice cream mix than a year ago, which more than offset respective increases of 21.0 and 4.3 per cent in milk utilized for cheese and concentrated whole milk products. The increased subsidy on cheese milk, from 25 to 30 cents per hundredweight effective May 1, 1963, probably has influenced the sharp increase in milk used for cheese. During the January - May period, 0.1 per cent less milk was used in dairy factory products than in the corresponding period in 1962.

TABLE 1. - Preliminary Estimates of Milk Equivalent of Dairy Factory Products,
May and January to May, 1962 and 1963

		May		January - May			
Product	1962	1963	Percentage Change	1962	1963	Percentage Change	
	*000 lb.	'000 lb.	%	'000 lb.	1000 lb.	%

Totals	1,212,860	1,184,018	(-) 2.4	3,567,425	3,562,894	(-) 0.1	

Fluid sales of milk and cream in May, for the purpose of the preliminary estimate, are calculated at 513,200,000 pounds, an increase of 2.1 per cent over fluid sales in May, 1962. This assumes the same relationship to year-earlier estimates as for the February - April period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.0 per cent below that used in May, 1962, while milk used for livestock feeding dropped 4.7 per cent from that of a year ago. Farm dairy correspondents participating in the survey, report 2.4 per cent fewer cows kept on farms at May 15, and 2.8 per cent less cows being milked than at the same date last year.

Weather conditions throughout May were generally cool. However, seeding was practically completed in most areas by the end of May and pasture conditions were generally good. May precipitation was generally above normal in most regions of Canada except in the Maritime provinces and particularly southern Alberta. Regional pasture conditions at May 15, 1962 and 1963, are shown by the maps on the opposite page.

It should be noted here that the 1962 comparative data used and published throughout this report with respect to milk production, utilization and income, are unrevised and exactly as published during the year.

Farm Milk Production, Utilization and Income in April, 1963

Farm Milk Production: The estimated quantity of milk produced on farms in April amounted to 1,586 million pounds, an increase of 50 million pounds or 3.3 per cent over that of April, 1962. Of this amount, 858 million pounds or 54 per cent was utilized in factory production, and approximately 504 million pounds or 32 per cent was used for fluid sales. During the January - April period, the estimated production was 5,078 million pounds, an increase of 55 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January - April period amounted to 2,379 million pounds while fluid sales accounted for 2,012 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 504 million pounds in April, an increase of approximately 25 million pounds in comparison with April of the previous year. This included about 424 million pounds of fluid milk, comprising about 27 per cent of the farm milk supply, and fluid cream sales of 80 million pounds representing 5 per cent. During the four month period, fluid sales totalled 2,012 million pounds, an increase of 39 million pounds or 2,0 per cent over those of the corresponding 1962 period.

Farm Butter: Butter made on farms in April amounted to 416,000 pounds, decreasing 30 per cent from the corresponding month in 1962. For the January - April period, 1,647,000 pounds were produced, a decrease of 26 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in April amounted to \$43,320,000. This represented an increase of 5.4 per cent or \$2,207,000 in comparison with the same month last year. The weighted average value of \$3.18 per hundred pounds of milk was 4 cents higher than in April, 1962. Fluid milk at \$4.75 per hundred was the same as in April, 1962. Creamery butterfat increased from 66.6 cents to 67.7 cents per pound, and farm butter at 57 cents per pound was 4 cents lower than in April, 1962. Milk used in manufacture averaged \$2.65 per hundred, 3 cents higher than in April, 1962. Cheese milk increased to \$2.71 per hundred, an increase of 12 cents per hundred in comparison with the same month a year earlier.

Farm cash income estimates cover all money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates. Production and Prices of Dairy Products in April, 1963

Creamery Butter

Production: Creamery butter production amounted to 26.7 million pounds in April, 1963, an increase of approximately 1.5 million pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on May 1, 1963, amounted to 203.5 million pounds, approximately 19.0 million pounds higher than at May 1 last year. On April 1, 1963, stock holdings at 205.3 million pounds were 28.9 million pounds greater than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on April 1, plus production and imports during the month, amounted to 232.0 million pounds of butter at April 30, 1963. This was an increase of approximately 30.4 million pounds compared to the corresponding supply figure at April 30, 1962.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in April amounted to 28.5 million pounds of butter, an increase of 11.4 million pounds or 66.7 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.52 pounds as compared with .92 pounds in April, 1962. Trade adjustments in anticipation of the lower retail price was responsible for the apparent decrease in butter consumption in April a year ago.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 51 cents per pound in April, as against 62 1/2 cents in April, 1962.

Cheddar Cheese

Production: Cheddar cheese production in April, amounted to approximately 8.8 million pounds, an increase of 1.0 million pounds as compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 35 3/4 cents per pound in April. The comparative price in 1962 was 32 1/2 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in April was approximately 1.9 million gallons or 142 thousand gallons more than that produced a year ago.

Skim Milk Powder Sales in May, 1963

As additional statistical service to the dairy industry, a new survery on net f.o.b. plant selling prices of skim milk powder was started in April. In this survey manufacturing plants are required to report the quantity of product sold in price ranges with intervals of 0.5 cents.

Table 15 is a summary of these reports for the month of May. At time of publication reports had not been received from 4 of 68 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces.

TABLE 15. - Total Reported Domestic Sales of Skim Milk Powder with Related Price Data, Quebec and Ontario, May, 1963

(Data on Export Sales not included due to disclosure provisions of Statistics Act)

P .	Domestic Sales of Skim Milk Powder
