PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, NOVEMBER, 1964

The preliminary estimate of milk produced in November is 1,251,000,000 pounds. This is 1.2 per cent higher than production in the same month last year and would make the total estimate of production during the first eleven months of the year 17,268,000,000 pounds. This is 0.3 per cent above production in the January-November period a year ago.

Slightly more than 55 per cent of the milk produced in November, or 689,000,000 pounds, was used for dairy factory products. This was 1.8 per cent above factory utilization in November, 1964, with increased quantities going into all but concentrated whole milk products. Approximately 12.2 per cent less milk was utilized for the manufacture of concentrated whole milk products in November than a year ago, while that for butter, cheese and ice cream mix increased 2.8, 3.3 and 6.5 per cent, respectively. During the January-November period, slightly more milk was used in dairy factory products than in the corresponding period in 1963.

TABLE 1.- Preliminary Estimates of Milk Equivalent of Dairy Factory Products, November and January to November, 1963 and 1964.

Fluid sales of milk and cream during November, for the purpose of the preliminary estimate, are calculated at 429,900,000 pounds, an increase of 1.4 per cent over fluid sales in November, 1963. This assumes the same relationship to year-earlier estimates as for the August-October period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 4.6 per cent below the quantity used in November, 1963, while 5.4 per cent more milk was used for livestock feeding. Farm dairy correspondents participating in the survey, report 1.6 per cent more cows kept on farms at November 15, and the same percentage being milked as a year ago at the same date.

FARM MILK PRODUCTION, UTILIZATION AND INCOME IN OCTOBER, 1964.

Farm Milk Production: The estimated quantity of milk produced on farms in October amounted to 1,538 million pounds, a decrease of 21 million pounds or 1.3 per cent below that of October, 1963. Of this amount, 960 million pounds or 62 per cent was utilized in factory production, and approximately 444 million pounds or 29 per cent was used for fluid sales. During the January-October period, the estimated production was 16,017 million pounds, an increase of 30 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-October period amounted to 10,154 million pounds while fluid sales accounted for 4,253 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 444 million pounds in October, an increase of approximately 13 million pounds in comparison with October of the previous year. This included about 374 million pounds of fluid milk, comprising about 24 per cent of the farm milk supply, and fluid cream sales of 70 million pounds representing about 5 per cent. During the ten month period, fluid sales totalled 4,253 million pounds, an increase of 87 million pounds or 2.1 per cent over those of the corresponding 1963 period.

Farm Butter: Butter made on farms in October amounted to 449,000 pounds, decreasing 11 per cent from the corresponding month in 1963. For the January-October period, 3,990,000 pounds were produced, a decrease of 23 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in October amounted to \$45,987,000. This represented an increase of 3.0 per cent or \$1,340,000 in comparison with the same month last year. The weighted average value of \$3.27 per hundred pounds of milk was 12 cents higher than in October, 1963. Fluid milk at \$5.01 per hundred was 14 cents higher than in October, 1963. Creamery butter-fat increased from 69.5 cents to 72.4 cents per pound, and farm butter at 57 cents per pound was the same as in October, 1963. Milk used in manufacture averaged \$2.85 per hundred, 5 cents higher than in October, 1963. Cheese milk increased to \$3.01 per hundred, an increase of 10 cents per hundred in comparison with the same month a year earlier.

Farm cash income estimates cover all money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates. The estimates, however, do not make any allowances for costs incurred by farmers in the production of dairy products.

Production and Prices of Dairy Products in October, 1964.

Creamery Butter

Production: Creamery butter production amounted to 29.2 million pounds in October, 1964, a decrease of approximately 613 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on November 1, 1964, amounted to 138.1 million pounds, approximately 125.9 million pounds lower than at November 1 last year. On October 1, 1964, stock holdings at 160.5 million pounds were 108.5 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on October 1, plus production and imports during the month amounted to 189.8 million pounds of butter at October 31, 1964. This was a decrease of approximately 109.1 million pounds compared to the corresponding supply figure at October 31, 1963.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in October amounted to 34.1 million pounds of butter, an increase of 4.8 million pounds or 16.4 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.79 pounds as compared with 1.55 pounds in October, 1963.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 52 cents per pound in October, as against 50 3/4 cents in October, 1963.

Cheddar Cheese

Production: Cheddar cheese production in October amounted to approximately 13.8 million pounds, a decrease of about 0.8 million pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 38 1/2 cents per pound in October. The comparative price in 1963 was 38 3/8 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in October was approximately 1.6 million gallons or 49 thousand gallons less than that produced a year ago.
