LIBRARY

MARCH 1964

Price: \$ 2.00 per year

April 1964 5503-504 ROGER DUHAMEL, F.R.S.C., Queen's Printer and Controller of Stationery, Ottawa

The preliminary estimate of milk produced in March is 1,317,000,000 pounds. This is 1.7 per cent greater than production in the same month last year and would make the total estimate of production during the first three months of the year 3,584,000,000 pounds. This is 2.3 per cent higher than production in the January-March period a year ago.

Approximately 46 per cent of the milk produced in March, or 609,900,900 pounds, was used for factory dairy products. This was 4.1 per cent greater than factory utilization in March, 1963, and the second consecutive month to show increased quantities going into all products compared with the corresponding month a year ago. Slightly less than one per cent more milk was utilized for the manufacture of creamery butter in March than a year ago, while milk used for the manufacture of cheese, concentrated whole milk products and ice cream mix increased 16.9, 7.3 and 10.8 per cent, respectively. During the January-March period, 3.0 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. - Preliminary Estimates of Milk Equivalent of Dairy Factory Products,
March and January to March, 1963 and 1964

		March		J	anuary - Ma	rch
Product	1963	1964	Percentage Change	1963	1964	Percentage Change

Milk Products Ice Gream Mix	68,174 33,546	73,173 37,181	(+) 7.3 (+) 10.8	189,213 81,396	201,423 89,959	(+) 6.5 (+) 10.5
Totals	584,529	608,728	(+) 4.1	1,530,956	1,577,579	(+) 3.0

Fluid sales of milk and cream during March, for the purpose of the preliminary estimate, are calculated at 547,000,000 pounds, an increase of 3.5 per cent over fluid sales in March, 1963. This assumes the same relationship to year-earlier estimates as for the December-February period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.1 per cent above that used in March, 1963, while milk for livestock feeding dropped 19.8 per cent from that of a year ago. Farm dairy correspondents participating in the survey report slightly fewer cows kept on farms at March 15 and 1.8 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 0.4 per cent above the level at March 15, 1963. The estimate of total milk production is not based entirely on the farm sample but is the sum of the estimates of milk utilization.

Farm Milk Production, Utilisation and Income in February, 1964

Farm Milk Production: The estimated quantity of milk produced on farms in February amounted to 1,105 million pounds, an increase of 55 million pounds or 5.3 per cent over that of February, 1963. Of this amount, 461 million pounds or 42 per cent was utilized in factory production, and approximately 515 million pounds or 47 per cent was used for fluid sales. During the January-February period, the estimated production was 2,267 million pounds, an increase of 59 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-February period amounted to 969 million pounds while fluid sales accounted for 1,036 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 515 million pounds in February, an increase of approximately 39 million pounds in comparison with February of the previous year. This included about 434 million pounds of fluid milk, comprising about 40 per cent of the farm milk supply, and fluid cream sales of 81 million pounds representing about 7 per cent. During the two month period, fluid sales totalled 1,036 million pounds, an increase of 57 million pounds or 5.9 per cent over those of the corresponding 1963 period.

Farm Butter: Butter made on farms in February amounted to 273,000 pounds, decreasing 24 per cent from the corresponding month in 1963. For the January-February period, 569,000 pounds were produced, a decrease of 33 per cent from the same period last year.

Farm Gash Incomes Cash income from the sale of dairy products in February amounted to \$35,065,000. This represented an increase of 10.0 per cent or \$3,174,000 in comparison with the same month last year. The weighted average value of \$3.59 per hundred pounds of milk was 10 cents higher than in February, 1963. Fluid milk at \$4.85 per hundred was 10 cents higher than in February, 1963. Creamery butterfat increased from 67.5 cents to 69.4 cents per pound, and farm butter at 57 cents per pound was the same as in February, 1963. Milk used in manufacture averaged \$2.85 per hundred, 15 cents higher than in February, 1963. Cheese milk increased to \$2.87 per hundred, an increase of 7 cents per hundred in comparison with the same month a year earlier.

Farm cash income estimates cover all money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates. The estimates, however, do not make any allowances for costs incurred by farmers in the production of dairy products.

Production and Prices of Dairy Products in February, 1964

Creamery Butter

Productions Creamery butter production amounted to 13.6 million pounds in February, 1964, an increase of approximately 392 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on March 1, 1964, amounted to 188.9 million pounds, approximately 26.5 million pounds lower than at March 1 last year. On February 1, 1964, stock holdings at 205.0 million pounds were 22.9 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on February 1, plus production and imports during the month amounted to 218.6 million pounds of butter at February 29, 1964. This was a decrease of approximately 21.5 million pounds compared to the corresponding supply figure at February 28, 1963.

Domestic Disappearances The combined domestic disappearance of creamery butter and butter oil in February amounted to 28.7 million pounds of butter, an increase of 4.1 million pounds or 16.7 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.50 pounds as compared with 1.30 pounds in February, 1963.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 51 cents per pound in February, as against 51 1/4 cents in February, 1963.

Cheddar Cheese

Productions Cheddar cheese production in February amounted to approximately 4.0 million pounds, an increase of about 505 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 35 1/2 cents per pound in February. The comparative price in 1963 was 35 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in February was approximately 1.4 million gallons or 160 thousand gallons more than that produced a year ago.
