THE DAIRY REVIEW

Vol. 25, No. 4

APRIL 1964

Price: \$ 2.00 per year

Preliminary Indications of the Dairy Situation, April, 1964.

The preliminary estimate of milk produced in April is 1,578,000,000 pounds. This is 1.3 per cent less than production in the same month last year and would make the total estimate of production during the first four months of the year 5,155,000,000 pounds. This is 1.1 per cent higher than production in the January-April period a year ago.

Approximately 56 per cent of the milk produced in April, or 878,300,000 pounds, was used for dairy factory products. This was an increase of 0.9 per cent over factory utilization in April, 1963. Less milk was utilized for the manufacture of creamery butter during April, 1964, almost offsetting increases of 9.6, 3.3 and 1.1 per cent in milk utilization for factory cheese, concentrated whole milk products and ice cream mix, respectively. During the January-April period, 2.3 per cent more milk was used in dairy factory products than in the corresponding period in 1963.

Fluid sales of milk and cream during April, for the purpose of the preliminary estimate, are calculated at 515,000,000 pounds, an increase of 2.1 per cent over fluid sales in April, 1963. This assumes the same relationship to year-earlier estimates as the month of March.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.3 per cent below that used in April, 1963, while milk used for livestock feeding dropped 26.4 per cent from that of a year ago due to sharply reduced quantities in Ontario and Quebec. Farm dairy correspondents participating in the survey report 1.0 per cent fewer cows kept on farms at April 15, and 1.3 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 1.0 per cent above the level at April 15, 1963. The estimate of total milk production is not based entirely on the farm sample but is the sum of the estimates of milk utilization.

Farm Milk Production, Utilization and Income in March, 1964

Farm Milk Production: The estimated quantity of milk produced on farms in March amounted to 1,310 million pounds, an increase of 15 million pounds or 1.1 per cent over that of March, 1963. Of this amount, 609 million pounds or 46 per cent was utilized in factory production, and approximately 539 million pounds or 41 per cent was used for fluid sales. During the January-March period, the estimated production was 3,577 million pounds, an increase of 74 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-March period amounted to 1,578 million pounds while fluid sales accounted for 1,576 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 539 million pounds in March, an increase of approximately 11 million pounds in comparison with March of the previous year. This included about 452 million pounds of fluid milk, comprising about 34 per cent of the farm milk supply, and fluid cream sales of 87 million pounds representing about 7 per cent. During the three month period, fluid sales totalled 1,576 million pounds, an increase of 68 million pounds or 4.5 per cent over those of the corresponding 1963 period.

Farm Butter: Butter made on farms in March amounted to 270,000 pounds, decreasing 30 per cent from the corresponding month in 1963. For the January-March period, 839,000 pounds were produced, a decrease of 32 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in March amounted to \$39,929,000. This represented an increase of 5.4 per cent or \$2,039,000 in comparison with the same month last year. The weighted average value of \$3.48 per hundred pounds of milk was 8 cents higher than in March, 1963. Fluid milk at \$4.85 per hundred was 10 cents higher than in March, 1963. Creamery butter-fat increased from 68.2 cents to 69.9 cents per pound, and farm butter at 57 cents per pound was the same as in March, 1963. Milk used in manufacture averaged \$2.80 per hundred, 10 cents higher than in March, 1963. Cheese milk increased to \$2.85 per hundred, an increase of 11 cents per hundred in comparison with the same month a year earlier.

Farm cash income estimates cover all money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates. The estimates, however, do not make any allowances for costs incurred by farmers in the production of dairy products.

Production and Prices of Dairy Products in March, 1964

Creamery Butter

Production: Creamery butter production amounted to 17.8 million pounds in March, 1964, an increase of approximately 158 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on April 1, 1964, amounted to 176.3 million pounds, approximately 29.1 million pounds lower than at April 1 last year. On March 1, 1964, stock holdings at 188.9 million pounds were 26.5 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on March 1, plus production and imports during the month amounted to 206.7 million pounds of butter at March 31, 1964. This was a decrease of approximately 26.4 million pounds compared to the corresponding supply figure at March 31, 1963.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in March amounted to 29.5 million pounds of butter, an increase of 1.8 million pounds or 6.4 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.54 pounds as compared with 1.47 pounds in March, 1963.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 51 cents per pound in March, as against 51 1/4 cents in March, 1963.

Cheddar Cheese

Production: Cheddar cheese production in March amounted to approximately 6.3 million pounds, an increase of about 941 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 35 1/2 cents per pound in March. The comparative price in 1963 was 35 1/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in March was approximately 1.7 million gallons or 162 thousand gallons more than that produced a year ago.
