1965

1964

The preliminary estimate of milk produced in October is 1,493,000,000 pounds. This is 2.9 per cent lower than production in the same month last year and would make the total estimate of production during the first ten months of the year 15,912,000,000 pounds. This is 1.1 per cent below production in the January-October period a year ago.

Slightly over 61 per cent of the milk produced in October, or 915,000,000 pounds, was used for dairy factory products. This was 4.8 per cent below factory utilization in October, 1964. Approximately 8.8 per cent less milk was utilized for the manufacture of creamery butter during October, 1965, more than offsetting increases of 5.2, 4.0 and 6.8 per cent in milk utilization for factory cheese, concentrated whole milk products and ice cream mix, respectively. During the January-October period 1.7 per cent less milk was utilized for dairy factory products than in the corresponding period in 1964.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, October and January to October, 1964 and 1965.

		October				January - October		
Product	1964	1965		centage change	1964	1965	Percentage change	
	'00	0 lb.		%	1000) 1b.	%	
Creamery butter Factory cheese Concentrated whole	685,549 169,647	625,459 178,389		8.8	7,368,612 1,545,812		- 4.0 + 5.8	
milk products Ice cream mix	73,679 32,766	76,628 34,988		4.0	885,726 430,131	872,835 476,734	- 1.5 + 10.8	
Totals	961,641	915,464	-	4.8	10,230,281	10,055,468	- 1.7	

Fluid sales of milk and cream during October, for the purpose of the preliminary estimate, are calculated at 456,500,000 pounds, an increase of 2.8 per cent over fluid sales in October, 1964. This assumes the same relationship to yearearlier estimates as for the month of September.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 5.8 per cent below that used in October, 1964, while milk used for livestock feeding dropped 11.2 per cent from that a year ago. Reports from farm dairy correspondents participating in the survey, indicate 0.1 per cent fewer cows kept on farms at October 15, and 2.2 per cent more cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample decreased 4.8 per cent below the level at October 15, 1964.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN SEPTEMBER, 1965.

Farm Milk Production: The estimated quantity of milk produced on farms in September amounted to 1,707 million pounds, a decrease of 28 million pounds or 1.6 per cent below that of September, 1964. Of this amount, 1,149 million pounds or 68 per cent was utilized in factory production, and approximately 433 million pounds or 25 per cent was used for fluid sales. During the January-September period, the estimated production was 14,419 million pounds, a decrease of 126 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-September period amounted to 9,140 million pounds while fluid sales accounted for 3,892 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 433 million pounds in September, an increase of approximately 12 million pounds in comparison with September of the previous year. This included about 368 million pounds of fluid milk, comprising about 21 per cent of the farm milk supply, and fluid cream sales of 65 million pounds representing about 4 per cent. During the nine month period, fluid sales totalled 3,892 million pounds, an increase of 83 million pounds or 2.2 per cent over those of the corresponding 1964 period.

Farm Butter: Butter made on farms in September amounted to 340,000 pounds, decreasing 18 per cent from the corresponding month in 1964. For the January-September period, 2,847,000 pounds were produced, a decrease of 25 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in September amounted to \$52,028,000. This represented an increase of 3.8 per cent or \$1,882,000 in comparison with the same month last year. The weighted average value of \$3.29 per hundred pounds of milk was 16 cents higher than in September, 1964. Fluid milk at \$5.02 per hundred was 5 cents higher than in September, 1964. Creamery butterfat increased from 72.1 cents to 76.3 cents per pound, and farm butter at 57 cents per pound was the same as in September, 1964. Milk used in manufacture averaged \$2.90 per hundred, 13 cents higher than in September, 1964. Cheese milk increased to \$3.10 per hundred, an increase of 16 cents per hundred in comparison with the same month a year earlier.

Estimates of farm cash receipts cover money received by farmers for the sale of milk, cream and farm butter. Normally both federal and provincial government subsidies and bonuses are included in these estimates. With regard to current estimates, however, it has not been possible to take into account the supplementary and deficiency payments that will be paid with respect to the 1965-66 dairy year, nor do the estimates include retroactive premium payments by the province of Quebec on milk and cream for manufacturing purposes from October 1, 1964 to April 1, 1965. If possible, these payments will be reflected in year-end revisions for both 1964 and 1965. The estimates do not make any allowances for costs incurred by farmers in the production of dairy products.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN SEPTEMBER, 1965.

Creamery Butter

Production: Creamery butter production amounted to 34.7 million pounds in September, 1965, a decrease of approximately 2.2 million pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on October 1, 1965, amounted to 108.9 million pounds, approximately 52.3 million pounds lower than at October 1 last year. On September 1, 1965, stock holdings at 104.8 million pounds were 65.9 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on September 1, plus production and imports during the month amounted to 139.5 million pounds of butter at September 30, 1965. This was a decrease of approximately 68.1 million pounds compared to the corresponding supply figure at September 30, 1964.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in September amounted to 30.6 million pounds of butter, an increase of 2.1 million pounds or 7.2 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.58 pounds as compared with 1.48 pounds in September, 1964.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 55-1/8 cents per pound in September, as against 52 cents in September, 1964.

Cheddar Cheese

Production: Cheddar cheese production in September amounted to approximately 16.5 million pounds, an increase of about 642 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 41-3/4 cents per pound in September. The comparative price in 1964 was 38-3/8 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in September was approximately 2.2 million gallons or 160 thousand gallons more than that produced a year ago.
