Preliminary Indications of the Dairy Situation, March, 1965.

The preliminary estimate of milk produced in March is 1,273,000,000 pounds. This is 3.3 per cent higher than production in the same month last year and would make the total estimate of production during the first three months of the year 3,330,000,000 pounds. This is 0.1 per cent below production in the January-March period a year ago.

Approximately 51 per cent of the milk produced in March, or 652,000,000 pounds, was used for dairy factory products. This was 5.2 per cent above factory utilization in March, 1964, with increased quantities going into all products. Creamery butter production during the month accounted for 423,000,000 pounds, virtually the same as that in March a year ago, while milk used in the manufacture of factory cheese, concentrated whole milk products and ice cream mix increased 25.6, 6.8 and 13.8 per cent, respectively. During the January-March period, 0.6 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, March and January to March, 1964 and 1965.

Product	March			January - March		
	1964	1965	Percentage Change	1964	1965	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	423,095	423,283	-	1,102,326	1,072,236	- 2.7
Factory Cheese	85,960	107,938	+ 25.6	208,180	246,436	+ 18.4
Concentrated Whole Milk Products	74,561	79,607	+ 6.8	201,299	193,447	- 3.9
Ice Cream Mix	36,568	41,614	+ 13.8	90,993	100,264	+ 10.2
Totals	620,184	652,442	+ 5.2	1,602,798	1,612,383	+ 0.6

Fluid sales of milk and cream during March, for the purpose of the preliminary estimate, are calculated at 440,800,000 pounds, an increase of 1.0 per cent over fluid sales in March, 1964. This assumes the same relationship to year-earlier estimates as for the December-February period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 5.0 per cent below the quantity used in March, 1964, but with earlier freshenings this year, particularly in Quebec, milk used for livestock feeding was 10.5 per cent above that a year ago. Estimates of cow numbers, based on sample data, indicate that while total numbers were slightly lower than at March 15 last year there was a marked increase in the proportion being milked. Milk production per cow on reporting farms was also slightly greater than in March, 1964.

FARM MILK PRODUCTION, UTILIZATION AND INCOME IN FEBRUARY, 1965.

Farm Milk Production: The estimated quantity of milk produced on farms in February amounted to 993 million pounds, a decrease of 29 million pounds or 2.9 per cent below that of February, 1964. Of this amount, 457 million pounds or 46 per cent was utilized in factory production, and approximately 409 million pounds or 41 per cent was used for fluid sales. During the January-February period, the estimated production was 2,058 million pounds, a decrease of 44 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-February period amounted to 960 million pounds while fluid sales accounted for 836 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 409 million pounds in February, a decrease of approximately 7 million pounds in comparison with February of the previous year. This included about 346 million pounds of fluid milk, comprising about 35 per cent of the farm milk supply, and fluid cream sales of 63 million pounds representing about 6 per cent. During the two month period, fluid sales totalled 836 million pounds, a decrease of 1 million pounds or 0.1 per cent below those of the corresponding 1964 period.

Farm Butter: Butter made on farms in February amounted to 264,000 pounds, decreasing 30 per cent from the corresponding month in 1964. For the January-February period 553,000 pounds were produced, a decrease of 29 per cent from the same period last year.

Farm Cash Income: Cash income from the sale of dairy products in February amounted to \$31,227,000. This represented an increase of 1.2 per cent or \$367,000 in comparison with the same month last year. The weighted average value of \$3.60 per hundred pounds of milk was 11 cents higher than in February, 1964. Fluid milk at \$5.01 per hundred was 13 cents higher than in February, 1964. Creamery butter-fat increased from 70.0 cents to 71.6 cents per pound, and farm butter at 56 cents per pound was 1 cent lower than in February, 1964. Milk used in manufacture averaged \$2.92 per hundred, 7 cents higher than in February, 1964. Cheese milk increased to \$3.04 per hundred, an increase of 17 cents per hundred in comparison with the same month a year earlier.

Farm cash income estimates cover all money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates. The estimates, however, do not make any allowances for costs incurred by farmers in the production of dairy products.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN FEBRUARY, 1965.

Creamery Butter

Production: Creamery butter production amounted to 13.1 million pounds in February, 1965, a decrease of approximately 805 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on March 1, 1965, amounted to 75.5 million pounds, approximately 113.3 million pounds lower than at March 1 last year. On February 1, 1965, stock holdings at 89.8 million pounds were 114.6 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on February 1, plus production and imports during the month amounted to 102.9 million pounds of butter at February 28, 1965. This was a decrease of approximately 115.4 million pounds compared to the corresponding supply figure at February 29, 1964.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in February amounted to 27.4 million pounds of butter, a decrease of 1.0 million pounds or 3.7 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.41 pounds as compared with 1.48 pounds in February, 1964.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 52 3/4 cents per pound in February, as against 51 cents in February, 1964.

Cheddar Cheese

Production: Cheddar cheese production in February amounted to approximately 4.8 million pounds, an increase of about 667 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 38 cents per pound in February. The comparative price in 1964 was 35 1/2 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in February was approximately 1.3 million gallons or 24 thousand gallons less than that produced a year ago.

TABLE 2. Cottage Cheese: Production in the First Quarter of 1965, Compared with 1964.

Note: The data include both creamed and uncreamed cottage cheese
