THE DAIRY REVIEW

PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

JUNE 15th 1965

JUNE 15th 1964
DERIVED FROM REPORTS BY ABOUT 4,500 DAIRY CORRESPONDENTS

The preliminary estimate of milk produced in June is 2,135,000,000 pounds. This is 2.2 per cent lower than production in the same month last year and would make the total estimate of production during the first six months of the year 8,778,000,000 pounds. This is 1.1 per cent below production in the January-June period a year ago.

Slightly more than 72 per cent of the milk produced in June, or 1,544,000,000 pounds, was used for dairy factory products. This was 2.6 per cent below factory utilization in June, 1964. Creamery butter production during the month used 1,116,000,000 pounds of milk, 3.5 per cent less than in June, 1964, while milk used for factory cheese and concentrated whole milk products was down 0.5 and 8.3 per cent, respectively. Approximately 19.3 per cent more milk was used for the manufacture of ice cream mix than in June a year ago. During the January-June period, 1.6 per cent less milk was utilized for dairy factory products than in the corresponding period in 1964.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, June and January to June, 1964 and 1965.

Product		June		January - June			
	1964	1965	Percentage change	1964	1965	Percentage change	
	1000	1b.	7.	1000	1b.	%	
Creamery butter Factory cheese Concentrated whole			- 3.5 - 0.5	3,765,434 760,559		- 4.0 + 7.1	
milk products Ice cream mix		120,582 71,291	- 8.3 +19.3	530,326 243,364		- 3.0 +10.8	
Totals	1,585,138	1,544,335	- 2.6	5,299,683	5,212,500	- 1.6	

Fluid sales of milk and cream during June, for the purpose of the preliminary estimate, are calculated at 434,500,000 pounds, an increase of 1.5 per cent over fluid sales in June, 1964. This assumes the same relationship to year-earlier estimates as for the month of May.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 3.8 per cent below that used in June, 1964, while milk used for livestock feeding dropped 11.0 per cent from that a year ago. Reports from farm dairy correspondents participating in the survey, indicate 2.3 per cent fewer cows kept on farms at June 15, and 0.7 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, decreased 0.9 per cent below the level at June 15, 1964.

Drought conditions were experienced throughout most of Eastern Canada during the month of June. As a result, hay and pasture growth was restricted and yeilds reduced. In contrast, moisture conditions were generally excellent in nearly all sections of the Prairie Provinces and hay stands were excellent and pastures in good condition. Regional pasture conditions at June 15, 1964 and 1965, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN MAY, 1965.

Farm Milk Production: The estimated quantity of milk produced on farms in May amounted to 1,779 million pounds, a decrease of 78 million pounds or 4.2 per cent below that of May, 1964. Of this amount, 1,162 million pounds or 65 per cent was utilized in factory production, and approximately 432 million pounds or 24 per cent was used for fluid sales. During the January-May period, the estimated production was 6,644 million pounds, a decrease of 50 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-May period amounted to 3,668 million pounds while fluid sales accounted for 2,153 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 432 million pounds in May, an increase of approximately 6 million pounds in comparison with May of the previous year. This included about 365 million pounds of fluid milk, comprising about 20 per cent of the farm milk supply, and fluid cream sales of 67 million pounds representing about 4 per cent. During the five month period, fluid sales totalled 2,153 million pounds, an increase of 35 million pounds or 1.7 per cent over those of the corresponding 1964 period.

Farm Butter: Butter made on farms in May amounted to 354,000 pounds, decreasing 20 per cent from the corresponding month in 1964. For the January-May period, 1,468,000 pounds were produced, a decrease of 28 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in May amounted to \$51,327,000. This represented an increase of 1.5 per cent or \$764,000 in comparison with the same month last year. The weighted average value of \$3.22 per hundred pounds of milk was 16 cents higher than in May, 1964. Fluid milk at \$4.97 per hundred was 9 cents higher than in May, 1964. Creamery butter-fat increased from 70.2 cents to 74.9 cents per pound, and farm butter at 56 cents per pound was the same as in May, 1964. Milk used in manufacture averaged \$2.85 per hundred, 15 cents higher than in May, 1964. Cheese milk increased to \$2.96 per hundred, an increase of 7 cents per hundred in comparison with the same month a year earlier.

Estimates of Farm Cash Receipts cover money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates. The estimates, however, do not make any allowances for costs incurred by farmers in the production of dairy products.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN MAY, 1965.

Creamery Butter

Production: Creamery butter production amounted to 34.8 million pounds in May, 1965, a decrease of approximately 2.8 million pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on June 1, 1965, amounted to 61.6 million pounds, approximately 100.8 million pounds lower than at June 1 last year. On May 1, 1965, stock holdings at 59.6 million pounds were 109.2 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on May 1, plus production and imports during the month amounted to 94.4 million pounds of butter at May 31, 1965. This was a decrese of approximately 112.0 million pounds compared to the corresponding supply figure at May 31, 1964.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in May amounted to 27.9 million pounds of butter, a decrease of 2.9 million pounds or 9.5 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.43 pounds as compared with 1.60 pounds in May, 1964.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 54 7/8 cents per pound in May, as against 51 3/4 cents in May, 1964.

Cheddar Cheese

Production: Cheddar cheese production in May amounted to approximately 15.4 million pounds, a decrease of about 369 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 38 cents per pound in May. The comparative price in 1964 was 36 1/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in May was approximately 2.5 million gallons or 42 thousand gallons less than that produced a year ago.
