PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

AUGUST 15th 1964

DERIVED FROM REPORTS BY ABOUT 4,500 DAIRY CORRESPONDENTS

PASTURE CONDITIONS ON FARMS REPRING MER COWS

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, AUGUST 1965.

The preliminary estimate of milk produced in August is 1,884,000,000 pounds. This is 0.9 per cent lower than production in the same month last year and would make the total estimate of production during the first eight months of the year 12,711,000,000 pounds. This is 0.8 per cent below production in the January -August period a year ago.

Almost 70 per cent of the milk produced in August, or 1,317,000,000 pounds, was used for dairy factory products. This was 1.6 per cent below factory utilization in August, 1964. Creamery butter production during the month accounted for 948,000,000 pounds of milk, 3.8 per cent less than in August a year ago, while milk used in the manufacture of concentrated whole milk products declined 2.7 per cent. Approximately 3.0 and 25.1 per cent more milk was used for factory cheese and ice cream mix, respectively, than in August, 1964. During the January - August period, 1.2 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, Augustand January to August, 1964 and 1965.

Product	「長い」	August		J	anuary - Aug	ust
	1964	1965	Percentage change	1964	1965	Percentage
	'000	1b.	1 %	10	00 lb.	7/0
Creamery butter Factory cheese Concentrated whole	985,374 209,754	/	- 3.8 + 3.0		5,632,942(1) 1,254,141	- 3.2 + 5.8
milk products Ice cream mix	94,023 49,086	91,441 61,404		726,943 357,337		- 2.6 + 10.6
Totals	1,338,237	1,317,032	- 1.6	8,089,248	7,990,527(1)	- 1.2

(1) Includes an upward adjustment of 1,100,000 lb. of milk for July as a result of a revision to creamery butter production.

Fluid sales of milk and cream during August, for the purpose of the preliminary estimate, are calculated at 428,219,000 pounds, an increase of 2.5 per cent over fluid sales in August, 1964. This assumes the same relationship to year-earlier estimates as for the May - July period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 2.6 per cent below that used in August, 1964, while milk used for livestock feeding dropped 5.2 per cent from that a year ago. Reports from farm dairy correspondents participating in the survey, indicate 0.3 per cent more cows kept on farms at August 15, and 1.6 per cent more cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, decreased 2.7 per cent below the level at August 15, 1964.

Pasture conditions throughout most areas of Eastern Canada at August 15 were generally improved from last month except for parts of the Maritimes. Weather conditions remained favourable in Western Canada and pastures were in good condition. Regional pasture conditions at August 15, 1964 and 1965, are shown by the maps on the opposite page. FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JULY, 1965.

Farm Milk Production: The estimated quantity of milk produced on farms in July amounted to 2,048 million pounds, an increase of 16 million pounds or 0.8 per cent over that of July, 1964. Of this amount, 1,461 million pounds or 71 per cent was utilized in factory production, and approximately 442 million pounds or 22 per cent was used for fluid sales. During the January-July period, the estimated production was 10,827 million pounds, a decrease of 81 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-July period amounted to 6,673 million pounds while fluid sales accounted for 3,031 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 442 million pounds in July, an increase of approximately 18 million pounds in comparison with July of the previous year. This included about 365 million pounds of fluid milk, comprising about 18 per cent of the farm milk supply, and fluid cream sales of 77 million pounds representing about 4 per cent. During the seven month period, fluid sales totalled 3,031 million pounds, an increase of 61 million pounds or 2.0 per cent over those of the corresponding 1964 period.

Farm Butter: Butter made on farms in July amounted to 336,000 pounds, decreasing 26 per cent from the corresponding month in 1964. For the January-July period, 2,150,000 pounds were produced, a decrease of 27 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in July amounted to \$59,873,000. This represented an increase of 7.1 per cent or \$3,993,000 in comparison with the same month last year. The weighted average value of \$3.15 per hundred pounds of milk was 17 cents higher than in July, 1964. Fluid milk at \$4.96 per hundred was 11 cents higher than in July, 1964. Creamery butterfat increased from 70.7 cents to 76.2 cents per pound, and farm butter at 57 cents per pound was the same as in July, 1964. Milk used in manufacture averaged \$2.78 per hundred, 16 cents higher than in July, 1964. Cheese milk increased to \$3.00 per hundred, an increase of 11 cents per hundred in comparison with the same month a year earlier.

Estimates of farm cash receipts cover money received by farmers for the sale of milk, cream and farm butter. Government subsidies and bonuses are included in these estimates. The estimates, however, do not make any allowances for costs incurred by farmers in the production of dairy products.

PRODUCTION AND PRICES OF DAIRY PRODUC'S IN JULY, 1965.

Creamery Butter

Production: Creamery butter production amounted to 45.8 million pounds in July, 1965, an increase of approximately 112 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on August 1, 1965, amounted to 94.8 million pounds, approximately 74.2 million pounds lower than at August I last year. On July 1, 1965, stock holdings at 79.3 million pounds were 91.5 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on July 1, plus production and imports during the month amounted to 125.1 million pounds of butter at July 31, 1965. This was a decrease of approximately 91.4 million pounds compared to the corresponding supply figure at July 31, 1964.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in July amounted to 30.1 million pounds of butter, a decrease of 2.1 million pounds or 6.5 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.55 pounds as compared with 1.67 pounds in July, 1964.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 55 cents per pound in July, as against 52 cents in July, 1964.

Cheddar Cheese

Production: Cheddar cheese production in July amounted to approximately 18.7 million pounds, an increase of about 475 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 41-3/4 cents per pound in July. The comparative price in 1964 was 38-3/8 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in July was approximately 3.2 million gallons or 357 thousand gallons less than that produced a year ago.
