THE DAIRY REVIEW

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, JANUARY, 1966

The preliminary estimate of milk produced in January is 1,055,000,000 pounds. This is 0.5 per cent lower than milk production in January, 1965.

Slightly less than 47 per cent of the milk produced in January, or 493,000,000 pounds, was used for the manufacture of dairy factory products. This was 1.1 per cent below factory utilization in January, 1965, and was primarily due to a decrease of 6.9 per cent in the quantity of milk used in the manufacture of creamery butter. Almost two-thirds of the milk used in dairy factory products during January went into creamery butter. Approximately 19, 6 and 4 per cent more milk, respectively, was used for the manufacture of cheese, concentrated products and ice cream mix during January, 1966, than a year ago.

Revised data for 1964 and 1965 indicate that 11.3 billion pounds of milk went into the manufacture of dairy factory products last year. This is a decrease of 1.6 per cent from the corresponding figure for 1964. Creamery butter production required about 7.9 billion pounds of milk during 1965, 4 per cent less than in 1964. Factory cheese accounted for 1.9 billion pounds of milk, while the remaining 1.5 billion pounds of milk was used for concentrated whole milk products and ice cream mix.

TABLE 1. Milk Equivalent of Dairy Factory Products, January to December, 1964 and 1965 and January, 1965 and 1966

Totals	11,526,978	11,338,237	- 1.6	498,632	493,094	- 1.1	

(1) Revised. (2) Data include cheddar and other whole milk and cream cheese.

Fluid sales of milk and cream in January, for the purpose of the preliminary estimate, are calculated at 439,900,000 pounds, an increase of 2.9 per cent over fluid sales in January, 1965. This assumes the same relationship to year-earlier estimates as for the October-December period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 6.3 per cent below the quantity used in January, 1965, while milk used for livestock feeding was 10.7 per cent below that of a year ago. Reports from dairy correspondents participating in the survey indicate 1.0 per cent fewer milk cows kept on farms at January 15, and 1.2 per cent less cows being milked than on the same date last year.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN DECEMBER, 1965

Farm Milk Production: The estimated quantity of milk produced on farms in December amounted to 1,165 million pounds, a decrease of 13 million pounds or 1.1 per cent below that of December, 1964. Of this amount, 583 million pounds or 50 per cent was utilized in factory production, and approximately 460 million pounds or 39 per cent was used for fluid sales. During the January-December period, the estimated production was 18,322 million pounds, a decrease of 183 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-December period amounted to 11,338 million pounds while fluid sales accounted for 5,242 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 460 million pounds in December, an increase of approximately 13 million pounds in comparison with December of the previous year. This included about 383 million pounds of fluid milk, comprising about 33 per cent of the farm milk supply, and fluid cream sales of 77 million pounds representing about 6 per cent. During the twelve month period, fluid sales totalled 5,242 million pounds, an increase of 127 million pounds or 2.5 per cent over those of the corresponding 1964 period.

Farm Butter: Butter made on farms in December amounted to 270,000 pounds, decreasing 19 per cent from the corresponding month in 1964. For the January-December period, 3,745,000 pounds were produced, a decrease of 24 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in December amounted to \$38,391,000. This represented an increase of 2.8 per cent or \$1,063,000 in comparison with the same month last year. The weighted average value of \$3.68 per hundred pounds of milk was 11 cents higher than in December, 1964. Fluid milk at \$5.07 per hundred was 3 cents higher than in December, 1964. Creamery butter-fat increased from 74.8 cents to 76.7 cents per pound, and farm butter at 57 cents per pound was the same as in December, 1964. Milk used in manufacture averaged \$3.10 per hundred, 10 cents higher than in December, 1964. Cheese milk increased to \$3.33 per hundred, an increase of 14 cents per hundred in comparison with the same month a year earlier.

Farm cash receipts estimates cover all money received by farmers for the sale of milk, cream and farm butter, including government subsidies and bonuses where applicable. The estimates, however, exclude federal government Supplementary Payments made to producers in 1965 but include premium payments for milk and cream used exclusively for manufacturing purposes in Quebec from October 1, 1964 to December 31, 1965. Farm cash receipts do not make any allowances for costs incurred by farmers in the production of dairy products.

Supplementary Payments amounting to \$16,912,000 were distributed as follows: (in thousands of dollars) P.E.I., \$323; N.S., \$91; N.B., \$248; Que., \$6,750; Ont., \$6,044; Man., \$954; Sask., \$554; Alta., \$1,704; and B.C., \$244.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN DECEMBER, 1965

Creamery Butter

Production: Creamery butter production amounted to 16.3 million pounds in December, 1965, a decrease of approximately 993 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on January 1, 1966, amounted to 75.3 million pounds, approximately 24.7 million pounds lower than at January 1 last year. On December 1, 1965, stock holdings at 91.1 million pounds were 27.4 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on December 1, plus production and imports during the month, amounted to 107.4 million pounds of butter at December 31, 1965. This was a decrease of approximately 28.4 million pounds compared to the corresponding supply figure at December 31, 1964.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in December amounted to 32.1 million pounds of butter, a decrease of 1.9 million pounds or 5.5 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.64 pounds as compared with 1.76 pounds in December, 1964.

Exports: The combined exports of creamery butter and butter oil during 1965 amounted to 5,379,000 pounds of butter. This was made up of 141,000 pounds of butter exported as such and 4,190,000 pounds of butter oil amounting to 5,238,000 pounds of butter equivalent. Butter includes on adjustment for 2,789,000 pounds of butter exported during July, September, October and November, 1964, but due to lagged reporting credited to the first four months of 1965 in trade statistics.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 55-1/8 cents per pound in December, as against 53 cents in December, 1964.

Cheddar Cheese

Production: Cheddar cheese production in December amounted to approximately 8.2 million pounds, an increase of 759 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 41-3/4 cents per pound in December. The comparative price in 1964 was 38 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in December was approximately 1.6 million gallons or 118 thousand gallons more than that produced a year ago.

⁽¹⁾ At time of publication reports had not been received from 2 of 67 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces.

Livestock and Animal Products Section, Agriculture Division Issued Monday, March 7, 1966.

⁽²⁾ Mid-points of lowest and highest half cent range in which sales were reported.

SUPPLEMENT TO THE DAIRY REVIEW, JANUARY, 1966

The green pages of this supplement contain revised statistics of milk production and utilization for 1964 and 1965. Utilization data include butter made on farms, the milk equivalent of dairy factory products and fluid sales, milk fed to livestock and milk consumed in farm homes. The 1965 data differ from previously published information which appeared in monthly issues of The Dairy Review in that virtually 100 per cent of the dairy factories and milk distributors known to be operating in Canada have forwarded complete monthly information for the year. Some have corrected monthly reports forwarded earlier. When monthly publications go to press, publication deadlines make it necessary to estimate production and/or sales for late reporting firms. The 1964 data has been revised slightly from that shown in the supplement to the January 1965 issue of The Dairy Review. Minor changes result from further corrections submitted by firms for that year.

Milk production estimates are the sum of the quantities of milk used in factories, by milk distributors and on farms. Since reporters supply information in terms of dairy products, these products must be converted to milk equivalent. The conversion factors used are found on page 10 of the supplement.

The yellow pages contain revised farm cash receipts data that correspond to the revised production data appearing in the green pages. Generally the average values used are similar to those used for 1964 and 1965 in the monthly issues of The Dairy Review. Most of the revisions in farm cash receipts are caused by related changes in milk utilization estimates.

Farm cash receipts exclude federal government Supplementary Payments made to producers in 1965, but include premium payments for milk and cream used exclusively for manufacturing purposes in Quebec from October 1, 1964 to December 31, 1965. Supplementary payments amounting to \$16,912,000 were distributed as follows: (in thousands of dollars) P.E.I., \$323; N.S., \$91; N.B., \$248; Que., \$6,750; Ont., \$6,044; Man., \$954; Sask., \$554; Alta, \$1,704; and B.C., \$244.

⁽¹⁾ Data for Newfoundland are not available.

⁽²⁾ Data include milk equivalents of cheddar and other whole milk and cream cheese.

⁽³⁾ Milk equivalents of cottage cheese, though not available by months, are included in the yearly totals for 1964 and 1965.

⁽⁴⁾ Data include milk equivalents of concentrated whole milk products and ice cream mix.

⁽⁵⁾ Cream expressed as milk.

CONVERSION RATES

To obtain pounds butter-fat or milk equivalent, multiply the gallons or pounds of product by the conversion rates shown under respective headings below.

Product	Butter-fat	Milk(1)
	poun	ds
Butter	.81	23.4
Cheese (cheddar and other factory cheese	2/	11.0
made from whole milk)	. 34	11.0
Ice cream mix (gallons)(2)	1.21	34.0
Cottage cheese (creamed)	.04	1.14
Cream cheese	.32	10.3
Condensed milk	.08	2.3
Evaporated milk	.08	2.3
Partly skimmed evaporated milk	.04	1.14
Svaporated milk of 2% fat	.02	0.57
Whole milk powder	. 27	8.0
Gream powder	.735	21.0
Malted milk	.075	2.5
		Skim Milk
Condensed skim milk	-	3.0
Evaporated skim milk		3.0
Skim milk powder		11.0
Casein		40.0
Cottage cheese		7.0
		Buttermi.1k
Condensed buttermilk	D. 1717 - Uni-	3.0
Buttermilk powder	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	12.0
		Whey
Lactose (sugar of milk)		22.0
Whey powder	P. Sherall	20.0

⁽¹⁾ Milk with 3.5 per cent butter-fat.

NET WEIGHT OF STANDARD UNITS

	Gallons	Quarts	Pints			
Commodity	CONVERSION RATE TO POUNDS					
Whole milk	10.3	2.58	1.29			
Skim milk	10.4	2.59	1.30			
Cream	10.0	2.50	1.25			

⁽²⁾ Converted on basis of 11 pounds per gallon and 11 per cent milk fat by weight.
