#### PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, OCTOBER, 1966

The preliminary estimate of milk produced in October is 1,522,000,000 pounds. This is 3.2 per cent higher than production in the same month last year and would make the total estimate of production during the first ten months of the year 15,809,000,000 pounds. This is 0.7 per cent below production in the January-October period a year ago.

Almost 63 per cent of the milk produced in October, or 954,000,000 pounds, was used for dairy factory products. This was 4.7 per cent above factory utilization in October, 1965, with increased quantities going into all but concentrated whole milk products. Approximately 9.5 per cent less milk was utilized for the manufacture of concentrated whole milk products in October than a year ago, while that for butter, cheese and ice cream mix increased 4.7, 6.6 and 25.6 per cent, respectively. During the January-October period, 0.3 per cent less milk was utilized for dairy factory products than in the corresponding period in 1965.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, October and January to October, 1965 and 1966

Fluid sales of milk and cream during October, for the purpose of the preliminary estimate, are calculated at 447,500,000 pounds, an increase of 1.0 per cent over fluid sales in October, 1965. This assumes the same relationship to year-earlier estimates as for the month of September.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 2.0 per cent above that used in October, 1965, while milk used for livestock feeding rose 0.3 per cent above that a year ago. Reports from farm dairy correspondents participating in the survey, indicate 1.1 per cent fewer cows kept on farms at October 15, and 1.7 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 7.1 per cent above the level at October 15, 1965.

### FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN SEPTEMBER, 1966

Farm Milk production: The estimated quantity of milk produced on farms in September amounted to 1,735 million pounds, an increase of 15 million pounds or 0.9 per cent over that of September, 1965. Of this amount, 1,176 million pounds or 68 per cent was utilized in factory production, and approximately 438 million pounds or 25 per cent was used for fluid sales. During the January-September period, the estimated production was 14,287 million pounds, a decrease of 155 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-September period amounted to 9,092 million pounds while fluid sales accounted for 3,905 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 438 million pounds in September, an increase of approximately 4 million pounds in comparison with September of the previous year. This included about 374 million pounds of fluid milk, comprising about 21 per cent of the farm milk supply, and fluid cream sales of 64 million pounds representing about 4 per cent. During the nine month period, fluid sales totalled 3,905 million pounds, an increase of 7 million pounds or 0.2 per cent over those of the corresponding 1965 period.

Farm Butter: Butter made on farms in September amounted to 296,000 pounds, decreasing 14 per cent from the corresponding month in 1965. For the January-September period, 2,561,000 pounds were produced, a decrease of 11 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in September amounted to \$55,210,000. This represented an increase of 5.4 per cent or \$2,805,000 in comparison with the same month last year. The weighted average value of \$3.42 per hundred pounds of milk was 14 cents higher than in September, 1965. Fluid milk at \$5.52 per hundred was 50 cents higher than in September, 1965. Creamery butterfat decreased from 76.4 cents to 76.2 cents per pound, and farm butter at 59 cents per pound was 2 cents higher than in September, 1965. Cheese milk increased \$3.01 per hundred, 11 cents higher than in September, 1965. Cheese milk increased to \$3.12 per hundred, an increase of 3 cents per hundred in comparison with the same month a year earlier.

Farm cash receipts estimates cover all money received by farmers for the sale of milk, cream and farm butter. Where applicable, quality premiums, bonuses and patronage dividends are included in the estimates. The estimates do not make any allowances for costs incurred by farmers in the production of dairy products. During the current dairy year, April 1, 1966 to March 31, 1967, both federal and provincial subsidy payments with respect to manufacturing milk and cream are treated as Supplementary Payments and consequently are not reflected in average farm unit values and farm cash receipts published in this report. In addition to farm cash receipts, producers of manufacturing milk and cream in Canada receive direct payments from the Agricultural Stabilization Board of 75 cents a hundred for 3.5 per cent milk or the equivalent of 21.43 cents per pound butterfat on cream. Quebec producers also receive 5 cents per pound of fat of the product delivered from April 1 to September 30 and 10 cents per pound of fat of the product delivered from October 1 to March 31, and effective from October 1, 1966, Ontario producers also receive 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent milk fat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound milk fat on all cream grading Special and First Grade. The latter two subsidy payments are being paid by the provincial government concerned. PRODUCTION AND PRICES OF DAIRY PRODUCTS IN SEPTEMBER, 1966

Creamery Butter

Production: Creamery butter production amounted to 35.0 million pounds in September, 1966, a decrease of approximately 51 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on October 1, 1966, amounted to 86.9 million pounds, approximately 22.1 million pounds lower than at October 1 last year. On September 1, 1966, stock holdings at 84.0 million pounds were 21.1 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on September 1, plus production and imports during the month, amounted to 119.0 million pounds of butter at September 30, 1966. This was a decrease of approximately 21.2 million pounds compared to the corresponding supply figure at September 30, 1965.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in September amounted to 32.1 million pounds of butter, an increase of 0.9 million pounds or 3.0 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.62 pounds as compared with 1.59 pounds in September, 1965. Data excludes butter imported under special permit and processed into materials for food preparations for export.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 60 cents per pound in September, as against 55 1/8 cents in September, 1965.

#### Cheddar Cheese

Production: Cheddar cheese production in September amounted to approximately 17.7 million pounds, an increase of about 1.0 million pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 43 1/8 cents per pound in September. The comparative price in 1965 was 41 3/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in September was approximately 2.3 million gallons or 42 thousand gallons more than that produced a year ago.

## TABLE 10. Average Farm Values of Butter-fat, Milk and Farm Butter, by Province, September, 1965 and 1966(1)

(1) See paragraph 5, page 4, re farm cash receipts.

(2) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream.

(3) Not fully comparable to other provinces, weighted according to relative quantities of milk and cream deliveries.

(4) Average values for milk used in ice cream mix based on 10% quota milk and 20% surplus milk from whole milk producers, compared with averages based on manufacturing milk in 1965.

(5) Based on Class III accounting value.
