THE DAIRY REVIEW

Preliminary Indications of the Dairy Situation, March, 1966.

The preliminary estimate of milk produced in March is 1,254,000,000 pounds. This is 3.0 per cent lower than production in the same month last year and would make the total estimate of production during the first three months of the year 3,283,000,000 pounds. This is 1.7 per cent below production in the January-March period a year ago.

More than 51 per cent of the milk produced in March, or 645,000,000 pounds, was used for dairy factory products. This was 2.5 per cent below factory utilization in March, 1965. Creamery butter production during the month accounted for 421,000,000 pounds of milk, 2.7 per cent less than in March a year ago, while milk used in the manufacture of concentrated whole milk products declined 12.4 per cent. Approximately 0.6 and 11.5 per cent more milk was used for factory cheese and ice cream mix, respectively, than in March, 1965. During the January-March period, 1.3 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

Table 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products,
March and January to March, 1965 and 1966

		March		January - March			
Product	1965	1966	Percentage Change	1965	1966	Percentage Change

Ice Cream Mix	40,223	44,836	+ 11.5	97,941	104,981	+ 7.2	
Totals	661,121	644,717	- 2.5	1,613,036	1,591,500	- 1.3	

Fluid sales of milk and cream during March, for the purpose of the preliminary estimate, are calculated at 456,100,000 pounds, an increase of 0.7 per cent over fluid sales in March, 1965. This assumes the same relationship to year-earlier estimates as for the month of February.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 4.6 per cent below the quantity used in March, 1965, while milk for livestock feeding, partly reflecting earlier freshenings a year ago, was down 20.8 per cent. Reports from farm dairy correspondents participating in the survey, indicate 1.6 per cent fewer cows kept on farms at March 15, and 6.8 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 4.2 per cent above the level at March 15, 1965.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN FEBRUARY, 1966

Farm Milk Production: The estimated quantity of milk produced on farms in February amounted to 981 million pounds, a decrease of 7 million pounds or 0.7 per cent below that of February 1965. Of this amount, 454 million pounds or 46 per cent was utilized in factory production, and approximately 412 million pounds or 42 per cent was used for fluid sales. During the January-February period, the estimated production was 2,029 million pounds, a decrease of 20 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-February period amounted to 947 million pounds while fluid sales accounted for 843 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 412 million pounds in February, an increase of approximately 3 million pounds in comparison with February of the previous year. This included about 350 million pounds of fluid milk, comprising about 36 per cent of the farm milk supply, and fluid cream sales of 62 million pounds representing about 6 per cent. During the two month period, fluid sales totalled 843 million pounds, an increase of 7 million pounds or 0.8 per cent over those of the corresponding 1965 period.

Farm Butter: Butter made on farms in February amounted to 249,000 pounds, decreasing 6 per cent from the corresponding month in 1965. For the January-February period, 512,000 pounds were produced, a decrease of 8 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in February amounted to \$32,727,000. This represented an increase of 4.3 per cent or \$1,355,000 in comparison with the same month last year. The weighted average value of \$3.78 per hundred pounds of milk was 14 cents higher than in February, 1965. Fluid milk at \$5.16 per hundred was 15 cents higher than in February, 1965. Creamery butter-fat increased from 73.0 cents to 75.2 cents per pound, and farm butter at 58 cents per pound was 2 cents higher than in February, 1965. Milk used in manufacture averaged \$3.10 per hundred, 16 cents higher than in February, 1965. Cheese milk increased to \$3.31 per hundred, an increase of 13 cents per hundred in comparison with the same month a year earlier.

Farm cash receipts estimates cover all money received by farmers for the sale of milk, cream and farm butter, including government subsidies and bonuses where applicable. The estimates, however, exclude federal government Supplementary Payments made to producers in 1965 but include premium payments for milk and cream used exclusively for manufacturing purposes in Quebec from October 1, 1964 to date. Farm cash receipts do not make any allowances for costs incurred by farmers in the production of dairy products.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN FEBRUARY, 1966

Creamery Butter

Production: Creamery butter production amounted to 12.9 million pounds in February, 1966, a decrease of approximately 62 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on March 1, 1966, amounted to 46.4 million pounds, approximately 29.1 million pounds lower than at March 1 last year. On February 1, 1966, stock holdings at 62.8 million pounds were 26.5 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on February 1, plus production and imports during the month amounted to 75.7 million pounds of butter at February 28, 1966. This was a decrease of approximately 26.6 million pounds compared to the corresponding supply figure at February 28, 1965.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in February amounted to 29.2 million pounds of butter, an increase of 2.5 million pounds or 9.4 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.48 pounds as compared with 1.36 pounds in February, 1965.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 56 7/8 cents per pound in February, as against 52 3/4 cents in February, 1965.

Cheddar Cheese

Production: Cheddar cheese production in February amounted to approximately 4.7 million pounds, an increase of about 61 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 42 1/2 cents per pound in February. The comparative price in 1965 was 38 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in February was approximately 1.4 million gallons or 63 thousand gallons more than that produced a year ago.

1966	75.2	3.31	3.10	5.16	58	3.78

⁽¹⁾ Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream.

⁽²⁾ Not fully comparable to other provinces, weighted according to relative quantities

of milk and cream deliveries.

(3) Average values for milk used in ice cream mix based on 10% quota milk and 20% surplus milk from whole milk producers, compared with averages based on manufacturing milk in 1965.

⁽⁴⁾ Based on class III accounting value.
