PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

AUGUST 15th 1966

AUGUST 15th 1965

DERIVED FROM REPORTS BY ABOUT 4,500 DAIRY CORRESPONDENTS

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, AUGUST, 1966

The preliminary estimate of milk produced in August is 1,860,000,000 pounds. This is 0.7 per cent lower than production in the same month last year and would make the total estimate of production during the first eight months of the year 12,549,000,000 pounds. This is 1.4 per cent below production in the January-August period a year ago.

Slightly more than 70 per cent of the milk produced in August, or 1,303,000,000 pounds, was used for dairy factory products. This was 0.1 per cent below factory utilization in August, 1965. Creamery butter production during the month used 921,000,000 pounds of milk, 1.4 per cent less than in August, 1965. Factory utilization of milk for cheese production was 4.4 per cent greater than in August last year, while milk utilization for concentrated products and ice cream mix rose 1.9 per cent. During the January-August period, 1.1 per cent less milk was utilized for dairy factory products than in the corresponding period in 1965.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, August and January to August, 1965 and 1966

Product	August			January - August		
	1965	1966	Percentage change	1965	1966	Percentage change
	'000 lb.		%	'000 lb.		%
Creamery butter	934,221	920,837	- 1.4	5,636,007	5,508,547	- 2.3
Factory cheese	215,742	225,184	+ 4.4	1,268,048	1,359,808	+ 7.2
Concentrated whole milk products and ice cream mix (1).	154,366	157,291	+ 1.9	1,097,523	1,047,827	- 4.5
Totals	1,304,329	1,303,312	- 0.1	8,001,578	7,916,182	- 1.1

(1) Combined to avoid disclosing individual company operations. Also includes milk equivalent of cheese manufactured in Nova Scotia for July and August.

Fluid sales of milk and cream during August, for the purpose of the preliminary estimate, are calculated at 426,300,000 pounds, a decline of 0.7 per cent from fluid sales in August, 1965. This assumes the same relationship to year-earlier estimates as for the May-July period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 3.0 per cent below that used in August, 1965, while milk used for livestock feeding dropped 11.3 per cent from that a year ago. Reports from farm dairy correspondents participating in the survey, indicate 2.8 per cent fewer cows kept on farms at August 15, and 4.0 per cent less cows being milked than at the same date last year.

Pasture conditions throughout most areas of Canada at August 15, were generally improved from last month. However, dry weather has had an adverse effect on pastures in some areas of Eastern Canada particularly in the Maritimes and the lower St. Lawrence area. Early August rains over wide areas of the prairie provinces and normal August temperatures in British Columbia resulted in good pastures in Western Canada. Regional pasture conditions at August 15, 1965 and 1966, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JULY, 1966

Farm Milk production: The estimated quantity of milk produced on farms in July amounted to 1,963 million pounds, a decrease of 77 million pounds or 3.8 per cent below that of July, 1965. Of this amount, 1,396 million pounds or 71 per cent was utilized in factory production, and approximately 433 million pounds or 22 per cent was used for fluid sales. During the January-July period, the estimated production was 10,689 million pounds, a decrease of 161 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-July period amounted to 6,613 million pounds while fluid sales accounted for 3,037 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 433 million pounds in July, a decrease of approximately 11 million pounds in comparison with July of the previous year. This included about 359 million pounds of fluid milk, comprising about 18 per cent of the farm milk supply, and fluid cream sales of 74 million pounds representing about 4 per cent. During the seven month period, fluid sales totalled 3,037 million pounds, an increase of 2 million pounds or 0.1 per cent over those of the corresponding 1965 period.

Farm Butter: Butter made on farms in July amounted to 291,000 pounds, decreasing 14 per cent from the corresponding month in 1965. For the January-July period, 1,975,000 pounds were produced, a decrease of 9 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in July amounted to \$59,189,000. This represented a decrease of 0.7 per cent or \$414,000 in comparison with the same month last year. The weighted average value of \$3.24 per hundred pounds of milk was 10 cents higher than in July, 1965. Fluid milk at \$5.38 per hundred was 42 cents higher than in July, 1965. Creamery butterfat decreased from 75.9 cents to 74.7 cents per pound, and farm butter at 58 cents per pound was 1 cent higher than in July, 1965. Milk used in manufacture averaged \$2.95 per hundred, 17 cents higher than in July, 1965. Cheese milk decreased to \$2.95 per hundred, a decrease of 4 cents per hundred in comparison with the same month a year earlier.

Farm cash receipts estimates cover all money received by farmers for the sale of milk, cream and farm butter. Where applicable, quality premiums, bonuses and patronage dividends are included in the estimates. The estimates do not make any allowances for costs incurred by farmers in the production of dairy products. Beginning April 1, 1966, average unit values will no longer include the federal subsidy on butter nor the Quebec butterfat premium on manufacturing milk. The direct subsidy on butter has been discontinued and since the Quebec premium will be made directly to producers, such payments will be treated as Supplementary Payments and not considered in farm cash receipts. Previously, both the federal and Quebec payments were incorporated in the plant price to producers.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JULY, 1966

Creamery Butter

Production: Creamery butter production amounted to 42.2 million pounds in July, 1966, a decrease of approximately 3.0 million pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on August 1, 1966, amounted to 76.1 million pounds, approximately 19.3 million pounds lower than at August 1 last year. On July 1, 1966, stock holdings at 59.6 million pounds were 20.8 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on July 1, plus production and imports during the month, amounted to 101.8 million pounds of butter at July 31, 1966. This was a decrease of approximately 23.8 million pounds compared to the corresponding supply figure at July 31, 1965.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in July amounted to 25.6 million pounds of butter, a decrease of 4.4 million pounds or 14.7 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.30 pounds as compared with 1.53 pounds in July, 1965. Data excludes butter imported under special permit and processed into materials for food preparations for export.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 59 cents per pound in July, as against 55 cents in July, 1965.

Cheddar Cheese

Production: Cheddar cheese production in July amounted to approximately 19.7 million pounds, an increase of about 602 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 43 cents per pound in July. The comparative price in 1965 was 41 3/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in July was approximately 3.6 million gallons or 253 thousand gallons more than that produced a year ago.

(1) See paragraph 5, page 4, re farm cash receipts. (2) Included in milk for ice cream mix and concentration. (3) Includes a downward revision of \$116,000 for April and \$149,000 for May, 1966. Average farm values for April and May (Vol. 27, No. 5 and 6, Page 13) should be adjusted to read as follows: April creamery butter-fat - Alberta 61.9¢ and Canada 72.6¢ per lb.; average of total sales - Alberta \$2.90 and Canada \$3.41 per cwt. of milk. May creamery butter-fat - Alberta 61.5¢ and Canada 73.0¢ per lb.; average of total sales - Alberta \$2.78 and Canada \$3.26 per cwt. of milk.

(1) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream. (2) Included in milk for ice cream mix and concentration. (3) Not fully comparable to other provinces, weighted according to relative quantities of milk and cream deliveries. (4) Average values for milk used in ice cream mix based on 10% quota milk and 20% surplus milk from whole milk producers, compared with averages based on manufacturing milk in 1965. (5) Based on class III accounting value.

TABLE 16. Total Reported Domestic Sales of Skim Milk Powder with Related Price Data, Quebec and Ontario, August, 1966(1)

(Data on Export Sales not included due to disclosure provisions of Statistics Act)

Province and classification	Domestic sales of skim milk powder			
	Total reported	Range of reported prices(2)	Weighted average selling price F.O.B. plant (net)	Price range of "bulk of sales"
	'000 lb.	£ per lb.	£ per lb.	£ per lb.
Quebec:				
Spray	6,790	11.8 - 18.8	17.54	17.6 - 18.0
Roller	2,159	10.8 - 15.3	13.81	14.6 - 15.0
Feed	167	4.3 - 13.8	8.25	4.1 - 4.5
Ontario:				
Spray	6,064	15.3 - 19.8	17.78	17.6 - 18.0
Roller	1,517	12.8 - 15.8	14.54	14.1 - 14.5
Feed	91	4.8 - 14.8	12.89	12.6 - 13.0

(1) At time of publication reports had not been received from 5 of 67 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces.

(2) Mid-points of lowest and highest half cent range in which sales were reported.
