WHOLE MILK EQUIVALENT OF DAIRY FACTORY PRODUCTS, CANADA
BY MONTHS 1965 AND 1966

PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

SEPTEMBER 15th 1966

SEPTEMBER 15th 1965

DERIVED FROM REPORTS BY ABOUT 4,500 DAIRY CORRESPONDENTS

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, SEPTEMBER, 1966

The preliminary estimate of milk produced in September is 1,727,000,000 pounds. This is 0.4 per cent higher than production in the same month last year and would make the total estimate of production during the first nine months of the year 14,279,000,000 pounds. This is 1.1 per cent below production in the January-September period a year ago.

Slightly more than 68 per cent of the milk produced in September, or 1,176,000,000 pounds, was used for dairy factory products. This was 1.3 per cent above factory utilization in September, 1965. Creamery butter production during the month used 820,000,000 pounds of milk, 0.1 per cent less than in September, 1965, while milk used for concentrated whole milk products was down 9.4 per cent. Approximately 7.5 and 18.3 per cent more milk was utilized for the manufacture of factory cheese and ice cream mix, respectively, than in September a year ago. During the January-September period, 0.8 per cent less milk was utilized for dairy factory products than in the corresponding period in 1965.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, September and January to September, 1965 and 1966

Product	September			January - September		
	1965	1966	Percentage change	1965	1966	Percentage change
	'000 lb.		%	'000 lb.		%
Creamery butter	821,013	819,819	- 0.1	6,457,020	6,328,366	- 2.0
Factory cheese(1) ..	205,139	220,546	+ 7.5	1,473,187	1,582,070	+ 7.4
Concentrated whole milk products	88,109	79,832	- 9.4	793,604	692,494	- 12.7
Ice cream mix	47,427	56,091	+ 18.3	439,455	489,540	+ 11.4
Totals	1,161,688	1,176,288	+ 1.3	9,163,266	9,092,470	- 0.8

(1) Cumulative data for 1966 adjusted to include the milk equivalent of cheese manufactured in Nova Scotia during July and August.

Fluid sales of milk and cream during September, for the purpose of the preliminary estimate, are calculated at 430,400,000 pounds, a decline of 0.8 per cent from fluid sales in September, 1965. This assumes the same relationship to year-earlier estimates as for the June-August period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.6 per cent above that used in September, 1965, while milk used for livestock feeding dropped 8.4 per cent from that a year ago. Reports from farm dairy correspondents participating in the survey, indicate 2.2 per cent fewer cows kept on farms at September 15, and 2.7 per cent less cows being milked than at the same date last year.

Pasture conditions, as reported at September 15, indicated considerable local variability in most areas of Canada but compared quite favourably with the generally good conditions at the same date a year ago. Early September rains benefited pastures in many areas of Eastern Canada and particularly in British Columbia. The Prairie Provinces had exceptionally favourable harvest weather as compared with last year's cold, wet harvest season but pastures in most districts were becoming short with lack of moisture. Regional pasture conditions at September 15, 1965 and 1966, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN AUGUST, 1966

Farm Milk production: The estimated quantity of milk produced on farms in August amounted to 1,863 million pounds, a decrease of 10 million pounds or 0.5 per cent below that of August, 1965. Of this amount, 1,303 million pounds or 70 per cent was utilized in factory production, and approximately 430 million pounds or 23 per cent was used for fluid sales. During the January-August period, the estimated production was 12,552 million pounds, a decrease of 170 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January - August period amounted to 7,916 million pounds while fluid sales accounted for 3,467 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 430 million pounds in August, an increase of approximately 1 million pounds in comparison with August of the previous year. This included about 364 million pounds of fluid milk, comprising about 20 per cent of the farm milk supply, and fluid cream sales of 66 million pounds representing about 3 per cent. During the eight month period, fluid sales totalled 3,467 million pounds, an increase of 3 million pounds or 0.1 per cent over those of the corresponding 1965 period.

Farm Butter: Butter made on farms in August amounted to 290,000 pounds, decreasing 20 per cent from the corresponding month in 1965. For the January - August period, 2,265,000 pounds were produced, a decrease of 10 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in August amounted to \$57,102,000. This represented an increase of 2.8 per cent or \$1,551,000 in comparison with the same month last year. The weighted average value of \$3.29 per hundred pounds of milk was 9 cents higher than in August, 1965. Fluid milk at \$5.47 per hundred was 49 cents higher than in August, 1965. Creamery butterfat decreased from 76.3 cents to 74.0 cents per pound, and farm butter at 59 cents per pound was 2 cents higher than in August, 1965. Milk used in manufacture averaged \$2.99 per hundred, 17 cents higher than in August, 1965. Cheese milk decreased to \$3.02 per hundred, a decrease of 1 cent per hundred in comparison with the same month a year earlier.

Farm cash receipts estimates cover all money received by farmers for the sale of milk, cream and farm butter. Where applicable, quality premiums, bonuses and patronage dividends are included in the estimates. The estimates do not make any allowances for costs incurred by farmers in the production of dairy products. Beginning April 1, 1966, average unit values will no longer include the federal subsidy on butter nor the Quebec butterfat premium on manufacturing milk. The direct subsidy on butter has been discontinued and since the Quebec premium will be made directly to producers, such payments will be treated as Supplementary Payments and not considered in farm cash receipts. Previously, both the federal and Quebec payments were incorporated in the plant price to producers.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN AUGUST, 1966

Creamery Butter

Production: Creamery butter production amounted to 39.4 million pounds in August, 1966, a decrease of approximately 572 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on September 1, 1966, amounted to 84.0 million pounds, approximately 21.1 million pounds lower than at September 1, last year. On August 1, 1966, stock holdings at 76.1 million pounds were 19.3 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on August 1, plus production and imports during the month amounted to 115.5 million pounds of butter at August 31, 1966. This was a decrease of approximately 19.8 million pounds compared to the corresponding supply figure at August 31, 1965.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in August amounted to 31.5 million pounds of butter, an increase of 1.2 million pounds or 4.1 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.59 pounds as compared with 1.54 pounds in August, 1965.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 59 cents per pound in August, as against 55 1/8 cents in August, 1965.

Cheddar Cheese

Production: Cheddar cheese production in August amounted to approximately 18.6 million pounds, an increase of about 743 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 43 cents per pound in August. The comparative price in 1965 was 41 3/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in August was approximately 3.1 million gallons or 76 thousand gallons less than that produced a year ago.

- (1) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream.
- (2) Not fully comparable to other provinces, weighted according to relative quantities of milk and cream deliveries.
- (3) Average values for milk used in ice cream mix based on 10% quota milk and 20% surplus milk from whole milk producers, compared with averages based on manufacturing milk in 1965.
- (4) Based on Class III accounting value.

TABLE 12. Creamery Butter: Domestic Disappearance for August, January to August, and January to December, 1957 to 1966
