THE DAIRY REVIEW

The preliminary estimate of milk produced in January is 1,084,000,000 pounds. This is 2.4 per cent higher than milk production in January, 1966.

Almost 49 per cent of the milk produced in January, or 528,000,000 pounds, was used for dairy factory products. This was 4.8 per cent above factory utilization in January, 1966. Creamery butter production during the month accounted for 338,000,000 pounds of milk, 6.0 per cent more than in January a year ago, while milk used in the manufacture of cheese and ice cream mix increased 0.2 and 25.8 per cent, respectively. About 4.9 per cent less milk was utilized for the manufacture of concentrated whole milk products in January than a year ago.

Revised data for 1965 and 1966 indicate that 11.5 billion pounds of milk went into the manufacture of dairy factory products last year. This is an increase of 0.6 per cent over the corresponding figure for 1965. Creamery butter production required about 7.8 billion pounds of milk during 1966, 1.0 per cent less than in 1965. All factory cheese accounted for 2.2 billion pounds of milk, while the remaining 1.5 billion pounds of milk was used for concentrated whole milk products and ice cream mix.

(1) Revised. (2) Data include cheddar and other whole milk and cream cheese.

Fluid sales of milk and cream in January, for the purpose of the preliminary estimate, are calculated at 435,300,000 pounds, an increase of 0.7 per cent over fluid sales in January, 1966. This assumes the same relationship to year-earlier estimates as for the October-December period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 0.1 per cent above the quantity used in January, 1966, while milk used for livestock feeding was 3.3 per cent below that of a year ago. Reports from dairy correspondents participating in the survey indicate 1.0 per cent fewer milk cows kept on farms at January 15, but 2.3 per cent more cows being milked than on the same date last year.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN DECEMBER, 1966

Farm Milk production: The estimated quantity of milk produced on farms in December amounted to 1,195 million pounds, an increase of 25 million pounds or 2.1 per cent over that of December, 1965. Of this amount, 608 million pounds or 51 per cent was utilized in factory production, and approximately 469 million pounds or 39 per cent was used for fluid sales. During the January-December period, the estimated production was 18,375 million pounds, an increase of 15 million pounds over that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-December period amounted to 11,484 million pounds while fluid sales accounted for 5,255 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 469 million pounds in December, an increase of approximately 12 million pounds in comparison with December of the previous year. This included about 394 million pounds of fluid milk, comprising about 33 per cent of the farm milk supply, and fluid cream sales of 75 million pounds representing about 6 per cent. During the twelve month period, fluid sales totalled 5,255 million pounds, an increase of 49 million pounds over those of the corresponding 1965 period.

Farm Butter: Butter made on farms in December amounted to 250,000 pounds, decreasing 6 per cent from the corresponding month in 1965. For the January - December period, 3,311,000 pounds were produced, a decrease of 11 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in December amounted to \$41,698,000. This represented an increase of 7.7 per cent or \$2,969,000 in comparison with the same month last year. The weighted average value of \$3.87 per hundred pounds of milk was 18 cents higher than in December, 1965. Fluid milk at \$5.57 per hundred was 50 cents higher than in December, 1965. Creamery butterfat decreased from 77.5 cents to 75.3 cents per pound, and farm butter at 60 cents per pound was 3 cents higher than in December, 1965. Milk used in manufacture averaged \$3.23 per hundred, 9 cents higher than in December, 1965. Cheese milk decreased to \$3.19 per hundred, a decrease of 14 cents per hundred in comparison with the same month a year earlier.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payments during the 1965-66 dairy year commenced in August and amounted to approximately 20 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1966 these payments were increased to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound for butterfat or cream. On April 1, 1966 the Quebec government started to make direct payments to farmers which consisted of 5 cents per pound fat for the period April to September inclusive and 10 cents per pound for the months October 1966 to March 1967. Effective from October 1, 1966 to March 31, 1967, Ontario producers also receive 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent milk fat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound fat on all cream grading Special and First Grade. (Total federal and provincial direct payments on page 5).

These direct payments have been designated as Supplementary Payments and are as follows in thousands of dollars for each province for 1966 (1965 in brackets): Canada, \$68,400 (\$16,912); P.E.I., \$924 (\$323); N.S., \$385 (\$91); N.B., \$669 (\$248); Que., \$33,208 (\$6,750); Ont., \$22,429 (\$6,044); Man., \$2,429 (\$954); Sask., \$2,632 (\$554); Alta., \$4,670 (\$1,704); and B.C., \$1,054 (\$244).

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN DECEMBER, 1966

Creamery Butter

Production: Creamery butter production amounted to 16.4 million pounds in December, 1966, an increase of approximately 43 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on January 1, 1967, amounted to 61.0 million pounds, approximately 14.9 million pounds lower than at January 1 last year. On December 1, 1966, stock holdings at 73.0 million pounds were 18.1 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on December 1, plus production and imports during the month, amounted to 89.4 million pounds of butter at December 31, 1966. This was a decrease of approximately 18.1 million pounds compared to the corresponding supply figure at December 31, 1965.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in December amounted to 28.4 million pounds of butter, a decrease of 3.2 million pounds or 10.2 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.42 pounds as compared with 1.61 pounds in December, 1965.

Exports: The combined exports of creamery butter and butter oil during 1966 amounted to 681,000 pounds of butter. This was made up of 161,000 pounds of butter exported as such and 416,000 pounds of butter oil amounting to 520,000 pounds of butter equivalent.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 61 cents per pound in December, as against 55 1/8 cents in December, 1965.

Cheddar Cheese

Production: Cheddar cheese production in December amounted to approximately 8.9 million pounds, an increase of 83 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 43 1/4 cents per pound in December. The comparative price in 1965 was 41 3/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in December was approximately 1.7 million gallons or 92 thousand gallons more than that produced a year ago.

⁽¹⁾ At time of publication reports had not been received from 4 of 66 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces.

Livestock and Animal Products Section, Agriculture Division Issued Tuesday, March 7, 1966

⁽²⁾ Mid-points of lowest and highest half cent range in which sales were reported.

The green pages of this supplement contain revised statistics of milk production and utilization for 1965 and 1966. Utilization data include butter made on farms, the milk equivalent of dairy factory products and fluid sales, milk fed to livestock and milk consumed in farm homes. The 1966 data differ from previously published information which appeared in monthly issues of The Dairy Review in that virtually 100 per cent of the dairy factories and milk distributors known to be operating in Canada have forwarded complete monthly information for the year. Some have corrected monthly reports forwarded earlier. When monthly publications go to press, publication deadlines make it necessary to estimate production and/or sales for late reporting firms. The 1965 data has been revised slightly from that shown in the supplement to the January 1966 issue of The Dairy Review. Minor changes result from further corrections submitted by firms for that year.

Milk production estimates are the sum of the quantities of milk used in factories, by milk distributors and on farms. Since reporters supply information in terms of dairy products, these products must be converted to milk equivalent. The conversion factors used are found on page 10 of the supplement.

The yellow pages contain revised farm cash receipts data that correspond to the revised production data appearing in the green pages. Generally the average values used are similar to those used for 1965 and 1966 in the monthly issues of The Dairy Review. Most of the revisions in farm cash receipts are caused by related changes in milk utilization estimates.

Farm cash receipts exclude federal and provincial Supplementary Payments made to producers in 1965 and 1966, but include butter-fat premium payments for milk and cream used exclusively for manufacturing purposes in Quebec during the period January 1, 1965 to March 31, 1966, inclusive. Combined federal and provincial Supplementary Payments in 1966 (1965 in brackets) were distributed as follows: (in thousands of dollars) Canada, \$68,400 (\$16,912); P.E.I., \$924 (\$323); N.S., \$385 (\$91); N.B., \$669 (\$248); Que., \$33,208 (\$6,750); Ont., \$22,429 (\$6,044); Man., \$2,429 (\$954); Sask., \$2,632 (\$554); Alta., \$4,670 (\$1,704); and B.C. \$1,054 (\$244).

The pink pages contain revised statistics of quarterly cottage cheese production, as well as monthly ice cream, milkshake mix, sherbet, water ices and ice milk production for 1965 and 1966.

APPENDIX

CONVERSION RATES

To obtain pounds butter-fat or milk equivalent, multiply the gallons or pounds of product by the conversion rates shown under respective headings below.

Product	Butter-fat	Milk(1)
	pour	nds
Butter	.81	23.4
Cheese (cheddar and other factory cheese made from whole milk)	.34	11.0
Ice cream mix (gallons)(2)	1.21	34.0
Cottage cheese (creamed)	.04	1.14
Cream cheese	. 32	10.3
Condensed milk	. 08	2.3
Evaporated milk	.08	2.3
Partly skimmed evaporated milk	.04	1.14
Evaporated milk of 2% fat	.02	0.57
Whole milk powder	. 27	8.0
Cream powder	.735	21.0
Malted milk	.075	2.5
		Skim Milk
Condensed skim milk	-	3.0
Evaporated skim milk	-	3.0
Skim milk powder	- 60-	11.0
Casein	-	40.0
Cottage cheese		7.0
		Buttermilk
Condensed buttermilk		3.0
Buttermilk powder	-	12.0
		Whey
Lactose (sugar of milk)		22.0
Whey powder		20.0

⁽¹⁾ Milk with 3.5 per cent butter-fat.

NET WEIGHT OF STANDARD UNITS

	Gallons	Quarts	Pints			
Commod1ty	CONVERSION RATE TO POUNDS					
Whole milk	10.3	2.58	1-29			
Skim milk	10.4	2.59	1.30			
Cream	10.0	2.50	1.25			

⁽²⁾ Converted on basis of 11 pounds per gallon and 11 per cent milk fat by weight.
