Preliminary Indications of the Dairy Situation, November, 1967

The preliminary estimate of milk produced in November is 1,238,000,000 pounds which is 0.4 per cent above production in the corresponding month last year. This would make the total estimate of production during the first eleven months of the year 17,003,000,000 pounds or 0.9 per cent below that for the January-November period a year ago.

Almost 55 per cent of the milk produced in November, or 680,000,000 pounds, was used for dairy factory products. This is 0.9 per cent below factory utilization in November, 1966. Creamery butter production during the month accounted for 436,000,000 pounds of milk, 2.2 per cent less than in November a year ago; however, milk used for factory cheese decreased only 0.7 per cent from November 1966. Approximately 6.9 and 3.2 per cent more milk was used for concentrated whole milk products and ice cream mix, respectively, than in November 1966. During the January-November period 1.8 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, November and January to November, 1966 and 1967

Product	November			January - November		
	1966	1967	Percentage Change	1966	1967	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	445,559	435,825	-2.2	7,434,695	7,231,091	-2.7
Factory Cheese	148,760	147,661	-0.7	2,001,336	1,956,389	-2.2
Concentrated Whole Milk Products	49,753	53,198	+6.9	816,124	768,570	-5.8
Ice Cream Mix	41,847	43,182	+3.2	593,034	697,034	+17.5
Totals	685,919	679,866	-0.9	10,845,189	10,653,084	-1.8

Fluid sales of milk and cream during November, for the purpose of the preliminary estimate, are calculated at 444,000,000 pounds of milk, an increase of 2.6 per cent from the sales in November 1966. This assumes the same relationship to year-earlier estimates as for the month of October.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 0.3 per cent above that used in November 1966, while milk used for livestock feeding rose 1.2 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 3.4 per cent fewer cows kept on farms at November 15, and 2.2 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, decreased 1.3 per cent from the level at November 15, 1966.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN OCTOBER, 1967

Farm Milk Production: The estimated quantity of milk produced on farms in October amounted to 1,546 million pounds, an increase of 31 million pounds or 2.0 per cent over that of October, 1966. Of this amount, 974 million pounds or 63 per cent was utilized in factory production, and approximately 453 million pounds or 29 per cent was used for fluid sales. During the January-October period, the estimated production was 15,765 million pounds, a decrease of 152 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-October period amounted to 9,973 million pounds while fluid sales accounted for 4,402 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 453 million pounds in October, an increase of approximately 11 million pounds from October of last year. This included about 384 million pounds of fluid milk, comprising about 25 per cent of the farm milk supply, and fluid cream sales of 69 million pounds representing about 4 per cent. During the ten month period, fluid sales totalled 4,402 million pounds, an increase of 49 million pounds or 1.1 per cent over those of the corresponding period a year earlier.

Farm Butter: Butter made on farms in October amounted to 263,000 pounds, decreasing 6 per cent from the corresponding month in 1966. For the January-October period, 2,637,000 pounds were produced, a decrease of 5 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in October amounted to \$54,603,000. This represented an increase of 9.2 per cent or \$4,584,000 from the corresponding month last year. The weighted average value of \$3.83 per hundred pounds of milk was 25 cents higher than in October, 1966. Fluid milk at \$5.94 per hundred was 37 cents higher than in October, 1966. Creamery butterfat increased from 76.1 cents to 81.8 cents per pound, and farm butter at 61 cents per pound was 2 cents higher than in October, 1966. Milk used in manufacture averaged \$3.42 per hundred, 26 cents higher than in October, 1966. Cheese milk increased to \$3.42 per hundred, an increase of 19 cents per hundred from the corresponding month a year earlier. Approximately 82 per cent of all milk utilized for factory dairy products was eligible for Federal government Subsidy in October, 1967.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1966-67 dairy year commenced on April 1, 1966, and amounted to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound of butterfat. On April 1, 1967, these payments were increased to \$1.10 per hundred pounds for milk and 31.42 cents per pound of butterfat. Unlike the previous program, manufacturing milk and cream shippers will be allotted a quota based on their 1966-67 shipments and will not be eligible if any portion of their deliveries is used for fluid purposes. Effective April 1, 1967, the Quebec government discontinued to make direct payments to farmers for manufacturing milk and cream. These payments had amounted to approximately 5 and 10 cents per pound butterfat depending on the period of the year. Also, effective the same date, direct payments of 25 cents on all industrial, secondary and excess milk and 10 cents on cream were stopped by the Ontario government.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN OCTOBER, 1967

Creamery Butter

Production: Creamery butter production amounted to 28.7 million pounds in October, 1967, an increase of approximately 1.2 million pounds from production in the corresponding month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on November 1, 1967, amounted to 81.1 million pounds, approximately 2.4 million pounds lower than at November 1 last year. On October 1, 1967, stock holdings at 83.9 million pounds were 2.5 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on October 1, plus production and imports during the month, amounted to 112.6 million pounds of butter at October 31, 1967. This was a decrease of approximately 1.3 million pounds compared to the corresponding supply figure at October 31, 1966.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in October amounted to 31.5 million pounds of butter, an increase of 1.1 million pounds or 3.6 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.56 pounds as compared with 1.52 pounds in October, 1966.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in October, as against 60 3/4 cents in October, 1966.

Cheddar Cheese

Production: Cheddar cheese production in October amounted to approximately 14.4 million pounds, a decrease of about 1.2 million pounds from production in the corresponding month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 46 1/4 cents per pound in October. The comparative price in 1966 was 43 1/8 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in October was approximately 1.9 million gallons or 221 thousand gallons more than that produced a year ago.
